Since last February, when this mill was gotten in running order, Mr. Neumann has produced about 100,000 tons of cotton seed, obtained in this immediate section from twelve to fifteen dollars, though they are now paying less, as the seed is so good. They expect, on account of the low price of the seed, to obtain all the seed they may want at low rates, and they also expect a great increase in the price of the refined article, which they are now prepared to furnish on any condition.

A CASE OF DISTINCTION

That is in issue between Mack and Bauman.
