

Debunking Dow's Dope On State Highways

R. C. Dow, Democratic candidate for Governor, speaking at Artesia, as reported by the Associated Press, made the following statements:

"At the close of the Hannett Administration we owed only \$400,000 on account of roads."

"During the past two years the Republicans have borrowed \$2,500,000 for roads. This policy was protested by me before a dollar was borrowed. The interest alone will run to more than \$400,000."

"We could have gone on a cash basis in a few months because we were collecting one-half million dollars per year gasoline taxes."

It is almost beyond belief that the Democratic party should nominate for Governor a man who knows so little about public affairs.

The state owed \$2,500,000 on account of roads at the end of the Hannett administration. Both principal and interest of that debt has to be paid out of taxes upon property.

The Dillon administration found no money in the State Road Fund and the people everywhere were demanding good roads. It must either find a way to raise money or stop building roads. It found a way, in spite of the active opposition and law suits by Mr. Dow, who was then Attorney General.

The 5-cent gasoline tax law and the issuing of debentures to anticipate the proceeds of that tax provided the money to go ahead with road construction.

The Dillon administration has built more roads, and maintained the roads in better condition than any previous administration; and at less cost to the people of the state.

It will not cost the people of the state one dollar for interest on these debentures. The taxes on the increased quantity of gasoline used on the roads built with this "borrowed money" will more than pay the interest.

The gasoline taxes paid by tourists from other states will pay both principal and interest of the debentures.

If the gasoline taxes were only half a million dollars per year, as Mr. Dow stated they were under Hannett's administration, they would not pay half the cost of maintaining our roads, and would leave nothing for construction.

Because of the progressive program of the Dillon administration gasoline tax receipts have increased to \$160,000 per month during this fiscal year. The State Treasurer sets aside each month from gasoline taxes enough to create a sinking fund to pay principal and interest of the debentures. This amount is only \$29,350 per month in 1928. It will increase gradually to a maximum of \$49,500 per month in 1930, and then decrease as the debentures are paid off.

Mr. Dow also stated: "In the few months before election we are spending our past income and the future income of the state on a great road program in which hundreds of men are employed." He tries to make the people believe that the Republicans have delayed road work and mortgaged the gasoline tax for years to come in order to put on this big program so as to win the election.

The facts are that the Dillon administration has from the beginning done the work as fast as the money could be provided.

The Highway Commission paid out \$5,088,904.02 in 1927. During the first six months of 1928 they paid out \$3,273,700.61, and \$1,497,046.63 during the last three months.

The New Mexico debenture plan only requires one-fourth of the gasoline tax receipts to pay the principal and interest of the "borrowed money."

It leaves three-fourths of the gasoline taxes, or about a million and a half dollars per year, for maintenance and construction of roads, three times the half million dollars Mr. Dow said they had under Hannett's administration.

The road problem is a business problem. It is too big for Mr. Dow's comprehension.

If Mr. Dow should happen to be elected Governor and stop this "borrowing on money" he would have to stop Federal Aid road construction. It cannot be done without raising money in advance of tax collection. The allotments of Federal money to New Mexico, \$1,185,000 per year, could not be met and the money would go to other states.

The other western states are building roads as fast as possible in order to get the profitable tourist business.

They are adopting the New Mexico debenture plan to raise the money. Colorado proposes to issue sixty million dollars of debentures payable out of gasoline tax receipts. Texas proposes to issue three hundred million dollars of such debentures.

Most successful business enterprises in the world operate largely on borrowed money, paying interest and principal out of profits.

The road business is the biggest business enterprise in New Mexico. Properly operated it will make enough direct profits in gasoline taxes to pay the money borrowed on debentures, and the indirect profits to the people from the use of the roads and what the roads bring into the state will be many times their cost.

The people of New Mexico are a progressive people. They want good roads. They won't stand for the obstructive policy of Mr. Dow. They will insist that the good roads policy of the Dillon administration be continued.

The Republican State Central Committee

AMENDMENT IS VITAL ISSUE IN THE COMING ELECTION NOVEMBER 6

One of the most vital issues in the coming election in the state, and one which is of great importance regardless of which party triumphs at the polls, is the amendment relating to the leasing of oil and gas lands, according to many of our leading attorneys.

This amendment would provide that the state legislature can pass an act regulating the manner of making the leases—the revenue to continue to go to the schools. The bone of contention seems to be a requirement in the original law, drawn up in the Congress of the United States and intended to apply to grazing lands, that lands be advertised for ten weeks before being leased.

This has proved an impossible requirement in the oil districts where action is fast and values fluctuating, and the land office under both administrations has interpreted the law in such a way that leases have been made without advertising. In this action they have been supported by the legislature and the courts but now that oil lands are acquiring real value a question has been raised as to the validity of these leases.

Attorneys state that failure to pass the amendment and the act, may result in over two million acres of land being tied up in litigation, a great slowing down of oil development, and a loss of income from new leases and renewals. It has been pointed out that most of these leases were made to individuals and have been assigned to many persons and operators throughout the United States. Both political parties have gone on record in favor of the amendment, through statements from their state chairman.

COLLEEN MOORE TURNS SAILOR IN "OH KAY!" HER NEW COMEDY

When Colleen Moore returned from location, where ocean scenes were filmed for her new First National picture, "Oh Kay!" coming to the Majestic Theatre on next Monday. She was pronounced by her fellow players to be a first class able seaman.

A decided nautical atmosphere was supplied by the scenarist for several episodes of this humorous screen story, in which the vivacious Colleen made numerous scenes aboard an old wind-jammer, rowed a sciff, and even acted as skipper and crew of a fast little sloop. The sloop a star-boat, racing type, captured the enthusiastic interest of Colleen, who went sailing in the sporty little craft whenever she was most needed before the cameras. She confessed that she found handling main-sheet jib and tiller all at one time was a job better suited to a person with four arms, but she was fascinated by the sport. She gives promise of becoming an expert sailor thanks to the tutelage of her producer, John McCormick, a former naval officer.

As soon as the camera work was completed on location near Santa Barbara, Miss Moore and the cast and production staff filming "Oh Kay!" went aboard a sailing vessel and cruised in the waters around Catalina island for other scenes, which include the episode in which Colleen displays her prowess in a little sailboat. Mervyn LeRoy directed "Oh Kay!" from the scenario prepared by Carey Wilson. The supporting cast is composed of Lawrence Gray, Alan Hale, Ford Sterling, Claude Gillingwater, Julianne Johnston, Edgar Norton and others.

Suits of Print Velvet Ultra Chic for Fall

There is no smarter suit for fall than that of print velvet. These new velvets which enter into the making of the jacket-and-skirt suits register for the most part small repeat patterns which in their coloring and that of their backgrounds seem to have captured autumn's richest browns and greens, deep wines and copper shades together with rust tones and yellow, also handsome blues and mauves. An intriguing blouse adds the final note of chic.

170 POUND LOBO

There were just about six men a little bit faster than Jack Jackson (former Artesia Hi boy now on the University team at Albuquerque) and he was found playing on the scrubs when Coach Johnson picked his Lobo backfield, but in order that 170 pounds of fighting man should not go to waste, Jackson was converted into a guard. This is his first experience in the line. He seems to be handling his new position very capably, however.

EXPERIMENTS IN THE ERADICATION OF WEEDS

Tests are being made by project farmers, with the cooperation of county agent W. A. Wunsch, in the eradication of weeds and grass on farm lands, using sodium chlorate spray. Two tests now under way are on the farms of J. R. Ogden and Rich Carter, in the Loving section, and it is planned by Mr. Wunsch to make a test also, with Mr. Foster, project superintendent, on tulies, salt cedar and weeds along drain ditches on the project.

In these tests a pound of sodium chlorate salts is used to a gallon of water, and about 100 gallons of water are used to an acre. This costs about \$12.00 to \$15.00 an acre, and is more effective and cheaper than other methods. It kills Johnson grass roots four inches below the surface in about ten days, and also is reliable in ridding fields of Bermuda grass, goldenrod and other noxious weeds.

In tests already applied, heavy plats of Bermuda grass eight inches high have evidently been thoroughly killed.

The treatment is not injurious to the land, and is really considered beneficial, since it leaves the roots and stalks of the grass and weeds in the ground for humus value, and looks like a good and cheap method.

Many Women Raise Dogs

So many women in England are taking up dog breeding as a pursuit that at some of the recent bench shows there were more feminine exhibitors than men.

HIGHWAY ENGINEERS SURVEYING ROAD FROM MONUMENT TO JAL

ROSWELL.—Highway engineers have been sent out of the district highway office here to survey a road from Monument to Jal and thence on to the New Mexico-Texas state line.

Lea county recently voted a bond issue of \$50,000 to construct a road north and south through the entire county. Representations were made to the State Highway Department with the result that the Highway Department has promised cooperation with the county in getting the road located and built. The engineers of the survey party are under orders to rush the work with the utmost speed.

The cumulating increase of traffic over Lea county roads as a result of the oil boom in that section has made a new road a necessity. If the oil development keeps up it will be but a matter of a short time before Lea county will have roads radiating in every direction. In the past, this county has been a vast

HE TRIES TO THE LIFE OUT FORD RADIATOR

The hen that lays a small egg is a bad influence. It takes nerve to cull her out of the flock, especially if she is a high producer, but rigid culling of small-egg hens must be done to improve the flock and to avoid price cuts that go with small eggs.

Don't overwork your alfalfa patch! Alfalfa that goes into the winter with considerable growth will come out in better condition in the spring. Too late pasturing or cutting may kill a stand. For new seedings that have not made much growth, light dressings of straw help to reduce the chances for winter injury.

Lack of housing and of proper care of farm machinery means a loss in dollars and cents. By housing farm machinery, its life is doubled and the annual repair bills cut in half, says the U. S. Department of Agriculture. Machinery should also be painted and the polished surfaces greased to prevent excessive rusting.

In order to have a good sweet clover pasture next year, plow the land this fall so that the seedbed will be ready early in the spring. Either fall wheat land or fall-plowed fallow land is good for this purpose. Sweet clover sown in March will be ready to pasture at least four weeks earlier than if sown in April and the plants will be nearly twice as large.

Plumbing pipes exposed to the winter weather may prove more troublesome than the old "teakettle and pump" combination. Remember the pipes that froze last winter? For protection, commercial coverings, or

homemade wrappings of felt or bagging, may be used; or parts of the pipes may be boxed and surrounded with material such as sawdust, straw, or granulated cork.

For two reasons the U. S. Range Live Stock Experiment Station, Miles City, Montana, has made a comparison of the value of alfalfa hay alone and alfalfa hay supplemented with cottonseed cake and corn silage for wintering beef calves. To date the results have indicated that alfalfa hay alone will give equally as good results as when supplemented by these other two feeds which are not readily available in that section.

The old saying that "beauty is only skin deep" may apply to the soil. Many farmers assume that if the surface of the land looks good, it is all right, and disregard possible hardpans and other impenetrable subsoils which retard drainage, prevent the upward movement of soil moisture, and resist root penetration. The best way to know the soil thoroughly is by a soil survey of the county. The Bureau of Chemistry and soils of the U. S. Department of Agriculture has mapped and described the soils of more than half the agricultural counties of the United States.

The garage may be useful for storing something besides the family auto. If it is dry, well ventilated, and free from danger of freezing, onions can be stored there on a shelf this winter, thereby keeping the odor out of the house. Late tomatoes may also be stored there. Be sure to gather these before there is danger of injury by frost. Green tomatoes are better stored in a room that is kept at a temperature of about 65 degrees. Potatoes may be kept in the garage until the cellar can be gotten cool enough for them.

Your dairy cow may be getting all the nutrients she needs, but is her ration well balanced? For example, if the cow's maintenance requirements and production are such that she needs two pounds of digestible

protein and fourteen pounds of non-protein feed nutrients, the protein can be supplied by feeding her twenty pounds of timothy hay and nineteen pounds of corn, but she will get about eight pounds more of the non-protein feed nutrients than necessary. By substituting three and a half pounds of cottonseed meal or some other feed equally high in digestible protein for fourteen pounds of the corn she will be just as well nourished and the feed cost will be much lower.

Few Persons Today Who Are Not In A Position To Save Money

S. W. Straus, president American Society for Thrift says:

"Students of economic conditions in this country tell us that poverty is steadily being eliminated through the processes of education. There was a time within the memory of many now living when dire poverty existed in every city if not in every community. The general standard of living has been steadily advancing for the last fifty years and conditions are such today that there is hardly a person anywhere who is not in a position to save money if he so chooses.

"The old saying, 'Where there's a will there's a way,' applies with full force to the practice of saving money. Those who do not save or who think they cannot are not fair with themselves. They are unwilling to make certain sacrifices. Their minds are biased by false pride or egotism. Their viewpoint is incorrect.

If they should think the problem clear through they would determine to find ways by which they could save something even though the amounts be small.

"Upon one's ability to find such ways of saving money, depends very much of one's chances of success in life."

SMITH PEOPLE DRAG RELIGION INTO CAMPAIGN

ONE QUART LAW EXPLAINED BY REV. BAKER

(By the Republican State Central Committee)

"Some of the people say that if Governor Smith is elected president, the Pope will be president. Well, that is good enough for me, for that would be far better than the republican administration we have been having.

"These were the startling statements of Bryan Johnson. One of the speakers at the Smith-Robinson banquet held in the Franciscan hotel here Saturday night and which was attended by 400."

The above is from the Albuquerque Morning Journal, October 29, 1928.

Mr. Bryan Johnson, is the organizer of the Smith-Robinson clubs, employed by the national democratic organization.

The democratic organization has accused the republican party of dragging the religious issue into the campaign which accusation is false.

The above shows the strenuous efforts made by the Smith adherents to drag the question into the campaign. Such efforts deserve the condemnation of all fair minded people.

STORY OF ONE QUART LAW

Reverend Rufus C. Baker, District Superintendent of the Methodist Episcopal church for New Mexico, and state superintendent of the Anti-Saloon League, has put an end to the scurrilous attacks upon Governor Dillon for signing what is now generally termed the "One quart law."

Mr. Baker was present at the Legislature during the time the bill was under consideration. The bill that the temperance workers of the state really wanted was the one vetoed by Governor Hannett, after it had passed the previous Legislature. The present law was the best that could be secured, and Governor Dillon signed it because it gave a law that Wayne B. Wheeler, the counsel for the Anti-Saloon League for the nation, pronounced the seventh best in the whole country.

QUART NOT LEGALIZED

That it legalizes the ownership of a quart of liquor is not true. It prohibits having for sale a single drop of intoxicating liquor. It placed the burden of proof on the owner of even a gill of liquor to show that it is not in his possession for the purpose of sale.

Mr. Baker's statement is clear and authoritative and puts to shame the people who have spoken of the governor as "One-quart Dillon." It shows that the governor, as a consistent advocate of prohibition, did the very best for the cause that was possible in the circumstances.

Mr. Baker's letter follows: "I believe that facts and fair play have a part even in a heated political campaign, and for that reason am writing you of my knowledge and estimate of the situation as touching the prohibition enforcement code enacted by the last session of the New Mexico State Legislature. "Certain political speakers and writers have been making violent attacks upon the prohibition law. There is just one provision in the law that so far has been attacked by them.

"That provision follows: "Provided, that nothing in this section shall authorize seizure or confiscation of liquor, or a conveyance where such liquor does not exceed one quart, unless the same is being transported for sale."

"That provision is attached to Sec. 5 of this law, which provides for the seizure of intoxicating liquors and all vehicles in which the same are being transported.

NOT IMMUNE FROM ARREST

"Based upon that one section, political speakers and writers have been indulging in the extravagant assertion that this law protects the bootlegger and makes him immune from arrest if he has only one quart of liquor. The fact is that the law does not provide that a bootlegger can have in his possession one quart or any other amount for sale. It does provide that where a person has in his possession one quart of intoxicating liquor, which is not used for sale or held for that purpose, or being transported for the purpose of sale, it cannot be confiscated; but the law plainly says that any liquor, or vehicle conveying same, whether it is a quart or less than a quart, can be confiscated and the offender prosecuted, if the same is being held or transported for the purpose of sale.

LAW BEST TO BE HAD

"I was present at the state Legislature collaborating with the prohibition forces of the state in securing the passage of an enforcement code when this law was passed. I read the copy of this law before it was presented to the Legislature. I noted then this provision which is causing so much concern and debate. That provision was not put in at the request of the present governor, but was put in as a concession to

obtain its passage. The prohibition forces knew the temper of the last Legislature and consented to the insertion of this provision, knowing that without such concession the bill would be defeated, and we would find ourselves without a prohibition enforcement code as we were when the former governor vetoed our bill two years before. With that one single exception the law is a splendid one. The late Wayne B. Wheeler, counsel for the Anti-Saloon League, pronounced this the seventh best in the nation, even with that provision in it. And not a semblance of evidence has ever been produced to show where this provision has been the means of protecting a single bootlegger since its passage.

LAW USED EFFECTIVELY

"This law is not all the prohibition forces of the state would like. It is not as good, for example, as the law vetoed by the former governor two years before its passage. But compromise in practical politics has always had its place. The prohibition forces of the state are not fully satisfied with the present law and will work for a better one. But in the meantime we have in the present law one that can be and is being used, and used effectively, where those being charged with its enforcement care to put its provisions to the test."

Respectfully yours,
(Signed) Rufus C. Baker

N. M. LIBRARY ASS'N. MEETS

The New Mexico Library Association, a section of the New Mexico Educational Association, meets in Albuquerque on November 1-2. The program arranged by the president, Wilma L. Shelton of the University library emphasizes three subjects of particular interest in New Mexico; Spanish and Mexican literature, school libraries, and library advertising. The association hopes for a large attendance of librarians, teachers interested in promoting school libraries, and club women who are giving time and thought to the establishment of libraries in New Mexico. The meetings will be held in the beautiful new High school library in Albuquerque. There will be a school libraries exhibit with pamphlets on library methods for distribution.

Among the numbers on the program is the discussion by Miss Ruth Russell, assistant librarian of the State University on the subject of, "What the library can do for the sick of our state."

INSIDE INFORMATION

Prolong the life of shoes in wintertime, especially those worn by men and boys without rubbers, by soaking the soles in a grease that will make them waterproof. The United States Department of Agriculture recommends several simple formulas for the purpose.

Rice can be cooked in an open kettle in 15 to 20 minutes. A large quantity of water should be used. As soon as a grain pressed between the thumb and forefinger is soft and has no hard portion in the center, the rice should be taken from the fire, drained, covered with a cloth, and allowed to steam until the grains swell and separate.

In cake recipes with a number of eggs, it is possible to substitute baking powder for one or two of the eggs called for, during the period of egg scarcity. Of course the cake will not be so rich as when all the eggs required are used. Allow one-half teaspoon of baking powder and two tablespoons of milk for each egg omitted. From half to two-thirds of the eggs called for should be used even when this substitution is practiced.

For rather novel sandwiches or thin bread and butter for afternoon tea make some orange bread. The flavor is given by the cooked peel of two oranges. This is cut into shreds, covered with water and cooked for about 20 minutes, or until tender, and then drained. Next cook the peel in a sirup of one cup of sugar and half cup of water until there is only about 1 tablespoon of the sirup left. Sift together 3 cups of flour, 4 tablespoons baking powder, and half teaspoon salt. Cut in 1 tablespoon of butter and add 1 well-beaten egg and one and a quarter cups of milk. Beat this mixture for about 3 minutes. Stir in the orange peel and mix thoroughly. Pour in a greased bread pan and bake for one hour in a moderate oven (about 325 to 350 degrees F.)

Explorer's Claim to Fame

Paul Du Chailly was the first white man to observe and obtain specimens of the gorilla. This was during his first trip of exploration in Africa in 1855.

PICKED UP ON MAIN

They Want To Know

Jimmy Robertson, of the First National Bank wants to know how long it takes a cat to expire. A cat stayed under the F. N. B. floor for several days, until Mrs. Madge Bird pulled a heroic rescue.

C. J. Dexter and R. A. Sugart want to know if some pleasant looking democratic lady won't show them how to mark their ballot. So does E. C. Higgins for that matter.

Pa Manda wants to know if the Christian church ladies basketball team expect to win a game. Mrs. Manda, who is coach says they will and points to the lineup as follows: Mrs. J. B. Atkeson, Mrs. Walter Graham, Mrs. Ed Connor, Mrs. Will Ballard and Mrs. Albert Richards, jumping center.

A. L. Allinger wants to know whether it will be Al or Herb after the 6th. He wants to get on the popular side.

Wedding Invitations and Announcements, engraved or printed—The Advocate.

A Lie Nailed!

(By the Republican State Central Committee)

Democrats are spreading the charge that this week's El Nuevo Mexicano, Senator Cutting's Spanish weekly, tells the voters to vote for Smith and Cutting.

This statement is absolutely false.

An unauthorized attempt to insert a form of instructions to voters was discovered after the paper was in press, the article was promptly removed, all printed copies that could be found were destroyed, and no such copies were circulated by the publishers to any person.

"Sneaked" copies of the "killed" issue are being used by the Democrats in a desperate last-minute attempt to stem the Republican landslide. Don't be fooled by Democratic fakers.

Vote 'er straight for Hoover, Dillon, Cutting, Simms and the whole Republican ticket.

LAUGHTER CURES MANY ILLS—BELIEVES CLARA BOW

Laughter is a cure for many ills, Clara Bow, famous film actress, believes. In "Red Hair," her latest starring Paramount picture, which will come to the Majestic theatre on November 9, for one day, Miss Bow undertakes to make the world laugh. "Life has taught me one thing and that is that a laugh is the most valuable thing in the world. By

that I do not mean irreverent. I mean that anyone who places the other fellow's "pleasing handicap," Miss Bow says, "I have known a great sadness but that is simply because I have overcome it when necessary."

Will your Egg Sign be out this winter?

THERE'S a reason why the users of Purina Poultry Chows have eggs for sale when prices are highest. Purina Poultry Chows are made by an organization that's had 34 years experience mixing poultry feeds. Purina has the machinery to mix Poultry Chows thoroughly. Purina has the experimental farm to test Poultry Chows practically. Purina has the chemists and biological laboratory to prove Poultry Chows scientifically. That's why Purina Poultry Chows are rich in the very stuff that eggs are made of. That's why Purina Chicken Chowder and Purina Hen Chow build up a reserve that keeps the birds laying all winter—and paying all winter. Order Purina today.

WILSON & ANDERSON

Voters of Both Parties-- VOTE IN FAVOR OF This Amendment On Nov. 6!

Text of the Proposed Amendment

"Leases and other contracts reserving a royalty to the state for the development and production of any and all minerals on lands granted or confirmed to the State of New Mexico by the Act of Congress of June 20, 1910, entitled 'An Act to enable the people of New Mexico to form a constitution and state government and be admitted into the Union on an equal footing with the original states' may be made under such provisions relating to the necessity or requirement for, or the mode and manner of, appraisal, advertising and competitive bidding, and containing such terms and provisions as may be provided by Act of the Legislature; the rentals, royalties and other proceeds therefrom to be applied and conserved in accordance with the provisions of the said Act of Congress for the support or in aid of common schools or for the attainment of the respective purposes for which the several grants were made."

We have been leasing oil and gas lands under laws made for grazing lands. We have leased, under the administration of both parties, with the approval of the legislature and the state courts, over two million acres of such lands under these laws. Now with real oil development about to begin in our state, a question has been raised as to the validity of these leases and activity is hanging in the balance until we can confirm them.

This amendment has the approval of the Congress of the United States. It will allow our legislature to pass an act to regulate the manner of leasing. The revenue will continue to go to the schools. If it should fail to pass, some two million acres of land are likely to be tied up in litigation for a long period of years and returns from new leases and renewals come to a standstill.

Regardless of your political party and your vote on candidates for office, do not forget to vote in favor of this amendment which is of vital importance to your state. The Chairman of the State Central Committees of both parties have gone on record urging its passage. Every person and organization in the state which is familiar with its concept and purpose is for it. It is the only amendment coming up at this election. Take your amendment ballot, vote IN FAVOR OF, and put it in the box!

Ask every acquaintance to add his vote. The passage of this amendment means business for everyone in this section. The failure to pass might well result in a serious depression. Do everything in your power to help pass this amendment November 6th!

THREE MILLION WOMEN HAVE VOTED FOR NOV. 6

Forty-three million women, by far the largest ever registered, have participated in the battle of the presidential election on November 6.

The figures of the vote cast in 1924, compared with 1928, show an increase of 15 per cent. The increase in actual votes would be about six million over 1924. This is the estimated vote more than 29 years ago.

Surprising results noted in the number of qualified voters. Political leaders generally expected a large jump in the number of voters. It has been estimated that the number of voters would be about 15 per cent more than in 1924.

SEED MOVING MORE THAN LAST YEAR

Alfalfa seed has been moved more than last year due to high prices to growers and the small size of the crop. The U. S. Bureau of Economics estimates that the crop of growers up to October 15, 1928, was 133,100 tons, compared with 104,000 tons in 1927. The price of alfalfa seed last year was \$14.50 per ton, compared with \$18.50 this year. The price of alfalfa seed last year was \$14.50 per ton, compared with \$18.50 this year.

Exports of alfalfa seed last year were 133,100 tons, compared with 104,000 tons in 1927. The price of alfalfa seed last year was \$14.50 per ton, compared with \$18.50 this year.

BEAUTIFUL GIFT

Grace Noll Crowell

A mother give her children a gift that will last a lifetime—faith in Him.

High like a lamp in the darkness, with warmth when the day is cold—joy when youth goes wrong, and peace when you are old.

A mother give her children a gift that will last a lifetime—faith in Him.

Housekeeping, (New York.)

THE CHURCHES

CHRISTIAN SCIENCE SOCIETY
613 W. Main Street

Wednesday services at 7:30 p. m. The public is cordially invited to attend these services.

FIRST PRESBYTERIAN CHURCH
Fourth and Grand
Rev. John P. Sinclair, Pastor
Phone 249

Sunday November 4, 1928.
9:45 Sabbath School.
11:00 a. m. Morning Worship, sermon subject, "Autumn Lessons." The fading leaf and the abiding Christ.

6:15 Christian Endeavor: two groups.
7:00 p. m. (not 7:30) Popular Peoples' service. Music by the church orchestra. Sermon subject, "Mary Magdalene,"—Who was she? What the Bible tells us about her! Was she a wicked woman?

Two hundred years ago Bishop Butler said, "External acts of devotion and piety and the frequent returns of them are necessary to keep up a sense of religion which the affairs of the world would otherwise wear out of men's hearts."

CHURCH OF THE NAZARENE
Corner Eighth and Missouri Streets
W. A. Huffman, Pastor
Phone 295

9:45 a. m., Sunday school.
11:00 a. m., Morning worship.
3:00 p. m. Children's Service.
6:15 p. m. Young Peoples Society.
7:00 p. m. preaching.

Evangelist Mrs. Minnie Echols, will have charge of both morning and evening services. The revival meeting will continue throughout the week, services daily at 10:30 a. m. and 7:00 p. m. You are cordially invited to attend these meetings. Especially are the young people of the various churches asked to cooperate.

CHURCH OF CHRIST
Corner 7th and Grand Ave.

The attendance at Bible school last Sunday, far exceeded our expectations on account of the weather, also sickness. We have reached our goal which was 100, and every Sunday still brings new members to our classes.

The church is greatly encouraged over the fine gain our Bible school has made in the last four Sundays. Next Sunday is new members day and we are hoping everyone will be present and try and bring some new member along. There has been eight added to the church the past month. We are worshipping in peace and love, and we are working to further the cause of our Master. There are many young people in our city who should be in Sunday school every Sunday. We invite you to come and be one of us. We have classes for every age and competent teachers for each each class.

Bible school meets at 10:00 a. m. Preaching and Communion service at 6:00 p. m.
"A hearty welcome awaits all who may come."

CHRISTIAN CHURCH

The subject for next Sunday morning's sermon will be "Marking Time." Soldier are often required to mark time. They don't get anywhere when they do it, and yet it isn't altogether a net loss. A good many people never get over marking time. Come and hear the sermon.

New Classes and new teachers have been set in motion. There is plenty of room for more men. The quality of those attending is good, but the quantity might be improved upon.

Sunday night at 7:30 a textless and subjectless sermon will be delivered. This state of affairs is accidental. Just wasn't any subject nor any text that seemed to fit. Come and supply your own.

C. Bert Smith's class of young married folks is making a specialty of supplying music for the church services. They have some talented singers who will make the message of song one of the outstanding features of the service next Sunday.
H. A. PEARCE, Pastor

BARBECUE

John Fanning gave a barbecue in connection with a branding at the Lakewood stockyards last Sunday. All the old neighbors, friends and relatives were there, being several hundred in number. The ladies contributed the pies, cakes and other dainties to the meal and the barbecued meat, coffee and bread were furnished by the host. A good old fashioned visiting time accompanied the dinner. George Needham, brother-in-law of Mr. Fanning, with his wife and younger children, drove down from the Cottonwood to attend.

"Cherchez la Femme"
"Find the woman" is sometimes credited to Alexander Dumas. It appears in his "Mobycons of Paris." But it is said to be an old proverb of France and Spain.

THE WINTER BRIDGE PROGRAM OF HIGHWAY DEPT. IS UNDERWAY

SANTA FE.—The state highway department reports that the heavy pre-winter bridge building program is under full steam ahead with bridges being finished every few days. Four bridges under this schedule are complete with seven under construction. Those bridges under construction are: the Escavado Wash bridge on the Pueblo Bonito-Thoreau road; Gallina-Cuba just starting by crew who completed the Rio Negro bridge; the Grants bridge; Cerrillos bridge at Los Cerrillos, largest bridge being built by state forces, solely; Rio Puerco bridge west of Belen nearly complete now; Jemez bridge No. 2; and Cuba-Farmington bridge.

The same report carries the information that a survey of the roads of the state show them to be all in first class condition for what is expected to be the largest winter tourist season yet experienced. The new oil sections coupled with the largest building program yet done by the state put New Mexico's roads in a finer condition than ever before. It is hoped that the touring public will realize that New Mexico offers an unexcelled winter resort privileges. Tourists coming to the state this winter will find facilities which from their angle will prove this contention.

PAT TAUGHT HIM

An Irishman came into the office of the president of the Illinois Central Railroad one morning and said:—"Me name's Casey. Oi Worruck out in the yar-rds." Then he paused before saying: "Oi'd like a pass to St. Louie."

"That is no way to ask for a pass," said the president. "You should introduce yourself politely. Come back in an hour and try it again."

At the end of the day back came the Irishman. Doffing his hat he inquired, "Arre yez the man I seen before?"

"I am."
"Me name is Patrick Casey. Oi've been workin' out in the yar-rds."
"Glad to know you, Mr. Casey. What can I do for you?"

"Oi've got a job an' a pass to St. Louie on the Wabash. Ye can go to hell."—Everybody's Magazine.

ED. BOWMAN, Owner

J. E. ROBERTSON, Clerk

Attention Voters!

In the heat of a political campaign, speakers are prone to exaggeration and in many instances to gross misrepresentation in their estimates of the candidates of the opposing party.

It is interesting to note their real opinions, expressed in cool moments, of individuals before they came into public view as candidates for office.

Senator Robinson, Democratic candidate for Vice President, on June 26, 1927, at a mass meeting at the state capitol grounds at Little Rock, Arkansas, in which Mr. Hoover was a guest of honor, gave vent to his genuine respect for Mr. Hoover in these words:—

How often do generous deeds go unacknowledged! How quickly are they forgotten! The state of Arkansas, rising in her pride, sings a song of new glory. The storms have abated, the clouds have disappeared.

Few men in the history of mankind have exemplified exceptional talents in supplying the necessities and in relieving the sufferings of their fellow beings. The guest of honor at these ceremonies, Mr. Herbert Hoover, is noted as the world's greatest relief administrator.

This large assembly and these ceremonies attest the appreciation of the people of Arkansas for the unusual service which Mr. Hoover has rendered by special commission of the President in a time of great distress. He suspended the performance of duties in the cabinet and came in person to where the difficulties were greatest. His presence, his advice, his counsel are an inspiring example to men in high places throughout the world.

Mr. Hoover's heart has not only shared the sorrows and burdens of the passing flood disaster; he assumed a task of the greatest importance, a task which he might well avoid and leave to others to perform.

We have not forgotten; we never will forget the human touch, the kindly spirit, the friendly sympathy, the effective aid which Mr. Hoover and his associates brought in a time of need and strain.

Bearing the commission of our great chief and wartime president, Woodrow Wilson, Mr. Hoover opposed and halted the deadly advance of hunger, pestilence and famine following the war in Belgium, Russia and other foreign lands. Hospitals for the sick and wounded! Food and clothing for the victims of hate and wrath!

Among the suffering and dying he bore aloft the banner, saluted with respect and love in every civilized land—the banner of the Red Cross.
