

Artesia Advocate

ARTESIA, NEW MEXICO, THURSDAY, SEPTEMBER 5, 1929.

NUMBER 38

All of the news told interestingly and accurately each week in the Artesia Advocate.

Advocate answers the question for a constructive medium in the middle valley.

WEDNESDAY TWENTY-SIX

Maljamar Oil Gets Big In Red At 3100

Hundred Feet Of In Hole And The Abilities Of Well Yet Known — Three Leas Interesting.

Local interest to-day in the oil business is centered in the operations of the Maljamar Oil Corporation in the NW NE 1/4-32, which is reported to have encountered the big gas in sand around 3,100 feet, although E. Baish, field superintendent, says that the lease this and current rumors can not be confirmed. Little may be known of the possibilities of the well until the next day or two as drillers are bringing down the hole with mud and sand. The possibility of the gas in the hole is the largest well in the field. It has been very promising and test is said to be running better than any well in the field. At 2,800 feet the test was more than a million feet coming from breaks found between 500 feet and at 2,900 feet is said to have increased to a million feet.

The No. 1 of the Cranfill and State No. 1 of the Humble are reported to be one of the best in the northwest Lea stimulated quite a bit of interest in the surrounding territory. No. 1 is making 650 barrels every twenty-four hours, nine revolutions per minute. The hundred feet of four inch is being run in the hole.

TO BUILD ANOTHER APARTMENT SOON

W. E. Ragsdale is planning to build a three room apartment on his property located at Sixth and Main streets. The apartment will be erected just south of the new apartment on Sixth street. Mr. Ragsdale has announced that he will also erect a large warehouse, north of the garage building of the Artesia Auto Co.

MANY STUDENTS TO LEAVE FOR COLLEGE THIS WEEK AND NEXT

The exodus of students for college has already begun and will continue for the next two weeks. Among those leaving this week and next are: Lawrence Bewley, Tulsa University, Tulsa, Oklahoma; Wilmer Ragsdale, Oklahoma University, Norman, Oklahoma; Miss Lola Ward, Lindenwood College for Girls, St. Charles, Missouri; Miss Wilma Berry, Texas College Industrial Arts, Denton, Texas; William and Stewart Compton, State University, Albuquerque. Paul Stroup, Howard Stroup and Fletcher Collins, State College, Las Cruces; Wilton Tarbet, School of Mines, Socorro; Herman Cole and the Misses Gladys and Ina Cole, Montezuma College, Las Vegas; John Clarke, Loyola University, New Orleans, La.; Guy Reed Brainerd, University of Louisiana, Baton Rouge; Harvey Yates, Noble Littlejohn and Allen Perry, Military Institute, Roswell.

HOPE COMMUNITY HEARING IS IN ON AT ROSWELL

F. Remley, special master of hearing of the testimony of the Hope community on Monday morning at Roswell. The hearing will probably consume several days and is one that has been held for several years. The hearing is the Hope community affects land owners in the district. The hearing is to attract a great deal of interest and will likely be attended by a number of local land owners.

note book covers embossed colors at The Advocate. stamped free.

HIGHWAY ASSOCIATION HOLDS A MEETING AT LOVINGTON ON FRIDAY

Senator Z. B. Moon represented Artesia at a meeting of the Lovington, Cloudercroft and Las Cruces highway association held at Lovington Friday evening. The principal purpose of the meeting was to interest a number of Texas communities along the eastern route in assisting to properly advertise the new highway. Senator Moon reports that the meeting was attended by a large representation from Lovington, and two Texas towns, Seminole and Gail. The Texas delegation are very enthusiastic about the new route and have agreed to assist in advertising the eastern end of the route among the Texas communities.

To Meet At Cloudercroft Sunday

Another meeting of the association will be held at Cloudercroft Sunday and a large attendance is expected. All local people who care to attend will be welcome.

MANY PERMITS IN NEW MEX. MAY BE RENEWED UNDER NEW RULING

WASHINGTON, D. C.—Holders of permits to prospect for oil in certain sections of New Mexico, who can show that areas covered by their permits have been geologized by the Texas company and the Marland Oil company will have their permits renewed under a ruling announced Tuesday by solicitor Finney of the Interior Department.

All such permits, however, will be renewed only on condition that there will be no drilling on areas for at least two years.

The ruling was made by an interior department committee appointed to enforce President Hoover's oil conservation order of March 12 after the Texas company asked for a rehearing on the action of the department in cancelling all permits involved.

The Texas company was joined by the Marland company in submitting briefs which set forth that cancellations of permits in areas involved would work a hardship on the companies which had spent a considerable sum both in geological work and actual drilling. Permits renewed under the ruling all are in southern New Mexico, where the Texas company shortly before the Hoover order had reached producing sands.

Through operating agreements the Texas company has 78 permits affected by the order. The Marland company has 59.

THE HIGHWAY OILING OPERATIONS CONTINUE AT A RAPID PACE

The Southern Terminus Of Road Oiled As Far North As Dayton — The Heavy Traffic Giving Highway Crew Trouble.

Substantial progress continues to be made in the oiling operations on the Dexter-Lakewood stretch of the north and south highway. The oiling of the southern terminus of the road north as far as Dayton has been completed. Surfacing of roadway with sand and gravel ahead of the oiling is also being rapidly advanced. Only about a mile and a half of the road south of town lacks the necessary sand and gravel, while workmen have placed about three miles of sand and gravel north of town. Preparations are being made to move the road camp from its present location near the Penasco river to a new location near here.

Heavy Traffic Causes Trouble

Heavy traffic on the south road has been causing the oiling crew considerable trouble, according to R. E. Horne, engineer in charge of the operations. "The chief difficulty appears to be that the tourists do not pay any attention to the red flags and to the detour signs," he says. "And one or two near serious accidents have been narrowly averted," Mr. Horne continues.

"Motorists will rush passed a red flag and sometimes a red flag and a detour sign and then get angry with the highway force because they find themselves in a jam," Mr. Horne states.

SHEEPMEN SHOULD NOTIFY INSPECTOR

All sheepmen who wish to move sheep or sheep carcasses by truck should notify the inspector, Dr. W. C. Doss, in order to avoid a penalty imposed by the new sanitary law. This law has never been generally enforced until recently, but officials are becoming more rigid.

ELEVEN BIRTHS FOUR DEATHS RECORDED IN THE MONTH OF AUGUST

Eleven births and four deaths were recorded during the month of August by S. E. Ferree, sub-register for the Cottonwood, Atoka and Artesia districts. The births recorded were: Mr. and Mrs. G. Deanda, daughter; Mr. and Mrs. M. Moreno, daughter; Mr. and Mrs. Martin Yates, son; Mr. and Mrs. Clato Torres, son; Mr. and Mrs. Price Navarette, son; Mr. and Mrs. C. Chavarria, son; Mr. and Mrs. Price Bowman, son; Mr. and Mrs. Jewell Gist, daughter; Mr. and Mrs. T. W. Robertson, daughter; Mr. and Mrs. N. Rubio, daughter; Mr. and Mrs. Antonio Yrijolla, son. Death certificates were issued for W. S. Haskins, William Lloyd Martin, Martha E. Privett and Anna Spencer.

NAZARENE REVIVAL

Rev. W. A. Henry, pastor of the Artesia church of the Nazarene, announces that plans have been made to hold the annual church revival beginning Sunday evening, September 8th. The revival will be held in a big tent, located just off Main street. The song services will be in charge of Prof. Barnes, noted singer and the preaching will be done by Rev. H. N. Dickson, known as "The Race Horse Evangelist." The general public is invited to attend. Two services daily at 10:00 a. m. and 7:30 p. m.

DR. BRYAN LOCATES HERE

Dr. W. L. Bryan, chiropractor of Del Norte, Colorado, has recently located in Artesia and has established an office on the ground floor of the Clarke building. Dr. Bryan will take the place of Dr. W. A. Sabelman of Carlsbad, who had arranged to maintain an office here. Dr. Sabelman decided to remain at Carlsbad after he learned of Dr. Bryan's intention of locating here.

HOME FROM EUROPE

Richard Wheatley arrived home to-day from his trip to the Boy Scout jamboree at Arrow Park, Birkenhead, England, followed by a short trip in England, Holland, Belgium and France. He reached Ardmore, Oklahoma on Sunday and spent a couple of days at Scout Headquarters there before coming on home.

LOCAL TAX RATE IS REDUCED IN NEW LEVY ANNOUNCED TUESDAY

Total Reduction Amounts To 46 Cents Per Hundred —Artesia To Get The Old County Jail Equipment For New Jail Here.

Eddy county will enjoy a lower tax rate this year, it was learned here yesterday morning following a session of the Eddy county commissioners at Carlsbad Tuesday. The new levy has the approval of the state tax commission. Increased valuations were largely responsible for the lower rate in Eddy county, although Artesia will have a lower tax rate than last year, despite the fact that the valuations in the district remain about the same in 1929 as in 1928.

The rate for the state and county is .02920, representing a reduction of four mills in state taxes and 23 1/2 cents in county taxes. Artesia's levy is .00804. The total levy in Artesia, including state, county and city is .03724. Artesia's state and county rate is approximately 23 cents per hundred cheaper and the city rate has been reduced a like amount, representing a total reduction of 46 cents per hundred dollar valuation on town property here.

The state and county taxes in other districts vary according to the school levy.

Artesia Gets Old Jail Equipment

Another important transaction of the court Tuesday, was the purchase of new equipment for the county jail. The present equipment of the jail at Carlsbad will be donated to Artesia. While no definite provisions have been made to build a new jail here, arrangements will likely be made soon to build a new structure where the old jail house now stands, at the corner of Quay and First streets.

According to C. E. Mann, mayor plans will be made to build the structure as economically as possible using the old county equipment in the interior of the new city jail.

COTTON GATHERING OPERATIONS WILL BE IN FULL SWING SOON

With all the local gins tuned up to go and several bales ginned, the cotton harvesting operations are expected to get in full swing within the next ten days. The local gins have turned out five bales, the first bale was ginned Saturday by the Farmers Gin Co., and the Association gin reports four bales ginned up to this morning.

Prospects are very good for the largest cotton crop in the history of the valley. Cotton pickers will soon be in demand. Several hundred extra pickers will be needed to help gather the crop in Eddy county this year.

The local cotton market has shown a decided upward tendency for the past two weeks. Although it showed a decline in the opening this morning, due either to an increased private forecast or to favorable weather conditions in the cotton belt. An extended drought in Texas has reduced the expected yield to a considerable degree.

The cotton market since August 30th is as follows:

	Open	Close
August 30	19.25c	19.40c
August 31	19.25c	19.48c
September 3	19.51c	19.68c
September 4	19.66c	19.54c
September 5	19.18c	

J. DOUG. MORGAN SHOW HERE ALL NEXT WEEK

Charles and Elizabeth Morrill's J. Doug. Morgan show will be in Artesia one week commencing Monday, September 9th.

This is one of the oldest tented organizations on the road today. It has a reputation over its regular territory of being the best and highest class show of its kind on the road. They have entirely new equipment including a new tent and new scenery and are showing all of the New York royalty plays.

They are featuring Elizabeth Morrill as leading lady. She is known in the show world as being one of the cleverest leading ladies in the business.

They are also carrying the best jazz orchestra ever carried by a tented organization.

The management also have five big time vaudeville acts which entertain the patrons between acts of each play. The tent is absolutely water proof. The big tent will be located on 4th street one block south of the Post Office.

WRIGHT A LAKEWOOD RANCHER WILL AWAIT EDDY DISTRICT COURT

G. C. Wright, Lakewood rancher was held over to await the action of the Eddy county district court, following a preliminary hearing before Frank Richards, justice of the peace at Carlsbad, Friday. Wright was charged with the murder of A. J. Foster at the Wright ranch on August 14th. Foster died at a Carlsbad hospital on August 15th, after an altercation with Wright on the previous day.

At the preliminary hearing the state, represented by Judson Osburn district attorney presented the testimony of four witnesses, the principal of whom was Homer Ham, a neighboring rancher. The defense offered no testimony.

Wright's case will come up for trial at the next session of the district court, which convenes at Carlsbad on October 7th.

THE LEGION DELEGATES WANT STATE MEETING FOR ARTESIA IN 1930

The Artesia delegates to the American Legion and Auxiliary convention which convenes at Las Cruces to-day, left at 8:00 o'clock yesterday morning. The representatives who left yesterday morning were really advanced guard of the local delegation that will attend the convention during the three days, September 5, 6, and 7. More are expected to leave this morning.

A strong effort will be made to secure the 1930 state convention for Artesia. The delegates are well organized and will make a strong bid for the 1930 meet, although they expect a stiff opponent in Raton. All cars leaving yesterday morning bore large banners with the wording "Artesia 1930." In addition the locals were armed with green tags carrying the same wording and with 500 descriptive folders telling about the advantages the community will have to offer the state convention.

The local Auxiliary representatives will also attempt to capture another honor, the presidency of the state organization.

Before leaving one delegate suggested that if Artesia business men would send a number of telegrams to the convention Friday, setting forth the claims of the community, it would add considerable weight to their chances in landing the 1930 state meet.

Representatives leaving Artesia yesterday morning for Las Cruces included Mesdames H. A. Stroup, Albert Richards, Ben Pior and Jim Haskins, Mr. and Mrs. Alex McGonagill and Messrs. Wade Cunningham, Sid Cox, Bun Muncy and George King.

LIGHT RAIN

A light sprinkle is falling as the Advocate goes to press with indications for a heavy shower in the north and west.

ONE HUNDRED FOUR DELEGATES ATTEND G. P. A. MEET RECENTLY

Three representatives from the Artesia Game Protective Association attended the State Game Protective Association held at Hot Springs on September 1 and 2, the local delegates being M. W. Evans, William Linell and Preston Dunn. M. Stevenson, deputy game warden and Miller Ammons, deputy game warden and former resident of Artesia were also delegates attended from various parts of the state. Sunday was devoted to entertaining the sportsmen and boating, fishing and racing were the features of the program. All enjoyed a big fish fry Sunday evening when more than one hundred bass were prepared.

The delegates went on record as favoring legislation which will give the State Game Commission power to control critical situations as they arise. A measure aimed to remedy the situation was defeated at the last session of the legislature.

Fred Sherman of Deming, was elected president of the state G. P. A. Vice presidents in the order named were, Charles E. Las Cruces, H. P. Saunders, Roswell and Jimmy Knox, Hot Springs. This board will select the secretary-treasurer.

The association went on record as favoring retention of public fishing rights on state lands in the future.

T. & P. Road Given Right To Build N. M. Extension

The Santa Fe Authorized To Construct 46 Mile Line To Lovington — The Line To Hobbs Is Denied By The Examiner.

WASHINGTON D. C.— Interstate commerce commissioner Haskell C. Davis yesterday recommended to the commission that the Texas, New Mexico Railway Company be permitted to construct a 70-mile extension from its terminus on the Texas-New Mexico state line to Lovington, Lea county, New Mexico. Haskell also recommended the South Plains and Santa Fe Railway Company be authorized to construct a 46-mile extension of its line from Seagraves to Lovington.

Recommendation was made that the commission deny the application of the South Plains and Santa Fe road to build a 44-mile branch line extending from its proposed extension about five miles west of the Texas-New Mexico state line in a southerly direction.

THE LAKE ARTHUR SCHOOL FACULTY

The fall term of the Lake Arthur schools started Monday with a good attendance. A number of last year's faculty members are back on the job again. C. R. Bernard, who for the past two years has served the community very efficiently as superintendent has begun his third year.

The faculty is composed of: C. R. Bernard, superintendent; Joe McCall, coach; Mark Matley, instructor in agriculture; Mrs. Lilian Paris, home economics; Miss Mae Brewer, seventh and eighth grades; Miss Ruby Smith, fifth and sixth grades; Mrs. Flora Smith, third and fourth grades; Mrs. Moss Spence, second grade; Miss Lenora Bradley, primary.

CATTLE GRADING DEMONSTRATION FRIDAY

A cattle grading demonstration in charge of J. K. Wallace specialist in animal husbandry with the U. S. Department of Agriculture will be given at the Austin Reeves ranch on the Lower Penasco tomorrow, according to an announcement made at Roswell yesterday. All interested stockmen are invited to attend.

NOTICE TO ODDFELLOWS AND REBEKAHS

Artesia Lodge No. 11, I. O. O. F. will have a special get-together meeting Tuesday night, September 10th. All Oddfellows, Rebekahs and their companions are invited to join in a social hour after the regular lodge meeting.

HOTEL ORGANIZATION ARE CITY CHAMPIONS

The Artesia hotel organization are the city baseball champions, having eliminated the Chevrolet nine yesterday afternoon at the Brainerd park by a score of 9-4. So far as known there are no other contenders. The hotel nine defeated the Soda Jerkers, Thursday afternoon to go into the finals.

VACCINATES PUPILS

Dr. O. E. Puckett county officer has been very busy for the past two days vaccinating pupils at Artesia and at Hope against small pox. During this period sixty were vaccinated here and twenty-four at Hope.

FIRST BALE OF 1929 IS GINNED SATURDAY — BRINGS A GOOD PRICE

The first bale of cotton grown in this section during 1929 was brought into town Saturday by K. E. Hammond, who lives on the Hedgepeth farm, southeast of Artesia and ginned at the Farmers' Gin Co. The bale weighed 405 pounds and was sold to W. E. Bondurant of Roswell for 25 cents per pound.

The first bale this year was almost a week ahead of the first cotton ginned here last year on September 5th.

RALLY DAY

Six of the leading religious denominations of Ar-
tesia have set aside Sunday, September 8th as Rally
Day in the Sunday schools of Artesia. The chief pur-
pose of Rally Day is to create renewed interest in the
local Sunday schools, which have so long been an im-
portant factor in the social and religious activities of
the community. This is a worthy undertaking and
should have the support of the community, not only
next Sunday, but many Sundays to come.

Looking at the matter from purely an economic or
social standpoint, the Sunday schools have paid big
dividends. Leading juvenile authorities agree that
proper Sunday school training is a necessary essential
to good citizenship. Lack of training furnished by the
Sunday school has been equally obvious in the court
room. From a financial standpoint, therefore, the Sun-
day schools should be able to pay their own way, in
making good citizens out of the possible criminals and
in saving the tax payers the incidental court costs nec-
essary to prosecute the law breaker.

SUCCESSFUL FARMING

The general conception with reference to a success-
ful farmer or rancher has undergone a rapid change
within the past decade. There is as much to managing
a farm or ranch as there is to operating any other
business and the day is rapidly passing when a farmer
farms because he can do nothing else.

A few wheat growers of the Panhandle of Texas
raised a good wheat crop this year on little moisture
and when you hear of the big wheat crops that are
grown in some sections year after year, it does not
necessarily signify that the rainfall has changed, but
that the farmers have learned the best methods of tilling
the soil. The same applies to cotton growing or to
any other crop.

For a weekly pay roll, there is nothing on the farm
that beats the cow, sow and hen. Recognizing this the
leading agriculture authorities have advocated the adop-
tion of the cow, sow and hen system for the small
farmer gains enough experience and has financial
backing enough to conduct further experiments.

SHOULD WE SHOOT 'EM POISON 'EM OR LET 'EM STARVE

The problem of the indigent tourist is one of the
most serious which the city is called upon to face
during the summer months, says the Raton Reporter. It
continues:

There has been for a time, a surcease in the num-
ber of itinerants who have applied for aid—but for
the past several days such a case has been brought to
the attention of city officials and has more or less
"got their goat."

A couple from Kansas City stopped in Raton the
last of the week driving a Ford. They are entirely
without funds and are on their way to Amarillo for the
winter. The man is an electrician and refuses to do
any other kind of work, since work in his line is not
available. He is a war veteran and the American
Legion and Salvation Army both gave the couple money
and free meal tickets.

But instead of thanking these organizations for the
charity given the couple complained about the food,
saying they could get nothing but chile and beans.

They cannot go on because repairs amounting to
about \$8.00 are necessary for the car. They will not
work because they cannot find the particular kind of
work they want to do. They are willing to ask for
charity and take it, though apparently they expect tea-
bone steaks and fried chicken for every meal. They
are both perfectly well and able to work. They refuse
to accept aid to return to Kansas City, "the winters
being too cold."

Shall we force them to work, continue to give them
unappreciated charity, or let 'em starve?

Money values should not govern altogether the
transactions with the home folks. A number of the
local business houses have put a good share of their
profits right back into community enterprises. Artesia
has developed to where it is because a few have given
liberally of their time and money. Have you?

Business conditions in New Mexico and Arizona
are more nearly normal than any two states in the
union, which should be some satisfaction to residents
of this state.

With the crop conditions over the southwestern states
very poor, it is generally predicted that the cotton
market should make a rapid advance on the next gov-
ernment report.

The Town Doctor

(The Doctor of Towns)

ON

WHY DOES A MULE STICK HIS HEAD THROUGH THE FENCE?

You have seen many a mule reaching for grass on
the other side of the fence. He gets his ears stuck, his
neck scratched and his throat cut up, when there is
just as much, just as green, and just as high and lux-
uriant grass right under his very hoofs. Did it ever
occur to you to ask the question why he does that?
There is a reason—it's because he's a mule.

The same logic and reasoning applies to people in
many communities who insist on buying their needs
in some other town, from peddler, or from mail order
houses.

Now, do not misunderstand—this is written with
only the intent of placing blame where blame is due.
Not now, nor at any other time, does this writer over-
look your side of the question.

There are many merchants who do not deserve your
consideration—but which ones do and which ones do
not? There's no law of statute or reason that even
implies that you should buy anything from any mer-
chant, if that merchant is so behind the times, or is of
a disposition that he does not tell you what he has to
offer and how, invite you to buy it and give you a
"reason why" you should buy it from him, in preference
to anyone else, whether that anyone else be local, in
some other town, a mail order house or a peddler.

The only way for you to be sure of those who are
deserving is to give your local merchants a chance
to serve you. Then, if they do not do their part, that's
different.

A merchant that does not go out of his way to get
what you think you want; that does not arrange his
store and his stock, train his help and create an at-
mosphere to please; the merchant that does not sell
you the way you want to be sold who continually cries
about business and still does nothing to please satisfy
and serve you, when he has the chance—that merchant
is not deserving.

You make your own money—it is yours, and you
have a right to spend it where you please, with whom
you please and for what you please, but stop and con-
sider your condition, if the community was taken away
from you. The community can get along without you,
but if the community was completely taken away from
the source of your income, then what?

It is a business proposition. Every time you buy
something for the same or more money, quality con-
sidered, from anyone or any place other than from your
own community, it is costing you money.

"Everybody laughs at a mule. So 'Try The Home
Folks First.'"

Club.

STUDYING THE BREAD BASKET

Plans to reduce the cost of living are easy to dis-
cuss but as Mark Twain said regarding talk about the
weather, "We do nothing about it."

The Associated Grocery Manufacturers of America,
comprising 230 leading manufacturers of grocery pro-
ducts, intend to do more than talk. They have embarked
upon a world wide investigation looking toward the
reduction of distribution costs in their industry for the
direct purpose of benefiting the consumer. Both Presi-
dent Hoover and Secretary of Commerce Lamont have
voiced the unqualified opinion that reduced distribution
costs were essential to continued expansion of American
business.

H. R. Drackett, president of the Associated Grocery
Manufacturers, points out that other nations are striving
to attain a standard of living equal to that in America.
A low price creates a larger volume of sales. If un-
necessary distribution costs cause high prices in fore-
ign as well as local markets, a reduction in these costs
would result in lower prices to consumers and mean
more consumers of American products.

The grocers are embarking upon a worthwhile
movement which is in line with the modern tendency
of mass production with a maximum turn-over at a
minimum profit.

OWN YOUR HOME

"When a primeval woman first found a drier and
safer cave in which to keep her young, and persuaded
her savage mate to defend it against intruders, there
began the own your home movement. There also was
laid the foundation of stable human society, of the arts,
sciences, and all that goes to make up civilization.

"The principle is no less potent to-day than it was
in the beginning. In proportion to the ownership of
homes, society is stable. The more homes that are
owned, the more persons have a stake in the community
and the greater the number working for the common
good.

"And the rule works both ways, for the accumulated
benefits of civilized society are shared first by the
home owners. They have a permanent lien on the
blessings of peace and order and permanency.

"Home ownership is a stimulus to thrift, and a
material assurance of security in old age. It is a
practical training in good business methods for the
children of the family. It cannot help but be an aid
to the commandment, 'Honor thy father and thy
mother.'"

THE HIGHWAY INVESTIGATION

The charges of graft and bootlegging in the state
highway isn't going to do the road system any good
whether true or false. The situation is made doubly
worse by the present financial condition of the high-
way department and while some of the officials of the
department may be made to suffer, the public and the
state will not escape injury, which no amount of in-
vestigation will repair. In all it is an extremely un-
fortunate situation.

"The people of this section are extremely loathe,"
if we may quote the Las Vegas Optic to connect Charles
Springer, Scotty Andrews or W. C. Davidson with the
scandal. The local folks are at least willing to believe
them innocent until their guilt is proven by a fair
and impartial trial in a constitutional court.

INSIDE INFORMATION

Blackberry juice makes an ap-
petizing punch, combined with other
fruit juices, lemon, sugar, and gin-
ger ale.

A thick steak after searing may be
successfully finished in a hot oven
(450° F.). Slip a rack under the
steak in the skillet, and the meat
will cook evenly without being turned.

Mushroom sauce for steak is made
as follows: Wash fresh mushrooms,
separate caps from stems, trim
the stems, and cut into pieces. Cook
1 pound of mushrooms in 2 table-
spoons of butter in a covered pan
5 to 10 minutes at moderate heat.
Season and serve with steak. Can-
ned mushrooms may also be used.

Shiny fabrics, even black, tend to
increase the size of the wearer, and
should be avoided by large, stout
women. Coarsely woven, thick, or
fuzzy materials also increase the ap-
parent bulk of the figure. Soft,
clinging materials should be chosen.
Light and bright colors are not so
good as dark colors for the woman
of large build.

Tarnish can be removed from silver
by the electrolytic method. Fill an
enamel or agateware kettle partly
full of water in which has been dis-
solved 1 teaspoon of either washing
or baking soda and one teaspoon of
salt to each quart of water. Heat
this solution to the boiling point, put
in strips of clean aluminum or bright
zinc, and the tarnished silver, and
boil it. The silver must be com-
pletely covered by the water and
each piece must be in contact with the
metal, either directly or through
other silver. When the tarnish has
disappeared, wash the silver, and
dry it with a clean, soft cloth.

SHEEP AND GOAT RAISERS GET VALUABLE POINTERS

Meetings of sheep and goat breeders have recently been held at Lordsburg, Pinon, Artesia, Sedan, Clayton and Springer, by A. K. Mackey of the animal husbandry department of the Texas A. & M. College.

At these meetings Mr. Mackey emphasized the importance of producing a good grade of wool and mohair of milling length, moderate grease content and minimum of dirt and foreign matter to insure best returns. "The quality and weight of fleeces of sheep and goats in New Mexico can be greatly improved by using purebred males of heavy fleece production," says Mr. Mackey. If the poor quality females are culled from the flocks, the increase in average production of the flock will be much more rapid.

"There are 2594 different machines in operation in the Plymouth Motor Corporation's plant in Detroit and each machine is operated by its own electric motor," says P. C. Sauerbrey operating manager of the Plymouth plant.

Collins Investment Company, a corporation, C. J. Weiser, and all of the unknown heirs of each and all of the above named Defendants and all unknown persons claiming any lien, interest or title adverse to Plaintiff, Defendants, GREETING:

You the said Defendants are notified that suit has been filed and commenced against you in the District Court of Eddy County, New Mexico, Number 4834 on the Civil Docket of the District Court of Eddy County, New Mexico by R. Algyer, Plaintiff, and against you and each of you, the said Defendants, that the nature and objects of said suit are to secure a decree of the District Court of Eddy County New Mexico quieting the title of the Plaintiff in and to the W 1/2 SW 1/4 of Section 5; N 1/2 SE 1/4 Section 6, all in Township 20 South, Range 26 East, N. M. P. M., in Eddy County, New Mexico, containing 160 acres more or less, and against you, and to forever bar and estop you the said Defendants, and anyone claiming by, under or through you from having or claiming any right, title or interest in or to the said lands adverse to the Plaintiff, and to quiet and set at rest Plaintiffs title thereto, it being alleged that Plaintiff is the fee simple owner and in possession thereof.

You the said Defendants, and each of you, are further notified that unless you enter your appearance in said cause on or before the 30th day of Oct. 1929, judgment will be rendered against you and each of you by default, and the Plaintiff will apply to and be given by the court the relief prayed for in said cause.

G. U. McCrary whose business and postoffice address is Artesia, New Mexico is attorney for Plaintiff.

Witness my hand and the seal of said court this 3rd day of Sept. 1929. (SEAL) THELMA T. LUSK, 38-4t Clerk of Said District Court.

HOSPITAL NOTES

Mrs. Keller Sr. of Hope, was brought to the hospital last week for treatment.

Dorris Ransbarger, who had a foot badly injured Monday is in the hospital for treatment.

Mrs. Joseph Bailey, who had been in the hospital with a crushed foot, was able to be taken home last week.

Mrs. Jim Bates, who has been a patient at the City hospital for several days, was able to go home Sunday.

Mr. Carson Sr., of Hope, was brought to the hospital Sunday for treatment. He is in a critical condition.

The small son of Ollen Jones, of Flagstaff, Arizona, was sufficiently recovered to be taken to the home of his grandmother at Hope the last of the week.

J. B. Dorman, accidentally let some ashes from a cigarette he was smoking, fall into his little child's eyes. The latter was taken to the hospital to have her eyes dressed.

Mr. Pepper who was injured in an encounter in the oil field Saturday night, was taken to the hospital for treatment having had his lower lip partly bitten off. Later he was taken to El Paso for skin grafting.

IT PAYS TO RAISE HIGH GRADE ALFALFA

Experienced stockmen know that it is a well established principle of correct livestock feeding that the roughage should come first in planning a ration. Low cost feed bills—especially in dairy cow feeding—are based on the maximum use of legume hays as the source of protein. From the farm management standpoint also, the legume hays, especially alfalfa, yield a much greater quantity of nutrients per acre than timothy or other grass hays.

High grade alfalfa hay can be obtained by cutting the crop not later than one-fourth bloom stage, and by curing in a manner to preserve the greatest degree of leafiness and color says G. R. Quesenberry, agronomist of the New Mexico Extension Service. Low grade alfalfa hay, on the other hand, results from cutting the crop when over ripe, from overdrying that shatters the leaves, from undercuring which may cause unsoundness, or from excessive rain damages. Palatability is superior in the high grade product.

Market prices show pretty well the opinion of a large group of feeders with respect to the comparative feed value of alfalfa hay of various grades. At Kansas City, for example, from May 1926 to January 1929, the average price paid for U. S. No. 1 alfalfa was \$20.00 per ton, U. S. No. 2 alfalfa, \$17.00 per ton, and U. S. No. 3 alfalfa, \$14.00 per ton. During this same period, alfalfa hay of the very leafy, clinging foliage type, which is graded under the U. S. standards as U. S. No. 1 or No. 2 extra leafy alfalfa, sold at premiums of \$3.00 to \$8.00 per ton above prices paid for straight U. S. No. 1 alfalfa. In New Mexico the price was somewhat higher.

It is sometimes impossible for the farmer to avoid the damaging effect of weather on hay quality. But the important factors of time of cutting, methods of curing and methods of storing are largely under the control of the farmer. Producers who plan to raise high grade alfalfa hay should remember that about two-thirds of the protein of the alfalfa plant is contained in the leaves, that about four-fifths of the crude fiber is in the stems, and that leafiness decreases and crude fiber increases as the plant matures. Thus to make alfalfa hay of high grade and high feed value, it is essential to cut the crop in the early stages of bloom and handle it during the curing and storing periods so as to retain a high degree of leafiness.

A special on Christmas Cards at The Advocate.

CONSTRUCTIVE THRIFT MEANS MORE THAN SAVING OF PENNIES

By S. W. Straus, President of the American Society for Thrift.

"That fellow knows how to get along. The pennies do not escape him."

Such a statement is this is not infrequently heard; it reflects the conception of thrift as held by many.

Thrift, however, means more than just saving pennies. Attempting to limit thrift to the saving of money is merely an effort to accept a half-truth.

Altogether too much encouragement has been given to the false doctrine that the thrifty man is a penny saver. As an effect of this false viewpoint, harmful resistance to thrift has been created.

It is true that saving pennies is one of the rudiments of thrift. But it is just as thrifty to save moments; to save one's health; to save one's energy.

Thrift is efficiency. Thrift is eliminating waste. Thrift is spending wisely as well as saving systematically.

Many a successful career and many a great enterprise were founded on penny saving. But to say that thrift consists of saving pennies is as far from the whole truth as to say that the alphabet is literature or that those who know the multiplication

table have mastered mathematics. Let us have more penny savers, both literal and figurative. Let us all learn more and more the value of little things. Let us do all we can to encourage the thought that a penny saved means a great deal more than a penny earned. But let us not foster miserliness or encourage the belief, already too prevalent, that there is nothing to thrift but the hoarding of pennies. Save the pennies, but do not stop there. Money is the symbol of

wealth, but it is not the symbol of human progress. The value of thrift as an essential element of individual development cannot rightly be measured from the standpoint of saving pennies.

"Every motor that is constructed in the plant of the Plymouth Motor Corporation in Detroit is tested for two hours and fifteen minutes before it is put into the chassis," according to H. E. Heath, service manager.

"THE FLYING FOOL"

Mighty thrill epic of the U. S. Air Forces. This 8-reel super special compares favorably with "Wings," and folks: on account of the tremendous crowds attending Sunday shows—we urge you to come early—Show at 7:30.

CHEVROLET HAS PART IN RECORD FLIGHT OF THE ST. LOUIS ROBIN

The St. Louis Robin has already made aviation history, but were it not for the humble part played in its dramatic exploit by a specially equipped Chevrolet six cylinder truck, it is possible that the story might have been different.

A special brand of gasoline was being used in the Robin, and on Sunday, July 21, the flyer's second Sunday aloft, the supply was nearly diminished.

The nearest point where an additional supply could be obtained was Tulsa, Oklahoma, but the train which started forth immediately from that point with a new supply was unfortunately blocked off by a wreck ahead.

News of the mishap was sent to St. Louis and the reply came back, "send it by truck."

So a huge tank containing 800 gallons, was placed on the sturdy Chevrolet, and the drivers were ordered to "give it the gun."

New, speeding a truck is alright under most conditions, but never so if it is a transport for gasoline. At a speed barely within the grounds of safety, however, the truck started on its 450 mile trip late Sunday afternoon over a road that was mostly gravel.

Shortly after noon the next day the trip was completed without mishap. Amid cheers the Chevrolet pulled up alongside the refueling plane, and thus was obviated the necessity of switching brands of fuel, a step that was feared both by the pilots and the designer of the Robin's engine.

An interesting point in the part played by the Chevrolet was that it had been run only 15 miles before it undertook its emergency mission. Nevertheless, according to the drivers not once did the motor heat up, nor have there been any consequent engine difficulties.

ANNUAL FIELD DAY AT STATE COLLEGE

The annual field day of the New Mexico Agricultural Experiment Station has been definitely set for 10:00 a. m., September 23, 1929. This meeting will be devoted largely to field crops but an opportunity to visit other departments, as well as a few farms near the college, will be given all those who attend. All of the experiment station workers will be on hand to help show the visitors over their work at the station and to take them through the various departments. Since our last field day marked progress has been made in some of the departments of the college. Outstanding results in cotton improvement may be seen. Corn and alfalfa work and sugar beet seed production have also shown marked development. Livestock has been added, and a new dairy laboratory has been erected.

Cotton, corn and alfalfa will be the principal crops featured at this meeting, and as work in these crops has been carried on for a number of years, progress will readily be seen by the visitors.

Although a very large crowd attended the meeting in 1928, an even larger crowd is expected this year. In 1928 most of the visitors were from the southern part of the state, but a number are expected from the extreme northern and eastern portions this year. Also many local people are expected. Lunch will be served on the campus at noon.

This date is also the date of the annual meeting of the New Mexico Crop Improvement Association. The seed growers will meet in the morning and adjourn for the field day which immediately follows their meeting.

"Paw?"
"Now what?"
"Why didn't Noah swat both the flies when he had such a good chance?"
"You go to bed young man!"

Shingles Are Used to Excellent Advantage in This Pretty Home

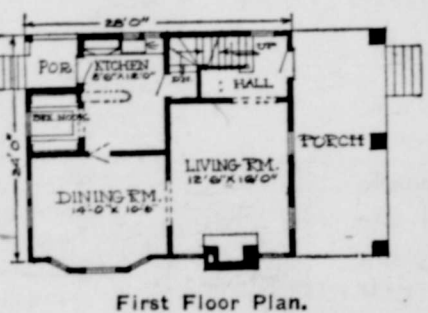

A second story of greater area than the floor below is frequently used, overhanging the porch, to gain additional space above stairs. Here the idea has been used quite successfully, creating an atmosphere of modest seclusion about the entrance.

By W. A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

During the last few years shingles have been used to a very excellent advantage for the outside walls of modern frame homes. They make an attractive exterior for the reason that they may be had in colors, or the silver gray which is reminiscent of the homes which have been weather-beaten by the salt ocean air. It is this silver appearance that makes the homes along the Atlantic seacoast so attractive.

In the home building design shown in the accompanying illustration shingles have been used to a very excellent advantage. However, there is

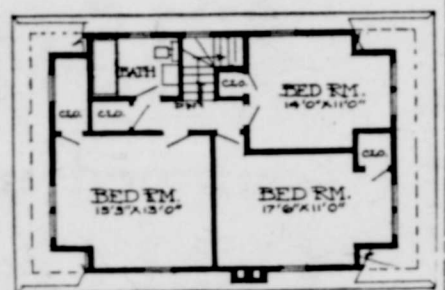

First Floor Plan.

another feature to this design which is well worth considering; a second story of greater area than the floor below is used, and overhangs the porch in order to gain additional space for sleeping rooms. This overhang of

the second floor provides a deeply recessed porch and gives to the house the appearance of greater size than it really is.

The dimensions of the home are 24 by 28 feet. On the first floor are a large living room, a dining room and kitchen with a breakfast nook be-

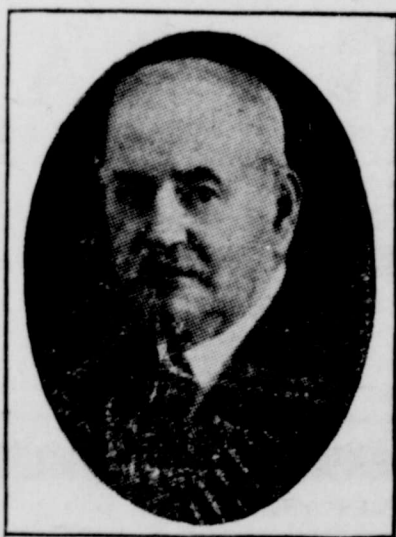

Second Floor Plan.

tween the kitchen and dining room. On the second floor are three large bedrooms and bathroom.

How these rooms are arranged and their sizes are shown on the floor plans which accompanies the exterior view of the house. It will be noted that the living room extends practically the width of the house with the exception of space for the entrance hall and the stairs leading to the second floor. Back of the living room is the dining room and to the right are the breakfast nook and kitchen. The steep pitch of the roof is broken by a dormer at the front which permits space for double windows for each of the front bedrooms, while another window on either side permits excellent ventilation.

How attractive this home can be made when surrounded by plantings of shrubs and flowers is shown in the illustration.

HE CLIMBED POLES BACK IN THE '80'S

WILLIAM P. ENNIS

WILLIAM P. ENNIS has been connected continuously with the telephone business for more than forty-five years. He entered the employ of the old Metropolitan Telephone Company in 1883 as a lineman and remained in the service when the company became the New York Telephone Company. Mr. Ennis recalls vividly those early days when all the telephone wires were carried on poles and across the tops of buildings, before the underground conduit system had been developed.

"A traveling service school for the purpose of training Plymouth, De Soto, Dodge and Chrysler dealers in the finer points of automobile maintenance is touring the country," according to H. E. Heath service manager of the Plymouth Motor Corporation.

CLAIMS TOAD STORY IS ABSOLUTELY TRUE

Several weeks ago, the Big Horn Basin newspapers in Wyoming published a story about some workmen employed by Hon. C. F. Robertson of Worland finding 5 toads embedded in bentonite. When liberated from their prisons, the papers stated that they "opened their mouths, blinked their eyes and immediately hopped off." Thinking the story sounded rather "fishy" we wrote Mr. Robertson for confirmation, and this is his answer:

Your letter of inquiry about the "toad story" came yesterday. The story as printed was not just exactly as I gave it to the editor. The men were digging a shale formation to find a dip and ran on to a 4 or 5 inch layer of bentonite.

Under the bentonite imbedded in the Cody shale, is where they found the toads. It was a new one on me. When liberated, they blinked their eyes and "hopped off" just the same as any ordinary garden toad that had not been in a state of "suspended animation" for a million or more years.

There would seem to be no other explanation. The bentonite, of course holds moisture. That may have had some influence on the situation. Anyway, it is a cinch that the toads never made their way down through the bentonite. Undoubtedly they were in the formation when it was laid down or submerged under the sea.

I can assure you that we had not had any "moonshine" but plenty of "sunshine" for we had been out on the desert waste for 3 days and the sun's rays took a "shot" at us. Oh, but it was unmercifully hot!—Inland Oil Index.

Student's note book covers embossed in school colors at The Advocate. Your name stamped free.

THE FIRST BAPTIST CHURCH

Our revival is to begin one week from Sunday. Dr. J. J. Cook of Ft. Worth, Texas, and his singer Ray Camp of Ft. Worth, are to assist us. They are two splendid workers and we feel sure will bring some great messages in song and sermon. Dr. Cook has been having good success in the evangelistic field and we understand his singer is very successful as a gospel singer. With these two leading we should have a great meeting. Shall we not as a church pray and labor to the end that God may give us a great revival and a great ingathering. As far as possible we solicit the cooperation of the people of Artesia and hope that the meeting shall be a blessing to our little city.

Last Sunday Rev. Buren Sparks, a former pastor of the church who was visiting in our city preached for us. He brought good messages which were very much enjoyed. Next Sunday morning the pastor will bring his message on "Redemption" and Mrs. Fred Cole will sing an appropriate song. This is a very fine song and we feel sure you will enjoy hearing Mrs. Cole sing it. At the evening hour the subject will be, "Finding God." The orchestra will assist in the music. Let us make of this a great evangelistic service.

Let us remember that next Sunday is Rally Day in the Sunday school and we hope to see every member of our church and Sunday school in the Sunday school service next Sunday morning. Let us each one bring one and greatly enlarge our attendance if it is possible. We extend to you a warm welcome to all our services.

R. PETERSON, Pastor.

STATES IMPROVED 29,252 MILES OF HIGHWAYS DURING THE PAST YEAR

During 1928 the 48 states improved a total of 29,252 miles of their highway systems, according to figures received from the states and compiled by the bureau of public roads. This is an increase of 2,530 miles over the 1927 figure of 26,722 miles.

Texas heads the states in the year's improvement with 2,356 miles. Kansas with 1,785 miles, ranks second; Arkansas, with 1,673, is third. Iowa improved 1,345 miles and Illinois, 1,344, ranking fourth and fifth respectively. Minnesota, with 1,243

miles is sixth; North Dakota, with 1,230, is seventh; New Mexico, with 1,052, is eighth; Kentucky, with 1,021, is ninth, and Ohio, with 928 miles is tenth.

The state systems at the end of 1928 had 306,442 miles of highways, according to figures given to the bureau. Of this total, 193,138 miles were surfaced roads, 31,755 miles graded and drained, and 81,549 miles were unimproved and partly graded highways.

"Oh gosh!" the girl exclaimed started to rain. You'll take me home."
"Why, I'd love to," her escort stammered, "but you I live at the Y."

Ball Player: "We gave the \$50 to let us win the game."
Friend: "And still you crooked."
Player: "Yeah—the umpire crooked."

Social Activities

ANNOUNCEMENT PARTY

The approaching marriage of Miss Helen Mann and Mr. Ralph (Tex) Henson, was charmingly announced at a party given by the sister of the bride-to-be, Mrs. Fred Cole, at the Mann home last Thursday. The party was in the form of a one o'clock luncheon, which was served in two courses at quartette tables. The tables were decorated in four pastel shades, orchid, pink, green and yellow, with nut cups and tallies in the prevailing colors. Mrs. Fred Cole, Mrs. Mann and the Misses La-Rue Mann and Gladys and Ina Cole, who assisted in serving, were dressed in harmony with the color scheme. Large baskets of lovely garden flowers placed about the room made a very pleasing background for this interesting social event. As a record on the orthophonic began playing, "O Promis Me," tiny cards bearing the pictures of a bride and groom and the names of Miss Mann and Mr. Henson and the date, Tuesday, October 1st, were placed at the plate of each guest, announcing the approaching nuptials. Miss Mann was book as a souvenir of the occasion.

The luncheon was followed by an afternoon of bridge in which Mrs. George Williams won high score and Miss Helen Bullock, the cut prize. The guests on this occasion in addition to the honoree were Mesdames George Williams, Lloyd Simon, of Maljamar, Stanley Blocker, Finn Watson and Jack Curry, the Misses Ella Brown, Helen Bullock, Bertha Richards, Catherine Clarke, Dora Russell and Margaret Perry, and four guests who were present at the luncheon only, Mesdames W. C. Martin, Howard Byrd, Hugh Kiddy and Miss Ethel Bullock.

BRIDGE DINNER

Mr. and Mrs. Landis Feather were hosts to the Friday Evening Bridge club and an extra table of guests last Friday. Following a delicious dinner the company spent the evening at cards. Mrs. E. J. Brooks substituted and the Misses Catherine Clarke, Ethel, Helen and Edna Bullock composed the extra table.

FRIED CHICKEN BREAKFAST

The six low score members, Mesdames Albert Richards, John Richards, Fred Cole, C. E. Mann, Will Linell and John Lanning of Roswell, entertained the high score members, Mesdames C. R. Blocker, W. C. Martin, Atkeson, Seale, Kimbrough, Corbin and Lewis Story and one special guest, Mrs. T. M. Nash of Memphis, Tennessee, at a fried chicken breakfast last Friday morning. The breakfast was given at the Mann home at eight o'clock and was in three courses.

AFTERNOON PARTY

Mrs. C. R. Blocker entertained a party of young girls last Thursday afternoon complimentary to her niece, Miss Lelia Cooper, of Kenna. The amusement of the afternoon was the game of Hearts, in which high score was won by Louise Compton, low score by Alma Pearson and the guest prize was awarded to the honoree. The refreshments, in two courses, centered around a "flapper" salad. The guest list included besides Miss Cooper, the Misses Evelyn Kimbrough, Verle Campbell, Evelyn and Ethelyn Cobble, Nelda Wilson, Alma Pearson, Katherine Filbert, Jeanne Wheatley, Grace Sinclair, Mary Alice Rabb and Louise Compton.

THE YOUNG MOTHERS' CLUB

The club met at Mrs. Ben Dunn's last Friday afternoon. The vitally important subject of "Children's Emotions," was presented in a paper read by Mrs. Boone Barnett and followed by an animated discussion by members. Delicious refreshments were served by the hostess during the social hour.

THE SECOND BRIDGE CLUB

The Second Bridge club met with Mrs. Jeff Hightower on Tuesday afternoon with two substitutes, Mrs. Mabel Welton and Mrs. C. A. Bulot, playing. Delicious refreshments were served in two courses, Mrs. Stanley Blocker assisting her mother in serving.

FORTNIGHTLY BRIDGE CLUB

The club had only one substitute, Mrs. T. M. Nash, of Memphis, Tennessee, at its last meeting on Tuesday afternoon, which was held at the home of Mrs. W. C. Martin. The regular two course plate luncheon was served.

Student's note book covers embossed in school colors at The Advocate. Your name stamped free.

FACULTY RECEPTION PROGRAM

Final arrangements have been completed for the annual reception of the Artesia school faculty given under the auspices of the local Council of Churches, with Rev. R. Peterson as chairman, Friday evening at 7:30 at the Baptist church. Parents and patrons of our schools are urged to show their interest and welcome, especially to the new faculty members.

- Following is the program:
1. Hymn—"All Hail the Power of Jesus Name."
 2. Invocation—Rev. W. A. Henry
 3. Scripture Reading—Rev. J. P. Sinclair.
 4. Instrumental Music.
 5. Address of Welcome—Rev. H. G. Scoggins, chairman of Council of Churches.
 6. Response to Welcome—By member of school faculty.
 7. Instrumental music.
 8. Announcements.
 9. Introduction of New Faculty—Supt. W. E. Kerr.
 10. Social Hour and Refreshments.

A special on Christmas Cards at The Advocate.

Mr. and Mrs. Bert Muncy enjoyed a visit last week from a party of Mrs. Muncy's relatives. In the company were Mrs. Muncy's mother, Mrs. J. L. Chatten and son, A. D. Chatten and wife, from the ranch near Elkins. With them were Mrs. Chatten's sister, Mrs. Craddock and son, Dr. Craddock, wife and three sons, of Louisville, Kentucky, of whom the two older sons are medical students preparing to enter their father's profession. The party went through the Carisbad Caverns on Thursday and left for Elkins on Friday.

ENTERTAINS WITH SIX O'CLOCK DINNER

Mr. and Mrs. Albert Richards served a six o'clock dinner Thursday evening honoring Miss Evelyn Kimbrough, who recently entered the Loretto Academy at Santa Fe and her brothers Dick and Wade, who have entered St. Michaels College at Santa Fe. Mrs. Kimbrough and Miss Merle Campbell were also guests at the dinner.

Student's note book covers embossed in school colors at The Advocate. Your name stamped free.

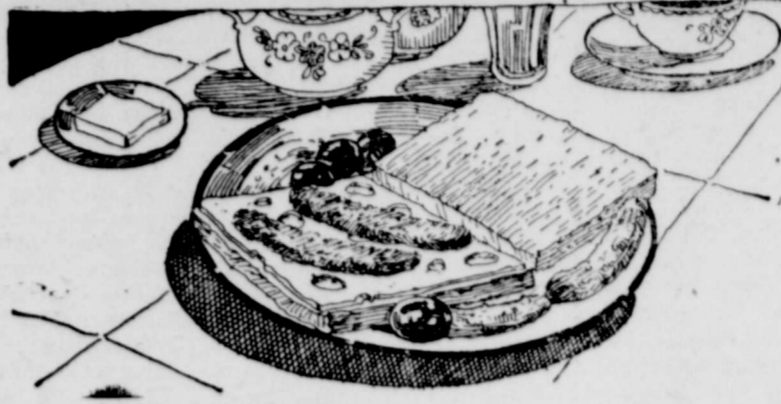

ENTERTAINS WITH BUNK PARTY

Miss Verle Campbell entertained a number of her friends with a bunk party, at her home at the Oasis Friday evening, honoring Miss Evelyn Kimbrough, who left recently for Santa Fe to enter the Loretto Academy. The guest list in addition to the honoree included the Misses Lelia Cooper, Lella Jackson, Marylyn Hale, "Toots" Vasey, Jack Ward, Nelda Wilson, Thelma Mitchell and Margaret Frisch.

Miss Mary Sands arrived from Las Vegas Sunday and is spending this week here, guest of Mrs. R. L. Paris. Miss Sands who was teacher of English in Artesia High school for two years, has been for the past four years an instructor in the Montana State Teachers' College at Dillon, following one year of study in Wisconsin University. She will return the last of the week to Las Vegas for a short visit with her parents before going to New Haven, Connecticut, where she will study dramatic production at Yale University the coming winter.

Tasty Snacks for Thriving Appetites

By CAROLINE B. KING
Culinary Expert and Lecturer on Domestic Science

NOT the least pleasurable part of a day out-doors is the thriving appetite that one takes home. Nothing tastes better after a morning at golf or on the woodpile, after a few sets of brisk tennis, a long hike or a motor trip, than some tasty, piquant tid bit.

It is on such occasions that culinary art most justifies itself, and with least effort. And on such occasions cheese, served merely as an appetizing extra or as the principal ingredient in the main dish, is one of the foods that recommend themselves to the discerning housewife. Incidentally, Switzerland cheese is one of the most valuable of all food products, for it is far richer in protein than eggs, or meat, and in that very important Vitamine A so essential to human well being. The old idea that cheese is not readily digestible is of course long since exploded.

The following hot luncheon dishes are easily and quickly made:

Toasted Frankfurters and Cheese: Skin the frankfurters, or better still, get the skinless frankfurters, and split them lengthwise. Slice Switzerland cheese thin, and lay on neatly trimmed slices of lightly buttered bread. Arrange the frankfurters on the cheese and place at the top of a very hot oven or under the broiler of the gas oven and leave until the bread browns, the sausages sizzle and the cheese melts slightly. Brush over with

mustard and serve hot, garnished with pickles and olives.

Open Onion Sandwiches: Slice a medium sized onion very thin and pour boiling water over it. Let stand a few minutes, then drain and cover with cold water. Butter slices of rye bread, cover with shredded dried beef, then with the onion slices and top with Switzerland cheese sliced thin. Place in the oven until the meat begins to sizzle, then brush with mustard and serve with pickle relish.

Swiss Eggs: Butter individual baking dishes, and break an egg in each. Cover with a tablespoonful of cream, and add a pinch of chopped parsley and salt and pepper to taste. Bake in a hot oven till well puffed, then arrange thin strips of Switzerland cheese over the top, sprinkle with paprika and serve at once.

Switzerland Jelly Omelet: Break three eggs and beat yolks and whites separately. To the yolks add 2 tablespoonfuls of powdered sugar and ¼ teaspoonful of salt; also two tablespoonfuls of cold water. Fold in the stiffly beaten whites and pour into a hot omelet pan in which two tablespoonfuls of butter have been melted. Cook as usual, but just before folding arrange a layer of currant or other tart jelly and a layer of thinly sliced Switzerland cheese over one-half the omelet. Fold and serve at once.

CARD OF THANKS

I wish to extend my sincere thanks to kind neighbors and friends for their assistance and sympathy during the illness and death of my wife.

F. M. PRIVETT

The KITCHEN CABINET

(© 1925, Western Newspaper Union.)

"When a bit of sunshine hits ye,
After passing of a cloud,
When a fit of laughter hits ye
An' ye'r spine is feelin' proud,
Don't forget to up and fling it
At a soul that's feelin' blue,
For the munit that ye sling it
It's a boomerang to you."

SEASONABLE DISHES

This is the season of the year when there is much feasting and good times; the peak of the party season and the time when all good women need help to prepare menus to delight the family and guests.

When serving chicken roasted to a golden brown serve with it:

Caribbean Waffles.—Take two and one-half cupfuls of flour, one teaspoonful of salt, four teaspoonfuls of baking powder, two tablespoonfuls of sugar, two eggs, one and one-third to one and one-half cupfuls of milk, six tablespoonfuls of melted butter and two cupfuls of banana pulp. Mix and sift the dry ingredients, then add the egg yolks, milk and banana pulp. Be sure that the fruit is fully ripe and free from all signs of green tips. Beat well and fold in the stiffly beaten whites of the eggs and then the butter. Bake a little longer on the waffle iron than the usual waffle. Serve with strained honey or sweet lemon butter, made thus:

Lemon Butter.—Cream five tablespoonfuls of sugar and four tablespoonfuls of butter, add three teaspoonfuls of lemon juice and a little of the lemon rind. Serve in balls.

Potato Chowder.—Try this on a cold night and see how the family will enjoy it: Pare four large potatoes and cut them into neat cubes. Chop fine one small onion and a tablespoonful of parsley. Arrange the potatoes, onion, parsley in layers in a kettle, add a pint of boiling water and cook covered closely until tender. Prepare a thin white sauce, using one tablespoonful each of flour and butter and pour over three cupfuls of milk.

Steamed Raisin Pudding.—Mix and sift one cupful each of graham and white flour, one teaspoonful of salt and two teaspoonfuls of baking powder, one-half teaspoonful of soda. Add one cupful of molasses, one cupful of milk, and one beaten egg. Mix well and add one cupful each of currants and raisins which have been well dredged with flour. Pour into greased mold and steam for three hours. Serve hot with a hard sauce.

LOCALS

Mr. and Mrs. D. E. Buckles and Mr. and Mrs. Hinshaw spent Sunday and Labor Day at the I. O. O. F. camp on the Ruidoso. They returned home Monday by way of Capitan and Lincoln and had an interesting visit to the old court house and jail at Lincoln, famous for its association with Billy the Kid.

Mr. and Mrs. A. H. Crandall were in town from Maljamar Tuesday accompanied by their son, Burriss Crandall, wife and son, Billy, of Enid, Oklahoma. Mr. and Mrs. Burriss Crandall came down from Oklahoma to visit his parents and to take home their son, Billy, who had been spending the summer with his grandparents.

Dr. and Mrs. W. C. Doss returned Monday evening from an extended tour of interesting points in Arizona and California and for a visit with their daughter Miss Mildred at Tucson, Arizona and their son Judson Doss and family of Los Angeles, California. Miss Mildred accompanied them to Los Angeles for a visit with her brother.

Col. W. B. Pistole of the Judge Advocate office at Chicago, and former attorney of Artesia presented the Artesia library a set of books that will prove useful to the high school pupils and lovers of history. The set consists of fourteen volumes of great debates in American history from the debates on the Colonial Stamp Act to the debates of congress to the close of the Taft administration.

Acts About the Telephone

Telephone service between Edmonton, Canada, and London, has been established through New York connection.

In 1928 there was a net of 6.3 per cent in the number of telephones in the state of Michigan as compared with a net of 5.5 for 1927. Connecticut now has 18.8 telephones per 100 of its population.

Following extensions of telephone service have recently been made: Paris to Warsaw; of Czechoslovakia to all of Poland; London to Bucharest; London to the southwestern part of Finland; Norway to Hungary; to Roumania; Warsaw to Stockholm; Sweden to Helsinki.

There are six telephone companies in the United States operating more than a million telephones each. They are: The New Telephone Company, The Illinois Telephone Company, The Western Bell Telephone Company, The New England Telephone Company, The Bell Telephone Company, The Bell Telephone Company of Pennsylvania, and The Pacific Telephone Telegraph Company.

LOCALS

Tommy Spivey came home from Las Cruces last week on a short business trip.

Mr. and Mrs. Jack Hastie made a visit to Cloudcroft Sunday and returned Monday.

Ernest Harp Jr., is recovering nicely from a tonsil operation which was performed Saturday morning.

Miss Florence Oakes arrived Sunday from Las Vegas to teach music in the schools again this year.

C. S. Brown and wife of Oklahoma City are spending a few days here looking after property interests.

G. W. Head of Clovis, with the Triangle Oil Co., spent a few hours here Monday, attending to business matters.

J. L. Bentley has taken over the Red Star Filling Station and will add a stock of groceries along with his auto service.

Mrs. W. C. Cutler arrived from Los Angeles, California Saturday for a visit with her daughter, Mrs. E. H. Phillips and family.

Mrs. Calvin Dunn, Mrs. J. W. Bradshaw and Mrs. Merle Roady and children returned Sunday from their visit to Gallup and Belen.

G. U. McCrary and Irvin Martin were Albuquerque visitors this week and while in the Duke City were guests at the Franciscan hotel.

Mr. and Mrs. A. L. Allinger drove to Carlsbad Sunday and spent the day with their son-in-law, and daughter, Mr. and Mrs. Jim Stagner.

Enoch Roberts has acquired the J. M. Jackson eighty acres of land north of Artesia heights and plans to operate a truck farm on same.

Mrs. Oliver Scoggins and Mrs. Joplin, of Hope were here Tuesday visiting Mrs. Scoggins' mother, Mrs. W. S. French and trading with our merchants.

Mr. and Mrs. Kenneth Rowan are expected to arrive from Los Angeles, California, Sunday to visit with Mr. Rowan's parents Mr. and Mrs. Beecher Rowan.

Rev. and Mrs. Buren Sparks and family of Alpine, Texas spent the week end here visiting with Mr. and Mrs. C. M. Cole and family. Rev. Sparks is the former pastor of the Baptist church here.

Miss Barbara Clayton, daughter of Fred Clayton, is here from Albuquerque this week visiting at the home of her uncle, Joe Clayton, also her relatives, the Joe Richards, Geo. Gage and Eddington Gage.

Ernest Scoggins has accepted a position with the Sparks Chevrolet Co., of Roswell as salesman and has recently moved his family to Roswell. He was formerly with the Jackson-Bolton Chevrolet Co., of Artesia.

The Misses Ethel and Edna Bullock and Catherine Clarke drove over to Lovington Sunday to spend the day with friends, who were going through there and enjoyed a delightful picnic dinner in the great open spaces.

Joe Hamann assumed his old position with the Palace Drug store this morning. Mr. Hamann was in the service of the Safeway Grocery for several days and previous to this time was connected with the Pior Rubber Co.

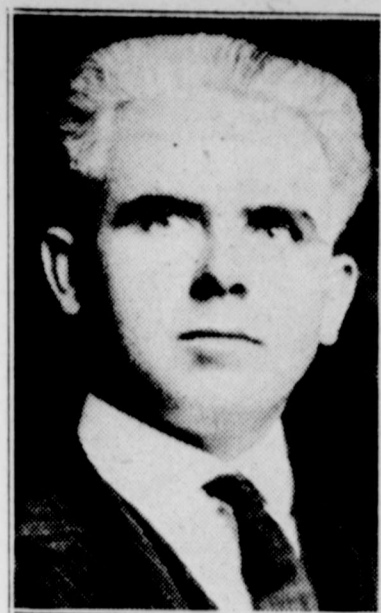

Mr. and Mrs. C. Bert Smith, Mrs. Emma Alexander and son, Arch Alexander, and Mr. and Mrs. Frank Thomas and son, Garnett, were visitors to the Ruidoso and the I. O. O. F. camp during Sunday and the Labor Day vacation.

Mr. and Mrs. Joe Clayton and children, Leon and Pauline, returned Saturday from a ten days' visit to their daughter, Mrs. Clarence Stoldt, of Blackwell, Oklahoma, and also with Mr. Clayton's sister, Mary Clayton (Mrs. Delbert Sprague) at Colony, Kansas.

Mrs. Robert Linn, Mr. and Mrs. Jack Linn and son, Jack Douglas of Siloam Springs, Arkansas spent a few days the past week, visiting Mr. and Mrs. Owen Campbell and family at the Oasis. They left Saturday for Vernon, Texas, where they expect to spend the winter.

Miss Katherine Ragsdale, who recently went to Cincinnati, Ohio to study voice culture, at the Cincinnati Conservatory of Music, broadcast over KFIW at Hopkinsville, Kentucky last Sunday afternoon, but unfortunately atmospheric conditions made it impossible for her to be heard here.

Mr. and Mrs. Stephen Lanning and little daughter, Mary Lou, arrived the past week from Inglewood, California for a visit with Mr. Lanning's parents, Mr. and Mrs. S. A. Lanning, and Mrs. Lanning's father, D. W. Runyan, sister, Mrs. Reed Brannard, and other relatives. Mrs. Lanning will remain six weeks and Mr. Lanning only about ten days.

Carl W. Barnes, "The Silvertone Singer" who will have charge of the song service in the Nazarene Revival.

WRECKAGE OF PLANE IS FOUND SOUTH OF GALLUP YESTERDAY

Eight persons, a woman and seven men, rode through a storm in the skies to their death in one of the most desolate sections of the west, in the destruction of the west-bound transcontinental air transport "City of San Francisco." Wreckage of the big sky liner one of the most modern passenger monoplanes in the company's service, was discovered in a storm swept region twenty-six miles south of Gallup, New Mexico, official advices made public last night revealed. This was thirty hours after the air transport had dropped from sight Tuesday noon.

The dead are: Passengers—Mrs. Corina Raymond, wife of George B. Raymond of Glendale, California; A. B. McGaffey, Albuquerque, N. M.; William Henry Beers, New York City; Harris Livermore, Boston; M. M. Campbell, Cincinnati. Crew—J. B. Stowe, chief pilot; E. A. Dietel, co-pilot; C. F. Canfield, courier.

Simplicity and Dignity Needs of Small Home

Dignity and simplicity are the basic essentials of the successful small house. Fussy and elaborate details not only detract from the architectural merits of a house, but needless add to its cost.

The realization of this fundamental architectural principle is slowly being driven home to the American people, with the result that we are beginning to see a great improvement in our domestic architecture.

The increased cost of building that followed the armistice has at least one good effect. It made people give more serious consideration to the materials used in home building and greatly increased the use of the more permanent materials.

People appreciate more than ever that there is little difference between the cost of the cheaper materials and the best, especially when the difference is reduced to a percentage of the total investment. The use of better materials and construction and the growing appreciation of the good in architectural design is adding to the attractiveness of many an American community.

Common Brick Is Best for English Type Home

People who are insistent upon having their English type home reproduce as nearly as possible in appearance and effect the originals beyond the ocean are careful to have common brick specified for the exterior walls. And the rougher, the more irregular, the harder burned and deeper in color they happen to be, the better. For it was of that character of brick that most of the oldest English manor houses were built. Many of them, hundreds of years old, are still standing and in use.

The English mason of the earlier days was not the scrupulously careful artisan that is his prototype of the present age. Nor were the architects so careful to have everything work out to a nicety.

In many of the older English houses are found walls that, instead of being plumb and exact, bulge and recede in a manner most inexplicable. Yet even so these walls have stood for centuries and today are serving as models for ambitious architects.

Prof. Mehrens, wife and little daughter drove over from Vaughn Saturday to visit relatives. They were accompanied by Miss Wilburn, who came to visit relatives at Hope for a short time, also by I. P. Davis. Mrs. Mehrens and baby remained to visit her parents, Mr. and Mrs. Dee Swift at Hope, and her brothers and their families in Artesia. The others returned Sunday afternoon to Vaughn going over with Wilton Tarbet who planned to spend a short time there with Mr. Davis on his way to attend the School of Mines at Socorro.

Rapid Strides In Transportation

At the time that the first Chevrolet was produced, T. S. Doby was flying the odd plane shown here. He appears above making a banked turn over a historically famous Mississippi River boat during one of his exhibition flights many years ago. Doby is now a factory representative for the Chevrolet Motor Co. in the West. Insets show the first Chevrolet and its 1929 successor, the Six-Cylinder Convertible Landau.

THE CHURCHES

ST. PAUL'S CHURCH (Episcopal) Rev. Hall Pierce

Services Sunday, September 8th. Evening prayer and sermon 5:00 p. m. Sunday school at 4:00 p. m. All parents are urged to bring their children for the opening day.

THE CHURCH OF CHRIST Corner 7th and Grand Ave.

Next Sunday is "Go to Sunday School day in Artesia and we hope that every member of our Bible school will make a special effort to be present. Don't make any arrangements to be out of town next Sunday, but plan to go to Bible school. Come and help to make as large a showing as possible.

There are lots of people in town who do not attend any Sunday school let us urge you to come and enlist in one of the classes of our Bible school. We have classes and competent teachers for all ages, from the Cradle Roll to the Bible class.

We also extend a most hearty welcome to the school teachers, who have just arrived in our city. If you are a member of the Church of Christ, come out Sunday and be one of us. The writer, in helping take the religious census last Sunday, found several new people who are members of the Church of Christ, but have not attended any of our services. We want you to come and worship with us. Bible study at 10:00 a. m. Preaching service at 11:00 a. m., followed by communion service. Preaching at 7:30 p. m. You are invited.

CHRISTIAN SCIENCE SOCIETY 613 W. Main Street

Sunday, September 8, 1929. Sunday services at 11:00 a. m. Wednesday services at 7:30 p. m. Subject of the Bible lesson for Sunday is "Man," in this lesson the following scriptural selection is found, "He hath shewed thee O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy and to walk humbly with thy God." (Micah 6:8).

Also the following citation from Science and Health with Key to the Scriptures, by Mary Baker Eddy, page 91, "Let us rid ourselves of the belief that man is separated from God, and obey only the divine principle, life and love. Here is the great point of departure for all true spiritual growth."

Visitors always welcome.

FIRST PRESBYTERIAN CHURCH Fourth and Grand Rev. John P. Sinclair, Pastor Phone 249.

Sunday, September 8th, 1929. 9:45 a. m., Sabbath School.

11:00 a. m. morning worship and sermon. Subject: A sermon on "Angels"—Guardian angels; The angels at Mons; Bible angels; Do such beings really exist?

6:45 p. m., Christian Endeavor. Two groups.

7:30 p. m. Popular peoples service, music by church orchestra. Anthem by junior choir. Sermon subject, "The Man Who Is Too Busy"—he has time for everything but God. Is he living a balanced life?

Wednesday September, 11th, 7:30 p. m. church reunion and social. Woodrow Wilson said, "The mission

of the church is not only to save souls, but to save society; and if society is to be saved it must be done in this world." Therefore support your church 100% next Sunday—its Rally Day.

CHURCH OF THE NAZARENE W. A. Henry, Pastor.

Sunday school at 9:45 a. m., Clarke Wilde, superintendent. Sunday is Rally Day, lets make it the banner Sunday of the year. Every boy and girl please be there.

Preaching service 11:00 a. m. Sermon by the pastor. There will be an old time love feast Sunday morning. Every one plan to attend.

N. Y. P. S. at 6:30 p. m. Evening services at 7:30 p. m. Special music will be furnished by Prof. Barnes. Sunday will be the beginning of the revival with Rev. H. N. Dickson and Prof. Barnes, the silver toned singer. Rev. Dickson is a former race horse man of Ashland, Kentucky and is known as "The Race Horse Evangelist." The evangelistic services will be held in the tent located on a vacant lot just off Main street.

Services each day at 10:00 a. m., and 7:30 p. m. Prof. Barnes will have charge of the great chorus choir, assisted by the Nazarene orchestra. Come early Sunday night and get a seat.

"How did your son make out at college? Did he get any high marks?"

"Oh yes, he got a scar on the forehead from a gin bottle."

The cashier of a small movie house is selling tickets as a pal looks on. A customer buys a quarter ticket, lays down a half dollar and walks away, leaving his change.

"Does that often happen?" asks the pal.

"Very often," replied the ticket seller.

"What do you do in a case like that?"

"Oh, I always rap on the window with a sponge!"

CATTELMEN MEET AT RATON SEPTEMBER 20

The New Mexico Cattle Grower's Association has issued a general invitation to cattlemen to attend the quarterly meeting of the executive board at Raton on September 20.

A grading demonstration to be given by J. K. Wallace, livestock grader of the United States Department of Agriculture, will be conducted at the Philmont ranch near Cimarron on September 21, so that the cattlemen attending the Cattle Growers' meeting may have the advantage of the grading demonstration. The Cattle Growers' Association announces that "all cattlemen attending the meeting at Raton, September 20, will be given transportation to the Philmont ranch to see the demonstration on the 21st."

Facts that prove the Value of The New CHEVROLET SIX

The new Chevrolet Six is shattering every previous record of Chevrolet success—not only because it provides the greatest value in Chevrolet history, but because it gives you more for the dollar than any other car in the world at or near its price! Facts tell the story! Modern features afford the proof! Read the adjoining column and you will know why over a MILLION careful buyers have chosen the Chevrolet Six in less than eight months. Then come in and get a ride in this sensational six-cylinder automobile—which actually sells in the price range of the four!

Remarkable Six-Cylinder Engine
Chevrolet's remarkable six-cylinder engine impresses you most vividly by its sensationally smooth performance. At every speed you enjoy that silent, velvety-like flow of power which is characteristic of the truly fine automobile!

Beautiful Fisher Bodies
With their low, graceful, sweeping lines and smart silhouette, their ample room for passengers and their sparkling color combinations and rich upholstery—the new Fisher bodies on the Chevrolet Six represent one of Fisher's greatest achievements.

Outstanding Economy
The new Chevrolet Six is an unusually economical car to operate. Not only does it deliver better, than twenty miles to the gallon of gasoline, but its oil economy is equal to, if not actually greater than, that of its famous four-cylinder predecessor.

Remarkable Dependability
In order to appreciate what outstanding value the Chevrolet Six represents, it is necessary to remember that it is built to the world's highest standards. In design, in materials and in workmanship—it is every inch a quality car!

Amazing Low Prices
An achievement no less remarkable than the design and quality of the Chevrolet Six is the fact that it is sold at prices so amazingly low! Furthermore, Chevrolet delivered prices include the lowest financing and handling charges available.

SHALL WE CHANGE THE CALENDAR?

George Eastman is one of the men in America in a class by himself. He is an example of a poor boy becoming a rich man. Other poor boys have become rich in this millionaires' country. But Mr. Eastman gave away most of his millions—about sixty of them—in a few years and then started to hunt lions in Africa, and to come back to America to help reform the calendar. While he was engaged in telling America that there was "a picture ahead" he was trying out a thirteen month calendar in his own business. That experiment convinced him the world ought to do likewise. So he really has been the big backer of the new calendar plan which has just been presented to Secretary of State Stimson, and which urges that the United States participate at a conference under the auspices of the League of Nations to consider world action. Mr. Eastman is not a talker, but he has supplied the "sinews of war" for a committee composed of men like Doctor Marvin, chief of the weather bureau, Doctor Burgess, director of the bureau of standards, David Lawrence and others well-known. There was an eighty per cent favorable answer to the questionnaire of the committee for a change in the calendar. But the committee does not recommend that the United States government should enter an international conference committed to any special plan. It hopes, however, that some definite decision may be reached before 1933, so that any change may be inaugurated on January first of that year. The chief alleged reason for the change is to secure more accurate accounting and divisions of business life—a four week month.

NEW TELEPHONE PLAN FOR WALL STREET OFFICES

System Recently Installed Will Speed Up Quotations for Stock Exchange Firms

A special telephone installation has been completed for the New York Stock Exchange which revolutionizes its quotations to its members.

By the old method the broker's call went over his private line, to his attendant in a booth at the side of the trading floor. Then a memorandum of the request for information was routed to the proper trading post by a pneumatic tube and the answer was secured in the same way. The new system consists of a two-position distributing switchboard from which lines run to the booths. The distributing switchboard is connected to a quotation switchboard, whence lines run to the trading posts on the floor of the Stock Exchange. There are three lines to some of these posts and two lines to others.

With this new equipment, whenever a call for information is received in the booth at the side of the trading floor, the attendant makes a call through the distributing board to the quotation position where the operator keeps available or secures the required information. This new system will save considerable time and will make the securing of necessary information much easier, as calls will not have to be relayed by booth attendants.

TELEPHONE FOILS BANDIT

Because there was a telephone at the grocery store of Perry & Tubman in Laurel, Mont., an attempt recently to hold up the store failed. John Tubman, when he was called upon to put up his hands, instead of acceding to the request, made a move to call help by telephone, with the result that the bandit hastily withdrew.

KE ARTHUR ITEMS

(By Ned Hedges, Reporter)

Moots of Helen spent the week with home folks.

Flowers visited at home Saturday until after Labor Day.

Spence came in from Rutland Saturday for the beginning of the school year.

Jones and daughter Silva visiting her father Mr. McChere Sunday.

Lillian Paris arrived last week from Greeley, Colorado and began school duties here Monday.

Mrs. J. W. McCall arrived from Kansas the last of the week for rooms in the Evan's home in Vincent.

Ruby Smith teacher of the second and sixth grades arrived the week from Las Vegas, where she is located at the Michigan Hotel.

Mrs. E. C. Latta and sons, accompanied by Mrs. Latta's mother, motored to Santa Fe and spent a few days visiting interesting features in and about Santa Fe and Albuquerque, returned Sunday evening.

B. C. Moots had for guests last week her sister and nephew Ed Dooley and son, Edward, from Wilmington, Illinois. Lyle Moots, her aunt and cousin visited the week Saturday. Mrs. Dooley and her family returned for Illinois Sunday.

Washed into the police station last night, explaining that his wife was missing since eight o'clock Saturday, and asking that search be made for her.

"Description," said the sergeant, "height?"

"Don't know!"

"What?"

"Husband shook his head vaguely."

"Color of eyes?"

"Average, I expect."

"Do you know how she was dressed?"

"She wore her coat and carried the dog with her."

"What kind of a dog?"

"A bull terrier, weight 14½ pounds, four dark blotches on his head, faded from gray to white, blackish spray over the left eye, stub tail, three white legs, front leg brindled, all but the front link brindled, with a small nick in the left collar, with—"

"Well do," gasped the sergeant, "and the dog!"

JUST KIDS—Tomorrow Is Far Away! By Ad Carter

OILERS LOSE LABOR DAY TILT TO TEXANS IN TEN INNING GAME

It might as well have been Willy Moore of the New York Yankees himself, instead of his brother, who faced the locals in the Labor Day game with Littlefield at Brainard Park Monday. He let the hard hitting Pecos valley boys down with one run, four hits and struck out fourteen in the ten innings that it took to decide the battle. Gifford pitched some great baseball for the locals and only lost because his mates couldn't score at least two runs in the regulation nine innings. The final score was 3 to 1.

Jackson was the only Artesia batter to solve Moore with any degree of satisfaction; getting a double and single out of four attempts. Ratliff and Walker were the leaders for Littlefield, with three hits each.

Littlefield scored the first run of the day in the fifth inning. McWilliams doubled and Ratliff counted him with a triple.

Artesia never got a man to first until Fellows singled to open the Seventh. Mickey then struck out and Manda was the victim of an infield killing. Brainard walked and Etz was safe on an error by the visiting second baseman, filling the bases, however, Kyle was not equal to the occasion and Artesia's big chance was lost as he struck out.

The locals counted their only run in the eighth. Jackson lined one over the center fielder for two bases. Maxwell sacrificed him to third and Gifford singled to right field for the count.

Littlefield settled things in the tenth by scoring two times. Ratliff singled, Scallings sacrificed and Ballard broke up a perfectly good ball game with a two bagger. The visitors added the other run on the strength of a stolen base and Kyle's error on the next play.

The score:

LITTLEFIELD

Summary: Two base hits—Jackson, McWilliams, Walker, Ballard. Three base hits—Ratliff. Sacrifices—Ballard, Scallings, Fellows, Maxwell. Stolen base—E. Muller. Double play—Manda, Brainard to Kyle. Struck out by Gifford 8, by Moore 14. Base on balls—off Gifford 1, off Moore 1. Wild pitch—Gifford. Hits off Gifford, 10 in 9 2-3 innings. Umpires—Leftwich and DeLong.

RURAL SCHOOL NEWS

All rural schools except two opened for the fall term Monday. The schools at Harroun farm and at Atoka have been in session during the summer, but have closed for a short vacation in order to permit the children to help harvest the cotton crop.

Mrs. Etta Douglas is succeeding Miss Merrill Bradley as principal of the Atoka school. Miss Bradley has accepted a position in the grade schools of Artesia. Miss Irma Linn Grantham, who has taught a summer term at Otis, will continue her school as the present interest and attendance is sufficient to maintain the school.

The faculty for the various rural schools is as follows: Otis—Fluad Myers, principal; Miss Gladys Choate, Miss Wilma Price, Miss Irma Linn Grantham, Miss Johnny Nichols. Upper Black river—Carrie Wright, all grades. Queen—Miss Edna Page, all grades. El Paso Gap—Miss Margaret Perry, all grades. Rocky Arroyo—Miss Francis Joy Foster, all grades. Lakewood—Raymond Blair, principal; Mrs. Raymond Blair, grades. Loving—Mrs. Bertha Synder, principal primary; Lowell Woolbright, grades. Spanish—Miss Elizabeth Johnson, intermediate; Miss Margaret Nymeyer, Spanish-primary; J. R. London, Spanish-primary; Miss Juanita Beard, first grade. Malaga—F. R. Zumalt, principal, junior high; Miss Ruth Hoese, primary; Mrs. Aline Devaney, primary. Harroun farm—Miss Dorothy Forehand, all grades. Dayton—Miss Frankie Wailes, principal, primary. Oil Field—Miss Ruth Jenkins, principal; Miss Maybell Vowell, primary. Atoka—Upper grades to be supplied; Mrs. Etta Douglas, principal, primary. Lower Cottonwood—H. D. Rodgers, principal; Miss Grace Stanley and Bertha Richards, primary and intermediate. Upper Cottonwood—J. J. Gist, principal; Miss Alice

Several small trains of six cars each travel through the plant of the Plymouth Motor Corporation at Detroit each day at noon carrying lunches to the thousands of men employed throughout the huge factory.

"Although only one year old, the Plymouth Motor Corporation ranks among the first ten automobile companies in the country in volume of cars built and sold in recent months," according to R. M. Parks, director of Plymouth advertising.

Young Lady (just operated upon for appendicitis): "Oh, doctor will the scar show?"
Doctor: "Not if you're careful."

Norris and Mae Wilson, junior high and primary.

Stone Eye Glass Service

Is Your Boy "Real Bad"

Give him a chance. His eyes may be defective, preventing him from seeing the beauties of nature and obtaining a proper understanding of things. Have his eyes examined.

The career of many a man has been changed through getting proper glasses. Theodore Roosevelt, as a boy, was thus ushered into "a new world"—and today the entire civilized world still pays homage to his character and achievements.

Perhaps a mere pair of correct glasses may change the worry over your boy to pride in his manliness—his real self. Let us share in this transformation.

GASOLINE TAX \$221,894.60 NEW HIGH MARK

The gasoline tax reached a new high mark in August, totaling close to a quarter of a million for the month, Miss Mary Bartolino, head of the gasoline tax bureau, reported recently. The amount collected in August was \$221,894.60. The biggest previous month's collections were for July, this year, and amounted to \$214,498.24. Next month's report probably will set a new high record. The biggest month in past years has always been September.

Miss Bartolino's report indicates an increase of 987,666 gallons of gasoline used in New Mexico for August over the same month in 1928, or a gain of 28.62 per cent.

Student's note book covers embossed in school colors at The Advocate.

JOYCE-PRUIT COMPANY

Is Santa Claus in the Tire Business?

We lose a sale occasionally because of a long trade, and we always ask the buyer if his old tires were worth what he got for them.

Invariably he says, no. We ask you, what's the answer?

Is Santa Claus in the tire business? Is the dealer merely practicing? Or did his big, tender, overflowing heart just get the best of him?

No foolin' now—what's the answer? Is Christmas a continuous event, or is someone keeping the doughnut and selling the hole?

We allow you for your old tires only what they're worth. We charge you for our fine new Goodyears only what they're worth. You get a square deal and so do we. And as long as we're in our right minds nobody'll get anything different.

Lesson for September 8 NEHEMIAH REBUILDING THE WALL OF JERUSALEM

OLDEN TEXT—The people had a
to work.
NEW TEXT—Nehemiah 2:1-7:4.
PRIMARY TOPIC—Working To-
gether.
INTERMEDIATE AND SENIOR TOPIC—
Working Together.
ADULT TOPIC—Working Together.

order to prepare to teach this
the teacher should master the
of the book of Nehemiah.
Nehemiah was a cupbearer to the
king. While performing his
duty he learned of the distress
of the Jews in Jerusalem. The
of the city were broken down,
the gates burnt, and the remnant of
the Jews were in great affliction.
Nehemiah, who had been in the
of the city by his brethren,
moved to Jerusalem. He sat
and wept and mourned several
days, fasting and praying before God.
After his prayer he was granted
leave of absence from the Per-
sian court, and credentials from the
king. He journeyed to Jerusalem and
made a survey of the city by night
without disclosing his purpose to any
person. Having thus obtained first-hand
information, he called the representa-
tives of the Jews together and said,
"Thus saith the Lord God of Israel,
who hath chosen Jerusalem to be
his habitation: 'Ye shall build the
wall of Jerusalem, and ye shall
be a city of righteousness and
truth, and shall be called the
city of the true God.'"

Preparation for the Building
of the Wall.
The division of labor in this proj-
ect was wisely planned. Nehemiah's adminis-
tration was a model of efficiency. A wise distribution of
tasks makes difficult tasks easy. Ob-
serve some outstanding features of
his great work:

1. Stress laid upon indifference
to administrative tasks. It is proper
that indifference should be pointed
out as a warning to the unfaithful
and encouragement to the faithful.
2. Help rendered by the women
of the city.

3. Shaphan had no sons to
inherit his office.
4. Stress laid upon earnestness of
work (v. 20).
5. Regulation of fidelity will spur one
to industry.

6. Every one built over against his
neighbor (v. 10, 23, 28).
7. Incentive for exertion is quite
plain as that which concerns one's
family.

8. Certain guilds of men undertook
the work (v. 8, 31, 32).
9. Hindrances Encountered (4:1-
6:19).

10. Scolding of Sanballat and Tobiah
(v. 2:19, 20).
11. Oppressors of God's servants
are rebuked by hurling ridicule.
12. Conspiracy for a sudden attack
on the wall.

13. When the enemy saw that the work
was actually succeeding they changed
their attitude to an attempt to throw
the workers into a panic.
14. Conspiracy with the Jews
(v. 23).

15. Efforts sought to hinder by inducing
the workers who were outside to dis-
cuss their brethren by the claim
that the task was hopeless and that
they were liable to sudden and secret
attack.

16. Greed and oppression of the rich
(v. 5).
17. Jews of that day, like the
workers of our day, took advantage
of the poor and oppressed them, so
they mortgaged their land and
sold their daughters into slavery.
18. Scheme to take Nehemiah's life
(v. 4).

19. Sanballat and Tobiah failed
in every other way they sought by
to get Nehemiah away, that
might kill him.
20. The Wall Completed (6:15-
18).

21. Energetically did they pursue
tasks that in fifty-two days the
wall was completed. We may learn
from this:
22. That though God's children are
beset by enemies, they should not
be discouraged.

23. That when beset by enemies, we
should pray (4:9).
24. Our faith was accompanied by
obedience.
25. They set a watch (4:9).
26. Men were permitted to be
with their families (4:13), and would
fight better.

27. Half worked and half watched
was not the way.
28. They worked with sword in
hand (4:17).
29. They slept in their clothes in
order to be ready (4:23).
30. Fear and faith are not slothful or
inert.

31. A Picture by Plato
depicted the soul under the
control of a many-headed monster, a
man, combined in one form
represented the higher na-
ture; the lion the passion
element; and the many-headed
monster the lusts and appetites
of the soul. As true today as when
presented. The lion and many-
headed monster exists in every per-
son and can only be changed by the
Christ, by which the lion
is to be as a lamb.

All animals need minerals, but they are especially important for young growing animals and females carrying young. Common salt, lime, phosphorus, and iodine are the minerals most commonly lacking in livestock rations.

Onions intended for storage should be well matured, sound, and so dry the outer scales will crackle or "rattle." Immature or soft onions or those with thick necks, commonly referred to as "bottle necks," should be disposed of and not stored as they will not keep well.

Best results in fattening poultry are obtained by feeding soft mash. The grain in weight is greater and the quality of the flesh is superior when wet mash is used than when whole grains are fed. Corn meal, oat meal, low grade wheat flour, and finely ground buckwheat are good for fattening feeds. Milk is excellent for fattening chickens.

Prevention of frost damage plays an important part in the production of many crops. Farmers' Bulletin 1588-F, recently issued by the U. S. Department of Agriculture under the title "Frost and the Prevention of Frost Damage," discusses various methods and devices for protection against frost and gives the temperatures injurious to plants, blossoms, and fruits. This bulletin can be secured from the Department of Agriculture, Washington, D. C.

Choose seed potatoes in the field not in the bin. Tubers from diseased plants always produce infected plants the following season. Select the tubers from a field as free from diseased plants as possible. Apparently healthy plants in the same field with diseased plants may also be infected if plant lice, or aphids, are present. These insects carry such diseases as the mosaic, leaf roll, spindle tuber, and curly dwarf from one plant to another.

The crow is best known by its depredations on corn and other crops on poultry, and on wild birds, but it is unfair to condemn it entirely, since it makes warfare on insect pests, according to the biological survey of the U. S. Department of Agriculture. Insects supply about one-fifth of the crow's menu, which includes some of the worst pests with which the farmer has to contend, such as grasshoppers, caterpillars, white grubs and May beetles. Though crows should be destroyed where they are doing damage, indiscriminate killing of them is unwarranted, in the opinion of the biological survey.

Sweet potatoes to keep well in storage should be dug before the first killing frost, or if the vines are killed by frost and it is impossible to dig the potatoes at once, cut the vines away from them and then dig them as soon as possible. A light frosting of the leaves does not usually injure the potatoes, but a heavy freeze which will kill the vines is liable to ruin the keeping quality of the potatoes unless the vines are promptly removed.

At least a portion of the truck garden should be plowed in the fall, so early crops may be planted as early as possible in the spring. Plowed ground dries quicker than unplowed ground, and by plowing in the fall it is possible to plant such crops as peas, beets, and early potatoes much earlier than otherwise. Fall is always the best time for plowing hard or stiff clay soils, as the action of the frost in winter will break the soil into fine particles and make it suitable for planting. Thorough, deep plowing in the fall is also an aid in holding certain insects and diseases in check.

COLLEGE RADIO STATION INCREASES BROADCASTING

KOB assures New Mexico higher quality programs, more hours of broadcasting and better reception thru a working agreement with the Eagle Broadcasting Company of El Paso, Texas, and a permit for increasing the power of the station from 10,000 to 20,000 watts.

The Eagle Broadcasting Company handled the commercial advertising of four other stations. The management of the station remains in the hands of the College, and the College programs will be broadcast as before. The Eagle Broadcasting Company will utilize the station for broadcasting their programs at hours when it is not in use for the programs of the State Agricultural College and the United States Department of Agriculture.

The increase from 10,000 to 20,000 watts was recently authorized by the United States Radio Commission under the reconstruction permit. This increase in power will place KOB among the thirteen largest radio stations in the United States.

LOCALS

F. C. Finley has moved his family to Roswell.

Ernest McGonigle and family were in from the field Saturday.

Mr. and Mrs. Walter Douglass spent Sunday and Labor Day at Cloudercroft.

Charles Morgan and family returned Friday from a vacation trip to Denver, Colorado.

Mrs. Boyd Williams was down from Elk the first of the week to place her daughter, Agnes, in school here.

Mrs. Gayle Talbot has returned from a visit at the home of her brother, Vedder Brown, at Hagerman.

Mrs. George Johnson, of Alfadale, was called to Abilene, Texas, last week by the fatal illness of her father.

Mr. and Mrs. H. C. Hutsonpillar of Des Moines, Iowa spent a few days here the past week looking after property interests.

Mr. and Mrs. Leonard Jernigan, of Carlsbad spent the week end in Artesia with his parents, Mr. and Mrs. E. T. Jernigan and family.

Mr. and Mrs. George Frisch drove to Carrizozo Sunday with their daughter, Miss Vesta, who has the chair of home economics in the high school there this year.

J. E. Anderson and family of Clay Pool, Arizona, spent a few days here the past week visiting Mr. Anderson's sister, Mrs. Perly George and Mr. George and family.

Miss Emma Caraway, who was called here by the fatal illness of her grandmother, Mrs. Anna Spencer returned the last of the week for Lovington, where she is employed.

Fletcher Collins, left Monday morning to enter the New Mexico Agricultural College. It was erroneously stated in the last issue of the Advocate that he would enter the University of New Mexico at Albuquerque.

Mrs. Mae Wilkins of the Cottonwood community sustained a crushed hand and broken finger, Thursday morning while making some repairs on an auto. Her injuries, although painful did not prove serious and she is recovering nicely.

Mrs. A. C. Kimbrough and children drove to Carlsbad Tuesday to meet Mr. Kimbrough, who was returning from the bedside of his mother at Guthrie, Kentucky. He left his mother very ill, with no prospects of recovery nor immediate change in her condition.

CONOCO

A FRIEND YOU'RE GLAD TO MEET THE CONOCO RED TRIANGLE

TOURING! Many are its petty annoyances—but many its pleasures! Much depends upon the way your car performs. If your motor hums along softly, smoothly, sweetly—all is well! And that depends mostly on your oil. That's the reason so many motorists greet the Conoco Red Triangle as a real friend.

They know it is a sure guide to oil that they can trust—Conoco Motor Oil! This motor oil has saved motor trouble in so many emergencies where the average oil simply would not stand the gaff. Motorists who know, always feel safer with Conoco Motor Oil. Seek the sign of the Conoco Red Triangle—and be sure.

CONOCO

extra life for your car.

MOTOR OIL

Conoco Gasoline and Conoco Motor Oil are made by the Greater Continental Oil Company (the Marland Oil Company combined with the Continental Oil Company) and sold at stations formerly handling Marland products and Continental products. Look for the new Conoco sign.

AT THE SIGN OF THE RED TRIANGLE

H. N. Dickerson, "Kentucky Blue Grass Evangelist" who will preach at the Nazarene Church Revival in the big tent opposite Smoke House, beginning Sunday, September 8th.

A Farm Memory

I'd like to be down on the farm again,
Where I used to go as a boy—
And be in the spell of its charm again,
Care-free, with a heart full of joy!
How sweet are its mem'ries that call to me,
And enter my heart like a dream!

And sweetest, I think, of them all, to me,
Are those of a little old stream.
A song's in my heart, as I tell of it—
I'm out of the World of Today,
And living again in the spell of it,
As there 'neath the willows I play.
I'm there with my cousins, who played
with me—
With "devilment" bright in our eye,
And now, in the water they waded with me,
With overalls rolled to the thigh!
And soon we are wet to the chin of us,
Our shirt, and our tattered straw hat—
We're wet, every inch of the skin of us.
But what if we are? Answer that!
And I hear the willow trees swishing
there,
As, playful, they bow to the breeze,
And I in my fancy am fishing there
My elbows propped up on my knees—
My chin in my hands, while I dream again
That I am a pirate, and bold!
And bravely we sail down the stream
again,
In search of the treasure of gold.
The end of the cruise, we are nearing now,
Not very much farther we'll roam.
But, hark! What's that I am hearing now?
The dinner bell, calling us home!

Economical Entertaining

A LIMITED budget shouldn't kill hospitality. Many hostesses find it merely a stimulus to the imagination. For it is not the price of food which counts in entertaining, but the quality and the way in which it is prepared.

Get a can of the best quality of salmon, for instance, and have salmon soup for your guests or salmon and peas in cream sauce. The recipes are simple. For the soup, drain the oil from one-third can of salmon, and remove skin and bones. Rub fish through a sieve, and add one tablespoon butter, two tablespoons flour, three-fourths teaspoon salt, a few grains of pepper and three cups of milk. Served in bouillon cups, this is enough for four.

For the second salmon dish, bone the contents of a tall can of salmon,

and drain the liquid from a can of peas, saving it for use in soup at another meal. Make a cream sauce, using a tall can of evaporated milk diluted only to half quantity, and seasoning with parsley, onion, celery salt and salt and pepper. When dinner is almost ready, drop the salmon and peas into this sauce, and serve as soon as they are hot.

A Corn Combination

Corn assumes a dignity of its own served with green peppers as corn scallop. To make it, remove the seeds from the pepper and cut in strips about one inch long. Sauté the pepper and a chopped onion in two tablespoons butter. Add gradually two tablespoons flour and one cup of milk, then a can of corn and salt and pepper to taste. Cover with buttered bread crumbs and bake in a moderate oven.

HOW

FLUORIN HELPS TO FORM TEETH IN HUMAN BODY.

Few people have been unfortunate enough to drop their teeth down a volcano, but the converse process seems not uncommon, according to Dr. E. E. Free's Week's Science (New York). He says:

"Volcanoes appear to be notable contributors to human teeth. What they provide is the chemical element fluorin, a little of which always gets into teeth, but in some way which has been more or less of a mystery. In a recent report by the Carnegie Institution of Washington, Dr. E. G. Zies of that institution's geophysical laboratory describes the discovery of large amounts of fluorin in the jets of hot gas which shoot out from the ground in the Alaskan volcanic basin called the Valley of Ten Thousand Smokes. This fluorin probably amounts, he believes to 200,000 tons a year or more. Volcanoes elsewhere probably make even greater contributions, providing more than enough of the element for all the teeth that nature would need to construct in many years. Most of this fluorin in the hot, acid breath of the world's volcanoes is promptly captured chemically, Doctor Zies believes, by the elements of the soil. Much of that which escapes is washed down into the sea by rains, and helps to form the teeth and bones and shells of sea creatures. But a little of the element probably continues to circulate in the air, to be washed down in rain and to get into all kinds of human foods; just as a little of the sea fluorin also gets into foods like oysters and fish. Thus, by aid of aerial and oceanic expressmen, the contribution of fluorin from the world's volcanoes is circulated over the earth and delivered to the bodies of children who are manufacturing teeth."—Literary Digest.

How Term "Generation" Is Given Definition

The whole body of individuals born about the same period are called a generation; and by extension the term is applied the time covered by their lives. It does not express a definite period. Generally a generation is regarded as being from 30 to 33 1/3 years in length, there being about three generations in a century. The basis of the generation as a period is the average interval of time between the birth of parents and that of children, although some chronologists base the generation upon the average lifetime of all persons of synchronous age who survive infancy. David Brewster makes the following interesting observation on this subject in his life of Sir Isaac Newton: "His second objection to the new system relates to the length of generations, which he says is made only 18 or 20 years. Sir Isaac, on the contrary, reckons a generation at 33 years, or three generations at 100."—Exchange.

How Caribou Differ

Caribou is a French-Canadian name for the American form of the reindeer. Four different species exist. The animal is found throughout the forested regions of North America, principally Maine and Michigan and in Canada. In winter they gather in herds of several hundred. In summer they move about a great deal to escape the flies. The barren-ground caribou is a smaller and paler form, with larger antlers, inhabiting the open country of North America to an extreme distance north of the tree growth. The Indians and Eskimos obtain from the caribou a winter supply of meat and skins. The white caribou inhabits the coastal valleys of Greenland.

How Use of Soap Began

The manufacture of soap upon a very large scale dates only from about 1823, in which year Chevreul published his famous researches on animal fats. The use of soap is of great antiquity. A well equipped soap factory was found by the excavators of Pompeii. Historical records of Italy and Spain show that soap was in use in those countries in the Eighth century. The soap berry was used before soap was manufactured. Soapberry is the common name of several species of Sapindus and of the fruit which is so rich in saponin that they were employed for the same purpose as alkaline soap before the days of that article. The Chinese prefer them even yet for cleansing the hair and delicate skins.

How Rust Can Be Removed

Those flakes that keep chipping off from your iron frying pan are just rust that has accumulated there. Tar-nish on steel acts the same way and both require the same treatment. A coarse scourer, like bath brick, will be the best agent to use. Apply it with a cork. If the rust or discoloration is obstinate pour a little kerosene on it and let it stand a few minutes, then use the scourer. Of course, the kerosene must be thoroughly washed off with hot water and soap and the utensil well dried. If the rust has not made a bad in-road, steel wool or a tinsel scourer will remove it.

Clem Was Doing Field Work

By JANE OSBORN

(Copyright.)

CLEMENT WATKINS, a tall, sandy-haired young man of twenty-two, swung off the fast line bus where the highway intersected the main street of the village of Dawson, glanced appraisingly around the group of stores that clustered near the four corners, and walked in the direction which evenly-planted rows of tall elm trees, shading a number of white-painted, old-fashioned houses, indicated as the residential section of the home-like village.

He walked briskly for a quarter of a mile along Main street until he reached the last house, walked deliberately up to the front door and rang the bell, waited a minute, rang again, and then walked out again to the street. Then he walked back to the next house, turned in there and rang the bell.

No need ringing that more than once. If anyone was home they'd hear it, thought Clem. Someone was in and the someone who answered the door was a very pretty girl.

"I know you are very busy," said Clem, because he noticed that she had a duster in her hand. "But I was in Dawson today and I just thought I'd drop in and have a little talk. Let me see, the name is—"

"My aunt's name is Mrs. Judson," said the girl, blushing a little but without a shade of cordiality. "My aunt is busy."

"Well, I hardly wonder at this time of the morning," said Clem with a smile that looked more assured than it was. "I'm quite content to talk with you instead. Would you mind if I stepped in, you see, I'm a student at Radford college—"

"For pity sakes," exclaimed the girl, depositing her duster on a hall table and coming forward. "And you know my brother Harold." She held out her hand and blushed and giggled a little. "You know me, too, of course, I'm Mary—Mary Kirk. I met you at the Junior prom."

"I was afraid you would have forgotten me," said Clement, trying in vain to recall the girl. "You know I'm Clem Watkins."

"And to think that you came all the way to Dawson to see me," said Mary Kirk. "To see us—I mean. My aunt will be so pleased. You see, I'm living here now for good. When Harold gets settled in the city he's going to send for me—and I'm going to get a job. But it's very pleasant here in Dawson—only a little dull. I do hope you didn't expect to find Harold—"

"I hadn't an idea of finding him here—"

"But just imagine your remembering me," said Mary. Naive, perhaps, but certainly very lovely. "Why, we had only two stinky dances at the prom—"

It was just then that Mrs. Judson entered the room, looked surprised, then pleased, and gave Clem a hearty handshake when Mary coyly presented him.

Then between Mary and her aunt, Clement heard much of his classmate's occupation in the city. He had signed up with one of the large electrical concerns. Then Mrs. Judson turned to Clem and asked him what plans he had made.

Clement told them that as he had studied during his three undergraduate summers he had managed to get his master's degree at the same time his class graduated and that in the autumn he was starting in as an instructor in college.

Mrs. Judson and Mary beamed with approval. "But aren't you having to do anything all summer?" asked Mrs. Judson.

"Why, yes," said Clement—and then stopped awkwardly. "I had made plans for a little—a little field work to tide over." But then he changed the subject. He was glad at least that he hadn't brought the sample vacuum cleaner with him as he sometimes did. He was working now on the electrical refrigerator with the demonstration chart carefully tucked away in his pocket.

Clement, of course, stayed the morning and then had midday dinner with his friends. And after that Mr. Judson, a genial, retired farmer, insisted in taking them all off in his car to a county fair. He said it made a lot nicer having a beau for Mary, than having to go around with a girl on each arm himself.

"And the funny thing," said Mary as they were sitting over ice cream later, "was that I thought you were an agent. Honestly, Aunt Mame, I thought he had come to sell something. And you know we all just thought agents—you can't imagine how much. And you know—" turning to Clem, "Aunt Mame said that if I ever let another agent in she'd at once send me packing."

"Can't stand them," said Mrs. Judson, "and yet Gilbert says some of the boys do that sort of work in the summer—"

"They must be a fine lot," from Mr. Judson, "if with all their college learning they can't get anything to do but go around ringing door bells for a living."

"You've said it," said Clement with a hearty laugh—a laugh that was a bit embarrassed because, daintily holding under the table at his sister's Mary's hand, he found it waiting for him with little fingers ready to clasp contentedly in his own strong grasp.

Marcy Lee Dresses

Joyce-Pruit Co.

DOVE SEASON OPENS

A number of hunters journeyed to the great open spaces at the opening of the dove season, September 1st. The efforts of many were rewarded, but the birds are reported rather scarce. Simultaneous with the opening of the dove season the prairie chicken season also opened to last for five days. Several hunters went to the region north of Tatum and spent a few days hunting during the season. One hunting party secured five birds, but others were not successful.

INJURED AT ICE PLANT

Dorris Ransberger, an employee of the Southwestern Public Service Co., sustained a lacerated foot at the ice plant, Monday about noon, when he slipped and his left foot struck the ice saw. Fortunately the sole of his boot struck the saw and its weight prevented the machine from cutting deeply into his foot. He is recuperating nicely at the City Hospital.

SHIPS OUT ALFALFA SEED

The first car of alfalfa seed to leave Artesia this year was shipped out yesterday by E. B. Bullock. Mr. Bullock plans to ship out another car Friday.

ATTENDANCE RECORD AT CAVERN BROKEN

The attendance record at the Carlsbad Caverns was again broken Sunday when a total of 1,680 people made the trip. The previous high record was on August 18th, when 1,253 went through.

APPLES MOVING

About twenty-eight cars of apples have been shipped from Artesia to date. The apple movement has been slower than was anticipated, but they are moving at a fairly rapid rate now.

FAMOUS COLUMN

Ballard Spencer, demonstrated the Artesia house wives how to sew while Mrs. Spencer was in charge. She says that it will mean a sacrifice on his part, he can divide his time between canning lessons if necessary and Artesia Golf course, which is a thing unusual for the men. Most of them have never learned how to even drink out of a jar, much less use jars to can with.

Credit an exchange with one: One of our young lizards his girl is such a hot mamma gets powder burned when he presses her cheek.

As artists some of our fairer would never take the prize, just from their make up.

MAN IS SHOT RUNNING FROM THE OFFICE

Jack Hauck was lodged in county jail at Carlsbad Friday is nursing a bullet wound in his chest when he was arrested on a charge, Thursday, afternoon Sheriff Joe Johns and deputy Hauck's arrest was affected as he had attempted to escape the officers by swimming the Press River. Hauck was first arrested at a stand in south Carlsbad and made a break for liberty. The defendant was under a pending sentence on a liquor charge previous to his arrest, Thursday was said.

A regular meeting of the Mas lodge to be held Thursday night which time the second degree will be conferred. Refreshments will be served. Visitors are welcome.

Roy Muncy of Albuquerque arrived the first of the week for visit with his parents, Mr. and Harve Muncy and other relatives.

Protect Your Stock

—by using—

MARTIN'S SCREW WORM KILLER

Kills worms quickly, heals wounds promptly, repels flies and does not contain any poisonous properties. Prices are: 3-oz., 25c; 8-oz., 50c; Pt., 75c—all in squirt top cans. Qt., \$1.25; 1/2 Gal., \$2.25; Gal., \$4.00

MARTIN'S FLY SMEAR

Heals cuts and sores and keeps off blow flies. One application is usually sufficient for the average small cut. It is recommended for use in cases of barb wire cuts, dehorning branding, castrating, shearing cuts, screw worm wounds or any fresh or old sores on animals. Prices: 8-oz., 30c; Pt., 50c; Qt., 85c; 1/2 Gal., \$1.50; Gal., \$2.50. Either of above, when used properly will be found very economical.

MARTIN'S FLY SPRAY (For Stock)

Will keep milk cows and work stock free from flies for a considerable length of time after thoroughly spraying.

It will pay for itself in increased milk from the cows and wool from the mules and horses.

Prices: Qt., 60c; 1/2 Gal., \$1.00; Gal., \$1.75
