

CHRYSLER ENGINEERS MEET THE NEEDS OF THE WOMAN DRIVER

Just as artists, designers and decorators have, for a number of years, been guided by the taste and sense of style of the woman motorist, so is the influence on the mechanical details of the car being felt to-day in the engineering laboratories of the manufacturers.

In the evolution of the automobile, the woman was given first consideration in the choice of body lines, color treatments and inner refinements. An important step was taken in the studios of the builder before her attention to new styles had been determined. While this is equally true today, she, as a driver and owner, is exerting an even greater influence on mechanical developments.

As to the ever-increasing number of women who drive their own cars, this influence is being felt to an extent never before thought possible and the modern car is being built as much for the woman as for the man driver. Women have played a big part in establishing the standards of the Chrysler engineers," said J. W. Frazer, general sales manager of the Chrysler Sales Corporation at Detroit, in a recent interview. "The men who drive are looked upon as important members of the advisory staff in our laboratories. Their demands for comfort and ease of driving largely influenced the mechanical design of the new '77' and '78' models, in which performance and safety are brought to new high points.

The multi-range gear shift, an outstanding feature of these models, is possible as a new conception of handling and simplified operation. It permits backward and forward shifts without the necessity of leaving the car. This eliminates the wear and tear of the clutch and the fatigue of the driver. In addition, the ease of grinding and clashing of gears, in making shifts from one to another, is exceptionally light and has aroused keen enthusiasm in women drivers all over the country.

The long, sweeping body lines, the active color combinations and the crisp interiors lack nothing in range without the necessity of leaving the car. This eliminates the wear and tear of the clutch and the fatigue of the driver. In addition, the ease of grinding and clashing of gears, in making shifts from one to another, is exceptionally light and has aroused keen enthusiasm in women drivers all over the country.

LOCALS

Mrs. F. G. Hartell has been on the sick list.

Senator and Mrs. Z. B. Moon visited in Hope Monday.

Mrs. R. H. Stovall and Mrs. Woods of Carlsbad were shopping in Artesia Thursday.

Miss Vesta Frisch is at home from Carrizozo to spend the Thanksgiving vacation.

Wes Oliver, of Delta, Colorado, has been here the past week visiting Miss Minnie Dungan.

Mr. and Mrs. Ossie Coalson were here from Carlsbad Sunday visiting Mr. and Mrs. L. L. Clark.

Charles McNeil returned Sunday from Hurley, where he had been for the past two or three weeks.

Mr. and Mrs. J. T. Mitchell, of Carlsbad, spent Monday here with their friends, Mr. and Mrs. James Sangster.

Z. C. Collier, who recently purchased the McDonald ranch, northwest of Hope, is building a new dwelling on the ranch.

Mr. and Mrs. Neil Schuster returned last Thursday from a trip to Long Beach, California, and plan to remain here permanently.

Mr. and Mrs. I. C. Keller and son, Osborne spent Sunday with Mr. Keller's parents in Hope. Mr. Keller's mother remains about the same.

Mr. and Mrs. L. L. Clark were guests at a sumptuous turkey dinner given Friday evening by Mrs. Sam Batton in Carlsbad in honor of Mr. Batton's birthday anniversary.

Mrs. Alta Linell arrived home Saturday from Long Beach, California, where she spent the summer. Mr. and Mrs. Jack Clady and Mrs. Frank Linell drove to Roswell to meet her.

Mr. and Mrs. L. L. Clark, accompanied by Mr. and Mrs. Ossie Coalson, of Carlsbad, left last night to spend Thanksgiving at the home of Mrs. Clark's parents at Plainview, Texas.

Mr. and Mrs. Leonard Jernigan returned Sunday from a trip to the northern part of the state and Colorado in quest of a location. Leonard will assist his father in the jewelry store during the holiday trade.

Mr. and Mrs. Ray Hills, came Sunday from San Diego, California, to visit Mr. and Mrs. John Richards, while Mr. Hills is recovering from an accident of some weeks ago. Mrs. Hills is a sister of Mrs. Richards.

Mrs. Fay Andrews, who had been visiting the families of her three brothers, one in the field, and Hugh and Cecil, in town, left Sunday for her home in Clovis. Mrs. Hugh Roberts went with her for a week's visit.

Mr. and Mrs. Charley Mitchell, who went to Woodfield, Ohio, in the early fall to visit relatives, are now located in Sweetwater, Texas, where Mr. Mitchell has a job with the Gulf Refining Co. He was employed at the refinery here for several years.

Bill McIntyre, of Pampa, Texas, field superintendent of the Dan-cigen Oil and Refining Co., spent a few days here last week attending to business matters and visiting his brother. Mr. McIntyre was stationed here for a year or more during the early development of the Artesia field.

BOY SCOUT NOTES

The Boy Scouts of East Vaughn located some stolen goods for the officers and as a result two men are in jail. The H. C. Barrett store was robbed last Sunday evening of a miscellaneous lot of clothes and suitcases as well as \$60.00 in cash. The local officers worked all the next day on the case but were unable to locate the stolen goods which they felt sure were hidden somewhere about the town.

About five o'clock Mr. Barrett called on the troop of scouts for assistance. The scouts were out about an hour when they discovered the loot hidden beneath the floor of a deserted house. With this information the officers were able to locate the men who were responsible for the work.

The Vaughn troop is one of the forty troops in the eastern New Mexico council with headquarters at Roswell.

Giving Thanks
 I'm thankful for my mother,
 I'm thankful for my dad,
 For my good friends and kindred
 And good times I have had.
 I'm thankful for my lessons
 That I learn at school each day,
 And I hope I'll grow more thankful,
 More thankful—every day.

Unnumbered Blessings
 Once in a while, it may do us good to be thankful, not so much for the particular fortune that has come to us as individuals, as for the general blessings that are showered down impartially on all of us. Sunshine, moonrise, the feel of rain on one's face; the sight and the scent of earth, green in the spring, dun-coated in the fall; the sound of birds in the morning, the sight of young stock gambolling in pasture—these come even to the poorest. Let us be thankful.—Wallace's Farmer.

Rimless Glasses

Refined, unobtrusive, meeting the ideas of the most exacting wearer.

Use the heavy-appearing rims for sports and general outdoor use—or for the library, but for the office, street or social occasions wear—

RIMLESS.

In white or yellow gold mountings they are inconspicuous and show good taste.

We can furnish these with your correct lenses based on measurements from the lenses you now have.

ACCUMULATION OF WATER
"GAS" IS EXPLAINED.
 It is often stated that much of the water which autoists get in their gasoline is due to the refining process in which water is used to remove acid and other chemicals employed to purify the product. This is true," says the Standard Oil company, "that the refining process to which gasoline is subjected involves washing with water to remove acid and other chemicals which are employed to purify the product. There is, however, little or no water in removing all traces of water from gasoline. Water in gasoline is almost invariably due to condensation of water in the atmosphere in the underground tanks in which gasoline is stored. It is practically impossible to avoid the accumulation of water in these tanks unless it is removed at regular intervals there is a possibility that some of it may be pumped up by the pump and delivered to the customer. It should also be borne in mind that the storage tanks of automobiles sometimes accumulate water by condensation in the atmosphere, and that the customer who experiences difficulty with this impurity should regard it as characteristic of either his own car, or the retailer from whom he obtained the gasoline."

JUST KIDS—The Pillar Fight.

BY AD CARTER

FEDERAL HIGHWAY AID IS INCREASED OVER \$50,000,000 1931-32

SANTA FE—Governor Dillon Monday called a special meeting of the state highway commission for Tuesday, November 26, to consider President Hoover's appeal for aid to industry and labor by speeding up state and county construction work.

The principal construction work in the state which involves employment of labor by the state on any scale is the work of the state highway department, and the governor said Monday that he would place Mr. Hoover's letter before the highway commission.

Replying to Mr. Hoover's letter of November 23, Governor Dillon said:

"I am requesting all state, municipal and county authorities to begin as speedily as possible to carry forward all building programs which have been decided upon and for which funds are available. Our state highway department is ready to put on and carry to completion next year a road building program costing five million three hundred thousand dollars. The Rio Grande conservance district confidently expects to begin its vast engineering plans early in the new year costing ten million dollars for drainage, flood control and irrigation, in the Rio Grande valley."

Captain— "Why were you over leave?"

Ten-year Sea 2c—"Well-er-Captain- Stop me if you've heard this one—"

The Bellhop: "Mrs. Newlywed, will you please put your phone on the hook. A switchboard girl who was listening in on you has just bitten three men in the lobby."—Colorado Lookout.

Advocate want Ads Get Results!

105 HUNTERS KILL 77 DEER

SANTA FE—The first 105 hunters to report to state game warden Edgar L. Perry killed 77 bucks. The cards come from all parts of the state, but mostly from the southwestern district.

"That is a high percentage," commented Mr. Perry. "I don't know of

any other place in the country where such a high proportion prevails."

Under the heading "game seen," these 105 list 593 bucks, 2,383 does and 469 fawns. The proportion of bucks to fawns is approximately 1 to 4.

WATER RIGHTS TO 1000 ACRES SETTLED FEDERAL COURT FRI.

Water rights to approximately 1000 acres in the Pecos valley river drainage system area, which have been contested by the United States government for the past nine years, were settled by the federal court at Roswell, N. M., Friday. The settlement was made by the government's surrender of its claim to water from the Hagerman canal because Mr. Remely showed that evidence showed the canal had been constructed prior to the Carlsbad irrigation project. Surrender to rights under the Hagerman canal were made because the government became convinced that the stream was not tributary to the Pecos. In the other districts, it was satisfactorily shown that the water was owned outright.

The KITCHEN CABINET

(By 1229 Western Newspaper Union.)
 "What we call luck is simply Pluck,
 And the doing things over and
 over;
 Courage and will, perseverance and
 skill,
 Are the four leaves of Luck's
 clover."

RELISHES AND PICKLES

Now is the time to get ready for all
 the good things which add so much
 to the table during
 the whole
 year.

Be sure to try
 one or two jars
 of these attractive
 pickles:

Cucumber Pickles.

Select cucumbers one and one-half inches in diameter, pare, cut into halves and remove the seed portion with an apple corer. Now slice into half-inch pieces. Simmer for a couple of hours in half vinegar and water, cover, salting to taste; drain. Add a strip of one pound of brown sugar, three cupsful of mild vinegar and boil five minutes with a bag of spices; skim and pour over jars. Stand over night; repeat the process. On the third day, put in jars, cover with the boiling liquid and seal. A few large, plump peppercorns added to this pickle improves the flavor and adds to the appearance.

Conserves.

Scald and peel one pound of ripe peaches, add one cupful of sugar, the shredded rind of six or eight lemons, two oranges put through the meat chopper and the juice from a small bottle of machine cherries. Cook, stirring constantly until well blended, adding five minutes before taking up, one cup of sugar and one-half cup of water. Store in glass jars or half-pint jars.

Watermelon Balls.

Cut the pink part of the center of a ripe watermelon into balls with a potato peeler. Soak over night in weak alum water. In the morning rinse and pour the sirup made of three-quarters cup of sugar and just enough water to cover the balls. Add one-half cup of lemon and orange thinly sliced to each pound of fruit and one cup of ginger root cut into small pieces to each three pounds. Cook clear, skim out the fruit, boil the sirup until thick and rich, reheat the fruit and pour into jars. This is a very pretty conserve as the balls retain their color fairly well.

EUROPEAN NAMES AND AMERICAN TOWNS

If our American pioneers had liberally named their towns and cities with the purpose of making future travelers from Europe feel at home, they could have scarcely have succeeded and better than they have by distributing old world namesakes to satisfy their own sentimentality. There are, for instance, no less than seven Venices in the United States, according to a bulletin of the National Geographic Society, just issued. They are in the States of California, Florida, Illinois, Louisiana, Missouri, Ohio and Utah. The real Italian name, Venezia, has been given to an Arizona community. Thirteen American cities are titled Naples, after Italy's Napoli, and six states claim a Belgrade, corresponding to the Yugoslavian capital, Belgrad.

A queer complication regarding these cities has arisen since geographic boards in most European countries have made official decisions on the correctness of names. Strasburg, since France's ownership of Alsace, has become Strasbourg, must the eight Strasburgs in America insert an extra letter in their names? Coincidentally, our nine Smyrnas would have to submit to the new Turkish spelling and change to so many Izmiris. The Capitol of Norway dropped the name Christiania, for the ancient version, Oslo, but here we have the edge on the old world, for Minnesota had her Oslo long before the change took place. Texas, the bulletin points out has a tendency to adopt the correct original spelling of its namesake towns, and harbors within its borders a Roma and a Milano. Wisconsin and Missouri have never settled a long mooted question as to whether the former's Belgium of the latter's Belgique is correct. If the inhabitants of towns such as these actually became stirred up in a meticulous zeal for propriety there will be endless confusion and adjustments. Imagine, for instance, throwing off the map the comparatively simple Flushing, New York, for its proper Dutch original, Vlissingen!

TULAROSE HIGH SCHOOL BOY DEAD BY BULLET

ALAMOGORDO — Cyril Spring Frye, 17, student in the Tularosa high school died here Monday night from a bullet wound in his head. Spring was reported to have accidentally shot himself through the head with a .22 calibre rifle. Details of the shooting were not made known for the boy was alone in his room. He is the son of Mr. and Mrs. J. H. Frye. Mr. Frye is a furniture dealer in Tularosa. The Frye family moved to Tularosa less than a year ago from Greensboro, North Carolina.

Typewriter Ribbons—The Advocate

RYE CHAMBERS CASE IS DISMISSED AT ROSWELL

District Judge C. A. Richardson dismissed the case against Rye Chambers, Tuesday, who has been held in jail since September 21, charged with driving a car recklessly, and while intoxicated, the night of September 14th, when Forrest Bramblett of Hagerman was killed in a collision between the car Chambers was driving and a Studebaker driven by L. D. Dalgren, of Dexter.

The case was dismissed because of lack of evidence. At the inquest here on the death of Forrest Bramblett, several whiskey bottles were displayed as belonging to Chambers. It was testified that he was driving on the left side of the road at the time the accident occurred. The coroner's jury, however, returned a verdict that Bramblett came to his death by means of an unavoidable accident.

The two young men were returning to Lake Arthur from Hagerman in a Ford coupe which they had borrowed. About two miles north of Lake Arthur, their car collided with the Studebaker head on, causing Forrest Bramblett to be thrown through the wind shield, severing the jugular vein. Deputy Sheriff Jim Williamson of Hagerman placed Chambers under arrest pending trial. His bond was later set at three thousand dollars.

—The Hagerman Messenger

STOCK JUDGING CONTEST

High school stock judges and public speakers, from all parts of New Mexico, will come to the New Mexico College of A. & M. A. December 5th to participate in the annual state contest to select New Mexico champions.

The contest in public speaking is an innovation this year. All entrants will select subjects from the field of agriculture. The winning public speaker will go to Phoenix in May for a regional contest. The winner of the Phoenix contest will be given a free trip to the American Royal Livestock show held each November at Kansas City.

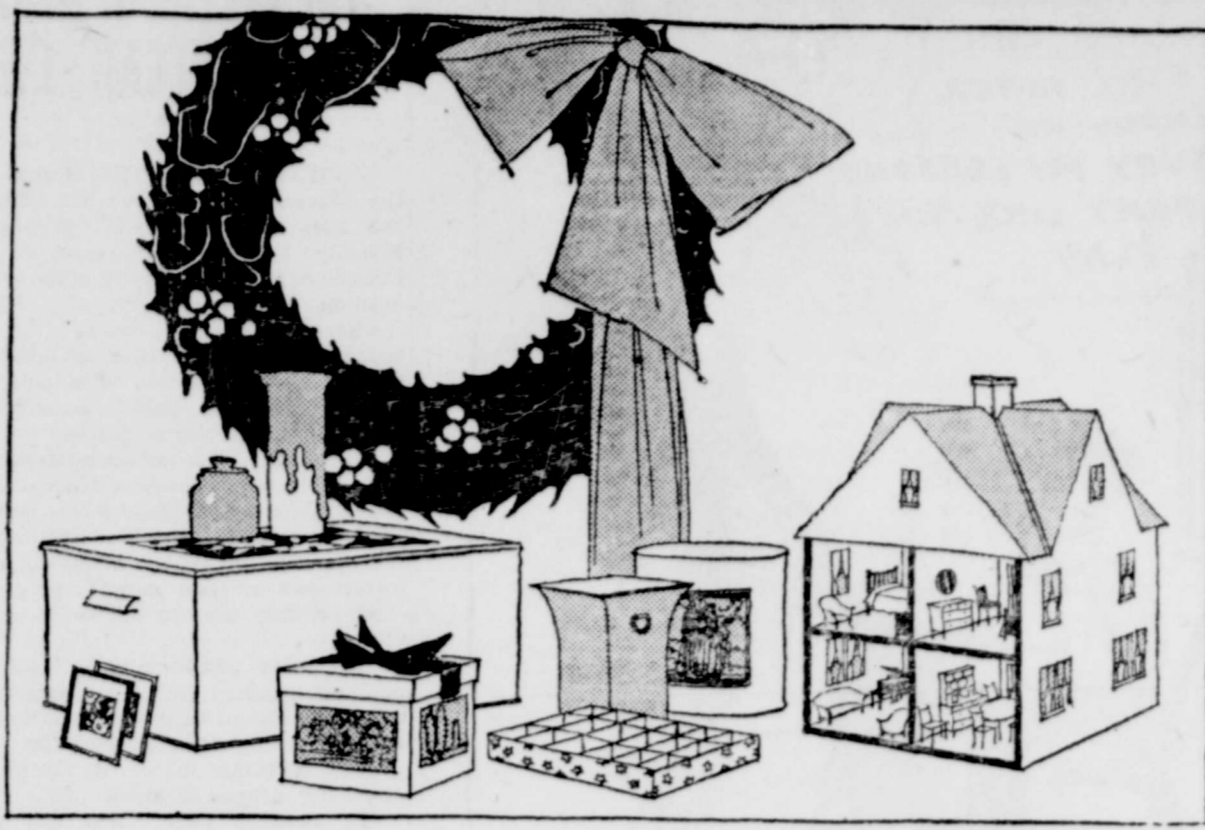

The high school stock judges who emerge from the contest as winners will go to Denver in January. The winning team at Denver will be awarded a trip to the stock show in Kansas City.

Las Cruces high school won the stock judging contest last year. The members of the local team have just returned from Kansas City, Mo., where they were entertained by officials in charge of the annual livestock show.

Gifts That Can Be Made

By HELEN B. AMES

MOTHER and the girls "just adore" Christmas shopping, but Father and the boys always find it something of a bore. Father, particularly, is inclined to shift most of the burden of selection to the feminine members of the family and put off buying the few gifts that he can't avoid picking out himself, until the great day is almost here. Then of course he gets into a crowd and comes home tired and disgusted, vowing he will never do any holiday shopping again. These are the times when he revises his ideas that women belong to the weaker sex, as he sees them fighting their way to the counters, with the light of battle in their eyes.

Yes, there is no doubt that men are pretty helpless in a throng of Christmas shoppers, but they do like to present gifts and there are ways of choosing them without being shoved and stepped on in a crowded store. If Father or Big Brother is handy with the saw and the paint brush, gifts can be made at home, and something with a personal touch is often more welcome to the family than anything that can be bought downtown.

If the young daughter has expressed a wish for a chest for extra clothes, a very nice one can be created from a strong wooden box, which may be obtained from the grocer. Hinges can be bought at a hardware store and fastened to the cover so the box can be opened and closed, and when it is lacquered or enameled in a charming color that blends with the decorations of her

room, the young lady is sure to be delighted with her present. Mandarin red with a stencil decoration in black on the top, and lines of black around the edges, will make a colorful box. Or, if this does not harmonize with the rest of the furniture, robin's egg blue decorated with yellow, coral with a trim of ivory, or green antiqued with burnt umber, will be sure to fit in with the color scheme.

Her little sister will be delighted with a doll's house, which can also be made from a packing box. After cutting the windows, if there is difficulty in inserting the glass, a local glazier will probably do this job for a small sum. When the floors are fitted in, the exterior should be attractively painted in one of the new color schemes for homes. Pale cream with cobalt blue trim would be pretty for the outside, the interior walls may be yellow, and the floors a lighter shade of green. Of course, Mother will have to be called upon to make curtains for the windows and select the tiny pieces of furniture for the doll family.

Even something cleverly made-over until it looks like new will be a welcome gift in the family circle, for there are generally "old friends" in the attic which have been regrettably banished at the suggestion of up-to-date daughters. The roomy bureau of ancient vintage, for which Mother still cherishes a sentimental feeling, can be modernized by cutting down the legs, replacing the tarnished handles with wooden knobs, and re-

moving the clumsy supports of the mirror so this can be hung separately. Then both the bureau and mirror can be restained or repainted any desired color.

If an extra chair is needed in the living-room or there is a demand for a small table to fill in an empty corner, it is worth while to make a visit to the attic before starting out to buy something new. Fresh paint and new color will work wonders with shabby old pieces, and nowadays there are so many quick-drying products on the market that the work can be done in a very short time. Modern lacquers dry in about thirty minutes and it is now possible to purchase good enamels that will dry in four hours from the time they are applied.

Decorations, such as stencil patterns and decalcomania transfers, simplify the work, and those who have a talent for free-hand drawing can make their gifts still more distinctive. Colored prints, too, suggest a means of redecorating such pieces as a dingy wastebasket or a faded screen. A magazine cover or a colored illustration from a seed catalog will look like a mellow, old print if it is covered with a coat of shellac after it has been pasted on. These prints also make attractive wall pictures when they are outlined with passe-partout or fastened into a simple wooden frame. This is an easy gift for a small boy to make, but the shellac is so transforming that if the picture is well chosen, it is worthy to be included in the Christmas list of the older members of the family.

Correct this sentence: "He told her that he loved her, and wanted none of her money."

GARFIELD SUGGESTS THE REPEAL OF U. S. HOMESTEAD LAW

WASHINGTON, D. C.—Repeal of the federal water power act and of the homestead law was suggested Monday by Chairman Garfield of President Hoover's public lands commission in a statement.
The question was raised as to the field the commission should enter in its consideration of a possible turning over of public domain to the eleven western states within which most of the public land lies.
Garfield said President Hoover had asked a complete report on public lands and added, in his opinion, a recommendation on the homestead and water power acts might properly come within the commission's province.

The water power act, he said, is not at present in a satisfactory state of operation, its appropriation having been insufficient for the proper carrying on of its work in disposing of power sites.
He asserted that homestead and timber laws appeared to have outlived their usefulness, and that the homestead law, especially in its soldier's preference phase, had worked actual hardship.

"Nothing is worse than to give land preference to a man who is not a natural farmer," he declared.

Other commission members also criticized the homestead law, saying the homestead in the states concerned is not an economic unit, and has offered false promises to settlers.

CALLED TO KERRVILLE, TEXAS

Jack Nipple, day clerk at the Artesia hotel, Saturday was called to Kerrville, Texas, by the critical illness of his son-in-law, Robert E. Perkins, who is not expected to live, according to an early report.

LICENSE PLATES RECEIVED

SANTA FE.—The 1930 motor vehicle license plates have arrived, said Charles Roehl, motor vehicle commissioner Friday. There were two freight car loads and they were unloaded at the highway department warehouse.

There were 90,000 pairs of plates of which 75,000 are for pleasure cars and 13,000 are for trucks. The remainder are for state cars, dealer's licenses, government cars and other miscellaneous uses.

Mr. Roehl said his office would start at once to have the license plates trucked to the various county seats. They will go on sale December 1st.

Doctor: "I can't cure your husband of talking in his sleep."
Wife: "But can't you give him something to make him talk more distinctly?"—Pickup.

The Average Family--

There is no other way so safe and certain for the average family to provide against financial disaster in time of death, to save for old age, to assure future financial independence, as is Life Insurance.

New York Life Insurance offer you a definite means to a definite end, a policy exactly suited to your needs.

"What do You Mean . . . Penetrates Metal Surfaces?"

A Plain Answer to a Reasonable Question

THE Germ Essence, imparted to highly refined paraffin base crude under a patented process exclusively owned by the Continental Oil Company for North America, actually penetrates and combines with metal surfaces, forming a permanent, protective film.

No matter how long a motor stands idle or how cold it gets, this film is present and immediately lubricates the moving parts when the engine turns over.

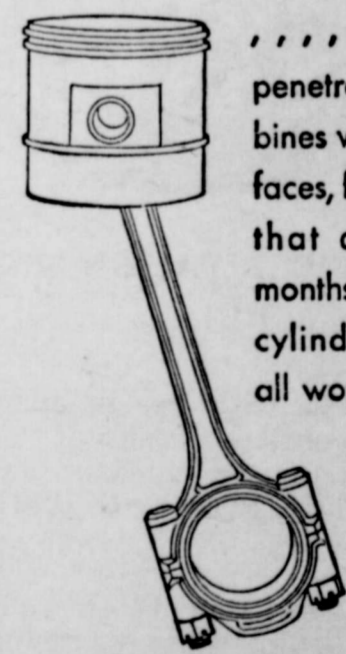

It takes five to ten minutes—often longer—for the oil in the crankcase to fully flood the bearings in the starting operation. During this period, automotive engineers agree, from 40% to 60% of motor wear occurs. This wear is reduced to a minimum by the ready-and-waiting lubrication which the Germ Essence imparts to CONOCO Germ-Processed Motor Oils, retaining it on and in the surface pores.

CONOCO Germ-Processed Motor Oil stands up under every condition of stress and strain. It will not break down or burn nor will it evaporate to any appreciable degree.

No other oil possesses these qualities. So positive are we in our convictions, so positive have been our tests of this remarkable lubricant, that we are perfectly willing for you to select any operating condition—no matter how extreme—and we will meet it with CONOCO Germ-Processed Motor Oil so satisfactorily that you will never consider using any other oil.

Go now to stations and dealers displaying the CONOCO Red Triangle—have your crankcase drained and begin immediately to profit through the use of this remarkable oil.

FACTS ABOUT N. MEX.

A few facts and figures about New Mexico gleaned from the address of Governor Dillon at the Valmore reception and banquet in Chicago, November 20th, may be of interest to our readers:

Area—It is the fourth largest state in the union with an area of 122,634 square miles or nearly 79,000,000 acres. The states of Connecticut, Delaware, Rhode Island, Vermont, New Hampshire, New Jersey, Maryland, Massachusetts and the gigantic state of New York could be tucked away in New Mexico with lots of room left over.

Population—New Mexico's population to-day is estimated at 390,000 or about the number of inhabitants in the city of Denver.

U. S. and State Lands—The United States government holds title to about 16,000,000 acres of land for homesteading and the State of New Mexico owns approximately 10,000,000 acres for sale and long term grazing leases.

Forests—New Mexico forests cover 13,000,000 acres of land and contain about 17,000,000,000 feet of yellow pine and other timber.

Coal—Our known and undeveloped coal deposits in one county alone are greater than the combined coal deposits of Pennsylvania and Virginia. Coal camps in operation are producing annually about 5,000,000 tons of coal. The U. S. Geological Survey estimates that New Mexico's undeveloped coal lands contain 192,000,000,000 tons of coal.

Right here it might be well to call attention to the claim sometimes made that water power will soon take the place of coal as the dominant force in generating electricity. I believe we can dispose of this argument by quoting the world's greatest authority, Thomas Edison. According to Mr. Edison's published statement he appears to believe that King Coal will reign for centuries to come. Mr. Edison says:

"Hydroelectric power will never supplant fuel as a generator since water power in order to be utilized to its greatest efficiency is generally dependent upon operating in a network system linked with fuel burning plants. Only a few cities—those immediately within the region of water power—can hope fully to utilize hydroelectric power. The load of manufacture throughout the country must depend upon fuel burning power."

Gypsum—In southern New Mexico we have gypsum beds covering 270 square miles. When you drive past them you think they are mountains and plains covered with snow. Geologists estimate these fields contain 33,000,000 tons of gypsum.

Elephant Butte Reservoir—The Elephant Butte dam which is 40 miles long is the largest storage reservoir in the world. It consists of a string of deep, beautiful lakes. The cost of this dam was about \$14,000,000 or less than half the cost of a modern battleship.

The crops annually grown on lands irrigated from this dam amount in value to more than \$14,000,000. It is conservatively estimated that water from the Elephant Butte alone can provide productive land for a population of 500,000.

Minerals—New Mexico's annual copper production runs over \$10,000,000. Annual sales in gold, silver, lead and zinc net between \$4,000,000 and \$5,000,000.

New Mexico's oil resources have hardly been tapped. San Juan county produces the highest known gravity oil; southeastern New Mexico oil fields are now in a state of rapid development. New Mexico offers golden opportunities for oil refiners.

Agriculture—New Mexico's agricultural possibilities awaiting development are as vast as its coal, oil and water power resources. The state produces practically all the grains, fruits and vegetables native to a semi-tropical climate. The annual value of our farm products may be conservatively given as about \$50,000,000. This year one valley in New Mexico produced a bean crop that sold at over \$1,000,000. The broom corn industry runs close to half a million dollars a year.

Chaves and Eddy counties in southeastern New Mexico irrigate large tracts of land from 700 artesian wells.

Mineral Springs—We have fifty or more mineral springs, many of them known the world over for their health giving qualities.

Welcome Assured

The Collector—I shall call again next week and, remember, I shall expect you to pay at least half of this bill.

Mr. Everbroke—I'll be delighted to have you call. It will be a pleasure to entertain an optimist like you.

Great-Uncle to Mary Louise

By H. LOUIS RAYBOLD

"AND so, after all these years, I am trying to make up for my indifference by this method of reparation. The money is yours to do with as you desire. When you receive it I shall be dead and beyond the reach of thanks.

"Your belatedly penitent great-uncle.

"Jonathan Benjamin Cowles."

This was the conclusion of the letter which Jimmy Stiles several days ago had signed with a flourishing signature and then re-read with grinning satisfaction. Cleverly worded, that's what it was. And a darn bright idea. How tickled Mary Louise would be! And how unlikely ever to discover the hoax!

Now he sat at his desk and wondered whether Mary Louise had yet cashed the inclosed certificate of deposit.

Years before Mary Louise had come to visit her aunt, who was matron of the County home, where Jimmy was one of many lonely, blue overalled and aproned orphans. Bashful, she had hung back until he, Jimmy, had offered her his end of the see-saw and had stood by to see that no one played the mean trick of jumping off and letting her to the ground with a thud.

Mary Louise's mother, because of whose illness she had been sent away, died during her absence and she stayed on with her aunt. And when matrimony with a widower of small means and considerable family claimed the estimable matron, Mary Louise still lingered, merging with the rest of the orphans until her origin became as blurred as theirs.

When the boy was fifteen the rector of the church near the home found in Jimmy evidence of an unusual intellect and left no stone unturned until the boy was given an opportunity for unlimited schooling, with sufficient outside work to keep him independent.

Jimmy rose rapidly—graduated brilliantly from high school—went into a lawyer's office daytimes and continued study at evening school. Ultimately he entered the bar and became an attorney with a reputation before he was thirty.

Meanwhile Mary Louise had been "hound out" to a lonely farmer's wife. Growing attached to her, the woman had done more than the stipulated clothing and feeding of the child—had taught her what she could of grammar, geography and similar rudiments of learning, and there was implanted in Mary Louise the yearning to acquire knowledge.

These changes had meant separation for the boy and girl, during which the memory of each grew dim to the other but did not utterly fade. And at Drift Harbor their paths converged again.

Mary Louise sometimes filled in at the hotel, which stood a mile or two from her adopted home, in various capacities from that of clerk to waitress. And it was a Mary Louise who had grown so bewitchingly pretty with the years that Jimmy was hardly to be blamed for passing up the feminine guests at the hotel and spending whatever of his leisure moments coincided with hers in the company of Mary Louise.

"Are you happy, Mary Louise?" he asked one day.

Mary Louise threw him a questioning glance from beneath her curly lashes. "Just now," she said ingeniously. "But winters—oh, Jimmy, it is very lonely. And—and I see no future. If only I could afford to go to the city and have a couple of years at a normal school. Then—oh, just think, I might be able to teach!"

She sighed blissfully, as though teaching were an achievement too heavenly to contemplate. "I dream nights of what I would do with a thousand dollars. That's my favorite air castle in Spain."

That winter Jimmy unexpectedly won a case which netted him an even thousand and the sight of the check brought back to him the words of Mary Louise.

Suddenly the idea of creating a fictitious great-uncle occurred to him—a great-uncle who would exist but for a moment on a sheet of paper, but long enough to bequeath to Mary Louise a thousand-dollar legacy.

The letter had been written and sent and now Jimmy sat and dreamed in his office of its reception by a blue-eyed girl in a lonely farmhouse near Drift Harbor.

And as he dreamed the door of his office opened. At sight of a slim figure Jimmy sprang to his feet.

"You fraud!" cried a sweet voice. "My great-uncle Jimmy!"

Jimmy swallowed. "How—er—Why—er—"

"Well, partly because I read in the papers of your thousand-dollar fee in the Hitchcock case, but mostly because only one person in the world makes the funny 'J's' that you do. I had only to compare the 'J' of Jonathan with the 'J' on the hotel register to have my suspicions confirmed. Of course I couldn't—"

"Mary Louise," interrupted Jimmy firmly, "hand over that certificate!"

And when she did so he folded it evenly and slipped it into his pocketbook. "What an idiot I was to give you a chance to go out of my sight again!"

And his face wore the expression of one upon whom a great light has broken suddenly. "Come straight into my arms, my darling!"

And Mary Louise came.

FAMOUS COLUMN

The other night a fellow from a neighboring city tried to get home after imbibing too much anti-freeze. He had turned his car around in the middle of the road and was talking fast and furious to himself, evidently under the impression that he was driving home at the rate of 40 or 50 per, which is safer for the public than actually driving at that rate. Birds of this sort should have their stomachs tested with an instrument like the garage man uses in testing the alcohol in your radiator.

When Ray Bartlett got his talkies in the other day, the workmen dropped the talkie machine box and the machine started cussing out everybody within a radius of 100 feet.

"Let 'em come down," said a man the other day, in referring to women's dresses. "I'm tired of looking at bow legs."

It will only take about one more drive of the blue cross, red cross, double cross, S. Army, triple cross, community chest et cetra to drive the ordinary Artesia business man insane.

WALL STREET CRASH SHOULD EMPHASIZE PATIENT THRIFT

By S. W. Straus, President American Society for Thrift.

The recent disturbing events in the stock market should serve one useful purpose and that is that we have great need in this country for a more widespread understanding of true thrift.

It is not the purpose of this writer in this article to attempt in any way to analyze the Wall Street situation either past or present. The only point sought to be had here is that greater thrift among American people would have prevented much of the trouble that has occurred.

It is hard sometimes to make people believe that fundamentals do not change—that it is always risky to try to get something for nothing, to try to get rich over night, to try to run a shoestring up to a million. Once in a while someone proves the exception to these rules but such instances are exceedingly rare.

In the long run it is better to be satisfied with such returns for your money as are safe and sound. Through the process of compound interest or re-investment of proceeds, one can build one's capital to such a great volume as might sound truly amazing. These processes are slow at first. It requires much patience to let your earnings grow along sound lines when those around you apparently are reaping prodigious profits and getting rich from their speculative activities.

But while these methods are slow they are dependable and there are millions of people to-day who are thanking their lucky stars that they have been satisfied to put their money in safe places even though the profits may have seemed small.

As long as we stick to the fundamentals of thrift we are safe. Whenever we get away from them there is no likelihood what financial disaster may overtake us.

Son: "Dad, let's buy a new car?"
Dad: "Wait till I've had a ride in the old one, will you?"

Be thankful — you have reason enough whether you have sense enough or not.

Loose-leaf Binders, Special Ruling and Stock Forms.—The Advocate.

THANKFUL

We take this occasion to express our thanks, at the Thanksgiving season, for the nice business given us this year; for the friends made and for the blessings enjoyed.

With the Christmas holidays near, we extend to you a cordial invitation to visit our store and inspect our nice line of holiday candies.

GROWERS TO GET HELP FROM FARM BOARD

The federal farm board announced approval of the following applications for supplemental commodity loans according to G. R. Quesenberry, of the New Mexico Agricultural College, to enable the cooperative associations to make advances to their grower members in accordance with the policy announced by the board in Chicago, October 26.

1. A commodity loan not exceeding \$2,500,000 to the North Carolina Cotton Growers Cooperative Association, Raleigh, N. C., supplemental to loans obtained from the Federal Intermediate Credit Bank, Columbia, S. C.

2. A commodity loan not exceeding \$5,000,000 to the Oklahoma Cotton Growers Association, Oklahoma City, Oklahoma, supplemental to loans from commercial banks. Of this amount the board advanced \$493,000 on November 7.

3. Revision of the supplemental commodity loan not exceeding \$6,000,000 to the Staple Cotton Cooperative Association, Greenwood, Mississippi, so the association may make loans to its grower members on the new basis.

In order that the policies may be better understood by all concerned, Carl Williams, member of the federal farm board, left for a trip to South Carolina, Georgia and Alabama, where he will address several meetings which will be held under the auspices of the cotton cooperatives. This will enable growers to get a better understanding of the policies of the farm board and assist them in getting a maximum of help.

Nature's Blessings and Bounties on Every Day

Thanksgiving is defined as an act of gratitude for favors and mercies and it is well that we have a day set apart annually for a public acknowledgment or celebration of divine goodness, either in deliverance from calamities or in the dispensation of blessings and the bounties of nature.

But, notwithstanding, "the hills that flesh is heir to," and those which we bring upon ourselves, we might make every day a day of thanksgiving, for every day we share these blessings and partake of these bounties, and we should rejoice every moment in the knowledge that they are found all around and about us, in the fields and streams, in the flowers and trees, in the sunshine and the showers, in the products of farms and gardens and orchards and vineyards, in the coal and stone and minerals that were stored away for the use of man ages before his appearance on earth. We should be thankful that all of these things, and many more, were placed here for our comfort and pleasure, and above all, we should be thankful for life and love—for a paradise that is lost by man mainly through his wanderings in labyrinthine formed by his own acts.—Southern Cultivator and Farming.

"Where Satisfaction Is Guaranteed"

BROWNFIELD, TEXAS HI DOWNS BULLDOGS BY SCORE OF 19-0 FRIDAY

It was a badly crippled Bulldog eleven that took the field here Friday against the strong Brownfield, Texas eleven, with the result that the locals went down by a 19-0 count. The Bulldogs, although weakened by the loss of three players, held their own with the Texas eleven until T. Pollard went out in the latter part of the first quarter with a sprained ankle. Shortly after Pollard's injury Brownfield started a determined march for their goal, making consistent gains on straight line bucks. The visitors made a touchdown in the second quarter and kicked goal for the extra point.

The Bulldogs held their own in the third quarter, and the weight of the visitors began to tell, and they put over another touchdown in the fourth quarter, but failed to make the extra point. In the next few minutes of play, the locals attempted a forward pass, which was intercepted by Brownfield. A Brownfield quarterback raced 28 yards before being stopped within two yards of the Brownfield goal line. A line smash netted another touchdown, but the visitors again failed to make the extra point. Artesia was able to get about an even break after the third touchdown and the whistle blew with the ball in mid-field.

Officials: Seogins (Southwestern) referee; Rideout (N. M. U.) head linesman; Jackson (N. M. U.) umpire.

MASONIC MEETING

A special meeting of the Masonic lodge will be held Tuesday evening at 7:30 p. m. to meet Grand Master Herbert S. Murdock, of Springer. Visitors are invited. Refreshments will be served.

Simple Method Given to Test Heating Plant

A simple test which any home owner can make when his new home is turned over to him by the contractor will show whether the heating system is functioning as it should, that is, if the circulation of vapor, steam or water is uniform and positive to all parts of the radiator heating system.

The test is this: Start a fire under the boiler and then see if all the radiators heat up uniformly and promptly. There should not be more than three to five minutes' difference between the time the radiator farthest from the heating plant warms up and the time that the radiator nearest the boiler warms up.

The home owner should inspect his new plant to see that all dampers are true and tight. The heater base must be tight and grounded to the floor so that no air leakage into the ash pit can occur at this point.

Narrow Flooring Best to Prevent Shrinkage

As a rule, the narrower any kind of floor is the better it will be, provided good workmanship is used and materials are all right in themselves.

The reason for this is that the shrinkage across a narrow piece is less than it is for a wide one, and that the cupping of the wider piece due to drying out of the wood is greater than in the narrower piece.

WITH GRANDMOTHER

Over the river and through the wood! Now grandmother's cap I spy! Hurray for the fun! Is the pudding done? Hurray for the pumpkin pie. —Lydia M. Child in the Kansas Farmer.

THANKSGIVING DINNERS

Mr. and Mrs. C. C. Pior are entertaining at turkey dinner to-day, Mr. and Mrs. Ben Pior and children and Mr. and Mrs. Roy Pior.

There will be a large dinner party at the E. H. Perry home at one o'clock when the following will eat turkey with Mr. and Mrs. Perry: Mr. and Mrs. E. M. Phillips and daughter, Miss Wyoma, Mr. and Mrs. Pat Moyer and children, and Mr. and Mrs. E. L. Glosbrenner and children, Miss Alice Boyer and Miss Margaret Perry, who is at home from her school at Queen and Allen Perry, who is here from the Military Institute at Roswell.

Mr. and Mrs. Calvin Dunn will have as their guests at turkey dinner to-day, Mr. Dan Eipper, Mr. and Mrs. Grover Kinder and daughters and Mr. and Mrs. Charles Oliver.

Mr. and Mrs. J. S. Sharp are entertaining at dinner Mr. and Mrs. Glen Sharp and children and Mr. and Mrs. Merrill Sharp and baby.

Dr. and Mrs. Fred Westfall of Carlsbad and Mr. and Mrs. Carl Joiner are dinner guests of Mr. and Mrs. Joe Hamann to-day.

All of the McCaw family will be together to-day at a turkey dinner at the home of Mr. and Mrs. Will McCaw, southeast of town. In addition to the family, Mrs. Anna Mae Robinson and daughter, Miss Wilma of Carlsbad and Elzy Barker will be of the company.

Mr. and Mrs. Lloyd Simon and baby are in from Maljamar to take Thanksgiving dinner with Mrs. Simon's mother, Mrs. Attebery at six o'clock to-day. J. R. Attebery and family will also be there.

There will be a turkey dinner at the G. B. Dungan home, Green Valley ranch to-day, honoring their guest, Wes Oliver, of Delta, Colorado. Other guests present will be Miss Irma Woolridge and Messrs. Kyle and Herman Green.

TREASURE HUNT

A unique party was given last Monday night by Mrs. G. R. Brainard in honor of her daughter, Mrs. Wm. Knorr, of Rockford, Illinois. The entertainment took the form of a "treasure hunt," which began at the home of M. A. Corbin in town and ended after several hours at the Brainard ranch. The first clue was given the party at the starting point and when they had unraveled that, they received the next clue until six clues had been found the last leading to the Brainard home. Each car of two couples had a flashlight by which to find the clues, and the first to arrive at the destination won the prizes. There were two fine china bowls for the ladies, Mesdames Wheatley and Corbin, and two leather key ring holders for the gentlemen, E. N. Bigler and Fred Brainard. A "light" lunch of ham baked beans, pickles, pumpkin pie, coffee etc, was served at the end of the exciting hunt, which was found to be a most delightful sort of party. The guest list included Messrs and Mesdames Yates, Corbin, Wheatley, V. L. Gates, Feather, Bigler, Fred Brainard and Clarke.

BRIDGE PARTY

Mrs. Chester Russell was "at home" yesterday afternoon to the First and Second Bridge clubs entertaining six tables. Substituting for members of the two clubs who could not be present were: Mesdames J. M. Story, Lewis Story, Frank Seale, V. L. Gates and Will Linell. First prize was won by Mrs. A. F. Phillips and consolation went to Mrs. Wallace Anderson. Lovely refreshments were served in two courses.

YOUNG MOTHER'S CLUB

The Young Mother's club met with Mrs. S. B. Barnett Friday afternoon. The chief topic of the program of the afternoon was an article read by Mrs. Howard Byrd on, "The New Foster Mother." The birthday anniversary of Betty Barnett was remembered with appropriate gifts. The club entertained two guests, Mesdames Gillispie and McDermott. Light refreshments were served at the close of the afternoon's entertainment.

MRS. HAYES GIVEN HEARING

Mrs. Lee Hayes was given a preliminary hearing yesterday afternoon before S. W. Gilbert, justice of the peace, on charge of selling liquor to minors and was bound over to await the action of the Eddy county grand jury which meets at Carlsbad next week, under a \$1,000 bond.

As we go to press, we learn that announcements have been received here of the marriage of Burton Cecill, to Miss Gertrude Hooker, which occurred at Hartford, Connecticut, November 15th.

Wedding Announcements and Invitations, Engraved or Printed—Advocate

ROSWELL TO DEDICATE MUNICIPAL AIRPORT ON DECEMBER FOURTH

The new airport at Roswell will be formally dedicated Wednesday December 4th, with an all-day program to which the people of eastern New Mexico have been invited. One of the big drawing cards in connection with the program will be nine army planes, manned by fifteen officers and three enlisted men from Dodd Field, Fort Sam Houston. This army squadron will be under command of Major E. A. Lohman.

In addition to the army planes it is estimated there will be at least twenty-five other planes from different parts of the United States. A number of manufacturers are sending planes and many cities in the southwest will have official representatives coming by plane.

The program will start at 8:00 o'clock on the morning of the 4th and the period from then until 10:30 will be given over to inspection of planes by visitors and demonstration flights. At 10:30 the army planes will stage some maneuvers. At eleven the formal dedication of the port will take place with Mayor John W. Hall in charge. Short talks will be made by Governor R. C. Dillon and Major E. A. Lohman. At 11:30 there will be a fifty mile race for the larger planes.

From 12:30 until 2:00 inspection of planes will again be permitted and there will be demonstration flights. At two o'clock the balloon bursting contest will take place, and at 2:30 there will be more maneuvers by the army planes. The spot of landing contest is scheduled for three o'clock, and at four o'clock there will be a fifty mile race for smaller planes.

Concrete First-Floors Are a Fire Protection

A considerable proportion of house fires originate in basements—around heating plants or in stores of fuel, ash, trash or other inflammable material. The simplest fire barrier is a concrete floor; aside from the fire safety such a floor guarantees, it adds structural rigidity to the house and offers great possibilities in decorative floor treatment.

Fire may also enter through the roof which is exposed to flying embers. Fire-safe shingles or tile eliminate the hazard and add materially to the beauty of the home.

While fewer fires are transmitted from the exterior walls, real fire safety implies fire-resistant construction in those parts of the house. Fire-stops in walls, unburnable stairways, proper design of fireplaces and chimneys—these are a few of the details the modern builder includes in his fire preventative.

Automobile Influences Modern Home Designs

Discussing the present day designs of homes, Joseph Holtzman, Detroit builder, contended they had been influenced, as regard their beauty, by the automobile, just as "in older days when the 'coach and six' were our best transportation means our houses reflected the designs of the 'coach and six'."

"Our architecture today is typical of our age and day, but it is the beginning of an era denoting the creation of the typical American home," he continued. "Aviation, which is our next step in transportation, will not materially change the designs. The airplane is a very graceful thing. It has the 'lines' of the bird, slender well fashioned, poised; a perfect design. The coming of aviation will not affect our new architecture, except to better it if anything."

Kitchen Planning Saves Many Needless Steps

Some kitchens are so large there is space for everything, but one has to travel a long distance to bring together desired working utensils. Other kitchens are so small and one must huddle to fit so skillfully into another that one is always unpling to get the utensil needed.

In the small home this cannot always be avoided. By planning the cupboard spaces and making a survey of our kitchen goods much can be done, however, to make even a small kitchen cupboard convenient. We may not wish to compete with factory products nor do we wish to work at top speed, but we can adapt ideas from their convenient arrangement of tools in relation to the work to be done.

Special Varnish Needed for All Outside Work

A special grade of varnish, which costs a little more than the ordinary variety, is needed for outside work around a home. This varnish is made so that it will resist the ravages of the weather. The varnish must be able to withstand heat and cold in order that it will protect the wood and not turn white.

Calling Cards, 100 for \$1.75, on best grade paneled or plain stock.—The Advocate.

HOW ROAR OF MOUNTAIN TELLS OF STORM'S APPROACH

The "roar of the mountain" is regarded as an indication of an approaching storm, observes Path finder. It is a very striking phenomenon to anyone not accustomed to it.

Meteorologists say the phenomenon commonly occurs in response to the strong and persistent winds on the forward side of a cyclonic storm approaching a hilly region. Many such storms in winter time are likely to be heralded by gales and accompanied by thick, low clouds and rain which may last for several hours or even a day or two. The aeolian sounds produced by these winds near the crest of the mountain before the storm breaks are due in part to the fact that the trees are stripped and bare so that small branches and twigs often vibrate as musical strings do when wind rushes over them. The forested growth on the mountain first produces a low sighing or moaning sound. This "murmur of the forest," as the poet puts it, grows in a few hours to the catarrh "roar of the mountain."

How Word "Mantle" Has Expanded in Meaning

"Mantle" is a word which like so many others has grown beyond its original sense of any kind of a covering, such as a sheet over a bed, for instance, to that of an ornamental article of apparel.

"Mantle" is also used metaphorically as in the sentence "Altruism was the mantle of his insidious gaining of their confidence."

In the figurative use of the word "mantle" it has the sense, almost identical with that of "cloak," which is practically synonymous with it in both actual meaning and figurative usage.

"Mantle," referring to clothing, we get directly from the French "man-teau" with the same meaning. We have the same word in Spanish, "mantilla," to designate the article of clothing worn by every well-dressed Spanish woman.

How Scales Makers Use Agate

How million-year-old fossils take a vital part in modern American business is a curious item of the day's news. In the form of agates, buried in rocks, these ancient fossils are washed down the mountains of Brazil and are gathered in the valleys. Transported on the backs of llamas to the sea coast and thence by ship to New Jersey or New York, they eventually reach American factories. A Toledo scale company opened the first American agate cutting plant, which furnishes 30,000 pounds of this stone for use in scales. This grade of agate is the hardest obtainable, second only to the diamond. By eliminating friction, they contribute to the accuracy of scales and thereby are intimately concerned with the literally billions of dollars' worth of merchandise which is sold by weight annually.

How Phrase Became Popular

Anybody who attends to everybody's business but his own, who insists on having his finger in every pie, so to speak, and who is forever intruding where he is not wanted—such an offensive personality is frequently called a "Meddlesome Mattie."

The term, which has a self-explanatory ring, is not used so frequently now as it used to be. It is to Theodore Roosevelt that we owe thanks for its introduction into the language. When he was President it was enough for him to use an expression to make it popular, and it was his use of "Meddlesome Mattie" that started it in the government offices.

How "Sioux" Got Name

Three hundred years ago the lands now contained within the state of Minnesota were occupied by a powerful confederacy consisting of seven tribes of Indians. These people called themselves Dakotas, meaning friends, or allies. Their enemies called them Nadowaysioux, signifying poisonous snakes. French traders who came in contact with them 50 years later speedily shortened this name to "Sioux," by which they have been called ever since by white men, but the Dakotas never would admit this was their proper appellation.—Detroit News.

How Fishes Breathe

In the throat of fishes, behind the mouth cavity, there are four riblike bones on each side, above the beginning of the gullet. These are the gill arches, and on each one of them there is a pair of rows of red fringes called the "gills." Into each of these fringes runs a blood vessel. As the water passes over it the oxygen it contains is absorbed through the skin of the gill fringe into the blood, which thus becomes purified. In the same manner the impurities of the blood pass out into the water and go out through the gill openings behind.

How Much Installment Trade

It is estimated that installment sales reach a total of \$5,000,000,000 annually. The United States Chamber of Commerce has estimated that 17 per cent of the entire amount of consumer goods sold at retail is disposed of in this manner.

Joyce-Pruit Co.

FEDERAL HIGHWAY AID IS INCREASED OVER \$50,000,000 1931-32

WASHINGTON, D. C.—Chairman Dowell of the house roads committee announced Monday he would seek an increase from \$75,000,000 to \$125,000,000 in the annual authorization for federal highway aid for the fiscal years 1931 and 1932 in response to a general movement over the country for expansion of road building programs.

Conference with officials of the bureau of roads, members of state highway commissions and associations sponsoring highways, had shown him, Dowell said, that the country as a whole desires to extend and improve the highway systems.

Since the war, he said \$75,000,000 had been sufficient to meet the annual demands of states which match the federal money dollar for dollar in the construction of arterial highways.

Dowell said in many parts of the country, particularly in the western states, there was an urgent demand to build roads to connect links which would afford complete highways which were now only improved in sections.

Mr. and Mrs. Walter A. Jones are enjoying a visit from a number of relatives who arrived yesterday and to-day for a Thanksgiving family reunion and dinner. In the party are: Mr. and Mrs. C. T. Porter and three children, of Corona, and Mr. and Mrs. Y. H. Porter and children, of Albuquerque. The ladies are sisters of Mrs. Jones. Mrs. Slaght will also be a dinner guest.
