NUMBER 31

Free Wells Completed Hobbs Field Last Week

State No. 1 Is Latest Addition And Makes Barrels First Hour—Fowler, and Get-Kinley Drilled In.

The recent completion of the State No. 1 of the Hobbs field, in section 30-18-38, drilled to a depth of 2,900 feet, after seven inch pipe was run to 2,930 feet. On the test yesterday, the well produced 553 barrels of oil. Production of the State No. 1, is placed at 12,000 barrels daily. This well is the completion of the Ohio field.

P. V. COTTON GROWERS ASS'N. HOLD MEET AT ROSWELL YESTERDAY

M. W. Evans and Charles Rogers attended a meeting of the Pecos Valley Cotton Growers held at Roswell yesterday, during which time plans for the operation of the association during the coming year were discussed. The growers decided to market the coming crop through the association and will not affiliate with the Southwestern Cotton Growers Association.

The association expects to market six to eight thousand bales of cotton this year. Membership in the association numbers 400.

ALBERT F. VOGEL DIED IN HOSPITAL TUESDAY FUNERAL HERE TODAY

Albert F. Vogel, 39, resident of Artesia community for many years passed away at St. Mary's hospital in Roswell, Tuesday morning at 4:00 a. m. Mr. Vogel, who has been in ill health for several years was taken to St. Mary's hospital some two weeks ago. His condition, however, was not regarded as serious until a few days before his death when he developed pneumonia.

Mr. Vogel was a veteran of the World War. He moved to the Artesia community from Tennessee and has made his residence here continuously. He is survived by a mother, four brothers and six sisters. The brothers are, John Vogel of Shelbyville, Tennessee, Jim, Robert and Ike of Artesia. Surviving sisters are, Mrs. Harry Wilson of Pampa, Texas, Mrs. Emma Hough, Artesia; Mrs. May Bach, Artesia; Miss Anna, Estelle and Hannah Vogel all of Artesia.

Funeral services will be held this afternoon at the graveside at 3:00 p. m. Rev. Scoggins, pastor of the Methodist church officiating. The Clarence Keiple post will have charge of the funeral and it is expected that the deceased will be given a military funeral.

TWO MEN FATALLY GASSED IN A STEEL TANK AT HOBBS MON.

H. E. Powers and Ray Seymour, who were trapped in a steel gas filled tank in the Hobbs oil field Monday morning were pronounced dead by physicians shortly after noon Monday.

A score of men had refused to accept the view of physicians Monday morning that there was no hope for the two men, and had worked constantly for more than three hours in shifts attempting to resuscitate the men, until the workers themselves became convinced there was no hope.

Powers was gassed while trying to rescue Seymour from the gas tank. Out of the Hobbs field Monday came a story of heroism in the oil fields while physicians and oil workers labored constantly to save the lives of two men.

H. E. Powers risked his life to save that of Ray Seymour, a fellow worker, and both were trapped in a steel gas tank on the Texas and Pacific Coal and Oil Company's lease.

Seymour started to enter the tank and Powers called to him not to go in until they had tested it for gas. Seymour believed the tank was empty and did not hear the warning of Powers who was about 300 feet away. Disregarding the danger Powers went down into the tank to bring Seymour out.

John Sharp, an employee of the T. P. saw both men in the tank. They were unconscious and Sharp ran for help. He called D. H. Starling, an Atlantic Pipe Line foreman, who started into the tank but smelled the gas and did not enter.

Starling removed the manhole plate at the bottom of the tank and pulled out the two unconscious men.

They were brought to Hobbs where oilfield workers kept up artificial respiration until an ambulance arrived to take them to a hospital.

Seymour and Powers were employed by the Martin Tank Company.

SCOUT CAMP SETS NEW ENROLLMENT RECORD

Enrollment at Boy Scout camp near Weed for the first ten day period has reached 138, the largest in history, according to word received from Minor Huffman, executive and director.

The second period of scout camp for older boys opens Sunday.

SEVEN ARRESTED HERE ON LIQUOR CHARGE IN PRETENTIOUS CLEAN UP

Thirteen Charges Are Filed At Carlsbad—Officers Also Raid A Still West Of Carlsbad And Secure A Big Haul.

The hot weather combined with the law, has made it rather unpleasant for the alleged liquor traffickers in Carlsbad and Artesia during the past week. A pretentious clean up was made in both places by federal officers with the aid of local officers over the week end.

Seven arrests were made here Friday. All men arrested were taken to the county jail at Carlsbad. Three of the seven men arrested in Friday's raid on charge of sale of intoxicating liquor have made bond, while four others have been unable to gain their freedom. Included in the arrests made were Dan Awalt, Ed Fuller, Weaver, all of whom have made bond. J. L. Bentley, D. E. Smith, Sutton and Happy Dominguez are in the county jail.

Officers making the raid were Federal Officers Howard Beecham and Neal, Ross Conner, deputy sheriff and Sheriff Joe Johns of Carlsbad. Saturday the same officers with the addition of Officer Baker of Carlsbad raided a still nineteen miles west of Carlsbad and found a 75-gallon still in operation. Two men found on the premises where the still was being operated were placed under arrest and lodged in jail. In addition to the still, officers found complete paraphernalia for making liquor including 500 pounds of sugar and 29 barrels of mash in addition to ten gallons of whiskey.

A charge of possession and sale of intoxicating liquor was also made against Dan Webb, who was arrested here last week in connection with the robbery of a meat car here on June 26th.

Thirteen were arraigned at Carlsbad Friday before United States Commissioner James W. Stagner on charges of possession and sale of intoxicating liquors. The charges were as follows:

- Tom Martin, possession and sale.
- Bill Ohnemus and Bob McClure, possession, sale and conspiracy.
- John Boeglin, Sr., possession and sale.
- Thelma Martin, Thelma Gibson and J. T. "Speck" Walker, possession, sale and conspiracy.
- Lee "Lucky" Womack, possession, sale, manufacture and maintaining a nuisance.
- Jess Britt, possession and sale.
- Luz Hernandez, possession, sale, manufacture, and maintaining a nuisance.
- Ricardo Moreno and Amencia Moreno, possession, sale and maintaining a nuisance.
- Wayne Thomas, possession, sale and maintaining a nuisance.
- Womack, Hernandez, the Morenos and Thomas pleaded guilty. The others pleaded not guilty.

It was said here this morning that a number of new boarders at the county jail had crowded the building to capacity and that officials were having some difficulty in properly caring for the boarders acquired in the recent raids. It was also suggested that some kind hearted citizen might relieve the county of a little responsibility and embarrassment by assisting a few of the inmates in making bond.

ACCEPT RESIGNATION OF HEALTH DIRECTOR

Resignations of Dr. G. S. Luckett as director of public health was accepted Friday afternoon by the Welfare Board in session at Santa Fe.

OILERS JOURNEY TO CARLSBAD ON SUNDAY FOR A RETURN GAME

The Oilers established a percentage of 500 the past week when they won one and lost one ball game at the Brainard Park. They were defeated by the Joyce-Fruit nine of Roswell in Thursday afternoon's contest by a score of 10-4. "Shorty" Roberts, formerly of Knoxville, Tennessee, the new pitcher acquired by the Oilers acquitted himself creditably in Sunday's game with Carlsbad, when he pitched the locals to a 9-3 victory over the visitors and partly won his own game by clouting a homer over the right field fence. Roberts a former player in the Arizona league, is expected to add considerable strength to the Oiler nine.

Next Sunday, Artesia will journey to Carlsbad for a return game. They expect to meet Roswell here on July 27th and Littlefield here on July 29th.

MILLION GALLONS OF WATER IS THE DAILY CONSUMPTION HERE

City water patrons are using water at the rate of 1,000,000 gallons daily now, according to Ralph Terpening, assistant city water superintendent. The amount being used now represents an increase of approximately 250,000 gallons over last year. The increase in use of city water is attributed to the fact that more residents are taking a greater interest in keeping up their lawns and gardens.

MASONS ATTENTION

Special meeting, Artesia Masonic Lodge No. 28, A. F. & A. M. at the lodge hall at 7:30 p. m. Fellowship degree to be conferred. Visiting Masons cordially invited to attend.

SUPREME COURT HOLDS HIGHWAY DEPT. LIABLE IN A RECENT DECISION

Reverses The Lower Court Decision In Holding Las Cruces Woman Entitled To \$10,000 Damages In Suit.

SANTA FE—Three members of the New Mexico Highway Commission and the chief highway engineer yesterday were held by the state supreme court to be personally liable to Margaret Summerford of Las Cruces, for \$10,000 damages because the highway department built a viaduct at Las Cruces which damages her property, without instituting condemnation proceedings or offering to compensate her for the damages.

The commissioners are Charles Springer, Fred Huning and J. A. Mahoney and the chief engineer is W. C. Davidson.

The town of Las Cruces, the Santa Fe Railroad and the Board of County Commissioners of Dona Ana county were also named as defendants.

The court held that the damaging or taking of private property for public use, without just compensation, is contrary to the state constitution, and that officers purporting to act without authority of law are personally liable for their acts.

Mrs. Summerford contended that construction of the viaduct along Picacho Avenue in Las Cruces, over the Santa Fe Railroad tracks, cut off her land from access to Picacho Avenue, depriving her of means of egress and ingress.

She claimed that her property was damaged to the extent of \$10,000 and that no effort was made to compensate her for her property.

All of the defendants filed demurrers to her complaint which was sustained in the District Court in Dona Ana county. The state supreme court held that the lower court erred with respect to the members of the highway commission, the chief engineer, the town of Las Cruces and the county of Dona Ana.

THE HOBBSSES AT IT AGAIN

SANTA FE—The Hobbses are at it again. Continuing their struggle for existence as two towns despite their adjoining limits, Hobbs and New Hobbs prepared to get into court yesterday with New Hobbs contesting through injunction the right of Hobbs to set itself up as a municipal school district and get \$250,000 for public schools.

The injunction is to be filed either in district court at Clovis or Roswell by A. C. Chesher and other members of the school board of New Hobbs.

The New Hobbs board contends that neither it nor Hobbs may constitute a municipal school district because neither had 100 children of school age a year ago. Now New Hobbs has 185 and Hobbs has 670.

The state school auditor recently authorized \$250,000 in certificates of indebtedness for Hobbs and New Hobbs believes that if the combination high school and grade school for which plans have been approved by State Superintendent of Education Montoya, is built, Hobbs will discriminate against the students of New Hobbs.

New Hobbs seeks to enjoin Hobbs from spending any of the funds derived from the certificates.

Mr. Comstock said yesterday that the Hobbs school board was created in April and that the New Hobbs school board was not created until July, after the \$250,000 in certificates of indebtedness had been authorized.

Nobody gets sore when stocks soar.

CITY BUDGET IS MADE YESTERDAY—IS ABOUT SAME AS LAST YEAR

The city budget for the coming year was fixed at a meeting of the city dads with R. L. Ormsbee of Santa Fe, representative of the controllers department and Mr. Logan, representative of the Santa Fe Railroad. The amount of the budget will be substantially the same as last year, which means there will be no increase in city tax rate. This is good news to the tax payers. The budget must be approved by the state tax commission before it becomes effective.

BIDS OPENED FOR NEW BRICK BUILDING AT ROSELAWN AND MAIN

Cunningham Brothers yesterday opened bids on a new one-story face brick business building, which will replace the two frame structures located at the corner of Roselawn and Main. The building a modern fire proof structure will occupy a space 50x50 feet, facing north. An eight inch wall will be constructed north and south, dividing the new building into two compartments 25x80 feet each.

Plans and specifications call for the latest type of building, including a modern architectural design, all tiled lobbies and bulk heads, all copper window settings and all transoms of tapestry glass. The structure will be designed so as to accommodate another story and will have a finished basement. Plans for the occupancy of the building have not been made as yet, Carl Cunningham said yesterday, nor has the contract for construction yet been awarded.

Actual construction operations are expected to get underway by August 1, and be completed by November 1.

There are more cynics at 16 than 60.

No man can think beyond his vocabulary.

\$1,375,499.50 IS NOW AVAILABLE FOR COMMON SCHOOLS OF NEW MEX.

The state treasury has \$1,375,499.50 available for the annual apportionment to the common schools, State School Auditor Carl Comstock, who made the apportionment, was notified by State Treasurer Watts Monday.

The amount is nearly \$5,000 less than the sum that was distributed last year.

The allocation is to be made on the basis of the school census for 1929. That shows a gain of nearly 6,500 over the census for the preceding year; hence the per capita distribution will be lower.

The counties showing losses in census or standing still will be the hardest hit. Those recording gains, if they are big enough, will be able by this means to off-set the shrinkage in the apportionment.

Before he gets together with Montoya to make the apportionment Comstock is having a checkup made on some of the census reports. Some of them, he believes, subject to suspicion; especially those where big increases are shown and where no reasons are shown for such gains, such as oil booms.—Santa Fe New Mexican.

BACK FROM TROUT FISHING

M. W. Evans and family, Mr. and Mrs. Hugh Burch and Hugh, Jr., and Mr. and Mrs. Will Cheney returned last week from the northern part of the state, where they spent a week in trout fishing in the headwaters of the Brazos, north of Taos. Mr. and Mrs. Tom Cheney of Albuquerque were also members of the party.

FINE COTTON WEATHER

Weather conditions continue ideal for the rapid development of cotton. Practically all of the crop is putting on squares while some of the earlier cotton has bolls well on the road to maturity.

So far local growers have experienced little or no difficulty in controlling the boll worms and leaf worms. The corn borer has made its appearance in some fields, but the damage inflicted is slight. Cotton farmers do not anticipate any injury from the leaf worm unless rainy weather sets in.

35,000 Bbls Daily Limit Under Hobbs Proration

Oil Operators Permitted To Market Approximately One-Fourth Of Field's Output Under Plan Effective Yesterday.

Oil operators in the Hobbs field of Lea county will be permitted to market 35,000 barrels daily according to a proration agreement, which went into effect yesterday. The agreement was the result of a meeting of the twenty-four operating companies with the state land commissioner and state geologist at Santa Fe Friday. Details of the agreement which have been approved by the operating companies and the state land commissioner were not made public until yesterday.

Wells both new and producing will be gauged in order to arrive at a potential production of field. The proration plan is based on a 75 per cent market outlet of the average potential production and 25 per cent of the market outlet on an acreage basis. The plan is said to be identical with that adopted by the Yates pool in Texas.

The amount of production agreement upon 35,000 barrels daily is approximately one fourth of the potential capacity of the field, which was estimated to be 147,000 barrels early in the week.

Operators approving the plan have agreed to the following: the agreement shall be tenable on leases within four townships, lying in the intersection of townships 19 and 19 south and ranges 37 and 38 east, which will include the limits of the Hobbs field, operators believe. No well in the Hobbs field will be shot unless necessary; no oil is to be stored in the field; no well in the field is to be placed on an oil or gas life and no well is to be operated in such a manner as to waste gas or dissipate the gas pressure of the field.

The agreement effective the 16th will remain in full force and effect for a period of six months and may be renewed or extended for like periods on the approval of the 24 operating companies and the state land commissioner and state geologist.

The executive committee which is to meet at Roswell Friday to work out the final details of the proration plan is expected to secure the services of an umpire to aid in carrying out the program. The executive committee is composed of: Jack P. Cusack of the Skelly Oil and Gas company; E. G. Allen of the Shell Petroleum Company; L. E. aBrows of the Texas Company; Warner Clark of the California Company; H. C. Bretcheider of the Midwest Refining Company; J. R. Suman of the Humble Oil and Refining Company; Harry W. Walker of the Walker Oil Corporation; Dr. Austin D. Crile, New Mexico land commissioner and C. G. Staley, New Mexico state geologist.

WATER MELONS COMING IN

The first of the home grown water melons were placed on sale here this week. The melons are of an average quality. Few cantaloupes have ripened as yet and most of the cantaloupes consumed here have been shipped in. So far the home grown fruit marketed locally has been light and consisted principally of summer apples, crab apples and a few cherries.

MOSQUITOES WILL BE EXAMINED BY HEALTH DEPT. FOR MALARIA

Dr. O. E. Puckett of Carlsbad, county health officer drove up to Artesia Tuesday and bottled up some Artesia mosquitoes and wiggle tails to take back to Carlsbad. The mosquitoes and wiggle tails will be confined on suspicion until it is determined whether or not they are malaria bearing. One specie of mosquito caught resembles the malaria bearing kind sometimes found farther east. Specimens of skeeters and wiggle tails caught at Carlsbad will also be sent in for identification. Sp-mens are tested at the health laboratory at Richmond, Virginia.

EDDY COUNTY

OILED HIGHWAY TO LOVINGTON

Highway 83 east to Lovington offers a logical en-
trance to the Lea county oil fields for the Pecos valley
and the western part of the state. The east road has
recently been repaired and new cattle guards placed
where needed. In addition practically half of the
highway has been surfaced with gravel, the remainder
of the road is plated with caliche. On this route
there is an abundance of materials which can be used
in the road oiling operations, including sand and grav-
el.

We have now 43 miles of oiled highway toward
Roswell and sixteen miles of the same sort of road
toward Carlsbad, which affords easy access to Artesia,
the center of the valley, which could be made the west-
ern distributing point for the Lea oil fields. A direct
eastern route, such as the Lovington road affords,
could be made into a first class highway with a normal
expense to the state highway department, connecting
with the proposed highway from Lovington to Hobbs.
With the amount of needed materials close at hand
combined with the amount of work that has been done
on this road and the condition and age of the road
bed, the Lovington highway undoubtedly offers the
most feasible possibility of an oiled road into the Pe-
cos valley.

If the state is to retain its share of the oil busi-
ness, a first class highway connecting the field with
the Pecos valley is a necessity.

The idea of spending the week end in the moun-
tains is comparatively new and dates back only a few
years to the time when the automobile became popular.
Yet each year sees more folks of the valley taking ad-
vantage of the week end trips to rest up and to cool
off. There are many interesting spots both in the
Sacramentos and in the White mountains within easy
reach of every auto owner.

More or less demand for rent houses continues de-
spite the vacation season and the fact that a number
of folks are in the mountains.

PRORATION FOR HOBBS

Practically all of the oil men interested in south-
eastern New Mexico are mindful of the necessity of
controlling the oil output of the Hobbs oil field and
other potential oil fields so as to proceed with an or-
derly development of the state's resources. With other
fields curtailing the production, it was not an unusual
step to ask for proration of the Hobbs district and
one that was generally regarded as inevitable.

It was as some operators regard it, an economic
necessity, for with the present overproduction on in
the oil industry, coastal fields could flood the market
with cheap oil with a small carrying charge.

Proration of course will extend the life of the
field and will supply the state with a long time revenue.
The only disadvantage to the curtailment is that it will
cause the state institutions to suffer a slight incon-
venience in the matter of funds.

WHAT WE HAVE TO OFFER

Several West Texas towns were bidding for the
1931 convention of the West Texas Press Association
and it was rather interesting to peruse some of the in-
vitations sent to this paper by the various West Texas
towns, inviting the convention to convene at such and
such a town. Interesting things in or near the bidding
town were always listed. Some towns, although large,
appeared to have few attractions to offer the news-
paper fraternity.

In this connection, if our own local community were
bidding for a convention, how many of us could name
a few attractions nearby that might be of interest to
the prospective delegates? Interesting sights in or
near us have become so common place with numbers
of our local residents that they would be stumped if
requested to name them yet Artesia could offer an
appealing invitation to any convention that might
want to come here. In fact any Pecos valley town
could do the same thing. Mountains, the irrigated
farming districts, the oil fields nearby and the Carls-
bad Caverns holds an interest for a multitude of peo-
ple.

WORTH ALL IT COSTS

It is estimated that 30,000,000 persons in the U. S.
have enjoyed or will enjoy vacations averaging two
weeks and that the total expenditure amounts to \$3,-
000,000,000. That so many could afford to devote
so much money to a matter largely of pleasure is a
testimonial to the widespread prosperity which pre-
vails. Railroad traffic is above the average and sum-
mer resorts are having a profitable season. Tourist
camps have been filled to overflowing. The national
parks have had more visitors than ever before. All
these things are taken into account in reaching the
estimate, which, of course, is nothing more than ap-
proximate, since there can be no such goal as accuracy
in such a matter.

That so many are able to knock off from the reg-
ular vocation and seek relaxation shows that as a people
we are learning the value of a bit of leisure. We have
a class which devotes itself chiefly to leisure, but the
vacationists referred to are those who for the main part
of the year are busily employed. The number of
vacationists is all the more noteworthy since it must
have included the farmers in but a small proportion
and they are the more numerous than any other class.
The summer is the farmers busy season and his leisure,
if he has any, comes at other times. Next winter
many of the tillers of the soil will hitch up the car
and journey southward for a few weeks and will
augment the numbers of the vacationists considered
by the year.

The vacation idea calls for the employment of many
thousands who cater to the wants of vacationists. This
involves business of vast magnitude in itself and it has
wide ramifications. What is one's period of leisure
is another's time of activity. All of us could not take
vacations at once. Somebody has to stay on the job
to provide for the vacationists—and take in the money
the vacationists have to spend. And the latter feature
is attended to with promptness.

INSIDE INFORMATION

The best method of destroying the
roundheaded apple tree borer, a de-
structive enemy that the apple grow-
er has to combat, is by worming with
a knife and wire in midsummer or
early fall. When castings are found,
cut away the bark enough to trace
the borers out or to crush them with
the wire, insert into the hole a little
cotton batting dipped into carbon
disulphide and plug the opening with
moist earth. The roundheaded borer,
attacks trees of all ages but is
most destructive to trees 10 years
old and younger. Borers are most
easily found and destroyed in the
first few months of their lives.

If a child wakes up too early or
sleeps fitfully during the night, per-
haps his supper has not provided
quite enough nourishment to carry
him through to the breakfast hour.
Make sure that the last meal of the
day provides some milk, bread and
butter, a vegetable and possibly a
fruit, such as scrapped baked apple.

HOW TO CURE "THE IVY"

Now that the vacation season is in
full swing millions of people are
going into the woods and fields.
Many of these are subject to the
infection of poison ivy or sumac,
the American Game Protective As-
sociation points out and suggests
ways of curing the contagion.

If you believe you have "the ivy,"
the association suggests that you use
a curative at once. Washing with
strong laundry soap is reported as
being excellent as a preventive.

Redness, itching or blisters on the
skin will evidence that the infection
has taken hold. One good cure is
to paint the affected parts with a
tincture of iron. A solution of po-
tassium permanganate is useful and
can be used in the same way. These
preparations can be gotten in any
drug store.

Immediately after the infection
appears, it is a good thing to wash
the face and hands with a 5 per
cent solution of ferric chloride in a
half and half mixture of alcohol
and water or glycerine and water.
But care must be taken not to get
this preparation into the eyes. A
strong solution of ferrous sulphate
in water may be used in the same
way.

Jeff Hightower spent the week end at home.

Lewis Story took his family to Cloudercroft Sunday.

Mr. and Mrs. C. R. Vandagriff left Sunday for a ten days' visit to his mother at Elk City, Oklahoma.

Messrs. and Mesdames Albert Richards and H. S. Williams are expected home Sunday from their trip to Yellowstone Park.

Ferrell McLean came home last Saturday from Wink, Texas, where he has been employed the past six months in field work as part of his course at State College.

Mrs. Mabel Welton and Mrs. Alf Coll drove up to Ruidoso Monday to spend a few days with Mrs. Emma Coll and Miss Addie Coll in the Coll cabin.

Rev. and Mrs. Harold Scoggins and small son, Grant, went up to the Artesia-Sacramento camp Monday and are spending the week there, guests of Mrs. L. P. Evans.

Mr. and Mrs. Harve Muncy have received word that their daughter, Mrs. John Beckett, was operated upon in a Los Angeles hospital last Friday and at last reports was getting along nicely.

Dr. and Mrs. J. J. Clarke, accompanied by Mrs. Clarke's sister, Mrs. Landry, Miss Catherine Clarke and Miss Ethel Bullock, drove over to Alamogordo, Sunday, returning home by way of Cloudercroft.

Mr. and Mrs. H. W. Kiddy returned Sunday from Okmulgee, Oklahoma, where Mr. Kiddy was called by the serious illness of his mother. Mrs. Kiddy was reported to be improving nicely according to a late report.

Prof and Mrs. E. L. Harp and son, Ernest, returned Monday from Ruidoso, where they had spent the past ten days at the Baptist encampment. Prof. Harp conducted the Pecos Valley orchestra, which played during the encampment, and Mrs. Harp assisted as accompanist and Ernest played in the orchestra.

Mrs. Glenn Sharp and children came home from a visit in Oklahoma last Wednesday, accompanying Mr. and Mrs. J. S. Sharp, who were en route home from Beloit, Kansas. Mr. Sharp says this is the last visit he intends to make to Kansas in the "good old summer time, that climate being so much hotter than this.

You would not think of employing unskilled labor to do the work of a high class salesman—it's just as serious a matter to use only good printing. Try the Advocate, phone 7

JUDGMENT IN INVESTING SAVINGS ONE OF THE BENEFITS OF THRIFT

By S. W. Straus, President American Society for Thrift.

It was officially stated recently that during the first six months of the present year the huge sum of \$32,500,000 was lost by people of New York state alone through investments in fraudulent securities. This is at the rate of \$65,000,000 a year and inasmuch as the empire state contains about one-tenth of the population of the country, it would seem within the bounds of reason to assume that considerably more than half a billion dollars are lost every year by the people of the United States thru this shameless type of fraud.

Many laws have been passed to put a stop to these fraudulent practices and state officials everywhere have been anxious to protect the public from dealers in "blue sky" securities. The chief fault, of course, lies in the gullibility of large numbers of persons who do not stop to think that it is impossible to expect money to grow on trees in a figurative sense.

Persons who are not sure of their own judgment in investment matters should seek the advice of those people capable of giving sound and honest advice on this problem.

It will only be thru thrift education that an end ever will be brought to this disgraceful situation. The masses of the people must learn that thrift does not consist merely in saving money and that it is just as important to know what to do with your money after you have saved as it was to have earned it and saved it in the first place. It is to be borne in mind that one of the great benefits to be derived from a study of thrift principles lies in the fact that it gives one judgment and perspective in money matters. We learn that it is foolhardy to expect the investment of a small sum of money to make us wealthy over night. Glib-tongued salesmen may tell you tales of financial miracles, but the truly thrifty man or woman will always remember that such phenomena rarely, if ever, occur. Sensible saving; sensible spending; sensible investing; this is true thrift.

The minister was putting on a new collar and was having the usual trouble with it.

"Bless the collar!" he said impatiently, as he tugged and tugged. "Bless the blessed collar!"

"My dear," said his wife, "what is your text for this morning's sermon?"

"F-f-fourteenth verse of the F-f-fifth Psalm," he replied. "The words of his mouth were s-smoother (tug) than butter, but there was (tug) war in his heart."

Bein' Scrubbed by Dad

"There's lots of things my Dad can do
That Mother can't, I know—
But she can do one thing or two
Where he don't stand a show
Of ever learnin' Mother's way,
If he'd try, years and years,
But he is worst of all, I'd say,
At scrubbin' out my ears!

"He'll look at me, and say 'Come here,
And let me scrub that face!
And then he'll look behind an ear
And say, 'Now there's a place
I think we surely ought to scrub'—
And then his fun begins,
For every time he starts to rub,
He nearly always grins.

"I know I make an awful face,
But, golly, so would he,
If I could make him take my place
And be scrubbed hard like me.
If I could hold him by the chin,
Like he holds on to mine,
I'd scrub his skin till it was thin—
I'd make it burn and shine.

"And then when I had chased the dirt,
Or all that I could see,
I'd pinch his cheeks until it hurt—
Just like he does to me!
And then I'd grin and say, like Dad,
'I guess you're clean enough.'
And then I know that he'd be glad,
'Cause I would treat him rough."

THE CHURCHES

METHODIST EPISCOPAL CHURCH SOUTH

Rev. Harold G. Scoggins

"The large church with a warm welcome and a helpful gospel."
9:45 a. m. Sunday school. George Frisch superintendent.

Sunday school last Sunday showed a marked increase over the last three in point both of attendance and interest, the untiring and faithful leadership of Superintendent George Frisch is holding the school together in a remarkable manner in spite of the excessive heat.

At 11:00 a. m. the pastor, Rev. Harold Scoggins will preach, using for his theme, "An Ancient Demonstration of Dynamics." Special music will be supplied by the recently organized choir under the leadership of Mrs. Dick Attebery.

Epworth League groups, both Senior and Junior at 7:00 p. m.
At 8:00 p. m. the pastor will preach on the theme, "A Blessed Assurance."

Why not try spending the week end quietly at home this week and renew your acquaintance with your friends in the church. You will feel fresher for the new week with its many demands. Communion with God and His people is wonderfully refreshing.

CHRISTIAN SCIENCE SOCIETY

613 W. Main Street

Sunday services at 11:00 a. m.
Wednesday services at 7:30 p. m.
Subject of the Bible lesson for Sunday, July 20, 1930 is, "Life." In this lesson the following scriptural selection is found: "Understanding is a well spring of life unto him that hath it." (Prov. 16:22).

Also the following citation from Science and Health with Key to the Scriptures, by Mary Baker Eddy, page 322: "When understanding changes the standpoints of life and intelligence from a material to a spiritual basis, we shall gain the reality of life."
Visitors always welcome.

THE CHURCH OF CHRIST

One Block West of Central School

Bible school at 9:45 a. m.
Preaching services at 11:00 a. m. followed by communion service.

One of the most successful meetings ever conducted by the Church of Christ in the Pecos Valley and the greatest for the local congregation came to a close Monday evening.

The membership is rejoicing over the results not only for the additions but each member and others have been built up spiritually by the masterful sermons delivered by Brother Wainwright during the series of meetings.

There were several things happened that is seldom experienced in a meeting in this day and time. Fathers and heads of families came and confessed their Christ and was buried with their Lord and Master in Christian baptism. Two twins, a brother and sister, were baptised together, to arise from the watery grave to walk in newness of life, a father and two sons repented and were baptised at the same hour of the night, a wonderful experience indeed. We are all made happy and we have a more determined desire to go on to greater things in the service of our Lord. There were thirteen added to the church by baptism and five restored to their faith and added to the congregation by statement.

Next Lord's Day at the 11:00

o'clock hour, Brother Frier, one of the best Bible students in the valley will preach for us. You will enjoy his message.

Come and help make a great day in honor of our Lord.

Don't forget the Bible school, be in your places on time and help keep the great interest and work going.

FIRST CHRISTIAN CHURCH

6th and Quay Streets

Ralph Waldo Emerson, Pastor

Bible school at 9:45 a. m.
Our Bible school has been well attended this summer regardless of the heat.

Morning worship 11:00 a. m. Sermon subject "The Wise Choice of the Young Man Moses."

Sunday evening the pastor will begin a series of sermons on church history beginning with the New Testament church, then the rise of Apostasy, the reformation and the restoration movements.

CHURCH OF THE NAZARENE

W. A. Henry, Pastor.

"The church where you are never a stranger."

Sunday school 9:45 a. m. Clarke Wilde Supt. A class for every age and every one.

Morning service 11:00 a. m. Sermon by Rev. Walter Orr of Hagerman.

Rev. Orr is chairman of the Pecos Valley zone of the Nazarene Young People's work, and he will speak in the interest of our young people Sunday morning.

N. Y. P. S. meeting at 7:00 p. m. Mrs. E. A. Paton president.

Evening service at 8:00 p. m. sermon by the pastor. We invite you to visit our services next Sunday.

FIRST BAPTIST CHURCH

The pastor and family and many others of our church attended Ruidoso encampment. The encampment in many respects went beyond the one last year. The enrollment was much better, there being more than 200 enrolled. Prof Harp had a larger orchestra and furnished some very fine music. Dr. Fry and Dr. Scarborough brought some able messages which were greatly appreciated. There were many other splendid addresses. The entertainment was good throughout. R. B. Harlan reports that the expenses of the encampment were about cared for.

Plans are being made to have another good one next year.

Next Sunday the pastor will speak on "The River of Life." At the evening service the subject will be, "The Closed Door." We are expecting good music from our choir and orchestra. Let us all be in our classes Sunday morning and have a good Sunday school. The B. Y. P. U. meet at 7:00 p. m. They will have good programs.

The Associated B. Y. P. U. organization will put on a program at Carlsbad Monday. A good program is being prepared. Our association will be held in Carlsbad Tuesday and Wednesday of next week. We will send messengers and we want everybody who will to go from here. Let us have a good delegation from Artesia at our association this year.

R. PETERSON, Pastor.

NINE ROAD PROJECTS

SANTA FE—Following approval of the U. S. Bureau of Public Roads to a letting of federal aid projects a total of nine state and F. A. P. jobs will be awarded by the highway commission July 23, it was announced last week.

Typewriter Ribbons—The Advocate

REPRESENTATIVES 7TH DISTRICT AMERICAN LEGION MEET THURSDAY

Meetings of American Legion representatives of seventh district, largest district in the United States, of the department of New Mexico was held in Artesia Thursday night. Department Commander Dan Vaughn was present and a splendid attendance was reported.

Matters pertaining to recent veterans legislation were discussed and several resolutions of importance were favored. The department went on record as favoring the introduction, at the state convention, to be held in Gallup, August 25, 26 and 27, of a resolution memorializing the state legislature to pass proper legislation to enable the national guard officers to maintain proper conduct of the New Mexico National Guard.

The second proposition favored was the introduction of a resolution memorializing the legislature to change the opening dates of the fishing and big game seasons so as not to interfere with the proper observation of Memorial Day and Armistice Day.

This meeting was the first of a series of district conferences to be held throughout the department of New Mexico and was successful in every way. A closer contact between the posts of the district will result and a better understanding of the state organization has been secured.

TOBACCO TAX TO BE VOTED ON NEXT ELECTION

SANTA FE—Along with the other election detail, Mrs. E. A. Perrault, secretary of the state is preparing to submit New Mexico's first referendum at the November election.

The people will vote on whether or not they want the tobacco tax, which was voted by the last legislature but which was successfully stalled by the circulation of referendum petitions by the tobacco dealers.

Whether the title will be sufficient for publication on the ballot or whether the entire law will have to be printed is a matter of immediate concern at the secretary of state's office. If it develops that the entire law will have to be printed on the ballot, the voters will receive a good sized book on which to scratch his little mark for or against the referred measure.

The tobacco tax measure also included the free text book law, which was to have been financed by proceeds from the tobacco tax.

PRESBYTERIAN ORCHESTRA ENCAMPMENT IN SANDIAS

Miss Virginia Egbert, violin teacher and conductor of the Presbyterian orchestra, left this morning for the Presbyterian encampment in the Sandia mountains, near Albuquerque. She took with her the following members of her orchestra, Jeanne Wheatley, Grace and Mona Sinclair, also Mary Ann and Lillie Mae Miller, who will play with the orchestra. Besides the orchestra Mr. and Mrs. Frank Miller, their daughter, Mrs. Costello and Miss Dora Russell, will go to the encampment. After the week at the encampment, Miss Egbert and Mary Ann Miller will go to Albuquerque, where they will take instruction for several weeks with Miss Helen Woytych, the noted Polish instructor in violin, who is on the staff of the state university. Miss Egbert will return here a week before school begins to resume work with her music classes.

WHY FAT MEN STAY FAT

"The trouble with me, and I guess this applies to 99% of the men who are putting on weight, I didn't have the energy or "pep" to keep it off. Lost all interest in any healthy activity and just lazed around accumulating the old pounds until I got that "Kruschen feeling."

Start taking Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape and fill you with a vigor and tireless energy you'd most forgotten had existed.

As a result instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Then watch the pounds slide off! Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoonful in a glass of hot or cold water tomorrow morning and every morning—and if they don't change your whole idea about reducing, go back and get the small price you paid for them. Get an 85 cent bottle of Kruschen Salts—lasts 4 weeks at McAdoo Drug Co. or Mann Drug Co., or any progressive druggist anywhere in the world.

COTTONWOOD ITEMS

(Miss Alma Bradley, Reporter)

The Cottonwood baseball team was beaten by Lake Arthur Sunday by a score of 10-8.

Orville and Virgil Worley motored to Hobbs Saturday where they were guests at the home of Joe Knott.

Issie Funk drove to Las Vegas after Mrs. Funk, who has attended school there for the last six weeks, they will return home today.

Mrs. B. D. Briscoe and Misses Hannah and Emma Briscoe of Artesia were guests at the J. I. Funk

home Tuesday. They also visited on the B. D. Briscoe farm.

Floyd Whitley was taken to a Carlsbad hospital Saturday, where he underwent an operation for appendicitis. He is reported to be getting along nicely and will return home soon.

Mr. and Mrs. Sam Joiner who have been visiting at the home of Mr. and Mrs. W. H. Rambo returned to their home in Ft. Worth, Texas after having visited the Carlsbad Caverns.

Mrs. Glenn O'Bannon and children Mary Frances and Douglas left for Colorado on a short vacation where

she will join Mr. O'Bannon there on a fishing trip. Various other points in the state before returning home.

MORE HONORS FOR C. M. T. C.

More honors have been bestowed on local boys who were training in the Citizens' Military Training Camp at Fort Bliss, Texas, according to a report received here. Ted Carls was awarded a medal as a member of the championship volleyball team. Hogins has been awarded for military excellence.

Loose-leaf Binders, Spreads and Stock Forms.—The

You are sure your FORD IS RIGHT when it's serviced here

IF YOU ever stopped to consider how much it really means to us for the Ford car to keep on building a reputation for economy—you wouldn't think of taking yours any other place for service or repairs.

We sell Ford cars and are specialists in servicing them. We offer a very economical periodic inspection service that prevents many repair bills. When repairs are necessary we have the special equipment and the trained mechanics to make them. Our flat rates are the most economical charges that can possibly be made for quality workmanship plus genuine Ford parts.

Drive in. Whatever your car needs—accessories, washing and polishing—here at lowest cost.

Artesia Auto Company

KONJOLA PUT KANSAS M BACK TO

"Proved To Be A Full Medicine Case," Says Formerer.

Any medicine that can cure a million friends in a day must have merit, and that is what Konjola has done. Why Konjola has become a household word? Well, read the story of H. C. Sherman, painting of Goddard, Kansas, says

MRS. H. C. SHERMAN

"Konjola proved to be a medicine in my case. I was hurt in an automobile and was in the hospital for three weeks. When I got out, I was run down condition; had pain in the shoulder, arm and my stomach was out of control. I suffered terrible pains, and it did me no good. The medicine of Konjola led me and six bottles of this medicine made me able to do my work. I am feeling every way than for a long time. Konjola's 32 ingredients together, battling at their own causes of stomach, liver and bowel troubles, and neuritis and nervousness. Konjola is sold in Artesia at the Ace Drug Store, and by all druggists in all towns in this entire section.

NEW OIL REFINING PLANTS AVAILABLE TO OIL COMPANIES

NEW YORK.—The Standard Oil Company, which announced last week that it had made available to 17 oil companies a new refining process as capable of producing 100 per cent. of the product, has called the process the "Standard Oil Refining Process." The process is controlled by the United States of America, which is developing a new process which was developed by the Standard Oil Company of New Jersey.

The announcement was made by the Hydrocarbon Division of the Standard Oil Company, which is the parent company of the Standard Oil Company of New Jersey, Standard Oil Company of Indiana, Standard Oil Company of Ohio, Standard Oil Company of Kentucky, Standard Oil Company of Tennessee, Standard Oil Company of Louisiana, Standard Oil Company of Texas, Standard Oil Company of Oklahoma, Standard Oil Company of Missouri, Standard Oil Company of Arkansas, Standard Oil Company of Mississippi, Standard Oil Company of Alabama, Standard Oil Company of Georgia, Standard Oil Company of Florida, Standard Oil Company of South Carolina, Standard Oil Company of North Carolina, Standard Oil Company of Virginia, Standard Oil Company of West Virginia, Standard Oil Company of Maryland, Standard Oil Company of Delaware, Standard Oil Company of Pennsylvania, Standard Oil Company of New York, Standard Oil Company of Connecticut, Standard Oil Company of Rhode Island, Standard Oil Company of Massachusetts, Standard Oil Company of Vermont, Standard Oil Company of New Hampshire, Standard Oil Company of Maine, Standard Oil Company of New Brunswick, Standard Oil Company of Nova Scotia, Standard Oil Company of Prince Edward Island, Standard Oil Company of New South Wales, Standard Oil Company of Queensland, Standard Oil Company of Western Australia, Standard Oil Company of South Australia, Standard Oil Company of Victoria, Standard Oil Company of New South Wales, Standard Oil Company of Queensland, Standard Oil Company of Western Australia, Standard Oil Company of South Australia, Standard Oil Company of Victoria.

THINGS THAT NEVER HAPPEN

By GENE BYRNES

THE DOVE CROP GOOD GAME UNIT SAYS

NEW YORK.—The drought of May and June prevailing throughout most of the United States favored the nesting season of doves and present indications are that there will be a large crop of this game bird this year, according to reports made from every section of the country to the American Game Protective Association headquarters here. The dove nests in every state, bring off from two to four broods a season.

The May broods are feathering out well and the babies of June are faring splendidly, observers report. There are yet two more broods to arrive in many sections, principally the temperate zone of the south and middle west, for in these areas the dove nests until late summer. Two weeks are required for incubation, and often before the brood is off the nest, eggs for the next brood are laid.

Many eggs are lost, however, because of the excessive love-making of the doves, ornithologists point out. The pair build such a slovenly nest in the little time they snatch from "billing and cooing," that the eggs

frequently roll off the almost flat surface of twigs or else fall through the loost interstices.

The shooting season on doves opens in most states in September. It opens in New Mexico on September 1 and closes December 15.

Carlos Avery, president of the American Game Protective Association urges that all sportsmen stay well within the bag and possession limits of their respective states. Every sportsman should familiarize himself with the laws wherever he hunts.

"Let us keep our capital stock and an appreciable percentage of the surplus of doves each year, and then they will increase to abundance. This is a conservation measure that needs to be practiced to bring the dove back," Mr. Avery said.

DON'T DO IT

He heard the toot, but tried to scoot
And beat the choo-choo to it.
The poor galoot now twangs a lute,
Take heed and don't you do it.

"What's the idea of having the statue under the sink.
"That ain't no statue; that a plumber."

SCIENTIFIC SURVEY OF LINCOLN NAT'L FOREST IS NOW BEING MADE

Furthering the scientific cutting of timber in the Lincoln National Forest, a reconnaissance party left Alamogordo last week to cruise timber on 150,000 acres in the Sacramento mountain division. The area is within the field of operations of the Southwest Lumber Company and the cruise will not only ascertain the amount of timber but will also form a part of the schedule for timber futures harvesting in the Lincoln National Forest.

Under the forest service management plan, harvesting is done on a basis so that the forest will yield a perpetual cut for many years to come. The survey is in charge of W. M. Beveridge and Ed Pearson, who arrived from the Sitgraves National Forest in Arizona. H. D. Burall heads a second crew in the Lincoln forest. His party will make a survey for land exchange projects. Under a recent law passed by congress the forest service is permitted to exchange land of little value for forestation for other lands in or adjoining the forest, and applications have been made for a number of these exchanges.

"Don't you think the singer has a wide repertoire?"
"Yes, but it wouldn't show so much if she'd wear a different kind of a dress."

RELIABILITY ECONOMY GOOD PERFORMANCE

THE NEW FORD TUDOR SEDAN

YOU are buying proved performance when you buy a Ford. You know it has been built for many thousands of miles of satisfactory, economical service.

Letters from users in every part of the world show the value of the sound design of the car, good materials and accuracy in manufacturing. You sense a feeling of sincere pride in the oft-repeated phrase—"Let me tell you what my new Ford did."

Further tribute to the sturdiness, reliability and general all-round performance of the new Ford is shown in the repeated and growing purchases by government bureaus, by police departments, and by large industrial companies which keep careful day-by-day cost records. In most cases, the new Ford has been chosen only after exhaustive tests covering speed and power, safety, comfort, ease of control, oil and gas

consumption, low yearly depreciation, and low cost of up-keep.

They have found, as you will find, that the Ford embodies every feature you want or need in a motor car at an unusually low price.

VIOLIN RECITAL

About thirty friends were fortunate enough to be present at a delightful violin recital in which Miss Virginia Egbert presented her pupil, Mary Ann Miller. The recital occurred on Monday evening at the attractive Frank Miller home, which was beautifully decorated with garden flowers. Mrs. Miller was assisted in serving dainty refreshments by her daughter, Mrs. Julia Costello, who is here from Bradford, Pennsylvania. Those present are unanimous in their praise of the young musician who shows undoubted ability in the handling of this difficult instrument, and her rendition of her program reflects creditably upon herself and her teacher. The numbers given by assisting friends, Miss Elsie Jernigan, Miss Catherine Clarke and Mrs. M. A. Corbin, lent variety to the occasion and were much enjoyed.

Following the recital Mrs. M. A. Corbin sang two numbers, "Ah, Let me Dream," by Taylor and "Solomon Grundy," by Ross and Miss Clarke played the "Prelude in C Minor," by Chopin.

IDLEWHILES BRIDGE CLUB

The club was entertained by Mrs. J. H. Jackson at the regular meeting at two o'clock on Tuesday, the hostess serving light refreshments. Substituting were Mesdames Wm. Compton, Stanley Blocker, Carl Joiner, E. L. Glosbrenner and Frank Seale.

THE FIRST BRIDGE CLUB

The regular meeting was held at the home of Mrs. S. E. Ferree on Tuesday afternoon. Guests and substitutes were Mrs. L. O. Landry, of Gross Stele, Louisiana, Mrs. Mayo Alexander of Phoenix, Arizona and Mesdames Kremer, Hartell and R. D. Compton. The Ferree home was beautifully decorated in shasta daisies and dahlias and delicious refreshments were served.

AUXILIARY MEETING

Some score of members were present at the July meeting, which was held at the home of Mrs. Walter Douglass, who with Mrs. Ray Williams of the field, was hostess and served delicious refreshments. The state convention, which will be held at Gallup, August 25, 26 and 27, was the subject of much interested discussion and the following delegates were elected, Mrs. Earl Darst, Alex McGonagill, E. N. Bigler, J. L. Truett, J. M. Story, Frank Linell and Frank Seale.

SURPRISE DINNER

The birthday anniversary of C. Bert Smith was celebrated with a surprise dinner at his home Tuesday evening. Besides the honoree covers were laid for Mr. and Mrs. Mayo Alexander and daughters, the Misses Dorothy and Thelma, of Phoenix, Arizona, Mr. and Mrs. John Lanning and Bettynele, of Roswell, Joe Jesse and Mr. and Mrs. Dayton Reser and the hostess.

HONORING MISS KNOEDLER

During the past week, Miss Reva Knoedler of Illinois, who is visiting her brother, R. G. Knoedler and family was honored with two dinners. On Tuesday evening, Mrs. Laura Welch served a two course dinner. The guests in addition to the honoree were Mr. and Mrs. R. G. Knoedler and family. Yesterday evening at 6:30, Mr. and Mrs. Rex Wheatley served a two course dinner honoring Miss Knoedler. Other guests at yesterday's social were Mr. and Mrs. R. G. Knoedler and family.

PHILLIPS PETROLEUM CO. PURCHASES GILLILAND

New York—Phillips Petroleum Co. yesterday announced acquisition of the marketing facilities of the Gilliland Oil Co., of New Mexico, a wholly owned subsidiary of the Reserve Petroleum Co. The purchase consists of eight retail service stations in Albuquerque, one each at Santa Fe, Ute Park and Las Vegas, six bulk stations and 118 resale outlets located in Albuquerque, Santa Fe and other strategic points in New Mexico.

The refinery and other interests of Gilliland Oil are not affected by the transaction.

CARD OF THANKS

I wish to thank everyone for what was given me to help me with my promise to Christ. When this money has been received at its destination, I will get a receipt which will be published in the Advocate.

Thanking you again for your kindness.

LOCALS

George Threlkeld was a business visitor from Roswell Tuesday.

Frank Carter of Pinon was attending to business matters here Friday.

Mrs. J. M. Story went to Cloudercroft Tuesday to join Mrs. Lewis Story and children.

Judge G. U. McCrary, Hugh Burch and Keith McCrary spent Monday at Lake McMillan, fishing.

Dr. Clarke went to Albuquerque Tuesday to attend a meeting of the state board of dental examiners.

A daughter was born to Mr. and Mrs. Hagan McCaw, Wednesday evening, mother and daughter doing nicely.

Mrs. M. A. Newcomb, who has been seriously ill at her home in South Artesia, is reported to be improved today.

Rude Wilcox and family spent Tuesday and yesterday with the parents of Mrs. Wilcox, Mr. and Mrs. Witt, at Lovington.

Martin Yates Jr. and son Harvey Yates expect to leave today for Cleveland, Ohio, where they go to bring Mrs. Yates and family home.

Perry Hill and wife and Lorita Hill have been here from El Paso this week visiting their father, Fred Hill and the J. H. Jackson family.

Mrs. Charles Ransbarger and daughter, Nora Ellen and Mr. and Mrs. Charles McNeil spent Sunday at the Ruidoso, going there by way of Tularosa.

Richard Westaway, of Carlsbad, deputy tax assessor, passed through Artesia Tuesday en route home from Hope, where he assisted the Hope town council in framing a town budget.

Mrs. Frank Miller and daughters, Lillie Mae and Mary Ann, spent last Tuesday in Carlsbad with her mother, Mrs. Frank Tigner. Mrs. Tigner was sufficiently recovered from the loss of her right forearm to return with them from the hospital.

Rev. Wainwright closed a very successful meeting at the Church of Christ Monday evening, and with Mrs. Wainwright and their two daughters, left for Petersburg, Texas to begin another meeting. There were eighteen additions to the church, mostly men.

Mrs. J. J. Clarke accompanied her sister, Mrs. Landry and party thru the Carlsbad Caverns on Friday. On Sunday Dr. Clarke and family, Mrs. Landry and children and their friend Lee Lecomb of Alexandria, Louisiana, and Miss Ethel Bullock, drove to Cloudercroft and came home thru the Mescalero Indian reservation. Yesterday morning the visitors left for El Paso on their way home to Louisiana.

Little Nose-to-Mouth Lines Can Be Massaged And "Smiled" Away

SOME people make the mistake of calling the droopy little lines that form from nose to mouth "laugh wrinkles." But these lines do not appear because we laugh too much—they often come because we do not smile enough.

In order to smooth away these droopy lines, it is necessary first of all to tone up the relaxed muscles by nature's own method—the smiling habit. By that I do not mean that you must go around with a grin on your face all the time, for you can learn to lift your mouth corners without smiling broadly. Practice making pleasant faces instead of sad ones.

I also want to tell you about a few simple massage movements that will accomplish wonders with the little nose-to-mouth lines. Of course your face must be perfectly clean before you begin, so with gentle upward motions spread cleansing cream all over your face and neck, and then wipe it off with fluffy cleansing tissues. After the cleansing cream has been removed, whisk little pads of cotton saturated with a slightly astringent skin tonic over your face. This will remove all traces of the cleansing cream.

Now for the droopy lines: Dip

your index and middle finger tips into tissue cream or skin food. If your skin is normal or inclined to be oily, use tissue cream, but if your face is dry, use skin food. And if your face is plump, even if your skin is dry, choose tissue cream, because it is non-fattening. Smooth the cream over your face, especially around your nose and mouth. Be careful not to press hard with your finger tips, and do not pull the skin.

Then when your face is well coated with cream, dip your finger tips into muscle oil. Placing the middle and index fingers of each hand at the corners of your upper lip, gently smooth outward toward your cheeks. Repeat these smoothing movements again and again—until the droopy places come alive, and you feel a real tendency to smile, and lift up those tired, lax muscles. As your finger tips stroke gently across these lines, smoothing them away gradually, the rich, slightly astringent muscle oil acts like hundreds of little fingers patting and smoothing your face. And the skin food or tissue cream softens your skin, and blends with your skin's natural oils.

If you take this treatment just before you go to bed, it is beneficial to leave the cream and oil on your skin all night, unless your skin is abnormally oily. But if you take this facial during the day, remove all the cream and oil by the same basic cleansing with which you started.

Tom Heflin has been given the contract to complete the Methodist church building at Carlsbad. Mr. Heflin will be on the job about three months before the building is finished.

Mrs. Julia Costello, of Bradford, Pennsylvania, who is here visiting her father, Frank Miller, and family, made the trip thru the Carlsbad Caverns Tuesday with Miss Virginia Egbert.

The E. A. Hannah family entertained with a house party for a week at their cabin in the Artesia-Sacramento camp. Besides the Hannah family the other members of the party were Mr. and Mrs. Fred Hinrichsen, and Prof. Kinehart and family, of Anaheim, California. They all returned to town last Wednesday.

Charles Horne came home Sunday from Oro Grande, where he had been on road work with his father, R. E. Horne. Charles is working on the co-operative plan of school work from State College, by which he is in school for six months and out in practical work six months. After a short visit at home he will return to the college.

Berry Watson, wife and two daughters arrived from Los Angeles Sunday evening and were the guests of Mr. and Mrs. Aubrey Watson until Monday. They came by way of Gallup, where they were joined by Finn Watson and wife. On Monday they all drove to Pecos, Texas where they had a family reunion this week and Mrs. Will Watson.

Mrs. Laura E. Kelley arrived last Friday and is spending the week here, guest of the Misses Ella and Mary Bauslin, and will visit the Caverns while here. Mrs. Kelley, who is a former resident has been on an extended trip east. She goes from here to Los Angeles to visit a sister and get her father, W. H. Drake, who will return with her to their home in Portland, Oregon.

Mrs. Julia Wiles and daughter, Miss Jo Ann and niece Miss Marjorie Bryan of Cushing, Oklahoma were overnight guests of the Tom Heflin family. Mrs. Wiles is a member of the faculty at Cottey College at Nevada, Misosuri, where Miss Lillian attended school last year. Yesterday the visitors accompanied by Miss Lillian Heflin made the trip thru the Carlsbad Caverns.

Most political candidates run at large after the election.

Men who use cigar and cigarette holders smoke via remote-control.

EDITORIAL SPOTLIGHT

TELEPHONE AIDS IN MANY WAYS—Lakeport (Cal.) Press. Telephone service is the greatest help the people of today bring to their attention matters of vital and urgent importance requiring immediate action. It was absolutely necessary, during a recent search for the four persons who were lost, that assistance be done by telephone. After the four had been located by telephone from the Upper Lake central office to the outside world was reached in less than two hours to inform relatives, newspapers, friends and others interested in the whereabouts of the missing party. Telephone aids police efficiency. Stolen cars are reported by questionable characters, or their owners, runaways and are all done by telephone. The close cooperation, courtesy and promptness of the telephone operators enable the public as well as officers to locate people in touch with them.

World's Largest Tire Coming Here Soon

At Left—Burgess Darrow, Manager of Goodyear's Development Dept., and R. S. Wilson, Vice-President in charge of sales, inspect the largest tire in the world, at Akron, Ohio; twelve feet high and four feet wide, just before it started its transcontinental tour.
 Below—World's largest tire and its especially constructed bus. The value of this tire is \$5,000.00. A prominent Aeronautical authority recently prophesied that tires of this size may be necessary for equipment of the aeroplanes of tomorrow.

The world's largest tire, 12 feet high and four feet wide, will pass through here soon on its coast-to-coast trip. The tire is bound for Los Angeles, where it will base for several months while operating in the west.
 Something of the size of the huge casing may be gained by the fact that the tire and wheel weigh approximately a ton. The tread alone weighs 600 pounds. The inner tube tips the scale at 125 pounds.
 This unique tire was built and is being operated by the Goodyear Tire & Rubber Company. The tire was built in line with the company policy of pioneering and research through which have come many of the most important developments in the tire industry.
 The giant All-Weather tread balloon required three months to build. Forty-five minutes are required to inflate to a pressure of three pounds. The diamond tread measures 16 inches in length and 10 inches in width.

George Frisch made a business trip to Roswell yesterday. His family accompanied him.
 Miss Emma Caraway, of Lovington, spent Sunday here with her home folks, Mr. and Mrs. Jack Hastie.
 Mrs. Howard Byrd is at Oro Grande this week with her parents, Mr. and Mrs. R. E. Horne, but is expected back the last of the week. Mrs. Horne is staying there for the present with Mr. Horne, who is in charge of construction work on the highway.
 Mr. and Mrs. Owen McClay returned Tuesday from a few days' visit to El Paso.
 Mr. and Mrs. Ray Cobb of Safford, Arizona, were guests of Mr. and Mrs. Rude Wilcox the first of the week.
 Mr. and Mrs. R. N. Eaton and Dr. and Mrs. Mann, all of Amarillo, Texas drove down Monday and went thru the Carlsbad Caverns. From there they went to the Artesia-Sacramento camp, where they expect to spend ten days or two weeks vacation.
 Mrs. R. L. Collins, of Hagerman, visited her parents, Mr. and Mrs. S. G. White, Tuesday.
 Mrs. J. D. Bewley and three sisters who are visiting her here drove over to Springer the last of the week to see her son, Knox Bewley.
 Paul E. Bugg, who has been employed in the mechanical department of the Advocate for the past five years, has resigned his position and left Sunday for Fulton, Kentucky, where he will make an extended visit with relatives before seeking another location.

**NOTICE OF PENDENCY OF SUIT
IN THE DISTRICT COURT
OF EDDY COUNTY
STATE OF NEW MEXICO**

LORENA CROUCH,
Plaintiff.
Vs.
MRS. MARY L. COBURN, MRS. GRACE M. WHITTMORE, FRANK COBURN, JULIA CLARK COBURN, MARY AGNES COLBY, AND THE UNKNOWN HEIRS OF JAMES M. COBURN DECEASED, AND ALL UNKNOWN PERSONS CLAIMING AN INTEREST OR TITLE ADVERSE TO PLAINTIFF.
Defendants.

STATE OF NEW MEXICO:
To Mrs. Mary L. Coburn, Mrs. Grace M. Whitmore, Frank Coburn, Julia Clark Coburn, Mary Agnes Colby, and the unknown heirs of James M. Coburn, deceased, and all unknown persons claiming an interest or title adverse to plaintiff,
GREETING:

You and each of you are hereby notified that a Civil Action is now pending in the District Court of Eddy County, New Mexico wherein Lorena Crouch is Plaintiff and you and each of you are the defendants, Cause Number 5022 on the Civil Docket of said Court; that the general nature and objects of said action are to quiet and set at rest the title of the Plaintiff in and to the following described real estate situated lying and being in the Town of Artesia, Eddy County, New Mexico:

Lots 12, 14, 16, 18 and 20, in Block 8; and Lots 2, 4, 6, 8, 10, and 12, in Block 15, all in the Original Town of Artesia, Eddy County, New Mexico.

and to bar and estop you and each of you from having or claiming any right, title or interest in or any lien upon said property adverse to the Plaintiff.

You and each of you are further notified that unless you enter your appearances in said cause on or before the 22 day of August, 1930, judgment will be taken against you by default as prayed for in Plaintiff's Complaint.

G. U. McCrary, whose Post Office address is Artesia, New Mexico is Attorney for Plaintiff.

WITNESS my hand and seal as Clerk of said Court this 8th day of July, 1930.
(SEAL)

THELMA T. LUSK,
30-4t County Clerk.

**NOTICE OF PUBLIC SALE BY
SPECIAL MASTER UNDER DECREE OF FORECLOSURE OF LIEN**

NOTICE IS HEREBY GIVEN that under and by virtue of the terms of a certain decree of foreclosure and sale entered June 23, 1930, in a cause pending in the District Court of Eddy County, New Mexico, wherein Big Jo Lumber Company, a corporation, is plaintiff, and the Pecos Valley Development & Engineering Company and others are defendants, which cause is No. 4921 on the Civil Docket of said court, the undersigned special master appointed by the court for the purposes of the sale hereinafter mentioned, and named in said decree, will, on Saturday, August 23, 1930, at 10:00 o'clock a. m., at the south front door of the Artesia Hotel in Artesia, N. M., offer at public sale, and sell to the highest bidder for cash, the property known as the Artesia Hotel in Artesia, N. M., and particularly described as Lots 2, 4, 6 and 8, in Block 6 of the Original Town of Artesia, Eddy County, New Mexico, together with all improvements thereon, said property to be sold free and clear of all liens or other encumbrances, except state and county taxes, and liens for principal and interest upon paving assessments, if any.

That said sale is upon final decree entered in suit to foreclose certain liens for materials and labor furnished in the erection and construction of the building upon said property, and that the preferred claims against property as secured by said liens and found by the court, amount to \$84,222, together with interest thereon at 6% per annum from December 1, 1929, and together with 10% attorney's fees thereon as allowed by the court, and that the general claims established against said property, and found by the court, amount to \$17,248.94, and the proceeds from said property, when said sale is approved by the court, will be distributed as provided in said decree.

NOTICE IS FURTHER GIVEN that under and by virtue of the provisions of said decree, said property shall be sold for not less than \$90,000, and the terms of said sale are that the successful bidder must deposit with the special master, at the time of said sale and when said property is struck off to him, cash or approved exchange for the sum of \$10,000, the balance to be paid upon confirmation of said sale by the court, and to be forfeited in case of failure of said successful bidder to complete said purchase and pay the balance of the purchase price.

Dated at Artesia, N. M., this 9th day of July, 1930.

CHARLES E. MANN,
30-4t Special Master.

NOTICE

The Lake Arthur Board of Education of School District No. 20, will let to the lowest and best bidder the following truck lines, on August 4th, 1930 at eight o'clock p. m.:
The line known as the County Line bus, the Walnut bus, the Buffalo Valley bus and the North Line bus. The Board reserves the right to accept, or reject any and all bids.
J. W. HAVEN,
30-4t Secretary.

NOTICE TO BIDDERS

Until Friday, August 8, 1930, the Board of Education, District 16, Artesia, New Mexico, will receive bids for the transportation of school children to Artesia.

Bids will be considered in accordance with the map of the route on file in the office of Superintendent of Schools.

All bids should be sent to Mrs. Lina A. Manda, Secretary of the Board of Education.

The Board reserves the right to reject any and all bids.

BOARD OF EDUCATION,
Artesia Municipal School Dist. No. 16, Eddy County, New Mexico.
By LINA A. MANDA, Secretary.

IN THE DISTRICT COURT
OF EDDY COUNTY
NEW MEXICO**

J. M. JACKSON and J. H. JACKSON,
Plaintiffs,
Vs.

J. M. RADFORD GROCERY COMPANY, a Corporation, Defendant impleaded with the following named defendants against whom substituted service is hereby sought to be obtained, to-wit: KATHERINE HALSEY, formerly known as Nannie Fletcher, if living but if dead all his unknown heirs, G. C. JENSEN if living but if dead all his unknown heirs, the AETNA BUILDING ASSOCIATION, a Corporation, and all unknown persons who may claim any lien, interest, or title adverse to the plaintiffs, Defendants.
No. 5024.

STATE OF NEW MEXICO:

To Katherine Halsey, formerly known as Nannie Fletcher, if living but if dead all her unknown heirs, G. C. Jensen, if living but if dead all his unknown heirs, and all unknown persons who may claim any claim, interest or title adverse to plaintiffs,
GREETING:

You and each of you are hereby notified that a Civil Action is now pending in the District Court of Eddy County, New Mexico wherein J. M. Jackson and J. H. Jackson are plaintiffs, and you and each of you are the defendants, Cause No. 5024 on the Civil Docket of said district court; that the general nature and object of said action are to quiet and set at rest the title of the plaintiffs in and to the following described real estate, premises, interest in artesian well, and ditch right of way situated, lying and being in the County of Eddy, State of New Mexico and more particularly described as follows, to-wit:

The Southeast quarter of the Southeast quarter (SE $\frac{1}{4}$ SE $\frac{1}{4}$) of Section Twenty-one (21), Township Seventeen (17) South, Range Twenty-six (26) East, N. M. P. M., containing 40 acres, as per U. S. Government Survey and also a 1-7 interest in and to an artesian well located on the northeast quarter of the north-west quarter of Section 28, Township 17 South, and Range 26 East and of the water flowing therefrom and contained therein and also an easement or ditch right of way through which to convey the said water to the said SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Sec. 21, Twp. 17-S., and Range 26 East, beginning at the said well thence north 70 feet; thence south 75 degrees and 30 minutes, east 475 feet to a point 41 feet north of the southeast corner of the northeast quarter of the northwest quarter of Sec. 28; thence east and parallel to the south line of the Northwest quarter of the Northeast quarter of Section 28, to a point 41 feet north and 600 feet west of the southeast corner of the northeast quarter of the north-east quarter of Section 28; thence in a northeasterly direction to a point 61 feet west of and 610 feet north of the southeast corner of the southwest quarter of the southeast quarter of section 21; thence east to a point 8 feet east and 45 feet north of the southwest corner of the southeast quarter of the southeast quarter of section 21, this being the land onto which water is intended to be used,

and to bar and estop you and each of you from having or claiming any right, title or interest in or any lien upon or against said property adverse to the plaintiffs.

You and each of you are further notified that unless you enter your appearance in said cause at the Court House in Carlsbad, New Mexico on or before Monday, September 15, 1930 judgment will be rendered against you by default as prayed for in plaintiffs' complaint.
You are further notified that J.

H. Jackson, whose postoffice address is Artesia, New Mexico, is attorney for plaintiffs.

WITNESS my hand and seal as Clerk of said Court this the 12th day of July, 1930.

**H. C. KEISER GETS A
PATENT ON PIPE
HANDLING APARATUS**

WASHINGTON, D. C.—The United States Patent Office has just granted to Herman Charles Keiser, of Artesia, a patent on pipe handling apparatus.

Clarence A. O'Brien, local patent attorney explains that this new invention is an improved attachment for a conventional loader and caterpillar which facilitates the handling of pipes in a reliable manner without the danger of injury in any way. Mr. O'Brien says that the apparatus is easy to engage and disengage in respect to the pipe; that it is inexpensive to manufacture, is strong and durable.

LAKE ARTHUR ITEMS
Mrs. Ned Hedges, Reporter

Baker Flowers visited his home folks over the week end.

Rev. Jones is holding a revival meeting in Dayton this week.

E. L. Selby of Las Cruces has been in Lake Arthur this week on business.

Rev. and Mrs. Jones drove to Las Vegas Tuesday to get their daughter, Miss Myrtle, who has been attending summer school there.

Miss Thula Harvey who returned to her home a few weeks after her mother's death, has been called back to attend her father who has been bedfast for several weeks.

Word has been received by Mrs. J. E. Gromo that an 8 pound son had been born to Mr. and Mrs. Fred Lemon of Las Cruces. Mrs. Lemon and baby are in the hospital in El Paso and doing well.

Mr. and Mrs. E. C. Jackson have as house guests this week Mrs. Jackson's sister, niece and nephew of Tulsa, Oklahoma. The Jacksons and their company are sight seeing, making the mountain trip and seeing the Carlsbad Caverns.

Mr. and Mrs. W. A. Hams arrived from Jackson, Mississippi on Wednesday morning. They were accompanied by Mr. and Mrs. S. W. Brister of Jackson who are going to tour our state then return to their home in Jackson.

The tent meeting conducted by Rev. Alfred Whitely is attracting large crowds. Rev. Whitely, is assisted in presenting the Pentecostal faith by Rev. Homer Coberly. Mesdames Whitely and Coberly are assisting in the excellent song service.

Mrs. W. W. Walden entertained the ladies of the Sew and So club last Thursday to an all day quilting. Mrs. Walden's quilt is the Irish chain made famous by Mrs. Hoover and is lovely. A fried chicken dinner was served at noon. The next meeting place has not been definitely decided.

MILLIONS OF FISH SAVED
BY WET HANDS

Millions of small fish may be saved this summer to grow into large fish if anglers will follow one simple rule—wet the hands thoroughly when taking little fish off the hook preparatory to releasing them back to the waters, Carlos Avery, president of the American Game Protective Association, said. "Of course the small fish should be handled gently and released under water, not thrown back. A dry hand disturbs the protective film of the fish. If this is broken, fungi attaches to the body of the fish and eventually kills it. Thousands of anglers that have been wetting their hands declare that millions of small fish have already been saved by this practice," Mr. Avery declared.

Since the use of automatic tele-instruments a lot of tick inspectors have been thrown out of work.

Impartial and the display of jars absolutely uniform, contestants are required to submit their entries in standard glass jars of the quart size. A sample Ball mason jar and carton together with prize entry labels for use in sending entries may be had without cost by writing the National Canning Contest, Shenandoah, Iowa.

WHY
Many Are Forced to Appeal to Public Charity

Unemployment and sickness were found to be the main causes of breakdown in income among 1,000 families who applied for help to certain Boston family-relief agencies, according to the report of a study made by Boston social workers and graduate students of Simmons college. In three-fourths of the families sickness was either the main or an important contributory cause, and over half the families gave unemployment or under-employment as a reason for their dependency.

Eighty out of every 100 families had dependent children, with an average of over three to a family. Sickness was reported among the children of nearly two-fifths of these families, the greatest amount being among the younger children in families where the mothers were employed outside the home where both parents were not present, and especially among children of illegitimate birth.

Why Eyes of Cat Are Luminous in Darkness

The luminous appearance of a cat's eyes in the dark is due to the reflection of light by the tapetum lucidum, which is part of the membranous layer between the retina and the outer covering of the pupils of the eyes. This remarkable organ is differentiated from the choroid coat only in certain animals. It is the tapetum lucidum that enables members of the feline family and other nocturnal animals to see even when there is very little light.

Some authorities believe that this layer reflects the light rays through the retina a second time. In cats the tapetum lucidum is brilliant green or blue in color and has a metallic luster. The characteristic glare is especially noticeable when artificial light is thrown on a cat in a dark corner, or when a cat in a dark place is observed through an opening. Light from the opening is reflected from the cat's eyes as from a mirror.—Exchange.

Why Man Is Religious

Man has had religions because he has had religious experiences. Even the gambler with his string of hunches knows that something is coming over the wires, an amazingly accurate information about something that hasn't yet happened. It is, in its local way, a bit of prophecy. Many an inventor has been unable to solve his problem until the lightning of some intuition struck him, and how well he knew he hadn't solved the problem by himself! And there are countless other examples.

That is why religion always has appealed to faith, and discarded reason. It is as much as said: "You know; therefore believe."—James Oppenheim in The Thinker.

Why the Term "Italics"

Those of us who have a flare for the erudite—and who of us has not—will be intrigued by the story of the word, "Italics," when we recognize as a reference to a sort of script printing. The type which we know as "Italics" was invented over 400 years ago by Aldus Manutius. But why, you are ready to inquire, is it called "Italics?" The answer is interesting—and simple. In those days, everything new was immediately dedicated to something or somebody. And so, in conformity with the custom of the day, when Manutius invented his new style of type, he dedicated it to the states of Italy. After which it became known as "Italics."—Kansas City Star.

Patient (to dentist)—"I think you could have gotten my tooth out easier than that. I could move it about with my two fingers."
Dentist—"Yes, and you could move a cow's tail with one finger."

HIGH POSTAL RATES ON FIRST CLASS MADE NOW BEING ADVOCATED

WASHINGTON, D. C.—Convinced that an increase in postage rates is the only feasible way of lifting the world's biggest public utility "out of the red," postal officials are preparing to press their advocacy of a higher charge for carrying first class mail.

Postmaster General Brown submits his annual report to congress in December, the enactment of legislation authorizing the increase is to be his most urgent recommendation. The postmaster believes a rate of 2½ cents an ounce on first class mail would balance the department's budget for the present.

Assistant Postmaster General Tilton, generally regarded as the financial expert of the department, said Friday that an increase in the rate on letter mail is the only solution of the deficit problem.

Last year's postal deficit amounted to \$65,000,000. Tilton estimates that it will run over \$60,000,000 this year. The present loss in handling the mails is now a charge against the general funds of the treasury. Brown and Tilton are of the opinion that the post office department as a public utility should be self-supporting the cost of operation to be borne by those it serves rather than the tax paying public.

Everything Hazy!

Ever hear people say it? Maybe you have experienced the sensation yourself.

Have your eyes examined—that is nature's warning. Those eyes need help, and you can get that help.

Consult a competent Optometrist. He can tell by an examination just the proper glasses to give you. He can push those clouds away and let in the sunshine.

CHRYSLER SIX

4-DOOR ROYAL SEDAN \$845

**A Chrysler for Performance—
and a Chrysler for Value**

In this low-priced Six, Chrysler offers engineering developments that only a Chrysler can possess, and performance only a Chrysler can boast.

Here is another striking example of the fact that Chrysler performance is far ahead of conventional performance.

Chrysler speed, Chrysler pick-up, Chrysler smoothness, Chrysler flexibility, are things you can know and enjoy only in a Chrysler.

For only a Chrysler has the features, and combinations of features, that give this low-priced Chrysler Six its drilling ability on the road.

Compare the new Chrysler Six with all other cars near its price in performance, in beauty, in comfort, in everything that contributes to value.

The answer is inevitable. Nothing within hundreds of dollars of the price can compare in value.

NEW CHRYSLER SIX PRICES

ASTOUNDING FREAK OF NATURE WILL BE COMMERCIALIZED SOON

DENVER, Colorado — Commercial development of one of the most astounding freaks of nature that the oil industry has ever uncovered—the famous "ice cream wells"—is planned for the immediate future, according to announcement by officials of the oil company.

The "ice cream wells" Sherman No. 1 and Sherman No. 2, are located in North Park County, Colorado, near Walden, and each produces a tremendous volume of 98 per cent pure carbon dioxide gas, which in solidified form is the product known commercially as dry ice. The temperature of the gas as it comes from the wells is around 135 degrees below zero, and the crude oil comes out frozen, and resembling lemon sherbet in appearance. When the wells were drilled in fingers of the drillers were frozen, and pipelines and flow tanks were coated with ice, even during the hottest summer weather.

Under the development plan announced, a new corporation will be formed to be controlled jointly by Continental Oil Company and the Dry Ice Corporation of New York, and if preliminary experiments now under way are satisfactory, a plant capable of producing 60 tons of dry ice daily will be built at Walden.

Dry ice is a comparatively recent invention, used for refrigerating perishable products in transit, for preventing the melting of ice cream in small packages, and in preserving other food products. Under proper conditions a pound of it will do the work of about 16 pounds of ordinary ice, and when it "melts" the solid material passes off as a gas, leaving absolutely no water or other residue.

It has been manufactured for commercial purposes chiefly by burning coke in blast furnaces, and this marks the first time that carbon dioxide gas—the same gas that causes the bread to rise or the bottle soda to bubble—has been taken from nature and utilized in its natural state for refrigerating purposes.

CORN GOOD TRAP CROP FOR COTTON BOOLWORM

Two plans are suggested for the planting and arrangement of trap crops to protect cotton against cotton bollworm infestation says Dr. J. R. Eyer of the New Mexico Agricultural College.

The first plan is interplanting in the cotton fields and consists of leaving belts from ten to forty feet wide across the field at the time the cotton is planted and planting this space with Mexican June corn. Part of these strips might be reserved for planting about ten days later with cowpeas or a second planting of corn, thus furnishing more attractive places for a longer period for the bollworm moths, which will concentrate in the trap rows in great numbers. Another way of accomplishing the same thing is to plant corn along the borders which, in irrigated fields, are ordinarily thirty to forty feet apart. This is often done by hand and probably should be done a few weeks after the cotton is planted in order to be more attractive to the bollworm moths.

The second system is to plant one-fourth to one-half acre patches of Mexican June corn or cowpeas at one-quarter mile intervals over the plantation, following such crops as small grains or truck crops, such as small bage. This has some advantage over the first plan as the larger areas of corn appear to permit less egg laying on the adjacent cotton than where narrow strips are used and, in addition, the land is more fully utilized. As far as possible, the trap crop fields should be located between the early corn and the cotton.

Both systems provide a trap crop for the bollworm and often make possible a good yield of corn or a crop of cowpeas which is valuable as green manure or feed and forage. While any variety of corn may be used, the Mexican June is more desirable in the southwest, on account of its later and higher yield of grain and forage.

"Are your eggs fresh?"
"Lady, the hen don't know I've got them yet."

Cold Milk

We deliver your milk fresh and cold at your door. If our customers will transfer the milk to the ice box immediately after delivery, the milk will remain cold and wholesome.

Things WORTH KNOWING

Young pullets are very sensitive and need regular treatment and careful handling. Free range on clean soil and plenty of green feed and shade are essential to growth. Avoid disturbing pullets or moving them to new quarters in the growing season.

The addition of lime to lead-arsenate sprays for apple trees will prevent arsenical injury when the fruit is washed. If abundant fresh water is not available for rinsing injury from soluble arsenic can be avoided by a lime-water rinse.

Studies of the grade and staple of American cotton by the U. S. Bureau of Agricultural Economics show that cotton growers produce too much short staple cotton which must compete with foreign short staple cotton. There is good mill demand for cotton around one inch in staple, says the bureau.

Medicated salts are of no value whatever in protecting livestock against flies, says the U. S. Bureau of Entomology. Some of these salts—most of them containing sulphur and common salt—have been put on the market with the claim that they will protect stock from flies.

Pasture is valuable for hogs but for best results should not be grazed too closely. Put in any one lot only as many hogs as can get abundant feed. Ordinarily an acre will furnish pasture for from 5 to 15 hogs averaging 100 pounds. It is a good plan to have two pastures and alternate them; then they can be grazed fairly close and will still provide good succulent feed. Pasture crops that are allowed to mature do not furnish good feed for hogs.

It is always preferable to build a concrete floor where the soil drainage is good, but if this is impracticable, a porous sub-base or cushion of cinders, sand or fine gravel should be laid. This will prevent heaving caused by frost and unequal settling when the ground is wet. When a sub-base is placed on stiff clay soils, drainage outlets should be installed to carry off any water which may collect under the floor and cause injury by freezing.

Bordeaux mixture is best for the control of most leaf diseases of garden plants. It always wards off flea beetles. It is better to spray with Bordeaux before rather than after rains, provided the spray has time to dry on the leaves. Intervals between applications depend on the weather. Spray more often if it is rainy or muggy, with fogs and heavy dews, which are favorable to the development of diseases. If the weather is dry, allow longer intervals between sprays.

"Brederin', we'se got to do sumin' to remedy de status quo."
"Parson, what am de 'status quo'?"
"Dat, my brudder, is de Latin for de mess we'se in."

LOCALS

Elza White, Jr., was in town from Roswell Sunday.

F. G. Hartell returned yesterday from a short business trip to Hobbs.

W. C. Martin and family spent the week end at their cabin in the Artesia-Sacramento camp.

John Hogins returned last Thursday from the Citizen's Military Training Camp at Ft. Bliss, Texas.

The Misses Opal Martin and Vesta Frisch drove up to Elk Sunday for a short visit with Mrs. Bernard Cleve.

Mr. and Mrs. G. G. Taylor, of Amarillo, Texas, were here several days last week, guests of Mr. and Mrs. R. W. Dunn.

Mr. and Mrs. Charles Morgan and children are expected home Sunday from a two weeks' visit to Denver and points in Wyoming.

Mr. and Mrs. F. E. Little were here from Carlsbad Monday visiting their son, E. J. (Hot Shot) Little, manager of the McAdoo Drug Co.

Among Artesians who spent the week end at Artesia-Sacramento camp were L. P. Evans, C. E. Mann, E. N. Bigler, Fred Cole and C. M. Cole.

Bert Muncy went up to Ruidoso and brought his family home Monday. They had been spending a week there attending the Baptist encampment.

Miss Aline Rowan, who teaches in Los Angeles, arrived home Tuesday for a summer visit. Her parents, Mr. and Mrs. Beecher Rowan drove to Roswell to meet her.

R. G. Knoedler and family drove to Carlsbad Caverns Sunday with Miss Reva Knoedler of Illinois, who took the trip through the big caves in company with Charles Mac Knoedler.

Mrs. Z. B. Moon and sister, Mrs. J. H. Myrick and their house guests, Mr. and Mrs. George Kidd of Texas, went up to the Ruidoso last Friday and are staying in the Beasley cabin.

John Yates and sons, Joe and Tyre, and Harry Reid, who have been here for the past two weeks visiting Martin Yates and Harvey Yates, left Sunday for their homes in Missouri.

Mesdames R. D. Compton, Wm. Compton and Beecher Rowan and Miss Louise Compton motored to Roswell Friday and Mrs. Ferris Arnold accompanied them for a few days' visit with home folks.

Mr. and Mrs. C. O. Brown left Monday for Clarksdale, Arizona, to see their son, C. O. Jr., who was to have a mastoid operation. From there they expect to go on to California, being absent about two weeks.

Mr. and Mrs. Mayo Alexander and daughters, the Misses Dorothy and Thelma, arrived Monday for a visit with Mr. and Mrs. C. Bert Smith, also with Mrs. Alexander's brother-in-law, Joe Jesse and family.

HEALTH NEWS

The Eddy county health department has been urging that drinking glasses at soda fountains and restaurants be sterilized and that the common drinking cup in business houses be abolished. It has recently been proven that trench mouth, syphilis, scarlet fever and tuberculosis and other such diseases are transmitted by soiled glasses. We think the public should demand of all public eating houses a sterile glass. To quote from the recent bulletin of the New Haven Department of Health:

"Recently in New Haven discussion of prohibition has given way for a little to the safety of the glass or container that serves the drinks at the soda fountains, in the lunchrooms and at the restaurants. The question has not only arisen as to cleanliness but as to hazards from disease, particularly trench mouth. While there is a possibility of spread of communicable diseases such as trench mouth, syphilis, scarlet fever, and tuberculosis from mouth to mouth by way of the drinking cup, it is important just from the standpoint of common decency and cleanliness that the cup or glass that touches the mouth be free from germs and secretions of others and unsoiled by food or other material."

Hot water dashed over dishes will not sterilize them. They should be submerged in a chlorine solution, or sterilized with steam pressure, or boiled.

We hope that the public will be responsive to publicity—warnings issued through the newspapers. Public cooperation will clean up many objectionable conditions.

SINBAD THE SAILOR

Sinbad traveled many seas and each trip took many months. The modern traveler makes quick round trips at low cost wherever he wishes, by telephone. The Long Distance operator will be glad to tell you the rate to any particular point.

ANOTHER VICTORY

FOR THIS REGULAR STOCK MOTOR OIL

CLOSE ON THE HEELS OF ITS ACCOMPLISHMENT AT INDIANAPOLIS MAY 30, CONOCO WINS 3RD, 4TH, AND 5TH PLACE AT ALTOONA AT BETTER THAN ONE HUNDRED MILES PER HOUR

Frank Farmer, in a Miller Special, "placed" third with an average speed of 102.2 miles per hour. "Shorty" Cantlon, in a Miller-Schofield Special, was fourth with 101.5 miles per hour. "Speed" Gardner was fifth in a Miller Front Drive Special. All three used CONOCO Germ-Processed Motor Oil in this convincing demonstration of the qualities of this regular "stock" motor oil. At Altoona, as at Indianapolis, this was the first time that a stock oil had placed so high in the finish of the race.

Indianapolis race: after they had observed its full body and good color as it came from Dave Evans' motor, the word went out that CONOCO Germ-Processed Motor Oil had displayed the qualities necessary to solve the lubrication problems of racing motors. CONOCO had earned the respect of this most skeptical group—and earned it fairly.

In view of the Indianapolis results, it was only natural for a majority of the drivers at Altoona to choose CONOCO Germ-Processed Motor Oil for America's fastest competitive race.

Germ-Processed Oil, close on the heels of the Indianapolis race, won with the same Germ-Processed oil you can buy at the Triangle station.

These CONOCO victories have a definite meaning to every driver of a car. They show every claim that was made when the oil was introduced in November.

You can experience the economy of this oil by stopping at the next Red Triangle Station and asking for

The story of the Altoona race cannot be told without reference to the accomplishment of CONOCO Germ-Processed Motor Oil at Indianapolis. For it was in that 500-mile classic that the stamina of this new oil was impressed on the racing fraternity. After observers had seen the oil at the close of the

UP THE YANGSTZE RIVER IN OLD CHINA LAND

Lieutenant B. F. Kaiser, son of Mr. and Mrs. B. F. Kaiser of the Dayton community, with the 4th regiment U. S. M. C., has written us a detailed account of his trip up the Yangtze river in China, which will no doubt be of interest to many of our readers. Because of the length of the article, we have found it necessary to run it in five or six installments. The article was written from impressions gained by Mr. Kaiser during his two and a half years in China:

(Continued from last week)

The Yangtze Gorge

The chug-chug of the engines awoke us the following morning. We arose to find the Mei sha entering Ichang gorge. Rock walls rose almost precipitously out of the water for some hundreds of feet. The wide easy flowing river had narrowed to a bare 150 or 200 yards in places. In these places, it was racing like a mill-race, rolling and pitching, high toward the center, lower along the edges, but whirling and dangerous. Wherever and obstruction marred its easy passage along the edges, it beat hard and savagely against the rocks, shooting foam and spray high against the impinging cliffs. Always beneath these places, a sweeping backwash formed a series of whirlpools which looked sinister and treacherous. Some of them were large enough to pull under small boats and I do not doubt that many people have lost their lives in this manner. It was raining steadily and low floating clouds dimmed and at times obscured completely the upper outline of the walls of the gorge. The river follows a devious course through this mountain range. Ichang gorge is fifteen miles and is the first of a series of gorges which as a whole are known as the Yangtze gorge. At about 9:00 o'clock, we came to our first rapids. They differed little from a half dozen places we had already passed, except that the mucky red water came pitching, shooting past a little faster, and the backwash, the boiling areas, and the whirlpools looked a little more formidable. We steamed up to sixteen knots but still the old tanker slowed down to a bare crawl and shivered as she cut her way up against a bow-wash that was sweeping the forecastle and spraying the rest of the ship.

Along the waters edge was a pathetic remainder of the past and also the present. I say, of the present, because a large percentage of the shipping through the gorge is still carried by junks. A dozen or more coolies were bent over straining and tugging on a long bamboo rope which was secured to the top of the mast of a small junk a short distance down stream. About half of the coolies were wearing jackets, the remainder were naked. They were making headway but at a discouragingly slow rate, picking their way around boulders, up and down, over sharp crags, steep inclines and projecting ledges. Where the rock walls became precipitous, they crawled on hands and knees along passages which were barely wide enough for a single file line of men to crawl upon. These narrow shelf passages have been hewn out of solid rock face of the cliff. These coolies work for a wage which does not exceed four dollars per month, that is in Chinese currency, which in U. S. currency amounts to about five cents per day. For thousands of years the shipping on the upper Yangtze has been carried on in this fashion. The fact that there was not even a decent pathway for these people to tread upon, struck me as an outstanding monument to the backwardness of the Chinese race. Captain Mender explained however, that the vertical rise and fall of the river in some places exceeds 180 feet, thus it would be a stupendous project to provide satisfactory pathways throughout such a range of river levels.

We soon passed out of Ichang gorge but the country remained rugged. The river banks receded from the waters edge usually at a climbable gradient, rising, I would estimate, from one to three thousand feet. Wherever any soil had collected, the hillsides were terraced and farmed. Clouds were lying along and beneath the summit and little shining rivulets were streaking the mountainside.

The chief farm crop seemed to be grain, a variety resembling red cane. At some places there were not more than a dozen stalks in one patch. A vined crop was also quite extensively cultivated which I believe were yams. There were also quite a few wood oil trees. The best paying crop in this province is poppies from which they secure opium, but as it is against the law to raise that plant, it must be farmed back of the hills and out of sight of the roadways or from the river.

That afternoon we entered Wushan gorge. This gorge was not so impressive as the first but was quite interesting to me due to the bare ever-changing rock formations. You could easily point out the crest of anticlines and the low points of synclines and make close approximations as to the height of the mountains before being worn down. I believe that these mountains are very

old, though comparatively, the river has probably not been there very long. We climbed the Wushan rapids before sundown and anchored in a little inlet close by a town of the same name at about 5:00 p. m. The water where we were anchored was a clear blue in color and made a striking contrast when it struck the every muddy red waters of the Yangtze.

At dinner we met the other two foreign members of the crew, Mr. Sole, the 1st mate, was a native of Latvia, one of the little Baltic provinces which declared her independence at the fall of Russia. The people are largely descendants of one of the mongol races which overran eastern Europe near the 12th century. Mr. Sole was short and bulky of build with dark skin and brown eyes. He moved slowly and contentedly, ever smoking a pipe, and ever congenial when spoken to. Upon acquaintance, we found him to be the plugging type, mild tempered and with a mind which worked slow but direct. The chief engineer was a grey headed old German. He was rather timid and shy of strangers and we heard very little from him until we arrived at Chungking. At Chungking, consequent to a few glasses of beer in the evenings, he became quite talkative and interesting, also quite jolly and with an appreciative sense of humor. Mr. Rueter was as a rule quiet and retiring. We found him to be a kind hearted old man. These men habitually spoke English to one another. This struck me as interesting because they could all three speak both German and Russian.

We were underway by daybreak the following morning and by eight o'clock we entered Windbox gorge. For the next few miles this huge river is almost boxed in by vertical walls of rock running up hundreds of feet in places. Wherever ravines have cut their way to the river and opened up a view in back we could see the deep blue outline of higher mountains in the background.

In Windbox gorge, there were lots of twisted rock formations and not a few indications of mineral rock. We passed out-croppings of coal here as at several other times during the day. The natives dabble with it a little but the real resources are but barely scratched. At places along we passed seapages of oil from rock crevices along the bluff and in some places the whole face of the bluff seemed to be seeping oil. We could smell it from the middle of the river. Here we were carrying oil to these people which came from California, 8,000 miles away while they undoubtedly have great stores of it in this vicinity. Sometime in the not distant future the tables will probably be reversed and we will be importing oil from these backward districts which now form for us a market for our own over-production.

That afternoon I noticed that at various places along, coal was being piled in little piles along the water's edge. Captain Mender explained that at various places along, the natives have found that the river bed is underlaid with salt beds. When the river get low they dig wells from the river bed and bail out salt water which is evaporated for salt. Those coal piles were for heating purposes to be used in their crude evaporation plants. Salt is a very expensive article in China. All sources of salt are controlled and heavily taxed by the government which secures a large portion of its revenue in this manner and the salt tax is sometimes used as collateral when floating loans in foreign countries.

We anchored that evening near the city of Wansien. It is a large city but very few foreigners live there. There is a small Socony installation just below the city. As soon as we had anchored the manager came aboard. In conventional English fashion, he was dressed in shorts, sported a walking stick, and was trailed by a brown lop-eared dog. In appearance, however, he did not look English. I believe that he is Swiss. He was introduced to us as Lawrence. He was middle aged, lean tanned, and athletic, with deep brown eyes. His dog had eyes of identically the same color and was a profusely friendly hound. Lawrence was inclined to be quite talkative and been a kind of soldier of fortune. For a year he had been an officer in the Chinese army. He related an incident which occurred during this tour of service which throws some light on Chinese characteristics. He had been sent to Shanghai to inspect a shipment of rifles. His approval meant the acceptance of the rifles by the Chinese government. The evening before he was to inspect the lot, he received a call from a well-dressed Chinese business man and was offered \$50,000.00 or \$500 per rifle if he would O. K. the shipment. The following day upon examination, he found the rifles to be rusted, worn out pieces that had been salvaged from the battlefields of Manchuria after the Russo-Japanese war. At no place in the world is the graft or squeeze system so highly developed and so interwoven into the national life as in China. The system operates from the highest government officials who in spite of their dignity and solemnity or bearing

and their unwavering and decorous statesmanship still cannot resist the acceptance of large sums of money from subsidiary office seekers thus compromising their position and always putting their pocketbooks ahead of their interest for the country. The system operates down to the most hideous beggar in the streets who must pay a certain percentage of their meager earnings to a number 1 beggar who is boss in that area, and also he must pay something to the Chinese policeman who patrols that beat. So well organized are these beggar guilds, that in Shanghai, I have tried without success to give to a beggar who was passing en route to his assigned district.

The following morning it was raining a steady downpour and we were favored with many waterfalls as streams of all sizes came dashing and splashing down the mountain side.

We saw very few regular up-river junks in this section of the gorge. The ones we saw along here were longer and narrower, with more trim, graceful lines. They are propelled by sail, by oar or by both. The oarsmen are placed forward, the afterportion being used for passengers and cargo. You may see as high as a dozen pair of oarsmen and I would estimate as high as thirty passengers. A thatched overhead protects the passengers from the elements. The coolies in this region wear black dirty turbans for head gear, similar to that worn by the natives of India.

At four o'clock we came to the Fomentan rapids, at high water the most powerful rapids in the gorge, and not attempted when the water stands higher than sixty feet above mean low water level. It stood about fifty feet this day. It was a splendid spectacle, high, rolling, and pitching near the center, and with great upheavals, backwashes and whirlpools on either edge. We put on extra full speed, all that the engines could do and yet it seemed that we were standing still, but by edging from one short to the other, where the current was not so strong we went up and over.

At dark we anchored at the city of Fouchow. We had no sooner anchored than a swarm of sampans and small junks came alongside, apparently fighting and quarreling among themselves for a favorable position. For an hour or so they clung around like vultures, bartering with the Chinese members of the crew for smuggled merchandise. Quite a quantity of merchandise finds its way up the Yangtze in this manner. It is known as pigeon cargo and is carried unavoidably by all vessels operating on the Yangtze with native crews. Like the squeeze system, it is a custom which has grown up and been passed down through many years, perhaps for ages, and is in such perfect keeping with the sly oriental nature that it will persist so long as there remain Chinese women to give birth to Chinamen. Pigeon cargo may consist of passengers as well as merchandise. Cigarettes seemed to constitute the chief article handled this night. By smuggling tobacco up the river in this manner a series of high taxes are avoided. The war lords or tupans in power in this district levy almost unbearable taxes on the people and everything that they buy. The money collected in this manner, for the greater part goes into the pockets of the in-

dividual war lord in power or his appointees. They in turn often put it in foreign banks or invest it in foreign concessions where it will be out of reach of higher Chinese authorities or of the next power to come along strong enough to oust them from their lucrative position.

During the past two days, it had become noticeable that quite a large percentage of the people whom we saw were of a sallow, yellow complexion. Upon inquiry, I found that it was due to the wide use of opium throughout this province. Opium is produced in this region and the habit is probably no more expensive than is the use of tobacco. It is produced here in a very crude form intermixed with dirt and foreign matter and its effect is not so potent nor so harmful as is generally believed. I understand that it can be either chewed or smoked. I have never seen it chewed, but I have visited opium dens in Shanghai and watched them smoke it. In these places they cook highly diluted with a soupy substance. This soupy mixture is placed in small cans and seeps through a wick where it is burned over an oil lamp. Holes connect the wick to a bamboo pipe about fifteen inches long to which can and all are attached. The Chinaman draws on this pipe during the interval that the wick is held over the lamp and the fumes are emitted.

The following day, the hillsides became more fertile and were more wooded. There were quite a large number of orange trees along here. During the afternoon the water became as smooth as glass in spite of the current and the nearby hills were reflected to us, sometimes with a pagoda on their summit. All in all it made a wonderful picture against the blue haze of the wooded mountains in the background. The people in this region seemed to be more religious than in the other sections we had been through, as there was an assortment of shrines along. These shrines were usually quite near the water's edge. At two places there were large gold lacquered buddhas. (Continued next week)

BLAST FATALLY INJURES ROSWELL YOUTH SAT.

Carter Austin Crile, nine year old son of Herman Crile, of Roswell, and grandson of Dr. Austin D. Crile state land commissioner, was fatally injured at Roswell Saturday morning in an explosion of blasting powder. A truck carrying the powder had left the road just north of Roswell near the Crile home and had spilled some of the powder on the road. Carter and his brother, Herman, Jr., 11 years old were riding horseback. They were attracted to the scene and in an unknown way an explosion was caused. Both boys were burned, Carter fatally, Herman suffered minor burns.
