That 'Teen Canteen

THE TEEN CANTEEN for boys and girls of Artesia is just as far away today as it was a year age

Efforts to crystalize the movement; to get it started; and to really do something about it have failed. At least they have failed to all appearances

And those boys and girls, who have said they will raise the funds; get the movement going; and really carry out the project with the proper encouragement, counseling, advice and sponsorship of the adults, are still watching for us to do something about it.

They are now asking us, and rightfully so, if we are sincere when we say we are interested in them; their programs; their entertainments; their surroundings; their environments and their conduct.

They have a right to ask us if we are sincere when we say we want them to have some place to the memory of those who are gone than on Mego that is theirs and when we say we want them to have a program.

We honestly believe we are sincere about it We honestly believe we do want them to have a well rounded program; a place to meet; to entertain; to have a good time. We believe that we have merely failed to show this interest in the way, which counts.

We believe that the movement can be started but it is going to be a movement in which the entire community is going to have to participate. We believe it is going to require workers, leaders and representatives from all of the clubs and organizations as well as all of the administrative bodies.

We are firmly convinced if two representacommerce, the veterans organizations, the civic clubs, Rotary, Lions, 20-30, Kiwanis, the Woman's club, and the other groups such as the Legion Auxiliary, the various lodges, men's and women's groups, that the movement could be started.

going to continue to have the world then we better include our own nation too. A few million spent at home in the final analysis isn't going to matter when we insist on giving away billions overseas. And we are far more apt to get back the

millions, either in returns or in taxes, than we are ever to get the billions we are spending apparently to save people we are firmly convinced don't want to be saved. If Russia were to begin paying back what she

owes American under lend-lease, she wouldn't have much money to spend for arms to create the threat of another world war. No, we feel sure it is about time America

adopts a "Cash and Carry" policy regarding her loans-the same plan she follows when she loans to her own people .-- O.E.P.

Memory For All

MEMORIAL DAY is one with which many as-sociate only the dead of the armed services in time of war.

of We are not familiar with the entire history expenses and the smoke screen but horses, cattle, lions. Between the States-took it upon themselves as a body to decorate the graves of their former comrades. Hence the term so frequently used, Decoration Day.

But Memorial Day has come to be far more than Decoration Day, a day on which the honored dead of the military services are decorated. It should be a day of memory for all loved ones, whether their graves are handy so they can be decorated, or far away, visible only in the mind's

It is well for veterans' groups to take the lead in observation of Memorial Day, for they are organized and have worked out rituals, which fit not only the honoring of their own, but of all beloved dead as well.

When they have their special services, perhaps they mention the name of one fallen hero, the hero for whom the group is named. But they intend at that time to honor all their hero dead, using the name of the one as a symbol. And so that the name can be used as a symbol for all loved ones who have departed from this earth. The ritual as performed by the veterans can be interpreted by anyone-if he so chooses and has a bit of imagination-to apply to his mother and father and others of his family. He should be able in his mind's eye to visualize graves far away and be in spirit by them at the moment.

What better time to observe for a moment morial Day, taking a part in the rites performed by our veterans' groups?-A.L.B.

Your Tax Money

DID YOU KNOW that the payroll of state emploves in New Mexico increased from June 30. 1945 from \$7,195.37 to \$8,100,964.23 for June 30,

1946 and that this figure will be increased by several hundred thousand more by the end of 1947? These are the figures and data of the New

Mexico Taxpayers' association in their New Mexico Tax Bulletin for the month of May. The association says "Whether or not this in-

crease is justified by increased governmental service and the cost of living nobody knows, because tives from the city, the school board, the chamber there are no controls or orderly system in our state government for determining the personnel needs or a fair and justifiable salary for employes based on character, difficulty and responsibility of the work involved. Salaries are arbitrarily determined by department heads and pay for similar jobs varies from department to department." The study is being made for a basis for submitting a report to the next legislature for its considerating in setting up an adequate salary control system. But a little study of some of the governmental matters can soon show and teach the average taxpayer of the state where his money is going and it should explain why taxes are always going up and never coming down.

tana, married a cowboy, adopted cowboy clothing, breathed the good, pure Western air, grabbed water colors, rounded up a horse,

and went to work at the thing **County Agent Warns** she loved most-animal painting. She has worked on various Farmers To Check ranches throughout the West, doing cowboy chores. But she like-

We believe that it is more failure to get together here than it is unwillingness to help the youngsters get their organization going.

It doesn't matter whether it is a 'teen canteen or something else to provide them the proper facilities as well as the proper surroundings for leisure time.

But let the representatives of Artesia organations get together and let a concrete plan be presented to them and we believe that the task of providing something for our young people to do can and will be solved.

And we owe it to them, ourselves and our community to see that this is done .-- O.F.P.

Cash And Carry

TT IS ALWAYS the shoemaker's children, who go without shoes.

We as individuals frequently can spand many dollars having a good time but we resent spending if we do. a few dollars we need for our family or home.

Seemingly congress is following this same good old American philosophy.

We can loan billions to England, France, China, Mexico and other foreign countries. We be convinced or persuaded-our community sufcan donate billions out of the goodness of our hearts to feed the starving in Germany, Japan and other conquered countries. We can contribute more billions to Greece and Turkey, but we can't provide what our own country needs.

Funds to take care of our own Indians have always been lacking. Time after time authorities and those familiar with the plight of the Navajos have emphasized the fact that the government has together. We haven't done that. We aren't doneglected this tribe and permitted it to live in ing it now. such conditions that it has and is contributing to a decrease in the tribe.

Funds for the operation of the Indian schools in the state have been slashed and if not restored after we actually considered the matter or did we many of the schools for Indians will close.

Reclamation projects, those projects needed to protect the present farming areas and to develop the west, are denied when only a few million would carry out all of them. The records show they pay for themselves and the money comes back but we can't continue to spend a few million for those. No, we give away billions to those who, in a few years, will again lead us into warfare.

We can't or at least we don't seem to want to put up the few millions needed and necessary for our armed defense-for our army and navy.

We don't quite understand the philosophy behind all this. We aren't able to grasp our reckoning when we are perfectly willing to put up the money to help and aid others and yet are unwilling to spend the money we need to protect and improve our own.

A million dollar increase in state employes' payroll in one year-think what would happen at this rate in ten years .--- O.E.P.

An Open Mind

T IS ALWAYS WELL for us to have and keep an open mind on community affairs. Unfortunately we don't do this. But it is better for Artesia and our community.

There are many things we can do and things we can work out if we want to work them out.

But when we close our mind; are unwilling to listen to the other side; and are unwilling to

There are ways and means for every one of problems to be worked out. But we can't work them out unless we do have an open mind; unless we are really interested in working them out; and unless we really want to work them out.

We, as a community, can have about anything and everything we want if we will work and plan

There is always considerable difference of opinion being voiced here about various undertakings. The point is did we reach these differences have a closed mind on the issue?

There is always a solution to these communproblems but far too often we permit these differences of opinion to delay definite action, in fact to halt and prevent many things from being done, which could and should be done.

If we will go into these matters with open minds, study the merits of the matter and then reach our decisions based on facts, we probably will be right more often than if we reach decisions with a closed mind.

There are always ways to overcome the differences. The differences do not matter much if we seek to solve them and then dor the things, which need to be done .--- O.E.P.

Did you ever notice that it is usually the chap, who never patronizes the local institutions, who But we are firmly convinced that if we are is always complaining about the lack of service?

magine a clothesline three miles long, filled with home laundry! That's how much laundry the average home requires each year. Think what a job it would be to do this laundry without plenty of hot water on tap for immediate use. The wonderful efficiency of automatic gas water heating simplifies home laundry and all other cleaning jobs. Hot water for soaking and rinsing does the big job. Automatic action of gas water heaters supplies all the hot water you need for the entire laundry.
