Not 1955 Issues Legislature to Become Laws

By John B. Curtis
AP Staff Correspondent

SANTA FE (AP)—Some of the best remembered controversies of the 1955 Legislature emerge tomorrow as new state laws.

High among them is the "Truck Weight Bill" which subjected the legislature and Gov. John Simms to probably their fiercest criticism from press and public. The bill has the effect, if passed, of granting a 20 per cent weight increase available to all truckers the tolerance formerly available only to haulers of unprocessed natural New Mexico

Council to Up Loading Zone Fee to \$25

City council voted last night to raise an annual fee of \$25 for loading zones in the city. It also passed a thorough examination of existing loading zones.

City manager Clarence Key made the recommendation. He said that quite a number of businesses in Artesia which do not have loading zones. He said that the \$60 per year proposal is too much for those businesses which really need loading zones.

The new setup will include a fee to see if there is alley space for some of the businesses. Businesses using street loading zones do have room in the alley.

City council will review the recommendations for loading zones reviewed by the city council.

Recreational program was discussed at the meeting, held at City Hall last evening. Vernon and H. Floyd Davis were present, representing the recreation board.

He explained that an outline of proposed budget and program is very tentative and estimates and suggestions.

He said that if the youths are not busy enough to put in a week on it, they can eventuate.

He said that the board's recommendation for the period beginning in 1956 and ending September 1, 1956. He will be paid \$120,000 for the period. Then it was suggested that a full time director be appointed.

City council decided to use the board's list of recommendations and program to make an application to the state for recreation program funds through the cigarette tax. This tax fund would be used to bring in \$10,000 for use in the support of the recreation program.

He said he thinks the program for \$20,000 to \$25,000 for two or three years, rather than a one-time fee of \$100,000 after that period.

He said he thinks the program for \$20,000 to \$25,000 for two or three years, rather than a one-time fee of \$100,000 after that period.

He said he thinks the program for \$20,000 to \$25,000 for two or three years, rather than a one-time fee of \$100,000 after that period.

Chief Protests Fire Budget Proposals

Fire Chief Albert Richards told the Artesia city council last night that unless another paid fireman is employed here, fire insurance rates may be increased.

The council told Richards that it had been considered, but that it had been cut out of the 1955-56 fiscal year budget because the city cannot afford it.

The state fire inspectors will be here in October, Richards said. "The fire insurance people are up in the air because we have only two paid firemen."

Richards protested the proposed 1955 fire equipment fund, charging that the city should have another fire truck, too.

"Rates may go up if the equipment is not adequate," he said. "It may go up to a class 8 rate."

The council said the expansion of the parks and streets has caused an increase in expenses here, and that the program puts a "budget squeeze" on the city.

Mayor W. H. Yeager expressed it this way: "We are caught in growing pains."

Near Agreement Seen in Strike

LOS ANGELES (AP)—Federal Councillor John L. Fenton said today that striking AFL teamsters and shut down truckers are very close to an agreement.

Negotiations resumed today, headed by Neil Curry, Los Angeles president of the American Trucking Assn., and Frank Brewster, Seattle, president of the Western Conference of Teamsters.

In anticipation of an early settlement, Freight Drivers Local 208 scheduled a meeting at the Hollywood Legion Stadium tomorrow night to vote on an offer they expect will be forthcoming before then.

Former Resident Of Hope Dies

Mrs. J. H. Bridgman, an old time resident of Hope, died Wednesday night at her home in Morrisville, Tenn.

Funeral services will be 2:30 p.m. Friday at Chattanooga, Tenn., with Wans Funeral home in charge.

Mr. and Mrs. Hollis G. Watson received notice of the death this morning.

TO READY AIRPORT

SANTA FE (AP)—A joint legislative committee investigating prison matters meets here Friday and Saturday to finish its work. The committee will draw up a final draft of an 82-page report which sums up the job it did. It goes out of existence June 30.

Carlsbad Youth Heads Boys State, Artesians Skipped

SOCORRO (AP)—Gov. Gayle Phillips of Carlsbad, newly elected chief executive of Boys State, might find it handy to call on former Gov. Ed Mecham for a few pointers.

Like New Mexico's former Republican governor, Phillips finds himself and his chief state aides in the driver's seat, but with a Legislature dominated by his opposition.

Phillips, a Federalist, defeated Max Jones of Ruidoso for the top spot in balloting late yesterday. But Jones' Nationalist party elected 21 Nationalists to the House, compared with 11 Federalists, and gained a 12-4 majority in the Senate.

There were no Artesia youths elected to county or state office.

Boy's State, a workshop in citizenship for junior students in high schools around the state, today started its legislative sessions and workouts for the new city governments, county officers and court officials. Instruction in court procedure for the new judges, fire arms demonstrations by the FBI for the mock peace officers, and the legislative sessions take up much of today's program.

The Nationalists also dominated the "out in the state" county elections.

They elected a majority of the officers of both the make-believe counties of DeVargas and DeLeon.

The successful candidates and their party affiliations:

STATE—Governor, Gayle Phillips, Carlsbad, Federalist party; Lt. Gov. Albert Lucero, Pena Blanca, Federalist, Secretary of

Hobbs Offers New Tornado Schedule Plan

HOBBS (AP)—When skies grew dark here yesterday afternoon, the CAA weather station received a telephone call from a woman who asked:

"Is the tornado coming down Marland or Taylor Streets?" The two are east-west thoroughfares five blocks apart.

The lady was assured no tornado was scheduled for either street.

Mines School Physical New State Engineer

SANTA FE (AP)—Appointment of S. E. (Steve) Reynolds, onetime University of New Mexico football player and now a research physicist at the New Mexico Institute of Mines, as state engineer succeeding John Bliss was announced today by Gov. John Simms.

Reynolds is 38. For the past five years he has been supervising the U. S. Signal Corps thunderstorm electricity project, which is a research study of precipitation and electrification in thunderstorms. He will finish the current phase of that project before taking over as state engineer in mid-August. Bliss will continue to serve in an advisory capacity.

Bliss was state engineer from the death of Tom McGuire in 1946 until 1953, when he became a consultant, switching jobs with John Erickson. Bliss took the top job in February on a temporary basis when Erickson resigned.

Of Reynolds, Simms said:

"I consider the state to be extremely lucky that Steve Reynolds is able to take this job. He is one of the nation's outstanding young engineers and it is a distinct advantage to be able to fill such a demanding and complex job from within our own state ranks."

Reynolds was graduated from the University of New Mexico in 1939. He worked for the Phillips Petroleum Co. as a process engineer and joined the University of New Mexico faculty, teaching mechanical engineering, in 1942.

He served a three-year hitch in the Navy in World War II and emerged as a lieutenant. He returned to the university and in 1946 he joined the faculty of the Socorro institution.

As a student at the university, he achieved an outstanding scholastic record and distinction as a football player.

SUSPENSIONS ANNOUNCED

SANTA FE (AP)—A total of 34 drivers in the state had their licenses suspended last week by the State Driver's License Division. All were for one year.

Zone Meeting On Education Here Friday

A zone E conference of the New Mexico School Study Council will meet at Hermosa elementary school in Artesia Friday, beginning with a coffee hour at 9:30 a.m.

The conference, covering South-eastern New Mexico, in connection with the White House conference on education.

Results of local, zone, and state conferences will be sifted for presentation at the national conference in November.

Following the coffee hour Friday, the general session will open at 10 a.m. An address on conference keynotes will be presented by J. E. Owen, executive secretary of the New Mexico School Study Council.

Next on the agenda is an outline of conference purposes and procedures by George Mansur, chairman of zone E's council.

At 10:45, six discussion groups will meet simultaneously. Each will discuss its assigned topic, one of the six problems listed by the White House conference. Groups have already been supplied with a suggested list of questions that might be discussed under each of the topics.

A luncheon meeting will be held at 12:15 p.m. with Dr. Roy Hall making an address on what the public and profession, respectively, can do, and what the responsibilities of each are for securing and maintaining a continuing interest in public education.

The six discussion groups will re-assemble and continue with the morning discussion at 1:40. There will be a 30-minute recess at 2:30 to allow time for group leaders to re-continue on Page Four

Continuing Cool Weather Forecast In New Mexico

By THE ASSOCIATED PRESS

Sharply cooler weather has swept through most of New Mexico today on the heels of abrasive winds that thoroughly sanded the countryside last night.

Considerable dust is reported still in the air from the Rio Grande Valley westward. Winds became so strong last night that State Police issued a bulletin discouraging travel west and north.

Blinding clouds of dust and debris in the air obscured highways. Cloudiness became extensive east of the Rio Grande Valley this morning but only very light scattered showers were reported. A few places have had traces of precipitation but no measurable amount has been reported.

The cooler, calming conditions are expected to continue through today and tonight with some warming to be expected Friday.

Scattered showers and thunderstorms were forecast for mountain areas and the east portion today.

Temperatures yesterday soared before the cooling winds hit giving highs of 108 to Carlsbad, 102 at Hobbs and Artesia and 100 at Las Cruces.

But the winds, with dramatic speed, sent the temperatures plummeting. Hobbs, which had 102 at 2:30 p.m., fell to 78 at 3:30 p.m. as 4 a.m. an hour winds struck. Carlsbad dropped from 106 to 60 and Artesia underwent almost the same change.

At Las Cruces, the strong winds powered rocks into the air. One newsman said: "Arizona passed through on its way to Texas at 70 m.p.h."

City Proposes Budget Hike of Only \$45,000

Hope Preparing For Big Fiesta

The sixth annual Hope Fiesta, staged by the "petticoats," will be held Saturday at Hope, 26 miles west of Artesia. The celebration begins at 2 p.m. with a parade.

The fiesta was started when women took over all public offices in Hope in 1950.

"The men were tired," Mayor Ethel Altman told an Advocate reporter, "and said they needed a rest. We told them they could have the jobs again when they were rested. It's been six years and they aren't rested yet."

Mayor Altman said the name of "petticoats" was tacked onto them because women run the town by filling every public office in Hope.

The first fiesta was attended by more than 2,000 people, the mayor said. Life Magazine did a feature on the event that year. Last year, 700 attended and

Mayor Altman said she expects a crowd exceeding that number for this year's celebration.

The population at Hope is only 185 persons, but 300 live in the general area, counting the ranching and farming families.

The mayor said Hope lays claim as the turkey-raising center of the Pecos Valley.

"We supply all of the Valley with turkeys," she said. "More than 12,000 birds are raised near here each year."

Following the parade Saturday, an amateur rodeo will be held at 3 o'clock. About sundown there will be a barbecue, free of charge, in the rodeo grounds. Festivities will be concluded with a dance at the gymnasium that night.

A small fee of 50 cents per person will be charged at the rodeo.

City Spending Steadily Nears Half-Million

A budget totaling \$449,394 was presented at the regular meeting of Artesia city council at City Hall Wednesday evening.

The budget would operate the city for the 1955-56 fiscal year which begins July 1.

The total budget includes a water department budget of \$257,634, and a general fund budget of \$241,760. The budget proposals represent an increase of only \$654, over the 1954-55 budget.

Again the water department the key source of income for the city, would pay its own way as well as \$55,000 in the general fund.

The \$257,634 water department budget compares with \$242,225 of this year, the general funds \$241,760 with \$211,515.

Most salaries will remain the same, although there is a slight increase in the total. Salaries for the current period are \$120,425, but will be \$127,030 for the next period.

In the new equipment, department, the big items are a dump truck, three police cars, and a street sweeper. Equipment will cost \$85,880 as compared to \$71,740 this year.

The \$55,000 from the water department to the general fund represents an increase of \$15,000. Last year, the amount was \$40,000.

Budget proposals are being considered by a committee headed by Mayor W. H. Yeager. They must be mailed to the state tax commission by June 15.

Yeager indicated further committee meetings will be necessary before the budget proposal can be mailed.

The state tax commission will hold a hearing here July 10 on the proposed budget.

Two Artesia 'UN Delegates' Leave Friday

Norma Jo Thigpen and Bill Lorang will leave Artesia at 6 a.m. Friday for Denver and the United Nations Pilgrimage.

They will join a four-state party of students in Denver scheduled to start for New York June 12. They will visit UN headquarters in New York six days, studying operation of the international organization.

The program is sponsored by Odd Fellows and Rebekahs.

The Artesia "pilgrims" were selected on the basis of entries in an essay contest, character, scholastic rating and participation in school and other activities.

They were chosen to represent New Mexico, along with six other high school students. About 38 from four states will meet in Denver for the trip to UN headquarters.

It is the sixth year the Odd Fellows and Rebekahs have organized the pilgrimage. Joe C. Freeman, Artesia Odd Fellow secretary and chairman of the local pilgrim selection committee, said the program is designed to enlighten the younger generation by sending delegates to the UN who can report back to their areas on work in the UN.

Both Miss Thigpen and Lorang are juniors at Artesia senior high school.

Artesians Favor Golden Jubilee

Some 50 Artesia residents—representatives of various service clubs, organizations and businesses—gathered at the Chamber of Commerce Wednesday afternoon to discuss preliminary plans for the proposed 50th Golden Jubilee.

Paul Scott, manager of the C of C, presided, and divided those present into small discussion groups in order to get a clearer, more organized opinion on three questions.

These were: In a 50th year celebration, what activities should we have? Who is going to coordinate? Who is going to pay for the celebration?

The opinions of the groups varied somewhat, but it all boiled down to the general belief that there should be a parade of floats, an "old timers" gathering of some sort, a street dance, and a barbecue. Of course, as planning progresses other events may be added, if the sponsors desire.

The group also seemed to believe that the event will be self-supporting. It was almost unanimous in naming the Chamber of Commerce as coordinator with various other organizations assisting in the work.

State Weather

Partly cloudy today and tonight. Generally fair Friday. Widely scattered showers and thunderstorms mountains and east today and mountains Friday. Windy south-east today and early tonight. Cooler except in northeast today. Warmer Friday. High today 75-85 northeast ranging to 80-90 southwest. Low tonight 45-55 north, 55-65 south.

Weathermen Find No Atomic Blast Effect on Weather

By FRANK CAREY

WASHINGTON (AP)—The U. S. weather bureau says it has been unable to find any evidence that atomic explosions have had—or can have—an effect on the weather beyond a few miles from the blast.

"Although it is not possible to prove that atomic explosions have or have not influenced the weather, it is believed that this study has shown that such an effect is unlikely," the bureau recently told Congress after a study of the question.

The bureau had not previously been able to pin down any association between the blasts and poor weather, but it wanted to be sure. Questionnaires were sent to most of organizations in the United States employing meteorologists.

But they said also that preliminary examination of available information from the H-bomb tests in the Pacific "does not indicate that any obvious changes in the weather have been produced by these explosions outside the test area."

Background of the weather bureau study was this:

Both the bureau and the atomic energy commission had been getting letters from people in many parts of the world blaming unpleasant weather on the atomic explosions.

The bureau had not previously been able to pin down any association between the blasts and poor weather, but it wanted to be sure. Questionnaires were sent to most of organizations in the United States employing meteorologists.

Out of 80 replies received, about 50 per cent said they could see "no possible connection" between atomic blasts and subsequent weather.

The others offered these theories as to how there might possibly be a link:

1—That atomic "debris"—that is radioactive particles from the bomb itself, and dust and dirt stirred up by the blast—might serve as a "cloud-seeding agent." That is, the debris might touch off rainfall in the same way that dry ice or silver iodide sometimes can if dropped into the right kind of a cloud.

2—That the radioactive character of the debris might produce changes in the electrical character of the atmosphere, possibly leading to observable weather effects.

3—That the dust resulting from an atomic blast might interfere with the amount of solar radiation reaching the earth.

The weather bureau—equipped with information from the AEC and aided by cooperative studies carried on by Air Force and private scientists—believes it has knocked down these three suggestions this way:

1—Experiments show, the bureau says, that Nevada dust has "very poor" properties for serving as a cloudseeder.

2—As for changing the electrical properties of the atmosphere, atomic debris deposited on the ground could change the electrical conductivity of the air near the ground.

But, the bureau says, the change would be in such a shallow layer near the ground that it would be insignificant in terms of usual atmospheric phenomena.

An atomic cloud passing overhead could increase the electrical conductivity of the air in a local sense. But perhaps its most significant effect— and there's no proof of this— would be a beneficial one, in that the electrical change might tend to reduce the amount of lightning from a thunderstorm cropping up coincidentally in the area at about the same time.

3—As for atomic "dust" interfering with the amount of solar radiation reaching the earth, the bureau says this:

IT is true that a sufficiently

large dust cloud can interfere with solar radiation—a fact demonstrated by the 1883 eruption of the Krakatoa volcano in the Dutch East Indies which tossed dust equivalent to several cubic miles earth into the air.

"However," Machta and Harris said in their original report in the technical journal Science, "according to the best available information, there appears to be many orders of magnitude separating the amount of dust required to produce any significant reduction in worldwide incoming radiation and that produced by the Nevada explosions."

What about the possibility of weather being affected just by the blast force of the explosion? The weather bureau says none

Former North Eddy County Resident New Journalism Prof

CARBONDALE, Ill. (Special)—A new appointment to the faculty of Southern Illinois University is D. Wayne Rowland, who recently completed requirements for the master of arts degree in journalism at the University of Missouri.

Rowland will devote himself almost wholly to research work this summer, but will teach community journalism and newspaper business courses beginning this fall.

Mr. and Mrs. Rowland and their

four daughters, moving here from Columbia, Mo., are building a new brick home in this rapidly growing community. The university's enrollment has increased from about 2,300 two years ago to over 4,500 this year. An estimated 2,000 additional enrollees are expected in the next two years. The institution is in the midst of a tremendous expansion program.

Professor Rowland has eight years of publisher experience as editor and owner of several weekly newspapers and one daily paper in southwest Missouri. He is a past president of the Ozark Press Assn.

Rowland, 33, was born near Lakeview, N. M., a son of Mr. and Mrs. Lewis Rowland. The family, including three brothers and two sisters lived at Atoka and later at Espuela until moving to Missouri in 1937.

Rowland attended grade school in Artesia and at Cottonwood and attended Artesia high school his freshman year in 1936-37, before the family moved to Cassville, Mo.

FIRE CONTROLLED

LOS ALAMOS.—A fire which swept about one-half acre of brush and logs was brought under control near the outskirts of Los Alamos yesterday. Asst. Fire Chief L. V. Stafford said firemen had to walk about 25 minutes to reach the area. He theorized the blaze may have been started by children playing with matches.

George Washington is credited with obtaining patents for an average of one new invention every six weeks for 48 years.

Silver Selling at Highest Price in U.S. in 35 Years

NEW YORK.—Silver is selling today at the highest price in 35 years.

Industry is paying as much as Uncle Sam for the metal for the first time in many years. The civilian price advanced here this week to 90 1/2 cents an ounce. By law the U. S. Treasury pays 90.41 cents for silver newly mined in the United States.

Industrial demand for silver here is reported running 15 to 20 per cent higher than a year ago. Mexico, the chief supplier of silver for industry and the arts in this country, has been virtually withdrawn from this market for some time.

Rising demand and dropping supply have bid the price. Mexico's silver has been going to West Germany and to Saudi Arabia, which wants it for coinage. Silver mined in this country has been going to the U. S. mint because for more than two years the commercial price was 85 1/2 cents and Uncle Sam was paying almost 42 cents an ounce more.

Under the law, the U. S. Treasury may not sell its silver for less than 90.91 cents an ounce, or a profit of one half cent for the Treasury. Some in the trade here think the commercial price, which Handy & Harman, refiners and fabricators, this week boosted to 90 1/2 cents, may rise still higher and could approach the Treasury's selling price.

Actually, consumers are paying

90 1/2 cents now—the extra one fourth cents being the customary handling and other charges. Therefore, any one with newly mined American silver here in the East can get more for it on the commercial market.

But in the West, where two thirds of our silver is produced, freight differentials make shipment to the nearby mint more attractive from a price standpoint than shipment to the commercial market in the East.

U. S. consumption of silver in the arts and industries was 105 million ounces in booming 1953. It dropped to 85 million ounces in 1954, when silver-using industries were having a slowdown. This year silver use has risen even faster than the industry hoped for a few months ago.

Handy & Harman reports that this year the use of silver in industry tops its use in silverware, jewelry or the arts. And the industries consuming silver are booming now.

Its use in industry comes from its high conductivity of electricity and from the great strength of silver alloys used as solder to join other metal parts.

The greatly increased use of silver in industry came at a time when Mexico's silver was pledged to other nations—and American silver was going into the U. S. Treasury. The trade is now watching to see if the higher price will pull more of the world's output into the commercial market here.

Personal Mention

Mrs. C. F. Brown and daughter, Gaynell, son, Charles Lynn, and Mrs. Brown's sister, Mrs. R. L. Ratliff and daughter, Becky Lynn of Hobbs, left Wednesday for Ruidoso to stay until Monday. Mr. Brown and Ratliff plan to join their families over the weekend.

Paul R. Dillard and Lillian D. Evans drove to Albuquerque to attend the graduation exercises at the University of New Mexico of which Sanford "Penny" Evans of Hagerman is a member. He is the son of Mrs. G. C. Boyer and the late George Evans.

Mrs. Lloyd Foulkes and sons, Gary and Bryan, Tracy Patterson, Andy Bernie Anderson, Mrs. Dewey Donovan and daughter, Suzann, and son Tommy, Sheryl Mathis, and son Tommy, Sheryl Mathis, at the Carlsbad beach on a picnic.

Capt. and Mrs. J. T. Rhett, Jr., and children who have been stationed in Heilderberg, Germany for three years are expected back in the states in July. Mrs. Rhett is the daughter of Mr. and Mrs. Hollis G. Watson.

Before 1930, the United States produced more raw materials than it consumed in most years, but since that time the nation has imported more of such materials than it has exported.

HAGERMAN NEWS BRIEFS—Methodist Women Study Arrangement for Seminar

By MRS. BYRON OGLESBY

The WSCS of the First Methodist church of Hagerman met Wednesday in the undercroft of the church for a regular meeting.

The president, Mrs. J. C. Ridgely, presided. The minutes of the last meeting were read and approved. A letter was read from the district secretary in which Sept. 29 was suggested the date of the Seminar for the upper zone to be held in Hagerman as an all-day meeting at the church.

Mrs. A. A. Baily was in charge of the lesson, "Be Ye Doers of the Word," and was assisted by members of the group Miss Esther James, visiting here from Sudan, Texas, furnished music for the afternoon.

Refreshments of crackers, cookies, mints and orange drink were served to guests Miss James, Rev. A. A. McCleskey, Edith Stine, Flora West, Mrs. Flora Mann, Mrs. C. W. Curry, Mrs. L. E. Hinrichsen, Mrs. J. W. Wiggins, Mrs. J. C. Ridgely and Mrs. A. A. Bailey.

The Jack Langeneggers enjoyed an outing last Sunday with a dinner at Elephant Butte at Las Cruces, a picnic supper at White Sands and enjoyed church services Sunday at the Methodist church at Truth or Consequences.

An executive board meeting of the Hagerman Parent Teachers Assn. was held in the superintendent's office at the Hagerman school.

The president, Mrs. Jim Lange-negger, appointed the following committees for the ensuing year: Budget and finance, Mrs. Louise Brown, Al Henry and Mrs. Bill Knoy; membership, Mrs. Clyde Kelley, Mrs. Max Wiggins, Mrs. Vivian Trujillo, Mrs. Robert West and Mrs. Alex White; program, Mrs. Byron Oglesby, Mrs. R. A. Welborne and Mrs. Richard Lang; room mothers, Mrs. Jack Lange-negger, Mrs. Pearl Mason and Mrs. Clint Gibson; hospitality, Mrs. Wilson Hart, Mrs. Robert Utter-back and Mrs. Dub Hardin.

Publicity, Mrs. Stanley Utter-back and Mrs. Eulalia Gregory; health, Mrs. Howard Menefee; scrapbook, Mrs. Lloyd Kirkpatrick and Mrs. Ruth Strixner; year book, Mrs. Bill Langenegger and Mrs. Byron Oglesby; magazine, Mrs. Horace Freeman; skating, Bill Knoy; parliamentarian, R. A. Welborne.

\$200 was donated toward purchasing band uniforms for the school band.

Mrs. Rex Berrier of Las Cruces is visiting her daughter and family Mr. and Mrs. Bobby Williamson and grandson, Randy.

Mrs. S. C. Carver of Las Cruces spent a few days with her daughter and family this week and brought her grandchildren, Susan and Sidney Templeton home. Linda Carver, who had been staying several days with her sister and family here, the Bob Templeton's,

returned home with her mother.

A. F. Deason has returned from an extensive trip through Oklahoma, Texas and Arkansas. He reported an enjoyable trip.

Many Hagermanites attended the rodeo in Roswell this past weekend. Several participants from Hagerman were noted and did outstanding performances. Among those participating were June Tulk, Raymond Bledsoe, Carol Dorris, Joe Elliott.

Lawrence Ray Andrus, brother of Cork Andrus of Hagerman was married to Betty Whitfield of Roswell Thursday. They will make their home in Roswell where Andrus is employed with the City Oil company.

Word was received from Ella Jo Turner who is in Sweetwater, Texas she and her mother were enjoying their visit. Ella Jo is learning to ride a surfboard.

Neil King, former Hagerman resident, has accepted a position as a mathematician in Fort Worth where he and his wife and two children will make their home. Mr. and Mrs. Rufus King, Neil's parents, have purchased a seven-room home in Artesia.

Social Calendar

Thursday, June 9 - Group 3 of Christian Women's Fellowship of the First Christian church, meeting in the home of Mrs. John Gilmer, 1108 Heath, 2:30 p. m.

Cottonwood Garden Club at the home of Mrs. James Thigpen, 2:30. Wesleyan Service Guild, meeting

GRADUATION 'ZERO HOUR'

IN A "COLOR GIRL" dress rehearsal, Marilyn Mohr, U. S. Navy academy color girl, presents colors to Midshipman John R. Johnson, captain of 18th company, at Annapolis, Md. (International)

in the home of Mrs. C. R. Blocker, 805 W. Main, 7:30 p. m. Mrs. Blocker will show slide pictures made during her trip to Mexico.

Friday, June 10 - 3 M's class, will hold a picnic in Guadalupe park, 6:30 p. m. Host couples will be Mr. and Mrs. Johnnie Ware, Mr. and Mrs. Bob Gallagher, and Mr. and Mrs. Van Everett.

Artesia Garden club, meet at the home of Mrs. Carl Lewis, p. m.

More than a third of the area of the United States is considered useful primarily as land and more than two-thirds the forest land area can be commercial timber.

Artesia Loss to Potashers Puts Midland Ahead on Percentage

SPORTS

Midland Moves Up to First Place Again

Midland took a 2-1 decision in the 11th from Roswell and San Angelo's game at Big Spring was postponed by rain.

Romero, Simone Hurl in Duel

HOBBS (AP)—Ray Romero and Pete Simone hooked up in a whole of a pitching battle here tonight. It was not until the 11th inning that the Sports were able to put two hits together for the winning run. It was Romero who broke open the game with a single to left to score George Grutzmaecker from second. Romero did not allow the Rockets a hit until the eighth inning when Mer. Stubby Greer touched him for a single after Phil Phillips had walked. Philip stole second and came in on Greer's single for the one Roswell run.

Hobbs collected its first run in the second inning off starter Leroy Molden. Molden walked three men but was helped out by a double play. D. C. Arguadia singled in the first run.

There were 19 bases on balls issued in the game and not one extra base hit. The wind took care of all long balls.

Roswell 0 0 0 0 0 0 1 4 1
Hobbs 0 10 0 0 0 0 1-2 6 2
Molden, Simone (3), and Arco; Romero and Junco.

Club to Open Five-Game Home Series

A 7-6 loss to the Carlsbad Potashers last night and a game rained out put Midland back in the Longhorn league today—at least on percentage points.

Midland with 28 wins and 19 losses has a percentage of .596. Artesia has one more win, but one more loss also — 29 and 20 — giving the NuMexers a .592 percentage.

Actually neither club holds an advantage over the other in "games behind"—in that respect, they're tied for the lead.

The Potashers return home tonight for the first of two games here with Odesa. Saturday Artesia hosts Carlsbad in the first of a three-game series here.

The Potashers took the rubber game last night, scoring two runs in the bottom of the ninth to wrap up a 7-6 win.

Hero of the affair was third baseman Goldie Gholson, who blasted a bases-loaded single into left field to take the game for Darwin. Chricso who went all the way and struck out 11 in his hurling effort.

Carlsbad held a 4-0 advantage going into the fifth, but the defense staggered in the heavy wind in that frame. After three Carlsbad miscues, the NuMexers tied it at 4-4.

The Artesians added one more in the sixth and another in the eighth, while Carlsbad posted one more in the seventh.

Behind 6-5 going into the bottom of the ninth, Potasher left fielder Duke Henderson led off with a double to center. At this point NuMexer hurler Jim Kenaga was relieved by Al Chester.

Shortstop Regis Burns beat out a bunt to the pitcher and stole second while NuMexer Mgr-first baseman Tom Jordan held the ball.

Centerfielder Pedro Osorio drew a walk to load the sacks with no one out and Gholson stepped in and singled home the winning runs.

Russell Defeats NuMex, Guys Down Magnolia

Russell whipped NuMex 6-2 and Guy Chevrolet clouted Magnolia, 12-4 in two Little League baseball games played Wednesday.

The first inning was scoreless but both teams chalked up one run in the second. Russell took the lead 5-1 in the third and held NuMex scoreless until the sixth when the losers managed to collect one more run. Russell added its final marker in the bottom of the sixth.

NuMex had two hits, Russell collected six. The winner was Foster, Mitchell took the loss.

Last night, Guy Chevrolet scored 12 runs on eight hits to win over Magnolia. The losers had five hits for four runs.

Chevrolet scored twice in the first inning, and added five runs in the second to lead 7-0, going into the bottom half of the frame.

Magnolia traded its goose-egg for two runs on the scoreboard during that period. Both teams were scoreless in the third.

In the fourth, Guy extended its lead to 9-2 with two runs. Magnolia was unable to score in the bottom half, and Chevrolet moved further into the lead, 11-2.

Magnolia hammered home two runs in the bottom half of the fifth, but Guy scored another one in the top of the sixth and held Magnolia scoreless in the bottom portion, winning 12-4.

Homers were hit by Box of Magnolia in the fifth inning with one man on base, and by Reyes of Guy Chevrolet in the fourth with one man on. The winning hurler was Davis, and Coulter was the loser.

Babe Ruth Loop Draws Idle Day

The Optimist club-sponsored Babe Ruth League teams took the day off Wednesday, but will swing back into action at the Babe Ruth Park.

DeMarco Arrives In Syracuse as 17-10 Underdog

SYRACUSE, N. Y. (AP)—A 17-10 underdog in his first title defense, welterweight champion Tony DeMarco arrives in this hotbed of Carmen Basilio supporters today quietly confident he'll still be wearing the crown after Friday night.

The Boston buzz-bomb looked strong and sharp in sparring 51 rounds at his mountain training camp at downtown Monticello. His party was to make the 150-mile trip here by plane.

DeMarco and Basilio clash tomorrow night before a sell-out crowd of 9000 at the War Memorial auditorium.

The fight will be televised and broadcast nationally, starting at 9 p. m. EST. Central New York will be blacked out of the telecast.

Fifty Golfers Tee Off International Tourney Today

WASHINGTON (AP)—Fifty golfers from 26 nations tee off today in the International Golf Championships over a Columbia Country club course soaked by rain and with more showers promised.

The sponsoring International Golf Assn. bills it as a \$150,000 tournament, but that figure includes expense money and a \$500 payment to each man who participates. Actual prize money is \$11,800.

Chick Harbert, the U.S. PGA champion, said he thought a figure of 560 would win the Canada Cup, which goes to the country with the lowest combined score for its two team members for 72 holes of medal play.

Par for the 6,510-yard course in suburban Chevy Chase, Md., is 72.

Twelve American Players Enter French Tourney

PARIS (AP)—Lieut. Joe Conrad newly crowned British amateur champion from San Antonio, Tex., and 11 other Americans were among the 32 players who went out for two more rounds of competition in the French amateur golf championship today.

And the experts say they'll still be at least five Americans among the eight left in the competition when the last putt is dropped today.

Favored to win through to the quarter final round were Conrad; Don Bispilghoff, 20-year-old North South champion from Orlando, Fla.; Bill Campbell of Huntington, W. Va., captain of the U.S. Walker Cup team which downed the British; Bruce Cudd, 21-year-old college student from Portland, Ore; and Joe Bullins of Winston-Salem, N. C., an Army private stationed in France.

Tradition has it that red barns became an American institution when some farmers painted their barns red, their houses white and with blue skies, established a patriotic symbol.

Charles Ready To Fight Anyone

CINCINNATI (AP)—Ezzard Charles still says he will fight anyone—and of course that goes for heavyweight champion Rocky Marciano. Ezz, the Cincinnati Negro who has failed three times to regain the heavyweight championship, bounced back a bit last night when he won a unanimous 10-round decision from long-armed Johnny Holman of Chicago.

It was Holman who scored a surprising ninth-round technical knockout over Charles in Miami last April.

But last night Ezz had the answers. He kept his left shoulder up and his head buried in the taller and heavier Holman's chest and never gave him a chance to unloose those powerful right which wrecked Charles in their last fight.

El Paso Edges Lubbock By 4-3

By THE ASSOCIATED PRESS Last-place El Paso came through in 11 innings Wednesday night to earn one of its infrequent West Texas-New Mexico league victories.

The Texans edged the Lubbock Hubbers 4-3.

In the only other game, the Amarillo Gold Sox tripped the Abilene Blue Sox 8-4.

Pampa's game at Albuquerque was postponed by wind and dust, and Plainview's tilt at Clovis was postponed by wind and cold.

RANCHERS PROTEST BERNALILLO (AP)—About 50 ranchers met last night to protest legislation to set aside 77,000 acres of the Ojo De Esperito San to Grant for use by Zia and Jemez Indians. The legislation was introduced recently by Rep. Dempsey (D-N.M.). The group plans to send a formal protest to the New Mexico congressional delegation.

Although cornerstones of buildings may weigh several tons, those of the Washington Monument, the New York City Hall, the White House and the U.S. Treasury building and other structures cannot be located, says the National Geographic Society.

They Build Artesia

ARTESIA has a good many small industries — industries which operate and render a service here and which pour a good many dollars into our community in payrolls.

Some of these industries have only a few workers and their payroll is not too large. Others of these industries are large and they are making real contributions to our prosperity.

We, of course, often times give considerable thought to the larger industries. We know them and are acquainted with what they do for our community and the payrolls they provide. We are not familiar with the small ones and are fully aware of all they do for us.

In a series of Sunday picture pages The Artesia Advocate is seeking to bring to the community some of the facts regarding these small industries. We are trying to tell and to show the public what these folks are doing for us; what they put back into this community; how many have jobs; and the kind of payrolls they furnish Artesia.

Most of us want to go along and aid local industry. We are all aware that when payrolls are provided by local institutions that this means dollars in our community. Most of us want to keep these dollars at home and we want to patronize home industry. Sometimes a little publicity for these small industries just makes us realize all the more why we should patronize these folks and give them our business.

Anything that any of us can do to help our home industries, of course, we should be glad and willing to do.

That is why The Artesia Advocate is interested in these small industries and that is why we are featuring them in our picture page each Sunday. We are merely attempting to render a service to them and in this way we are aiding and helping our own community and indirectly helping ourselves.

We will continue our series on Artesia industries in the days and the weeks ahead with the hope that we can cover and publicize in picture and story every one of these industries.

And we only hope that because of this fact we will all come to realize these industries are important to us and that their payrolls help to make more prosperity and helps to make it possible for those employed by these industries to have money to spend in our community.

We also hope that when we realize this we will show our appreciation for these industries by patronizing them and boosting them every way we can.

Report Dramatic Progress in Relieving Pain of Rheumatism and ARTHRITIS

Curbs Pain Dose-by-Dose! Sufferers Rejoice! Supply Rushed Here! The discovery of the new drug, salicylamide, which is reported safe to take without prescription yet has power to bring blessed respite from the agonizing though minor aches and pains of rheumatism and arthritis, is seen as offering joyous new hope to countless sufferers from these dread conditions. To bring this new wonder drug to all, it has been combined with 2 other widely recognized analgesic agents in easy-to-take tablets, called VERTASOL, which act internally to curb the minor but none-the-less torturous arthritis and rheumatism distress in hands, arms, legs and shoulders. While results from the use of VERTASOL are most impressive, claims for the present are limited to its power to effectively provide intermittent relief from these aches and pains in cases of arthritis, rheumatism and sciatica. VERTASOL costs \$3.00 but considering results is not expensive and is sold with a money back guarantee by the Irby Drug Store, Artesia. Mail orders filled.

New Laws—

Continued from Page One

comes renewals on a birthday-month basis.

The Legislature passed a bill aimed at making discrimination or segregation unlawful, but refused to put any penalties into it. It did remove from the books an old law containing permission to set up segregated schools.

It passed a minimum wage law which has been criticized as "a joke" and defended as "a step in the right direction." It calls for a 75-cent wage floor except for a 50-cent minimum in such service trades as restaurants and drug stores, laundries and cleaning firms, and hotels, motels and tourist courts.

Labor officials who recently attended a national meeting in the east say that New Mexico's new wage law drew some praise for putting this state in among a very small group which now have minimum wage laws affecting both men and women. One criticism has been that it will be hard to enforce some people answer that by saying that unions in the bigger cities such as Albuquerque—where the law would be important—are expected to see that it is enforced.

Council—

Continued from Page One

the mains. It would run from the corner of Grand avenue 600 feet north on Nineteenth. When laid, it will become part of the main. Gilmore said the association would not permit extension in reduced size of water mains.

Councilman George Ferriman, parks committee chairman, and the Babe Ruth League seeks to play games with Carlsbad and Roswell teams, and that lights would be necessary on the diamond.

The council suggested use of the municipal ball park when the Nu-Mexers play out of town, in lieu of installing lights at the Babe Ruth park. The players, however, will be responsible for the light bill when they use the park and will be asked to keep the diamonds and stands clean. There will be no admission charge.

COUNCILMAN Key said he had received a protest on a new trailer court from an adjoining property owner City Attorney Neil Watson said the area is not a restricted zone. He has suggested a model ordinance on trailers.

Mayor W. H. Yeager suggested a committee work out a workable ordinance. Key was appointed chairman.

Key also proposed redecorating living quarters for the paid firemen, and said the plaster should be patched. There have been two verbal bids, one figure at \$475, the other \$490. These do not include the patching of plaster. The bid for the latter work was \$18.50. Richards said he will discuss the suggestion with the two paid firemen.

On Ellesmere Island, near the North Pole, the sun never sets for 147 days and never rises for 145 days during the year.

Yesterday's Cryptquip: OROGRAPHY IS INFALLIBLY DESCRIBED AS A BRANCH OF PHYSICAL GEOGRAPHY.

First Transoceanic Telephone Cable Laying to Start June 22

Laying of the world's first transoceanic telephone cable—to span the Atlantic between Newfoundland and Scotland—is to begin June 22. W. H. Daugherty, manager of Mountain States Telephone here said today.

The transatlantic voiceways are to be extended 300 miles westward from Newfoundland to the eastern tip of Nova Scotia via another submarine cable, and from there to the United States over a 575-mile radio relay system.

The project is a joint undertaking of American Telephone and Telegraph Co., the British Post Office and Canadian Overseas Tele-communication Corp. and will cost about \$40 million. Service will be established late in 1956.

Daugherty said the first cable of a twin cable system would be spun out across 2000 miles of ocean bottom by summer's end. Summer is the only time the Atlantic is calm enough to permit such an undertaking. Laying operations will start at Clarendville, Newfoundland, and be completed at Oban, which is on the west coast of Scotland about 60 miles from Glasgow. The second cable is to be laid from Scotland to Newfoundland in the summer of 1956.

Dougherty said the new cable system would greatly improve the telephone service between the United States and Great Britain. This service was inaugurated in 1927 and is handled entirely by radiotelephone.

The transatlantic cables and the Newfoundland-Nova Scotia cable will be laid by HMTS Monarch. The ship is now loading the first segment of deep-sea cable at Newington, N. H.

Each of the transatlantic cables will be laid by HMTS Monarch. The shore end is to be paved out between Clarendville and the edge of the Continental Shelf, a distance of about 200 miles. The second segment, of lighter design, will extend the cable to a point some 500 miles off Scotland. The third will be laid in three segments to Oban. Shallow water sections at each end require much heavier armor to protect against the action of the sea and shipping.

Telephone scientists have spent many years developing the amplifiers needed to make a deep-sea voice cable operable. Unique in quality, design, and structure, these amplifiers give weakened voice currents new strength as they speed along their 2000-mile underwater journey.

They were designed to meet three difficult specifications: they had to withstand enormous pressures at the ocean floor—pressures sometimes reaching 3 tons per square inch; they had to be built into the cable and still be slim enough and flexible enough to pass through the ship's laying gear; and they had to operate for many years without attention. Each of the twin transatlantic cables will contain 52 amplifiers spaced about 40 miles apart.

Gas Company Backs Drive To 'Slow Down and Live'

With the coming of summer, vacationers, take to the highways and byways, attracted by the lure of new things to do and see. And during these summer months, highway deaths across the nation reach an increasingly alarming peak.

In Artesia, Southern Union Gas Co. is cooperating with the National Conference of State Safety Coordinators in sponsoring a nationwide "Slow Down and Live" campaign, as part of the gas company's year-round accident prevention program. According to F. M. McGinty, 21 local trucks and cars will carry a bright, easy-to-read bumper strip that carries the slogan "Slow Down and Live."

The Slow Down and Live campaign is in operation in all of the 48 states from Memorial Day through Labor Day in an effort to reduce the number of accidents which normally occur during the vacation season. July or August now replaces December as the month with the greatest number of highway traffic deaths.

The problem is not excessive speed alone, but it includes all the occasions in which the speed of the vehicle is too fast for existing conditions. However, the wild, headlong rush is the largest single factor in traffic accidents and deaths.

In 1954, when the Slow Down and Live program from the North-eastern states was extended to the Southern states, the campaign saved over 600 lives and achieved the first reported reduction in total traffic accidents since World War II.

In 1955, the annual Governors' conference requested a nationwide program. A special character known as the "Hurry Bug" was developed by Walt Disney Productions in order to dramatize the message "Slow Down and Live." Southern Union is supporting the program in 62 towns and cities throughout the Company's four-state system.

All minerals of whatsoever including oil and gas, are to the State of New Mexico. The right to reject any bids is expressly reserved. Sale shall be effective until approved by the Commissioner of Public Lands.

Detailed information concerning this offer of sale, the lands to be sold, the improvements thereon, and other matters, may be obtained by the Commissioner of Public Lands, State Land Office, Santa Fe, New Mexico.

DATED at Santa Fe, New Mexico, this 2nd day of June, 1955.

(SEAL)

E. S. Walker, Commissioner of Public Lands, State of New Mexico.

NOTICE OF PUBLIC AUCTION OF STATE LANDS CHAVES COUNTY

Office of the Commissioner of Public Lands Santa Fe, New Mexico.

M., on August 19th, 1955, at the front door of the County Court House, in the City of Roswell, New Mexico, subject to existing lease or leases, if any, the following described state institutional lands, to-wit:

ALL of Section 36, Township 15

Two Artesias Receive ROTC Commissions

Andrew L. Terpening and Charles E. Rohde have completed their courses of study in the Air Force ROTC Unit at the University of New Mexico.

Colonel William M. Massengale, Jr., Professor of Air Science and Tactics presented a Second Lieutenant Air Force Reserve Commission to the Artesia students during a recent commissioning ceremony at the University.

Their parents are Mr. and Mrs. John H. Terpening and Mrs. Ivan Rhode.

CRUCES STATION ASKED

WASHINGTON (AP)—The communications commission has been asked to okay a new radio station at Las Cruces, N. M., by Taylor Enterprises. The station would operate on 570 kilocycles, one kilowatt, daytime only.

Weathermen—

Continued from Page One

of the weathermen it quizzed felt that the energy of the explosion itself could have a significant effect on the weather.

THE weather bureau also discounts the theory that tornadoes have become more frequent since the United States began testing bombs in Nevada.

Its rebuttal: While there has been an increase in the number of tornadoes reported, it is believed that much of it can be traced to better reporting systems, rather than to a real increase in tornado frequency itself.

Neither was any connection found between atomic blasts and the drought that has affected areas of the Southwest and the plains states in recent years.

MARCH OF EVENTS

Congressional Democrats Urge Rayburn for Veep

Garner Set a Precedent; Sam's Age Not a Factor

Special to Central Press

WASHINGTON—There is a move stirring among congressional Democrats to boom House Speaker Sam Rayburn for a vice presidential nomination at the 1956 Democratic convention.

Rayburn, according to intimates, would not be averse to climaxing a distinguished Washington career with the vice presidency. One of his oldest friends, Cactus Jack Garner, similarly moved from the speakership to the vice presidency.

In addition, Rayburn advocates contend his age would not militate against him inasmuch as former Vice President Alben Barkley was an elderly man when he ran as a running mate with ex-president Harry S. Truman.

Rayburn, who has presided as Speaker of the House longer than any other American in history, would draw popular endorsement from every segment of the Democratic party. His following, as attested by the recent testimonial dinner held in Washington, crosses geographic and sectional lines.

WOMEN WANTED—In the Republican political camp, President Eisenhower's political advisers are keeping an eye out for a possible new woman cabinet member, especially so since the President himself told a news conference Health, Education and Welfare Secretary Oveta Culp Hobby has said she may have to resign because of personal reasons.

Mrs. Hobby's retirement as the only woman cabinet member presumably would be prompted by the ill health of her husband.

Republican strategists are keenly aware that the women of America that another woman be named to succeed Mrs. Hobby if and when she leaves.

Among the potential candidates for such a post are Miss Bertha S. Adkins, top aide to GOP National Chairman Leonard W. Hall; Mrs. Olive Ann Beech, dynamic president of the Beach Aircraft Company, and Miss Catherine Cleary, Wisconsin bank executive and former assistant to Treasury Secretary George M. Humphrey. Two others given prominent mention are Dr. M. Eunice Hilton, president of the National Association of Deans of Women, and Miss Camille Davies, executive director of McCall's magazine.

RUMOR HUNTING—Senator Estes Kefauver (D), Tennessee, tracked down a Washington rumor recently and found it came from his own front door. On a recent television interview, Kefauver was asked about a report he intends to sell his house. He was asked: might this be a clue that he hopes to move into the White House in early 1957? The senator replied he isn't a presidential hopeful and he didn't even know his house was up for sale.

Mrs. Kefauver then recalled that the senator had once mentioned casually to his family that it might be well to get a larger house because the four Kefauver children were growing up. All four children disented, because they liked the neighborhood.

Kefauver's 13-year-old daughter met him at the door a few days later and suggested she might have a solution. There was a vacant lot nearby where a larger house could be built and they could still live in the same neighborhood. As far as the senator can determine, that's the way the rumor got started.

LEGAL NOTICES

NOTICE STATE ENGINEER'S OFFICE
Number of Application RA-1427 A into RA-3412, Santa Fe, N. M., May 11, 1955.

Notice is hereby given that on the 9th day of May, 1955, in accordance with Chapter 131 of the Session Laws of 1951, Valley Gin Co., of Artesia, County of Eddy, State of New Mexico, made application to the State Engineer of New Mexico for a permit to change location of shallow well and place of use of 3 acre feet of shallow ground water per annum by abandoning the use of Well No. RA-1427, located at a point in Lot 8, Section 6, Township 16 S. South, Range 25 East, N.M.P.M., for the irrigation of 1 acre of land described as follows:

Subdivision N. 10' of Lots 3 and 4, Section 5, Township 16 S., Range 25 E., Acres 0.6

Subdivision Pt. SE 1/4 SE 1/4, Lot 6, Section 5, Township 16 S., Range 25 E., Acres 0.4

and commencing the use of domestic Well No. RA-3412, located at a point in the NW 1/4 NW 1/4 of

Section 11, Township 16 South, Range 25 East, N.M.P.M., for the irrigation of 1 acre of land described as follows to be used for industrial purposes:

Subdivision NW 1/4 NW 1/4 NW 1/4, Section 11, Township 16 S., Range 25 E., Acres 1.

No additional rights over these set forth in Certificate and License No. RA-1427 are contemplated under this application.

Appropriation of water from all sources combined not to exceed a total of three acre feet per annum. Any person, firm, association, corporation, the State of New Mexico or the United States of America, deeming that the granting of the above application will be truly detrimental to their rights in the waters of said underground source, may protest in writing to the State Engineer on that date, being on or about the 17th day of June, 1955.

JOHN H. BLISS,
State Engineer.
5/24-31-6/7

NOTICE OF FORECLOSURE SALE

NOTICE IS HEREBY GIVEN that the undersigned, E. A. Hannah, was appointed Special Master in an amended Final Decree entered herein, wherein Chaves County Building and Loan Association, a corporation, was plaintiff and Orlan H. Syferd, sometimes named as O. H. Syferd, Velma Lee Syferd, The First National Bank of Artesia, a banking corporation, Big Jo Lumber Company of Artesia, a corporation, and Sam Sanders were defendants, being Cause No. 14819 on the civil docket of the District Court of Eddy County, New Mexico, the same being a suit for judgment on the balance due on a promissory note in the original amount of \$5,000.00, the balance of principal being \$3,612.93, dated January 9, 1951, executed by O. H. Syferd and Velma Lee Syferd, payable to the Chaves County Building and Loan Association; also for interest, attorney fees, money advanced for payment of 1953 taxes and costs of bringing the abstract to date for the purpose of foreclosure, and costs to foreclose a Mortgage Deed securing said indebtedness.

NOTICE IS FURTHER GIVEN that the undersigned will sell at the front door of the Court House in Carlsbad Eddy County, New Mexico, on the 21st day of June, 1955, at the hour of 10 A. M., to the highest bidder for cash, subject to the confirmation of the Court, the following described real estate lying, being and situate in the City of Artesia, Eddy County, State of New Mexico, described as follows, to-wit:

Beginning at a point 45 feet South of the Northwest corner

of Block 33, Fairview Addition to the City of Artesia, Eddy County, New Mexico, as shown by the official plat thereof on file in the office of the County Clerk, thence South 55 feet, thence East 160 feet, thence North 55 feet, thence West 160 feet to the point of beginning.

The amounts due on such judgment on the date of sale, exclusive of costs of Notice of Sale, are:

Principal amount	\$3612.93
Interest to date of sale	163.12
Money advanced for payment of 1953 taxes	77.51
Costs of bringing abstract to date for purpose of foreclosure	37.25
Attorney fees	361.29
Court costs	11.75
Special Master's fee	15.00
Cost of recording Special Master's Deed	1.50
TOTAL	\$4282.35

The proceeds of said sale will be applied to the payment of plaintiff's judgment and the costs in this action, including costs of sale, and, after paying the amount due the plaintiff, the balance shall be placed in the hands of the Clerk of the District Court, subject to the further orders of the Court.

Alfalfa Mustard Controlled By Right Chemicals

Results of two years' testing in Bernalillo county show that tansy mustard in alfalfa can be easily controlled by the chemicals MCP and 2,4-D.

According to Curtis A. Grimes, Bernalillo county extension agent, these weed killers have made 85 to 95 per cent wills of tansy mustard at the Valley Gold Dairies farm near Albuquerque.

Both chemicals were applied at the rate of 1/2 pound per acre. Cost of material was \$1.07 an acre for MCP and only 72 cents an acre for 2,4-D. The tests were conducted by the department of either material should be applied agricultural services at New Mexico A&M college.

The weed killers were applied in the early spring when the tansy mustard plants were at their largest age and the alfalfa was just beginning to grow. Test plots were sprayed with conventional equipment, which applied 13 to 15 gallons of solution per acre.

The quality of alfalfa hay at the Valley Gold Dairies farm has been improved greatly by the absence of tansy mustard, says George Honea, manager of the farm.

As MCP was only slightly more effective than 2,4-D and cost \$1.00 and acre more, the cheaper material will probably be more popular with farmers. For best coverage, when used is very low.

In spite of a tight quarantine, pink bollworms have sneaked into about 90 previously uninfested counties in the U. S. in the past four years.

USDA entomologists thing they

RED LEADERS APPEAL TO TITO TO COME BACK

By-passed the boundaries by taking to the aid. The researchers admit pink bollworm moth are weak flyers, but Department entomologist P. A. Glick claims they are wonderful fliers.

He made 37 plane flights over northern Texas and trapped a dozen pink bollworm moths hitchhiking on the wind from 100 to 1,000 feet in the air. He caught one of the highest flyers over a desolate stretch of cactus, mesquites, and grass 15 miles from the nearest cotton field. There seems no way at present to regulate this use of the air lanes.

Foresters estimate that more than half the growth of saw-timber trees in the United States takes place in the South.

Large Hereford Beef Cows Hold Edge Over Compact

Eight-year results of a New Mexico A&M college experiment show that in weight-for-age selections, large Hereford beef cows—long legs and body—hold the edge over compact cows of the same breed.

John Knox, head of A&M's animal husbandry department, says that the study indicates that large cows stay in the herd almost a year longer than the compact type. In calving percentage, the larger cows bested the others by 10 per cent, with a 96.5 per cent calving record.

The margin continues at weaning time—93.8 per cent calves weaned from large cows, compared with only 81.6 per cent for the smaller compact animals.

On a herd lifetime average, the large cows produced 1 1/2 more calves.

On an average for the entire breeding herd, the weight of calves from large sows averaged 100 pounds heavier than the calves from compact cows.

When the calving figures are interpreted on the basis of average calf weight for each 1,000

MARSHAL TITO, president of Yugoslavia, listens with interest as Nikita Khrushchev (left), Soviet Communist Party leader, and Russian Premier Nikolai A. Bulganin (right), appeal to him to return to the Cominform from which he was ousted in 1948. They blamed his expulsion on false reports as they opened talks in Belgrade. Yugoslavia will not be drawn back into the Soviet camp, it was said. (International)

pounds of cow in the herd advantage for the large cow still 47 pounds more calf per animal. Calves from large cows show the highest average daily gain, too.

During the course of the experiment, more than 20 lots of were marketed. It's a toss-up as far as carcass grade of calves is concerned.

Sure, the big cows eat but only in direct proportion to the difference in body weight between large and compact of the test shows.

RAILROAD BRIDGE OUT
PUEBLO, Colo. (AP)—Resumption of service was expected today for the Santa Fe Railroad's main line between Newton, Kan., and Querque with restoration of bridge near French, N. M.

Road officials said the bridge uprooted by a shifting carload of poles. Trains were routed the Amarillo.
