Hope, N. M., Friday, June 7, 1946

Dwight Lee Elected Sheriff

ELECTION RETURNS
The election returns from the Hope precinct are as follows:
For U. S. Senator—Dennis Chavez 17; John J. Dempsey 117.
Representative in Congress—Cecilia Cleveland 7; Fernandez 11; Lusk 78; Jones 55; Tackett 10; Case 9; Martinez 0; Burke 29.
For Governor—Roach 27; Mabry 28; Barker 43; Grissom 24; Herrera 2; Gooch 16.
For Lt. Gov.—Smith 32; Montoya 5; Lopez 3; Stringfellow 3; Monroe 6; McCarthy 13; Seefeldt 0; Krannawitter 18; Clayton 46.
For State Auditor — Romero 11; Dowdy 21; Stone 81.
For State Auditor — Trujillo 14; Lucero 8; Flaska 14; Castner 79.
For State Treas. — Ormsbee 20; Bingham 68; Rodgers 32; Gallegos 2; For Atty. Gen. — McCulloh 20; Murphy 63; Watson 59.
For Supt. of Schools — Rose 62; Clark 60; Ludi 2; Duran 2; Jaramillo 1.
For Com. of Public Lands—Miles 77.
For Cor. Commissioner — Bassett 39; Velarde 2; Armijo 9; Jernigan 25; Martinez 0; Johnston 49.
For Justice Supreme Court—Kool 14; Sadler 49; McGhee 104; Zinn 5; Sedillo 2.
State Rep. Hogue 19; Brand 28; Alford 29; Dean 45; Melton 42.
For Co. Com., Dist 1—Windham 90.
For Co. Com., Dist 2—Watson 123.
For Co. Com., Dist. 3—James 76; Parchman 28.
For Probate Judge—White 104.
For Co. Clerk—Wilcox 112.
For Sheriff—Sedberry 40; Lee 86; Sikes 16.
For Assessor—Westaway 110.
For Co. Treas.—High 108; Everett 27.
For Co. Supt.—Thomas 109.
For Co. Surveyor—Lewis 111.
For Justice of the Peace—Rood 109.
For Constable—C. Schwalbe 79.

PINON NEWS

Thunder showers sure looked good in our community Sunday. We hope for more soon.
Billie Gage returned Thursday from El Paso. We are glad he is doing nicely.
It looks good to see Mug Gage back a civilian again.
A crowd worked on the graveyard Thursday.
We are sorry to hear of the death of Mrs. Brantley. We extend our

sympathy to relatives and friends.
Mrs. Clarence Stevenson, Alvie and Lessie Smith were Artesia visitors Saturday.
Mr. and Mrs. Lewis Powell and children were visiting in Pinon Thursday.
Mrs. Dan Smith has been seriously ill the past week.
Mr. and Mrs. Glenn Stevenson, Mr. and Mrs. J. W. Stevenson and Jack and Mr. Jerry Allsup were supper guests in the Don Merritt home Sunday night.

BETH SCHNEIDER MARRIED IN ROSWELL

Miss Beth Schneider, daughter of Mr. and Mrs. George Schneider of Hope, and William M. Fullingim, son of Mr. and Mrs. Guy Fullingim of Roswell, were married in Roswell, Thursday, May 30 at 2:30 p. m. Those that were present at the ceremony were Mr. and Mrs. Geo. Schneider, Mr. and Mrs. Fullingim and one daughter, Frances, Mrs. Raymond Norris, Malynda Beverage and Harold Gaston. After the ceremony they all gathered at the home of the groom's parents for supper. William Fullingim is employed at the Sinclair Service Station in Roswell.

HOPE NEWS

Mr. and Mrs. Hubert LaRose and daughter Marie, of Robstown, Tex., who visited at the W. E. Rood home last week left last Friday for Minnesota. They were accompanied by Mrs. W. E. Rood. They will visit relatives and friends at Owatonna, Fairbault, St. Paul and Randall, Minn., before returning home.

Mr. and Mrs. Hilary White were visiting friends in Hope last Saturday.

Chester and Cot Schwalbe were business visitors in Artesia last Saturday.

Mr. and Mrs. Rufus Stinnett passed through Hope last Friday enroute to the George Teel ranch, where they enjoyed a steak fry.

Mr. and Mrs. Jess Musgrave returned Tuesday from Texas, where they had been visiting their daughter, Alta, and her husband.

Newt and Ezra Teel plowed their gardens last Friday. That is, the little red mule did the work.

Jess McCabe, who was injured recently by falling off a trailer attached to a baling machine, was able to be out on the streets Tuesday. We are sure glad to see him out.

Johnson Brothers have a nice field of barley, but their corn is thick as hair on a dog's back.

Mrs. Raymond Madron underwent an operation last Friday at the Municipal Hospital at Artesia. She is getting along nicely.

Mr. and Mrs. Charles Hanna went to Artesia Monday to stay at Jack Hanna's place while Jack and his wife and family go to Arkansas to visit relatives for ten days.

Ford Hanna left this week for Alamo, where he will take a course in electric refrigeration.

Mr. Charles Cope returned Monday from visiting Mr. and Mrs. Hubert Cope in Carlsbad.

Howell Gage was calling on friends in Hope Monday. His waist line is expanding.

Mrs. Andy Teel left Thursday for Los Angeles, where she will visit her mother and several brothers and sisters for about a month.

Those who held the election Tuesday were Charles Cole, Mrs. John Teel, Lawrence Blakeney, Mrs. Ethel Altman, Mrs. A. A. Smith, Mrs. Maurice Teel, Mrs. Ailene Bell, Mrs. Dick Carson and Mr. Irving Cox.

Mr. and Mrs. Homer Schwalbe of El Paso were here the past week visiting Mr. and Mrs. Cot Schwalbe and Mr. and Mrs. Chester Schwalbe.

Dennis Chavez Defeats Dempsey

In the three races in the state Democratic primary Tuesday, which seemed to hold the center of attraction here, the probable nominees are Senator Dennis Chavez to succeed himself, Thomas J. Mabry for governor, and Dwight Lee for sheriff of Eddy County.

While unofficial returns are not complete as yet, the incomplete count over the state gives 26,644 votes to Senator Chavez to 21,970 for Gov. John J. Dempsey, his only opponent. In Eddy County the governor was the favorite for the Senate post, polling 1718 votes to 1445 for the incumbent in 22 of the 26 precincts.

Incomplete state returns for the governorship gave Mabry 16,392 votes to 12,429 for William J. Barker, his nearest opponent in a field of six. Mabry likewise was the favorite in Eddy County at large, the unofficial and incomplete count giving him 1134 votes to 775 for Barker. But in North Eddy County Barker was the leader with 300 votes, while Burton Roach was second with 247, Harley O. Gooch, third with 178, and Mabry fourth with 164.

Lee, a former Eddy County sheriff, in winning the Democratic nomination for that office, polled more than his two opponents together, according to incomplete returns. The unofficial count in 22 of the 26 boxes gave Lee 1863 votes, while Mike Sedberry polled 1163 and J. H. (Jim) Sikes, 493. North Eddy County gave Lee 612, Sedberry 339, and Sikes, 188.

In the only two other contests for nomination in Eddy County, W. L. (Bill) High, incumbent, polled 2434 votes to 739 for Howard Everett for treasurer, while R. L. (Bob) James, incumbent, was nominated to succeed himself as county commissioner of the third district by a vote of 1775 over 766 for E. W. Parchman.

Rep. Antonio M. Fernandez led the field of eight candidates for Congress in the state for one of the two nominations. Incomplete returns indicated that either Lt. Gov. J. B. (Jawbone) Jones or State Superintendent Georgia Lusk would receive the other nomination. The state vote: Fernandez, 16,098; Jones 12,179; Lusk 11,665; Cleveland 4817; Tackett 5905; Case 5507; Martinez 8508; Burke 7111.

Mrs. Lusk was far out in front in both North Eddy County and the county at large, with Jones taking second. J. L. Burke, Jr., was third in the county and Fernandez was fourth, while in North Eddy County their positions were reversed.

Joe M. Montoya is the probable nominee for lieutenant governor, polling 9078 votes to 8574 for Dr. M. S. Smith in a field of 10, according to returns from 436 precincts. In Eddy County and North Eddy County respectively the returns showed: Montoya 401, 49; Smith 695, 250; Lopez 131, 30; Stringfellow 88, 22; Monroe 222, 70; McCarthy 371, 131; Seefeldt 37, 22; Sena 15, 2; Krannawitter 161, 100; Clayton 815, 294.

Sidney J. Stone led the state for secretary of state with 13,355 votes, to 10,639 for Mrs. A. M. Romero and 5811 for Velma Dowdy. Eddy and North Eddy Coun-

ty votes: Stone 1672, 619; Romero 605, 132; Dowdy 549, 192.

In the Democratic state auditor race, Robert Castner led the state and county. State, county, and North Eddy tabulations: Castner 9187, 1311, 420; John A. Flaska 7260, 1047, 115; E. D. Trujillo 6120, 297, 113; Mrs. Blanche E. Lucero 5949, 514, 144.

Other state candidates, giving incomplete state and Eddy County and complete North Eddy County returns:

State treasurer—H. R. Rodgers, 9990, 1039, 330; R. L. Ormsbee 6798, 703, 243; John Bingham 6419, 897, 339; Ralph Gallegos 5682, 210, 52.

Attorney general—C. C. McCulloh, incumbent, 11,057, 814, 286; John D. Murphy 9395, 907, 265; William A. Watson 6930, 927, 362.

Superintendent — Charles L. Rose 10,937, 1730, 364; L. W. (Larry) Clark 8875, 1020, 517; Philip Ludi 1988, 68, 13; Apolonio Duran 2503, 88, 31; Filbert Jaramillo 3507, 82, 39.

Corporation commissioner—R. L. Johnston 7854, 1031, 339; Charlie E. Bassett 7564, 781, 283; George W. Armijo, incumbent, 4337, 163, 44; Arsenio Velarde 1594, 40, 10; Tom Jernigan 5765, 594, 214; Paul A. Martinez 3779, 124, 27.

Justice of Supreme Court, two to nominate—Chief Justice Daniel K. Sadler, for re-election, 14,857, 1049, 390; District Judge J. B. McGhee 13,660, 2242, 708; Albert R. Kool 8564, 263, 107; Filo M. Sedillo 7205, 162, 42.

The probable nominees for state representative from the 19th district, comprising Eddy and Lea Counties, are Dudley Brand and Travis B. Dean, both of Hobbs.

Votes for the five candidates, giving the Eddy and Lea County unofficial returns and the totals: Brand 1901, 665, 2566; Dean 990, 1290, 2280; Frank A. Alford 1625, 254, 1879; Joe R. Melton 1422, 420, 1842.

Buster Wood, who is employed at the penitentiary at Santa Fe, was here the first of the week.

D. W. Carson is harvesting a mighty good looking crop of barley this week.

Henry Crockett has finished harvesting his barley. It turned out a good yield.

Mrs. Gene Kinder and two children were here this week visiting Mr. and Mrs. Will Keller.

Mrs. Jennie Schwalbe, who had been visiting Chester and Cot Schwalbe, was taken suddenly ill Wednesday and was immediately taken to the hospital at Roswell Wednesday afternoon. Her many friends here hope there is nothing serious.

Uncle Sam Says

Millions of you await your newspaper boy every day. He is important to me and to you. He is the citizen of tomorrow. He may be your lawyer, doctor, business man, mechanic, engineer, manufacturer, and, perhaps, your President. \$30,000 newspaper boys like Jimmy sold \$179,823,928.50 in War Stamps and Bonds. Now that the war is over, Jimmy hasn't stopped buying savings stamps and bonds. I am proud of the way Jimmy backed the attack against our enemies—I am equally proud of Jimmy now for backing his future.

COMMENTS ON THE ANNIVERSARY OF V-E DAY

By the Secretary of War

Secretary Robert S. Patterson

On the first anniversary of V-E Day, our entire nation recalls with pride and deep gratitude the victory of our fighting men and women over the Nazi hordes. By their heroism and their stubborn will to win, they mastered a monstrous and evil war machine whose goal was world tyranny. So long as free men continue free, their deeds will be remembered.

But the tragic cost they paid that we might have peace, imposes on us as a nation a lasting responsibility so to conduct ourselves that the peace shall not be lost. What they achieved in their courage and their sacrifice, we must maintain. The high honor we pay them on this day, if it is not to be merely a tribute of words, must be accompanied by a firm resolve to carry out the obligations they have committed to us.

V-E Day is a reminder of their victory and our duty.

By the Chief of Staff

General of the Army Dwight Eisenhower

The first anniversary of VE-Day inspires the Army to reaffirm its faith in human dignity and in the freedom for which so many fought and died. It serves to remind us that the nations will not have fulfilled their obligation to those who won the victory until lasting and universal peace has been established. The need for continued, unified effort and personal sacrifice did not end when the guns stopped firing in Europe.

The fighting men of the Allied nations gave us our second opportunity in a generation, possibly, even, our final one to eliminate the inhumanity of war from a world that can afford no more war. The cost of carrying on the struggle to complete the victory through measures that promote stabilization in a troubled world is small indeed, compared to the frightening possibilities they are intended to diminish. The men who wear the Army's uniform are dedicated to the task of bringing to our country the priceless reality of security; they are buoyed by the hope that growing confidence and trust among all peoples will bring a day when the trade of the fighting men is known only to history.

To All My Friends:--

I wish to express my sincere appreciation for the support I received on June 4th from the good people of Hope and Eddy County. I thank one and all from the bottom of my heart.

W. L. (Bill) High
Eddy County Treasurer

WEEKLY NEWS ANALYSIS

**Rail Strike Sets Back Nation;
Shape Big Navy for Security;
Auto Prices Mount With Costs**

Released by Western Newspaper Union.
(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Despite undernourishment, these daughters of Chinese farmer in famine-ridden Hunan province pull implement in rice paddy. Japs killed their water buffalo and manpower has been depleted by war.

**RAIL STRIKE:
Cripples Nation**

The greatest railroad strike in history laid a heavy hand on the nation from one end to the other, curbing traffic and stranding thousands, imperiling the food supply and further disrupting industry and the staggering reconversion program.

Though the government mobilized plane, water and truck traffic, and emergency crews ran some of the trains, the walkout of 225,000 members of the Brotherhoods of Locomotive Engineers and Railway Trainmen over pay demands reduced normal traffic to a trickle. Freight shipments were reduced to minimum of essential commodities and only priority passengers were provided facilities.

The stranding of thousands of travelers throughout the nation afforded the first dramatic effect of the walkout. While many passengers frantically sought hotel accommodations and others curled up on benches in railroad terminals, many railroads permitted travelers to remain in cars on sidings.

In the midst of the paralysis, government conciliators strove mightily to end the walkout after the brotherhood leaders had rejected President Truman's compromise offer of 18 1/2 cents an hour and suggestion for further discussion of work rules changes. In turning down the presidential proposal, union chieftains said that it was even less favorable than a fact-finding board's recommendations providing for a 16 cents an hour raise plus certain adjustments in work rules resulting in increased compensation.

The dramatic rail walkout overshadowed developments in the soft coal dispute in which the government strove to reach an agreement with the United Mine Worker Chieftain John L. Lewis for continued operation of the properties.

Following the precedent set in 1943 when the U. S. seized the mines to avert a prolonged stoppage, Secretary of the Interior Krug entered into negotiations with Lewis for a contract, consulting with the operators over terms to be offered. It was understood that the owners were assured of price increases to cover higher production costs resulting from concessions when properties were returned to them under the new contract.

The dispute over a health and welfare fund found the government favoring such a proposal under joint management rather than sole union control as originally demanded by Lewis.

**FOREIGN POLICY:
Bi-Partisan Backing**

Minority leader of the senate foreign relations committee and chairman of the Republican senatorial conference, Senator Vandenberg (Rep., Mich.) pledged his support of Secretary of State Byrnes' campaign to win the peace by pushing for recognition of U. S. principles in treaty making.

While admitting the failure of the Paris conference of foreign ministers, Vandenberg, who attended as an adviser to the U. S. delegation,

declared the proceedings had solidified American determination to write a peace "for keeps" based on justice and not vengeance. Though based upon the moralities of the Atlantic and San Francisco charters, the new foreign policy also recognized the practical necessities of postwar rehabilitation, he said.

Besides calling for the establishment of permanent governments to assure resumption of normal activities, Vandenberg said the U. S. aimed to settle the Germanic problem affecting all of continental Europe. While advocating maximum protection against future aggression, he condemned repressive demilitarization.

Touching upon the age-old problem of national minorities, Vandenberg declared that the new U. S. policy also favored their incorporation into their native countries or other suitable recognition to prevent them from becoming sources of conflict or expansion.

**NAVY:
Taking No Chances**

Calling for a navy adequate to meet any emergency of the future, the house appropriations committee recommended congressional approval of naval expenditures of over 4 1/2 billion dollars during the next fiscal year ending June 30, 1947, for fleet maintenance.

To be manned by 500,000 enlisted men and 58,000 officers, the postwar navy would include 4 battleships, 8 heavy cruisers, 21 light cruisers, 3 big aircraft carriers, 9 carriers, 10 escort carriers, 126 destroyers, 30 destroyer escorts and 80 submarines.

In addition, 2 battleships would be held in reserve along with 5 heavy cruisers, 5 light cruisers, 3 carriers, 1 light carrier, 22 destroyers and 4 destroyer escorts. A total of 632 other warships would be placed on the inactive list.

Besides regular personnel, the navy plans creation of an organized reserve of 55,000 men and 3,000 officers. Backing up the regular marine enlistment of 100,000 men and 7,000 officers would be a reserve of 60,000.

**NEW CARS:
Boost Prices**

Reflecting administration policy of seeking to assure manufacturers of fair profit returns by granting increased prices to offset higher production costs, OPA authorized a boost of from 4 to 8 per cent in ceilings on new automobiles.

Principal factor determining OPA action was the \$5 per ton increase in the cost of steel, allowed by the government to cover the industry's 18 1/2 cent an hour wage boost. Higher costs of other materials and parts figured in the OPA grant, however, with Packard and Studebaker afforded relief for wage adjustments.

With OPA hinting of additional price boosts to come, the latest increases averaged about \$75 per car, and ranged from \$42 for Chevrolets to \$167 for Lincolns. Because retailers' margins already have been trimmed 4 1/2 per cent under prewar levels, the public will pay the latest price hike in full.

Washington Digest

**Atomic War Could Force
Return to Primitive Life**

By **BAUKHAGE**

News Analyst and Commentator.

Mid-June welcomes a gathering to Washington which will deal with a subject more important to you and me than anything I can think of.

The meeting is described as an "institute on the control of atomic energy." At about the same time, the United Nations commission on Atomic Energy will be meeting too.

At the "institute" in Washington, authorities will explain just what effect atomic energy can have on your life if you are one of those who aren't going to be destroyed by it. I was going to say "one of the lucky ones," but you won't be lucky, if atomic warfare starts; even if you are among those whose lives are spared.

We have all heard a lot of dire prophecies about what the atom bomb can do, if it once gets on the loose. Also, what wonders atomic energy can perform in building a better world, if it is confined to peaceful and productive activity.

But by far the most impressive footnote on the subject came to me in the repeated words of a scientist speaking not scientifically, or for quotation, but very intimately of his own private thoughts, and his own personal plans.

He has lectured a great deal on the subject of atomic energy, and is one of those intimately concerned with its development. Suddenly, one day he realized that he had better make some personal plans to prepare for the future in this atomic age of which he had spoken so much. His work is near one of the several prime targets of any enemy bombs that would be dropped.

**No Refuge
From A-Bomb**

So he began to consider. Should he try to get transferred to some smaller institution, located in a little town? That, he considered, would not help much. He has a farm, but he is not a farmer. Should he move onto the farm immediately, learn as much as he could about farming, and plan to live there where he would be comparatively safe? The farm is far from any large city, tucked in the hills.

Then he started planning. He would have to learn a lot more than farming. He would have to learn to card wool, for instance; his wife would have to learn to spin, to weave, to make soap, to fabricate all the things you buy in stores.

He would have to lay in tools, and enough other supplies to last him the rest of his lifetime.

Well, perhaps all that could be done. Then he realized that even at that, he wouldn't be safe. He would have to build barbed wire entanglements, and obtain machine guns and other weapons with which to defend himself . . . for with the refugees who escaped, starving, from the cities, the few who had food would be at the mercy of the hungry mobs.

If I had heard those statements from a lecture platform, or read them in a magazine, I might have passed them by as sensationalism. But the statements weren't in a magazine, or spoken from a platform. They were said over the luncheon table in the quiet corner of a club. The speaker wasn't trying to "sell" his ideas to anybody. He wasn't trying to persuade anybody to do anything, or to get publicity. He was thinking out loud about what he considered an acute personal problem.

In the end it left him baffled. There is no defense.

The only hope is to make the United Nations work.

I heard this story, and was moved by it. I was already pretty well stirred up, because I had just learned of what deep concern this question is to more than three thousand people who wrote me, asking for a pamphlet I had mentioned in one of my broadcasts.

That is an interesting story, too, that I want to pass on.

One day, I received a little pamphlet among the several bushels of handout material which is the grist of the publicity mills dumped on press and radio desks all over the country every day.

This pamphlet caught my eye and held it. It was a reprint from Look magazine entitled "Your Last Chance." You may have seen it. It moved me so much that I just couldn't help talking about it on the air, and offering to pay for the first 500 pamphlets requested, providing a stamp was enclosed.

I limited the requests to people in the following categories: insurance men, salesmen, real estate men, teachers, clergymen, mechanics, utilities workers, scientists and merchants.

I did this, first, because I wanted to limit the number of applicants, and second, because the article contained specific instructions as to what the people in the groups named could do to help prevent a cataclysmic war. I blandly overlooked the fact that somebody had to address envelopes, insert the pamphlets, mail them out.

**Public Interested
In Prevention**

Requests began to arrive, so I called up the National Committee on Atomic Information which is near the Washington office of the Western Newspaper Union; ordered the pamphlets; and had the nerve to ask the committee to mail them out.

I didn't know it then, but it costs the committee, which is, of course, a non-profit organization and skimps along on a handful of small cash donations, four cents for the pamphlet, a cent and a half for the stamp, two cents to address the envelope, another cent to insert, seal and mail! Eight and a half cents, altogether. My generous gesture toward preserving civilization had turned out to be rather lame.

But that was only the beginning. An avalanche began to descend on me. At last count the requests reached over three thousand. The committee didn't know what to do. The letters came from such an intelligent and earnest set of people who were so anxious to do something that the committee hated to disappoint them.

Twice, I begged the public to hold off, but the committee is still filling the requests while its funds hold out, or more donations come in. Which is what happens when you get an atom by the tail.

**Questions Popularity
Of Rail Nationalization**

Just after the bulletin came in over the news ticker in my office announcing that the government intended to take over the railroads, a railroad man happened to call me up about another matter.

I congratulated him on his new job with Uncle Sam. He wasn't very enthusiastic. He speculated on whether or not the men would go back to work if the government ordered them to do so. The miners, you recall, refused to obey government orders when the government took over the soft coal mines during the war.

"Everybody ought to go on strike in the country," he said. "If it gets bad enough, it may get better."

We mentioned the possibility of permanent government ownership of the railroads. My friend reminisced a little on the days when he was an employee of Uncle Sam once before, in World War I, when the government did (to its sorrow) take over the railways.

He said what happened then was that a man would come up to the ticket window and demand a drawing room. Sorry, there were no more drawing rooms. Well, do you know who you're working for, and who I am? I'm Senator Claghorn, and you'll (something-something)—well, get the passenger out of that drawing room, and put me in it!

My friend said he didn't think the people would like it if the government took over. Of course, we don't like the black-berth-market now, either. Time and again, every Pullman seat or berth will be reserved by the blackmarketeers. They hold them up to the last minute, and if they can't sell at a premium, they cancel, just before the train leaves, half empty. The Chesapeake and Ohio ran an advertisement recently, begging the public to refuse to pay the premium, and help get a regulation through which will provide for cancellation of reservations within a reasonable time.

**As a Last Resort
Client Got Dupage!**

The client had dialed a number on his phone and was waiting.

"This is Dupage, Dupage, Browne and Dupage, attorneys at law," finally came over the wire.

"Can I speak to Mr. Dupage?"

"I'm sorry, but Mr. Dupage is in the East, sir."

"Then can I speak to Mr. Dupage?"

"Sorry, Mr. Dupage is ill."

"I'd like to speak to Mr. Browne, please."

"Mr. Browne left for St. Louis last night."

"Well, then can I speak to Mr. Dupage?"

"Mr. Dupage speaking."

Hessian Fly Always Troublesome Factor

Proper Sowing Dates Protects Winter Wheat

By W. J. Dryden
Until recently little damage has resulted to spring wheat from the hessian fly. With winter wheat it has been another question. In the past two years several states have reported outbreaks

Hessian fly maggots beneath leaf sheath in the soil.

among spring wheat. After a succession of cool seasons with good rainfall several outbreaks were reported. At the North Dakota experiment station it was found that the Mida variety of wheat showed a high degree of resistance to the hessian fly. The Mida was not immune to the hessian fly, but its resistance was strong enough to make loss negligible.

Kansas State college found that the Pawnee is highly resistant to the hessian fly in that district. Other strains have been developed in other states.

With winter wheat, the USDA has determined the fly injury may be avoided by safe sowing dates. These dates range from September 16 in the latitude of central Michigan to October 27 in that of central Georgia. The exact safe date in any locality may be determined from state agricultural specialists.

Portable Saw Aids Pasture Expansion

Converting waste brush and timberland into profitable green pastures is an important job being performed by new portable power saws developed in the southwest as an aid to farmers whose land is covered by undesirable undergrowth.

In field operation the cutting blade is horizontal. For cutting logs to length, the blade can be raised to a vertical position. The Kraft Foods company are assisting farmers by making the portable saw available on a loan basis. By this plan they hope to assist dairy farmers to produce more milk on available acreage.

Wheel Foot Scraper

Foot Scraper Made of an Old Iron Wheel.

This type of foot scraper utilizing an old wheel with a somewhat broad rim. The wheel is slipped over one end of a round stake which has in turn been driven into the ground. About two inches from the top end of the stake a hole should be bored and a bolt thrust through to keep the wheel off the ground, allowing it to rotate and always present a clean edge.

In These United States

Nine American Women Receive Camp Fire Girls Silver Medal

NEW YORK CITY.—Nine American women who have given outstanding service in the field of girl guidance have been awarded silver medals, it has been announced by Miss Martha F. Allen, national executive of Camp Fire Girls, Inc.

TEXAN . . . Mrs. Eunice LeBlanc of Beaumont, Texas, winner of a silver medal, given for outstanding service in the field of girl guidance.

Injured While Shoeing Aged Shetland Pony

EDGEWATER, COLO.—"Red" Schaeffer's face is really red! A seasoned village blacksmith in Golden, and a former bronco buster, Red doesn't know yet how it happened.

"I have a horse I want shod," a woman telephoned him. "He's 33 years old—a Shetland pony."

Schaeffer went out and did the job. A few days passed and Red began complaining about a pain in his chest. The doctor took a look at him and pronounced it a broken rib.

Red finally admitted that the old Shetland pony did "press his foot" against Red's chest during the horseshoeing.

Tung Orchards Are New South Industry

TALLAHASSEE, FLA.—Tung oil, for thousands of years an Oriental monopoly and closely guarded secret, is back from war and ready to lend its magic qualities to peacetime uses. Known as "Chinawood oil" in the paint and varnish industry, which takes most of the U. S. tung production, this magic fluid is rapidly finding new uses in industry and agriculture.

Grown in a belt along the coast of the Gulf of Mexico from Gainesville, Fla., through Georgia, Alabama, Louisiana and Mississippi, tung orchards are an early indication of spring. Their five-petaled, pink and white blossoms have come to mean to the upper Florida peninsula what the orange blossom means to central Florida.

Marshall Ballard Jr., secretary of the American Tung Oil association, says that "to the southern American farmer, large or small, tung oil today offers a splendid opportunity for a good cash crop."

Determined from annual reports submitted to national headquarters in New York City, the awards this year, as in previous years, are based on the important contributions made by women volunteers in planning all-around programs for their Camp Fire groups.

The organization's silver medal, which bears the Camp Fire emblem of crossed logs and flame, was awarded to Mrs. Edward Shepter, Baltimore, Md.; Mrs. Helen A. Davis, St. Augustine, Fla.; Mrs. Eunice LeBlanc, Beaumont, Texas; Mrs. Howard Wood, Berkeley, Calif.; Mrs. Grace Hawkins, Spokane, Wash.; Mrs. Alma Hastings, Overland Park, Kan.; Mrs. Orville Hanson, Hawley, Minn.; and Mrs. Alveda Hoeker, Mishawaka, Ind.

The winners, who represent a cross-section of American womanhood, devoted themselves wholeheartedly to providing for the leisure time needs of Camp Fire girls, even though they themselves had their own families and household responsibilities to care for. In addition to planning health and character-building programs for their groups, they also aided the many social, welfare and health agencies with which Camp Fire co-operates. During the war the volunteers directed their Camp Fire groups in many patriotic activities, which included selling war bonds, collecting canned foods and clothing for UNRRA, assisting in the "March of Dimes" campaign, and "adopting" war orphans.

CALIFORNIAN . . . Mrs. Bernice Wood, Berkeley, Calif., honored by the Camp Fire Girls for outstanding service. She was a member of the AWVS for four years.

Horse, 51, Dies

MELBOURNE, AUSTRALIA.—Nigger, acclaimed recently as the oldest working horse in the world, died here at the age of 51. Owned by John Croker of Fosteray, Nigger died in the harness. He was still doing light work, but was too old and slow to get out of the way of a bus.

MAIDEN ROCK . . . Childheart, the Indian girl, still looks across the valley, awaiting the return of Red Hand, her warrior lover, near Bozeman, Mont.

VERY WONDERFUL . . . Mrs. Lois Bernhardt, wife of vet, finds housekeeping "thrilling" even after she typed Japanese surrender terms. Robert Bernhardt, husband, attends Iowa State college at Ames.

NOW A HOMEBODY

From the World Stage To an Iowa Kitchen

AMES, IOWA.—Stenographer, housekeeper, or farm wife, Mrs. Lois Bernhardt can always recall the glamorous part she played on the world stage during World War II, for she can always look back on these experiences:

Typed out the Japanese surrender terms hours before they were made public.

Typed out the charter of the United Nations organization when it was being drawn up.

Attended the Potsdam. Big Three conference as secretary to Secretary of State James F. Byrnes.

Mrs. Bernhardt, formerly Lois Kevans of Schaller, Iowa, who gave up her exciting career for love, is currently employed in the Iowa State purchasing office, while her husband, a childhood sweetheart, studies for a degree in dairy industry.

The good-looking Iowa girl quit her job with Secretary Byrnes last November to marry Robert Bernhardt, with whom she attended high school at Schaller, and traded duties of an international nature for the prosaic job of darning her husband's socks, keeping house and helping out the family budget.

But the change-over hasn't dulled the memory of a wedding where Secretary Byrnes gave the bride away or of a glamorous job where the secrets of international affairs were everyday routine.

After graduating from the American Institute of Business in Des Moines, Mrs. Bernhardt took a job with the war department in Washington. From there it was just a step to a position as stenographer in the state department.

"The first job I had in the state department was the typing of the Japanese surrender terms," she said.

"We knew of the surrender before the announcement was made, but we had to stay in the office. The halls were full of reporters. If any of us had gone out they would have known it the minute they saw our faces."

Previously she had attended the San Francisco conference, where she typed the charter of the United Nations organization.

"I worked on it night and day until it was finished," she said. "There were other secretaries from all the other nations doing the same thing in all the other languages."

And when the Potsdam conference was called, Mrs. Bernhardt again was chosen to do the secretarial work. She acted as personal secretary for Byrnes.

Her husband is a former navy flier who saw service in South America on anti-submarine patrol.

Indian Scout Dies

HOT SPRINGS, S. D.—Ben Ash, age 95, pioneer South Dakota Indian scout, peace officer and cattleman, died here recently at the State Soldiers' home. Ash served as wagon master for General Custer and as an Indian scout during the Meishah war from 1889 to 1890 in western South Dakota. Earlier he had been a deputy U. S. marshal at Pierre and was sheriff of Hughes county. He operated a cattle ranch on the Moreau river in Perkins county for many years. Ash was credited with building the first house on the site of Bismarck, N. D.

"Off We Go" AVIATION NOTES

Airport Chatter
Terrell county, Georgia, has purchased 259 acres three miles from Dawson for an airport. . . . The Aberdeen Flying Service, Aberdeen, Idaho, presented an aerial photo of that city to the local newspaper, which was published—with a credit line. . . . Starr Nelson, age 80, of Delta, Colo., a retired railroad engineer, has bought a plane in which he'll fly to Grand Junction to see his girl as soon as the weather makes it safe to hop Colorado's cloud-tickling peaks. . . . B. A. Otte of Goodland, Kan., recently flew to the State of Washington. . . . Jim Eccles, flying instructor at Wolf Point, Ark., municipal airport, has added a Fairchild PT-23. . . . Nancy Fowler of Glacier Park was recently interviewed over a radio hookup relative to her hunting coyotes from a plane. Her pilot, by the way, was Thor Thorstenson of Plentywood, Mont. . . . Dewey Tatro of the Decorah, Iowa, airport has graded three runways to provide landing facilities for larger planes. . . . Ray Lauterbach, an Iowa flying farmer, who lives near Sumner, needed parts for his light plane in a hurry recently and flew over to Decorah to get them. . . . Former Lt. Ted Carroll of the AAF is now an instructor at Decorah, Iowa.

Roger C. Lane, Florida beekeeper, and his Silvaire.

PLANE QUIZ

Q. Did the helicopter see active service during World War II?
A. Yes, on Atlantic anti-submarine patrol and for rescue work in Burma.
Q. How many airports are there in the U. S.?
A. At the end of 1945 there were 3,255 airports. With the completion of the CAA program now underway the number is expected to be doubled.
Q. What is "seat of the pants" flying?
A. It was flying in the old days before there were instruments. When the plane went up or down or tipped, inertia of the flyer's body changed his position in his seat enough for him to feel the difference and he could sense the position of the plane accordingly.

HOUSEHOLD MEMOS... by Lynn Chambers

You Eat Well When You Roast With Care
(See Recipes Below)

Flavorful Meats

There's not much choice of meat in the markets today, but if you are fortunate enough to get any at all, consider yourself supremely lucky. Just in case you've forgotten some of the fine points in preparing meat, I'm going to review some of the rules of good cooking today.

For years, we've been telling you about cooking meats at low temperatures. Rationing and the meat scarcity have probably shown you more dramatically than anything else how important low temperature cooking is to getting the most of the meat. There's less shrinkage and more juicy meat to your credit if you'll keep the oven at 325 to 350 degrees Fahrenheit when roasting.

Another point to bear in mind is that no browning is necessary before roasting cuts of meat. Don't worry about their not browning—they will get well browned even at moderate temperature.

If you are pot roasting, that is cooking meat with moisture and seasonings, you'll want to brown the meat after it's dredged with flour, but this is because the meat is cooked covered with liquid.

Here are some recipes for all types of meats which you may be able to find at least once a week these days. Cook and season carefully so that you will really be able to enjoy the meat to the fullest.

Barbecued Lamb Breast.

(Serves 4)
2 pounds breast of lamb
1 medium onion
½ cup chili sauce
1 teaspoon salt
Pepper
¾ teaspoon red pepper
1 tablespoon vinegar
1 cup water

Cut lamb into pieces. Season with salt and pepper. Place in a hot skillet and let fatty sides brown. Mix chili sauce, red pepper, vinegar and water and pour over lamb. Slice onion and add to the mixture. Cover. Simmer 1½ hours, then remove lid and let cook slowly for 20 minutes or until barbecue sauce is almost absorbed.

Lynn Says:

Learn Meat Magic: If you want a super delicious leg of lamb, baste it with buttermilk while roasting. For lamb loaf, made with fresh meat, add ¾ teaspoon caraway seed for flavor.

If you're shy on meat for meat loaf, make up part of the meat with diced American cheese. Delicious!

Pork chops baked with chili sauce or catsup mixed with prepared mustard make grand and tender eating.

If you want a bread saver stuffing for breast of veal, cook your noodles until tender and use them for stuffing.

LYNN CHAMBERS' MENUS

*Summer Meat Loaf
Potato Salad Wilted Lettuce
Molded Fruit Salad
Wheat Muffins Beverage
Apricots Cookies
*Recipe given.

Pork Chops and Rice.

(Serves 5 to 6)
6 pork chops
½ cup uncooked rice
2¼ cups strained tomatoes
3 tablespoons green pepper, chopped
3 tablespoons chopped onion
2 teaspoons salt
¼ teaspoon pepper
2 tablespoons shortening
Flour

Salt and pepper pork chops and dredge in flour. Melt shortening in skillet and brown chops on both sides. Mix together uncooked rice, tomatoes, salt, pepper, onion and green pepper and pour over chops. Place lid on skillet and cook slowly for one hour.

If you've been looking around for ways to use those leftover pieces of bread, then here's just the recipe for you. It uses both bread crumbs and oatmeal for the stuffing and is truly delicious.

Oatmeal Veal Birds.

(Serves 6)
1½ pounds veal steak, sliced thin
2 cups bread crumbs
1 cup raw oatmeal
1 teaspoon salt
½ teaspoon sage
2 tablespoons bacon drippings
¾ cup water
¼ cut catsup

Cut the veal into six squares. Pound it, season with salt and pepper. Combine the other ingredients, except catsup, and place a little of the stuffing on each piece of veal. Roll and fasten with toothpicks. Brown in hot bacon drippings. Add 1½ cups of water with the catsup to the meat and simmer for 45 to 60 minutes until meat is tender. Thicken gravy with a flour and water mixture just before serving.

*Summer Meat Loaf.

(Serves 8)
1 envelope unflavored gelatin
¼ cup cold water
1½ cups tomato juice
1 tablespoon sugar
1 teaspoon salt
½ teaspoon pepper
2 tablespoons lemon juice
1 pound liverwurst
½ cup mayonnaise
½ teaspoon dry mustard
¼ cup chopped celery
¼ cup chopped green pepper
1 tablespoon minced onion
¼ cup sliced stuffed olives

Soften gelatin in cold water. Add hot tomato juice and stir in sugar and salt, pepper and lemon juice. Allow the mixture to cool and thicken. Remove casing from liverwurst and mash. Add mayonnaise and mustard, green pepper, celery, onion and olives. Then fold the meat-vegetable mixture into the tomato juice and pour into a mold that has been rinsed with cold water. Allow to chill until set. Unmold on platter, garnish and serve.

TRAINING FOR SERVICE

LESSON TEXT — Mark 6:7-13; Luke 10:1, 2, 14:25-27
MEMORY SELECTION — And he that taketh not his cross, and followeth after me, is not worthy of me.—Matthew 10:38.

Workers for God, and with God! Such is the high privilege of the men and women who respond to his call and who go out to witness for him.

Our lesson, in telling of the Lord's calling and sending forth laborers into his harvest field, gives us much helpful instruction regarding service for the Lord. We learn that

I. God Provides for His Workers (Mark 6:7-10).

Jesus sent out his twelve disciples two by two, thus providing every worker with fellowship and help in hours of discouragement and trial. This also served to keep a man in balance so that he would not become self-willed and proud of his own achievements.

It was a wise provision. Perhaps the church should have observed it with more care, and thus have saved some good workers from going astray.

They were not to be cumbered with extra equipment, nor be concerned about their daily sustenance. The Lord would provide through the hospitality and generosity of his people.

Note that the expected hospitality was not to be allowed to hinder their work (cf. v. 10 with Luke 10:7). Many a preacher or evangelist has ruined a series of meetings by letting social life hinder prayer, soul-winning, or preparation for preaching.

II. God Gives Power to His Workers (Mark 6:7, 11-13).

He gave them authority over evil spirits, so that they could drive them out. He gave them power to heal; he gave them power to preach effectively.

The man who goes forth to speak for the Lord does not have to muster up his own puny powers or depend on the weak arm of some human helper. His resources are infinite and omnipotent. He speaks for the Almighty God. He has a message with saving power.

All too often the servants of the Lord are apologetic, and hesitant in their ministry. They mistake weakness for meekness, and in their desire not to assert themselves, they fail to speak a ringing "Thus saith the Lord."

We need a revival of authoritative preaching, of that holy boldness which was not afraid to rebuke sin and any unwillingness to do the Lord's will (v. 11). We need a new emphasis on repentance (v. 12).

III. God Calls Helpers for His Workers (Luke 10: 1, 2).

After the twelve were sent out, he called and commissioned the seventy. That blessed process has gone on ever since. How blessed it is that even in our day of unbelief and sin, hundreds of young men and women are going out to all the mission fields of the world to work with older and experienced missionaries.

Perhaps these words will be read by some young man or woman who has felt the promptings of the Spirit of God to go into his service. Step out by faith just now, and begin to prepare yourself for God's service. If the writer of these notes can be of help to you, do not hesitate to write to him. God is looking for more workers.

Do not overlook the important admonition in verse 2. The Lord is waiting for his people to pray for laborers for fields which stand white and ready for harvest.

IV. God Requires Self-Denial of His Workers (Luke 14:25-27).

The mighty works and the powerful words of Jesus made it impossible for people to ignore him. Multitudes followed him, but he, knowing the fickleness of the human heart, faced them with the real demands of discipleship.

The Lord was never concerned with mere numbers. He wanted followers whose hearts were right. The church has broken down its testimony in the world by its frantic desire for more members, great crowds, large church buildings, at the expense of compromise of testimony.

The requirement of the Lord is unmistakable. A man or woman who is to serve him must put him first. No worldly ambition or earthly friendship, no, not even the tender love of family, can come between the Lord and his servant. He is either Lord of all, or he is not Lord at all.

AROUND THE HOUSE

To waterproof the kerchief you wear on rainy days, place it between two layers of waxed paper and press it with a hot iron.

To straighten out curled rug corners, wring a bath towel out of cold water and place it on the curled spot overnight.

Attach a small pincushion to baby's crib. Then when you're diapering baby, place the pins in the pincushion. This way they can't find their way to the bed where baby can reach them.

Have a Care. If your pressure cooker cools too suddenly it may warp or crack.

If you paint the inside of your linen closet a medium blue, it will keep linens from turning yellow.

Before slicing fatty bacon by hand, chill it firm, and the bacon can be cut in thin even slices.

To loosen a glass stopper, let a few drops of glycerin soak between the stopper and neck of the bottle.

Dashing Steed for Boy

AN OLD broomstick, a piece of scrap lumber, a pattern that gives you actual-size outlines, and presto, you have a dashing, prancing horse.

If you are a little more ambitious, the same pattern gives actual-size pattern outlines for all parts of the toddler bike shown here. If you do not have a jig saw to cut the saddle and wheels, just outline them on the material and take it to your nearest woodworker to be cut.

NOTE: Pattern 257 for the Broomstick Horse and Toddler Bike is 15c postpaid. Send order direct to:

MRS. RUTH WYETH SPEARS
Bedford Hills, N. Y. Drawer 10
Enclose 15 cents for Pattern No. 257.

TURNING POINT

By Mary Imlay Taylor

W. N. U. RELEASE

THE STORY THUS FAR: Sherwin tells Mac that Stenhart is his cousin. It was Stenhart's testimony that convicted Sherwin of killing their uncle. After eight years, he escaped from prison and finally tracked Stenhart to the ranch—to kill him. They went to the stables and got two horses. Old Mac led the way to a trail that led up to the cliff. Hobbling their horses they proceeded on foot to a hidden cabin Old Mac had known about for years. But Jordan was in the cabin! Jordan escaped again. Mac advised Sherwin to skip at daybreak. "I don't believe you did it," Mac said as he rode away, leaving Sherwin to stare after him. Sherwin bedded down in the brush to wait out the night.

CHAPTER VII

There was small likelihood of Jordan following so far, and Sherwin turned back to the mountain path at last, with a feeling that Mac, at least, was safe.

It was half an hour later when he found himself near the cabin again. He had approached from the ledge and stood in the shadow of a live oak, listening intently. Personally, he had no thought that Jordan would return here, for Jordan did not really know how many had been in the attacking party, and he must know that the sheriff was after him with a posse. Sherwin reasoned that he would scarcely venture back that night and, on the other hand, Mac thought that he, Sherwin, meant to leave at daybreak. He smiled grimly, he wanted Mac to think just that! Meanwhile, he hid his food pack and his blanket; he should not starve while he waited. And he intended to wait here until he met Stenhart again face to face.

Sherwin could have believed that his cousin had killed the old man to make sure of his inheritance before the will was changed, but Mac had proved his alibi. There was no one to testify for the newcomer, the nephew who was little known in the neighborhood.

Sherwin had escaped from jail by a mere accident. Two other convicts had tunneled a way out, and at the last moment they invited him to join them. The thought of liberty had set him wild; he had taken their chances, jumped into the river with them, got ashore in the dark and, with their help, changed into another suit of clothes. He had one faithful friend who had taken care of the little money he had of his own. He had got that secretly and, against the pleadings of his friend, started west—after Stenhart!

Search for him had been so far fruitless; he had been advertised, tracked—all in vain. The fates were with him; he would not be taken until he had reckoned with his enemy, the man who had sworn away his liberty. He had found him! Found him making love to a girl who could not know how vile he was, the liar! And that girl—?

Sherwin rose and began to walk to and fro; he had forgotten the outlaws, what were they to him? He was himself an outlaw!

Jane had passed a sleepless night, a new experience for her cheerful youth, and she rose early, dressed in her riding-suit and slipped out into the hall long before breakfast time. She was going out and she did not want questions asked. She had 'phoned to the stables to have Tex saddled and waiting.

The wide old hall was flooded with morning light and, almost unconsciously, her eyes turned toward Jim's desk. She seemed to see Sherwin standing there as on that first night.

She was still there, motionless, when she heard a step behind her. She looked up, startled, and saw Stenhart.

"I didn't know you got about so early," she exclaimed. "How much better you are!"

He took no notice of her little half-hearted attempt at lightness. He came close, looking down at her with his stormy eyes.

"Where are you going, Jane?" he demanded gravely.

She flushed hotly. "Out for a canter before breakfast," she answered shortly.

He did not believe it, she saw that in his eyes, and her flush deepened. He leaned his hand on the desk beside hers. She could feel the emotion that shook him and she dreaded it. She tried to escape.

"I must be going—" she began nervously.

"Jane!"

She raised her eyes reluctantly to his. "You're not fully yourself yet, Max, you look pale—sit down here, let me call Fanny—"

He laughed bitterly. "You can't evade me, Jane. I'm here for my answer. Will you marry me now—at once?"

"Are you quite generous? I asked you to give me time!" she parried.

"I've given you time! I'm hu-

man, Jane, I can't endure this any more. Will you marry me now?"

He had laid his hand over hers on top of the old desk. She felt it trembling as she drew hers sharply away.

"I'm sorry," she said in a low voice, "but I can't!"

"Do you mean not now? Or never?" he was breathing hard.

Jane felt a sudden fear of him, a fear she had never felt of Sherwin, though Sherwin was a convicted murderer! She tried to give him a friendly smile, but her lips shook.

"I mean never, Max."

There was a moment of intense silence. The sweet morning air coming in through the window lifted the soft hair on her forehead; she was pale but her blue eyes shone. Something in his look and his manner angered her.

"I know why, Jane!" he exclaimed bitterly.

"I'm sorry, Max, I must go—I'll see you again at breakfast."

She was still there, motionless, when she heard a step behind her.

He caught her wrist violently. "You shan't go! You're in love with that fellow!"

"You've no right to say that to me!" Jane flashed at him angrily; then she remembered that he had been ill, and relented. "It's all over, Max; can't we be friends?"

He shook his head, folding his arms and standing there, motionless. His expression was sullen, but there was a strange light in his dark eyes.

"Oh, if you don't want to be friends!" Jane turned away proudly. "I'm going out now, Max!" She lifted her chin scornfully. He was behaving like a sulky boy, she thought; she liked to see a man lose like a good sport, like—well, like a brave man!

Stenhart said nothing at all, but she was aware of his tall figure motionless there behind her. She felt his eyes on her back, but she hurried away, ran down the slope to the stable and swung herself into the saddle.

"I'll be back presently, Jose," said she lightly, giving Tex his head. The vacquero stood watching her ride off, a smile on his dark face. "She some rider!" he thought.

Tex had cleared the bridge almost at a bound. The horse was full of pep today, ready to run, but Jane rode like a boy. The man stood watching, shading his eyes with a hand burnt black by the sun. He was surprised at the way she went. So surprised that he jumped when a voice spoke sharply at his elbow.

"Saddle one of the horses, I want one right off!"

The vacquero stared. "You able to ride, Meester Stenhar?"

"Get a move on you! Saddle up."

Jose grinned, saddling a steady horse for this sick man. "He catch up with seniorita, eh?" The grin widened into silent laughter. But he was amazed at the ease with which Stenhart mounted; he did not know that sheer rage can carry even a sick man far.

But, after crossing the bridge, Stenhart slowed down his horse. He had glimpsed Jane far ahead and she might turn and look back; it was no part of his purpose to have her look back! Besides, in spite of her bravado, he was almost swaying in the saddle. Illness had weakened

him and the sunshine seemed amazingly vivid; his eyes ached. But his will power kept him erect on the horse, and he rose steadily. Now and then he lost sight of the rider in front but he knew there was no cross-road and he could afford to give her a long lead. She was not riding so fast now; in a way he sensed that she was looking for some spot, or expected to meet some one. He had had that in mind from the first!

The flame of jealousy within him leaped up and tortured him. He saw nothing of the beauty of the day, the near hills green and brown, the distant blue peaks against the blue sky, the shadows in the canyons, the wooded spurs, the slopes of Las Palomas falling behind him. Presently his horse forded a wide stream. It ran swiftly, and it seemed to him his ear caught the sound of a cataract somewhere in the ravine, then he saw Jane so close ahead that he reined in violently. His horse plunged and he was near discovery. But, happily for him, the girl took no thought of being followed; she had found an unused trail and turned into it. For an instant Stenhart thought he had lost her and his heart beat stormily, then he sighted her through the trees. He dismounted, hid his horse in the brush and followed on foot. Ten yards up the trail she had slipped from the saddle and vanished up a steep ascent. Passing Tex, where he was cropping grass, Stenhart crept after her, treading softly, and, as he climbed, the tumult of the cataract came nearer and nearer; it must be below him now, hidden by the trees. Far up he caught a glimpse of a slender figure still ahead and he followed doggedly.

Sherwin had slept heavily, physically exhausted, and it was sunrise when he awoke. The solitude of the wooded height seemed drenched in peace. He saw only great tree-trunks about him, and the sun had not yet penetrated their dense shade. Somewhere a bird sang sweetly. For a moment it seemed impossible that he had fallen asleep with hatred in his heart, but his first waking consciousness brought it all back; he was to stay here, hidden, until he killed Stenhart! Nothing less would satisfy his thirst for vengeance.

He opened his food pack and ate sparingly; there was a lovely spring close at hand, and he lacked for nothing now. His meal finished he rose and began to explore the place; it was evident that Jordan had not returned. There was no sound but those innumerable small noises of life in the woods, and the music of the cataract far below him. He moved on in profound leisure, and since he did not now intend flight he had ample time on his hands.

Presently he came upon a rocky ledge and, as he climbed, his foot slipped, and he rolled down into some brambles and felt a strong current of air. Only slightly bruised from his fall, he rose to his knees and found that he had torn the brambles away from the open mouth of a cavern. The keen breeze that came from it lifted the hair on his forehead; there must be another opening somewhere. Curiosity made him explore carefully.

No one had known of this spot; it was webbed with cobwebs, choked with roots, and he pushed them aside and entered, stooping. To his surprise, he found himself in a cavern of considerable size. Away from it ran a passageway through which the wind blew keenly. He struck a match, found an old bit of wood on the floor, the broken root of some tree, and succeeded in firing it. Carrying his improvised torch carefully, he explored and found a twisting passage that led downward a long way. He could not follow it to the end without more light; his torch was failing him, and he recollected the candle in Mac's cabin.

He turned back at once. He had chanced on an ideal hiding place and he must know it thoroughly, know, too, if Jordan had found the other opening. Emerging, he rearranged the screen of brambles and made his way, more cautiously, toward the cabin. There was always the possibility that Jordan or his pals might return there. But it was vacant, and he had ample time to look for what he needed most, candles and matches. He found only the one half-burnt candle and two matches, evidently tossed there by the watcher after he had lighted his pipe. There was an old blanket, a remnant of Mac's camping - out there, and a coil of rope.

Sherwin stood still, staring at that coil of rope; suddenly it had an immense significance—it brought into his mind a full-fledged scheme of vengeance! The cave and the ropel

ASK ME ? ANOTHER ?

A quiz with answers offering information on various subjects

The Questions

1. Did bull fighting originate in Spain?
2. Thomas Jonathan Jackson is better known by what name?
3. The total steel output in the United States in the year 1860 can now be accomplished in what time?
4. How much yarn is used in making a nylon stocking?
5. Is the caffeine content of the beans taken from one tree equal?
6. What President was the first to mount the Washington monument?

7. Which animal is considered the cleanest?

The Answers

1. No. It was introduced by the Moors.
2. Stonewall Jackson.
3. One hour and a quarter.
4. About a mile and a quarter.
5. No. In one season it may vary as much as 3,000 per cent.
6. President Truman. He went up on top to get an idea of how a single or double bridge across the Potomac would look.
7. The raccoon.

For Your Personal Security Buy U. S. Savings Bonds!

Head off costly repairs, breakdowns with FRAM FILCRON OIL FILTERS!

Driving with impure oil in your car, truck or tractor can do as much damage as driving with no oil... it just takes longer. Dirt, grit, carbon and sludge increase wear on moving parts and lead to breakdowns, costly repairs. But, with the new Fram Filcron oil filter, abrasive particles as small as .000039 of an inch are filtered out. Result: you add trouble-free miles to the life of your tractor, truck or car!

Money-Back Guarantee

Millions of Filcron filters and cartridges have been used by our armed forces... while Fram is standard equipment on more than 50 famous makes of car, truck, tractor, bus, marine, Diesel and stationary engines. Experts agree on Fram! Moreover, each Filcron filter is guaranteed to give complete satisfaction or your money back. You've everything to gain, nothing to lose, with Fram!

Ask Your Dealer

If your tractor, truck and car have no filters, your dealer will install Fram Filcron filters to help save motor trouble, breakdowns and costly repairs. If your equipment is already filter-equipped, have him make the Fram Dipstick Test. The Dipstick tells the story! If oil is dirty*, he'll put in Genuine Fram Replacement Cartridges to get the most out of your present filters. There's a Fram cartridge to fit most every type of filter, so see your dealer today! FRAM CORPORATION, Providence 16, R. I.

* Certain heavy-duty oils, due to the detergent additive used, will turn dark in color almost as soon as put into the engine. Where such oils are used, filter cartridges must be changed on a mileage or hourly basis.

 HOWARD EVERETT, Carlsbad.

Uncle Sam Says

Take a look at this U. S. Savings Bond, friend. You don't have to be a seventh son of a seventh son to see your future. If travel is you desire some day, or you hope to see your boy or girl in college, or you dream of owning a farm, this Bond can help to make these dream come true. Bonds accumulate faster than you imagine when you save regularly through the payroll savings plan where you work. Every \$18.75 you put away in United States Savings Bonds grows to \$25 in ten years.
 U. S. Treasury Department

WHAT IS BEING DONE WITH THE ARMY'S SURPLUS PROPERTY

Kenneth C. Royall Under Secty. of War

Discussing the War Department's investigation of surplus property disposal in overseas theaters, Hon. Kenneth C. Royall, Under Secretary of War, has made public the findings on his recent flight around the world to study conditions at first hand. Following are excerpts from his statement:

Since the cessation of hostilities in the various theaters, four billion dollars worth of surplus property from foreign theaters, at cost price, has been declared to the disposal agencies.

In addition to the four billion dollars worth of property which has been declared surplus, there has been returned to the United States from foreign theaters property costing approximately five and three-quarters billion dollars. This includes principally military type items, such as aircraft, guns, cannon, and ammunition which is returned to the United States because it is needed for the equipment of our present or future Army and

because it is of a type that cannot well be sold overseas. The Army has disposed of as scrap, salvage, and the like, property of cost price amounting to approximately five hundred million dollars. This includes property sold in Western China in an emergency sale consummated because of the danger to personnel required as guards.

The Army has deliberately and purposely destroyed property costing one billion one hundred and sixty million dollars. This has consisted almost entirely of ammunition, gases and other items of Chemical Warfare Service, and armament, including combat aircraft, of the type which has no salvage value or which it is not desired to leave in overseas theaters for possible use for military or other lethal purposes. Also, as you know, certain types of ammunition tend to deteriorate with age. In some instances this property could be demilitarized and left in its existing location and in others it was cheaper to dump it in the ocean. There were small amounts of civilian type items so deliberately destroyed, including spoiled food—dangerous for human consumption—rotten or lice infected clothing, and useless items that were a fire or health hazard. A record was kept of the material destroyed and the reasons for destruction of this property.

It is anticipated that through July one hundred twenty-five more ships will leave the Pacific to bring back property to the United States, and that a large part of the shipments will be goods of civilian character. It is further estimated that three hundred and fifty million dollars worth of such civilian type goods will be returned from the Pacific to this country during this period.

I know the American people would dislike to see new and serviceable property lie and rot in the Pacific Islands. Even if we do not make any money by bringing it back, this property will be useable by America in our overall domestic economy. It is obvious that these same considerations do not apply with the same force to the property in Europe where there is a better chance of selling, where the storage facilities are somewhat better and where the deterioration is not so great.

So far, little property has been abandoned on any of the isolated islands. We do not WANT to destroy anything that we can otherwise dispose of or that, after exhausting all possibilities of sale, we can give away.

In conclusion, I want to assure you that the War Department—and the Foreign Liquidation Commission—are trying to get the maximum realization possible from the surplus property overseas.

The War Department believes it has excellent men in charge of these theaters and of their principal activities, men with both knowledge and experience. We are absolutely certain that we have men who realize the seriousness of the problem and are doing their best time and attention. The same is true of the Liquidation Commission.

ON THE LINE LIKE THE OLD ME OWK SKNEECH DURK!

Ain't It So!

WHEN we ask people to "listen to reason," it means that we want them to hear our side of the argument. Great men speak little of their achievements. What they have done speaks for itself. Love may be blind, but a girl wants to make sure. So we have beauty parlors. One who strives constantly to make no enemies may not have any very close friends, either. If riches didn't have wings they would be unable to roost so high. No man ever became too shiftless to give advice.

"ASTHMADOR
—Is My Best Friend"

Sold by Druggists Everywhere
When the agony of bronchial asthma has you choking for breath, depend on DR. R. SCHIFFMANN'S ASTHMADOR. Its rich, aromatic, full relief, ASTHMADOR'S rich, aromatic fumes penetrate congested breathing passages, help reduce the severity of the attack. Try dependable, effective ASTHMADOR in powder, cigarette or pipe mixture form. Your druggist sells ASTHMADOR under our money-back guarantee.

"SUFFERED MISERY FOR YEARS..."

Now Regular, Thanks To Famous Cereal

Given up hope of relieving constipation without taking harsh drugs? Then read this sincere, unsolicited letter:

"I would like to add my praise to KELLOGG'S ALL-BRAN. I suffered years of misery until I saw your ad about 5 years ago. Have been using ALL-BRAN regularly and have never had to use a laxative since." Thomas Hanson, 3254 Sansom Street, Philadelphia 4, Pa.

You, too, may never need another harsh laxative for constipation due to lack of bulk in the diet. If you will eat KELLOGG'S ALL-BRAN every day, and drink plenty of water. Just try this for ten days. If not completely satisfied, send empty carton to Kellogg Company, Battle Creek, Michigan. You'll get double your money back.

KELLOGG'S ALL-BRAN is not a purgative, but a wholesome food made from the vital outer layers of wheat. Provides easy-to-swallow bulk, helpful to normal, easy laxation. Try it as a delicious cereal—and in muffins.

Get ALL-BRAN at your grocer's. Made by Kellogg's of Battle Creek and Omaha.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

DOAN'S PILLS

Star Dust
STAGE-SCREEN-RADIO

Released by Western Newspaper Union.

By VIRGINIA VALE

JINX FALKENBERG and her husband, Tex McCrary, are doing such an outstanding job on their husband-and-wife radio program that it's too bad they're not on a coast-to-coast hookup. Maybe NBC will do something about it; now they're just on the New York station, WEAF. Recently they did their broadcast from a plane that hovered over New Jersey and Connecticut while they talked. Jinx, who's forsaken the movies at least until the stork ar-

JINX FALKENBERG

rives, looked lovely in a coral-colored coat, with a twist of colored stuff in her hair. McCrary's newspaper experience, plus his work during the war, add tremendously to the value of their program, of course.

If NBC doesn't have Fred Allen repeat the broadcast he and Talullah Bankhead did on May 5, there'll be a lot of disconsolate people waiting for months because they missed it. It was hilarious. Those who did hear it are still talking about it, and repeating bits of dialogue for those who didn't. It was one of Fred Allen's best, which is saying plenty.

Bob Hawk, CBS quipmaster, not only pinch-hit for ailing Arthur Godfrey on the latter's morning broadcasts, he's also substituted for Godfrey in the Broadway revue, "Three to Make Ready"—marking his debut on the New York stage.

For his starring role in RKO's "Nocturne" George Raft will have the benefit of advice from one of Broadway's most famous detectives, Barney Ruditsky. Producer Joan Harrison, a stickler for realism, wants Raft to be an authentic replica of a real detective, not one of those unbelievable creatures we often see on the screen. Ruditsky worked on cases involving famous gangsters for 20 years.

The National Barn Dance originates from McLeansboro, Ill., Saturday, June 8, when the gang joins the American Legion in a national homecoming celebration for National Comdr. John Stelle, which will end with an old-fashioned barbecue at midnight.

Bob Burns had to turn down an invitation to head the Hoboes' Association of America, but he does hold a life membership card in the association, having fulfilled the two big requirements—hoboing in every state of the union and totaling 100,000 miles.

Barbara Jo Allen, who created the man-chasing "Vera Vague" and then turned "Vera" into a dramatic star on a recent CBS "This Is My Best" broadcast, creates still another character in the picture, "Earl Carroll's Sketchbook," now in production. In the movie she portrays a wise-cracking designer, but one who has no designs on any man.

Parks Johnson and Warren Hull will return from vacation with a new sponsor, broadcasting "Vox Pop" at a new time—they'll replace the CBS "Inner Sanctum." Meanwhile Parks is resting on his Texas ranch, and Hull's doing some experimental television shows.

That Hollywood smallpox scare sort of wrecked Alan Hale. His vaccination not only took hold of his left arm, it took a bit of the arm with it, leaving quite a wound. Hale was temporarily out of the "Cheyenne" cast.

Static Is Cut By New 'Lens'

Radio Waves Are Focused, Which Increases Freedom From Interference.

NEW YORK. — A metal "lens" which focuses a radio wave into the sharpest beam ever produced—somewhat as a glass lens focuses the rays of the sun into a hot beam that can burn a hole in a sheet of paper—was disclosed here by the Bell Telephone laboratories as one of its secret wartime developments, says the New York Times.

Operating on a principle roughly akin to that of a simple convex magnifying glass lens, the metal lens herds the radio power generated by a small very-high-frequency transmitter into so compact a bundle in space that nearly all of the power can be "focused" on the receiving collector system or antenna of a distant station, thereby greatly increasing the effect of the sending equipment.

As a result great freedom is gained from static and man-made interference. The lens operates at the exceedingly high frequency of nearly five billion cycles. At such frequencies radio waves are about as long as an ordinary cigarette.

Proves Its Efficiency.

It is difficult to generate large amounts of radio power at such frequencies or wave lengths, but the lens is said to be such an efficient piece of equipment that it often is able to make as little as one-tenth of a watt seem to be as great as several kilowatts. The shorter the radio waves generated and the larger the device utilized to radiate them into space the greater is this multiplying power.

The lens that actually creates several kilowatts of power is 10 feet square, shaped somewhat like a large square horn. With others of the same type it is soon to be utilized between New York and Boston on an intercity communication link capable of carrying simultaneously several television programs, telephone, telegraph, teletype, etc.

The lenses will be installed atop high steel towers spaced about 30 miles apart between the two cities.

The device was designed and developed by Dr. Winston E. Kock and associates at the Bell laboratories toward the end of the war, so had only a limited application for military purposes.

Action of Glass Lens.

Similar systems, however, developed in secret for use by the armed forces, are said to have been found able to give superior and dependable communications under rigorous battle conditions both in Europe and Pacific areas.

The action of a glass lens is to slow down the speed of rays going through it, the thicker the glass the greater the slowing influence. Hence, a double convex lens slows the rays nearest its optical center more than those nearer its periphery. Thus, the rays can be brought into focus at some point beyond the lens.

Radio waves, on the other hand, gain speed when they are passed along a metal tube or between flat metal plates. A metal lens designed to equalize the "wave front" of radio waves and thus concentrate and make them more effective on a given target is designed so the waves pass along metal plates or fins that are thinnest near the center of the lens and thicker near the outside edges.

One of the advantages of the metal lens is that the beam it focuses on a distant receiver cannot be made to waver when high winds strike the tower on which it is mounted. Once adjusted, the metal lens stays adjusted, it is said.

Sniper's Snooperscope Kills Foe Hiding in Dark

WASHINGTON.—Thanks to his trusty Snooperscope, the army said proudly, an American soldier can see almost as well at night as in the daylight.

And that's not all. The Snooperscope has a talented brother, the Snooperscope.

These two contraptions brought death to many a Japanese soldier who thought he was safe in the darkness, the army reported. They first were put into use in the summer of 1944.

They use the infra-red ray principle. And objects can be seen clearly even on the blackest night.

The Snooperscope looks a little like a movie camera, mounted on a carbine. The Snooperscope can be used over a special helmet.

The Snooperscope had another use. With one on his noggin, a jeep or truck driver could go barreling down the road to the front without lights.

Smile Awhile

Figuratively
The pupil was asked to paraphrase the sentence: "He was bent on seeing her."
The pupil wrote: "The sight of her doubled him up."

Overheard: "Yes, he's a distant relative, or at least we try to keep him that way!"

Another Lesson
"Mama, mama! Come here quick, I just learned to write."
"Really? What does it say?"
"I don't know, I can't read yet."

Finished Him
"I never see you with Miss De Style nowadays."
"No, I couldn't stand her vulgar laughter."
"Really? I never noticed it."
"No? Well, you weren't there when I proposed to her."

That'd Work
Two husbands were discussing wives. "I wish I could find a way to stop my wife from spending so much on gloves," said one.
"Ever try buying her a diamond ring?" asked the other.

Colorful Embroidery For Cloth or Towels

Colorful Embroidery
AS BRIGHT and cheerful as can be are these yellow canary designs—use the 6 by 6 transfer motifs on tea towels, on cottage curtains, on the corners of a soft yellow or green luncheon cloth. Other colors needed are red, green and blue.

ARE YOU PALE WEAK, TIRED
due to MONTHLY LOSSES?
You girls and women who lose so much during monthly periods that you're pale, weak, "dragged out"—this may be due to lack of blood-iron. So try Lydia E. Pinkham's TABLETS — one of the best home ways to build up red blood—in such cases. Pinkham's Tablets are one of the best blood-iron tonics you can buy!

Ruin Land
Approximately 50 million acres of once fertile land in this country have been essentially ruined for practical cultivation by erosion. Another 50 million acres are in a condition almost as serious.

Frozen Fruit
When thawing frozen fruit, leave it in the sealed container, or, if the package is broken, protect the end from exposure to air. Oxygen tends to destroy fresh flavor.

Acetate Rayons
Acetate rayons are apt to fade from the effects of gases given off in home furnaces, gas flames or electric heaters.

Garden Caution
Because so little is known about the effects of DDT, gardeners are advised not to use this new insecticide on garden food crops.

Eyes Fade
Color of most human eyes becomes lighter with advancing age. This fading out of color is especially noticeable in blue eyes.

Swine Brucellosis
Swine brucellosis, or infectious abortion of swine, has much in common with its counterpart in cattle.

Dulls Knife
Keep knives away from the stove, for heat destroys the temper of the steel and the blade cannot be kept sharp.

Roasting Fowl
Don't put water in the pan when roasting a bird. Steaming breaks the skin and forces juice out of the meat, and is not necessary when the bird is young and tender.

Monkey's Eyes
Eyes of some types of young monkeys have a range of accommodation of 10 diopters, as compared with 14 diopters of young children of the human race.

Woodwork Cleaner
Woodwork can be cleaned with a mixture of one-half cup vinegar, one-half cup household ammonia to two gallons of water.

Smooth Lawn
For a smooth lawn, roll it in the spring after the frost is out of the ground at a time when the soil is not too wet.

Snail's Eyes
Eyes of snails are at the ends of flexible tentacles, which can be poked out of the shell to sight danger.

Fruit-Bearing Trees
It is estimated that the U. S. had 55,000 million fruit-bearing trees in 1945. In 1920 there were 115,309 million trees of bearing age.

Home-Canned Foods
Home-canned foods kept longer than one year tend to become soft and lose some of their flavor and color.
