Hope, Eddy County, New Mexico

Friday, Feb. 16, 1951

Sen. Joe Marquez Visits Artesia

Senator Joe M. Marquez of Guadalupe County, the Senate majority whip in the New Mexico Senate, was in Artesia last Saturday getting first hand information in regard to dividing Eddy county. Before leaving he said that in his mind the formation of a new county was feasible and just. It was Mr. Marquez who introduced the Senate Bill 100, the new county bill, in the Senate. Mrs. Marquez accompanied the Senator on his trip down here. The Senator explained that he had come to Artesia on his own account after the Senate had recessed for the week end, to study the local situation, sound out citizens and learn the facts more thoroughly. And at the conclusion of his visit here, he stated emphatically, "Seeing is Believing." A public hearing was held Wednesday afternoon which was attended by a large delegation from North Eddy County.

Slot Machines Are Confiscated at Artesia Elks Club

Last Saturday afternoon Sheriff Bill High armed with a search warrant signed by District Judge C. Roy Anderson and an affidavit of violation sworn to by Richard H. Robinson, assistant district attorney, entered the Elks Club building at Artesia and confiscated six slot machines and a horse race machine. He took them to Carlsbad and locked them up in the sheriff's office. Assisting the sheriff were deputy sheriffs Lloyd Blakeney and Carl Hawkins of Carlsbad, deputy sheriff Mark Walters and State Policeman A. B. Munsey of Artesia. The club manager said the machines were covered with a heavy coat of dust indicating that they had not been touched for a long time. The search warrant read in part that the Elks Club 'on or about the 8th day of February, 1951, did operate gambling equipment known as slot machines. . . ."

Worthy Grand Matron Makes Official Visit

Mrs. Roxie Mae Davidson of Las Cruces, worthy grand matron of the Order of the Eastern Star of New Mexico, made her official visit to the Penasco Valley Chapter No. 35 at Hope last Friday evening. A delicious turkey dinner was served by the Hope Eastern Star in the Home Economics room to 50 guests prior to the meeting.

Mrs. Mildred Cole presided over the meeting and welcomed Mrs. Davidson, Mrs. Wardie Calloway, Carlsbad, associate grand matron; Mrs. Hilda Griffith, district instructor from Carlsbad, Arba Green and Rufus Stinnett, past grand patrons of Artesia, Mrs. Clarence Roach, grand committee member and Mrs. Rufus Stinnett, Mrs. Owen Hensley and Mrs. Ida Prude, grand representatives. Mrs. Davidson gave an impressive talk and Mrs. G. O. Teel presented her with a lovely gift. Mrs. Virgil Craig, in the absence of Mrs. Robert Cole, gave a report that \$17.50 was collected by the Hope Chapter for the polio drive.

Central Valley Elec. Annual Election

The Central Valley Electric Cooperative, will hold its annual dinner and election on Saturday, Feb. 17, 1951. Dinner will be served at noon at the high school cafeteria at Artesia and the meeting is scheduled to begin at 2 o'clock in the Artesia high school auditorium. Trustees whose terms expire are: S. O. Higgins, vice president; Roscoe Fletcher, secretary; H. L. Green and James Norris, members. The nominating committee is composed of B. C. Aaron, W. C. Bradshaw, Jess Funk, Harry Nelson, Howard Menefee, Oscar Kunkel and George Olen Teel.

Mrs. Ethel Altman and Ada Belle Trimble were in Artesia last week Thursday.

Bill Jones was on the sick list over the week end.

Annual Meeting of Telephone Coop

The annual meeting of the Penasco Valley Telephone Cooperative, Inc., will be held on Wednesday, Feb. 21 at the high school auditorium at Hope. The business meeting will begin at 2 o'clock in the afternoon. The purpose of this meeting is to elect trustees to the board to fill the vacancies created by the expiration of the term of George M. Casabonne, C. R. Barley and George S. Teel, deceased and to transact all other business which is brought up before the membership. The names of members which have been presented to the board by the nominating committee and which will be voted on at this meeting are as follows: George M. Casabonne, Hope; C. R. Barley, Hope; James Norris, Lake Arthur. Any other nominations for trustees may be made from the floor at the annual meeting.

School News

3rd, 4th and 5th Grade News—The 3rd grade pupils made illustrated pictures of the rabbit and the turtle which they had as a reading lesson. The fifth grade pupils designed the pink and green Valentine box according to their own creation. It is an attractive horse trimmed with paper doilies and silver hearts. The pupils are excited over Valentine's Day as some of the mothers are planning to give us a party. Pupils who have read their quota of stories for the year an deceived prizes are Christine Seely, Melissa Jones, Johnny Hidalgo, Jackie Stephen, Jeri Lynn Carson, Patsy Young, Barbara Young and Bobby Joje Tarrant. The 3rd and 4th grade pupils have completed their English book and have a new one now. The 5th grade pupils have a new U.S. History book.

Hope News

A snow storm began Tuesday morning and the Penasco Valley was fortunate enough to get one of the heaviest snows that has been recorded for several years.

Mr. and Mrs. Lyle Hunter and family and E. O. Van Winkle were Sunday dinner guests with Mr. and Mrs. John Hardin.

Mrs. W. E. Rood left last week for Phoenix where she will visit friends and relatives.

George Casabonne was a visitor in Artesia Monday.

Bonnie Altman and Mr. and Mrs. Chester Schwalbe were visitors in Artesia Saturday.

"How Honest Are You?" . . . If you could safely pocket a large sum of cash . . . someone else's cash . . . would you do it? Learn what others have done in similar situations. This unusual article along with many other colorful features will appear in The American Weekly, that great magazine distributed with next Sunday's Los Angeles Examiner.

Sunday dinner guests of Mr. and Mrs. G. O. Teel and family were Mrs. Frances Yearwood, Mrs. Bob Ludlow and Richard, of El Paso, Mrs. Lincoln Cox, J. W., Eula Marie and Shirley, Mr. and Mrs. Charlie Schull of Cloudcroft, Mr. and Mrs. C. H. Hogssett and Charles of Artesia, Mr. and Mrs. Austin Reeves of Roswell, Mr. and Mrs. Loren Reeves and Mr. and Mrs. Lonnie Reeves.

Mrs. Will Buttmann from Merkel, Texas, is spending several days with her daughter, Mrs. Bill Wilson, Mr. Wilson and children.

Mr. and Mrs. Orland Parker and children spent several days last week with Mr. and Mrs. Joe Parker at Machita, N. M.

Mr. and Mrs. Haskell Harris and Jerry and Ronnie spent Saturday at Pinon visiting Mr. and Mrs. Paul Stephenson.

Mr. and Mrs. Robert Tarrant and children spent Sunday at the Glasscock ranch where Mr. Tarrant has been employed cleaning out tanks.

ROOD

Senator Taft and General Eisenhower look like sure fire candidates for the presidency of the United States at the present time. But of course lots of things can happen before 1952 rolls around. Men who look like strong candidates now may be shoved aside by the time political conventions take place.

Tuesdays snow storm was one of the lines, things that could have happened to the Penasco Valley. Practically all of this will soak into the ground where it is needed. Of course we will have to have more moisture in the hope of snow or rain. We have had a long dry spell and it will take a lot of moisture to soak up the earth to any depth.

The hearing on Senate Bill to split Eddy and form an Artesia county was held Wednesday afternoon at 2:30. Each side was given 45 minutes plus 10 minutes rebuttal time for and against splitting Eddy county. Don G. McCormick directed the anti-split presentation and D. D. Archer, Artesia attorney, represented the people of north Eddy county.

Irvin P. Murphy, superintendent of the Carlsbad city schools since 1940 will receive another 5-year contract to head the Carlsbad school system. Mr. Murphy is a good school man, look where he got his start—in Hope which is located in Artesia county, we Hope.

Rev. E. Cooper and family are leaving soon for Africa where Rev. Cooper will engage in missionary work. They will sail from New York in a few weeks. Rev. Cooper has been located in Hope for the past two years and everyone is sorry to see the Cooper family leave. This is not new work for Rev. Cooper as he was engaged in missionary work in Africa for 14 years before coming to Hope.

Jack Sittion, the editor of the Current-Argus, who has been up at Santa Fe lobbying against the County division bill, is very much perturbed about the Artesia boosters passing out a few drinks to their friends. I suppose Mr. Sittion would want to make us believe that the Carlsbad boosters are serving pink lemonade and chocolate bars to their friends.

This year as never before Americans are aware of powerful and relentless forces still, bent upon the destruction of human and religious rights throughout the world. Our united front against this common enemy can be divided and weakened by intolerance and bigotry. Only by promoting harmony and fellowship, racial amity and religious good will, can we stand firm. Brotherhood Week, should of course, be observed 52 times each year. But, for emphasis on America's continual crusade for liberty and democracy, the designation of one particular seven-day period is fitting and helpful. This newspaper is happy to add its voice in lauding the aims of the celebration and in urging all citizens to take part.

A Wall Street Journal editorial tells of a friend of the editor who recently bought a new furnace. He did not need it now—the old one would have lasted through this winter and possibly the next. Also, he had to borrow the money. So he was asked why he didn't postpone the purchase. The paper reports: "He said he was frightened by the government. For all he knows, when the normal replacement time comes he may find that the only way he could get a furnace would be to apply to the National Furnace Administration, fill out a million forms and wait six months for an okay from some bureaucrat. Meanwhile, he'd freeze."

Already groups in California, Colorado and even a group of counties in our own New Mexico, have been organized for the purpose of milking the air of its precious moisture. If these groups find their efforts successful it is easy to see what will happen to the sections of the semi-arid south-

Editorials

By the Editor

west who have not had the foresight to organize. Our Senator Clinton Anderson, has already recognized the problem that may arise and has proposed federal laws regulating the "air-seeding" technique.—Lordsburg Liberal.

(Our good friends over in Hidalgo County should realize that individuals or communities can not stand still. They must organize and keep pace with progress or fall behind. Our objections to Senator Anderson's federal laws regulating the air-seeding program is that it forms several more federal boards and commissions, the members of which draw down a big salary. And once when you get a federal board or commission organized, it is like pulling teeth to get rid of them).

The "Little-Argus" of Carlsbad is quoted as saying, "The only news paper in New Mexico which has supported the movement to create a new county is the Artesia Advocate, produced by the over-zealous Artesia Chamber of Commerce and a small group of community leaders. The Artesia Advocate has the distinction of standing alone on the issue."—That is where the "Little-Argus" is mistaken once more. The Penasco Valley News, published at Hope, Eddy County, New Mexico, is for the county division bill 100 per cent, along with all the rest of the Penasco people. Of course we are not as big as some newspapers, but for 22 years we have been published regularly every week, which certainly entitles us to take a stand on county and community affairs. We are standing shoulder to shoulder with the Artesia people in their fight for a new county.

Opening announcement of the 4th annual New Mexico Boys State, sponsored by the American Legion, is being distributed by American Legion state headquarters in Albuquerque. The seven days training course in practical citizenship and government for specially selected high school juniors is scheduled for June 10 to 17, at the Northern New Mexico Normal School at El Rito. Two hundred high school junior students, chosen for qualities of leadership, character, scholarship, service and citizenship, will assemble and set up and operate mythical city, county and state governments. These boys "learn by doing." Delegates will be chosen by the high school principals and all high schools in the state are invited to participate. Nearly 192 boys from 87 high schools attended the 1949 session. Each boy will be sponsored by a Legion Post or some other civic, service or fraternal organization or church group. The youthful citizens, during the seven days session, will hold mock campaigns and elections, organize all governmental branches including legislature and supreme court, make and enforce their own laws. The entire operation, based on laws and procedures of the state of New Mexico, is kept free of political propaganda and reference is made to actual state or national issues, the Legion emphasizes.

Uncle Sam Says

In February we observe the birthday of our 16th President, Abraham Lincoln. One of the many virtues he possessed was the habit of thrift. In fact, he advocated this great American habit in these words: "Teach economy. That is one of the first and highest virtues. It begins with saving money." Your government has provided one of the best methods ever devised for saving. It is simple in operation—enroll NOW for the purchase of Savings Bonds where you work, or if self-employed, the Bond-A-Month Plan at your bank. U. S. Treasury Department

Firearms Still Needed On Most U. S. Farms

Rifle Is Still Effective Way to Control Varmints

Even though marauding Indians and bad men have disappeared, farmers and ranchers still need their guns almost as much as ever. Where the rifle was once needed to preserve life, the rifle and shotgun today help preserve the livelihood of those who live on the land. To many, firearms are still necessary agricultural or ranching "tools."

For pest and varmint control, firearms are often far more effective than traps and less dangerous than poison, and in many cases are

To many, firearms are still necessary agricultural or ranching tools. They are effective in the extermination of pests and varmints.

the only means to destroy certain birds and animals that damage crops, stored grains and produce and kill poultry.

The farm boy with a .22 caliber rifle is probably the world's champion pest exterminator. For rats, sparrows, rabbits, squirrels, gophers, moles and crows and other small pests that can be shot at close range, he uses .22 short cartridges which are adequate and economical, but long rifle cartridges are much better for longer ranges and far more effective.

One of the best low-priced beginner's 22 that's come out in years is a single-shot bolt action with "an automatic safety that never forgets." This Model 47 is so designed that as the bolt is opened to permit loading, it sets the safety which must be moved manually before the rifle can be fired.

Increased Dairy Product Prices Forecast for '51

Milk and dairy products prices in 1951 will be moderately higher than in 1950, most dairy experts believe. A stronger demand will more than offset the effects of large carry-in stocks and probably smaller exports. Farm production of milk in 1951 is likely to be little different from the 120.5 to 121 billion pounds in prospect for this year.

Dominant factor in the 1951 outlook is the prospective sharp increase in demand, stemming from larger defense outlays. Both employment and wages are rising. Disposable incomes will reach a new high next year.

Many dairymen expect total cash receipts from marketings of all products in 1951 to increase more than expenditures, thereby giving a net increase in farm income. The increased income will probably exceed increases in expenditures.

Crested-Wheatgrass Seed Production Reported Up

The 1950 production of crested-wheatgrass seed is estimated at 5,330,000 pounds of clean seed. This is 5 per cent larger than the 1949 production of 5,090,000 pounds. Larger crops than last year reported for North Dakota, South Dakota, and Montana, more than offset the smaller crops indicated for Nebraska, Colorado and Washington. The Colorado crop was near failure in 1950.

WEEKLY NEWS ANALYSIS

Government Issues Stoppag Order Freezing All Wages and Prices; AEC Conducts Atomic Experiments

URGENT WASHINGTON, July 27, 1950. (AP)—The government today issued a stoppage order freezing all wages and prices...

The mystery of the vanishing Chinese armies was linked to the advantage of their location along the 38th parallel...

WAGES-PRICES: A Stoppag Order

A stoppage order freezing wages and prices was issued by the government today...

The main effect of the order was that it brought to a standstill negotiations of otherwise-impending negotiations...

The wage freeze would be applied as soon as a feasible wage policy could be completed...

The price order was complex and confusing, especially with respect to farm products and food.

First of all, there was no freeze of any food prices at the farm level.

But as the processing, wholesaling, and retail levels...

Partly as a sliding scale designed to keep farm prices fixed...

Most farm products at the time of the wage-price freeze were low...

Other things exempt from price controls included communication and publication fields...

Controls

Price administrator Michael V. DeBalle (right) looks on as Attorney General J. Howard McFarland...

AEC Tests

Captain Gerald Eyer, manager of the AEC Santa Fe operations office at Las Alamos, N.M., announced test detonations at the atomic testing range near Las Vegas...

A-BOMB

Tests Near Las Vegas

While most of the world watched with apprehension at the result and announcements of the first atomic explosion...

The atomic energy commission decided to experiment in silence. It was known, however, that time explosions took place...

Las Vegas residents reported windows shook, houses trembled and burglar alarms in business establishments were set off.

The last explosion was felt and seen in Boulder City, about 35 miles from the test range.

EUROPE

Time for Co-operation

In the last few weeks, especially since General Eisenhower made his tour of Europe, there seems to have developed a feeling of mutual co-operation between the United States and our allies.

The reluctance to arm and speed up production that was evident only a few months ago disappeared. Britain has launched a production speed-up and rearmament program.

And now France has announced plans to take her place beside the U.S. and Britain.

To further this co-operation, French Premier Rene Pleven arrived in Washington for conferences with President Truman.

KOREA

Mystery Unsolved

The mystery of what happened to the Chinese armies that pushed the United Nations forces north of the 38th parallel...

An unexpected lull swept over the Korean battle front in Chinese pressure ceased...

Latest reports told of continued movement of U.N. troops northwest and only minor resistance.

The situation raised a number of questions and possibilities. For one thing, it raised the question of whether or not the Communist armies had been hurt...

There were also rumors to the effect the Communists had suffered severely from cold and disease.

The mystery was still unsolved after two weeks of minor fighting. The lull also relieved the tension on the political front.

POLITICS

Republican Foley

The drums of politics, which will grow louder in the next few months, were sounded by Sen. Robert Taft of Ohio...

Taft made it plain that he thought the Republicans could defeat the Democrats in the next presidential election on the issue of foreign policy.

Senator Taft's influence with Republicans is tremendous, however. He heads the senate G.O.P. policy committee...

In his own words, this seems to be the cuts of Taft's policy: "We must meet head on any trucking to Communist sympathizers, any appeasement of Russia which is likely to lead to more aggression."

DRAFT

Bitter Controversy

The all-powerful house armed-services committee stepped into the bitter controversy over drafting 18-year-olds for armed service...

The move virtually put a stop to the department's plan of drafting 18-year-olds. Congress may still act on the measure, however...

Also in the draft news was the announcement by the defense department that non-veterans 19 through 25 who have married since the Korean war...

Plans also were underway to lower the draft standards. This move would provide perhaps 150,000 men now barred for physical and mental reasons.

ECONOMISTS

Urges Stiffer Taxes

Four hundred economists, members of 30 institutions throughout the country, recently urged the government to increase taxes and tighten controls.

Their views were interesting in that they all believed that emergency fiscal and credit policies, rather than price-wage controls, constitute our primary defense against inflation.

They recommended: 1. Scrutinize carefully all government expenditures and postpone or eliminate those that are not urgent and essential.

2. Raise tax revenues even faster than defense spending grows, so as to achieve and maintain a cash surplus.

3. Restrict the amount of credit available to businesses and individuals for purposes not essential to the defense program.

Tight Rope

By Allison L. Burks

Stella Moore, masquerading as Dorinda LaCroix in the old Thorndyke mansion, is keeping her door locked after a salesman recognized her. Grandmother Thorndyke and Stella's friend, Anna Delahay, all have met death under mysterious circumstances. Randy, a pup given her by a neighbor, Cleve Adams, for whom Stella has formed a romantic attachment, has disappeared and Stella has searched everywhere but in the attic. As she searches there she is conscious of a sense of eerie menace and thinks someone has followed her to the attic. Stella accepted the job of masquerade at the insistence of Edward Thorndyke, son of Mrs. Thorndyke, who did not know the real Dorinda had died.

CHAPTER XIV

Dorinda shook her head. "No, I want to see for myself. I don't think he's there either, but I've looked everywhere else."

Greer handed the key to her without further protest. "Please be sure to return it to me," he cautioned. "It was lost once and Mrs. Thorndyke didn't like it at all. Though we found it later in a drawer of old keys. I never could figure how it got there." He frowned a little, remembering. "So please don't forget to give it back."

As she neared the head of the stairs, she could hear a rhythmic tapping from behind the door opposite Grandmother's old room. Fay, writing the letters which she so often used as an excuse for remaining in her own apartment. Dorinda had seen her typewriter once, an efficient little portable enameled in blue and silver. The typing ceased as Dorinda took the last step, and a moment later the door opened and Fay looked out.

"Oh, it's you, Dorinda. I heard that third step from the top creak—I think it's the only thing that creaks in this solid old house—and thought perhaps it was Edward." Her hand on the knob of her door, she added civilly, "Have you found your dog?"

Cleve and Dorinda Take Ride into Town

The big attic space was dim and shadowy. The only marks in the whole wide space were some shapeless, scuffing ones which crossed the floor from the top of the stairs and ended at a big leather-covered trunk on the opposite side. Greer, Carrie, anyone might have made them.

She followed them idly and stopped in front of the trunk. About her piled-up refuse of the house was gray with the fine dust which day after day had sifted in and lain undisturbed for the past year. Only the top of this trunk was clean and free from grime.

That meant nothing—only that someone had added to whatever store the trunk contained, old linen, old garments, anything. She bent and pulled at the lid. It did not open. The trunk was locked.

But suddenly, surprisingly, as if in response to her touch the trunk had become a sentient thing which threatened her, she was enveloped by fear. The trunk? Was it the trunk which caused her terrors? She stumbled toward the stairs and heard footsteps, made audible by haste, on the treads below. Then the soft closing of the door. Someone had been there, someone who had followed without sound and watched.

But when she came down into the upper hall once more, she saw only emptiness. Every door was closed, everything still behind them. As she listened, the clack of Fay's typewriter came to her ears again.

Downstairs, Greer had just opened the front door. Dorinda, on the stairway, could see Cleve as he stood in the white portico and ran to meet him. He took both her hands in his and scrutinized her face carefully.

"What is it, Dorinda?" he asked anxiously. "You're white as a ghost. Nothing—nothing more—has happened, has it?"

She took Cleve out to the canvas-covered lawn swing under the trees. There she told him of Randy's disappearance, and, after a little hesitation, of the terror she had felt in the attic.

"You need to get away from here, Dorinda."

"Tell you what—let's get the car and beat it, now, before lunch. We'll drive around and get tucked somewhere and not come back till late this evening. How's that?"

"Oh, I'd like that!" Dorinda's eyes shone. "Maybe things will seem different if I get away from the house for awhile."

They bought hamburgers and coffee at a roadside stand, food made ambrosia by spring and the appetite of youth. At twilight they came into a small town near Los

Angeles. A neon restaurant sign on a white building with a glassed-in front attracted them. Inside they found small tables with snowy linen and tall red candles. A waitress in red-checked gingham and tiny white apron brought them fried chicken, chilled salad, hot biscuits feather-light with crisp brown crust.

"Fresh air and good company. The combination does wonders for

She stopped in front of the trunk.

the appetite." Cleve's eyes were warm and teasing. "You see, I admit I'm good company." He drained the last drop of his coffee. "Let's take a walk around town," he suggested. "Then I'm afraid we'll have to go back."

Edward, Blonde Woman Are Seen by Couple

"I hate to go back." For a second her face was somber. "But I won't think about it. Let's start on that walk."

Cleve caught her arm as she would have stepped down from the curb. "Look out for that machine," he warned as a long black sedan slid toward them.

"Silly, there's a stop sign on the corner. See, they're braking now," Dorinda scoffed, as the black car came to a stop not more than a yard away.

Against the glow of the street lamp across the road, Dorinda could see the driver's face, a dark silhouette, clear as if cut from black paper, and beyond him, catching the first impact of the light, fair hair that lifted gently in the breeze and made a misty golden halo about the head of the woman in the passenger seat.

Dorinda's fingers clutched at Cleve's sleeve as the car, the smooth hum of its motor almost soundless, glided on in the darkness.

"Cleve!" she gasped, the words catching in her throat. "Did you see them? The man who drove—it was Uncle Edward. And there was a woman with him—a woman with yellow hair!"

"Your Uncle Edward?" Cleve repeated. "Are you certain, Dorinda?"

"I know it." There was no doubt in her mind.

"And a blonde woman? Perhaps it was Fay. In this light—"

"Her face was hidden behind his shoulder. But her hair was yellow. Not silver. I could see well enough to know I'm not mistaken about that."

They stood on the curb looking down the road in the direction the car had gone. Even the red tail-light had disappeared now.

"Cleve, a yellow-haired woman? You remember what Poole said? At The Silver Slipper—in the road the day Anne—that day—"

"No!" Cleve's voice was loud in the quiet night. "It couldn't be that girl. There'll be some perfectly simple explanation for this. You'll see. Some friend of his we don't know about maybe. Your uncle has always been, according to my mother, what a generation or two ago they called a lady-killer."

"An old-fashioned wolf?" The girl's giggle was half-hysterical and Cleve put his arm about her shoulders in a reassuring pressure.

"Honey, don't go imagining things." But, lifting her eyes to his face, she caught the harassed

look which lingered there. Cleve was not as certain of his ground as he would have her believe.

It was not until they were within a few miles of Thorndyke House that he spoke again.

"Dorinda," he said, almost violently. "I hate to take you back there!" After a moment, he went on more calmly. "You and I haven't talked seriously to each other very often. But I want to tell you something about myself. You know I'm going into a law firm in Los Angeles in the early summer. The firm is known as Pierce and Grayson, although Grayson's been dead for some years. Mr. Pierce was an old friend of my dad's—he's been practically another father to me since my own died. The thing is my prospects are more than good with him. In a few years, if our plans work out, I'll be junior partner in the firm."

"Now I've been thinking—you know how I feel about you. Why don't you marry me, as soon as we can manage it, and let me take you away? We won't be able to afford butlers and Cadillacs—not for a long time anyway. But somehow I don't believe you'd care. We'd have enough to be comfortable. Even have a little frosting on our cake. How about it?"

"Marry you?" A surge of joy rose in her breast. And died almost as quickly.

Cleve Warns Dorinda To Be Very Careful

"Marry you?" And now her voice was lost, forlorn. "I can't, Cleve." She felt the jerk he gave reflected in the movement of the car. He turned his head and stared at her. The dashboard light showed his face dark, troubled by a bewildered sternness.

"You mean you won't? Then you don't love me?"

"It isn't that. Don't ask me why. Please, not tonight." She could feel tears streaking her cold cheeks.

"You're crying, sweet." He sounded baffled. "All right, I don't understand but I won't say any more tonight."

"Cleve, don't hate me, Cleve." "Hate you!" He laughed shortly. "I don't think you need worry about that."

He said no more until just before he left her. He had unlocked the front door with the key she gave him and gone with her into the deserted lower hall.

The hands of the grandfather clock set midway of the side wall pointed to twelve. The silvery whirl of the chimes began just as they stepped inside. Edward's tan hat and light topcoat hung on the rack. He was, then, home before them. There was another hat there too. A dark blue Homburg with a tiny pheasant feather making a small splotch of color. Whose? The question hardly formed in her mind before she remembered. Grandmother's attorney—Edward had said he was to come Thursday night.

Cleve, his hands on her shoulders, pulled her to him for a moment. "I don't understand you, Dorinda," he said, as he had said once before. "You're not the type to be associated with mystery and there is some mystery connected with you. I believe now that if Anne's death wasn't an accident—although, mind you, I'm not convinced it wasn't—she wasn't intended to be the victim. I spent most of yesterday in Trentville—that's why you didn't see me here—talking to people who knew her. I'll swear she didn't have an enemy in the world. I wouldn't have thought you had but I can't be certain of that without knowing all about you."

He bent his head and kissed her lightly on one cheek. "No," he went on as he met her protesting look, "I'm not going to ask you questions, not tonight. Though sometime—his jaw set firmly—"sometime you're going to tell me. And in the meantime, for God's sake, be careful. Lock your door when you go to your room. Promise me you'll do that."

"I always do," she told him. Tears stung her eyes again as the door closed behind him and she was left alone in the empty hall. She ran upstairs, eager for the warmth and light of her own room with danger locked out.

Beyond the threshold, the room was dark. The faint light from the hall penetrated for a little way and showed her the gray carpet and the shadowy outline of a chintz-covered chair, then merged into obscurity.

Her finger fumbled for the light switch and pressed it down. But no revealing radiance followed the click of the switch.

MIRROR Of Your MIND

Love Not Based On Obligation

By Lawrence Gould

Will your children always love you?

Answer: Not because it is their "duty," even if you've made them feel that it is. For love cannot be based on a sense of obligation. They will truly love you after they have grown up in proportion as you are associated in their minds with pleasant feelings like security or sympathetic understanding. Remembering "all you have done for them" will not make them love you if your sacrifices did not help them to be happy—if they feel ashamed of having been a burden to you, they will unconsciously want to get as far away as they can.

are entitled to from him may sometimes be the quickest way to get it. But if you are dealing with a person whom you have no power to punish, you are more apt to get fair treatment by persuasion than by "making a row." For a "right" which you cannot enforce means nothing.

Can misfortune drive a person insane?

Answer: Yes. There is a type of psychosis called "reactive depression" in which the person's "reaction" to bereavement or severe financial losses is not only intense unhappiness, but delusions, such as the belief that he has "committed the unpardonable sin." But this usually happens only in the case of someone who has had childish experiences of unkindness or "rejection," leaving him with less than normal confidence in himself or in life. Depressed patients need watching, but can be aided by psychiatric treatment.

Is demanding your rights the best way to get them?

Answer: That depends on whether you are in a position to punish the person on whom you make the demand, directly or indirectly. Because you could probably get a salesman or a waiter into trouble by reporting him to his superiors, demanding what you feel that you

LOOKING AT RELIGION

EGYPT

THE NAME "EGYPT" WAS GIVEN TO THAT COUNTRY BY THE GREEKS AND WAS NEVER USED BY INHABITANTS IN BIBLICAL TIMES. IN THE OLD TESTAMENT THE NAME MOST FREQUENTLY USED IS "MIZRAIM" THE POETICAL BOOKS OF THE BIBLE CONTAIN THE NAME "RAHAB," MEANING THE PROUD, OR INSOLENT, AND LAND OF HAM.

KEEPING HEALTHY

Emotional Illness Causes Lost Time

By Dr. James W. Barton

IF WE WERE ASKED what ailment or disability caused most absence from work, most of us would probably say the common cold, headache, and rheumatism, in that order. It may surprise us to learn that emotional ill health is the major cause of lost time in industry.

INDUSTRIAL HEALTH. Dr. H. Graham Ross, writes on emotional ill health, basing his conclusions on a series of studies by McGill University industrial relations center. **INDUSTRIAL HEALTH** is published by the Health League of Canada, a most worthy organization.

Dr. Ross concludes that emotional disturbances account for more than 50 per cent of industrial illness. Emotionally disturbed people also make up the accident-prone groups in industry, since emotional disturbances may be due either to causes outside the employee's work, or by tensions deriving from the work itself.

A major cause of tension and tiredness in the factory worker is that on the modern assembly line,

the work is so divided that a man often performs a piece of work that has no meaning to him in relation to the finished job.

The tendency to excessive tension is further increased by such factors as undefined responsibility, divided responsibility, excessive responsibility and responsibility without authority.

Human relations also play an important part in producing emotional states in such cases as the following:

1. Employers' job standards and those of the employee may differ and cause tensions.
2. The worker may have inadequate qualifications, which means he is working under a handicap. This keeps the worker unusually tensed as he tries to keep his work up to standard requirements.
3. There may be inadequate supervision. Overdirection or underdirection by the supervisor will produce a sense of frustration or insecurity, leading to excessive tension.

SCRIPTURE: Mark 7:24-9:1.
DEVOTIONAL READING: Hebrews 1:1-9.

Jesus is Christ

Lesson for February 18, 1951

IT SOUNDS odd to modern ears (or to any ear for the past 18 centuries) to say that Jesus "is" Christ. It sounds like saying Abraham is Lincoln, or Winston is Churchill. "Jesus Christ" has become long since a proper name like any other combination of name and surname. But in the early days of Christianity it took sermons to persuade people that Jesus was indeed the Christ; and if people knew what "Christ" means, they would see that most sermons today are really aimed at convincing people of the same thing: Jesus is Christ.

Dr. Foreman

Only One Christ

WE shall have to think what the word "Christ" meant as Peter used the word and as Jesus understood it. The Jews of that time were looking with eager excitement for an "anointed one" (the literal meaning of Christ, or Messiah) who would put an end to all the evil of the world and usher in God's New Age. They were not quite clear how this would be done, but they were sure that only the Christ could do it.

Consider three points. First, when Peter said "You are Christ" he meant "You are unique." No Jew looked for two Christs. There is no one else in Jesus' class, there is only one of him. Every human being, to be sure, is different from all others; but Simon Peter did not mean that. What he did mean was that Jesus could not be classed as "a" teacher or "a" prophet or "a" man of God. He was the Teacher and Prophet. He was God's Man as no other man was.

We make a mistake, we get away from the original Christian faith, the faith which Jesus praised, when we put Jesus on the same level with other men, any other men. There is only one Christ.

God Was in Christ

IN the second place, when Peter called Jesus "Christ" he meant that God had anointed him. He was not a man who took a notion to do what he did; he was one whom God had appointed to be and to do as God willed. We cannot understand Jesus apart from God, for his source is God.

Any one who reads the gospel of John will find this very prominent in Jesus' thinking always: "I was sent . . . My meat is to do the will of him that sent me."

Christians later than this saw that the relation between God and Jesus was even closer than that between sender and sent. Jesus is called the Son of God, he is called the Word that was with God and was God. Paul says God was in Christ.

Christ Is Lord of All

A THIRD thing Peter meant when he called Jesus "Christ" and that the church means now—is that he has complete authority. All other authority, in the church or out of it, is less than his.

A word often used to express this truth is "Lord." But the word alone is not enough. It really makes less difference what words we use about Jesus than what our attitude to him is. Jesus himself once spoke sternly of people who call him "Lord, Lord," but do not do the things he says to do.

It is one thing to say, in the Creed, that we believe in "Jesus Christ, his only Son, our Lord;" it is another thing to carry that part of the creed into life. Jesus is our Lord; not the church, not Moses, not Paul, not any hero or saint of the church, but Jesus. Christians take orders from him first of all, for we believe that his mind was the mind of God.

A Christian profession of faith therefore, is more than a statement of belief; it is an oath of allegiance.

INSPIRATION

Sympathy

AN EDITORIAL

ALL HUMAN BEINGS crave sympathy. Everyone wants to be loved and understood, to have some one who shares his woes and troubles. A life without some consolation would be hard to contemplate, much less endure.

Only a prideful self-deception would prompt a man to boast that he can get along "on his own" without any dependence on others. Even the Perfect Man—Christ Himself—Craved at times for sympathy. There is no more harrowing experience on record than the loneliness and desolation of the Savior as He underwent the Agony of Gethsemane.

The followers of Christ are sometimes called upon to bear the cross of apparent complete abandonment. There are occasions when human hearts, it seems, must seek vainly for comfort and relief in the midst of trial or sorrow. But this is true only when sympathy is sought on earth alone.

There is no moment so dark, so weighted with despondency or fear, that a man cannot look to heaven for the sympathy and encouragement he needs. God never turns His face from the troubled spirit of any man. Indeed it is often in times of greatest stress that he pours forth His love in the most superabundant measure.

Whoever feels that life is a cold, comfortless, lonely thing, lacks a full faith in the ever-accessible sympathy of God. What man is there who prays well and often who does not sense the warming presence of the Creator everywhere and in everything? Where is the man who cherishes the thought of God's watchful solicitude and is ever overcome by fear?

Every believer in God may well rejoice over the wealth of sympathy to be found in Him. Someone has described sympathy as "two hearts tugging at one load." Man, being weak and vulnerable, may grow faint in the hour of testing; but with God on his side, he can triumph and overcome all.

CRUSADER . . . The Rev. Owen Barrow, a one-man crusader for church union in action, gives a sermon during inter-denominational services in Marathon, Ontario.

Religion

Question Box

Q: What is the Zenana Bible and Medical Mission?

A: An interdenominational evangelical society founded in England in 1852. It carries on missionary work among women and children in India by means of schools, babies' homes, women's hospitals and dispensaries, and also through evangelistic programs in the community.

Q: What is the purpose of the Perpetual Lamp in Jewish synagogues?

A: According to tradition, it symbolizes the invisible presence of the eternal. Every Jewish house of worship has one projecting over the front of the Ark. The lighting of the Perpetual Lamp is an important ceremony at the dedication of a synagogue.

Q: What is the Seal of the Confession?

A: In the Roman Catholic church, the obligation resting upon priests to keep secret and make no reference to facts learned through sacramental confession.

Q: What is Lent?

A: The 40-day period of fasting and penance preceding Easter. It begins this year on February 7.

Q: What is Millenarianism?

A: Belief in the millenium, or period of 1,000 years before the end of the world, when Christ and the saints will rule upon earth.

The Way it Happened . . .

IN HAMILTON, OHIO . . . When Detective James Parker, treasurer of the annual police picnic, deposited the picnic receipts at a local bank a bogus \$20 bill was among six of that denomination taken in.

IN ASHTABULA, OHIO . . . Police are listening for the sound of sirens since the city's \$400 air raid siren, purchased during World War II, was stolen.

IN COLMA, CALIF. . . Missing ballots which caused cancellation of a city election were found under the front seat of the police chief's car—where he had put them for safe delivery to the city clerk.

IN HAMTRAMCK, MICH. . . Police made an understandably intensive search for the thief who invaded headquarters there and stole four typewriters and the detectives' roll-call book.

IN DAYTON, OHIO . . . Ordered by radio to investigate an automobile horn that was stuck, two cruising patrolmen had to report back that they were the offenders.

New Disease

"How's your husband?"
"He's worse."
"But I thought the doctor said yesterday he was getting better?"
"So he did, so he did. But today he says poor Sam's had gone and got the convalescence."

Funny Man!

It was once remarked to Lord Chesterfield that man is the only creature endowed with the power of laughter. "True," said the peer, "and you may add, perhaps, that he is the only creature that deserves to be laughed at."

"COLD DEMONS" got your child?

Don't let "Cold Demons" make her chest feel sore, congested—rub on Mentholatum. Fast, safe Mentholatum helps lessen congestion. Its vapors soothe inflamed passages, ease coughing spasms. For head colds, too . . . makes breathing easier. In jars, tubes.

AN ANCIENT CRAFT
Old Art of Glass Blowing Plays Vital Part in Modern Industry

It takes a deft touch, a skilled hand, controlled lung power—and imagination—to apply the ancient art of glass blowing to the demands of today's modern petroleum laboratories. The skill of the blower in making special glass equipment may mean the difference between success and failure of an important research experiment, and the craftsman must be as versatile as his material.

The glass experts of the Shell Oil company shown in the columns below are making a complicated model distillation column in the company's laboratory at Emeryville, California. Glass is used because it is relatively inexpensive, non-reactive to most chemicals, usually non-conductive to electricity, is easily shaped and, perhaps most important, it permits observation of chemical processes inside closed vessels.

The glass column as pictured in this story will be used to test and perfect oil refining processes on a laboratory scale. Next step will be to build a large "pilot plant" version, using actual construction materials. After this has proved itself to the satisfaction of scientists, the design will be incorporated into a real full-scale distillation column,

The end of a solid tube of glass is flared. This is the first step in making a tiny bubble tray used in a distillation column.

many stories in height. And it all started with a piece of blown glass—thousands of years ago.

The first use to which glass was put was artistic. It was made to serve man's unending quest for beauty. Thebes (in Egypt) was a center of glass craftsmanship more than 3000 years B.C. Theban fabricators first turned out charms, amulets, and beads—objects of no practical use but in high demand for their decorative and supposed supernatural powers. Through accident of design, this early glass was colored. In fact, the effort to make glass colorless and transparent was one of the hardest struggles of the glass maker, and has been entirely successful only within modern times.

When Augustus Caesar conquered Egypt (26 B.C.), he ordered that

Machines and deft handwork combine as an expert drills tiny holes in the bubble tray at a rate of one a second.

part of the tribute be paid in Egyptian glass articles. This seemed hard on the Egyptians for a time, but the affair took an unexpected turn. Wealthy Romans, seeing the Emperor's beautiful objects, flooded the Egyptian makers with orders for glassware, and the Egyptians grew rich. Within a few years the Romans themselves were making glass.

The Romans were lavish in the production of their glass. During the first century A.D. they produced much marvelously complicated work as the millefiori (thousand

After bubble trays are fashioned, drain tubes are installed through their centers by an expert craftsman.

Drain tubes are cut to the proper length and slotted to regulate overflow level. Only highly trained craftsmen can handle such equipment.

flowers) design in glass bowls seemingly lined with multi-colored daisies.

Knowledge of glass making spread from the Mediterranean area through the barbarous world of the north. The Romans, who carried the craft to a high state of perfection, introduced it into Gaul and it traveled thence to Britain, where remains of ancient glass works may still be seen.

Venice, destined to reach the peak of fame in glass manufacture, began practicing the art not long after the founding of the city in 420 A.D. By the end of the thirteenth century, Greek artists in Venice were producing fabulously fine and beautiful glass, which con-

The parts are ready and the column is assembled. Each bubble tray must be spaced and sealed with precision.

tributed vastly to the city's prosperity through exports.

As early as the sixth century, a description of a French banquet specifies that the fowls were served on glass dishes. Later, Fugger, the great merchant, banker, and industrialist of Augsburg, gave to the Emperor Charles V a vessel of molten, spun, cast and twisted glass—at the same time kindly burned up the Emperor's unpaid note for a tidy sum which Fugger had lent him.

We think of woven glass textiles as something comparatively new, yet materials woven of silk and glass were known centuries ago, and ladies made dresses of them. They also adorned their headdress with spun glass aigrettes, and a certain prince made a sensation by displaying curls fashioned of glass. The jeweled glass mirror of

Nearly completed the inner column goes into a larger glass jacket and the two pieces sealed together!

Queen Marie de Medici was included in item No. 102 in the catalog of crown jewels compiled by the French revolutionary government in 1791. It was valued at \$30,000 gold.

The early history of glass was glorious—but socially exclusive and expensive.

And each country, as it learned the art of glass making, seemed to give it a new twist. Today, although there are many manufacturers turning out beautiful glass, much of it goes into laboratory equipment, telescope and microscope lenses, and lenses for eye glasses.

The practical has replaced the artistic in glass making.

NO CONSTIPATION FOR 25 YEARS

"My husband introduced me to ALL-BRAN shortly after we were married. I use it in my cooking as well as for breakfast. The result: we're regular as clockwork!" Mrs. Antonina Graziano, 453 Garfield Ave., Jersey City, N. J. One of many unsolicited letters from ALL-BRAN users. If you suffer from constipation due to lack of dietary bulk, eat an ounce (about 1/2 cup) of crispy Kellogg's ALL-BRAN daily, drink plenty of water. If not satisfied after 10 days, return empty box to Kellogg's, Battle Creek, Mich. **DOUBLE YOUR MONEY BACK!**

Value Your Health More Than Riches

Some folks think that fine clothes and fine, big houses are the most important things in life, but these things really don't mean too much if a person doesn't feel well enough to enjoy them. Most folks don't realize this, but Mrs. Lucy Braswell, of Route 2, Stone Mountain, Ga., realizes it very well. Mrs. Braswell takes HADACOL, and by taking HADACOL she found she is helping her system overcome deficiencies of Vitamins B₁, B₂, Niacin and Iron, which HADACOL contains.

Here is Mrs. Braswell's own statement: "I have been sick for some time with stomach disturbances. I began taking HADACOL and I have been taking it about six weeks. I am so much better and much stronger. I will continue to take HADACOL. It sure has helped me. I tell my friends about HADACOL. I can't praise HADACOL too much. I am 59 years old."

If your druggist does not have HADACOL, order direct from The LeBlanc Corporation, Lafayette, Louisiana. Send no money. Just your name and address on a penny post card. Pay postman. State whether you want the \$3.50 hospital economy size or \$1.25 trial size. Remember, money cheerfully refunded unless you are 100% satisfied. —Adv.

**Scanty Fertilizing
Only Crop Starter**

**Soil Building Practices
Needed for Best Results**

Scanty fertilizer applications are like a shot in the arm a doctor gives the patient. The treatment enables the patient to recover enough to take more nourishment. But in the case of scanty fertilizer applications, the "crop starter" gives the plant quick early growth and a strong root system, but fails to provide enough nourishment to carry the crop through to healthy, high-yielding maturity.

Putting sufficient fertilizer in the ground isn't a cure-all. You have to be sure the soil is in condition to deliver all the plant nutrients, moisture and oxygen the crop needs. To produce maximum crop results, fertilizer has to be teamed up with

do their job of feeding the growing plant.

You can fit the soil for maximum returns from fertilizer by building up its organic matter content. This can best be done by growing well-fed deep-rooted legumes regularly in the rotation. The legume roots and tops add organic matter and make a thicker layer of soil. A soil high in organic matter has plenty of water-storing capacity.

**Illinois Farmers Enjoy
Good Year, Reports Show**

Farmers attending the 36th annual meeting of the Illinois agricultural association were agreed that 1950 has been generous to Illinois.

Farmers in every section of the state agreed that corn, soybean and other grain crop yields for 1950 were satisfactory. Many reported corn yields better than expected in view of the anticipated damage from corn borers.

Cattle feeders, hog raisers, wool growers and dairymen also enjoyed generally good years.

Fruit growers, however, reported peach yields were very light and said the apple crop was only about half of normal.

Illinois livestock producers association, a state wide agency coordinating the work of livestock marketing co-ops, reported that member companies handled animals valued at approximately \$150,000,000 during the year.

Approximately 5,000 farmers attended meeting.

**U. S. Crop Production Up
During Last Ten Years**

Agriculture during the last decade has increased production from 10 to 14 per cent although its manpower had declined and the nation's population has increased, agriculture leaders point out.

The increase was due in great part to agricultural colleges with their branches of extension, research, and resident-teaching. Mechanization also played an important part in the increase.

Uncle Sam Says

January 29 is the birthday of one of the revered Presidents of this country, William McKinley. Pres. McKinley knew and practiced the habit of thrift. He realized that it was thrift which helped build this country. He advocated an early start in savings in the following words: "The little savings bank in the home means more for the future of the children of a family, almost than all of the advice of the world. It gives them the right start." Your right start is to sign up today for the Payroll Savings Plan for the purchase of U. S. Savings Bonds. U. S. Treasury Department

Use Safe Rat Poison — Fortified red squill, either powder or liquid form, is the safest rat poison. Some other rat poisons are extremely dangerous to other animals and to humans, he warns.

Surplus Potatoes

These hereford steers of the Kittitas valley region, Ellensburg, Washington, are eyebrow deep in surplus potatoes. Tons of the surplus potatoes are being used in the region to fatten cattle. The ranchers pay two dollars a ton to the government and receive the potatoes dyed so they can't sift back into the commercial market.

**Cows Don't Like Cold
Water, Specialist Says**

Ivan H. Lougery, dairy specialist of the Wyoming agriculture extension service, points out that dairy cows will drink more water when the water temperature is above 50 degrees.

"Water consumption has a direct influence on milk production," he says, "therefore, when cows don't drink the needed amount because it is too cold, milk production declines."

HOUSEHOLD MEMOS... by Lynn Chambers

Serve Eggs for Breakfast Variety
(See Recipes Below)

Breakfast Pointers

IF YOU VALUE your family's health and well-being, don't send husband and children off to work and school without a good breakfast. Don't expect to get a good morning's work out of yourself, either, if you nibble on some fruit and gulp a cup of coffee. You simply can't do it.

Plan a breakfast menu as you would lunch, dinner or supper. Try out new foods, inject variety into the menu plan, and do give yourself enough time for both the preparation and eating enjoyment of such a project. Give it a trial for a month, and you'll never again want to go back to skimpy breakfast habits.

Start off with fruit or fruit juice, such as citrus, because this is a good opportunity to get oranges and grapefruit into the day's menu. Follow with cereal, eggs, bread and butter and beverage.

Eggs can be prepared in many ways and give you good protein for what you spend. They add lots of appeal to the breakfast, and can make a feast of the one simple meal of the day. Don't forget to tuck eggs into the breakfast bread every now and then, too, for that extra treat to the appetite, and for that extra nourishment.

They're simple to prepare, of course, those eggs, if you remember not to treat them roughly. Moderate to low temperatures whether you soft-cook, fry or bake them is of utmost importance in keeping them tender and palatable.

Baked (Shirred) Eggs

Break and slip 1 or 2 eggs into greased individual shallow baking dishes. Bake in slow oven (325°), 12 to 18 minutes, depending upon firmness desired. Serve from baking dishes.

French Omelet (Serves 2)

3 eggs
3 tablespoons milk or water
¼ teaspoon salt
¼ teaspoon pepper, scant
1 tablespoon fat
Mix eggs, milk, salt and pepper thoroughly. Avoid foaming. Heat fat in skillet (approx. 8-in.) just hot enough to sizzle a drop of water. Pour in egg mixture. Reduce heat. As the mixture at the edges begins to thicken, draw the cooked portions with the fork toward the center so that the uncooked portions flow to the bottom. Tilt skillet as it is necessary to hasten flow of uncooked eggs. Do not stir and keep mixture as level as possible. When eggs no longer flow and surface is still moist, increase heat to brown bottom quickly. Carefully loosen edge. Fold in half or roll. Total cooking time is 5 to 8 minutes.

French Toast (Serves 4-6)

3 eggs, beaten slightly
½ teaspoon salt
1 teaspoon sugar
1 cup milk
6-8 slices (2-3-day old) bread
Fat for frying
Combine eggs, salt, sugar and milk in shallow dish. Dip bread in egg mixture turning to moisten. Brown on one side on well-greased

griddle or frying pan, turn and brown the other side. Add fat as necessary to keep from sticking. Serve with syrup, jam, honey, confectioners' sugar or fruit.
Variation: Cranberry French Toast—spread jellied cranberry sauce between two thin slices of bread before dipping in egg mixture. Brown as above. Serve plain or with creamed chicken, eggs, fish or meat.

Whole Wheat Muffins (Makes 24 small muffins)

1 cup whole wheat flour
1 cup white flour
2 teaspoons baking powder
½ teaspoon salt
2 tablespoons sugar
½ cup evaporated milk
½ cup water
1 tablespoon vinegar
1 tablespoon soda
1 egg
3 tablespoons shortening, melted

Sift flour with other dry ingredients into mixing bowl. Combine milk, water and vinegar and add soda. Beat egg, add the soured milk and shortening. Stir quickly into dry ingredients. Pour into greased muffin pans. Bake in a hot oven (425°) about 15 minutes.

*Bacon Muffins (Makes 12 muffins)

2 cups sifted enriched flour
3 teaspoons baking powder
½ teaspoon salt
3 tablespoons sugar
1 egg, well beaten
1 cup milk
4 tablespoons shortening, melted
7 strips of bacon, cooked, crumbled

Sift dry ingredients together in bowl. Combine liquid ingredients and add to flour mixture. Stir only enough to partially dampen flour. Add bacon and stir only enough to blend. Fill greased muffin pan (12 2-inch cups) two-thirds full. Bake 20 minutes in hot oven (400°).

Butterfly Cinnamon Rolls (Makes 12 rolls)

2 cups sifted all-purpose flour
3 teaspoons baking powder
1 teaspoon salt
½ cup shortening
1 egg, beaten slightly
½ cup milk
2 tablespoons butter, melted
½ cup sugar
1 teaspoon cinnamon

Sift dry ingredients. Cut in shortening until mixture resembles the texture of coarse cornmeal. Combine egg and milk and stir in dry ingredients until just blended. Turn out on flour board or cloth. Pat out dough. Fold in half. Repeat six times. The last time roll to ¼-inch thickness. Spread with melted butter, sugar and cinnamon. Roll up and cut into 1-inch slices. Cut a slit through center parallel to cut edges of slice down to but not through bottom layer of dough. Spread halves from center out on baking sheet. Bake in a hot oven (425°) until browned, 15 to 20 minutes.

REHABILITATION . . . Trainers teach retired greyhounds difference between cat and hare.

Big Fellows

Superman of comic-strip fame has a plenty of competition in American folklore, which is filled with tall tales of mighty men. Among them is Big Paul Bunyan, hero of the American lumberjacks. Bunyan is described as being so enormous as a baby, his mother had to use "the wheels off a wheelbarrow as buttons for his jacket."

WHEN SLEEP WON'T COME AND YOU FEEL GLUM

Use Delicious **Chewing-Gum Laxative REMOVES WASTE NOT GOOD FOOD**

When you can't sleep — feel just awful because you need a laxative — do as MILLIONS DO — chew FEEN-A-MINT. Doctors say many other laxatives, taken in large doses, start their "flushing" action too soon . . . right in the stomach where they often flush away nourishing food you need for pep and energy! You feel weak, tired. But gentle FEEN-A-MINT is different! Taken as recommended, it works chiefly in the lower bowel — removes only waste, not good food! You avoid that weak feeling — you feel fine, full of life! Get FEEN-A-MINT, 25¢, 50¢, or only 10¢

Save \$2.00 On This Home Mixed Cough Syrup

Easily Mixed. Needs No Cooking.

Cough medicines usually contain a large quantity of plain syrup—a good ingredient, but one which you can easily make at home. Mix 2 cups of granulated sugar with 1 cup of water. No cooking! Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then get from your druggist 2½ ounces of Pinex, pour it into a pint bottle, and fill up with your syrup. This gives you a full pint of wonderful medicine for coughs due to colds. It makes a real saving because it gives you about four times as much for your money. Never spoils, and children love it.

This is actually a surprisingly effective, quick-acting cough medicine. Swiftly, you feel it taking hold. It loosens phlegm, soothes irritated membranes, makes breathing easy.

Pinex is a special compound of proven ingredients, in concentrated form, a most reliable, soothing agent for throat and bronchial irritations. Money refunded if it doesn't please you in every way.

FOR EXTRA CONVENIENCE GET NEW READY-MIXED, READY-TO-USE PINEX!

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm and aid nature to soothe and heal raw, tender, inflamed bronchial membranes. Guaranteed to please you or money refunded. Creomulsion has stood the test of millions of users.

CREOMULSION

relieves Coughs, Chest Colds, Acute Bronchitis

TO KILL **Chicken Lice AND Mites**
Apply Black Leaf 40 to roosts with handy Cap Brush. Fumes rise, killing lice and feather mites, while chickens perch. One ounce treats 60 feet of roosts — 90 chickens. Directions on package. Ask for Black Leaf 40, the dependable insecticide of many uses. Tobacco Products & Chemical Corporation • Richmond, Virginia

Only Firestone TRACTOR TIRES Give You All These EXTRAS

Let the Facts Speak For Themselves . . .
You can believe the facts when you see the proof right before your very eyes. Look at the tires and you'll see that Firestone offers you—
A Choice of TWO Tread Designs, a choice between the new and advanced Open Center and the one and only Traction Center Tire.
Curved and Tapered Bars in both tires . . . tapered for a sharper bite, and curved for greater leverage.
Flared Tread Openings in both tires . . . wider at the shoulders to prevent soil jamming and to permit easy, automatic soil release.
Wide, Flat Treads in both tires for full shoulder-to-shoulder traction power and life.
Only Firestone gives you all these extras. That's why Firestone Tires pull better, last longer, and turn out more work for your tire dollar.

Always buy Tractor Tires built by FIRESTONE, Originator of the First Practical Pneumatic Tractor-Tire
Listen to the Voice of Firestone on radio or television every Monday evening over NBC Copyright, 1961. The Firestone Tire & Rubber Co.

Egg Production at New High in October, Report

A record rate of lay and the largest
October egg production of all
time were reported by the U. S. de-
partment of agriculture.

Farm flocks laid 4,014,000,000 eggs
in October, six per cent more than
in October last year and 37 per cent
above the 1939-48 average. With fa-
vorable weather throughout most of
the country, production was at rec-
ord levels in all areas except the
south central.
