Pair Held on Burglary Charge

Last week Friday, Hope was honored by the presence of Sheriff's, Deputy Sheriff's and State Police. They stopped to pick up Lawrence Blakeney to act as their official guide to pilot them through the "bad lands," southwest of Hope. They were on the trail of two gunmen who had stolen quite a bit of merchandise in Eddy and Chaves counties the past two months. One of the desperadoes was picked up at his home in Artesia. He informed the officers that his partner was hiding out in a cave in the ranch country southeast of Hope. The officers arrived out there early in the morning and routed the desperado out of his cave by the use of tear gas bombs. The following account of the raid is taken from the El Paso Times:

Eddy county officers, working with the aid of the Chaves County Sheriff's Department, Friday broke up a two-man theft ring which has been operating in the two counties for several months.

Sheriff Bill High said Friday night the arrests brought about the recovery of "several thousand dollars worth of stolen property."

Jailed in Roswell was Moses Archuleta, 32. His accomplice, Lee W. Reagan, alias Burris Jasper, 35, was being held in Artesia.

Meanwhile, Eddy County Sheriff's Department officers still were gathering up loot from several hiding places in the Artesia area, High said.

Both of the two men held have been working on ranches near Artesia.

Friday Sheriff Ping Evatts of Roosevelt County informed High that Reagan is wanted there for grand larceny. He took part in a gun battle with Portales officers in that city last year. He escaped and has "laid low" since, Evatts said.

High gave this version of the checking of the theft ring:

Eddy County officers became suspicious of the two men several days ago. Deputies Carl Hawkins and Loyd Plakeney, both of Carlsbad, went to Artesia early this week to work with Deputies Mark Walters and R. W. Smith on the case.

Friday they were joined by Sheriff Harry Puryear and Chaves County officers when investigations indicated some of the stolen property was from that county.

Thursday night a posse composed of 11 officers surrounded Reagan's home. No one was there but the officers found a large amount of tires, wheels, cabinet radios, blankets, guns, and other articles.

Returning to Artesia the officers picked up Archuleta at his home and were told by him that Reagan was hiding out in a cave on a ranch near Hope.

The officers surrounded the cave early Friday morning and at daylight drove Reagan out with a blast of tear gas. In the cave they found more stolen property and "enough groceries

to last two months."

High said Friday night the officers were searching for additional caches. Until all of the loot is rounded up it will be impossible to determine its true value, he said.

The loot was taken in robberies of stores and homes in the area which have been on the increase during recent weeks, the sheriff said.

Today's Meditation

FRIDAY, MAY 23

Now abideth faith, hope, love, these three; and the greatest of these is love. (I Corinthians 13:13. A.S.V.)
Read I Corinthians 13.

Often we hope for things that we cannot obtain. We sometimes despair because we cannot get the things our hearts are set upon. But worthy though they may be, it is not merely in acquiring things that we find our true satisfaction and joy in life. It is only when we really love with Christlike love and compassion that the warmth and glow of God's blessings descend upon us, blessings sensed both in mind and heart. Imagine the result if but half of the lives being lived at this moment were guided by the love of Christ!

To have faith and to hope that our world will be a better and happier place is to believe that it will be. By loving we satisfy our desire to help make the world as God would have it.

We rejoice in the hope that there may one day be lasting peace and good will. We have faith that we shall under God, be so blessed. But we love, so that faith and hope will not be in vain. Love conquers all: without it, we are nothing; with it, we are everything. God so planned it for us.

PRAYER

Our Father, help us to have faith and hope, seeing that they are important to life. But help us, above all, O God to love so that our faith and hope will not be in vain. In Christ's name we pray. Amen.

THOUGHT FOR THE DAY

Love in Christ's spirit and see what happens!

Blasting at Parks Ranch

About six weeks ago several "doodlebug" drilling machines went out to the Robert Parks ranch west of Hope and drilled several test holes. Now another outfit has arrived and have been blasting these holes. It is the opinion of some that indications of oil was discovered by the "doodlebugs" and now the blasting is being done to ascertain how much oil is available, if any. Any information that is published is all guess work as no information is given out by the oil companies. Three drilling rigs are out at the Ed Watts ranch north of Dunken. All we can report is that they are drilling or getting ready to drill. But we are pretty sure that there must be some indications of oil or the formations look favorable to attract all these drilling rigs here.

Democratic Meeting Saturday, May 24

A meeting of the members of the Democratic party in Precinct 3 will be held Saturday afternoon, May 24, at 3 p. m., at the Altman Cafe. Two members of the Democratic precinct committee will be elected. Possibly other matters of business will be considered.

Who Will Win The Nomination?

The struggle for the Republican presidential nomination has really become a horse race. To all practical purposes, General Eisenhower and Senator Taft are running neck and neck so far as solidly pledged votes are concerned. Some eager partisans on both sides still claim that their man has a commanding lead and that the prize is practically in the bag, but this is the sort of wishful thinking that is ever a part of the great game of politics.

Eisenhower is strongest along and near the Atlantic seaboard—as his extremely impressive victory in Massachusetts demonstrated. Taft, on the other hand, pulls his greatest weight in the mid-west and parts of the south. The Eisenhower camp was particularly elated by the fact that he attracted many Democratic voters in the Bay State primary. This, they argue, should be the clincher, on the grounds that no GOP candidate can win the presidency without cutting deep into the ranks of the Democrats and independent voters.

In any event, nothing has been decided. It is perfectly possible, for example, though not probable, that by convention time either Taft or Eisenhower could have enough delegates (603) to get the nomination on the first ballot. It is also perfectly possible that they would be so nearly equal in strength as to make the nomination of either impossible, and so force the choice of someone else. This last possibility, however, now seems very unlikely.

One other candidate will have a sizeable bloc of delegates when the convention convenes. That candidate is Governor Warren, with his 70 California and six Wisconsin votes. These votes represent powerful trading material. Governor Warren is making an aggressive effort to capture Oregon's 18 delegates in the May 16 primary. The forecast is that he will get a substantial popular vote, but that Eisenhower will get the delegates.

There is one facet to this race that has some cool heads worried. Bitterness is beginning to appear among both Taft and Eisenhower supporters. There is a tendency to get down into the political mud and start slinging it. The cool heads believe that the respective campaigns for the nomination should be conducted on a high political level, as political levels go. First of all, they say, both General and Senator are obviously men

of the highest character, sincerity and patriotism. You can disagree with their views, but you can hardly call them cheap run-of-the-mill politicians. Secondly, the argument runs, the highest possible degree of unity among anti-Administration forces will be needed if a GOP victory is to be won in November and this unity could be seriously undermined by mud-slinging between the Taft and Eisenhower backers. As for the two men personally, it certainly isn't to be expected that they will go in for dirty fighting.

The Democrats are in a pickle. The professionals within the party don't want Senator Kefauver, but he has swamped the field in the primaries. They like Governor Stevenson, an able man with a fine record, but he has shown no inclination to seek the nomination and he is not well known nationally. Administration men were strong for Senator Kerr, but he has shown no ability to obtain widespread popular support.

School News

3rd, 4th, and 5th Grade News—

We are at the end of a very happy and successful school year. Some of us are glad that school is closing and some of us are sorry to see it close. But all of us will be happy when school opens in the fall and we can be together again. We have had so much excitement recently that we felt as if we were walking on air. We enjoyed presenting our operetta, "Polly Make Believe" and it pleased us to see so many familiar faces to watch us perform. We appreciated the cooperation from the parents, who so willingly assisted us with the operetta and the costumes. We enjoyed the trip to Artesia and it was nice of Mr. Sprayberry to give us a free ride on his toy train. We wished we could have stayed longer. Thanks to these parents who furnished cars to take us: Mr. and Mrs. Joe Young, Mr. and Mrs. Orland Parker, Mrs. George R. Seely, Mrs. Luke Alexander, Mrs. Haskell Harris, Mrs. John Hardin, Mrs. Martin Hibbard and Mrs. Anderson Young. Mrs. Ralph Lea and Mrs. Anderson Young treated us while we were there. We had lots of fun. We took our achievement tests recently and we are hoping we have improved since last September. We saved one of our penmanship papers this week and compared it with the penmanship paper we made on the first day of school. How we laughed at our messy papers made so long ago. Most of us showed much improvement. We received a package from Port Washington, N. Y. this week which consisted of seashells and art work. We are sorry to have Eddie Marlow move to Lovington this week, but since his father is working on an oil well there, Eddie had to move, too. We celebrated all of the pupil's birthdays this week, which come during the summer. Thanks to W. E. Rood for publishing our news for a whole year and we'll see you again next September.

Specialists Predict Egg Prices to Remain High

Poultry specialists predict egg prices will remain high during the winter of 1952 and outline a few pointers for increased production.

They urged use of an all-pullet flock. Pullets lay more eggs than old hens and a good pullet flock coming into production this fall will give you the advantage of usual good fall egg prices.

Dry quarters will mean more eggs and will prevent waste of feed, so good insulation and ventilation are important. A balanced ration will save feed. Prompt removal of birds that are not producing will save feed and increase profits. Control lice, mites and rats to improve the health of birds.

Using light to provide a 13 to 14 hour working day for the hens is a cheap way to increase production. Keep nests clean, provide plenty of nests and gather eggs three times a day to avoid broken and dirty eggs and, thus, market a better product.

Walk Through Gate

Here is the answer for a walk through gate for a barbed wire fence. Three extra posts, a few boards and two hours of your time are the essentials. The 2x4 nailed across the top takes the place of two braces. Located at convenient points on your farm this type of gate will save time and prevent that business of getting down on the ground and rolling under barbed wire.

New Type Gate

A new type gate that eliminates the problem of opening a gate when sheep crowd into a corner is illustrated above. The gate is 16 feet long. The height of the pole at the top is determined by the balance. The gate pivots near the center at both ends. It locks at both ends near the bottom and can be released with the one lever shown. The gate may be opened in either direction, is easy to operate and no lifting is required.

“Support the Drillers Every Day, Every Way”

One Nutrient Will Not Nourish a Crop Balanced Food Elements Needed for High Yields

It takes the teamwork of plant nutrients, good soil tilth and plenty of moisture to produce 100-bushel per acre corn crops.

Each of the principal plant food elements—nitrogen, phosphate and potash—has its particular job to do in building strong roots and stalks and developing well finished, fully matured ears. Each reinforces the others.

University of Illinois agronomists demonstrated that you can't depend on any one nutrient to do the whole crop feeding job. When nitrogen alone was added to corn, yields were only one-third as much as when lime, nitrogen, phosphate and potash were used. Phosphate alone gave only half as many bushels of corn per acre and potash alone, only one fourth.

Keeping the soil in good tilth is just as important as maintaining a balanced nutrient level. This can be done by following a rotation that puts in a well fertilized legume-

grass crop a year or two before corn planting.

Land plowed out of a good sod crop is well conditioned to make maximum use of nutrients and mois-

ture and to produce extra bushels of corn per acre. Such soil is mellow and porous. Drainage is good. Water is absorbed quickly and more of it is stored for the use of the crop.

Agronomists point out that another requisite for high corn yields is good seed and a stalk population sufficient to make use of the soil's nutrient supply. They advise planting well adapted hybrids that are particularly suited to your growing conditions. A stalk population of from 14,000 to 16,000 is needed on most loam soils.

Efficient Grass Feeding Builds Profitable Herds

Grass-fed cattle going to market with a moderate finish may never

top the market, but nine times out of 10 they make the stockman most for his investment. Grass-feeding is the natural way to grow cattle, livestock specialists believe.

A major line between the soil and man's food, grass can be grazed directly, made into hay or silage. It offers a year-around supply of forage or feed for your herd. Cattle are able to convert forage into beef most effectively if the producer manages his range wisely and efficiently.

Cattle are selective in their grazing, choosing the best smelling and tastiest grasses. Ideally, there should be a succession of new growth which will supply adequate amounts of desirable forage over a long grazing period. In many areas this can be done by growing pasture mixtures with cultivated grasses.

A cow can hold from 120 to 180 quarts in its four stomachs. To fill them she will eat 100 pounds or more of green grass each day when the pasture is good. She also requires from 10 to 15 gallons of water. The producer should keep these facts in mind to gain the best and most efficient use of his pasture.

You're money ahead when you buy on these **PLAIN HARD FACTS**

(Continuation of standard equipment and trim illustrated is dependent on availability of material.)

MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!

Stack up what you get for what you pay . . . and join the nation's largest group of truck users by choosing Chevrolet

By far the biggest number of truck users today are Chevrolet owners . . . and for good hard-headed reasons. Because what they get is this:

Low Cost—in purchase price and in upkeep. A truck that gets the job

done. A truck that's rugged, long lasting.

Take a look at the four facts below . . . and see why you, too, will be money ahead with a Chevrolet truck. Come in and see us about it!

FACT NO. 1

Save money on purchase price
Stack up a Chevrolet truck against any other truck with comparable specifications. You'll find the Chevrolet truck lists for less.

FACT NO. 2

Save money on operating costs
Hundreds of thousands of truck users have proved to their own satisfaction that Chevrolet costs the least of all to own and maintain.

FACT NO. 3

Save money on job efficiency
Chevrolet trucks are factory-matched to your payload requirements. You don't buy "too much or too little truck."

FACT NO. 4

Save money on low depreciation
Records show that Chevrolet trucks traditionally bring more money at resale than any other make which costs about the same new.

Guy Chevrolet Company, Artesia, New Mexico

SCRIPTURE: John 11:14-16; 14:1-6; 20:24-29.

The Risen Lord

Lesson for April 13, 1952

IN all the chorusing Easter music, in all the multitudinous many-voiced "I believe . . ." in the midst of the Easter lilies, is it hard to

believe? Some find it so and feel ashamed that in the presence of others' bright faith their own doubts rise darkly dim, their faith once clear and warm now grown opaque and cold. It is at Easter time that such a person finds his case most tragic. Doubt that echoes a universal loss of faith is almost natural; but why must doubt stand like a dark rock in a sunny meadow, cold in the midst of flowing springtime?

Dr. Foreman

The Man of Dark Mind

TRAGIC such loss of faith may be; but not new. For in Christ's first Twelve—we must say first Eleven, for Judas had sold himself to another—even in that choice company there was one who, on the

First Easter, when the voice of all his friends spoke as one: He is risen! could only answer, Is he risen, indeed?

The church has given the name of Saint to these eleven men; they will not deny it to Saint Thomas. For sainthood is not confined to those who have never wrestled with doubt; saints are not only those in whose eyes God and his ways have been always clearly seen.

High in the roll of Christian saints is the name of Thomas, a man of dark but honest mind. His doubt was very like him. He was not a man who most easily believed what was most pleasant.

When Jesus had set his face to go to Jerusalem, the other Ten looked for a Throne, and thrones for all; Thomas alone looked for death. Yet in the very hour, cheered by no bright illusion, Thomas could say what no other did: "Let us go too that we may die with him."

In the upper room at the Last Supper, again the voice of Thomas bespoke his dark mind. "We know not whither thou goest; and how can we know the way?"

So it could have been small surprise to the Ten that when they went to Thomas with the glad news of Easter Day, he was slow to believe.

Minnesota Farm Receipts, Expenses Hit New Highs

Both cash receipts and expenses of Minnesota farmers reached new high marks in 1951. Receipts from the sale of farm products reached a peak of 1,391 million dollars, topping 1950 by 14 per cent and the previous record, in 1948, by 4 per cent. At the same time, cash expenses in 1951 rose nearly 12 per cent above 1950. The actual increase in net cash income over 1950 was only moderate.

TODAY'S Meditation

Let the redeemed of the Lord say so. (Psalm 107:2. Read Acts 16:25-33.)

The Christian life is not merely a beautiful theory; it is faithful practice. God designed our religion to produce character and right living. Genuine faith produces Christlike motives and purposes as governing forces. If our living is not in accord then our profession must be rejected, for we are, indeed, wolves in sheep's clothing. The world expects to see in us character and right living as proof of our faith.

The influence of the Christian's life cannot be measured. Physicists conducted an experiment to study the effect of swinging a small cork against a suspended weight. Continuing this action, there was gradually a slight tremor and at last the weight was swinging to and fro. We may think of ourselves as being small and weak in influence, as the little cork, but Christian living is a force for good far greater than we know or can measure.

PRAYER

Deliver us, O God, from living lives that would be condemned because of their disregard of Thy holy will and purpose. Sustain us in our faith to the end that we may practice what we profess. Give us strength and courage this day and every day so that others in seeing our good works may glorify Thee. For Jesus' sake. Amen.

THOUGHT FOR THE DAY

"He most lives who thinks most, feels the noblest, acts the best."—P. J. Bailey.

Confusion Reigns Under OPS Regulations

In a recent article a staff reporter of the Wall Street Journal pointed out that despite unchanged outward appearances a beef animal is no longer the relatively simple creature he used to be. Today's critter now conceals beneath his hide more than 1,000 possible wholesale price ceilings, depending on how he is slaughtered, how the meat is wrapped, who eats it and where it is shipped. For each kind of meat animal there's a special set of ceiling prices and regulations governing processing.

One of the nation's leading meat packing companies sells 90 per cent of its tonnage below ceiling prices and still has to keep 300 people working full time figuring out how to comply with OPS regulations. Confusion reigns supreme. Accountants and clerical workers in a single month piled up \$200,000 in overtime pay sorting over old records for OPS. One contradiction in regulations made it necessary to go through 11,000,000 invoiced items a second time. A distributor in Denver whose territory extends from Canada to Mexico has to keep track of 11,000 different ceilings on veal alone.

The best description of the regulation mess is "incredible—but true." It is a perfect example of the waste, inefficiency and disruption that inevitably occurs when the Washington deep-thinkers and their political stooges decide they'll remake the nation's economy and run it by fiat. The fact that they know little or nothing about the complexities of business they regulate doesn't bother them a whit. Order follows order, amendment follows amendment, new interpretation follows new interpretation—and no one knows from one day to the next what's going to happen. If this goes on long enough, the tragic end result is always the same—initiative is discouraged, the strongest backs crack under the burden of red tape, scarcity takes the place of abundance, and the public pays and suffers.

Low Down From Hickory Grove

For years now we been making laws about "rivers"—how to control 'em. We been pouring in dinero by the train full—but Old Man River, to show us up as up-starts and not knowing much about what we are up to, pays no heed, and floods as he sees fit—if not more so.

You take a river and put a dam across it—and if it rains sometime—you will catch yourself some rain water. And if it rains a whale of a lot—and if the dam is empty to start with—the dam will prevent so much water from flooding down stream. Putting dinero into dams such as this will pay dividends, but we don't do it that way. We pass laws for dams—and donate big money—but the Smart Boys tell us we might as well put in a dynamo or 2 and make some power on the side. Congress, not knowing a kilowatt from the side of a barn, says that is "jake" with us—go to it, it says. But the trick to the get-up is that you can't make power unless the dam is full and the water can flow over and turn the water wheels.

So, with the dams full of water and the dynamos running full tilt and making kilowatts, what happens

when the spring freshets come along. Yep, that's it, Old Man River don't even hesitate. We been getting it in the neck—and how—with our "smart alec" dam antics.

Yours with the low down,
JO SERRA.

The Way Things Look to Me

(By the Editor)

Here it is the middle of May and no rain yet. Certainly we can't go another year without moisture. I guess we had all better go to raising turkeys. The drier it is the better the turkeys like it.

Newsprint goes up in price \$10 per ton effective June 15. How much longer can the newspapers of this country hold out without raising their subscription rates or going out of business. Subscription rates can go so high that readers cannot afford to subscribe.

The speed limit recently put into effect by the Mechem administration was not worth the time and effort. Motorists travel down the highways at whatever speed they care to travel. Some of them travel 75, 100 and 125 miles per hour and nothing is or can be done about it. There is only one way to reduce this speed mania and that is to manufacture cars so that they won't run over 60 miles per hour.

We were sorry when we recently read that the Payne Packing plant had closed its doors due to OPS rules, regulations and red tape. It wouldn't be so bad if the officials of the OPS knew one thing about the meat packing business. Some of them don't know the difference between a steer and a cow and then they try to tell experienced men how to run their business.

I am wondering just how much the
