# 'The Saga Of Bailey County' around

Muleshoe

The Three Way School Board of Trustees will hold a regular school board meeting at 7:30 p.m. Thursday, August 13 in the Administrative Office of the school, located at Maple, Texas.

The subjects to be discussed are listed below:

1. Minutes of Previous Meeting

2. Bills Payable

3. Open Bids A. Fuel

B. Instructional Supplies

C. Other Supplies D. Milk

4. Open Forum

5. Principal's Reports

6. Executive Session

7. Personnel Resignations 8. Personnel Contracts

9. Lunch and Breakfast Program A. Prices

B. Bank Account (new accounting mandates)

10. Fixed Asset Policy

11. School Calendar Update

12. Board Meeting Resolutions 13. Alternative School Reports

14. Outstanding Recognition

15. Budget Workshop

16. Set date for Budget Adoption 17. Other Business Pertaining

to District

18. Superintendent's Reports

A Public Hearing will be held August 25, 1992 at 7 p.m. in the Lazbuddie School Cafeteria to discuss the districts Site-Based Management Plan and the five year Technology Plan.

All community members are urged to attend.

The Muleshoe Memorial Park Cemetery, Inc. will hold their annual meeting Tuesday, August. 18 at 8 p.m. at the Muleshoe State Bank meeting room.

Everyone interested is urged to

Pvt. Peter I. Cantu has completed basic training at Fort Leonard E.

During the training, students received instruction in drill and ceremonies, weapons, map reading, theatrics, military courtest, military justice, first aid and Army History and traditions. He is the son of Jesse G. and

Guadalupe Cantu of Farwell. The private is a 1979 graduate of

Farwell High School.

If you would like to be a Girl Scout this year, you may register Friday from 2 to 5 p.m. at the Swimming Pool.

Registration for the Girl Scout programs \$6.00 and all girls need to take \$1.00 to swim.

The MISD will be serving meals

# Cameras Installed, Convictions Easier

The generosity of the people in this area, and the assistance of the Bailey County Commissioners court, has made it possible for the local Highway Patrol and the Bailey County Sheriff's Office to purchase video cameras for three patrol cars. Also, television equipment was purchased for: film analysis, training, courtroom presentations, and film viewing by prosecutors.

These cameras will be used to record traffic stops, arrests, crime scenes, accidents and other relevant

The cameras make it easier to get a conviction in court. Many people have a hard time believing that the clean shaven men in the nice three piece suit sitting in court could have done all the things he is

MISD Breakfast, **Lunch Prices** Set For 1992-93

Effective August 18, the first day of school, the following are current prices to be charged.

Lunch: High School, \$1.35; Jr. High, \$1.35; DeShazo, \$1.10; Dillman, \$1.10; Reduced, .40; and Adults, \$1.85.

Breakfast: High School, .50; Jr. DeShazo, .45; High, .50; Dillman, .45; Reduced, .30; and Adults, .75.

accused of.

However, when they see the actual arrest on film, they understand what really happened. Another big plus is that they protect the officer from any charges of misconduct. It is not uncommon for persons

that have been arrested or given a ticket to try and retaliate against the officer by making charges about offenses that did not occur. By having the stops and arrests on film, the actual situation is there for all to see. The cameras are especially valuable in recording accident scenes.

Because they record audio as well as a video, the operator can take the camera out of the car, video the scene from all angles, and verbally point out and record various aspects of the scene that are unusual or note worthy. The same is true of any type of crime scene, from burglary to murder.

In this high tech world we live in, this equipment will help prove Highway Patrol and Sheriff's Office keep pace.

The officers of the Bailey County Sheriff's Office and your local Highway Patrol would like to wholeheartedly thank the following people and agencies for the assistance in making these purchases possible:

The Bailey County Commissioners Court, Trans-Matic Wrecker

# To Be Presented August 22

Two skits from the Production of the Saga of Bailey County was performed at Rotary at noon Tuesday. Giving a preview of the Historical Hysterical Production which will be presented on August 22 at the Heritage Complex.

Skits from "Capture of Willie The Kidd" and "Mail Order Husband" were performed by Kieth Morris-Pat Garrett; L.D. Clark-Wyatt Twirp; and Paula Braddock-Clementine.

There will be lots of old fashioned fun and entertainment, songs, local square dancers, Can Can Girls, Mule Cone Jumping, The Medicine Man St.Clair Show (Irvin St.Clair) and Roy Whitt and the Magic Monkey.

Come out at 6 p.m. for the Chuck Wagon Supper consisting of Beans, Ham, Cornbread, Corn-On-Cob, Fresh Vegetables, and Watermellon while you eat. Eventhough there will be no charge for the entertainment, there will be a small charge for the meal, with all proceeds going to the Heritage Foundation.

Bringing back memories of yesteryear, Buggies, Wagons, Mules, Surray, Stagecoach and Horses will complete the setting for a night of good family fun.

The colorful history of Bailey County will be told by lots of local entertainers including: The Sand Hills Quartet, Mike and Cassedy Cleavenger, Sharon Grant, Leamon Jacobs, Cliff Allen, Kenneth Precure, The Espinoza Family, Paula Braddock, J.B. Douglass, Jay and Sally Messenger, Joan Lewis, and Richard Edwards, as well as many other local people. Come out and see friends and neighbors in

performances as you have never

### **Volunteers** Needed At Local Hospital

The Journal was notified Monday morning that volunteers are needed to help at the Muleshoe Area Medical Center.

Volunteers are needed to work with patients or doing whatever is needed, such as fill ice pitchers, carry trays, answer lights and sometimes make beds. They might also be used as a gopher at times.

When a patient is very ill you can talk to the family and comfort them.

"These Volunteer Services will enable our nursing staff to spend more time doing their job," said Irene Dilts. "If we can take care of the little things."

Jobs are open seven days a week. There will be mornings from 8 a.m. to 12 noon and evenings from 1 to 5 p.m.

"This is a very worthy service and you will get a blessing helping others," Ms. Dilts continued.

You are asked to contact Irene Dilts at 272-3382 or Kay Swint at 272-4527 if you are interested in

Again there is no charge for the entertainment. Tickets for the meal is \$4.50 for adults and \$2.50 for children. All proceeds will go to the Heritage foundation.

The musical drama Saga of Bailey County is being presented by Muleplex Production Company Jennyslippers, The Muleshoe Heritage Foundation, and the Muleshoe Chamber of Commerce and Agriuculture.

Take your lawn chairs and join the crowd, eat a chuck wagon

#### Watch Out For Big Yellow School Buses

Buck Johnson, assistant superintendent of MISD, would like to caution everyone relative to safety measures to protect children riding school buses and also children walking to school.

All drivers of school buses have completed a 20 hour refresher course taught by David Gray, a high school instructor, therefore the drivers are certified by the Texas Education Agency.

Motorist are warned to obey speed limits, especially in the school zones, the limit is 15 miles

Drivers are reminded that they must stop completely for unloading students when red flashing lights on the bus are in operation.

Johnson also warns motorist to watch out for small children on their way to and from school and make complete stops, especially where crosswalks are painted.

Motorists are asked to drive as if their child were a pedestrian or a school bus rider. Parents are reminded to have their

children at the assigned pick-up points on time or a little ahead of Parents of Dillman Elementary

students need to help supervise their children at loading or unloading zones and at their pickup or drop-off points. "Please don't let these children cross a highway by themselves," Johnson said.

You are asked not to park in loading zones at Dillman Elementary, Mary DeShazo Elementary, High School, and Watson Jr. High Schools. Traffic would flow much smoother if parents would load and unload students on the north side of Watson Jr. High. This would eliminate the congestion.

The Muleshoe School District operates 14 buses and covers 11,000 miles in the area each day. This is a big operation and every measure has been taken to have maximum security, but the cooperation of everyone is needed to provide safer transportation of school children. "Drive as if YOUR child's life

depended on it-it does!!!

NEW CAMERAS INSTALLED --- Joe Orosco shows off one of the new cameras that has been installed in the cars of the Muleshoe Police Department and the Highway Patrol. The purchase of the cameras has (Journal Photo) been a community wide effort.

If it's data you want, then the Center for Natural Resources Information and Technology is the scientific equivalent of an ice cream shop with a summer's worth of flavors.

The center, known as CNRIT, has everything from crown canopy percentages of honey mesquite to susceptibility of concrete to corrosion by soil.

Moreover, the center wants to gather even more data -- and the software to use it -- and make them available to scientists solving problems ranging from saving Pacific salmon to determining pesticide runoff in riversheds.

Formed in 1991, CNRIT is housed in the Texas Agricultural Experiment Station's Blackland Research Center in Temple.

The center already has large data bases for U.S. and Texas natural resources information, plus a number of smaller data bases and programs for using various data. It also holds several worldwide data

Stream flows, organic content of soil, rainfall, cropping history and degrees of erosion are also available. Then there's "windthrow hazard," defined as the likelihood of trees being uprooted by wind as a result of insufficient depth of soil to give adequate root anchorage.

"It's mind-boggling," said Leesa Barton, assistant research scientist at the center. "These individual data bases are staggering in size, and when they're tied together, they're even more staggering.

Some 3 gigabytes of data are already on line and usable without assistance. That's 3 billion characters, the equivalent of 600 copies of a standard King James

Another 15 gigabytes or so are available on compact disks, but would require some assistance from CNRIT staff.

CNRIT combines data with software programs to predict real-

world environmental impacts or help solve natural resource puzzles.

The center's function is to get such electronic wizardry to scientists all over the world in a usable form. Many initial users will be in the Texas A&M University System, such as Dr. Stuart Shalot, an epidimiologist at the School of Veterinary Medicine who is looking into rates of birth defects in the Rio Grande Valley that may be linked to pollutants in

However, any agency with an interest in CNRIT can become part of the center and use its resources. Another project involves Dr. Jay Atwood of the USDA's Soil Conservation Service in Temple, who is helping study what can be done about Pacific Northwest salmon which are moving up freshwater streams in smaller numbers than in the past.

Because data and programs have been gathered or put together by federal, state and other scientists or researchers over many years and in many formats, CNRIT's job of pulling information together is a complicated one.

Part of the difficulty is in taking data from many storage formats and computer operating environments and routing them into a central computer network. But data that once needed a shelf of magnetic tapes requires only a tape a bit bigger than a cassette, Barton said.

"Some soil data we have from years ago was first input on key punch cards from very, very poor photocopies. We've come a long way since then," she said. "With the researchers and technicians we have here, we have enough people and resources to get the job done."

The Blackland Center's Dr. Paul Dyke and center director Dr. Allan Jones led development of the CNRIT concept. Dyke estimates that upwards of 6 gigabytes of data will be online within a year.

The system is capable of much more, but because software, operating systems and data formats of the original data collectors and users vary, the amount of work CNRIT can take on will be limited by its manpower.

"The idea was to try to get a repository that would be somewhat like a 'help desk' for data, where researchers could get certain kinds of data without being forced to spend a lot of time and effort to get it," Dyke said.

"Our hope is that this would encourage them to do research in

areas where it would normally be very difficult for them to collect

data." The center's help will be available to any member worldwide through the Internet electronic mail network, he said. One thing Dyke said he doesn't know is how large the center's store of information

Barton said, however, that she's confident the center is already one of the best sources of raw data for use in natural resources applications.

There may be similar efforts on a smaller scale in other fields," she said, "but to our knowledge, there's not quite an effort like this anywhere else."

### Funds Ok'd For Lubbock I20 Link

A \$3.6 million feasibility study for a highway link between Lubbock and Interstate 20 was approved recently by the Texas Transportation Commission.

Routes through Andrews, Borden, Dawson, Ector, Gaines, Garza, Hockley, Howard, Lubbock, Lynn, Martin, Midland, Mitchell, Nolan, Scurry and Terry counties are potential connections between Lubbock and I-20.

The Texas Department of Transportation (TxDOT) was directed by the commission to study the feasibility of alternate routes, prepare environmental reports, complete the public involvement process and begin preliminary engineering for the selected alternate.

The federal Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) contains provisions for such studies. ISTEA will provide \$2.9 million, which will be matched by \$725,000 in state funds.

# **MONEY TALK**

**Kay Bailey Hutchison Texas State Treasurer** 

Editor's Note: Texas State Treasurer Kay Bailey Hutchison addresses various issues related to personal finance and state government. However, these views are not intended to replace the advice of reputable financial advisers or other professional counselors.

Q. Our 19 year old daughter, who is a full-time student, is working this summer and putting the money she earns into a savings account for her college tuition. Does she have to file a tax return with the Internal Revenue Service and if so can we still claim her as a dependent?

A. In order to claim your daughter as a dependent in 1992 you must have paid more than 50 percent of her total support for the year. For example, if your daughter earns \$5,000 in income and 1040.

has a student loan in her name for \$5,000, her total income is considered to be \$10,000. Therefore, you must have paid more than \$10,000 towards your daughter's support in order to claim her as a dependent.

Assuming your daughter is eligible to be declared as a dependent on your tax return, she is still obligated to file a return with the IRS. IRS rules for 1991 state that if you are a single dependent under the age of 65 and not blind, you must file a tax return if unearned income is \$1 or more and earned income exceeds \$600. Unearned income includes interest earned from savings accounts and certificates of deposits.

If you have any questions I strongly suggest that you contact the IRS directly. The toll free number in Texas is 1-800-829-

# Showy Moth Orchids Make Debut

The moth orchid, a showy import from Taiwan, is making its commercial debut via South Texas this year, amid expectations that the plant soon could find its way into homes and offices across the country.

One of the people most excited about the prospects of the flower is a horticulturist who has been working out ways to cultivate the plant in South Texas, Dr. Yin Wang of the Texas Agricultural Experiment Station in Weslaco.

Wang's job is to find scientific solutions to the agricultural problems that crop up in the rapidly growing ornamental plant industry. He also introduces new plant varieties to nursery wholesalers who are always on the lookout for novel merchandise.

Wang thinks he has a winner in the moth orchid, or *Phalaenopsis*, as it is known scientifically.

"The trend right now in the nursery business is growing foliage plants that will produce colorful blooms," Wang said. "This moth orchid has thick, lengthy leaves and produces very beautiful blooms. They grow quite well here in South-Texas. The bloom lasts a long time, and best of all, even though they are imported from halfway around the world, they are relatively inexpensive."

Wang's relationship with the moth orchid began in the summer of 1990 during a trip to Asia. While in his native Taiwan, he visited the Taiwan Sugar Corporation, which besides producing sugar has specialized in the cultivation of the moth orchid.

Wang returned with only a few liners, or tiny plants in glass jars, on that first trip. Encouraged by their performance in the Rio Grande Valley, he has returned to Taiwan several times for more.

"The moth orchid is native to the subtropical areas of Taiwan, the Philippines, and Malaysia so they do well in the Valley climate," Wang explained. "In their natural habitat they grow on tree trunks. They wrap their roots around the trees as an anchoring mechanism. But they don't feed off the tree, so we cal them epiphytic orchids. Its roots take up water from either rain, the moisture in humid air, or dew."

For consumers, that means these indoor plants require watering only every two weeks. They do well in bright, indirect lighting and their colorful blooms last for up to three months, much longer than most probled.

Once the blooms die and fall off, one need only trim the flower spike

and wait for more blooms; the plant is a perennial, and Wang said it should last several years under the right conditions.

Wang noted that visitors to his office and greenhouse are awed by the beauty of the many moth orchids that surround him.

"Everybody that see one wants one," he said. "And that's our goal. We'd like to have these available in the mass merchandising chains, in the supermarkets and the large department stores, at reasonable prices so that everybody can enjoy them."

To achieve that goal, Wang and his staff are working on practical ways to import thousands of young plants from Taiwan, grow them to maturity in South Texas nurseries, then ship them to customers nationwide. Wang said his work is already showing encouraging results. Research goals include:

\*Determine the proper temperature and light intensity required to induce the moth orchid to produce a flower spike. "The South Texas heat is perfect for getting the orchid to do this," he said. "It's just too expensive to heat a nursery farther north. Once the plant blooms, it can be shipped almost anywhere and do well."

\*Test alternative planting mediums, since U.S. quarantine regulations prohibit importing plants in potting soil.

\*Evaluate growth regulators to shorten the flower spike without affecting flower size. The flower spike of a moth orchid tends to grow quite long, so it must be supported in its pot by a wire or a bamboo stake, making shipping more difficult.

Like roses, moth orchids come in a variety of colors, but Wang has limited his work to three: white, purple, and white with a purple lip.

Wang said one Valley grower already is shipping moth orchids to wholesalers in Houston, and another expects to produce 70,000 plants and begin shipping before Christmas.

A few moth orchids are available commercially in the Valley at selected garden centers at prices ranging from \$16 to \$25. Wang said that once he has worked out production problems, however, Valley nursery wholesalers should be able to profitably ship moth orchids nationwide at prices that are lower for the consumer.

There are any number of people who will do great things if they can do them without exertion.

The only approved drug program for helping drug abusers to break or manage their addictions to heroin is medically supervised treatment with the drug, methadone.

A powerful narcotic in its own right, legitimately used oral methadone doses reduce the heroin addict's withdrawal symptoms, without the physical damage resulting form intravenous drugs.

In Texas, as in other states, methadone treatment is available to eligible addicts through state-licensed private clinics and physicians. Regulated by the Texas Department of Health's Division of Food and Drugs, the methadone program has been a life-saving service for thousands who have survived heroin addiction to regain healthy lives.

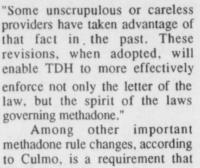

However, TDH investigators report that as beneficial as methadone treatment has been, some abuses and mismanagement of methadone doses by both patients and the medical personnel have occured. Despite rigid state and federal regulations for distribution and possession of methadone, some deaths in Texas have been traced to misuse of illegally obtained methadone.

Therefore, the Texas Board of Health, at its meeting in Austin, July 25, approved numerous proposed rule changes in regulations for the state's private methadone industry.

According to Cynthia Culmo, chief of the drug branch of the Division of Food and Drugs, "In essence, the Board has approved revisions which better clarify the laws governing methadone."

Culmo said that one of the most important changes was elimination of the so-called "30-day compliance rule." The rule formerly dictated that when TDH found a licensed methadone provider to be in violation of regulations, the agency was required to allow the provider 30 days to correct the violation.

"We have lacked the authority to immediately suspend or revoke a provider's license," Culmo said.

Among other important methadone rule changes, according to Culmo, is a requirement that clinics provide at least one counselor for every 50 patients. Exceptions to the 1-to-5 ratio will be allowed while clinics hire additional counselors.

Also, current drug addicts, or anyone known to have used opiates or methadone in the previous year will be barred from working in or owning a methadone facility.

Culmo said that TDH is drafting more proposed changes for the Board of Health's consideration "before the end of the year." Those changes will focus on qualifications and continuing education of physicians associated with methadone clinics.

### American Dream Alive

By Richard C. Halverson

Several years ago there came to my attention a quote from a book written by Alexander Fraser Tytler who lived at the end of the 18th century and the early part of the 19th (1748-1813). He wrote a book entitled, "The Decline and Fall of the Athenian Republic."

Amazing, is it not, that the following quotation from that book, written about ancient democracy, long before American democracy had been really tested, is so timely.

Tytler wrote:

"A democracy cannot exist as a permanent form of government. It can only exist until the voters discover that they can vote themselves money from the Public Treasury. From that moment on the majority always votes for the candidates promising the most benefits from the Public Treasury with a result that a democracy always collapses over loose fiscal policy always followed by dictatorship. The average age of the world's greatest civilizations has been 200 years. These nations have progressed through the following sequence:

From bondage to spiritual faith; from spiritual faith to great

courage; from courage to liberty; from liberty to abundance; from abundance to selfishness; from selfishness to complacency; from complacency to apathy; from apathy to dependency;

from dependency back int bondage."

In my ten years as Chaplain of the Senate, I cannot remember a time of greater frustration among members of Congress and their staffs, or more expressions of anger from the people.

Too much talk can camouflage the issue.

# **Tops Club**

TOPS Chapter No. 34 met at the Muleshoe Church of Christ Thursday, August 7 at 6 p.m. Leader Laverne James called the meeting to order. The TOPS pledge was recited and the fellowship song was sung. Mrs. James led the group in prayer.

Betty Jo Davis, weight recorder, called the roll with 15 members answering with the amount they had lost or gained.

Ruth Clements, treasurer, gave a treasurer's report.

Mary Edmiston was named best loser for the week. Runners-up were Linda White, first and Mollie Davis, second.

Monthly best losers were Evelene Harris, best loser; Charlotte Campbell first runner up; and Ruth Clements, second.

The meeting was adjourned with the singing of the goodnight song.

#### **More Management Opportunities** For Women

Small businesses offer women greater opportunities to move into top management positions, said a Texas Christian University management professor.

Currently four times more women are starting small businesses as compared to male entrepreneurs, Dr. Beth Freeman

The reason is obvious to Freeman. "It is because it is easier to circumvent the corporate hierarchy to become a person with management responsibility almost overnight," she said.

Freeman, who owned and managed a women's clothing store before becoming a university teacher, contended that women are often victims of the "glass ceiling," an invisible barrier that typically prevents them from entering the upper echelons of management.

Operating a small business allows women to bypass this road block and to assume management responsibilities that might not otherwise have been available to them in larger corporations.

On Passive smoking

The American Heart Association urged that second-hand smoke be treated as an environmental toxin that should be baned from office and public places.

(DM)-If you're a pizza-lover at

heart and like to entertain, this is the

recipe for you. KitchenAid has made it easy to prepare ahead with the use

of the KitchenAid Stand Mixer and

the Rotor Slicer/Shredder attach-

ment. We have included two deli-cious recipes that can be made ahead: Whole Wheat Pizza Dough along with a Fresh Tomato Sauce.

The pizza crust can be prepared the day ahead, wrapped in plastic wrap and refrigerated overnight or frozen for later use. Then one hour

before the party, remove the dough from the refrigerator and let warm

to room temperature. About 30 min-

utes before making pizzas, press

When the guests arrive let them participate in creating a pizza of their choice. We have given a recipe for a delicious Vegetable Pizza, but

as you know, toppings are as unlim-

into pan and bake as directed

A small business also may provide women who took time out to raise children an alternative to a corporate career path, explained Freeman, who chose to stay home with her children when they were

"You can't afford to drop out for five or six years and then plan to really recoup those years, so a small business offers a viable alternative," she said.

Freeman suggested that the time for entrepreneurial ventures may be ripe in light of corporate restructuring that has taken place in recent years. She said numerous opportunities for small business will arise as companies downsize and move non-essential functions outside the corporate umbrella.

#### **Food Distributors** Recognize Combest

For his commitment to sound fiscal policy, minimum government regulation and free market principles, U.S. Representative Larry Combest (R-Texas) received the Food Distribution Industry's Thomas Jefferson Award. The award honors Jefferson's belief that agriculture, manufacturing, commerce and navigation, "...the four pillars of our prosperity, are the most thriving when left most free to individual enterprise."

Combest's voting record in favor of the Balanced Budget Amendment and against tax increases and expensive burdensome government regulations drew recognition from the National American Wholesale Grocer's Association (NAWGA) and the International Foodservice Distributors Association (IFDA), who represent small businesses and employees of the food distribution

"The people of our region value the belief that people and free enterprise work best without government's burden of heavy taxation and interference," said Combest. "Sharing our concerns, this national trade association supports our demands to Congress to act responsibly for a sound economy."

Combest is among eight of the 27 Texas members of Congress receiving a 100 percent score on votes reviewed by the trade association. The association also named representatives Lamar Smith (R) of Midland and Charles Stenholm (D) of Stamford to receive their Thomas Jefferson Award.

> NOTES, COMMENT

Arguments usually aren't worth it.

A journey begun on time is half complete.

### Country Peddler **Show Offers** Folk Art Variety

Offering a variety of richness that reflects the world of folk art itself, the Country Peddler Show returns to the Texas Exposition & Heritage Center in Austin on August 21st, 22nd &

Show hours are Friday from 4 to 9 p.m., Saturday 9 am. to 6 p.m., and Sunday 11 a.m. to 5 p.m. Admission is \$4 for adults; children under 12 get in free. A special admission price of \$2 is offered to senior citizens.

The Country Peddler Show is a folk art celebration -- a kaleidoscope of color. symphony of sound, and a cornucopia of style. The celebration continues with sweet dulcimer music and the sweeter smells of potpourri.

This "Original Folk Art And Decorator Show" offers a treasure trove of outstanding proportions. The sweep of the show is difficult to capture in words. Aisle after aisle after aisle draw visitors past booths spilling over with the finest the country has to offer.

There is furniture: Rocking chairs, pine benches, heirloom trunks, and a shelf for every comer in the house.

There is fashion: Wearable art in the form of dresses, blouses. sweaters, hand-decorated jackets and accessories -- a country girl's dream.

There is art: Stencils, prints, and paintings, and folk art. There are collectibles: Hand

carved Santas, hand-painted dolls, hand -thrown pottery, and handsewn quilts.

In fact, everything at the Country Peddler Show is hand crafted, in the finest folk art tradition. That destines every single item to become a treasured heirloom.

We invite you to come and enjoy all of the beauty that the Country Peddler Show has to For more information contact

#### **EPA Grants Emergency** Pesticide Extension

The U.S. Environmental Protection Agency has granted a sixmonth extension to an emergency exemption allowing Texas pepper growers to use cyromazine to control vegetable leafminers.

The extension was set to expire July 31, but has been extended until Dec. 31, Agriculture Commissioner Rick Perry said.

"This extension will allow pepper farmers in the lower Rio Grande Valley, Winter Garden and Trans-Pecos area to use this critical control now to ensure a bountiful pepper harvest in the fall and winter," Perry said.

TDA requested the emergency exemption in June 1991 because no insecticides are registered to effectively control leafminers on pepper plants.

About 11,100 acres of bell, chile and jalapeno peppers are planted each year in the lower Valley, Winter Garden and the Trans-Pecos area, east of El Paso.

The emergency exemption allows the insecticide's use on all 11,100 acres planted in peppers.

Cyromazine is in Trigard 75 W. EPA Reg. No. 100-654.

# Dr. McClanahan

is pleased to anounce the opening of

# **Family Medical Care Clinic**

Monday, August 17, 1992

at 610 S. 1st Street, Muleshoe, Tx. We will be closed August 8 - 16 to relocate Our new location will also have Lab, X-ray, and Cardiac Stress Testing Available.

No Appointment Necessary 272-7544

Medicare and Medicaid Accepted

- VEGETABLE PIZZA 1 (12-inch) pizza crust (see
- cup Fresh Pizza Sauce (see

ited as the imagination.

- medium yellow squash ounces fontina cheese
- small red onion, sliced thin plum tomatoes, sliced thin small head radicchio, sliced into thin strips cup arugula, torn into small
- Assemble and attach Rotor Slicer/ Shredder using thick slicer cone (No. 3). Turn to Speed 4 and slice

zucchini and yellow squash, keeping each separate; set aside. Exchange thick slicer cone for the fine shredder cone (No. 1). Turn to Speed 4 and shred the cheese. Spread one cup pizza sauce over

baked crust to within 1-inch of edge. Place vegetables evenly over sauce. Sprinkle with cheese. Bake at 475°F for 5 to 10 minutes or until cheese

FRESH PIZZA SAUCE 2 tablespoons butter or

- margarine tablespoon olive oil
- clove garlic, minced

- 1 jalapeno, seeded and minced can (8 oz.) tomato sauce can (6 oz.) tomato paste
- cup water teaspoon sugar

1/2 teaspoon dried basil

- 1/4 teaspoon black pepper 1/4 teaspoon dried thyme teaspoon onion salt pound prosciutto, cut into
  - thin julienne strips sun-dried tomatoes, about 1/3 cup, cut into small pieces

Heat butter and oil in a 12-inch skillet over medium heat. Add garlic and saute until golden, about 1 minute. Add remaining ingredients, except for the prosciutto and sun-dried tomatoes. Cover and simmer about 30 minutes, stirring occasionally. Add the prosciutto and sun-dried tomatoes Yield: 2 cups. and simmer for 10 more minutes.

WHOLE-WHEAT PIZZA DOUGH

- 1 package active dry yeast cups warm water (105°F to 115°F)
- 1/4 cup olive oil 21/2 cups all-purpose flour 2 cups whole wheat flour

1/2 teaspoon salt

Dissolve yeast in warm water in warmed bowl. Add salt, olive oil, and all-purpose flour. Attach bowl and dough hook. Turn to Speed 2 and mix 2 minutes. Continuing on Speed 2, add whole wheat flour, ½ cup at a time, until dough clings to hook and cleans sides of bowl. Knead on Speed 2 for 5 minutes. Place in greased bowl, turning to grease top. Cover; let rise in warm place, free from draft, until doubled in bulk, about 1 hour. Punch dough down. Let rest 10 minutes. Divide dough in half. (Dough can be wrapped in plastic wrap and refrigerated overnight or frozen for later use.)

Spray a 12-inch pizza pan with nonstick cooking spray. Press dough into an; pinch edges to form a rim. Prick surface of dough with fork. Bake at 475°F for 10 to 15 minutes or until golden. Yield: Two 12-inch pizza crusts.

selected. It is a great opportunity to travel and learn about our country, our society and most of all THE LESSONS WORLD OF HISTORY.

There are several reasons why I would recommend the trip; I learned how to manage my money to last the entire trip. I was gone two and half weeks from home. I learned to pack the bare necessities I would need on the trip and I learned what I could do without to allow more room for Souvenirs.

I also learned how to make friends quicker and how to work with people who are complete strangers at the beginning of the trip. We didn't stay strangers for long.

#### IN CONCLUSION

I would like to say that through this trip, I know why the MOTO of the lodge is Friendship, Love, and Truth. I was shown the FRIENDSHIP when we were welcomed into the other lodges with open arms and fed. When people opened their homes to total strangers in Pennsylvania.

In their homes I was also shown LOVE. They took us in like a child of their own and treated us like family. They asked us if we were feeling OK, if we needed to go to the store for anything and they even offered to do our laundry if we had anything that needed to be washed.

At the end of our trip in Dallas, Stacey and I were taken into the home of another couple, unexpectedly. We understood that we would spend the night in the lodge and take our flight the next day. Our flight did not leave Dallas until noon the next day. Once again, the hospitality was wonderful. Stacey and I were treated

#### Mens Muleskinner Partnership Tournament Held

The Mens Muleskinner Partneership tournament was held Saturday and Sunday at the Muleshoe Country Club.

Stan Wilson of Muleshoe and Kenny Taylor won first in the Championship Flight. Second place went to Paige Burlsmith and Lon Dale Cannon. Third place went to Kelly Copeland and Mike

In the First Flight, Loy Triana and Derrick Osbourne, both of Muleshoe took first place. Second place went to Terry Hutton of Muleshoe and Mickey Wilson. Jeff Chapman, Sr. and Jeff Chapman, Jr. won third place.

Mark Burton of Muleshoe and Jon Lee won first in the Second Flight. Second place went to Jon Lee and Larry Salisbury. Third place went to Robin Mahaney and Joe Gear, both of Muleshoe.

Third Flight winners were: Jose Triana of Muleshoe and Juan Garza, first; Jim Holder and Bryan Holder second and Fred Smith and Bill Bailey, third.

In the Fourth Flight, Jason Box and Granny Elder, both of Muleshoe won first place; Dan McVicker and Randy Stumbow, second place; and Jerry Harrison and Darrell Embry, both of Muleshoe, third place.

Fifth flight winners were: Garry Shipman and Roger Buhrman, both of Muleshoe, first; Butch White and Don Cumpton, second; and Randy Wikham and Ron Studdard, to supper and then again a good breakfast by this couple.

I would like to thank everyone who made this trip possible and I hope others like us will be able to take this trip and have the same experiences that we had. It was also a great fun vacation.

#### Cattle-Alternate Cash Crop Seminar Held

Eighty-six people attended the stocker cattle seminar held last week in the Bailey County Coliseum.

The multi-county seminar drew attendance from Parmer, Bailey, and Lamb as well as Dimmitt and one gentleman from Oklahoma. Counties participating were: Bailey, Castro, Lamb and Parmer.

Curtis Preston, Extension Agent told the Journal that there were 13 booth exhibitors, representing all facits from health to nutrition.

"This is the first time we have had a Start to Finish seminar and I heard a lot of positive comments," Preston said.

"It created ideas for programs, especially marketing. It went real well," Preston continued.

The program got underway with the welcome by Preston, Bailey County Extension Agent-Ag, followed by cattle financing being discussed by Bob Finney of Muleshoe State Bank.

Randy Thomas, manager of Lazbuddie Feeders talked to the group on purchasing stocker cattle. Processing and Doctoring was discussed by Dr. Larry Sprowles, TVMDL of Amarillo. Following a break, when the

crowd could view exhibits, Dr. Steve Amosson, Extension Economist, Texas Agricultural Extension Service, spoke on costs and lease agreements of stocker Wheat pasture nutrition and

management was the topic of Jim Simpson's talk. Simpson is a Nutritionist at Hi-Pro Feeds. Risk management and regained ownership was discussed by Delbert

Hollis, producer relations, AzTx Cattle Co. Following lunch demonstrations

were conducted. Muleshoe. . .

# America's Food Supply Abundant, Safe And A Bargain

American farmers have been satisfying the food needs of a hungry nation since the colonists began tilling the earth with oxdrawn plows. Those early pioneer farmers, who grew enough food for themselves and a few neighbors, have become global producers, and now American-grown food is shipped throughout the world. Every time we go to a grocery store we can see the bountiful harvest from this industry we call

Agribusiness has made great strides during the past two centries, changing to meet consumers' tastes, lifestyles, demands and safety concerns. Through changes in production practices and technologies, our agricultural industry is making sure that you--the consumer--continue to have a wide variety of nutritious, safe foods at bargain prices.

America's food supply is safe, Our nation's food safety record is the envy of other countries, and now Texas is participating in a program that will go a long way in not only underscoring but enhancing that record.

As one of six states involved in a first-of-its type pesticide monitoring program, Texas is taking a leadership role in improving the nation's information about safe pesticide levels on fresh fruits and vegetables. This program will help provide the necessary information government agencies need to further bolster food safety.

Under the federal Pesticide Data Program, Texas Department

Agriculture inspectors collect 90 samples monthly from 23 distribution sites and terminal markets across the state--the final stop before commodities reach grocers' shelves. We analyze the samples for trace amounts of pesticides, and the data are sent to the U. S. Department of Agriculture in Washington, D.C.

Currently, 10 different domestic and imported fresh fruits and vegetables have been targeted for analysis, but the program eventually will be expanded to cover more than 20 fresh commodities.

Since TDA initiated its sampling in May 1991, more than 700 commodity samples have been analyzed at our laboratory in Brenham. All were within tolerance standards set by federal health and

food safety officials.

Texas, along with California, Washington, Michigan, New York and Florida, is helping the nation establish this through and objective database detailing how much and what types of pesticides-if any--are left on the food we eat.

This database will help the U. S. Environmental Protection Agency further refine both the amounts of pesticides that farmers may use on various crops and the residue levels that should be allowed on fresh foods.

In protecting consumers' health, the government must always deal with facts not emotional hysteria. Thus, this program proves the critical data producers, consumers and the government need for establishing a perspective on the safe levels of pesticide residues.

There's no doubt, America's food supply is abundant. Our farmers are the most productive in the world, and no other nation in the world can boast a more plentiful, diverse supply of food Historically, based on retail weight, the amount of food available for each American has averaged 1,400 pounds a year. Compare this with 1,011 pounds in China, 1,072 pounds in Africa and 1,288 pounds

in Latin America. From the citrus groves in the Rio Grande Valley to the cranberry bogs in Maine, agriculture is providing food for America's dinner tables in a big way.

Since 1930, total agricultural production in the United States has increased more than 262 percent, and our farmers produce more than seven times as much per hour of work than they did 40 years ago.

I am very proud of the role Texas farmers and ranchers play in bringing this abundant production to your dinner tables.

And as the nation's second largest agricultural producer, Texas has not only assumed a leadership role in America's abundant harvest but we have also made the commitment to making sure your food supply is safe as well.

Food safety is a concern of all agriculture groups and of each individual producer. But what's more, the corporation of our supermarkets and distribution centers in the national Pesticide Data Program also underlies the obligation everyone in the industry has in bringing the best possible product to you--the consumer.

# Diabetic Foot Care During the Summer

W. Preston Goforth, M.D.

Department of Surgery at Scott & White Hospital and Clinic and Assistant Professor of Surgery, Texas A&M University College of Medicine

My uncle is elderly and coming to live with us this summer. He is diabetic and I understand that diabetics can have problems in bot weather, especially with their feet. Is this true? What can I do to help him prevent injuries during the summer.

: Although what you have heard is often true, some diabetic foot problems can be reduced in frequency and severity by preventative action. It is common for people who have had diabetes for 10 years or more to experience an alteration or a loss of sensation in the feet. Signs may include abnormal feelings such as burning, tingling, or extreme sensitivity in the feet. More commonly it can cause partial numbness or total lack of feeling in one or both feet.

Typically a person experiencing these alterations in sensation, which we call diabetic neuropathy, will not notice anything different. This is because the numbness that a diabetic patient

experiences represents an absence of sensation or reduction in sensation rather than a different feeling. It is this lowered awareness of feeling that conveys a false sense of security. Diabetic neuropathy, therefore, allows a person to conduct life as usual when there should be pain calling attention to a problem in need of

An additional problem increasing the risk to the diabetic person is reduced circulation which may develop in the feet. Proper blood supply gives nutrients and removes waste from the tissue supplied, and it also plays a role in temperature control of the body. During hot weather in the summer, adequate blood flow to the feet can help remove heat. If this flow is compromised, dangerously high temperatures can persist within a shoe, causing problems as minor as increased fragility of the skin or as severe as an actual burn with loss of skin.

Diabetic neuropathy in addition to a reduction in cir-

culation is a dangerous combination. A diabetic person should have heightened awareness of heat, and especially sun exposure, during warm months. Sun exposure should be monitored, even though the person is wearing shoes. A person may experience burns or loss of skin even when wearing

You should help your

uncle monitor his time outside during the heat of the day (between 11 a.m. and 3 p.m.). If your uncle anticipates outside activities in the heat, he should plan on taking along an extra pair of shoes and socks to cool his feet. He should wash, dry and examine his feet as a daily routine so that he can get immediate care if blisters or other problems become apparent. The help of "significant others" in his life is very important because the person with diabetic neuropathy typically feels there is a lot of unnecessary concern in such situations.

#### Data On Rivers Flow Together In Temple

Predicting impacts of upstream farming on downstream fishing all over the United States may soon be much easier, thanks to a project led by the Texas Agricultural Experiment Station.

The station's Blackland Research Center in Temple is coordinating HUMUS, or Hydrologic Unit Model for the United States. It will model water quantity and quality for all major U.S. river systems over a fouryear period.

next U.S. Department of Agriculture Bosque with measured data from the Resources Conservation Assessment, an inventory of natural resources done every four years by the U.S. government.

"In addition to being used on a national scale, the software package possible by the capabilities of Texas will be used here to help Texas river authorities and other state agencies assess water quality and quantity," said Dr. Allan Jones, director of the Temple experiment station.

HUMUS will combine a geographic information system -- software that produces maps based on data -- with data on topography, soils, land use, weather, cropping, hydrologic resources center serves as a characteristics of streams and other clearinghouse for data gathered by information from the 20 major U.S. river basins.

That will then be linked with a hydrologic computer model called SWRRB, or Simulator for Water practices and land use on river water quality and quantity.

of the nation's major river systems. research effectiveness." HUMUS is a cooperative effort by the USDA's Agricultural Research Service, the department's Soil Conservation Service and Texas A&M University.

The Soil Conservation Service and Texas A&M formalized an agreement on the four-year project in Washington in early June.

The Agricultural Research Service, which developed SWRRB at the Grassland Soil and Water Research Lab in Temple, will adapt the model as needed for the HUMUS project. The lab's facilities are shared by

federal agencies and by the experiment station, a division of the Texas A&M University System.

The Soil Conservation Service will form a four-person team in Washington to use the HUMUS software for national analysis. The SCS state office in Temple will assign a five-person team to work with experiment station and Agricultural Research Service scientists at the Grassland/Blackland

Leesa Barton, Assistant research scientist at the experiment station, said just one possible application for the system in Texas would be in determining the impact of the dairy industry in the Bosque River valley.

We might combine daily The information will be used for the hydrologic information from the Brazos River above the Bosque. HUMUS gives us a flexible way to measure downstream effects," Barton

> The HUMUS project is made A&M's new Center for Natural Resources Information and Technology, whose purpose is to gather databases, computer models, software and technical expertise for projects such as HUMUS.

> Gathering a wide variety of data for a project such as HUMUS can be difficult and expensive, but the natural various agencies, as well as computer models or software to use the data and experts to help make elements from various sources useful.

Such cooperative efforts and Resources in Rural Basins. SWRRB information-sharing will be more simulates the effects of agricultural frequent in the future, thanks in part to the resources center, Jones said.

The center helps stimulate different The entire package can be used to groups of research scientists to work simulate the effects of agricultural together on projects like HUMUS," practices and land use on water in each he said. "It should greatly increase our

> Home Values In South Southerners saw the value of their homes grow fastest in the first quarter of 1992, a survey said. But the South--along with the Midwest-still had the most affordable housing.

No one is interested in your prejudices and very few people in your intelligence.

#### Historic Legacy Economic Boon To Texas

As the saying goes, "Other states were carved and born, but Texas grew from hide and horn." From yesteryear's early ranches and legendary cattle drives, the Texas mystique grew, and today new industries are being launched by this historic legency.

As the country's leader in cattle and total livestock production, Texas has the potential to become the center of a thriving American leather industry. Our vast network of feedlots and beef packing facilities can ensure tanneries and manufactures an uninterrupted supply of hides to craft the fine leather goods demanded by today's consumers.

Texas processes more than five million head of cattle every year That equals five million fresh hides. Add to this number hides from sheep, goats, hogs and such exotic wildlife as ostriches, emus and alligators, and you will start to comprehend the potential scope of a statewide leather industry.

Our hides are not only plentiful, their quality is unsurpassed. The Texas climate helps to produce a grain within cattle hides that makes the leather more durable, easier to work with and longer lasting.

Unfortunately we are missing the boat-the boat that keeps sailing for Europe and Asia loaded down with hides from texas feedlots. Texas ships six million hides worth some \$270 million abroad every year. Then we buy our own hides back as leather goods--shoes, belts, sofas, clothing, and other finished products.

This pattern reflects a disturbing change that has taken place in this sector over the past two-and-a-half decades. According to the Leather Research Institute at Texas Tech University, the U.S. leather tanning and finishing industry plummeted 82 percent between 1968 and 1989. During the same period, domestic shoe manufacturers dropped from 1,000 companies to about 350. At the same time, U.S. imports of foreign-made shoes climbed to 950 million pairs and years--35 percent of the world's footwear exports.

It doesn't take a degree in economics to realize there's something wrong with this picture.

By Commissioner Rick Perry The market value of a raw hide is about 94 cents a square foot, but with tanning and finishing the value of that same hide climbs 300 percent. The \$270 million worth of hides exported from Texas suddenly multiplies to more than \$1 billion--money and related jobs the state loses every year.

> Signs of improvement, however, are on the horizon--signals indicating stabilization within the nation's leather industry. And clearly Texas is poised to take this facet of our economy by storm. Through programs initiated by the Texas Department of Agriculture, we intend to do just that! How? By capitalizing on our premium quality hides and on the Texas mystique through two sweeping programs, "Make it TEXAS" and "Naturally TEXAS."

"Make it TEXAS" encourages entrepreneurs to join with us in building viable enterprises in Texas such as tanneries--to take the raw commodities that we grow so abundantly and process them into finished goods and products. Through "Make it TEXAS" we identify and nurture innovative business proposals, matching investors and communities and helping both tap into the vast network of resources essential to starting new enterprise.

At TDA we are working on six tannery projects in the Panhandle and North and South Texas. A year ago I joined in the ground breaking for a new Iowa Beef Packers plant in Amarillo. Set to open Dec. 15, IBM will hire 50 workers and will process 4,000 hides a day to the blue chrome of initial tanning stage. Eighty-five percent of these hides will be sold domestically and the rest exported.

The IBP tannery is one step toward keeping leather manufacturing and the jobs it creates in Texas. More companies, including foreign firms interested in expansion, should not be far behind. Land is at a premium in Italy, Spain, Korea, Japan and Taiwan, the world's leading leather producers, and to expand their operations, these countries must look elsewhere to build.

Since the inception of "Make it

Texas" 18 months ago, we have worked unceasingly to convince investors that Texas is the logical place to locate. We have the land. we have the workforce and we can

supply the best hides in the world. We even have a marketing campaign in place to promote the superiority of Texas leather and natural fibers. TDA's "Naturally TEXAS" initiative will help the manufacturing and retailing industries locate raw material, coordinate market development missions at home and abroad, hos activity and creating jobs across foreign buyers and plan special events and fashion shows. Consumers around the world will snatch up Texas' superior products by looking for the "Naturally TEXAS" label. We're not only promoting the Texas mystique, we're sparking economic activity and creating jobs across the state.

At TDA we're using our agricultural assets to spur the Texas economy. A Texas leather industry promises to play an essential role in the economic revitalization under way. "Hide and horn"--it's a Texas legend, but just as importantly, it's

a boon to our future.

#### Panhandle-South Plains Fair

Area livestock breeders will be vying for more than \$36,000 in prize money during the Beef Cattle, Dairy Cattle and Open Sheep shows at the 75th- "Diamond Jubilee"- edition of the Panhandle South Plains Fair, slated to run Sept. 26 to Oct. 3.

A new Santa Gertrudis division has been added to the Beef Cattle show, which will be judged by Jim Williams of Hungerford. John Farris is the show's superintendent. He will be Assisted by Sam Field and Mike Morrow.

Entry fees are \$10 for Angus and Shorthorn cattle and \$20 for Santa Gertrudis. The entry deadline is

Angus and Shorthorns will be judged Tuesday, Sept. 29, at 9 a.m. and 2 p.m. Santa Gertrudis will be judged at 9 a.m. Wednesday, Sept.

Exhibitors are limited to two premiums per class. The fair association will pay the following premiums: \$80 for 1st, \$60 for 2nd, \$40 for 3rd, and \$20 for 4th. Ribbons, rosettes and banners will be awarded as listed in the fair

catalog.

The Dairy Cattle show will be judged at 9 a.m. on Tuesday and Wednesday, Sept. 29 and 30, by Trisha Cobb of Perkins, Okla.

Show superintendent for Dairy is Jett Major, who will be assisted by Mike Mallett and Scott Strawn.

Entry fee is \$10 per animal and entries must be received by Aug.

Only two premiums per class are allowed each exhibitor.

Show times for the Open Sheep show this year have been moved up one day: exhibitors will arrive on Monday, show and release on Wednesday. Also, show divisions and classes have been revised and premiums increased.

A Southdown Junior Futurity class also has been added.

Denny Belew is superintendent for Sheep. He will be assisted by Monty Dozier and J.D. Ragland.

Preston Farris of Sonora will judge sheep entries beginning 9 am. Wednesday in the order listed in the fair catalog.

The deadline for entry is Aug. 24 and a nonreturnable entry fee of \$8

will be charged for each head entered.

Sheep exhibitors will be limited to two placings only in each class and one placing in the group

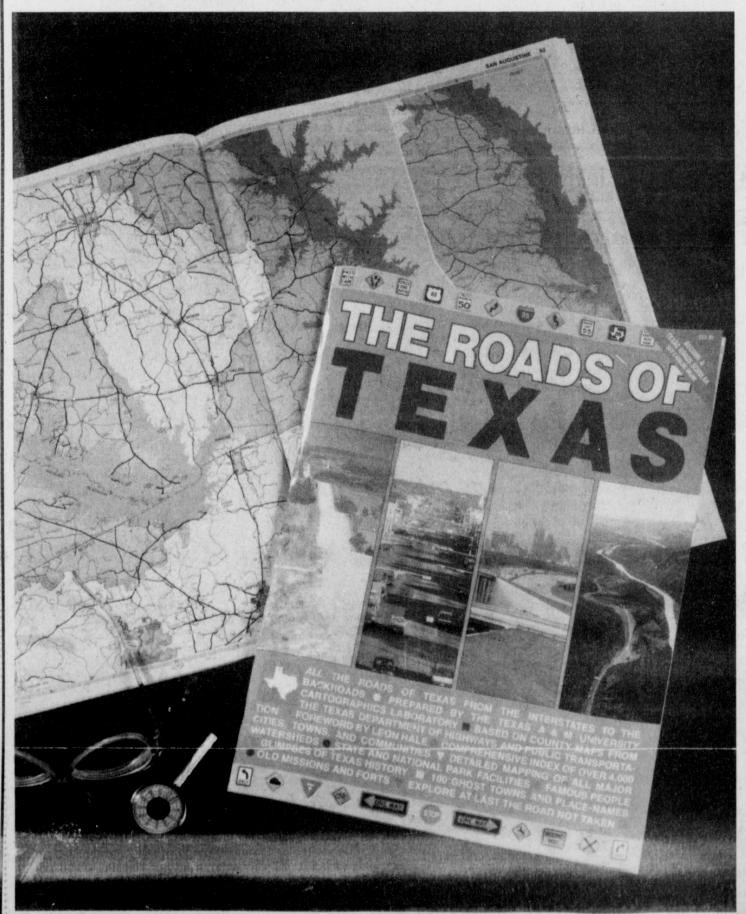

Tickets are now on sale for shows by McBride & The Ride and Hall Ketchum at 5 and 9 p.m. (\$10, \$12) on Sept. 26; Sawyer Brown at 5 and 7 p.m. (\$12) on Sept. 27; J.D. Sumner & The Stamps and The Chuck Wagon Gang at 7 and 9 p.m. (\$5) on Sept. 29; and Tanya Tucker at 5 and 7 p.m. (\$10, \$12) on Oct. 3.

Ticket outlets are Luskey's Western Store, 2431 34th St., and the South Plains Fair Office, 105. E. Broadway.

All seats are reserved and show tickets do not include gate admission.
