"Official City and County News"

**ROY W. HAHN**  
Editor and Publisher

**Cranberry** Alfred, Sports Editor

Entered as second-class mail matter at the post office at Silverton, Texas in accordance with an act of Congress on March 3, 1879.

I think it is a much harder thing to escape from wickedness than from death, for wickedness is swifter than death.—Plato.

MAX BAER popped back into the line of heavyweight contenders again last week by whipping Tommy Farr. That's one Baer, that to my notion, is all bull.

AND THEY ARE planning to give Maxie Schmeling the run around again this summer. Last summer it was rotten, but next summer or fall, Max will be so darn busy behind a machine gun that it won't matter. Hell Hitler

stuff is liable to beat us out of a good prize fight.

A SPRING CLEAN up campaign has already started in one part of town. Mr. Wilson cleaned up back of his Creamery in the alley and it was catching. Joe Mercer caught it from him and Chas. Cowart from Joe. No telling what it will lead to. There's talk of running him for Mayor. That may not come to pass, but anyway, he'd have a clean alley to run on.

THERE'S SOME trouble getting anyone to stay put on the Mayor's ticket. First Homer Sanders wouldn't have it. Then H. Roy Brown balked. And now comes Tom Bomar and says that he won't have it. But I imagine Tom would take it if he can't run out an opponent against himself. He just wants us to coax him a little.

WHAT'S THE MATTER, boys, isn't the salary high enough? I move we raise it to a dollar and a quarter.

AND BOY, DID HE let 'em have it—right in the neck. I mean the oily tongued bird who set up his stand Friday and Saturday east of the Post Office. He sold everything from hairpins to silverware. It must have been great stuff from the crowd he held during the two days. Of course everything was sold with an ironclad guarantee (like fun) and of course if anyone wishes to return any of the goods that are unsatisfactory, all they have to do is to find him, and probably back up their play with a six gun. I did hear that the silverware was guaranteed to wear like iron—and it did. Was rusty the next morning.

MR. AND MRS. and the dictator ate Sunday dinner with Mr. and Mrs. Ware Ferguson and their young plutocrat. I think that I scared Ware last week by calling him a windbag but anyway I wiggled him out of a good fried chicken dinner. Sylvia thinks that Ware married her for love, but

her ability as a culinary artist may have had something to do with it.

THE MASS MEETING was a good half hour's entertainment. Keith Pearce, George Kirk, and little Yours Truly tried to put a little new deal in the school trustee election but the hard eggs wouldn't have it. Just because J. H. Burson isn't in the school district, they refused to put his name on the ticket.

WELL, THAT WAYNE Crawford went and done it. Picked off just about the keenest girl in these here parts. I can't figure how he did it myself. It leaves me with one less young man to marry off. Soon or later I'm going to have to cultivate the acquaintance of some other young gent for use in my matrimonial bureau.

OF COURSE, DOC Minyard is still a hold-out. He's as bad as Dizzy Dean. I can't see what he's waiting for. He is going to wait around waiting for some dame to come along with a wad of dough, and then when he pops the question it will be a big "no". Of course I haven't much room to talk for I reached the ripe age of 29 before I got tied up, and then the girl didn't have any money.

SHE TOLD ME before we were married that she had a thousand dollars, and then after I got her I found out that it was a thousand dollars in the red. A fellow just can't be too careful these days. Now if I had let her teach school a bit longer, she might have paid that off, instead of me—still owing it. (I fooled you that time didn't I?) You thought I was going to say I paid it.)

THE HAHNS, Incorporated and corpulent, after living in Mr. Tibbets house in the west part of town, for nearly two years, have moved to the Patton property in the east part of Silverton. I don't know much about Jenks but if he is as good as a landlord as Mr. Tibbets, he is going to be OK, and then some. Mr. Ely has moved to the Tibbets house.

MY RAIN GAUGE failed to register the amount this week. The past few days have made me very homesick for Western Kansas, the land of gentle zephyrs. A few days like the past few, and the abstracters never would get a farm located.

GORDON ALEXANDER was a victim of amnesia from Friday until Sunday of last week. He attended a convention of Tax Collectors and Assessors at San Antonio and was supposed to have arrived here on Friday. But you know these conventions—Gordon was three days late and although he knew a thousand reasons why he was delayed, he can't think of a single one when you ask him about it. It sounds bad to me.

ORDER AT ONCE because we may soon have to withdraw this offer, or advance the price.

**4-H CLUB - F. F. A. PARADE TO BE HELD IN LUBBOCK, APRIL SIXTH**

Plans for the First Annual 4-H-F. F. A. Boys Parade to be held in Lubbock April 6, the last of the South Plains Junior Fat Stock Show, are well under way. Boys from 36 Texas counties and 3 New Mexico counties will take part in what is believed to be the largest gathering of young manhood in this section.

Boys from each county, each 4-H club and each F. F. A. chapter in the counties from which entries are received for the fat stock show,

will march in step to the music of bands from their respective county. Banners and placards bearing the names of the counties, clubs and chapters will be carried by these boys telling the visitors of their various organization activities.

County agents and vocational teachers over the entire South Plains and adjoining counties have been notified of this event, and are making the necessary preparations. There are over 5,000 boys enrolled in club and vocational work in these counties, and all are expected to be in attendance.

The parade will begin promptly

at 11 a. m., April 6, in front of the City Hall, Lubbock. Thousands will be gathered to watch these boys, hear the bands and see the floats entered in the parade.

Awards for the best unit of both 4-H and F. F. A. Boys will be presented at the reviewing stand.

**COLLEGE STUDENTS LIST LIKES AND DISLIKES**

What shortcomings do girls have that boys particularly dislike—and vice versa?

The question was duly battled—but not won—in a class "Applied Psychology" at Texas Christian University recently.

Boys listed among their pet peeves girls who roll their hose below the knees, bright red fingernail polish, smeared lipstick, gold-digging, and girls who are habitually late for their dates.

Girls come right back at them with the expression of particular dislike for boys who are careless about their dress (specifically, those who refuse to wear a necktie, and leave their shirt collar unbuttoned), boys who are thoughtless about "the little things in life," such as neglecting to seat the girl in a restaurant, or to walk on the outside of the sidewalk.

Two other dislikes listed often by the girls were insincerity and conceit.

**CIVIL SERVICE EXAMINATION**

The United States Civil Service Commission has announced open competitive examinations for the following positions:

Inspector of Clothing, \$2,000 a year, Quartermaster Corps, War Department.

Chief, Research and Statistical Service, \$5,800 a year, Office of Education, Department of the Interior.

Full information may be obtained from the Secretary of the United States Civil Service Board of Examiners, at the post office or custombouse in any city which has a post office of the first or second class, or from the United States Civil Service Commission, Washington, D. C.

**CHEVROLET ECONOMY IS AGAIN DEMONSTRATED**

Further impressive evidence of economy and durability was on record in favor of Chevrolet trucks today, following receipt from Washington of official AAA figures covering the first 10,102 miles of the Chevrolet Long Distance—Safety and Dependability Truck Run which Harry Hartz, well-known former race pilot, is conducting.

Hartz left Ottawa, Canada, on Jan. 14, in a stock 1½-ton Chevrolet truck with a "payload" of 4,500 pounds of steel. He was accompanied by Stanley Reed, official AAA observer, whose certified reports are the basis of the bulletin just received.

After covering the distance to Mexico City in less than 100 hours driving time, the truck turned back

into the states, skirted the Gulf of Florida, and went south to the latter very tip. The 10,000 mile mark was passed near Miami, after 325 hours and 35 minutes of actual driving time. Daily mileage averaged 266, and speed averaged 30.72 miles an hour, over the entire distance.

Oil consumption with the loaded truck, over all kinds of roads and in extremes of weather, averaged less than a quart per 1,000 miles, the summary indicates. Actual oil consumption from the start of the run until the oil-change in Florida, made just before reaching the 10,000-mile mark, was 9.62 quarts. Total cost of gasoline and oil consumed, and lubrication, was \$144.72. Adjustment costing \$1.35, brought total cost of the run to \$146.07. It amounts to \$.01447 per mile, or \$.00312 per ton mile, the latter being figured on the gross weight of 5,260 pounds.

Highest temperature encountered on the run so far was at Edinburg, Texas, where it was 90, and lowest was at Belleville, Ont., where it was 3 below zero. Maximum variation in a single day was on Feb. 21, when a 40-degree change was encountered. No water was added to the radiator in the first 10,000 miles.

**SPRING CLEANING FOR FURNACES IMPORTANT**

"Now is the time to use your good common sense to avoid burning your home. Run your furnace so it will keep you warm, but not burn you up!"

This is the warning given by a fire prevention engineer, who says that the way you operate your heating plant at the end of winter, after months of hard use, may decide whether you will have your house a week from now—or a blackened ruin instead.

As the Nation Board of Fire Underwriters points out, "Cold weather brings an increase of fires every year. Homes are burned, people are maimed for life and others die in agony as the fire losses mount higher."

"Don't force your furnace or stove. If you can't get enough warmth, call in a heating expert. Also call him if you find any broken parts or other defects such as holes in the smoke-pipe, or a dirty or defective chimney."

You know what would happen to your car if you neglected to have it properly lubricated, and necessary repairs made. Your furnace is in the same category. It can't operate efficiently and safely without periodic expert attention and cleaning.

The use of common sense will save lives and property from destruction by fire now.

**San Jacinto News**

There will be a PTA meeting at the school house Friday night March 18.

Mr. and Mrs. Clifford Hyatt and son and Cecil Hale were in Amarillo on business Friday.

Mr. Simpson has been sick at Tulia for the past month.

Dallas Culwell and Woodrow Bice sold cows in Amarillo Monday.

Mr. and Mrs. Jack Preston and sons, Mr. and Mrs. Wilbert Hyatt and family, Mr. and Mrs. Luther Hyatt, Mrs. Clifford Hyatt and son were visiting in the Mart Hyatt home Sunday.

The neighbors enjoyed playing 42 in the Esteen Lathem home Friday night.

Mrs. E. M. Erwin is having some dental work done in Tulia.

Mr. and Mrs. J. M. Kemper and grandsons, Truman and Clois Wayne Kemper of Tulia, were visiting in the Woodrow Bice home Sunday.

**F. F. A. BOYS TAKE IN FAT STOCK SHOW**

32 Agriculture boys with Mr. Lem Weaver, agriculture teacher, attended the fat stock show in Ft. Worth from Friday to Sunday of last week. They report a very enjoyable and profitable trip.

**HOME BUILDERS HAVE MEASURING PARTY**

The Home Builders Class of the Methodist Sunday School enjoyed a measuring party and a very enjoyable social in the home of Mr. and Mrs. Homer Sanders Monday night of this week. The guests were each measured around their waist on arrival and paid one penny for each inch they measured. The amount raised will be paid on rugs recently purchased for Sunday School rooms. Games of "84" were enjoyed to a late hour, after which doughnuts and cookies were served to Mr. and Mrs. John Fisher, Mr. and Mrs. Beth Joiner, Mr. and Mrs. Bert Douglas, Dr. and Mrs. B. R. Ezzell, Mr. and Mrs. Dutch Tidwell, Mr. and Mrs. Homer Williamson, Rev. and Mrs. A. A. Peacock, and Mesdames Coffee and Kelsay.

Zoe Evelyn and Anna Ruth Humphreys of Tulia spent last week end with Betty McMurtry.

Mr. and Mrs. Chester Burnett and children were visiting in Amarillo Monday.

O. W. Chapman was in Silverton for a short time Wednesday morning. He was asked "where he had been keeping himself" and replied that it would be easier to name the places where he hadn't been.

**WOMEN TOLD US**

... what features they wanted in their new Westinghouse Refrigerator—and here are the questions and the results:

"Isn't there a way to keep our meat longer without drying out?"

THE RESULT—A large covered MEAT STORAGE Compartment that keeps meat just as fresh as your butcher can.

"Why can't you give us more storage space for more fruits and vegetables?"

THE RESULT—The HUMIDRAWER that keeps more fruits and vegetables and keeps them fresher.

But this isn't all. Let us tell you about the many other features of the new Westinghouse Refrigerator that are *Kitchen-proved* to give you complete satisfaction.

**Texas-New Mexico Utilities Company**

**WE NEED GOOD USED CARS AND TRUCKS!**

**CHEVROLET DEALERS' USED CAR STOCKS WERE GREATLY REDUCED DURING NATIONAL USED CAR EXCHANGE WEEK**

Now's the time to trade your car for a **NEW CHEVROLET** ... Come in today and get our liberal offer

So great have been Chevrolet dealers' sales of used cars and trucks—so low is our supply of certain makes and models—that we need good used cars and trucks to balance our stocks. This means we are in an excellent position to talk "trade-in allowances" on the purchase of new Chevrolet passenger cars and trucks.

Come in—this week! ... See the beautiful new Chevrolet for 1938—the car that is complete—and the new 1938 Chevrolet trucks—the thrift-carriers for the nation! ... Learn how easily you can purchase a smart, new, modern-to-the-minute Chevrolet by letting us take your present car or truck in trade!

**THOMPSON URGES EQUAL BREAK FOR THE FARMERS OF TEXAS**

A farm program for Texas which will assure the farmer an equal break with the manufacturer, was urged last week by Ernest O. Thompson in speeches to several farm groups.

Thompson, state railroad commissioner and a candidate for governor, pointed out that manufacturers had enjoyed the benefits of a protective tariff, but that no similar protective program had been worked out for the farmer.

Prosperity of the state, he declared, starts with the farmer and a program which will bring farmers better prices for the products and increase their market will benefit all the state.

"Something", he said, "Must be wrong in a system where you have to mortgage your farms and ranches and then can't make enough money to pay off the mortgages. Something can be done if we will work out a program that will bring real help to the farmer and the ranchman."

"It is my purpose to work out such a program and to cooperate with the federal government in the work that it is now carrying on. I want to see things in Texas so that the people who raise the things we eat and wear will get an equal break with the manufacturers."

"Back in the early days of our country, the protective tariff was inaugurated to help industry and the manufacturer. But there was no program to help the farmer and the stockman. Only in the past few years has some effort to help them been made."

"I want to see the present work go on and new programs started that will take the penalty out of owning a farm or a ranch; that will make it so owners of farms and ranches can enjoy their share of prosperity and profits."

Thompson, as railroad commissioner has saved farmers and ranchmen thousands of dollars through reduction of freight rates on cotton, grain and livestock, and through granting of emergency rate reductions in drouth stricken areas.

**1938 Auto Plates**

Must be on all cars and trucks by midnight of March 31, 1938, or owners will be subject to a fine.

Highway officers are instructed to arrest those who have not properly equipped their cars with the new plates.

The plates are ready and may be placed on cars any time during March.

New drivers must secure and carry a drivers license, examinations for which are given by State Patrolmen, at the Courthouse in Silverton each Friday from 1:00 P. M. to 3:00 P. M.

**Car Registration At Quitaque**

For the convenience of those living in the east part of Briscoe County, I will be in Quitaque on Wednesday, Thursday, and Friday, March 23, 24 and 25—with the new car and truck tags. Get you license on the above dates, if more convenient.

SAVES FOR THE NATION

**CAN YOU PROVE THAT YOU WERE BORN**

If unexpectedly faced with the necessity of legally establishing the date of their birth, their age, their American citizenship, thousands of Texans would not know whether or not their births were registered with the proper authorities. Embarrassment, inconvenience, or even serious loss of property could conceivably result from either an absence of registration or an error made in filing it with the state.

Dr. Geo. W. Cox, State Health Officer, cited an unnamed but prominent Texan citizen who upon investigation found that his son had always been registered for more than 20 years as an illegitimate. Another instance the health official related concerned a Veteran of the World War who, after rearing a family of three children,

found that he had been registered at birth a girl child. The experiences of workers with vital statistics are rich with stories of persons vainly seeking to establish their rights to property because of neglect of their parents or attending physicians to register it properly at time of birth.

The law requires the births of all Texas babies to be registered with the local registrar, who is the Justice of the Peace in rural areas, and City Secretary in incorporated towns, within five days after the blessed event takes place, and forms are furnished physicians and midwives for this purpose. A copy of the registration is returned for permanent filing. These records are "vital" not only to the individual from a legal standpoint, Doctor Cox said, but to the State as well. "We must know how many babies are born, how many die and from what causes mortality occurs if we are to accomplish the best results from a public health standpoint. Such a program obviously needs the interested support of every Texan. Our Bureau of Vital Statistics is only glad to cooperate in 'getting the record straight.'"

**RIGHT OUT OF THE AIR**

By R. F. SERVICE

So smitten with radio was George Arliss, above, after his first engagement for microphone drama—as Disraeli in Radio Theatre—he almost immediately signed for another role, this time in "The Man Who Played God," again in Radio Theatre. Program producers signed Arliss in the first place by taking him to watch one of the broadcasts.

Shortly after Rush Hughes rented an office in San Francisco, a lawyer presented to the office of the skyscraper a brief which objected strongly to a "madman" who talked aloud most of the morning in the office next to him. The management immediately checked up and found that it was 200-words-a-minute-Hughes timing script.

As featured soloists on the "Johnny Presents" broadcasts, Genevieve Rowe, above, fulfills the expectations raised when she won a national audition contest in 1933. Announcement of the award terrified her so that she ran from the studio. But she's gotten over all that now.

Joe Penner's good nature is so proverbial that they call him Hollywood's "easiest-going star." He's play enough on the air, but in rehearsal never flies into tantrum, meets the cast in quiet tones.

Kate Smith is planning a summer vacation from the airwaves. She is planning a canoe trip into the head-water country of the Mississippi, and is already shopping for guides for her venture.

Lucille Manners, starred on NBC with Frank Black's orchestra, enjoys recalling the days when she was a stenographer and music student. "I took notes by day, sang notes at night," she jests.

Blonde Kay Thompson, above, provides that essential feminine touch on the new Lou Holtz-Richard Himber musical frolic over CBS stations Monday evenings. The singer from St. Louis has brought her singing trio back to the air after making movies.

Rudy Vallee, having completed picture work, is back in New York, and is gleaming his guest stars from the Broadway sector. Two-voiced Tommy Riggs, the man behind Betty Lou, is back with him, also having made a picture.

Gabriel Heatter, once a newspaper man, glories in his ability to practise the editor's maxim, "names make news," in introducing guests on "We, the People," heard Thursdays over CBS stations.

**MANGANESE SEEN AS A POTENTIAL TEXAS INDUSTRY**

Opportunity for development of one of Texas' little-known but vital resources, manganese, is seen by the All-South-Development Council in actions before both houses of the national congress aimed at encouraging domestic production of this ore, termed by the War department the "No. 1 strategic mineral".

The fact that manganese, which "puts the starch in steel" and in fact is indispensable in making sound steel, and as such is of prime importance in national defense, was stressed in recent congressional committee hearings on the bill of Sen. John E. Miller of Arkansas specifying that a proposed million-ton stockpile be compiled from domestic sources.

**RAIL RATES HERE AND ABROAD**

Those who rise up and howl at the suggestion that the American railroads should be given a moderate increase in order to save this industry, with its billion a year purchasing power, its hundreds of thousands of investors, and its vast army of highly-paid workers, from ruin, would do well to read an analysis of the rates charged by the railroads in the principal foreign countries, published in the Cleveland Trust Company Business Bulletin.

In France, the average rate per ton-mile is 3.48 cents. In Great Britain, it is 2.73 cents. In Italy it is 2.71 cents. In the European average is 2.68 cents. In Australia it is 2.50 cents, and in Argentina, 1.74 cents.

In the United States, by contrast, the average ton mile rate is under one cent—94 cents, to be exact. Only one important foreign country has a lower rate than this country—Japan, with .77 cents.

Highly significant is the fact that 4 countries are in a class by themselves in the matter of cheap rail transport. Two of these, Canada (with 98 cents rate) and the United States have similar systems and pay very high wages. The other two, Japan and India, pay extremely low wages which would be considered starvation pay here or in the Dominion to the north.

In some of the foreign countries, the railroads are wholly or partly owned by the government—and even the high ton-mile freight charges don't always carry the lines—the taxpayer being assessed for losses.

We get the best railroad service in the world and, wages considered, the very cheapest. Freight rates high enough to return the lines small profit wouldn't noticeably affect the operating cost of industry. They would, on the contrary, spur a railroad betterment program that would be felt directly in every state and by every investor and worker. The cold figures provide the unanswerable proof of the necessity for a fair rate policy for the American railroads—and, in addition, the need for a cessation of the uniformed agitation to saddle the lines and laws such as the train-limit bill which would add heavily to the cost of operation, and inevitably lower the industry's high standards of efficiency and safety.

Novval Hamilton of Quitaque was in town on business last Saturday.

gane, Washington hearings have shown, has been comparatively low metallic manganese, content of American ores. It was also brought out that the 1935 reciprocal trade pact with Brazil, cutting the manganese tariff rate in half, and applying also to other foreign sources, principally Russia and Africa, had stagnated domestic production just when new concentrating processes were giving promise of making manganese mining here worth the effort and investment.

Besides the Miller bill there are concurrent resolutions in House and Senate calling upon the Secretary of State to remove manganese from the commodities coming under the Brazil agreement and to exclude it from proposed new tariff treaties. Testimony before the Senate Military Affairs committee was to the effect that, with only that tariff protection, a domestic industry utilizing several new "concentrating" processes would develop within a few years to the point of making this country self-sufficient in manganese. It was pointed out, though, that American ores could not be developed on short notice for "emergency" use.

With the success of these moves, the Council's report said Texas would be in position to bid for a large share of the 68,000,000 man-hours of employment and \$24,000,000 in payrolls that compilation of

such a domestic manganese reserve would bring, and a favorable attitude toward those undertaking this and kindred developmental enterprise would be an important factor in attracting this, as well as other types, of industrial investment.

**SOCIAL SECURITY NEWS**

Workers were advised today by Dewey Reed, manager of the Amarillo office of the Social Security Board, that money deducted from their weekly or monthly pay checks does not entitle them to receive unemployment compensation benefits.

"Many unemployed workers are contacting our offices, informing us that employers regularly deducted one per cent of the employees' wages from pay checks during the time they were working, and wanting to know why their claims for unemployment compensation have not been accepted," Reed said.

"Unemployment compensation benefits," Reed continued, "are paid by the Texas Unemployment Compensation Commission from a fund made up entirely of contributions paid to the State by employers subject to the Texas Unemployment Compensation law. Employees do not contribute to this fund."

"The one per cent deducted from wages is forwarded, along

with an equal amount from the employer's funds, by the employees to the United States Treasury through the Bureau of Internal Revenue.

"Every three months, the employer also reports to the United States Government the amount total wage paid to each employee during the preceding quarter. From these reports, wages are credited to social security accounts of workers, and, when the worker reaches age 65, total wages received by him during his working lifetime will be used after 1940 determining his monthly retirement income under the old insurance provisions of the Social Security Act. Until 1942, lump-sum benefits are being paid."

**Local Happenings**

The Commissioners Court and their wives were guests with Mrs. J. R. Foust on last Monday at the noonday meal. A pleasant social hour followed the delicious meal.

Mrs. Chas. Simpson of Lubbock visited this week with her daughter, Mrs. Carver Monroe.

Joe Haynes, a student in the Technological College at Lubbock was visiting here last week with his father and other relatives.

He's head and shoulders above mere "oil-changers"... because

**ONLY YOUR MILEAGE MERCHANT OIL-PLATES YOUR ENGINE**

Does Spring begin on March 20th?... or on the 21st? "Begin it today!" pleads your engine. "Bleed out my Winter-poisoned oil. But this Spring help me with more than an oil-change. Change to Your Mileage Merchant! And that's changing to Conoco Germ Processed oil—the only way to change me into an OIL-PLATED engine."

You want this modern exclusive OIL-PLATING because especially in Summer your steady driving demands more than the plain old type of oil-film that slithers OFF the working parts like drops of

quicksilver. Exactly the opposite is achieved by the Germ Process—patented. It makes droplets of oil act like a billion tiny suction cups, powerfully attracted and OIL-PLATED to every working surface... Never draining down, never inviting friction, no matter how many thousands of starts and thousands of miles you make all Spring and Summer. And you'll notice Germ Processed oil sticking so close to "Full"—even in older cars—that you'll want to be sticking to Your Mileage Merchant. Continental Oil Company

**A NEW JOHN DEERE**  
The Model "G"

HERE'S a new John Deere General Purpose Tractor with all of the time-tried, field-proved advantages of the famous John Deere Models "A" and "B" Tractors plus extra power, bigger daily work output.

If you have a large acreage, this new tractor is DESIGNED FOR YOU. It will pull a three-bottom plow under normal conditions, operate a 28-inch thresher, pull a big combine, cultivate as high as 60 acres in a 10-hour day, and take care of all equivalent belt and drawbar loads.

John Deere General Purpose Tractors are known everywhere for the simplicity, dependability and ROCK BOTTOM ECONOMY of their 2-cylinder engine design. Now, with the big capacity Model "G", large operators can still further reduce their production costs.

Our allotment of this new tractor for the coming season is small. We suggest that you INVESTIGATE NOW.

### Know Texas

**Beaten on Water**  
The well-known size supremacy of Texas does not extend to the matter of water areas. Although even here she ranks third, the states of Minnesota and North Carolina both surpass Texas in the number of acres covered by water. Minnesota has 3,824 square miles of water and holds only eleventh place in total area. Since the total water surface of the United States is 53,013 sq. miles, the average per state is about 1,104

**Wide Choice**  
Thirteen different types of insurance are listed in Texas by the 1936 census, with 368 companies in all. Local mutual aid companies head the list with 157, and next in order come statewide mutual assessment, stock life and assessment health and accident companies.

**Watch the Sales**  
Retail sales should give a fairly accurate picture of times and conditions, and the last available figures show that Texas ranked eighth in the United States in the amount of sales reaching a total of \$1,289,264. New York state led the nation in total sales with over four million dollars.

**Tax Figures**  
Sixteen Texas counties have a tax rate of over \$1.50, the others running down the scale to \$0.25, which is the rate in Roberts and Ector counties. Dallas County has the highest assessed tax valuation in the state, \$273,742,923, being followed by Harris, Bexar, Tarrant, Jefferson and Gregg counties, above the hundred million mark.

**SANTA FE CARLOADINGS**  
The Santa Fe Railway System carloadings for the week ending March 12, were 18,018 car compared with 20,389 for the same week last year. Received from connections were 4,463 car compared with 6,700 in same week last year. Total cars moved were 22,481 compared with 27,089 for the same week in 1937. The Santa Fe handled a total of 21,678 cars during the preceding week this year.

# TIPS to Gardeners

## Care in Planting

PLANTING and planting preliminaries demand care as the first step toward a successful garden. The ground should be worked deeply and the top three or four inches should be made as fine and loose as possible.

A primary consideration in planting is to have the soil favorably moist—damp but not wet. If circumstances demand that you plant when the ground is dry, moisten trenches before dropping the seed. Use enough water to wet soil, but not enough to cake. To retain moisture after planting, cover seeds with fine earth and press down firmly.

Generally, a temperature between 65 and 75 degrees when planting is most favorable.

Depth of planting is important, and it varies, of course, with different seeds. Generally, seeds approximately the size of turnip seed should be covered not more than half an inch. Larger seeds, such as peas, beans and corn may be planted one to two and one-half inches deep.

## LINEAGE LONGER THAN A KING'S!

For 80 years, generation after generation of flower and vegetable seeds have been grown and gradually perfected by the unique Ferry-Morse Seed-Breeding Institute. Some have twenty generations behind them—for it takes time to produce prize-winning strains.

Each year, before Ferry's Seeds are packed, the same Institute tests them all for growing ability—and grows and analyzes each variety for true-ness to type.

Only seeds that have passed their tests appear in the familiar Ferry's Seeds store display. Choose your seeds there—and be sure of a fine garden this year! In a packet and up. 1938 NOVELTIES too! Ferry-Morse Seed Co., Detroit, San Francisco.

## Sentinels of Health

Don't Neglect Them! Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood streams free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out. Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.

### Lesson for March 20

#### KEEPING THE BODY STRONG

LESSON TEXT—Mark 6:33-56; Judd 13:12-14; I Cor. 3:16, 17; Rom. 12:12. GOLDEN TEXT—Now therefore beware, I pray thee, and drink not wine nor strong drink, and eat not any unclean thing.—Judges 13:4. PRIMARY TOPIC—The Body God Gave Us. JUNIOR TOPIC—For Jesus' Sake. INTERMEDIATE AND SENIOR TOPIC—What Liquor, Drugs, and Tobacco Do to Health. YOUNG PEOPLE AND ADULT TOPIC—How Intemperance Affects Health.

The universe of God is perfectly organized in every respect. Beings that function in the spirit realm are spirit beings, not subject to the limitations of the physical world. We who dwell and serve in the physical world are equipped with physical bodies which are ideal instruments for our present existence.

With all their shortcomings and frailties, however, our bodies are indeed marvelous machines, intricate and delicate, yet unbelievably hardy and durable. They are a gift from God, and it is our express responsibility to glorify God in our bodies (I Cor. 6:20). This means that we must do everything in our power to make our bodies well if they are sick, to keep them well, and to use them for God. No follower of Christ can either carelessly or willfully do that which may or will injure or lessen the efficiency of his body.

#### I. How to Have a Strong Body.

It is obvious that not every one has equal physical strength and health. In some measure this is by divine providence or at least by God's permissive will, and those of us who find ourselves thus limited do well to count on his grace for patience to use what we have for His glory. But not one of us wants to yield hopelessly to our inability. Rather we will do our best to overcome it. We want to know

#### 1. How to cure weakness (Mark 6:33-56).

God alone can heal the sick. Even in our day when science has made such strides in the healing art, we note that the most successful remedy or system of treatment is the one that clears the way for what men call nature, but we know to be God, to work. Jesus healed the multitudes in the land of Gennesaret; He heals in America.

#### 2. How to prevent weakness (Judd 13:12-14).

The mother of Samson, who was to be a Nazirite, was to drink no wine and to observe careful dietary regulations before he was born. That is the time to prevent weakness in the body of a man, before he is born. One wonders what is to be the harvest in our modern times with liquor-drinking, cigarette-smoking mothers as well as fathers. The next generation is starting out with a serious handicap.

Note also that if it is bad for a man to have such poisons in his veins before he is born, surely it is poor judgment to put them in after he comes to the age where he controls his own life. We need to watch our diets, and we have much valuable help on that point. We also need to give serious attention to the use of narcotics. It may surprise some to know that the term narcotics includes not only drugs and alcoholic beverages, but also tobacco, and such common things as tea and coffee.

Other abuse of the body, such as overwork, neglect of rest, etc., may well be mentioned. The besetting sin of some Christian workers is the destruction of their bodies, the very temple of the Holy Ghost, by overwork.

#### II. How to Use a Strong Body.

Unfortunate as it is to observe that some who would serve the Lord have to struggle with the weakness of the body, it is far sadder to note that all too often those who have strong bodies forget to use that strength for God. Our Scripture portions give us two excellent guiding principles. Our bodies should be

#### 1. Kept for God (I Cor. 3:16, 17).

These verses refer to the body of the Christian, for only of him can it be said that his body is the temple of the Holy Ghost. The Holy Spirit is a person, the third person of the blessed Trinity. He comes to dwell within the soul of the Christian immediately upon his being regenerated, thus making his body the temple of the Holy Ghost. A clear grasp of that truth solves the problem of what we should do with and for our bodies. We must keep them well and clean. We dare not defile them in any way. The body of the Christian is kept for God.

#### 2. Yielded to God (Rom. 12:1, 2).

It is a high and noble sacrifice to die for Christ. But our call just now is to be a "living sacrifice." There are times when that may seem harder than to be a martyr. We do know that it is not always easy to live through the drab, difficult, and sometimes dreadful days, with a clear and shining testimony for Christ. But it can be done and is always to His glory. It is by the transforming grace of God that we are enabled to live such a life.

## How Pepsodent with IRIUM gets Teeth Far Brighter

Remarkable Irium contained in Pepsodent Paste and Pepsodent Powder ONLY!

Just as a cloud can hide the light of the sun—so, too, the natural radiance of your teeth often becomes hidden by masking surface-stains. Thanks to the speedy, thorough action of modernized Pepsodent containing Irium, these unsightly masking surface-stains can now be washed away! Then your teeth reveal their gleaming luster they should have!...And Pepsodent containing Irium works SAFELY—contains NO GRIT, NO PUMICE, NO BLEACH. Try it today!

Your Scrapbook

Issue contains the second of a series of articles "What to Eat and How to Cook" written by the noted authority, C. Houston

These articles, which appear weekly in this newspaper, discuss in an interesting and understandable manner the everyday aspects of food as related to feeding and maintaining of children, young people, adults, as well.

Goussiss, author, lecturer and radio speaker, is known throughout the country as the man who knows food "from soil to table," from table to tissue. The columnar writer will want to save each one of these for the valuable information that is contained therein.

WAY RELIEF THE MISERY OF COLDS

RELIEVES THROAT PAIN—RAWNESS

ENTERS BODY THROUGH STOMACH AND INTESTINES TO EASE PAIN

Speed with which Bayer tablets in relieving the distressing symptoms of colds and accompanying throat is utterly amazing and the treatment is simple and pleasant. This is all you do, and dissolve three genuine Aspirin tablets in one-third of water. Then gargle with mixture twice, holding your head back.

Medicinal gargle will act like a local anesthetic on the irritated membrane of throat. Pain eases promptly; relief is relieved.

Aspirin will say it is remarkable. The few cents it costs effects relief over expensive "throat lozenges" and strong medicines. When you buy, see that you get genuine BAYER ASPIRIN.

FOR 12 TABLETS DOZEN 25c

Only 1 cent a tablet

Mind's Portrait

Maintenance is the portrait of the mind, the eyes are its windows.—Cicero.

Loosen Phlegm Chest Colds

What Penetro does—fast as you rub it in—causes counter-irritant action—increases blood flow. Helps relieve local congestion—eases phlegm and loosens phlegm due to colds.

Wisdom Comes

Through crosses and losses, men grow wiser.—Benjamin Franklin.

OUR DOGS "BLACK LEAF 40"

Keeps Dogs Away from Evergreens, Shrubs etc.

Use 1 1/2 Teaspoonful per Gallon of Spray.

Weak, Pale?

Houston, Texas—Mrs. Emily Plaster, 5106 Schuler St., says: "A relative was so weak and nervous she could hardly get around. Dr. Pierce's Favorite Prescription strengthened her so well. Not long after using it she was as well as ever." Buy it in liquid or tablets at your drug store today. See how much calmer you feel after using this tonic.

CONSTIPATED?

Doctors recommend Nujol as the gentle action on bowels. Don't confuse Nujol with unknown products.

ON GENUINE NUJOL

On the Right Track

Picture Parade

In Chicago, the world's greatest railroad center, hundreds of trains arrive and leave daily over a network of tracks. Gliding through the "yards" on a streamliner from the Pacific coast, passengers see suburban trains going west, others going north, passing and re-passing each other. Unseen, but directing this complex flow of traffic is the train dispatcher, who calmly sits at his desk making marks on a long sheet of paper. Telephone, telegraph and teletype are at his command. There is no fuss or bother in this quiet room which should—by all standards of human behavior—be a madhouse of activity. At any given moment, the dispatcher can report the exact position of every train on his division, no small feat in a railroad center like Chicago.

Accidents are almost unknown in metropolitan terminals like Chicago and New York, certainly much less common than in outlying districts. One of the leading safety factors has been the block signal, which divides trackage into sections and automatically stops trains at danger points.

There are several thousand miles of trackage in the Chicago area, but the dispatcher knows the exact position of every freight car. He determines their fate and watches solicitously over their contents, especially if they contain rush shipments or perishable commodities which must be directed to their destination immediately. Freight pickup and delivery from such bustling points as Chicago's huge Merchandise Mart constitutes a mammoth task in itself, but the dispatcher takes it in his stride.

Adding to the dispatcher's duties in a center like Chicago are the numerous trains from other rail systems which use his tracks part of the time, or which switch freight from their line to his. Many of these changes are daily, scheduled occurrences. Others happen unexpectedly.

Snow blocks the tracks or a "hot box" is reported. Immediately the dispatcher sends working crews and equipment to the scene of trouble so that trains may continue to move. A few minutes later he is advised that an incoming train carries an invalid. Result: The dispatcher sends a "red cap" to meet the train, armed with a wheel chair. He is truly the "nerve center" of a railroad system, a man whose stupendous responsibility dwarfs the duties of law makers and captains of industry. Yet he lives unknown to all but the fellow railroaders whose actions he guides.

Pretty Things for Easter

THESE three dresses are up high on the list of fashion's favorites, and you can easily make them at home by using our simple, easy-to-follow patterns, each accompanied by a complete and detailed sew chart. Start right now, for even if there's a shiver in the air at this moment, Easter is not very far off! And you'll want to be ready!

**Dress With Lifted Waistline.** This is a very, very popular fashion because it makes you look so slim and graceful, what with the waistline high in front, and soft gathers above it, the gently flaring skirt. Made up in a prettily printed or silk crepe, it will be lovely for Easter and for all Spring. Be sure to wear a bunch of flowers at the neckline.

**A Jumper Frock for Girls.** This is one of the sweetest and most becoming styles ever invented for girls of school age, just about the time they begin to shoot up so fast that you can almost see them grow! Make the jumper of linen, gingham or percale, and why not make two or three blouses to go with it? One of linen, one of dimity, and one of organdie.

**Everybody Likes Dirndl Frock.** The square neckline, the full rippling skirt and tight little waist, are so flattering to slim figures! Here's a charming dirndl with just the right air of quaintness and freshness about it. Choose a gay flowered print, or a cheerful plain color, pale or bright. But be sure, whether you make it up in silk or cotton, to choose a crisp fabric so that the skirt will flare as it should.

**The Patterns.** 1481 is designed for sizes 14 to 42 (32 to 42 bust.) Size 16 (34) requires 3 3/4 yards of 39-inch material. 1996 is designed for 6 to 14 years. Size 8 requires 1 3/4 yards of 39-inch material for the jumper; 1 1/2 yards for the blouse. Also 2 1/2 yards of bias facing for neck and armholes of jumper. 1480 is designed for sizes 12 to 20 (30 to 38 bust.) Size 14 (32) requires 3 1/2 yards of 39-inch material, plus 1 1/2 yards of ribbon for belt and 3/4 yards of braid or ribbon for trimming.

From one generation to another

FAVORITE OF THE SOUTH

A Pig Was to Blame

By the disobedience of a lad in 1809, a garden gate in Rhode Island was left open, and a pig got in and destroyed a few plants. A quarrel between the owners of the garden and the pig resulted, which spread among their friends, defeated the Federal candidate for the legislature, and gave the state a senator by whose vote war was declared in 1812 with Great Britain.—Pat Paragraphs.

Truth in Speaking

Speak not at all, in any wise, till you have somewhat to speak; care not for the reward of your speaking, but simply and with undivided mind for the truth of your speaking.—Carlyle.
