News Bits

Fred Fogg At Large

Trading clothes with another prisoner who was due for release from the Amarillo jail, Frank Fogg made his escape last week, according to the Canyon News. Fogg attempted in 1937 to kill E. King, former superintendent of Canyon Schools.

Death at Cap Rock

Black Riddle, 32, of Flomot, was killed last Saturday afternoon when the truck he was driving rolled and fell 75 feet over an embankment on the Cap Rock Pass between Flomot and Plainview. The truck was demolished and Riddle's body was necessary to cut the earth in order to remove the wreck, says the Matador Tribune.

Harvey Case Dead

Funeral services were held at Silverton, Monday last week for Harvey S. Case, who died of poison after the extraction of several teeth. He has lived at Silverton for several years, and was 43 years old at the time of his death, according to the Quitman.

Payne to Plainview

Y. Payne, president of the Farmers and Merchants Bank at Silverton, last week assumed the management of the Hale County Bank at Plainview. There will be no change in the personnel of the bank, and Mr. Payne will be in Turkey every day.

Well Reaches Contract Depth

The contract depth of 3,500 feet was reached early Wednesday week by the drillers of the well three-fourths of a mile west of Turkey. According to the Enterprise, there is a possibility that the well will be deeper in an effort to reach a profitable showing of oil.

GETTYSBURG REUNION

Special cars of Civil War veterans, averaging more than 90 each, are en route today to the Southwest over the Santa Fe Railroad to attend the 75th anniversary of the Battle of Gettysburg. The cars are from Clovis, New Mexico; Amarillo, Texas; and Denver, Colorado, attached to the Santa Fe Canyon Limited to Chicago which they will be routed to Gettysburg. Preliminary arrangements have been made to care for the aged survivors of the visit to the annual reunion of the Grand Army of the Republic and the United Confederate Veterans. Extreme precautions are being exercised by Government and Santa Fe officials to provide every comfort and care.

A Pig Contest Ends

Brannon and Thomas Olive Win Pigs

The FFA Pig Contest, which closed last week with Brannon and Thomas Olive winning 1291 and 1288 points respectively, W. C. Donnell was with 1260 points.

Weaver, Agricultural Technician, won the first prize, which was given to Fred Brannon, who was last year's winner. Donnell also a pig.

The contest is conducted so the last year's winner will win the second prize, and being this year the winners will be eligible for prizes next year.

Effort is being made, according to Lem Weaver, to give a red jersey heifer as first prize and give pigs as second and prizes.

Complete Ballot Is Listed This Week

FARMERS WAREHOUSE COMPLETED THIS WEEK

The huge modern cotton warehouse which has been under construction here by the Farmers Elevator, will be completed today, it is thought. Built in the latest "airplane hanger" manner, the building will store 4,000 bales of cotton, and is practically fireproof. The new building is built with all the supports in the dome roof—not a single upright studding in the entire floor space—yet it is said that it will withstand more storm and wind without damage than the old type. With its gleaming galvanized covering the structure is a beautiful one. From the inside, the building appears to be even larger than from the outside. Already nearly 1,000 bales of cotton are in the warehouse, and the old warehouse has been made available for wheat storage. Both buildings and their contents are covered by bonded insurance.

BOYS WRECK PICKUP

Durwood Gresham, Jack Martin and Cowart's pick-up figured in a car wreck here Saturday night in which Martin received painful injuries. His knee was badly cut, as well as his face and throat. One gash barely missed his jugular vein.

The pick-up driven by Gresham, was being piloted down the road just a little too fast to make the corner. It will take something over a hundred dollars to repair the truck.

Gresham was uninjured.

LIBRARY NOTES

Two new books received this week were "By Pike and Dyke" and "Eight Little Indians". "By Pike and Dyke", a story for boys, is about King Phillip of Spain, determined to wipe out Protestantism at any cost, was visiting all the horrors of the inquisition on the peace-loving burghers of the Netherlands. But because these people loved liberty even more than peace, they rallied around the courageous and determined William of Orange—to take part in one of the bitterest struggles in history.

Among the bravest of the defenders was young Ned Martin, an English volunteer who had joined the brave Netherlands. The boy was the son of an English sea captain and Dutch mother and could speak both languages. The Prince of Orange found in him a valuable aid, sending him on many dangerous missions.

The Library is the recipient of two gifts of books this month. Three books of fiction from Mrs. Alexander and a large group of books from Honorable Marvin Jones. The gift includes one book which treats of inventions, and attempts to show the kinds of new inventions which may effect living and working conditions in America the next ten to twenty-five years. It indicates some of the problems which the adoption and use of these inventions will inevitably bring in their train. It emphasizes the importance of National efforts to bring about prompt adjustment to these changing situations, with the least possible Social Suffering and loss, and sketches some of the lines of national policy directed to this end.

CARD OF THANKS

We wish to take this method of thanking our many friends for the many acts of kindness, words of sympathy and beautiful floral offerings you so graciously gave to us in the recent bereavement of losing our Dear Wife and Mother.

May the richest blessings of Heaven rest upon each and every one of you, in our humble prayer.

D. P. Brooks,
Wilfred Brooks,
J. F. Brook and family,
L. M. Murdock and family.

Norland Havran returned home Wednesday from a three week vacation trip to Bomarton and Megargel, where he visited with his grandparents, and other relatives.

Voting Sheets Are On The Press At The News Office

With absentee voting starting July 3, the ballots for the July 23 Primary are nearly ready to be delivered to Chairman H. S. Sanders. A complete list of State, District and County candidates follows:

FOR CONGRESS, (18th Dist.):

Marvin Jones, of Potter County
James O. Cade, of Potter County
FOR GOVERNOR:
Ernest O. Thompson of Potter Co.
S. T. Brogdon of Erath County
Joseph King of Harris County
Clarence E. Farmer of Tarrant Co.
William McCraw of Dallas Co.
Tom F. Hunter of Wichita Co.
P. D. Renfro of Jefferson Co.
Karl A. Crowley of Tarrant Co.
W. Lee O'Daniel of Tarrant Co.
Clarence R. Miller of Dallas Co.
Jas. A. Ferguson of Bell Co.
Thos. Self of Houston Co.
Marvin P. McCoy of Harris Co.

FOR LIEUTENANT-GOVERNOR:

Alton M. Mead of Tom Green Co.
Pierce Brooks of Dallas Co.
Coke R. Stevenson of Kimble Co.
John Lee Smith of Throckmorton County

FOR ATTORNEY GENERAL:

G. H. Nelson of Lubbock Co.
Gerald C. Mann of Dallas Co.
Lewis M. Goodrich of Wheeler Co.
Robert W. Calvert of Hill Co.
Walter Wood of Harris Co.
Ralph Yarborough of Travis Co.

FOR ASSOCIATE JUSTICE OF SUPREME COURT:

Richard Critz of Williamson Co.
Tom Smiley of Karnes Co.
W. H. Davidson of Jefferson Co.

FOR JUDGE OF COURT OF CRIMINAL APPEALS: (Unexpired Term)

Harry N. Graves of Williamson Co.
Charles A. Pippin of Dallas Co.
James A. Stephens of Knox Co.

FOR JUDGE OF COURT OF CRIMINAL APPEALS: (Regular Term)

F. L. Hawkins of Ellis Co.
FOR RAILROAD COMMISSIONER:
C. V. Terrell of Wise Co.
G. A. Jerry Sadler of Gregg Co.
Robert A. Stuart of Tarrant Co.
Frank Morris of Dallas Co.
John Wood of Shelby Co.
W. Gregory Hatcher of Dallas Co.
O. C. Christie of Gollin Co.

FOR COMPTROLLER OF PUBLIC ACCOUNTS:

George H. Sheppard of Nolan Co.
Large Terrell of Tarrant Co.
J. J. Biffle of Hill Co.

FOR COMMISSIONER OF GENERAL LAND OFFICE:

Morris Browning of Potter Co.
William H. McDonald of Eastland Co.
Bascom Giles of Travis Co.
Larry Mills of Dallas Co.

FOR TREASURER:

Charley Lockhart of Travis Co.
E. B. Barnes of Travis Co.
Lewis C. Foster of Tarrant Co.

FOR SUPERINTENDENT OF PUBLIC INSTRUCTION:

S. R. LeMay of Henderson Co.
L. A. Woods of Travis Co.
W. E. James of Travis Co.

FOR COMMISSIONER OF AGRICULTURE:

Leonard Westfall of Haskell Co.
J. E. McDonald of Ellis Co.
George H. Allen of Smith Co.

FOR CHIEF JUSTICE OF THE COURT OF CIVIL APPEALS, 7th Judicial District:

M. J. R. Jackson of Potter Co.
L. P. Bonner of Wilbarger Co.

FOR ASSOCIATE JUSTICE OF THE COURT OF CIVIL APPEALS, 7th District: (6 year Term)

W. N. Stokes of Potter Co.
FOR ASSOCIATE JUSTICE OF THE COURT OF CIVIL APPEALS, 7th District: (Unexpired 2-year Term)
A. J. Polley of Floyd Co.

FOR REPRESENTATIVE: 120th District:

L. D. Rochelle of Lamb Co.
A. B. Tarwater of Hale Co.
FOR DISTRICT JUDGE 110th Judicial District:
Alton B. Chapman of Dickens Co.
Kenneth Bain of Floyd Co.

FOR DISTRICT ATTORNEY 110th Judicial District:

John A. Hamilton of Motley Co.
Winfred F. Newsome of Floyd Co.

Rains Slow Harvest

Weeds, and Dampness Have Cut Wheat Crop

Silverton and vicinity received 1.11 inches of rain Friday afternoon and night of last week. This and several other little spotted showers had the wheat harvest at a standstill here for several days. The wheat began to come in again and almost everyone who has not finished are in the field today.

According to Ned Baird, Fort Worth and Denver agent, a few less than forty cars have been sent out of Silverton to date, compared with 100 cars last year at this time. Part of this is due to the bad harvest weather, but take it any way in the world and there will be less than half the wheat shipped from Silverton that there was last year. Last year 270 cars were shipped. (This figure may include Whitley Switch.)

Wheat yields are varying from 2 bushels to 10, with a few lucky fellows claiming more than that. Test has been cut down somewhat due to weeds and dampness. Most of the wheat is going about a 57 or 58 test.

YOURSELF: THE PARTNER

God made the granite, but not the monument. God made the marble, but not the Parthenon. God made the ore, but not the steam engine and the ocean liner. God made the tree, but not the violin. God made the electric impulses and vibrations, but not the wire, the battery, the dynamo. It is a partnership, and as He could limit us, so we too, limit Him. From a power plant, near Bridgeport, Connecticut, came the report recently that a spider had straddled with his eight legs two live wires, and was consequently electrocuted. Shortly a stream of ants seeking food made for the dead spider. Steadily they approached, and immediately the electric current killed them; until the foraging ants massed over the wires and short-circuited the connection to the city. Only a spider, but able to cheat man of light and heat and power. Man may be relatively but a speck, but he can short circuit the power of the Eternal. See yourself as God's partner. This will be the theme at the Presbyterian Church next Sunday morning. Vesper service at 7 p. m.

Weather Forecast

Partly cloudy tonight and Friday.

Dallas Papers Combine

Today marks the end of the Dallas Journal and the Dallas Dispatch as separate newspapers. A combination has been effected, and the publications will appear as one.

Obituary

MRS. SALLIE SEAMAN

Mrs. Sallie Seaman, former resident of Silverton died June 23 at Mineral Wells where she has made her home for the past fifteen years.

Obituary

Mrs. Sallie Seaman

Mrs. Sallie Seaman was born in Johnson County, Texas April 4th, 1871. She moved to Silverton in 1900 and made this her home until 1923 when she moved to Mineral Wells.

Mrs. Seaman was an active member of the Church of Christ. During the War she was an ardent worker and supporter of the Red Cross. All through her life, she seemed to have the knack of caring for the sick and needy and was ready at any time to help unfortunate people.

Mrs. Seaman taught school in Silverton for two terms and also taught at Rock Creek, Lakeview, and across the Tule Canyon.

She was preceded in death by her husband who died in Mineral Wells eight years ago.

Surviving children are Henry Seaman, Tulsa; Chris Seaman, of Los Vegas, N. Mexico; Mrs. Prentice Richard, Cash, Oklahoma. She also leaves one grandchild and 10 step-grandchildren.

CARD OF THANKS

We wish to thank all our friends who have been so kind to us during our recent sorrow, the death of Mrs. H. C. Seaman. Your kindness will not be forgotten.

Mr. and Mrs. Marion Seaman
Mr. and Mrs. Henry Seaman and family
Mr. and Mrs. C. C. Seaman
Mr. and Mrs. H. P. Richards and family.

AGRICULTURAL CONSERVATION ASSOCIATION COMMITTEE MEETING

The County Committee for the Agricultural Conservation Association was in session at the County Agent's office Wednesday. They were compiling new base yields for cotton farmers for the years 1933, 34, 35, 36, and 37.

The committee is headed by Clyde Hutsell. Committeemen are Otis Wilson and Henry Bailey.

Briscoe County News — \$1.00

Funeral Services For Two Former Residents

News Flashes !!

THURSDAY, June 30th

Business is Better

Business is better if the trend of the stock market is any indication. The stock market in New York hit a new high for the year, today. Cotton futures are up 6 to 9 points.

No Wage Increase Here

A report today tells of the wage increase of \$5.00 per month for unskilled WPA workers to go into effect July first.

However, 36 Panhandle counties will not receive the increase because of a hike they received last December. Briscoe County workers will not get a raise.

Roosevelt in Hospital

James Roosevelt, son of the President is in the Mayo Hospital where he is undergoing treatment for stomach ulcer.

Withdrawn

Announcement was flashed here today of the withdrawal of two candidates for state office.

Pierce Brooks has announced

that he is no longer a candidate for Lieutenant Governor; and W. Gregory Hatcher has withdrawn from the Railroad Commissioner's race.

Weather Forecast

Partly cloudy tonight and Friday.

HODGES - GRIFFITH

Miss Valeria Griffith, of Victoria, Texas, and Mr. R. D. Hodges, also of Victoria, were united in marriage June 8, 1938, at the Presbyterian parsonage in Victoria.

R. D. Hodges is working in the oil fields at Victoria and has lived there for some time. He graduated from Silverton High School in 1934 and is the son of Mr. and Mrs. T. J. Hodges.

The new Mrs. Hodges is unknown to Silverton folks, but they wish to send their best wishes to the happy young couple for a happy, prosperous life together.

AGGIE BRIEFS

By Finley R. White

It's an ill wind that blows no one any good. The winds that have brought our recent rains haven't pleased the wheat farmers much, but the ranchers and row crop farmers are plenty well pleased.

Last week's rains have not materially damaged wheat—even though they put a stop on the harvest. Ranchers and row crop farmers report the rains as worth "plenty" to them. After all the fellow who sends the rain knows pretty well where to send it and how much to send. We are all grateful for the moisture. Rain in this country is as welcome as a white faced calf. —That's saying lots too.

Wheat Loan

With the harvest going full blast and many little farmers in a cramp trying to hold their wheat, will there be a government loan on wheat this year? If so, how much and when?

The answers to these questions would really be worth something to everyone regardless of what the answers are. About all the writer is able to give out on this subject is, I don't know.

Dame rumor has it now that the announcement of the loan is being held up until July 11th. The government forecast on wheat comes out July 10th and the loan—if any, is to be announced July 11th. That bit of information sounds logical, but it may not be worth a dime—if any of you think it's worth a dime you know where I stay.

Compliance

So that 1933 will not be ancient history when we get our 1938 checks we are starting compliance about 60 to 90 days earlier this year than we did last year.

As in previous years we are calling for a map of your farm just as it is being operated in 1933. We want the map drawn on large enough scale that you'll have room to put down different measurements and also have room to write in each field what is growing in that field.

If you happen to be one of those fellows who has planted and replanted your cotton, and still don't have much of it, remember when you draw your map to be sure to show where you planted cotton—even if it is in growing maize at the time you make your map.

Another little item worth mentioning right here is—don't send your map in without putting your name on it. If you are working 2 or more places under different landlords be sure to write your name and your landlord's name too on your map. We will accept the map measured in feet, yards, chains or anything. We prefer the use of a 66 foot chain since it simplifies the calculation here in the office. The observance of the above pointers will go a long way toward speeding up our compliance work this year.

We have our aerial maps of every farm in Briscoe County. These maps were made last year, but they will still serve to give us our exact cultivated acres. It will be necessary for your maps to check pretty close to the aerial maps or they will have to be remeasured.

Supervisors and recheck men will visit each farm to check the measurements turned in by the farmers. These recheck men will also check up on what's going on your soil conserving acres. Remember if the soil conserving acres are not planted to soil conserving crops they must be kept clean. Soil conserving acres found to be "running away" in weeds will be counted as soil depleting.

Of course we don't expect anyone to stop their combines in order to get us a map in, but we do want your map as quickly as possible. We're ready to begin figuring things out.

Look at your subscription name label. If your subscription is nearly out, renew on the dollar offer.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK — When Charles Murras came out of the Sante prison last year, he met by a committee of distinguished Frenchmen, who nominated him for the Nobel peace prize and said they would make him a member of the Academy. They have just fulfilled the latter promise, and M. Murras becomes an immortal by a majority of one vote. He had spent 250 days in jail on a charge of having urged the assassination of 140 members of the chamber of deputies who had voted for sanctions against Italy; also on a charge of inciting the French people to "sharpen up their kitchen knives" for use against certain proscribed politicians.

In the 250 days he had written five books, swelling his vast collection of books on biography, politics, economics, literary criticism, history and what not to probably well over 100. I talked to him once in the Cafe des Lilas, a fragile, deaf, bearded old man with a contentious, blazing mind which makes one think of a sizzling battery running an automobile without any engine.

In 1923, he was in jail for four months in a somewhat anti-climatic adventure for one **Showered Duce Technique Of Terror** who was to be regarded as an immortal. Three members of the chamber of deputies were kidnapped and fed castor oil—Mussolini is said to have got his broad prospectus of Fascism from Murras—and the bald head of one of them was painted with violet ink and glue.

In 1925, M. Murras was sentenced to two years in prison, the charge being that he had threatened to kill the minister of the interior. Among the causes of his incarceration in October, 1926, was conspiracy evidence in the assault on Premier Leon Blum, in which he was severely beaten, while attending the funeral of a friend.

His books and virulent editorials against democracy in the Royalist, paper, translated into many languages, are the fount of Fascist doctrine all over the world. His hatred of democracy is savage and vitriolic. He is witty, learned, brilliant and he has the most exhorting and corrosive vocabulary in France.

FOOTNOTE to the main text of the world discussion on Japan bombing babies is the interchange between Avery Brundage, chairman of the American Olympic committee, and William J. Bingham (Bill the Plugger), Harvard athletic director. Mr. Brundage says it has nothing to do with sports, and Mr. Bingham says it has—with sportsmanship, at any rate—and he withdraws from the committee and the 1940 games.

The sports writers are becoming almost metaphysical in weighing and appraising the moral values of the argument. Bill the Plugger says, in effect, that he won't play with baby-killers.

He became Bill the Plugger by losing 19 races at Harvard and winning the twentieth. Thereafter, he was Harvard's crack miler.

He started out plugging at the age of fourteen, leaving school to work in a mill and help support his five younger brothers and sisters. He saved \$30, went to Exeter and worked his way through Exeter and Harvard.

He came out of the war a captain with appropriate decorations, did a turn in the banking business in Texas and became Harvard graduate supervisor and track coach in 1921. On the side, he is president of a concern which imports rubber goods.

Mr. Lambert Keeps Mind On Yachts IF GERARD B. LAMBERT builds a house, they're likely to find a center-board and a sky's yard on it. It's hard to see how he can get his mind off his yachting, but, at any rate, he becomes special adviser to Stuart McDonald, federal housing administrator.

The gargles and shaves of the multitudes built his chemical fortune at St. Louis. He was one of the original backers of Lindbergh and the originators of great advertising slogans.

Author of a spirited "Defense of Babbitts" in the American Mercury, commander of the Eastern Yacht club of Marblehead, Mass., he maintains a valhalla for gallant old yachts.

Saved by Telephone Wires When their planes crashed near Durban, South Africa, two flyers fell on telephone wires and escaped death.

ASK BUSINESS' HELP

Five 'Spending' Chiefs Tell Their Recovery Hopes ... Government Agencies Warned to Avoid Politics

John Roosevelt, youngest son of the President, and his bride, the former Anne Lindsay Clark, leaving the old church in Nahant, Mass., where they were married.

Edward W. Pickard SUMMARIZES THE WORLD'S WEEK

© Western Newspaper Union.

Ask Business to Help

FIVE of the officials who will have most to do with carrying out the President's spending-lending drive went on the air in a nation-wide broadcast and urged that business cooperate with the administration in restoring permanent recovery. These speakers were Secretary of Agriculture Henry A. Wallace, WPA Administrator Harry L. Hopkins, acting PWA Administrator Howard A. Gray, United States Housing Administrator Nathan Straus and Brig. Gen. John J. Kingman, acting chief of United States army engineers.

Outlining his plans for use of federal funds allocated his agency, Hopkins said that the purchase of materials alone for WPA projects will give indirect, full-time private jobs to 250,000 workers, in addition to relief jobs for the unemployed.

"And so the WPA money flows, like the blood in the human body, giving life and strength to the economic system all the way from its toes to the top of its head," he said.

Secretary Wallace said that under the new agricultural legislation the farmer is in good shape to do his part in the recovery drive.

"If business would only start producing as it knows how to produce, the market for agricultural products would expand during the next year to a point which would help amazingly in bringing about a solution of the farm problem," he said.

Straus outlined his agency's program of slum-clearance and low-cost housing and said that it will result in increased employment and the "creation of that finest and most needed of all commodities—better homes for Americans."

The administration's flood control program, General Kingman said, will produce "equally beneficial results not alone in the reduction of human suffering," but in keeping open business channels and providing additional employment.

Terrible Train Wreck

OLYMPIAN, crack passenger train of the Milwaukee road bound from Chicago to Tacoma, Wash., crashed through a food-weakened trestle over Custer creek, near Saugus, Mont., and at least 40 persons perished, most of them being drowned in a submerged tourist sleeper. About 65 others were injured.

This was the worst railroad wreck in America in recent years, and it sadly marred the safety record of the Milwaukee road which had not lost a paying passenger in accidents in the previous 20 years.

The eleven-car train ran into a cloudburst near Saugus but the crew had no warning of the trestle's condition until the engine plunged through the span, dragging several cars after it.

Wage Law Effects

STRAIN of the new wage and hour law on industry, say labor experts in Washington, will be eased by the existing unsettled economic conditions. They size up the situation thus:

At industry's present pace not more than 200,000 wage earners in manufacturing industries would get more pay.

The big high speed industrial machines, such as automobile plants, hardly will be touched by the law. It will affect certain garment factories and a very small number of textile mills.

It will affect the fertilizer industry of the South and southern sawmills. Even when business is as good as it was last summer, unofficial estimates indicate that only about 200,000 factory workers would be affected by the 25 cent wage minimum of the law, and somewhat more than 1,000,000 workers would find their hours shortened by a 44 hour weekly limit, effective next October.

At the outset the law's effect will be to improve "the worst conditions" in certain industries engaged in interstate commerce, the economists believe.

Child labor provisions will affect mainly scattered minors working at odd jobs in various mills and factories.

'Keep Out of Politics' SENATOR MORRIS SHEPPARD of Texas and the senate campaign expenditures investigating committee of which he is chairman has directed all government agencies to take no part in primary and election campaigns. And it has issued warning that persons suspected of improper political conduct will be exposed and cited for criminal prosecution.

The committee at its first meeting adopted a resolution pledging that its investigations will be conducted with "vigor and vigilance" without fear or favor and without partisanship. The warning against use of improper tactics was directed first to all candidates for senatorial offices, their friends and aids. It was then extended to all government agencies.

Besides Sheppard on the committee are Senators Harrison, David I. Walsh, Joseph O'Mahoney and Wallace White.

German Spies Indicted AFTER five months of investigation by government agents, 18 persons were indicted as spies by a federal grand jury in New York. Moreover, no secret was made of the fact that they are charged with being spies for the German government, engaged in obtaining information concerning our national defense.

Four of the defendants are in this country and will be tried here. The others, including three German officers, are abroad.

John Roosevelt Weds IN A little old stone church at Nahant, Mass., John Roosevelt, youngest son of President and Mrs. Roosevelt, and Anne Lindsay Clark were made man and wife. After the ceremony there was a reception in the old Nahant club, and the young couple then started on a honeymoon trip to Campobello Island, N. B., the location of the President's summer home.

Calls Germany Welsher GERMANY insists she is not liable under international law for the foreign debts of the former government of Austria. In reply Secretary of State Hull says, in polite language, that Germany is a welsher. His note on the subject, delivered by Ambassador Hugh Wilson, contends that Germany, when it absorbed Austria, assumed full responsibility for Austria's post-war debts to America and other liabilities totaling about \$50,000,000.

Improved SUNDAY Uniform SCHOOL

LESSON

By REV. HAROLD L. LUNDQUIST, Dean of the Moody Bible Institute of Chicago, © Western Newspaper Union.

Lesson for July 3

A CHOICE OF LOYALTIES LESSON TEXT—Joshua 1:2-6; 24:14-21. GOLDEN TEXT—As for me and my house, we will serve the Lord. Joshua 24:15.

PRIMARY TOPIC—Choosing Sides. JUNIOR TOPIC—A Loyal Leader. INTERMEDIATE AND SENIOR TOPIC—A Choice of Loyalties. YOUNG PEOPLE AND ADULT TOPIC—Man's Highest Allegiance.

"Lives of great men all remind us," according to the poet, that we too may make our lives sublime, and thus leave our footprints in the shifting sands of time. The study of biography is interesting, instructive, and often challenging. When we enter the field of Bible biography we bring into consideration an additional and fundamental factor, namely, the power and grace of God working in and through a surrendered life. All strength of character and ability is a gift of God, but its glory is largely veiled and its usefulness definitely limited, if not actually perverted, because there is no recognition of the foundation of true greatness, which is faith in and loyalty to God.

During the next three months we are to share in the study of the life stories of great men and women which will not only stimulate ambitions, but which also reveal what God can do through those who are ready to follow Him.

Moses, God's great leader for Israel, having brought them out of the land of bondage and through the terrible wilderness, is about to leave them. God's workman is about to die, but His work is to go on. God is not taken by surprise.

I. A Prepared Man Takes Command (1:3-6).

"Moses is dead; now therefore arise." Life is like that. "The king is dead; long live the king," is the cry of those who live under monarchies, as one ruler dies and his successor takes over the throne. Until that day when there shall be "time no longer," men must put away their sorrow and go on. Three words characterize the commission of Joshua—

1. Promise (vv. 2-4). God gave the land to Israel. Every place that Joshua planted his foot upon was to be his possession, even as God has promised Moses. A river lay between them; there were walled and armed cities to be taken; there were even giants in the land, but God promised it to Joshua; and he took it by faith.

God has given us many promises, too. If we are fearful, poverty-stricken, powerless Christians, it is because we do not believe God.

2. Power (v. 5). No man is able to stand against God's servant who is doing God's will, in God's way, in God's time. It was true of Joshua; it is true today. Men set up their opposition to God's plan and program with the assumed belief that because they have position, power, or money, they can readily crush the poor little band of Christian workers. Russia tried it. They even "abolished" God. But religion thrives in Russia, secretly perhaps, but none the less sincerely and successfully. There is no power of man or devil that can defeat the man who does the will of God.

3. Courage (v. 6). To serve God means to be assured of His help. Faith lays hold of that fact and the whole man becomes courageous. But observe that the foundation of courage is faith in God's Word, nurtured by meditation in it "day and night" (v. 7). The house of courage can be built only on that foundation.

II. An Experienced Man Gives Counsel (24:14-21).

More than two decades have passed since the appointment of Joshua to lead Israel. God has fulfilled every promise. Israel is in the Promised Land. Before the aged leader dies he calls the leaders of his people together to urge them to continue in the way of faith and loyalty to God. This he does by:

1. Example (v. 15). "As for me and my house, we will serve the Lord." No man can honestly and effectively call others to devotion to the Lord unless he sets them an example. No one takes any stock in the preacher or teacher who says, "Do as I say, not as I do." We are more than signposts; we are guides.

2. Instruction (vv. 16-19). Remembering God's dealings with them, the people declare their determination to serve the Lord. They spoke rather glibly. Joshua instructs them. God is not interested in lip service. He does not need them so much as they need Him. He does not look upon their confession of Him, if they continue to live in sin.

3. Warning (v. 20). God will visit His judgment on His people if they forsake Him and turn away—such is Joshua's warning. We who look back to the history of Israel know that they did forsake Him, and that the judgment of God is still upon them. "Be not deceived; God is not mocked, for whatsoever a man soweth, that shall he also reap" (Gal. 6:7) is God's warning through Paul to the Christian.

Charming Midsummer Styles

THE play suit is practically guaranteed to give slim young things a good time at the beach or in the country, because it's so gay and so flattering. And the

1484 1532

graceful afternoon dress will make any woman who wears it look slim, cool and smart! Start right in to make whichever one best fits into your plans. You'll be delighted to see how easy it is, and what a saving it means to sew your own by means of these patterns, each with sew chart included.

The Play Suit.

The suit itself has pleated shorts and a square neckline. The skirt, shirred at the top, and tied round the waist, may also be worn as a cape, long enough to cover the play suit. Either way, it looks extremely fetching and fluttery. Make this suit of calico, jersey, percale or sharkskin, with the head kerchief to match or contrast.

The Afternoon Dress.

Here's just the type of dress you want for summer afternoons—graceful and soft, with short, full sleeves and deep v-neckline that will be cool on the hottest day. The back is perfectly plain, straight and slenderizing. The jabot ripples at the sides and is plain in front, so that it looks soft without being bulky. The shoulders are smooth, the neckline becomingly snug. For this lovely dress, choose voile, chiffon, georgette or handkerchief lawn.

The Patterns.

1484 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires

Latin American Cities

Tegucigalpa, Honduras, with 40,000 inhabitants, and Buenos Aires, Argentina, with 2,290,788 inhabitants are the smallest and the largest capital cities in Latin America.

Toast to a Woman

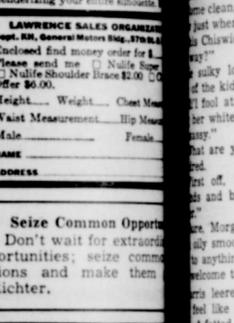

Here's to the woman who smiles for every joy, a consolation for every sorrow, a consolation for every grief, an excuse for every fault, a prayer for every tune, an encouragement for every hope.—Sainte Faix.

NO MORE SLOW

Professor Charles Muntz's "Nulle" shoulder brace instantly straightens a rounded abdomen, relieves fatigue and expands the chest. It is comfortable that you completely forget you have it on. Just draw the brace and Nulle does the rest. It makes you stand correctly, gives you a strong, easy condition. Nulle instantly gives the old and improves the young. Weighs about an ounce.

Chair or Buffet Set In Filet Crochet

Pattern 6091

Distinctive—this easily crocheted set, its picturesque motif and initial set off by lacy K-stitch. Excellent for scarf-ends, too! Pattern 6091 contains charts and directions for making the set and 3 1/2 by 5 inch alphabet; illustration of stitches; materials needed.

To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle, Household Arts Dept., 259 W. 14th St., New York, N. Y.

Please write your name, address and pattern number plainly.

"There's the Doorbell Again"

SUPPOSE daily to your door came the butcher, the grocer, the clothier, the furniture man, and every other merchant with whom you deal? What a tedious doorbell answering that would mean! It would be even more impractical for you to visit daily all these stores to find out what they have to offer and the price. And yet you need those merchants' services quite as much as they need your patronage. Contact between seller and consumer is essential in the supplying of human needs. Before a sale can be closed the goods must be offered. Every week, through the advertising columns of this newspaper, the merchants of this city come to your home with their choicest wares. Easily, quickly, you get the news of all that is worth while in the market-places of the world. They are not strangers at the door, but merchants you know and trust. You are used to high quality and fair price when you buy an article advertised by a reputable

BRISCOE COUNTY NEWS

"Official City and County News"

ROY W. HAHN
Editor and Publisher
Cranberry, Alfred, Sports Editor

Entered as second-class mail matter at the post office at Silvertown, Texas in accordance with an act of Congress on March 3, 1879.

"So many sects, so many creeds,
So many paths that wind and wind,
While just the art of being kind,
Is all this old world needs"

I HEREBY RESOLVE—that this line shall remain in the Briscoe County News until our city managers start a little constructive work toward surfacing our streets, or at least until the death of Yours True-ly. Dated this 9th day of June, 1938. (I've been wanting to know for a long time, how long a linotype slug will last.)

FLOWERS GO THIS week to the street corner at Crass Motor Company. A combination "over-the-waves" and roller coaster effect can be had there by anyone who cares to risk their neck and

car by driving over the street. I don't know, maybe that isn't the City's fault after all. Maybe old Theron is doing that on purpose. If a guy ever gets that far he's likely to have to turn in there with a broken axle, or what-not. Yes, sir I'll bet T. T. is doing it on purpose. They ought to raise his taxes or something—having a graft like that right here under the nose of the City Dads.

O. W. CHAPMAN HAS been Paw again for 3 months and I didn't know it. This time it's a little girl. — Well, Chap and I had words about it. The idea, I sez, of having a baby and not telling me about it. Sez you, he sez. The idea yourself. (You know how Chap talks) Why, he sez, if I was editor of that punk sheet of yours and missed out on us having a baby, I wouldn't ever say anything. Why, he sez, if I was a' running that paper, I'd get my note book and I'd go to every house every morning, and I'd say, "Lady, have you had a baby since yesterday?" —Yes sir, I'll bet that guy would make a great writer.

AND SPEAKING of babies, and of course, their mothers, Mrs. Boots Bryant is about to change Bo's name again. I think it's a whirl of a note myself. Just as quick as he learns to write it one way she makes him change it.

HERE'S A PICTURE our 'stiff' photographer snapped here the o-

ther day. He didn't get the names of the parties but it might be you. The good looking lady on the left is congratulating the good looking one on the right for having subscribed for the home paper. — Now come on, and confess, is it you or isn't it? If it isn't, you bet-

ter come a-running with that dollar. — AND THE SAME THING is going on among the men folks. Here is Q. E. Brown displaying that

blue ribbon sheep he's always talking about. He hasn't been able to get the dollar together all at one time yet, on account of the heavy overhead in the sheep business, but he's hoping every year to be able to do it soon—and he's only hoping it half as hard as Yours True-ly is.

I KNOW THAT the weather is kinda freakish but what I heard at Force's Store the other day is really good. A lady came in and complained that the beans she bought had all come up and were peas. Mr. Force said, "Madam, that's just this West Texas climate. There is nothing I can do about it. Ordinary seasons I guarantee my bean seed to raise beans but a year like this, you can't tell a thing about what will happen." —Said story is the truth, sa-help-me.

CANDIDATES frequent court-houses. Candidates rehearse candidate speeches. Candidates get hot and bothered. Candidates get dry throats. Candidates set up free drinks. — There's a new water cooler at the courthouse.

IF YOUR NAME isn't in the ads this week, you better give up. This is the last week. That is unless Mr. Musser and myself get on another big deal. Three hundred tickets have been given away, which is in round dollars and cents, 75 dollars and no sense at all.

BILL DUNN WANTS W. L. O'Daniel for governor but he isn't willing to put in a two bit wanted. Does that mean that his gentlemen isn't worth two bits. Sure-ly not.

INTERESTING FACTS—

Only 14,000,000 of the 25,250,000 homes in the country are equipped with furnaces. Stop, Look Listen—more grade crossing accidents occur on Saturday than any other day...U. S. recaptures lead as the world's largest producer of beer, turning out almost 59,000,000 barrels last year...Housing shortage—three million city homes in America have fewer rooms than there are people living in them...Miami, Florida, with more than \$5,500,000 invested in ten airports, has investment in flying facilities equal to \$5,200 for each year round aviation employ in the city...Honesty Increasing—for every three purchasers of autos on time who skip payments by giving wrong addresses and moving out of town in 1930 only one gets away with it today...Biggest Price Drop on Record—Back in 1907 helium cost \$2,500 a cubic foot, now the Bureau of Mines produces it at Amarillo, Texas for one cent per cubic foot.

DON'T MAR THE JOY OF THE FOURTH OF JULY

It would be a glorious Fourth of July if no accidents occurred to mar the joy of celebrating our one hundred and sixty-second anniversary of independence, declared Dr. Geo. W. Cox, State Health Officer. It is most unfortunate that a day of joy and celebration leaves in its wake one of sadness and sorrow in many homes.

It is not alone the wounds received from explosives that increase our death toll. Injuries from automobile accidents, splinters, nails, and other penetrating wounds in which dirt may be carried into the skin, heighten the hazard of tetanus, or lockjaw as the disease is commonly called.

Tetanus is fatal in a large proportion of cases. Fortunately we have tetanus antitoxin as a means of preventing the disease. Antitoxin must be administered.

"Leto's" for the Gums
Gums that itch or burn can become mighty trying. Druggists will return your money if the first bottle of "LETO'S" fails to satisfy.
BOMAR DRUG STORE

promptly following the accident. Treatment after the disease develops is rarely successful. Preventive measures include: the avoidance of such wounds and proper medical treatment.

- A few don't for the 4th of July celebration would not be amiss.
1. Don't be careless in the handling of explosives.
 2. Don't look into firecrackers which have failed to explode.
 3. Don't drive recklessly and at excess speeds.
 4. Don't overdo in swimming, especially in water of unknown depth.
 5. Last and most important: Don't fail to get prompt medical attention if a wound is suffered.

SIDELIGHTS

By Marvin Jones
Member of Congress from Texas

Two things were done in the closing days of the recent session of Congress that are especial interest to our section of the country.

Parity Payments
Provision was made for parity payments on the major farm commodities. It is estimated that these payments will amount to about 10 cents per bushel on wheat and 2 cents per pound on cotton. These payments will be additional to the regular soil conservation payments that have heretofore been provided for. I feel that we were particularly fortunate in being able to win this fight.

Interest Rates
The President vetoed the bill which provided for a continuance of the 3 1/2% land bank interest

Dickerson Hand Lotion — a special formula for cracked-open hands. After shaving lotion. At Bomar Pharmacy, 25c and 50c.

Dr. O.T. Bundy
—PHYSICIAN—
Silverton, Texas

rates. The Congress passed the legislation over his veto. It thus becomes a law, notwithstanding the action of the President in vetoing it.

It was my privilege to make the motion and lead the fight by which the measure was passed over the veto of the President. I felt and still feel that these low interest rates should be continued.

These are the lowest farm interest rates that have ever prevailed in this country, and they mean much to the entire Southwest.

Gaerland Harriss and Donna Alexander took a truck load of flour to Fencelake, N. M. Saturday for the Plains Mill and Elevator Company. They returned Monday.

Announcing the...

We are glad to offer you a cooler place to eat. You'll find this cafe is really comfortable now.

COMPLETED

Our new 4,000 bale Cotton Warehouse is finished, which leaves our other warehouse for wheat storage alone—200,000 bushels of licensed and bonded storage room!

Does It Mean Anything To You

- That every bushel we store for you is insured against loss or damage of any kind?
- That every bushel remains in local storage?
- That your wheat can be sold or withdrawn at any time Mrs. Fulton Gregg.

We wish to again solicit your wheat this harvest. If you wish to sell we'll get you the highest market price.

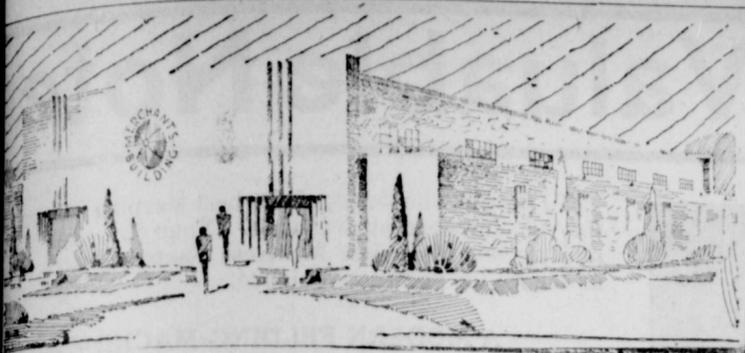

If you wish to store, either to wait for better prices, or wait for the government loan, our storage is open for you.

We're doing everything we can this year to w. n. edwards merit your patronage, to handle your wheat economically and efficiently and to make money for both of us.

NEW MERCHANTS BUILDING

This is the architect's drawing of the new Merchants Building to be constructed on the Panhandle South Plains Fair grounds at Lubbock. Contract for the spacious building was let Monday of this week. Fifty or more exhibit booths will removable partitions and other attractive facilities will present interesting displays to this year's fair-goers. The new building will contain much wider ais-

les than the old structure, better lighting and ventilating systems, and will be one of the outstanding attractions of the 25th annual fair and silver jubilee which will open its gates on Monday, September 26, closing Saturday, October 1.

MILK PRODUCTION IN THE UNITED STATES

Enough milk is produced in the United States in one year to fill a line of milk cans that would reach between times around the earth at the latitude of Chicago, according to a statement in the June 25 issue of Hoard's Dairyman. This amount of milk would fill a nine hundred mile canal that would take the commerce of the Great Lakes to the Gulf.

Even with this great volume of milk it supplies only a little over a quart of milk per day for each man, woman and child in the United States. Only 75 per cent of this

milk leaves the farm in the form of fluid milk and manufactured dairy products. The disposition of this milk is shown in the table below:

In the United States:
Milk produced 103,183,000,000 lbs
Total cows 23,988,000
Average per cow 4,301 lbs.

In Texas:
Milk produced 4,011,000,000 lbs
Total cows 1,294,000
Average per cow 3,100 lbs.

How Milk is Used

In the United States:	
Used by farm family	12.1%
Used for farm butter	10.3%
Fed to calves	2.7%
Sold as cream	31.3%
Retailed by producers	6.8%
Sold as whole milk	36.8%
In Texas:	
Used by farm family	24.1%
Used for farm butter	26.0%
Fed to calves	1.5%
Sold as cream	24.0%
Retailed by producers	7.0%

Sold as whole milk 17.4%
Texas produces about 4% of all the milk produced in the United States. 5.4% of the total milk cows in the United States are milked in Texas. This means that 5.4% of all milk cows are required to produce 4% of the total milk of the United States. This is due to the low average production of Texas cows. As shown in the above table the average production of Texas milk cows is 3,100 pounds while the United States produces 4,301 pounds of milk, according to figures for 1936 published by the Bureau of Agricultural Economics of the U. S. Department of Agriculture. California has the highest average production for all cows with 6,450 pounds of milk per cow per year. Members of the Texas Dairy Herd Improvement Associations have found that low producing cows are not profitable. These men are improving the average pro-

duction of their herd by better feeding and management, closer culling and the use of better bulls. This is a program that is available to every Texas dairy farmer. The fact that Texas ranks forty-second in average production per cow is proof that wider use of the above improvement program is a great need of our Texas dairy industry.

STATE ALLOTMENT OF POISON IS EXHAUSTED

Grasshoppers threaten minor to severe damage to crops in 117 Texas counties and the state allotment of poison material from federal sources is exhausted, according to R. R. Reppert, entomologist of the Texas A. and M. College Extension Service and state grasshopper control leader.

Texas was allotted 300 carloads of bran, each accompanied with 400 gallons of sodium arsenite. Some 50 carloads were available from the 1937 allotment, and this, when matched by farmers, gave the state a total supply of 700 carloads, or enough to scatter poison at the rate of 10 pounds an acre over almost 3 million acres.

Reports received from county agricultural agents indicate that the poison has been, in the main, effective, Reppert said. Kills ranging from 60 to 95 percent have been general.

The first allowance of 65 percent of the state allotment of federal poison material was exhausted on June 5, and the last of the reserve material on June 18, federal entomologists have advised Reppert. Meanwhile urgent requests for material are being received by the

state grasshopper committee, which in turn is asking for an additional allotment for Texas.

The most dangerous hopper, the migratory species, is centered in Dallam, Hartley, Sherman, Moore, and some neighboring areas, and these counties, together with Hardeman, Childress, Potter, Randall, and Hansford, have received the heaviest shipments of poison material.

Indications are that additional federal allotments may be made to some counties where the migratory species is present. Reppert reported.

"The outbreak has developed almost exactly along the lines we forecast in early spring," he said, "and control has been effective where material was properly dis-

tributed. Unless control measures can be continued, however, Texas will suffer the most severe grasshopper damage in history."

More than \$139,000,000 in benefits were distributed to unemployed insured workers in the United States during the first six months of 1938.

DO YOU KNOW THESE PEOPLE

A plea for help from friends or relatives in locating five missing persons in this district for whom jobless benefit checks await, was asked today by B. H. Thomson, district supervisor of the Texas Unemployment Compensation Commission.

"The commission has exhausted

every possible effort in attempting to locate these people after their benefit checks were returned due to insufficient mailing addresses, incorrect ones, or because the claimants have moved without notifying the employment service of a change in address," Thomson said.

"I hope that anyone who may recognize the name of a friend or relative on this list will advise him or her to report immediately to the nearest office of the Texas State Employment Service. There the claimant may identify himself through his social security number and his benefit check will be forwarded from Austin to his correct address.

Cancellations on these checks will be made shortly by the com-

mission, which has held them for some time awaiting the location of the claimants".

Thomson was advised by Orville S. Carpenter, chairman-director of the commission that only 45 checks out of 379,180 benefit checks issued to unemployed workers in Texas remained unclaimed. Five of these were in this district. The names of those whose benefit checks are unclaimed are: Hubert Hart Conger, James Clyde Hodge, Glenn Dean Blank, R. B. Kee, William Weaver Young.

SMILE SOCIAL

Mrs. Clifford Allard entertained a number of girls with a Smile Social given at her home Thursday

evening. The theme for the evening was smiles.

As the guests arrived, each registered and gave reasons why a smile meant so much. This was followed with an amateur program and games which were enjoyed throughout the evening.

Cookies and bonbons were enjoyed by the following guests: Misses Freda Wimberly, Patricia and Faye Tice Bomar, Cleon Diviney, Ima Jo Martin, Edna May Grimland, Billie Yvonne Sherman,

Wanda Woods, Jean Nor, Dorothy Roy McMurtry, White, Elsie Morris and Lowise.

Built Strong for long, hard service

JOHN DEERE DISK TILLER

Built to "take it" . . . to do good clean work for years at low-cost—that's the John Deere Disk Tiller. Depth can be changed quickly and easily. Gang can be angled to any of three positions. Overhead frame construction eliminates clogging in trashy conditions—places weight above the gang to aid in penetration. Disks are of tough steel, heat-treated for long wear, with proper "dish" for good, clean work. Investigate.

TEST SHOWS VALUE OF COMPLETE FEED FOR GROWING BIRDS

Well-Developed Pullets Turn in \$68 More Profit.

Gray Summit, Mo.—An old proverb laments that "one half of the world never knows how the other half lives." This is particularly true of growing pullets, as demonstrated in a test here at the Purina Experimental Farm last year.

Two hundred sturdy, well-developed six weeks old pullets were selected for the experiment. All birds were from the same hatch and for the first six weeks were fed on Purina Startena. At six weeks the two hundred pullets were as nearly alike as heredity, management, and good feeding could make them.

At six weeks the chicks were divided. One hundred birds were put into a pen and fed all the grain they could eat, along with the grasshoppers and bugs they picked up on alfalfa range. The other hundred were given all the grain they wanted nights and mornings, but in addition were given all the Purina growing mash they could eat. It was kept before them in open hoppers. These birds were also allowed alfalfa range. Management and housing conditions were the same for both flocks, and each flock was given the best sanitation.

Differences Show Early
"Almost immediately a slight difference in the development between the two flocks began to show," C. S. Johnson, manager of the Purina Poultry Department says, "but at

RIGHT OUT OF THE AIR

By R. F. SERVICE

Lucille Manners, heard on Frank Black's Friday night concert hour over NBC, has been selected by a noted beauty authority to model for a series of beautiful hand photos.

Jerry Belcher claims that none of the participants in his "Interesting Neighbors" programs have displayed more fright. He attributes this to the fact that the broadcasts are made in the home where people feel more at ease.

First radio appearance in many months for Merle Oberon, above, brought her to the microphone in Radio Theatre for "The Letter." An extra day of rehearsals was called by Producer Cecil B. DeMille at Miss Oberon's request, because she insists on thorough preparation for a microphone job.

After several weeks of auditions, Carlton Morse, author of "One Man's Family," picked up a young actor for the role of Teddy's first "boy friend" in this popular serial. Sonny Edward got the job. Then he was introduced to Winifred Wolfe who plays Teddy and recognized her immediately as a girl he passed every day in the corridors of Hollywood High School.

Andre Kostelanetz will have completed one of the longest musical series in radio when he flies, late in June, to South America, after four and a half years of consecutive broadcasting. He will not desert the microphone entirely, as he has accepted invitations to make several broadcasts in South America before resuming his U. S. radio activities in the fall.

Johnny the Call Boy, above, whose real name is Johnny Roventini, is "the biggest little man in radio." Just 43 inches high, he's the only radio celebrity who has a lifetime contract, and who is heard on three network programs each week.

Neil P. Horne, famous for taking movies of weddings and celebrities, is now taking photographs of radio programs in the studios because a lot of sponsors want sound pictures taken of their casts.

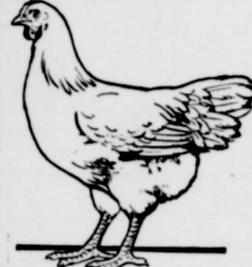

Ned Wever finds that his identity is completely bound up in "Dick Tracy," when he portrays over NBC daily during the school season. Recognized at another program recently, he was mobbed by autograph seekers when an alert youngster cried out, "There's Dick Tracy!"

Marion Frances, above, vocalist heard Wednesdays over CBS on Edgar Guest's "It Can Be Done" program, takes her radio name from her two first names. In real life she's Marion Frances Charlesworth, of Kaukauna, Wisconsin.

Well-developed pullet from the flock fed on complete growing mash. 5 months the most amazing differences were apparent. Birds fed on grain and Purina growing mash were mature, strong and sturdy, with well-developed egg-making organs and big-frames. They were ready to go into the laying house and start turning out profitable, high-priced fall eggs.

The hundred birds fed on grain and allowed alfalfa range were under-sized and immature, knobby and scrawny. Even though they had received the same starting mash as the hundred well-developed pullets, although management and housing had been the same, the ration the fully fed pullets received during the growing period had given them an advantage that could not be overcome.

Unprofitable, undersized bird fed on grain and range.

At five months both the growing-mash fed pullets and the grain-fed pullets were put on the same laying ration. The pullets fed on growing mash responded immediately to the grain fed pullets did not. The "roughing" they had received from the sixth to the twentieth week held them back. Consequently, the hundred scrawny pullets did not come into production until they were 7½ months old, and by the time they were eight months old had laid only \$6.50 worth of eggs.

Good Birds Turn In \$74

The well-developed pullets grown out on a complete growing feed started laying at five months. Proper feeding during the growing period had given them big frames, strong muscles, and well-developed egg-making organs so that they were in peak condition to start laying. During the fall and early winter months when egg prices were high these birds were in good production and at the end of 8 months had turned in a record of \$74.75 worth of eggs, or \$63.25 more than the under-developed pullets. The hundred immature, knobby little pullets were an additional expense in that they used their laying ration as a growing feed after they were in the laying house.

"Any poultryman who feels he can 'rough' his pullets through the summer is sure to find that they 'rough' him back in the fall when egg prices are high," Johnson says. "Grain and cheap mash, or grain alone, can't do a money-making job of growing and developing pullets into profitable layers. A half-way job of growing birds results in a half-way job of laying when they are put into the laying house."

WHAT TO EAT and WHY

C. Houston Goudiss Discusses

CALCIUM

The Captain of the Minerals

Nationally Known Food Authority Explains How to Include This Vital Food Element in the Daily Diet

By C. HOUSTON GOUDISS

6 East 39th Street, New York City.

A FEW years ago there was an earthquake in the Far West. When the tremors were over, the frightened people looked in dismay upon the damage that had been done. In some places they were saddened by the loss of a great number of their buildings, and in one community, mingled with their sorrow—almost crowding it out of their emotions—was indignation. For they observed that their schools had suffered greater damage than any other group of buildings in the city.

On every side, the cry of indignation arose. It was all too plain that poor materials had gone into the construction of those schools which were supposed to house children in security.

The most vehement cries went up from the mothers, not only in that community, but all over the country. That is natural, for all mothers believe they have the children's welfare at heart. Unwittingly, however, they may be doing them irreparable harm by failing to feed them the foods that will construct sound bodies, able to withstand the stress and strain of life.

Calcium Starvation

The mineral calcium is to the human body what steel and stone are to a building. It is necessary to construct the bony framework. The mother who fails to consume adequate calcium before her baby is born, or fails to give the child adequate calcium throughout the growing years, is as guilty as the contractor who constructs a school building of poor materials.

Without sufficient calcium, the bones become soft and porous. They break easily and knit slowly after they are broken. They may bend and twist during growth, so that the child who is a victim of calcium deficiency may become bow-legged and deformed, with a malformed chest or enlarged forehead. Rickets—that horrible deficiency disease which causes stunted mis-shapen bodies—may develop. And so may tetany—an other scourge of childhood.

Crooked Defective Teeth

The teeth, too, depend upon calcium for the soundness of their structure. When this precious mineral is inadequately provided, the baby teeth may soon decay; the permanent teeth may come in crowded and unsightly—and quickly develop cavities.

There are also many other ways that calcium deficiency may handicap your children. For this mineral is intimately concerned with all the body processes. It increases the strength and pulsations of the heart; helps the blood to coagulate in case of injury, thus effectively aiding in preventing hemorrhage. It strengthens the resistance of the body in fever and other diseases. It tones up the nervous system, lessening nervous tension.

Adults Require Calcium

Adults have a vital need for calcium. A lack of this mineral not only results in defective teeth, but may also be responsible for nervousness, quivering and twitching of the muscles and defective heart action.

To be normal, the full-grown human body must contain more calcium than any other mineral element. Yet, every individual is, of necessity, born calcium-poor. For if the bones were as rigid as they

You Need This Free List of FOODS RICH IN CALCIUM

Write to C. Houston Goudiss, 6 East 39th Street, New York City, for his list of calcium-rich foods. Use it daily as a guide in planning family menus.

Must Eventually Become, the Ordeal of Birth would be too difficult for both mother and child.

Easily Lost From Body

The homemaker's task of providing adequate calcium is complicated by the fact that the body loses large amounts of calcium every day, and this loss is greater during sickness, especially in fever or when one is worried, over-worked or has taken too strenuous exercise.

Outstanding nutritionists un- unanimously agree that the American diet is more deficient in calcium than in any other element. And it is squarely up to the mothers and homemakers to correct this tragic state of affairs, which is undermining their own efficiency and threatening the present health and future happiness of their children.

How to Obtain Calcium

Milk is an outstanding source of calcium. That is why it should form the cornerstone of every balanced diet. Cheese, which is milk in concentrated form, is likewise notable in this respect, and one and one-fourth ounces of American Cheddar cheese are the approximate equivalent of an eight-ounce glass of milk. Leaf and stem vegetables are richer in calcium than other vegetables or fruits, but while their calcium has been found to be well-absorbed by adults, it is not so readily available to children.

Among the vegetables, however, there is a wide variation, turnip tops and dandelion greens providing unusually large amounts.

List of Calcium-Rich Foods

I have prepared a list of foods rich in calcium which I shall gladly send to homemakers upon request. I urge every woman to write for this list and use it in planning the daily diet of herself, her husband and children.

You really need such a list in order to avoid the grave consequences of calcium deficiency, for so many of our common foods are calcium poor that it is possible for a diet to be abundant and varied, and still be inadequate in respect to calcium.

The list of calcium-containing foods will help you do a perfect job of building strong, fine bodies for your children.

There is no joy like the joy of creating perfect, healthy children. The architect and the sculptor stand in awe before the realization of their dreams. But you, the mothers of children, the builders of their bodies, you are the mightiest of all. A diet adequate in calcium, for you and your children, will help you build beautifully, wisely and well. Your reward will be the joy, the pride, the heart-warming satisfaction of having accomplished a worthwhile purpose.

Questions Answered

Mrs. F. R. T.—There is no such thing as a specific brain food, but nutritionists are convinced that the quality and efficiency of the functioning of the mind depends partially on the character of the food consumed. Mental efficiency appears to be influenced by the quantity and quality of the protein in the diet, and it has been demonstrated that the vegetable proteins, including cheese, milk and eggs are superior in biological value.

C. J. K.—It is a fallacy to assume that garlic is a blood purifier. Garlic improves the taste of food for those who like it, but it cannot be considered to possess special health properties.

It contains NO GRIT, NO PUMICE, NO DRUGS! Try it... today.

SEEN and HEARD

Around the NATIONAL CAPITAL Carter Field

WASHINGTON—The army engineers have certainly made it tough for David E. Lilienthal in that task which has been set for him as head of the TVA as he enters on his duties today. It would be so had it not been for the fact that the army engineers didn't have so much strength as they once had. It was just demonstrated that again when President Roosevelt's reorganization bill, giving the TVA a separate status, was passed. The bill, which is now in the hands of the Senate, would give the TVA a separate status, with the functions and powers of the army engineers. And even if the army engineers didn't have so much strength, it wouldn't be so tough on Lilienthal if it weren't for the fact that the TVA is a big job.

In the case of TVA the army engineers figured that navigation of the Tennessee river could be provided for a cost of \$74,700,000. But when they went into the field to do the job, they found that the cost of navigation alone would be \$174,000,000. The TVA's proposed navigation and flood control program would cost \$1,740,000,000. The TVA's proposed navigation and flood control program would cost \$1,740,000,000.

On the unwarranted basis of the TVA estimates, Mr. Mead estimated that the cost of power at about 11 mills per kilowatt hour. On a more reasonable basis of cost of the plants and of the power that would be sold, the probable cost will be from 5 to 7 mills per kilowatt hour. Steam power can certainly be generated in the Tennessee valley for not to exceed 4 mills per kilowatt hour.

Actually, right in Washington, the electric company, using low cost coal, produces current at the switchboard for 3 mills. And the company pays not only bond interest but good dividends, which will be a heavy tax bill paid to the federal government, both direct and indirect, on the personal income returns of its security holders.

All of which tends to answer a question which even Senator Norris has begun to worry about: Why the TVA, since 1933, in making allocations of TVA costs as between navigation and flood control?

when election the voters would vote for the Republican nominee for governor, Phillips Lee Goussborough. Goussborough was elected, the second Republican governor since the Civil war. Lloyd Fountain having been the first.

Smith Gets Nervous

After that Blair Lee came to the senate, but he still harbored for the government. So he tried again, and John Walter Smith had to strain himself a little to keep Lee down. This began to get on Smith's nerves.

So when Lee came up for re-election as senator, in 1936, John Walter looked round for somebody to beat him. At the time, Smith was generally regarded as the most conservative Democrat in the state, and Representative Lewis was the most radical. So Smith backed Lewis against Lee.

Lewis won the nomination, thus getting Lee to get out of the senate. The Lee Democrats were mad, and the Smith Democrats lost interest after they had disposed of Lee. The Republicans had nominated Dr. Joseph C. France, at that time in the state senate. He was comparatively unknown. In fact it has often been said that thousands of men voted for him without knowing who he was, or caring. They were voting against Lewis.

Bar Berry's Path

A city boss who can deliver a majority of 80,000 in a Democratic primary for any candidate he chooses—even if he delays his decision until the day before election—has been a United States senator who has been doing favors for voters up and down his state for 26 years, stand in the way of the continuance of Senator George L. Berry of Tennessee in the upper house.

The city boss is Ed Crump of Memphis. The senator is Kenneth McKellar. They have decided that Tom Steward shall be the "other senator" from Tennessee. There are other candidates besides Berry and Steward. One is Ridley Mitchell of Cookeville, who, some think, will get more votes than Berry. Another is E. W. Carmack of Murfreesboro, son of the famous senator. There are also Dr. John R. Neal of Knoxville and C. L. Powell of Sumner county.

But Crump and McKellar seldom lose a fight when they are together. Actually the most important phase, to them, is the governorship and not the senatorship. Two years ago they backed the present governor, Gordon Browning, and he handily McKellar was for another candidate at first, but yielded to Crump. What disturbed McKellar is that he always looks a long way ahead. He knew that if Browning should serve two terms as governor, and make a lot of friends, he might be a strong opponent in 1940, when McKellar comes up for re-election.

It's Politics

Governor Browning, although supported two years ago by Crump, apparently did not trust him. At any rate he proposed a "county unit" system of nominations and forced it through the legislature. This would have crippled Crump's power in state-wide primaries, for it would have reduced Shelby county (Memphis) to a few votes of the electoral variety, somewhat similar to the Georgia plan. To make Crump all the madder, the bill which Browning forced through would have placed a maximum on the number of votes in each county. This would have strengthened the smaller counties, cut down the power not only of Memphis, but of Nashville, Chattanooga and Knoxville.

Unfortunately for Browning, this proposed law was knocked out of the courts, which held that the law disfranchised voters, so that Crump's ire was aroused without his claws being cut.

Browning had appointed Berry to the senate after the death of Nathan Bachman, though Crump was for another man. The understanding in Washington is that Browning did this at the urgent solicitation of President Roosevelt, who wanted a sure New Deal vote in the upper house. In Tennessee they say Charles West convinced Browning of this and that Roosevelt had no part in it. In fact, in Tennessee the story is told that this is really what happened to West—Roosevelt stood by and let Harold L. Ickes kick him around.

Floyd Gibbons' ADVENTURERS' CLUB

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF

"Dangerous Crossing"

By FLOYD GIBBONS
Famous Headline Hunter

HELLO EVERYBODY!

Here's a yarn from Claire Gibson of Chicago about an adventure that took place in Springfield, Ill. Claire was just a little girl when she had that adventure. It was the first one of her life, and for thrills and plain out-and-out terror nothing that has happened to her since could ever even approach it.

It was a hot day in the early summer of 1910. Claire had an invitation to a party that was being given at a house some distance away from her home and she was all dressed and ready to go.

It must have been somewhere between seven and eight in the evening, because Claire remembers that the party started at eight. She left her home, walked two blocks to the trolley line, and waited for a car to come along. When it arrived, she got on and took a seat up near the end of the car.

The car moved on, and, after a few blocks, an old lady boarded it and took a seat near the middle. More people got on after that. It was pretty well filled by the time it reached Fifth and Butler streets and started to cross the railroad tracks.

Claire was up in front of the car, and she saw something that happened. That crossing they were coming to was a dangerous one, and it seemed to her that all necessary care was being taken to see that the car got over it safely. The conductor got out and ran about to make sure there were no trains coming.

Freight Engine Smashed the Trolley.

Apparently satisfied, he motioned to the motorman to come ahead, and swung back about the moving trolley. And, then something went wrong. The trolley was moving across the tracks—was right in the middle of them—when suddenly a freight train appeared out of nowhere, looming up in the night not three yards away from the car!

There was no time to avoid it—no time to do anything. Some one in the car screamed. Then there was a terrific jar—a crashing of glass and a terrific grinding sound. The big engine was tearing and tipping the trolley like a top.

The air was full of shouts and screams now. Bodies were flying everywhere. At the first impact, Claire had been tossed into the air and

Claire Was Thrown Through a Window.

thrown bodily through a window, shattering the glass as she went. She landed in a sitting position on the ground, 30 or 40 feet from the car tracks. The car, carried along by the train, was right beside her. Claire got to her feet. Kid-like, she never gave a thought to the possibility that she might be hurt. And as a matter of fact she was not stunned and dazed by the accident that she didn't notice such things. "I was only about half-conscious of what was going on," she says. "I didn't even realize that I had been in a train wreck."

Climbed Over Bodies of the Dead.

As soon as she got to her feet, she thought of the old woman who had boarded the car just after she had. Back through the window of the wrecked car she climbed, in search of that old lady.

"I climbed over bodies," she says, "until I found her. She was unconscious but I dragged her out of the window and laid her on a nearby lawn. I screamed for help, but to me paid any attention is not."

"Then I ran to the wrecked engine and climbed to the cab to get the engineer."

But the engineer wasn't in the cab. Claire found him lying outside on the tracks—dead.

By this time she was beginning to realize that she was hurt. She was covered with blood and her clothing was nearly all torn from her body. There was a deep cut on her wrist that was bleeding badly. But still she carried on. She climbed back into the wrecked trolley.

"I found another woman," she says, "lying on her back and begging for help. I managed to lift her a little and, as I did, I recognized her as one of our neighbors. I dragged her out through the window and laid her on the lawn beside the old lady, but she died a short time afterward."

Claire Herself Was Badly Hurt.

But by that time help had arrived. The ambulances, the fire department, and the police had all been summoned, and now they were reaching the scene of the accident. Hundreds of people were gathering, trying to lend a hand.

By this time, too, Claire's head was beginning to clear and she was sick at heart at the horrible sights she had seen. With the blood still streaming from her, she began to run home, too excited to realize that she was badly injured.

She reached home all but exhausted—ready to collapse. Her wrist was cut to the bone, and there were splinters of glass in her face, and her back was strained from lifting people out through the window of that wrecked car. She was so weak from loss of blood that she staggered as she entered her house.

Her folks called a doctor and put her to bed. And it was the next day before she read in the newspapers the cause of the accident.

The conductor had looked for the train all right. He just hadn't been able to see it. It was dark, and in addition to that a thick fog had fallen over the city, obscuring the view. The freight's headlamp had gone out, and the watchman at the crossing had gone home just a short while before.

All that was a long time ago. Claire has never forgotten the horrible sights she saw that night, but she doesn't regret that adventure either.

"I'm glad," she says, "that I was able to be there and do a little to help those who were more badly hurt than I was."

Hands Denote Beauty

According to old Moslem law, before buying a wife the Moslem is entitled to see her face and hands, for the hands of women are reputed to give an idea of her personal beauty.

Fleas Live on Others

There are over 100 different kinds of fleas, including rare and common ones, and none of them is able to look out for itself. It must always live on the blood of some bird or animal.

Bird Decorates Nest

The garden bird of New Guinea builds little huts of sticks with an enclosed garden outside, which it decorates with moss and picked flowers, the latter being renewed as they wither.

"Shades of Death" New Park

One of the first discovered spots of rugged stone beauty in Indiana's foothills, was the "Shades of Death," which has become more popularly known through the state as the Shades park.

HOW TO SEW

By Ruth Weyth Spears

Make a Pattern for a Slip Cover

THE most economical way to cut a slip cover is to make a pattern first. Do this before you buy the material, then fold several bed sheets the width of the fabric you wish to buy, and lay the pattern pieces on them to estimate the amount of goods needed.

Some of the pattern pieces may be made of paper, though unbleached muslin is better for parts that must be fitted. Allow 1/2 inch on all seam lines to insure an easy fit, and 3 inches for a tuck-in all around the spring seat as shown here at A. Cut the sections with straight edges, then pin them in place and shape them to follow the lines of the chair as at B. Also mark each pattern piece with an arrow, as shown, to indicate which way the grain of the goods should run. The lower stretch shows the pattern pieces pinned on the slip cover material. Brush fringe accents the main lines of this slip cover. The top of the fringe is stitched in place at the same time the seams are sewn.

Glass Train

With the exception of the roof, the exterior of a train made in England is all of glass and more than 200,000 pieces of a special type were used to construct it. In the interior are glass floors and walls, a glass bathroom and picture frame of glass. The train was constructed by a Lancashire (England) firm of glassmakers to advertise its products.

ASK ME ANOTHER?

A Quiz With Answers Offering Information on Various Subjects

- ### The Questions
1. Who was the first President to speak over the radio?

IF YOU want to save 25% on tires, stop in and see the new Firestone Convoy Tire — the value sensation of 1938. You will find it has everything you want — safety, mileage, blowout protection, new design, new smart appearance — all at a remarkably new low price. And when you see it you will agree that Firestone has again set a new all time high in tire value with these outstanding features.

New High Quality—First choice rubber and cotton selected that conforms to Firestone's high standards and rigid specifications.

Long Mileage— Safe, silent tread design made of tough, slow wearing rubber that assures long mileage. Sturdy bars and rugged notches give protection against skidding.

Blowout Protection—Nine extra pounds of rubber are added to every 100 pounds of cord by the Firestone Patented Gum-Dipping process. Every cord in every ply is saturated with liquid rubber which counteracts internal friction and heat that ordinarily cause blowouts.

PUNCTURE PROTECTION— Firestone's patented construction of two extra layers of Gum-dipped cords under the tread protects against punctures.

NEW LOW PRICES— because Firestone saves money by controlling rubber and cotton at the source, and by more efficient methods of manufacturing and distribution. These savings make possible the extra values at these new low prices!

DON'T MISS THIS opportunity to save money. Let us put a set of the new large size, rugged, long wearing Firestone Convoy Tires on your car today, then your car will be ready for trouble-free summer driving g a richardson.
