## AGGIE BRIEFS

By Finley R. White

**GONE WITH THE WIND!**

### WORK STARTED ON SODDING GRIDIRON

Water lines have been extended to the Silverton football field here and work is under way for the sodding of the field. The F. F. A. boys, under the direction of Lem Weaver, are doing the work and expect to have the field well grassed over with Bermuda grass by the opening of the 1938 season. The cost of sodding will be something over \$65 according to Mr. L. Kelsay, superintendent. Mr. Kelsay has also been working on a project of lighting the field for night play. Plans and costs will be given him some time this week by a Westinghouse engineer. The estimated cost of lighting the field has been lowered approximately 50 percent from those given last year and it may be that we can see the boys play under lights this fall. It will make it possible for many folks to attend the games who are unable to get away during the afternoon.

### TI DADS TRYING TO LOCATE CLOSER CALICHE

Engineers George A. Linder and Bradley of Amarillo were in Silverton Friday in a preliminary examination of Silverton streets, as a first step toward hard sodding several of the business blocks. The engineers figured that it would take approximately 23,000 yards of caliche to pave five blocks—from Highway 86, south to the Silverton Hotel; and from the Methodist Church east to the Wilson Lumber Company. The largest expense will be the truck hire for transporting the caliche. The closest pit is now about six miles, where the caliche is not too usable condition. The best grade of caliche is found at the cap rock, but that is too far to haul for economy. Linder and Bradley recommended that an attempt be made at once to locate a closer supply of the caliche. Bailey Childers is working now with some kind of a drill, trying to find a workable supply of the rock-like base. If such supply is found close to Silverton, the proper estimate of the cost of paving can be made. PWA labor will be used and cash payment can be obtained from PWA. It is thought by city authorities, they have announced that they are ready to go ahead with the work, with the condition that property owners along the streets are willing to go their share. J. E. Hayward, city secretary, expects to contact these owners in the immediate future.

### TO THE VOTERS OF JUSTICE PRECINCT NO. 1

I take this means of announcing my candidacy for the office of Justice of the Peace for Precinct No. 1. I have lived in this county for many years and have held the office of Justice of the Peace here and in other counties and feel that my experience that I am qualified to discharge the duties of the office. If elected to this office, I will administer the affairs of the office without fear or favor. I will do my best to see each voter personally, but if I fail to see you I want you to consider this a solicitation for your vote and influence on my behalf. Respectfully submitted, J. N. MORTON

### LUMP-SUM PAYMENTS

The Social Security Board is now making lump-sum payments to wage earners in covered employments who have reached the age of 65, or to the estates or relatives of such workers who died before that age. The amount in each case represents 3 1/2 percent of total wages, as defined in the Social Security Act, received by each worker after 1936, and before he reaches age 65 or dies. Applications for these lump sums should be directed to the Social Security Board, 1012 Oliver-Eagle Building, Amarillo, Texas.

## Strickland-Trimmm Marriage Rites

### WILSON MOVES PRODUCE HOUSE TO NEW PLACE

Barney Wilson, manager of the Swisher Creamery, has moved his business to the building vacated last week by Manley Wood, south of the Bomar Drug.

In addition to buying farm produce, Wilson has added a full line of feeds, seeds, flour, fresh fruits, and many other staple articles. Wilson says that he will be adding to his stock in the future, and in an advertisement in this week's paper invites you to visit him in the new location.

### JONES TO BE HEARD OVER RADIO

Congressman Marvin Jones will deliver a series of four radio addresses over Station KGNC at Amarillo, beginning Monday, July 18, and continuing through Thursday, July 21. The time of the addresses will be from 7:00 p. m. to 7:15 p. m. each evening.

The addresses will cover topics of special interest to the Panhandle, including discussions of soil and water conservation, the farm program, and the credit structure.

### CARD OF THANKS

We wish to thank our many friends for their help and sympathy during Mrs. Newman's recent illness, and for the many cards and flowers she received while in the hospital. We are very grateful and will not forget your kindness.

Mr. and Mrs. W. H. Newman  
Kelton Newman

### HEALTH NOTES

Dr. Geo. W. Cox, State Health Officer, estimates that the State of Texas suffers an economic loss of one-half million dollars annually from typhoid fever, a preventable disease.

Last year 3.8 Texans died of typhoid and approximately 4,000 were ill with the disease. The average duration of the illness is from six weeks to eight weeks plus a convalescent period of about six weeks. This means that typhoid is responsible for the loss of approximately 200,000 work days each year in Texas, with the attendant loss of income over a several months period.

Early fall and late summer each year sees a tremendous increase in the prevalence of typhoid in Texas, due to vacation travel and the hazards brought to the local population by itinerant labor.

Typhoid is particularly prevalent in those sections where there is seasonal employment bringing into the area great numbers of laborers who live in tents, shacks and trailers without adequate sanitation.

The local communities have the problem of dealing with this shifting population put squarely on their own shoulders. Insofar as is feasible, the itinerant population should be immunized against typhoid and should be made to conform with sanitary regulations (particularly with regard to disposal of waste) as a protective measure to the permanent community population.

Typhoid fever can be controlled by the use of pure water, pasteurized milk or clean milk, clean foods, proper disposal of sewage, screening against the fly and destroying its breeding places, by search for and care of human carriers, and by general practice of immunization.

In selecting a place for a vacation, choose one where you know that the water and milk supply is pure. Be sure that the kitchen and dining room are seasoned to protect the food from flies. When camping it is best to boil water used for drinking, unless you know that it is pure. Clear, sparkling spring water is often nevertheless polluted.

### On Vacation

Mr. and Mrs. Durward Brown and Mr. and Mrs. Bob Hill left on Wednesday for the Colorado vacation spots. They expect to be gone about two weeks.

### Young Couple To Make Home In Old Hickory, Tennessee

Miss Mayvis Strickland, the attractive and accomplished daughter of Mr. and Mrs. C. M. Strickland, became the bride of Mr. Leo C. Trimm of Old Hickory, Tenn., the home of the bride's parents on last Sunday at 3 p. m. in the presence of a few close friends and relatives.

The nuptial vows were read by Rev. Peacock as the couple and their attendants stood before an improvised altar of colorful spring flowers and greenery.

Preceding the ceremony, Aline and Pauline Peacock sang "I Love You Truly" accompanied at the piano by Gaynelle Douglas, who also played the bridal chorus from Lohengrin. As the beautiful words of the marriage rites were spoken, Souvenir was played softly.

The couple was attended by Miss Jimmie Baily of Levelland, who wore a pale green taffeta floor length dress and a corsage of sweet peas; and Hugh Ayers of Floydada. The bride was beautiful in a white organza dress over taffeta with floor length skirt and high neckline and carried a bouquet of salmon pink gladioli.

After the ceremony the bride changed to a powder blue suit-tailored dress with white accessories.

The bride finished High School here in 1932 and received here degree from Texas Tech in 1936. She taught Home Economics in Bovina the past year. The groom also received his degree in Textile Engineering from Texas Tech in 1936 and since has been employed in the Rayon division of E. T. du Pont de Nemours Co. in Old Hickory Tenn. where the couple will make their home.

Out of town people who attended the wedding were: Mrs. C. T. Trimm, mother of the groom, of Berlen, N. M.; and Wade Baily of Levelland.

The couple left immediately following the ceremony and returned here Tuesday for their final departure for their home in Old Hickory.

### EXAMINATIONS ANNOUNCED BY CIVIL SERVICE

The United States Civil Service Commission has announced open competitive examinations for the positions listed below.

For the first three positions listed, applicants must be on file with the Civil Service Commission, Washington, D. C., not later than August 8, if received from States east of Colorado, and not later than August 11, if received from Colorado and States westward.

Social Worker (Psychiatric) \$2,000 a year, Veterans' Administration.

Home Extension Agent, \$2,600 a year, Junior Home Extension Agent, \$1,800 a year, Indian Field Service, Department of the Interior.

Home Economist, \$3,800 a year, Associate Home Economist, \$3,200 a year, Bureau of Home Economist, Department of Agriculture. Optional subjects are food economics and family economics.

Junior Blueprint Operator, Junior Photostat Operator, \$1,440 a year; Under Blueprint Operator, Under Photostat Operator, \$1,260 a year. Closing dates: August 1, for applications received from States east of Colorado, and August 4, 1938, for applications received from Colorado and States westward.

Full information may be obtained from the Secretary of the United States Civil Service Board of Examiners, at the post office or customhouse in any city which has a post office of the first or second class, or from the United States Civil Service Commission, Washington, D. C.

### LOCALS

Mr. and Mrs. Alton Chapman and son of Spur were in Silverton Tuesday on business.

Mrs. Dick Cowart was ill and confined to her bed Wednesday of this week. She was improving Thursday morning.

### CANDIDATE

WINFRED F. NEWSOME who is now serving as County Attorney of Floyd County, is asking for the office of District Attorney and solicits your support in his campaign. (pol. adv.)

### FRIENDLY HEART

Most of us agree with Ulysses, that hero of ancient Greek literature, when he says, "I am a part of all that I have met". Our personality becomes strangely intermingled with the personality of others, so that it is safe to say that no one is quite the same after meeting us and we too are influenced and changed by the impact of others on us. We are a blend of our own sentiments plus those which have been called out by our friends, and they in turn carry away with them a part of us. The truest portrait of anyone is that which has been etched on the hearts of those who have known him. That is the reason why we are often surprised at the true dimensions of a man after he has died. We thought him obscure and unimportant and lo: a score or more of his friends bear witness to his greatness, because of what he wrought out in them through friendship. This will be the thought in the Presbyterian Church next Sunday morning. Vespers at 7:00 o'clock p. m.

### COST OF A HOME

The reason it costs no less today than before 1929 in many localities to build a house is that, while cost of materials has declined slightly, wage rates and taxes have increased. A recent analysis reveals that a frame house in Chicago built in 1926 for \$5,000 would cost \$5,379 today. Labor's share is estimated at \$2,204 today compared with \$1,878 twelve years ago. Taxes for workmen's compensation and social security, and sales taxes have jumped to \$347 in contrast with a tax load of only \$65.50 in 1926. Two of these hidden taxes, the sales levy and the social security tax, did not exist in 1926.

## Around the World In 86 Hrs., 51 Min.

### COY CHAPPELL SEVERELY BURNED

Coy Chappell received severe burns Monday which came as a result of a gasoline explosion. He was driving the Farmers Fuel pick-up on a delivery across the Tule Canyon. He ran out of gasoline and when ready to start again, had to prime the carburetor. The heat from the engine caused an explosion which burned his face and hands badly.

Leon Martin happened by just as the accident happened and rushed Chappell to the doctor where his burns received quick attention. Coy had his face almost completely bandaged and looked somewhat like the proverbial Egyptian mummy.

### 4-H CLUB HOLDS PAYING BOX SUPPER

The Antelope Flat 4-H Club gave a pie supper on June 28 from which they made \$87.00, which is to finance a camping trip in August. All the candidates were invited and they all participated in it freely. The 4-H club members appreciate their cooperation very much and all others who helped.

The 4-H club members, when they met July 8, discussed where they would like to go. The have decided to go somewhere in Northern New Mexico, but have not decided what place they will go.

### CROP INSURANCE DEADLINES

Time limits with respect to when applications may be made for insurance on the 1939 winter wheat crop have been set by the Federal Crop Insurance Corp.

Three time limits have been announced for different regions, two in August and one in October.

Growers who fail to make application prior to these deadlines will not be granted policies, the AAA said.

August 15 is the limit for Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, South Dakota, Nebraska, North Dakota, and Kansas.

August 30 is the last day for Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming, Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Oklahoma, S. Carolina and TEXAS.

October 30 is the last day for California and Arizona.

All warehouses licensed under the Federal Warehouse Act to handle grain will be acceptable as 'storage warehouses' for wheat reserves to be accumulated by the corporation.

### Howard Hughes, Former Texan, Halves Old Record

THURSDAY NEWS FLASH—Howard Hughes landed at Floyd Bennett Field in New York today at 2:37 P. M. (EST) after a record breaking flight around the world which he made in less than half the time of the former record holder, the late Wiley Post.

He was gone from New York 86 hours and 51 minutes and his average speed for the entire flight was 205.1 miles per hour. The first lap of the flight, from New York to Paris was made in slightly over 16 hours compared to Lindbergh's time of 33 hours.

The record breaking trip was made exactly as planned, with no unwarranted excitement although the last lap was made from Fairbanks, Alaska to Minneapolis during bad storms and poor flying conditions.

Hughes is a native born Texan, a multi-millionaire sportsman, has dabbled in movie production, and is reputed to be the boy friend of Katharyn Hepburn, famous movie actress.

With the 32-year-old Hughes on his epochal flight were a crew of four, Richard Stoddard, Thomas L. Thurlaw, Harry P. Conner, and Edward Lund.

### Miller Withdraws

Clarence R. Miller today announced that he was no longer a candidate for Governor of Texas, and says that he will throw his support to the Panhandle candidate, Ernest Thompson.

### No Olympic Games

Because of the Chinese-Japanese war, plans were abandoned today for holding the 1938 Olympic games in Japan.

### Weather

Silverton received less than .02 inches of rainfall last night. Forecast for the Panhandle: Partly cloudy and warmer tonight and Friday.

### Accident

A horse threw Barney Stephens Saturday, breaking his shoulder collar bone. He was rushed to the Plainview Sanitarium where he was given immediate treatment.

### MARTIN RECOMMENDS RICHARD CRITZ FOR SUPREME COURT

To my friends in Briscoe County: Judge Richard Critz of Williamson County is asking for re-election for his first full term to the Supreme Court. He was appointed a little over two years ago upon the death of Judge Pierson. I have known Judge Critz intimately for more than ten years and have served with him for the past year. He is one of the best men and judges I have ever known. According to the Democratic custom he is entitled to re-election if he has made good, and I would appreciate all my friends voting for him.

(Signed) A. B. Martin  
15-2tp Pol. adv.

### PAPER PROFITS

A novel of Wall Street by Author Train

This novel of Wall Street, of the hysteria for speculation, for getting something for nothing, that has engulfed our country for years is a timely book. The author asks: "What has this persistent and obsessing preoccupation for money, money done for the spirit of the country, to the souls of its men and women. (Yes, even its children)?" Whether Wall Street means anything to you or not, you will want to read this absorbing story of American life.

### GUERNSEY BULL IS SOLD TO JOHNSON

A purebred Guernsey bull, Opheelia's Sampson of Briscoe 259361, was sold recently by A. B. Buchanan of Silverton, Texas to J. A. Johnson of Quitaque, Texas according to the American Guernsey Cattle Club, Peterborough, New Hampshire.

## News Bits

From Neighboring Towns

**Application for Dormitory**  
Application has been filed with PWA for another men's dormitory on the campus of W. T. S. T. C., according to the Canyon News. The proposed dormitory will cost \$100,000 and is expected to be approved by PWA within a short time.

### Burned by Gasoline

Bob Gurley, son of Mr. and Mrs. J. E. Gurley, of east of Happy, was painfully burned last week by an explosion of gasoline. The Happy Herald explains: "As the gas tank on a tractor was being filled, gasoline came in contact with heated parts of the tractor, which caused the explosion and set fire to Bob's clothing. His burns were cared for at the Tulia Hospital."

### To Deepen Oil Well

The wildcat oil well west of Turkey will be deepened to a depth of 4,000 feet. Lease extensions have been secured and the drilling will be resumed in a few days, says last week's issue of the Turkey Enterprise.

### Two Big Celebrations

July 15 and 16 are the dates of annual celebrations in our neighboring cities of Tulia and Lockney. From the Tulia Herald and the Lockney Beacon we find that big doings are on in each town. Lockney's celebration was formerly set for July 1 and 2, but was postponed because of wheat harvest.

### McLean Youth Killed

Gene Wells, 17 year old football player of McLean, was crushed to death last Sunday a week ago, when the pickup on which he was riding collided with a horse. Young Wells and his brother Dale were riding on the front fenders when the accident occurred. Dale is in a hospital in a critical condition, according to the Miami Chief.

### GOFF'S COMEDIANS TO SHOW HERE THE 21ST

With new low prices of 10c and 15c, Goff's Comedians will come to Silverton Thursday, July 21st with their big tent show. They will be showing plays that will please you, with a good vaudeville between acts.

There is Betty Lou Evans, singer and dancer; Malcolm Rheinhardt, with his electric guitar; Madelyn, with the south's finest accordion; with Senor Duffee at the piano. And back of it all is Goofy Goff, the All American half wit. The show will play Silverton three nights.

### Many See President

Charles and Tom Dunn, Alton Strickland, Mr. and Mrs. Maurice Foust, Mr. and Mrs. Jim Baird, Mrs. Ruth Cline, Sadie Summers, Mrs. Dutch Tidwell, Mrs. Dobbs, Mr. and Mrs. A. A. Boling and family, Mr. and Mrs. Fulton Gregg, Mr. R. E. Douglas, Gaynelle and Rex, Mr. and Mrs. John Lee Francis and family, Mr. and Mrs. M. J. O'Neil and family and several other Silverton folks saw the President in Amarillo Monday.

### AMARILLO NEWS LAUDS EDWIN CRASS'S CATTLE

From Wednesday's issue of the Amarillo News we quote the following: Edwin Crass, Briscoe County proved an ordinary herd of cows could be turned into a profitable herd if handled properly. Crass purchased a herd of five poor, rundown cows from a local trader. He bought only animals that showed good points, of course, and fed grain heavily. The herd went unimproved and Crass practiced regular milking hours. Individual stanchions and feeding troughs were kept religiously on each cow. At the end of the month profits showed more than 100 percent increase, or a total profit of 36.95. Crass' ration was 300 pounds of ground milo heads, 100 pounds of ground milo heads, 100 pounds of bran, 100 pounds of cottonseed meal, 5 pounds of salt and 5 pounds of ground limestone.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK—Several years before Romain Rolland finished "Jean Christophe," Leo Tolstol called him the warden of the conscience of Europe.

Rolland Comes Home To Die

In his quarter-century exile in Switzerland, he has remained "above the battle," warning of war, decrying hatred, pleading for peace and understanding. His has been a voice crying in the wilderness. His exile ended, he returns to France, "an old man, broken and despairing," as the news dispatches report.

The greatest novel of a century, possibly of many centuries, "Jean Christophe" has been called by great critics and multitudes of lesser lights. It was published in 1913. This writer has found few young persons, even those majoring in literature, who have read it.

He has found others who have never heard of Romain Rolland, the Nobel peace prize winner exiled from his country, while Carl von Ossietzky, German Nobel peace prize winner, was impoverished, jailed and harried to his death in the same "years between."

But another, even greater teacher, looking sadly down on the multitude from a hill in Jerusalem, was also unheeded: "How often would I have gathered thy children together, even as a hen gathereth her chickens under her wings, and ye would not!"

Teachings Will Be Remembered

When he was exiled from France, vast sums of money were offered him if he would go to America, to write and lecture. Publicity, or any form of self-exploitation, is to him profoundly distasteful. He withdrew to a secluded villa near Zurich, Switzerland.

He Knew Righteous Can Be Cruel

There is one definite attitude in all these post-war writings. He had no faith in "movements," in "ideologies," right or left. He repulsed Henri Barbusse, his clarte group and the various "united fronts," as he did the emissaries of bloody reaction from the right. He knew that the righteous can be as cruel as the wicked, once they find reliance on force.

Like the great German Fichte, whom he esteemed, he believed only in the "inner light"—never in organization or force. But he was not a "politicalagnostic." He fought, and suffered, to arouse the world conscience, as the dying Tolstol had enjoined him.

He is a tall, spare, pallid old man, with thinning hair and sad, deep-set eyes as he returns to France at the age of seventy-two. Educated in music, at the Ecole Normale, he became a devotee of Wagner, whose genius inspired his life—then of Tolstol and Shakespeare. He has written many times in the last few years that he sees little hope that the world will escape a last devastating war.

Sir John Beaten in Radio Duel

IT WAS reported that Sir John Reith, director general of the British Broadcasting corporation, was badly licked in that international Arabic crooning contest a while back. Virtually all observers gave the decision to Italy. If so, it probably was the only time he ever lost a contest.

The tall, bald, grim Scotsman is upped to the job of running the Imperial Airways, as a civil arm of rearmament, with a sizeable hike in salary. It is now \$50,000 a year, instead of \$35,000.

He is an engineer, and in 1916 was here with 600 technicians checking on war material contracts. He didn't like America or Americans but eased up on us later on. Running British radio, he has been exalted as a tyrant, but he has held to his line and confounded all his adversaries. His views on radio programs were outlined by him as follows: "To set out to give the public what it wants, as the saying is, is a dangerous and fallacious policy."

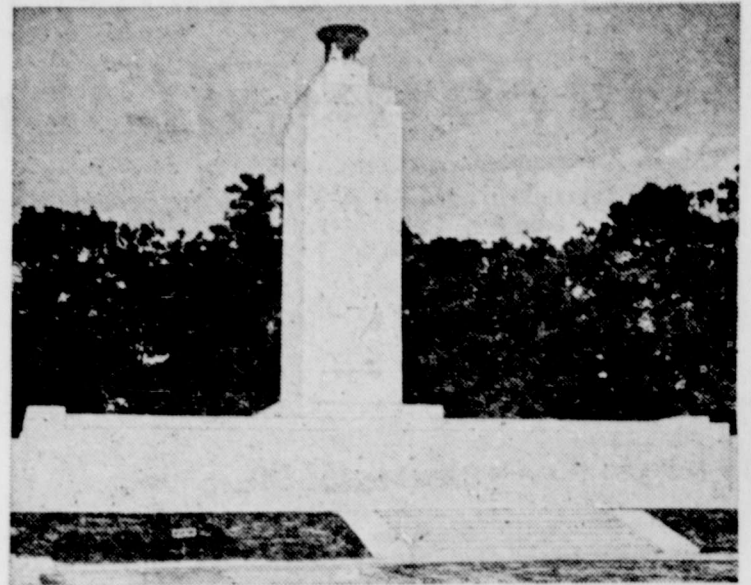

Consolidated News Features, WNU Service.

Wordsworthshire

The English Lake district is the most region of England, a region of square miles, which because of its association with the poet, is called Wordsworthshire.

BLUE AND GRAY MEET veterans of Gettysburg Celebrate Together on Field of the Crucial Civil War Battle

Here is the new Peace Memorial in the Gettysburg National Military Park which was dedicated by President Roosevelt during the celebration of the 75th anniversary of the Battle of Gettysburg, in which veterans of the Northern and Southern armies participated. On the top of the shaft burns "The Flame of Eternal Peace."

Edward W. Pickard SUMMARIZES THE WORLD'S WEEK

Yanks and Johnny Rebs

SEVENTY-FIVE years after they faced each other in deadly conflict, some 2,000 old soldiers gathered in friendly concert to celebrate the great Battle of Gettysburg. The Stars and Stripes and the Stars and Bars flew side by side on the once bloody field, and the veterans of the Northern and Southern armies that fought there in one of history's biggest battles wandered together over the hills and meadows or sat in their tented city, exchanging reminiscences and renewing old friendships.

The war department had done everything possible to make the now feeble old warriors comfortable and safe, and the Pennsylvania National Guard and Boy Scouts attended carefully to their every want. There were feasts, parades, and military displays in plenty, but the veterans were not called on to do the entertaining. They were the entertained.

In the Gettysburg National Military Park, comprising the battlefield, had been erected a beautiful peace memorial, and President Roosevelt was there to dedicate it on the afternoon of July 3. At the top of the monument's shaft is a burner for natural gas that supplies "The Flame of Eternal Peace." This was kindled by the President as the climax of the day's celebration.

There were no re-enactments of battle scenes. The observance was all of peace, and peace and harmony of all the land breathed all through the talks made by Mr. Roosevelt and other speakers. From a common platform Commander-in-Chief Overton H. Mennet of the Grand Army of the Republic and Commander-in-Chief John M. Claypool of the United Confederate Veterans spoke to their comrades.

Politics in Relief

CHAIRMAN SHEPPARD of the senate campaign funds committee put it up to the members of that body whether

Harry Hopkins

In a statement accompanied by exhaustive documentary evidence, Hopkins challenged 22 charges that his agency has subjected WPA workers to political pressure. He said the facts do not substantiate the charges, but reiterated his promises of summary and stringent action in all cases where political coercion could be proved.

"Every charge in which a WPA worker or official was named has been thoroughly investigated and documentary evidence conclusively establishes that out of more than a score of cases in which political activity was alleged, only two instances of improper conduct could be found," he said.

Hopkins' statement referred to a series of articles on the Kentucky senatorial primary fight between Alben W. Barkley, senate majority leader, and Gov. A. B. ("Happy") Chandler. The articles enumerated specific instances where, it was asserted, political pressure was being exerted on relief workers in behalf of Barkley.

Real Drive on Depression

WITH the start of the new fiscal year the administration began what the President calls "the real drive on depression." In the coming fiscal year relief agencies, army and navy, public works departments

and federal lending corporations may pour out approximately \$8,500,000,000. Some of this money is returnable to the treasury.

Administration officials said this huge sum—equal to more than \$66 for every person in the nation—was needed because there are approximately 10,500,000 unemployed in the country. This estimate, furnished by a federal economist, was 4,500,000 higher than last October, when the recession's effect became visible.

Officials left little doubt they hope to get business positively on the up-grade by Labor day, although economists estimated it would take a year from the upturn to recover the ground lost since last summer.

Upholds Free Press

PRESIDENT ROOSEVELT delivered two speeches in New York, on the site of the world's fair that is being built. First he spoke at the laying of the cornerstone of the federal building at the exposition after dabbling in cement with a silver trowel.

Then the Chief Executive appeared before a convention of the National Education association, and declared that the mission of America is to carry the torch of free thought and free learning in a world in which dictators have smothered the fires of freedom.

He did not mention Nazi Germany or Fascist Italy by name, but he condemned in most positive language such purges as burned libraries, exiled scientists, artists, musicians, writers and teachers, dispersed universities and censored news, literature and art.

"If in other lands the press is censored," Mr. Roosevelt declared, "we must redouble our efforts here to keep it free. If in other lands the eternal truths of the past are threatened by intolerance, we must provide a safe place here for their perpetuation."

In his address to the teachers the President warmly defended the spending of his administration on the ground that the outlays of federal money had increased national and human resources.

"The only real capital of a nation is its natural resources and its human beings," he said. "So long as we take care of and make the most of both of them we shall survive as a strong nation, a successful nation, and a progressive nation—whether or not the bookkeepers say other kinds of budgets are from time to time out of balance."

"This capital structure—natural resources and human beings—has to be maintained at all times. The plant has to be kept up and new capital put in yearly to meet increasing needs. If we skimp on that capital, if we exhaust our national resources and weaken the capacity of our human beings, then we shall go the way of all weak nations."

Strike at New York Fair

MORE than 6,000 workers were affected by a general strike of construction men at the New York world's fair, called by the Building Trades and Construction council, an affiliate of the American Federation of Labor. All construction work was tied up except structural steel work. The strike was precipitated by a jurisdictional dispute.

Heads N. Y. Exchange

WILLIAM McCHESNEY MARTIN of a St. Louis brokerage firm and chairman of the New York Stock exchange since last May was elected president of the exchange at a salary of \$48,000 a year. His selection was the final step in the reorganization of the executive personnel of the exchange which was brought about through the insistence of the securities and exchange commission and the "liberal" group within the exchange membership.

SEEN and HEARD around the NATIONAL CAPITAL By Carter Field

WASHINGTON.—A new idea of the "yardstick" as applied to TVA, Bonneville and other government power projects is being discussed in New Deal circles, with the positive statement in some quarters that it is really what the President and David E. Lilienthal mean when they use the word.

First, let's consider what has been the popular conception—what congress thought it was when it was voting the money for TVA. Stated briefly, the idea was that it would be demonstrated what the price of electricity should be to small consumers—literally a yardstick to determine whether rates charged by privately owned utilities were fair.

This is the only explanation of the "yardstick" that has ever been publicly considered. It is the only one congress ever thought of. It was the average, intelligent, well-informed person thinks it is all about. And it may still be the correct answer.

But let's look at this new conception, advanced now by people in sympathy with New Deal objectives and particularly in sympathy with the government electric projects.

According to this theory, the whole purpose is to demonstrate to the country, and to the electric industry, that if power is produced in enormous quantities, and offered to ordinary consumers at very low rates, consumption will leap up to an unbelievable extent, and hence the reduction of rates would be the soundest thing, economically, that the electric companies could do.

Note in this connection that Lilienthal was actually attacked by Arthur E. Morgan for having used high pressure methods to induce people to use more electricity than Morgan thought they could afford.

Forced Prosperity

Note that Lilienthal has repeatedly insisted that the privately owned electric systems in TVA territory had literally had prosperity forced upon them by TVA competition—that is, by being forced to reduce their rates.

Note that in Bonneville what seemed to the electric industry a very bad policy, from the purely economic standpoint, was laid down. In this case the stream flow is such that there is an enormous quantity of constant power, that is, power which is available for 24 hours a day, and cannot be economically stored during the hours when the consumption might be low.

For this sort of situation, private power experts figured the most economical use would be to get industrial plants to locate near the switchboard, and particularly the type of plants which would operate in three shifts, thus using all the potential power.

But emphatically the government does not want this. It wanted wide distribution. It was to give the household consumers for hundreds of miles around the benefit of this cheap power. The answer, according to this new theory, is that if the rates were made low enough, the small consumers would use so much electricity that the whole operation would be profitable.

But also that it would be an outstanding object lesson to the utility executives of the country, showing them that there is gold in the hills if they will only mine for it with low rates.

Certainly, one New Dealer pointed out, Lilienthal must have been ignoring the old yardstick conception when he reported to congress recently on the allocations as to cost of the three first TVA dams as between power, navigation and flood control.

Marked for Slaughter

The latest development in the Maryland "purge" situation is that Senator George L. Radcliffe, who does not come up for re-election until 1940, is marked for the slaughter by the supporters of Representative David J. Lewis. What happened was that Radcliffe, after announcing some time back that he was for the renomination of Senator Millard E. Tydings, later accepted the post of campaign manager for his colleague.

This seems to have taken the Lewis people by surprise. In fact, they are indignant. They are saying that Radcliffe has now shown himself in his true colors, after having posed as a New Dealer since his election to the senate in 1934.

Actually it should not have surprised anyone. Again and again, while the Tommy Corcoran crowd was looking for somebody to run against Tydings, they would go to Radcliffe for advice. Always Radcliffe told them that he was for Tydings.

So while it may not have been figured in advance that he would take the chairmanship of Tydings' campaign, it should not have surprised the Lewis people that Radcliffe should be sitting in Tydings' corner.

Incidentally, the Lewis publicity indicates a rather amazing ignorance of the last few years in Maryland politics. One need only

go back to 1934 to figure that Radcliffe would be very unlikely to take any public step against Tydings.

The Case of Ritchie

At that time Governor Albert C. Ritchie was still alive and active. In fact, he was the undisputed boss of the Democratic party in Maryland. He was serving his fourth term as governor, and aspired to a fifth term, although no governor before that had ever succeeded in getting two terms.

Tydings, who had been a loyal lieutenant to Ritchie, knew that his chief had slipped in personal strength due to a combination of factors. One was that too many people were getting to think that Ritchie should be satisfied with four terms, that the honors should be passed around. Another was that Ritchie had made many enemies in the Eastern Shore section of Maryland by using the militia to break up mobs in a threatened lynching.

Still another was that, rightly or wrongly, a lot of people blamed Ritchie for the fact that some of the banks in Maryland had gone sour during the dark days of early 1933.

So Tydings urged Ritchie to run for senator instead of governor. No one questions that Ritchie could easily have been elected senator. The term of a Republican was expiring, and no one would have opposed Ritchie for the Democratic nomination.

In an attempt to force Ritchie's hand Tydings brought out Radcliffe for governor, as a sort of trial balloon. Ritchie was unmoved, ran for governor and was defeated by Harry W. Nice. Tydings, after Ritchie's decision, then supported Radcliffe for senator, and he was easily elected, though he had never run for office before, on the same day Ritchie was defeated.

All of which put Radcliffe under all sorts of obligations to Tydings, and Radcliffe is not a man to take his obligations lightly.

Where Will It Lead?

Although the intention was to put the conduct of the anti-trust investigation on a high plane, administration critics say that too much weight is put on the preliminary meetings between big business executives and the New Deal prima donnas. These critics hold that a proper appraisal of such get-togethers is that New Deal strategists such as Thurman Arnold, Tommy Corcoran, Ben Cohen and Herman Oliphant are glad to talk to anybody, but they keep on their way undisturbed by the talk. In short, they seem to be simply impervious to other views if the other views do not fit in with their preconceived notions.

Where that path will lead is by no means certain as half a dozen senators and representatives, including Senators William E. Borah and Joseph C. O'Mahoney, have their own ideas as to how to proceed. This "economic" commission has not yet organized.

Participation by congress in the inquiry was not desired by President Roosevelt, and the independent attitude of congressional members is fair assurance that it will not be dominated by the White House. In fact, time and again Senator O'Mahoney, although an original Roosevelt man "Before Chicago," and a member of Roosevelt's "little cabinet," as assistant postmaster general, before his coming to the senate, has shown his independence.

In fact, he first became a close friend of Mrs. Roosevelt by differing with her sharply, and in a large committee meeting, on an important question involving personalities in politics.

His difference with the President on the Supreme court issue is still remembered, and with some bitterness, at the White House.

Keep Check on Inquiry

Congressional members have not been present at the meetings arranged between administration officials and various members of Secretary of Commerce Daniel C. Roper's business advisory council. Even so, the council never has been able to exert any influence on the administration, although Prentiss L. Cooney, who came to Washington some time back as assistant to W. Averell Harriman, council chairman, is trying to build up its effectiveness as an agency of co-operation between business and government. He has succeeded to the extent, and only to the extent, of bringing into personal contact with the young brain trusters prominent members of the Roper group, including important figures from Standard Oil, American Radiator, Sears Roebuck and Co., U. S. Steel, and General Foods.

Congressional members of the commission don't propose to let administration officials run away with the inquiry. Representative Edward C. Eicher of Iowa is the only 100 per cent New Dealer in the lot, but the Capitol contingent splits along other lines. Senator William H. King of Utah and Representatives Hutton W. Summers of Texas and B. Carroll Reece of Tennessee will seek to define anti-trust policy for the future in a quiet, orderly fact-finding inquiry without upsetting business. Senators Borah and O'Mahoney disclaim any intention of turning the inquiry into a circus but believe nevertheless that it should be a public performance and the commission, with that in mind, was given all the inquisitorial powers of the securities and exchange commission in the resolution setting it up.

Floyd Gibbons' ADVENTURERS' CLUB HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

"The Rolling Stones" By FLOYD GIBBONS Famous Headline Hunter

HELLO EVERYBODY: Here's another yarn from a CCC camp. By golly, looks to me like those camps are swell places to go adventuring. We've had a flock of yarns in this column from members of the CCC army—and all of them good ones.

This one comes from John Martocci of Brooklyn, N. Y. John went out to Camp S-204, near Brigham, Utah, and it was there that he had the big adventure of his life—the adventure of the rolling stones.

It was one cold morning in November, 1934, that John got out of the hay to find a notice on the bulletin board. The notice called for volunteers to carry water pipes to a stub camp about 16 miles away, and John and his buddy, Bob Greene, signed up to do the work.

Long, Hard Trip Around the Mountain. The foreman told them he'd give them two days off for doing job, but before they got through with it, they wished they'd held for a week's leave and a couple of bottles of horse liniment in the bargain. They were given two 10-foot lengths of water pipe to carry, one each shoulder, and brother, those pipes were tough to handle. The way were all in before they'd gone 8 of the 16 miles along the trail that wound around the side of the mountain. It took them seven hours to make the entire trip—and then they were confronted with the long hike back again.

It was late afternoon when they started back, and they had only five miles when the dusk began to shut down on them. They were afraid they'd lose the trail if they didn't get home before nightfall. Bob suggested that, instead of going all the way around the mountain, they climb over it. It might have been a good idea in the theory, but those two lads just didn't have any conception of how big a mountain it was. Especially one of those Rocky mountains like they have out in the West.

Caught in a Landslide. It only looked like a mile or two across the mountain, so the lads started to climb. They had only gone a quarter of a mile up the mountain when it started to rain. The skies began to get blacker,

Boulders bounced off the rock above them.

It became harder and harder to see where they were going. But that time it was too late to turn back, for they would never have found the trail again. So they kept right on going.

They climbed for two straight hours, while the gray rain deepened into night. The mountain got so steep that they couldn't stop to rest—just had to keep on climbing or roll down to the bottom again. Then, in a flash of lightning, they saw a pile of boulders up ahead of them.

"Those rocks," says John, "were as big as cows. One of them was about the size of a flat top, and stuck out over the side of the mountain. I thought that if we could get on top of it we could get some rest. I grabbed for the top of the rock, but my hands slipped off it. I yelled for Bob to give me a boost, and he did. It was then that the fireworks started. And boy, those fireworks sure did start. 'As best I can recall,' says John, 'I felt something tugging at my feet and heard a noise sounded like the beating of a drum. I yelled to my pal, 'Bob! Bob! Where are you?' And then I heard him answer:

"I'm right here at your feet. For God's sake let go of that rock and lie down under it. It's a landslide. I let go, wondering if I was going to roll all the way down the mountain, but Bob made a grab and held me. We were no sooner under cover than the big boulders up above us began to move."

Seemed Like the End of the World. John says he can't describe what took place after that, but thought the world was coming to an end. "A couple of boulders," says John, "that must have weighed a ton apiece bounced right off of us. We were under. I could hear the crackling and falling of trees below when those big rocks hit them, and every time one of those babies bounced off the rock above us, we wondered if our rock was going to hold, or if it was going to crash down on top of us. Boy, I scared."

For hours those two lads hung there—or at least it seemed hours—and then things began to quiet down again. The slides ceased, the rain stopped. They clambered over the top of their rock and began up the mountain again, but they didn't get very far. For dead ahead and about 300 feet above, the mountain shot straight up in a tall, slender slide.

"It was as high as an ocean liner," says John, "and we couldn't have climbed up it any more than we could fly. We didn't dare go back down the mountain, either, for fear we'd get lost, or caught in another one of those landslides. So we went back to our flat-topped rock and waited for morning."

When morning came, they heard shots. They yelled, and a group of their own CCC pals came to their rescue. The lads had been under and the whole camp was out looking for them. They were taken back to camp, exhausted, and sick as dogs, as John puts it. "And instead of getting two days leave in town," he says, "we spent a week in bed camp, nursing colds and getting over our exhaustion."

Burning of Jewels

The chief of the pyrometry section of the bureau of standards, says that diamonds heated in a stream of oxygen become incandescent (rapid oxidation or burning, but no flame) at 520 degrees C. (1470 F.). Emerald is a gem variety of beryl, which melts at 1410 degrees C. (2570 F.). Sapphire, Oriental ruby and Oriental emerald are gem varieties of corundum. Corundum melts at 2050 degrees C. or 3700 degrees F. Although the usual variety of ruby is the Oriental ruby, the ruby is sometimes of the spinel variety, such as almandine, balas and spinel rubies, which forms are not definite minerals.

Odd Plan for Street Names

Venice attempts to preserve everything connected with its history. Its street names may be passed up only by those of them indicate occupations of their residents. The "Frezzeria" was so named because of the manufacturers of frozen cause of it, the "Spadaria," because of its sword forgers, the "lizzada dei Corazzieri" because of its breastplate shops, the "Pala" because of its spindle-makers, "Calle degli Specchieri" were called because mirrors were made there and the famous "Mercato" which enters the Piazza San Marco under the clock tower, received its name because it was the center of Venice.

Wild and Domestic Turkeys

It's not such a far cry from wild to domestic turkeys. Spanish conquerors found the first turkeys, closely related to the wild birds, in Mexico. They took turkeys back to Europe around 1530. In 90 years, by the time the Pilgrims came to America, turkeys were common in England. The birds were probably named for their cry of "turk, turk, turk."

Compelled to Kill Squirrels

The large number of squirrels were such a menace in the days that the Ohio legislature passed a law compelling each person to a certain number of them each year. The number was to be determined by each township trustee, and those who failed to kill their quota were subject to a fine.

Winners in Cake Recipe Contest

Some of the Prize-Winning Cakes Baked in the Experimental Kitchen Laboratory of C. Houston Goudiss.

THE home economists on the staff of the Experimental Kitchen Laboratory, maintained in New York City by C. Houston Goudiss, who conducts our "WHAT TO EAT AND WHY" series, have reached their decision concerning the prize winners in the recent Cake Recipe Contest.

Miss Sadie Cunningham, Avonmore, Pa.; and Mrs. Laura Meyer, 107 Pleasant St., Plymouth, Wis.

Third Prize Winners.

Mrs. T. H. Fjone, Flaxville, Mont.; Mrs. Lester Ralston, 127 South Judd St., Sioux City, Iowa; Mrs. Harry A. Kramer, 16 Marin Road, Manor, Calif.; Mrs. F. D. McDonald, Route 1, Amherst, Texas; Vera Tygar, Commodore, Pa.; Mrs. George Ahlborn, R. D. No. 1, Mt. Pleasant, Pa.; Mrs. B. A. Robinson, Box 578, Emmett, Idaho; Jean Guthrie, 4712 Campbell St., Kansas City, Mo.; Mrs. Walter Richter, Bonduel, Wis.; Mrs. P. C. Blakely, Alden, Mich.

Honorable Mention.

Emogene Williams, Damon, Texas; Mrs. Simon Moen, Norma,

N. D.; Mrs. Dick Collins, Masonville, Iowa; Mrs. B. F. Herman, Box 1118, Crosby, Miss.; Mrs. Paul Lorenz, P. O. Box 225, Strathmore, Calif.; Mrs. S. S. Arntz, Simpson, Nev.; Mrs. Vida Hilger, Box 257, Rockland, Mich.; Mrs. Grace H. Peterson, Box 335, Amherst, Wis.; Mrs. Cecil Skinner, Bedford, Wyo.; Mrs. Joe Furnace, 317 West Twentieth St., South Sioux City, Neb.

Magnificent Cakes Entered.

The judges report that they have never seen a finer collection of cakes assembled at one time. Because almost all the cakes were so exceptionally good, it was extremely difficult to choose the winners. But a most careful scoring system was used, and the cakes were checked for general appearance, including shape, size and crust, both color and character; flavor, including odor and taste; lightness; crumb, including texture, rated as to its fineness, tenderness, moistness and elasticity, color and grain.

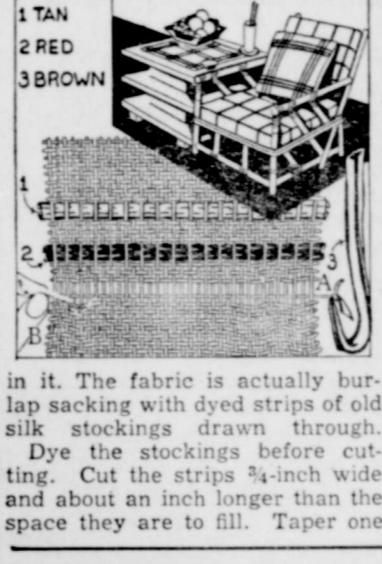

C. Houston Goudiss has said that he regrets that every woman who entered the contest could not win a prize. He offers his congratulations to the winners and his thanks to the many other homemakers who helped to make this Cake Contest such a splendid success.

Second Prize Winners. The five second prizes were awarded to Mrs. H. Harshbarger of 2427 Fifth Ave., Altoona, Pa.; R. A. Williams, 12075 Rosemary Ave., Detroit, Mich.; Mrs. C. A. Burns, Box 788, Oakland, Miss.;

HOW to SEW By RUTH WYETH SPEARS

THERE is a modern air about the colorful roughly woven table mat and the chair cover and cushion shown here. Does it surprise you to learn that they cost next to nothing? There is a trick

end of the strip so that it will pull through the burlap easily. If long strips are needed, cut around and around the stocking spirally instead of lengthwise. Now, draw out one thread of the burlap; then tie one end of the next thread to the tapered end of the stocking strip as at A. Pull the other end of this thread as at B to draw the strip through.

NOTE: If you wish to use these weekly articles for reference paste them in a scrapbook, as they are not included in either Sewing Book No. 1 or 2. Book 1, "Sewing for the Home Decorator," covers curtains, slipcovers, dressing tables; 48 pages of fascinating directions. Book 2 illustrates 90 embroidery stitches with numerous applications; doll clothes and gift items. Order by number, enclosing 25 cents for each book desired. If you order both books, leaflet on making crazy quilts, with 36 stitches illustrating, will be included free. Address Mrs. Spears, 210 South Desplaines St., Chicago, Ill.

If your dealer cannot supply you, send 20c with your dealer's name for a Trial Package of 48 genuine Pe-Ko Jar Rings; sent prepaid.

Tung Oil Used for Centuries in Orient Before Western World Knew of Its Value

Tung oil was used for centuries in the Orient to waterproof wood, paper and cloth before the western world became aware of its value. By 1922, however, the United States was importing 79,089,293 pounds of tung oil; the next year the figure rose to nearly 96,000,000 pounds—valued at \$14,000,000 and constituting 85 per cent of China's export of the oil. In 1928, 107,356,971 pounds were imported, and by 1938 annual consumption was 127,000,000 pounds.

"There's the Doorbell Again"

SUPPOSE daily to your door came the butcher, the grocer, the clothier, the furrier, the furniture man, and every other merchant with whom you deal? What a tedium of doorbell answering that would mean! It would be even more impractical for you to visit daily all these stores to find out what they have to offer and the price. And yet you need those merchants' services quite as much as they need your patronage. Contact between seller and consumer is essential in the supplying of human needs. Before a sale can be closed the goods must be offered. Every week, through the advertising columns of this newspaper, merchants of this city come to your home with their choicest wares. Easily, quickly get the news of all that is worth while in the market-places of the world. They are not strangers at the door, but merchants you know and trust. Get the news of high quality and fair price when you buy an article advertised by a merchant.

**BRISCOE COUNTY NEWS**  
Official City and County News

ROY W. HAHN  
Editor and Publisher

Cranberry' Allred, Sports Editor

Entered as second-class mail matter at the post office at Silvertown, Texas in accordance with an act of Congress on March 3, 1879.

Reputation is what men and women think of us. Character is what God and the angels know of us.—Thomas Paine

I HEREBY RESOLVE—that this line shall remain in the Briscoe County News until our city managers start a little constructive work toward surfacing our streets, or at least until the death of Yours True?ly. Dated this 9th day of June, 1938. (I've been wanting to know for a long time, how long a linotype slug will last.)

I ATTENDED MY first political rally at Quitaque Saturday night. It was well worth the money too. One thing about our county politics—there hasn't been any mud slinging. Bill Helms topped the thing off just about right when he ended his speech with this: "In this race with me for Commissioner are L. E. Graham and Paul Hamilton. They are my friends, and will be my friends after the election is over. They are both fine men. I really believe, folks, that you won't make a very bad mistake, if you vote for any one of the three of us."—And that goes for just about any race in the county.

YOU WANT TO hold your breath when you get your next

week's paper, for it's going to be a breath taker. You'll be pleased with it I'm sure for it's going to have some features the like of which you never seen before, behind, or since.

THERE'S A LOT OF you folks that are sure hanging on to that dollar - - well, it's all right to hang onto it until the 30th day of July, but if you want to keep on receiving this great family news-ance, you better be paid up by then. Size of stature, family tree, nationality or occupation make no difference. When I get my mailing list specks on August 1st, there's going to be a parting of the ways that will make the great Judgment Day look like a family reunion.

I SHOULDNT PICK any one out of the crowd to thank in particular, I guess, but if you knew how hard I have worked to disengage Q. E. Brown from that jew flag you won't blame me for giving him especial honorable mention. He took off his shoe between chews though the other day and paid me off—for which I am very grateful. I was really getting worried about the status of the man's chances of getting into newspaper heaven.

IF YOU ARE FOR or against the payment of poll taxes, it will do you good to talk to the aforesaid Q. E. He sure has the words where he wants them. He figures it this way—"You pay \$1.75 for a protection for which you would not take a hundred. For privileges worth paying for." "If the tax is abolished," he says, "the present property owners are going to be paying just that much more taxes, in order to have any Tom, Dick, and Harry voting new taxes and laws."

THERE'S NO DOUBT something the matter with it, but my notion is this: Poll taxes should be done away with, as a requirement to vote in an ordinary election. BUT in any bond election or the like, only property owners should be allowed to have the say. For instance, I know a town where they built a new high school at a total cost of over a quarter of a million dollars. And the election passed by less than the number of relief workers in the county.

YOU'VE HEARD the old saying, "I haven't gotten anything in this world, the best I can do is to give my children an education."

That saying should be revised to this: "I haven't a thing. The best I can do is to have the taxpayers give my children an education."

HENRY NORRID was here yesterday and was talking about a new job he has. "I'll be my own boss", says Henry. —Tut, tut, my fine young bridegroom. Some one is kidding you. Did you ever hear of a married man being his own boss?

I WALKED INTO H. Roy's the other day, and there was Doris Kirk washing dishes. Boy, oh boy, was she going after it. Every time she'd wipe a plate she'd grit her teeth. Between grits she was mumbled something about having served her apprenticeship at that trade at the Cafe. —Cheer up my girl, maybe your Prince Charming will walk in some day and be a lot more impressed by your juggling dishes than by your skill on the typewriter.

TELL ME THIS SECRET: How do they get this "record crop" business that the daily papers are blabbing about? We didn't make it here, for 175 cars will more than catch the wheat from Silvertown and Whitley. They didn't make it in Western Kansas where I came from. Four bushels is the average crop there. And they didn't make it in northern Kansas, and that is the greatest wheat growing region in the U. S. The crop report from up there is six bushels. I say, where is the bumper crop? It must be hidden some where behind that big 59 cent price.

HOW ARE YOU coming on your vacation plans? I warn you ladies, and gentlemen too, that the next one that tells me of their coming vacation trip, that I'll square off, give my Tarzan yell, and bite you right square on the neck! Not on the back of the neck, nor the front of the neck, but right on the end of the neck, where a neck ought to be bit on.

HERE'S ONE WE clipped from the Donley County Leader: A young man whose first job was that of reporter on a newspaper was having trouble writing his stories. All his efforts seemed to find their way into the trash basket. One day the city editor called him and said: "Look—you don't know what the public is interested in, you don't sense what news really is. For example, if a dog bites a man, that isn't news. But if a man bites a dog, that's news." The next day the reporter submitted a story under the following headline: "Fire Plug Breaks—Wets Dog."

HEALTH NOTES

"Infantile paralysis is expected to occur more frequently during the next three or four months," predicts Dr. Geo. W. Cox, State Health Officer. "This disease is always more frequent during the hot months."

"The germ responsible for infantile paralysis is so small that it escapes detection even with the most powerful microscopes. The first symptoms are usually vomiting, headache, fever, stiffness of the neck, pain in the legs, irritability and drowsiness. Complete recovery may follow such an illness. In the more severe cases, the germ penetrates the nervous system, resulting in paralysis of nerves controlling one or more groups of muscles. Some remarkable recoveries have been noted."

"Flies or other insects have not been demonstrated to play a part in the spread of this disease. Infection spreads from person to person with the droplets transmitted by coughing and sneezing. Children and grown people that are healthy may be carriers of the germs. When present in epidemic form, about one child in each hundred is apt to suffer an attack."

"Early recognition and diagnosis are essential. The use of immune serum may be a factor in preventing paralysis. A period of complete rest is essential for muscles that are affected. If parents note any symptoms of illness in their children, the family doctor should be consulted at once."

**Good Start Helps Chicks Grow into Profitable Pullets**

The big thing in brooding chicks is not how many chicks are started nor even the percentage of chicks kept alive, but how many pullets are ready for laying when egg prices advance in the fall.

If a portable brooder house is used it should be moved to fresh ground and left to sun and air before chicks are put in. If the brooder house cannot be moved to new ground, a wire bottom sun porch or gravel apron three inches deep, 15 feet each way from the house, should be provided.

No matter what type brooder stove is used, it should be run at least three full days before chicks arrive. Temperatures should be watched closely and accurate temperature control maintained. The tendency for chicks to pile and crowd when 3 or 4 weeks old is usually due either to too high temperatures or too much variation in temperature. For the first two days the temperature should be kept about 92°-95° at start.

Chicks need plenty of fresh clean water. To aid in preventing spread of disease one-quarter level teaspoon of Purina Chlorena Powder should be added to each gallon of drinking water.

The best starting feed is built to satisfy every need of young chicks for the first six weeks. In it should be blended all the vitamins, proteins, carbohydrates and minerals that chicks need for vigorous growth. Every ingredient should be included in proper proportion to do the best job possible in growing sturdy chicks. It should be fortified with Puratene, a rich Vitamin A concentrate that builds up resistance to disease and puts extra vigor and vitality in chicks.

One of the best ways to avoid crowding and piling is to have low, slatted roosts in the brooder house early and to begin using them before the chicks are three weeks old. The roost can be made to fold back against the wall when not needed or when the house is to be cleaned, and dropped into place when the chicks are a little over a week old.

When chicks are three or four weeks old they outgrow chick-size feed hoppers. These should be replaced with larger hoppers and more of them. A four-week old chick is more than twice as broad as a baby chick and therefore needs more than twice as much room. They also need extra watering space at this age. Litter should be lifted lightly with a fork at intervals during the brooding period so that droppings will sift to the bottom. Old litter should always be removed and the brooder house cleaned and disinfected before brooding a second lot of chicks in the same quarters.

**NEW BOOK SHOWS HOW TO SELL EGGS FOR MORE MONEY**

Unusual opportunities to make money at home await several far-sighted, promotional-minded poultry raisers in every community. Through building a popular demand for high quality eggs with "controlled interiors" a four to eight cent per dozen premium for eggs may be secured.

How to produce such eggs is described in a new book, "Forty-Nine Ways to Sell Eggs for More Money." The book may be secured by writing the Poultry Department of Purina Mills, St. Louis, Missouri, and enclosing twenty-five cents.

Local Happenings

Bess and Jo Webb have returned home after a months visit in Cooper, Texas.

Margie Northcutt spent the week end with Lila Morris.

Mrs. Aulton Durham and Miss Zell Stevenson were in Plainview Sunday.

Peggy Wimberly is visiting her grandmother in Tulia this week.

Mrs. Roy Teeter's mother has been seriously ill for some time, but is now reported improving.

Mrs. Hermon Ely and Frances spent Wednesday and Thursday in Tulia with her mother.

Mrs. Dobbs of Refugio is here visiting her mother and father, Mr. and Mrs. M. K. Summers.

Look at your subscription name label. If your subscription is nearly out, renew on the dollar offer.

## RIGHT OUT OF THE AIR

By R. F. SERVICE

Anne Seymour, above, star of "Mary Marlin," probably holds the record for enacting the highest number of different roles in the shortest space of time. She got her first radio audition at WLW in Cincinnati where she remained for more than two hundred diversified parts during a three-month period. Since then she has been spotlighted on many network shows including "Grand Hotel" in which Don Ameche played opposite her for three years.

As a treat to all concerned, the Kate Smith cast, producers and directors, go night-clubbing after the second show, and enjoy the relaxation afforded in being entertained rather than entertaining somebody else.

Jane Weston's twin sister, Peg, occasionally befuddles studio workers by dropping in to visit her sister's "Modern Home Forum" broadcast. Identical twins, they look alike, talk alike and share a number of mannerisms.

Edward G. Robinson, above, whose CBS dramatic series, "Big Town," has won the plaudits of newspapermen throughout the country, believes in serious preparation for every role he undertakes. Robinson spent several days at a Los Angeles paper studying every phase of newspaper publishing before starting the program.

Donald Dickson, the Metropolitan Opera baritone heard on Colonel Lemuel Q. Stoenagie's Sunday night program over WOR and the Yankee network, once worked a 12-hour night shift in a steel mill and studied music on the side.

Radio Theatre seems to have specialized in co-starring performances by Hollywood husbands and wives. Frederic March and Florence Eldridge, above, Mr. and Mrs. March non-professionally, are the latest team to do a Radio Theatre play.

Olan Soule often turns in a full day's work without leaving Studio II in Chicago. Three of his principal programs, "Romance of Helen Trent," "Bachelor's Children" and "Joan and Kermit," air from that studio.

When Norris Goff, above, "Abner" of "Lum 'n' Abner," was in college he acquired the habit of wearing a different necktie every day in the year, supplementing his own with his fraternity brothers' neckwear. He still has the habit but finds it expensive buying them all himself.

Mary Margaret McBride, CBS Columnist of the Air, receives many invitations from her listeners. Spokane Washington, wants her to come out to look at the mountains, California tempts her with scenery, and not a day goes by that some one from Missouri urges her to come out for a visit to her native state.

Readers can now obtain a year's subscription to this nationally known magazine and a year's subscription to this newspaper at a special low price of \$2.95.

Popular Mechanics, virtually a month-by-month record of human progress, needs no introduction to most readers, but some of the facts about its content may be surprising even to those who read it regularly. For instance, it prints each year more than 6,000 interesting photographs and other illustrations, many of them in beautiful colors, and more than 3,000 articles, including about 150 big, full-length feature stories dealing with the latest achievements in science, mechanics, industry and a wide variety of other subjects.

A double-barreled bargain in good reading has been made available to present and future subscribers of this newspaper through an arrangement with the editors of Popular Mechanics Magazine.

Here's The Way For You To Stay

### MANURE FOR PASTURES

The manure from a dairy cow averages about \$24 a year in value fertilizer," states Robert R. Lancaster, pasture specialist of the Extension Service of Texas A. and M. College, who has been receiving numerous inquiries as to the use of manure as fertilizer.

than half of the value of stable manure is lost unless all of the solids and the liquids are caught and worked into the soil at once, Lancaster said. With the usual loss of the liquids and the loss of the nitrogen as ammonia, the fertility is reduced to around 5-5-5.

The liquids can be mostly absorbed if 8 or 9 pounds of straw or sawdust bedding is used per day for each cow. This is important because about half of the nitrogen

and four-fifths of the potash is in the urine.

Nitrogen escapes as ammonia gas within a day or two, but the use of a pound of superphosphate per cow per day, spread in the gutter before the bedding is put down will greatly reduce this loss.

For sanitary purposes superphosphate will do all this lime can do, and in addition it reacts chemically to prevent the escape of nitrogen, Lancaster pointed out. Since manure is deficient in phosphate and most Texas soils need this element, superphosphate is a valuable addition.

When manure is spread it should be harrowed in to prevent drying losses, but daily spreading and harrowing is not practical on most pastures. The manure should be stored under a roof to prevent leaching and on a tight concrete floor to stop drainage.

"The investment necessary to construct such a storage place is a wise one," Lancaster said. "The spreading may then be done during rainy weather when harrowing will not injure the pastures and when the fertilizer will be soaked into the ground."

### SHORT COURSE

More than 2,500 adults are expected to attend the Texas A. and M. College Short Course, scheduled for July 13, 14, and 15, according to Roy Snyder of the Extension Service, who is general chairman of the session.

Advance registration indicated that all rooms for women would be filled, he said. This means that approximately 1,450 women, 1,250 of them home demonstration club members, would be here.

About 1,050 men are expected. In addition to the farmers and ranchmen who will attend the special meetings on cotton improvement, soil conservation, and economic conditions, a number of special groups will make the Short Course the occasion for meetings.

Such groups include the Cooperative Institute, which will hold its fourth annual meeting for representatives of farmers' cooperatives; the Texas Agricultural Writers; the Texas Experiment Station Workers; Texas Certified Seed Breeders; the Texas Cotton Improvement Committee; the Agri-

## For Re-election To CONGRESS

### What Others Say About Him:

"On the subject of agriculture, Marvin Jones is the best informed man in the United States."  
—Vice President John Garner

"One of the most skilled legislators in the House."  
—Speaker W. B. Bankhead

"Marvin Jones is one of the most powerful floor fighters in the House of Representatives."  
—Washington Herald

Marvin Jones Has Lived In The Panhandle Over Thirty Years, Knows Its Needs And Is Interested In Its Future

(Marvin Jones Committee, Lewis Fields, Chairman)

There are hundreds of money-making and labor-saving ideas, farm aids and household hints. For the home craftsman there are tips about the care of tools and scores of stories telling how to build furniture, boats, radios, toys and models. In addition, the home mechanic will find practical suggestions for taking care of his car, his radio, his boat and his household and farm equipment.

Last, but not least, you'll find in this fascinating magazine photographs and explanations of hundreds of inventions, devices so new you have never seen them or anything like them, but so practical that you will be using many of them in the near future.

And every article, whether it describes an invention, a great scientific achievement or explains the construction of some simple piece of furniture is "written so you can understand it."

### LIBRARY NEWS

A new Bible Commentary in six handy volumes has lately been received. This is the only large type handy volume edition. Easy to handle, easy to read. In seeking a commentary, Bible students are turning to Matthew Henry today as never before. Whether for preparation to teach a Sunday School Class, lead a prayer meeting, light on a difficult passage, or for enrichment of one's personal life, it is to be hoped that this new edition will introduce many of the present generation to treasurers they have not yet known.

Among the hymns that Cowper gave to the church are those beginning, "There is a Fountain Filled with blood", "O for a closer walk with God", and God moves in a mysterious way". Who can measure the blessings that these beautiful hymns have brought to Christians during the last century and a half? Inspiration for these poems have been traced to the use of Matthew Henry's commentary years ago.

A valuable contribution, was made to the literature of the present day Christian Churches when this now well known six volume edition of the Commentary, carefully revised and corrected was published. It is of convenient size, each volume being about six by nine inches and one and a half inches thick. Not too large to carry home.

Annabelle and Charlene Gregg of Quitaque, spent from Tuesday until Thursday of last week here with their aunt, Miss Lizzie Gregg.

### SOCIAL SECURITY TAX RETURN BLANKS MAILED

Social Security tax return blanks, Forms SS-1a, have been mailed from the office of the Collector of Internal Revenue, Austin, Texas, by Frank Scofield, Collector of the First Collection District of Texas, to some 44,000 employers for their use in filing their quarterly tax and information returns under Title 8 of the Social Security Act for the second quarter of the current year must be mailed to the Collector's office at Austin in ample time to reach that office not later than July 31, 1938.

"Returns are being mailed to every employer of record in this District required to file the return, Mr. Scofield stated. "However, any employer required to file returns under Title 8 of the Federal Social Security Act who fails to receive his blank Form SS-1a on or before July 10 should promptly make request to the Collector for the proper Form SS-1a, stating in his request the name and address in which the return should be filed and his Employer's Identification Number, if such number has been assigned to him by the Social Security Board.

Employers who have paid taxable wages during the first quarter of the current year but who have temporarily suspended business and paid no taxable wages during the second quarter are nevertheless required to file the return for the second quarter. Such returns will of course show no tax due, where no wages were paid within the quarter April 1 to June 30, 1938. This provision of the Social Security Act requiring the filing of non-taxable returns in certain instances, is often misunderstood by employers engaged in seasonal activities," Mr. Scofield explained.

### FARM SECURITY ADMINISTRATION BEGINS NEW FISCAL YEAR

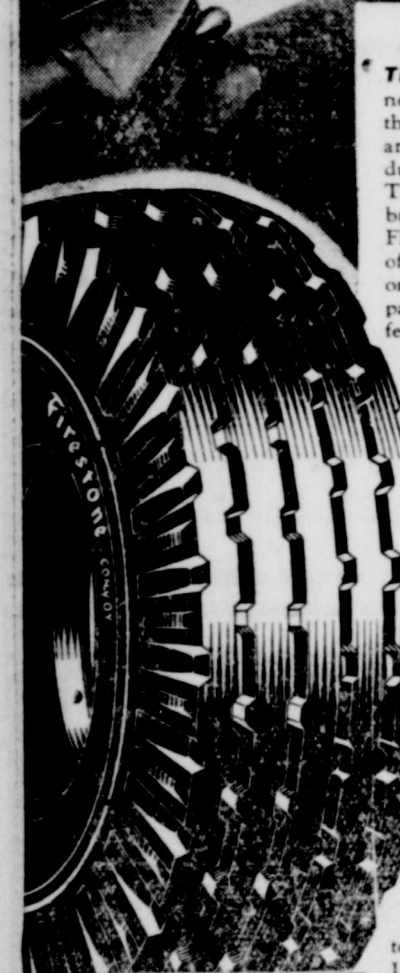

As the beginning of the new fiscal year draws near, the Farm Security Administration in Briscoe County looks back over the accomplishments of the farmers in this county who have received help from the program. Mrs. Lillie B. McClure, Home Management Supervisor, says that many families

have made progress toward increasing their net worth through following a live-at-home program. A number of farm women have purchased pressure cookers and borrowed from the FSA, and have canned every available food product. Many now own profitable poultry flocks, the initial purchases being made possible by loans obtained from the Farm Security.

Mr. Bernie E. Rushing is Farm Supervisor of this Department of Agricultural agency. A typical rehabilitation loan, Mr. Rushing explained, includes money for the purchase of seed and fertilizer, for buying workstock, farm machinery, cows, brood sows, and chickens. It may also include money for the purchase of needed articles in the home, such as pressure cookers and canning jars, as mentioned above. Occasionally a few dollars are set aside for the purchase of clothing and medical attention. All families obtaining a rehabilitation loan, however, are required to make budgets for living expenses and keep accurate records of all transactions.

Both Mr. Rushing and Mrs. Clure are enthusiastic about work with the FSA program. "I believe there is yet a long road ahead of the rural people in this section," "However," they "there are dividends all around way. Not only human dividends but cash dividends for people engaged in other lines of business as well, because as these become farmers have extra money to spend there will be better news for everyone."

Now YOU CAN BUY A **Firestone** Gum-Dipped Tire **760** FOR AS LITTLE AS \$7

**FIRESTONE cuts the cost of Tire Safety** just at the time when you need a new set of tires. At this time of the year you should replace tires that are worn and smooth for greatest safety during the summer driving season. Tires may look alike on the outside—but inside they are different. The name FIRESTONE on a tire is your assurance of extra safety and long mileage because only Firestone Tires are built with these patented and exclusive construction features:

**Gum-Dipping**, the Firestone patented process by which every fiber of every cord in every ply is saturated with liquid rubber, counteracts tire-destroying internal friction and heat which ordinarily cause blowouts. Nine extra pounds of rubber are added to every 100 pounds of cord.

**Two Extra Layers of Gum-Dipped cords** under the tread, another patented Firestone construction feature, protect against punctures.

**Scientifically - Designed Non-Skid Tread** made of tough slow-wearing rubber, assures safer ps and longer non-skid mileage.

Now that Firestone gives you all of these safety and economy features at these low prices, you cannot afford to take chances with unsafe tires this summer. Come in today and join the Firestone Save-A-Life Campaign by equipping your car with a set of new Firestone Convoy Tires—the safest tires that money can buy at these low prices.

### A NEW MOISTURE CONSERVATION SYSTEM OF WHEAT, SMALL GRAIN and ROW CROP FARMING

**DENSPER TILLING, DAMMING and DEEP FURROW SEEDING MACHINE**

THE most diversified, practical, money-making machine the wheat farmer can buy! Enables you to follow the new system of farming that greatly decreases the weather gamble. With machine as shown above you go right into the stubble field immediately after harvest—cultivating, forming furrows and damming in one operation, and land is ready to catch and hold moisture. Later in the season you can level ridges and prepare excellent seed bed with track on top to prevent soil blowing. Then, with machine as shown below, you do an ideal job of seeding, depositing seed in wide 6-in. moist seed bed and covering with moist soil.

Also ideal for summer fallow; for seeding row crop; for spring wheat planting; for contour farming.

(Above) No. 1 ready to catch moisture.  
(Below) No. 2. Ridge level, excellent seed bed.  
No. 3. Ideal planter.

Mrs. Otis Wilburn, who has been ill and confined to her bed for some time is showing much improvement and is up and around.

Mrs. W. H. Newman, who underwent a major operation at the Plainview Sanitarium, and has been confined there for the past two weeks was brought home Tuesday morning and is thought to be well on the road to recovery.

Mrs. Ted Roussin's sister, Miss Betty Jo Crowson, of Pampa, is here for a visit in the home of her sister.

Mr. and Mrs. Abner Wimberly, Mrs. Joe Mercer, Miss Delise Blackwell, and Mr. Herbert Stevens were in Plainview Sunday afternoon. They spent a part of the afternoon at the swimming pool.

Mrs. Charles Cowart visited her sister and family in Amarillo Friday.

## Keeping Abreast...

The Briscoe County News prides itself on being an up-to-date newspaper. We claim, and with good reason, to have the largest news coverage, the largest circulation, and the largest newspaper ever printed in Briscoe County. We are proud of the progress we have made in the past two years.

**WHO IS RESPONSIBLE?**

Of course the present management claims a little credit—but MAINLY it is the readers themselves, our correspondents, and our advertisers who are giving us pretty fine advertising support.

We hope to merit this support by giving a better advertising medium. We want to ask you readers to read those ads every week. And we want you to consider very carefully before you let us drop you from the mailing list—but which we will be forced to do if your account is in arrears after July 30. Subscribe now.

**Until July 30th**

**Sentinels of Health**

**Don't Neglect Them!**  
Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The art of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feet tired, nervous, all worn out.  
Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance.  
The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use **Doan's Pills**. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.

© Western Newspaper Union.

**Lesson for July 17**

**DEBORAH: EMERGENCY LEADERSHIP**

**LESSON TEXT—Judges 4:1-9, 12-14.**  
**GOLDEN TEXT—Who knoweth whether thou art come to the kingdom for such a time as this?—Esther 4:14.**  
**PRIMARY TOPIC—Why Deborah Sang.**  
**JUNIOR TOPIC—Why Deborah Sang.**  
**INTERMEDIATE AND SENIOR TOPIC—Ready for Emergencies.**  
**YOUNG PEOPLE AND ADULT TOPIC—Emergency Leadership.**

"Every man did that which was right in his own eyes." Such is the divine summary of what was wrong in Israel during the period of the judges (Judg. 21:25). "There was no king in Israel," no competent and inspiring leadership. The people lived according to the whims of the day, and, as always, humanity left to itself drifted to lower and lower levels. This was true morally and spiritually and ultimately politically, for they came repeatedly into bondage to other nations and were only delivered as God raised up judges to lead them to repentance and victory, as well as to rule over them.

**I. A People in Disorder (vv. 1-3).**  
Any people that forgets God and begins to live after the dictates of the flesh will at length come to the place where some strong man with "chariots of iron" will rule over them. We, in America, look at the other nations of the world, viewing their plight with sympathy but ever assuring ourselves that "it can't happen here." We ought to arouse ourselves and face the facts lest our own land, happy in its possession of God's great blessings of "life, liberty, and the pursuit of happiness," abuse those privileges, neglect the worship of God, spurn the leadership He gives us, and become "lovers of pleasure more than lovers of God; having a form of godliness, but denying the power thereof" (II Tim. 3:4, 5). If we do not awake and repent the Lord may have to "sell" us, as He did Israel, into the hands of the oppressor.

**II. A Leader Called of God (vv. 4-9).**  
God always has His man ready for the hour of need—only in this case His man was a woman. Glorious indeed is the record of faithful and capable womanhood in annals of God's work on earth. Deborah was a woman of unique gifts—a poetess, a prophetess, and withal "the wife of Lapidoth," evidently a woman who cared well for her own household.

Brains and natural ability are much needed, especially in a time such as ours when few there are who even care to think for themselves and few who have any desire to develop native ability except for the purpose of "making money." But true leadership calls for more than talent and intelligence; it calls for a burning in the soul, a divine zeal, the urge of God in the heart.

Deborah had this fiery touch upon her life. Barak, while undoubtedly a man of ability, evidently did not have it. Many excuses have been offered for the weakness indicated in verse eight. It has been said that he was cautious, or that he wanted to give the place of honor to Deborah as the leader of her people. These suggestions may be true, but somehow one has the feeling that what he really lacked was the "flaming heart." May God give it to us, that in our much doing of His work the divine fire may warm and inspire us!

**III. A Divine Victory (vv. 12-14).**  
God gave Deborah and Barak a great victory, but note that it was God and not man who brought about the defeat of Jabin (Judg. 4:15, 23). It was a complete victory and the enemies of Israel troubled them no more for many a day.

Dr. Wilbur M. Smith aptly points out that we should look "upon these conflicts in the book of Judges as certainly symbols of the great conflict that every Christian knows as he wrestles, not with flesh and blood, but against principalities and powers, against the world-rulers of darkness and spiritual wickedness in heavenly places. Victory is certain only when the Lord is with us and only when we walk in His will and contend against evil in His power. We are more than conquerors, but only through the Lord Jesus Christ" (Peloubet's Select Notes).

In closing this lesson the writer of these notes wishes to recognize the blessing of God in enabling him to complete two years of this service to Him and to His people. He also wishes to thank those readers in every state of the Union and in a number of foreign countries who have written to him words of appreciation, encouragement and counsel.

**Value of Meditation**  
It is not he that reads most, but he that meditates most on Divine truth, that will prove the choicest, wisest, strongest Christian.—Bishop Hall.

**Attaining Perfection**  
The warm loves and fears, that sweep over us as clouds, must lose their finite character and blend with God, to attain their own perfection.—Emerson.

For Pepsodent—ive than any is now more effective than any. See how Irium helps brush away surface-stains... leaving your teeth equally radiant! And Pepsodent contains NO GRIT NO RUBBING! So give Pepsodent a try.

# WHAT TO EAT and WHY

Houston Goudiss Recounts the Miracle of Milk

Food Authority Explains Why It Is the Cheapest and Most Nearly Perfect Food

By C. HOUSTON GOUDISS

ALL the foods known and used by man, milk is supreme. It is a miracle of perfection—a veritable elixir

has powers possessed by no other food. It builds sturdy for infants; strong bones and sound teeth for growing; helps to maintain vitality in adults; and to delay the onset of old age.

It contains a greater assortment of nutritive materials than any single food. It is the basis of every balanced diet for mankind—in infancy, childhood, and old age—it is the cheapest and most easily assimilated food we have.

It is so many-sided that I almost think of it as the Benjamin Franklin of foods. It is a vast treasure chest of nutrients—the most complex product of nature's chemistry. It contains nearly every chemical element of the body itself, in proportions adapted for quick and easy assimilation.

Milk fulfills six requirements of a perfect food: It supplies carbohydrate for heat and energy. It furnishes protein that is building for the millions of cells that are worn out daily.

It yields minerals which are essential for the internal processes of the body. It contains every known vitamin in some degree and is richly supplied with the vitamins that are necessary to the smooth running of the body machine, and to the prevention of many types of infection.

It contains water, to act as a solvent, a carrier and regulator of the body's processes. It is easily digested. A brief summary helps to explain the unique place of milk in our diet.

Think of it! In one ounce of milk is more protein than in the high-carbohydrate and fat-rich butter; every one of the vitamins demanded by the human body; and an easy digestible food that readily changes these into vigorous life.

**Biggest Food Bargain**  
Occasionally hear the charge that milk is too high in price—that it is a luxury to afford enough of it to supply a quart for every child—at least a quart for each adult. That is ridiculous. The cost of milk is much less than the cost of illness. Milk is not a luxury, but an indispensable necessity.

Remember that no homemaker should not buy milk in increments—that if she desires efficiency and longevity for her family, she must provide a sufficient amount of milk before she purchases any other food.

**Milk for Children and Adults**  
Milk is the food that children and adults need in the garden and the field. It is the blessing that makes the field fruitful. It is the food that children need to grow and to live. They are thin and weak; their resistance is low; they fall easy victims to the germs of disease; they have small hope of their reaching manhood and womanhood.

Milk is only a food for children. It is likewise essential for adults who desire to live longer, and healthier lives—to

**How to Know How to Balance Your Diet?**  
A Free Chart Makes It Simple as A-B-C  
Helps to Safeguard Health

Having a balanced diet will be a puzzle if you send for the Nutritionist's Chart for Checkup. It is a chart for checking up on your diet, offered by C. Houston Goudiss.

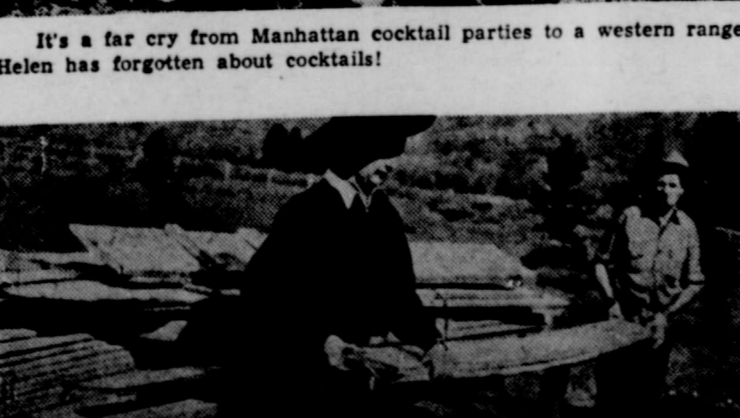

It lists the foods and the standard amounts that should be included in the daily diet, and includes a menu for breakfast, lunch and supper, to help you in selecting the proper foods in each classification.

It is sufficient to bring you into the world of good mean planning. Just ask for the Nutritionist's Chart for Checkup. Address: C. Houston Goudiss, 6 East 39th Street, New York City.

© WNU—C. Houston Goudiss—1936—19

Seven years ago Helen Dobson deserted society life in eastern cities to buy a ranch in the Sawtooth mountain wilderness of Idaho. Here she has learned to do everything a rancher should, chopping wood, handling horses, hunting big game and even building her own house. Her former society associates may scoff, but Helen likes it.

## Designs for Sheer Cottons

THESE pretty styles will make you and your daughter feel fresh and cool, and look smart and charming, when you go out to tea parties or dinner, these midsummer days. They have a summery, dressy effect, and yet they are not fussy. Make them yourself, and have something very individual as well as fashion-right. It's so easy; a detailed sew chart comes with each pattern. And you can wear much prettier materials when you sew your own—at big savings, too.

**Afternoon Dress With Shirring.**  
Shirring is one of the smartest details you can choose—it's used just this way in new and expensive models—on the shoulders, to give fullness over the bust, and at the sides only of the skirt. Thus your dress has animation and grace, and yet the front and back are plain and won't crush and muss when you sit down. In dimity, voile, organdy, handkerchief lawn or mull, with a youthful tie belt and frills of lace, this will be the most flattering frock you own.

**Bolero Frock for Little Girls.**  
With or without the sleeveless bolero, this dress is a perfect darling for little girls! It's so simple and yet it has loads of style, with its very puffed sleeves, very full skirt, and little round collar. Notice how short the bolero is—that's the smart new kind. Make this up in dotted swiss, dimity, organdy or batiste, and trim it with ricrac, Irish edging, or linen lace. It's a pattern that you and your little

girl will both like so well that you'll make many times over. It will be nice for school in fall fabrics, too.

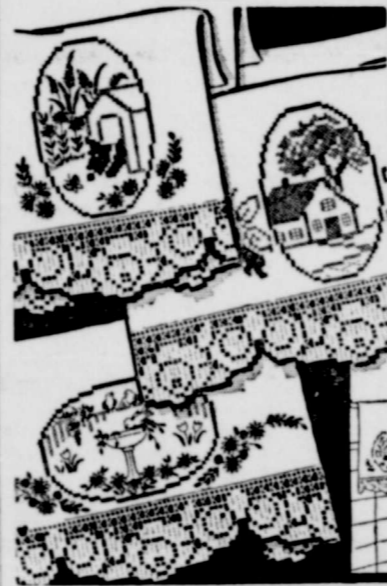

**The Patterns.**  
1505 is designed for sizes 4, 6, 8, 10 and 12 years. Size 6 requires 2 1/4 yards of 35 inch material for dress alone. Three-eighths yard for bolero; 1/4 yard for contrasting collar, if desired. Two and three-eighths yards is required for trimming bolero and collar.

1545 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 4 1/2 yards of lace edging for neckline and sleeves. One and one-fourth yards ribbon for belt.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate.—WNU Service.

## Combine Crochet and Cross Stitch

Pattern 6106.

A quick "beauty treatment" for your linens—this easy-to-crochet border and simple embroidery motif! Pattern 6106 contains a transfer pattern of two motifs 6 by 11 inches, two motifs 4 by 12 inches; and two motifs 5 1/2 by 6 inches; chart and directions for crochet; color schemes; illustrations of stitches; material requirements.

To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle, Household Arts Dept., 259 W. Fourteenth St., New York City.

Please write your name, address and pattern number plainly.

## Czechoslovakia

The republic of Czechoslovakia is composed of two branches of the same Slav nation: the Czechs of Bohemia, Moravia and Silesia, and the Slovaks of Slovakia.

The state came into existence on October 28, 1918, when the national council took over the government of the Czechoslovak countries, which had formerly belonged to the Austro-Hungarian monarchy. The Czechoslovak national assembly met in Prague on November 14, 1918, and formally declared the Czechoslovak state to be a republic.

## Gold Rush Crime Wave

Crime was rampant in San Francisco during the gold rush during the early fifties. Up to 1854 there were 4,200 homicides and 1,200 suicides, while the records of the next few years showed many deaths by violence, the high mark being reached in 1855 with 585. In 1851 the Vigilance Committee was formed to attempt to free the city of most of the lawless element. By 1856, when it came together a second time, order was restored in the community. More than 8,000 citizens served on the two committees.

Mr. and Mrs. Clarence Willis and Denny B. of Plainview were visiting here Sunday.

Mrs. W. A. Rowell and Mrs. Virgil Baldwin visited Mrs. A. T. Voyles' Sunday.

## DON'T OVERLOOK CASH

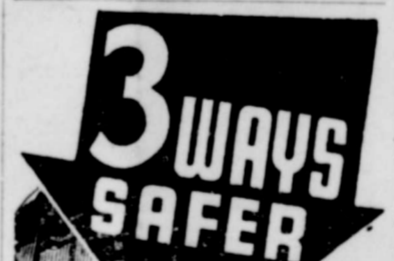

Persons entitled to lump sums under the old-age insurance program are being paid 3 1/2 percent of wages received from covered employment after 1936, and up to attainment of age 65 or death. For example, if a worker's wages during this period amount to \$1,000, the lump-sum payment would be \$35. Information concerning the filing of a claim may be obtained from the Social Security Board, 1012 Oliver-Eagle Building, Amarillo, Texas.

## CLAIMS BEING PAID

Workers in the broad fields of industry and commerce who have reached age 65 since January 1, 1937, are eligible to file claims for lump-sum payments. The applications should be sent to the Social Security Board, 1012 Oliver-Eagle Building, Amarillo, Texas.

Deductions from wages under the Social Security law are for Old Age Insurance ONLY. Employee contributions for Unemployment Compensation is prohibited by law. All contributions to the Jobless Fund are made by employers.

**CORD-LOCK CONSTRUCTION MAKES SIDEWALLS 31% STRONGER**

**MANSFIELD Tires**  
EXTRA MILEAGE  
The Cord-Lock increases your safety 31%, because it puts more strong cord fabric into the sidewall to reinforce the tire for high speed service. That plus the welded steel wire bead, 7 times stronger than needed, and the Speed Grip tread, wide and deep channeled for greater non-skid mileage, are the reasons why Mansfield Tires are actually 3 ways safer. You always get more mileage than you pay for.

**Maurice Foust**

## ERNEST THOMPSON CAMPAIGNS IN PANHANDLE

Signally honored by his home town, Amarillo, and his home section, the Panhandle, during the past week end, Ernest Thompson this week continued his campaign for governor with renewed confidence.

After turning out 12,000 strong to hear his red-headed favorite son deliver a campaign address Saturday night Amarillo further honored Thompson by designating him as its "first citizen" to welcome President Franklin D. Roosevelt to the city Monday.

It was not the first time Thompson had had direct dealings with the president. Last year Roosevelt selected the Texas railroad commissioner to represent the United States at the world oil conference in Europe.

After greeting the president, whom he had praised highly in his speech Saturday night, and after having received assurances from all over the Panhandle that he will carry that section by a clear majority, Thompson plunged into another hard week of campaigning—with election day no further away than July 23rd.

Tuesday he visited at Canyon, Happy, Tulla, Kress, Plainview, Hale Center, and Abernathy before winding up with an address at Lubbock.

His Wednesday itinerary recorded a jump into Central Texas with dates at Riesel, Granger, and San Antonio.

Thursday he will be in Orange, Port Arthur and Beaumont.

His Friday schedule lists Silsbee, Kountze, Woodville, Newton, Jasper and Lufkin.

He will close out the week Saturday at Nacogdoches, San Augustine, Center, Hemphill, Carthage and Marshall.

## WHERE TO FILE CLAIMS

Application for a lump-sum payment under the old-age insurance program may be made by a close relative of a deceased worker, if he worked after 1936 in a covered employment. Claims should be filed with the Social Security Board, 1012 Oliver-Eagle Building, Amarillo, Texas.

P. D. JASPER (Re-election) GRADY WIMBERLY

### FOR COMMISSIONER Precinct No. 4

J. R. FOUST (Re-election) D. T. (Chick) NORTHCUIT

## INSECT PROJECTS

Two of the most useful types of 4-H projects conducted in various sections this season are insect-study and insect-fighting.

The movement is becoming more and more widespread, according to authorities.

There are many projects for the study of the types and habits of insects.

An army of thousands of 4-H members has taken the field against the white-fringed beetle in Alabama.

The average benefit check during May amounted to \$8.59, representing a week's compensation for a totally or partially unemployed worker.

## FARMERS' ECHO

Farmers' cash income from marketings was a little less than last year. In 1937, it was reported by the Bureau of Agricultural Economics to be slightly more than \$1 billion, compared with \$950 million in the first six months of 1936.

Less than TWO percent of the total population will send the Briscoe County News anywhere in the world.

**Kedette Stompers**

FOR WOMEN, MISSES & CHILDREN

These attractive easy shoes are the latest in footwear --- are being worn more, and advertised more than anything in America in the way of stylish footwear.

They're made with solid gum rubber soles, with regular or wedge heels. Stompers in either solid or combination colors; or a beautiful leopard skin design.

**They're Washable**

Just throw them in the machine with the rest of the wash --- they'll come clean and sparkling.

If you haven't seen any "Kedette Stompers", we want to show them to you --- and when you see them, and their cool comfort, you will want a pair. They are priced at a very low figure . . . . . \$1.98 and \$2.95
