Behind the Scenes In American Business

By John Craddock

"Peace, it's won't" That is quite evidently the reaction to the calmer atmosphere, and to it, business and industry are turning up some highly encouraging statistics. Almost 225,000 1939 autos will roll off Detroit assembly lines this month. Orders for new models increase the best in 10 years. Wholesale buying last week set stock prices to new peaks. Activity in the nation's steel mills is moving upward at a faster pace than usual for some time. National income rose \$5,200,000,000 in the second half of this year, the biggest in a decade, according to estimates.

WASHINGTON—With the general election only three weeks away, political interest now centers on the outcome of the contest for House seats and 33 senatorial seats. One survey, among newspaper correspondents and political predicted Republicans will win fifty seats in the House and 17 in the Senate. In regard to general economic situation, government circles are seeing that prices don't soar too high and force a recession similar to the one just left behind. In legislation is in the wind to price levels.

ON THE FARM FRONT—Many farms lacking satisfactory refrigeration have been confronted with the perplexing problem of how to cool milk in preparation for shipping. Several devices are on the market which give a solution, the best of which is a unit consisting of a pan-like aluminum can which fits the top of the milk can and is equipped with a motor and agitator shaft stirring the milk. Water from the farm system operates the motor and then drains down over the side of the can through perforations in the aluminum cover. This shows that the milk temperature is lowered from 98 degrees to 52 degrees in 15 minutes with a saving of 52 degrees temperature. (Continued on back page)

Lockney Defeats Owls In Conference Tilt

NEED OF GOAL-POSTS

A University professor was talking recently with a group of his students. He called on them to be men and play the game of life. "But how are we going to play the game of life," one of the students asked, "when we don't know where the goal-posts are?" That is the trouble; how are we going to make a great life when you have no assurance that life itself has any meaning, or purpose, or significance? If there are no goal-posts, there can be no game. Our first business is to find the goal-posts for the greatest of all adventures. Our task is to rediscover the foundation on which a great spiritual civilization can be built and great lives fashioned. Will you continue this thought with us in the Presbyterian Church next Sunday morning. A timely thought for a timely day. Our evening service will be held at 7:30 o'clock. Go to Church somewhere this Sunday, and join with the best people in our community.

MRS. W. COFFEE HOSTESS TO HARMONY CLUB

In the pleasant home of Mrs. Woodson Coffee, the Harmony Club enjoyed a profitable and social evening, last Wednesday afternoon, October 12. Mrs. Coffee was hostess, and read an interesting paper, "Spanish and Mexican Music." Mesdames Bursota and Arnold sang "Farewell" Spanish Folk Song from New Mexico. Then came the social hour and refreshments. Those present were Mesdames John Thorns, Gordon Alexander, Bland Burson, Ned Baird, Theron Crass, John Arnold, Miss Murphy, and the hostess, Mrs. Coffee.

RONALD ANDERSON STRICKEN WITH APPENDICITIS

Ronald Anderson, son of Mr. and Mrs. T. L. Anderson, was stricken with appendicitis while on his way to the A. and M. — T. C. U. football game last Saturday. He saw the game through and then went to a doctor who called it appendicitis. He was operated on immediately and the surgeon said that another hour would have meant a bursted appendix. He came through the operation in good shape and will be out of the hospital in a few days, although he will be absent from his work in Ft. Worth for some time.

Silverton Journeys To Estelline Friday For Conference Game

Lockney 33; Silverton 0. That just about sums up the ball game Friday in which Coach Aulton Durham's outclassed, but not outfought, Silverton Owls lost to the heavier and most experienced Lockney Longhorns.

It was the Longhorns ball game all the way, the Owls getting no closer to pay dirt than the Longhorns twenty-nine yard line. The Owls go to Estelline Friday to take on the Bearcats. The Estelline boys will be out to avenge the 6-0 defeat handed to them by the Owls last week. Estelline looked good last week in defeating the Quitaque Panthers 20-7. This isn't bothering the Owls though who intend to get back in the "Games Won" column by taking the Bearcats into camp.

First Quarter
The Lockney boys scored an easy touchdown in the opening two minutes of the game, when they recovered a fumble on the Owls 21 yard line following a punt on the first play of the game. The Longhorns scored again in the last two minutes of the first quarter when a Lockney player broke thru and blocked a Silverton punt on the Owls 23 yard line. Three plays gave the Lockney boys their second touchdown of the game and the quarter ended with Lockney leading 14-0.

Second Quarter
The second quarter opened with Brothorn, Lockney back, cutting off-tackle for 21 yards and a first down on the Silverton 13. The Silverton boys tightened up and took the ball over on downs. The Owls punted but Lockney in four plays were back to the Owls 11 yard stripe. The Owls once more came thru and allowed the Longhorns only 7 yards in 4 tries and once more gained possession of the ball. The Owls once again punted and Lockney after gaining only 2 yards in the same number of tries punted out on the Silverton 26. The Owls tried a couple of passes, both which were incomplete, and on the third down Hank Brown got off a nice 45 yard punt which was returned to the Lockney 40. The entire Lockney second team was sent in at this time. Three plays picked up 4 yards and on the fourth down, Rowell, Silverton center, blocked a Lockney punt on the Longhorn 42 yard marker. The Owls tossed a couple of incomplete passes as the second quarter ended. Score: Lockney 14; Silverton 0.

Third Quarter
The second half opened with Lockney receiving the kickoff and returning it to their own 25. The Longhorn started a touchdown march that chalked up two first downs and ended with a 23 yard touchdown pass. The try for extra point failed when Perry, Silverton guard, broke thru and blocked the kick. Lockney scored once more in the third quarter when they took the ball and marched 75 yards for their fourth counter. The quarter ended when a Lockney player intercepted a pass near mid-field.

Fourth Quarter
The Longhorns scored their last touchdown early in the fourth quarter. (Continued on back page)

AGGIE BRIEFS

By Finley R. White

Cotton harvest is in full blast this week. All gins in the County are having a good run. Of course the gins are not being taxed to capacity this year like they were last year because we're not making half as much cotton this year. Last year Briscoe County ginned better than 12,000 bales of cotton, but this year it will crowd us hard to gin 5,000 bales.

One interesting fact is noted in the staple of the cotton crop this year. Generally speaking the staple is much better than it was last year. The difference in loan value of long and short staple cotton this year is making the half and half boys sweat blood—but that is as it should be. Why produce short staple cotton when there is no demand for it? The time is rapidly coming when the fellow who produces short staple cotton will have to beg some one to buy it. Every effort should be put forward to wipe out short staple cotton. Let's all plant good long staple seed another year so we won't be found begging when selling time comes next fall.

Wild Life and Game Management
Mr. R. E. Callandar with the Texas Extension Service met with a group of farmers and ranchers of Briscoe County, Monday. At this meeting Mr. Callandar outlined the possibilities of Briscoe County's wild life. He also gave some valuable suggestions on the management of this wild life. The points Mr. Callandar stressed in game management were 1st. feed and coverage; 2nd. protection from man and beast; and 3rd. regulation of the harvest. By following these 3 simple suggestions we can soon have lots of game birds to hunt.

It was brought out in Mr. Callandar's talk that it will be possible for us in Briscoe County to trade quail for wild turkey and Antelope. Before such trades can be made it will be necessary for us to form a game management association in Briscoe County. Plans are almost complete for the formation of this association. Mr. Callandar pointed out that by working with our game warden it is possible for us to secure game fish for our farm ponds and tanks. By stocking our tanks and ponds with good fish we should soon be able to supply Briscoe County sportsmen with ample fishing — where they can catch plenty of fish.

This work will necessitate the whole hearted co-operation of everyone in the county if we obtain the best results. Be ready so that when you are called on you can put your shoulder to the wheel and do your part.

Wheat Insurance Premiums
There were about 135 applications filed for insurance under the Government Wheat Insurance plan. To date many of those who made application have not paid their premiums. Premium notices have been mailed to those who made application. On this premium notice is shown the number of bushels or the amount in dollars and cents necessary to pay the premium. There is also shown on this notice the last date on which the premium can be paid—if not paid by the last date shown it will be necessary to have the premium re-computed — because of the change in the price of wheat. The final date for having premiums re-computed has not yet been set. We will notify you when they are.

Stubble Checks Wind Erosion

Stubble of Sudan grass or any of the other sorghums, when protected from overgrazing by livestock, binds the soil and prevents erosion during the period of high winds. The Soil Conservation Service points out. This farmer, cooperating with one of the demonstration projects, is leaving a stubble from 8 to 12 inches tall as he harvests his Sudan grass crop for feeding during the winter.

JIM WHITELY WRITES FROM CALIFORNIA

Writing from the Beach at Santa Monica, California, Jim Whitley tells of his enjoyment of his recent visit to Silverton—regrets that he did not have time enough to spend here.

One of Jim's main reasons for cutting short his Silverton visit was his attending the National American Legion Convention at Los Angeles. He says that it was a real thrill and honor to belong to the organization staging such a huge convention. He describes in detail the opening program, staged in the Hollywood Bowl, which seats 50,000 people and at which many more people were turned away and given standing room. The grand parade through Los Angeles grand coliseum, which seats 90,000, started at 9:00 A. M. and lasted until 11:00 P. M.

At the evening program the movie stars were all there in person, and in summing the whole convention up, Jim says it was "a grand show, much grander than I had ever hoped to see." Mr. Whitley had eighteen patients under his care during the convention. He is employed at the Veteran's Hospital in Los Angeles, California.

OUT-OF-TOWN SPEAKER AT 1925 STUDY CLUB

Mrs. J. H. Walker of Plainview addressed the 1925 Study Club members at their meeting Wednesday at the home of Mrs. Bland Burson.

Mrs. Joe Wayland, another prominent clubwoman of Plainview made a short talk.

This was a Federation Day program and the members answered the roll call with a Federation Highlight.

HALE COUNTY SINGING CONVENTION TO MEET AT FINNEY BAPTIST CHURCH

The Hale County Singing Convention will meet at the Finney Baptist Church next Sunday, October 23. Everyone is invited to attend and singers are urged to bring books as several special numbers will be expected.

The Finney Baptist Church is located six miles north of Plainview on the Amarillo Highway, in the Liberty Community.

NEWS BITS

From Neighboring Towns

Human Skeleton Found
A human skeleton was found within a block of the Matador County court house in Matador last week. From the condition of the bones it is thought that burial on the creek bank was made at least a century ago. The bones may be those of an Indian woman and death was caused from a skull fracture, says the Matador Tribune.

District Judge Dies
E. J. Pickens, District Judge of the 84th Judicial District, died at his home in Canadian, October 7. He had been ill for a year. According to the Panhandle Herald, Curtis Douglass has been appointed by Governor Allred to succeed Pickens.

Student Injured
Bill Longbine, of Claude, Texas, student at WTSTC, was seriously injured in an auto accident south of Amarillo last week when the car driven by James Blaine of Claude, was crashed from behind by Erwin Grisham of Plainview. Longbine was the only one injured, although both cars were badly damaged, according to the Claude News.

Contract For REA Lines
A contract was let last week in Floyd County for the building of 170 miles of electric lines on the Rural Electrification project. The contract price was \$150,000. The 170 miles will cover Floyd County with main arteries for the electric system, says the Lockney Beacon.

Oil Test Looks Better
Work on the wildcat test near Hedley was shut down last week because of minor cave-ins. However, at the depth of 3647 feet gas was encountered and, according to the Donley County Leader, the prospects are very favorable.

CHRISTOPHER CHOSEN FOR RIDING BEFORE CAMERAS

Word was received here that Sidney Christopher, formerly of Silverton, and now a member of the U. S. Cavalry, was the only one from his company, who was chosen by Paramount, Pathe, Universal and Movietone Studios, to appear before their cameras. He was chosen because of his graceful and excellent riding.

Good riding and good horses were necessary as the horses were ridden at a breakneck speed down a steep mountain while the pictures were being filmed. The pictures will be used in news reels.

Are You Having A Party?

Let Us Do Your Baking

We specialize in all kinds of baking for parties and special occasions. Birthday cakes, gift cakes, pies, cookies—let us know what you'd like to serve and we will help arrange the details.

Stingless Hornets Met Hootless Owls

Main Game of Season Set Friday With Quitaque Panthers, Ancient Rivals

The Tullia Hornets and Silverton Owls battled to a scoreless tie before a record Armistice Day crowd. The field was wet and slowed the game up somewhat, but both teams displayed a good brand of football. When their opponents would push them back in their territory, both clubs would tighten their defense and the result was a scoreless tie. The Owls were in scoring position in the third quarter, but were held for downs by the hard fighting Hornets, led by their galloping gazelle captain in the form of Berlin Martin, who time and again broke loose with some nice gains. McClendon and Patton were the sparkplugs in the Owls' offense.

The Owls go to Quitaque Friday for a tussle with their ancient rivals the Panthers. The Owls are out to wipe out the 2 to 0 defeat handed to them last season by the Panthers. This game should afford fan plenty of dash and color.

GAME PLAY BY PLAY

First Quarter
Owls received kick, 1st down on pass to Strickland; two first downs in succession on line plunges; forced to kick, out of bounds

on Tullia's 30 yard line. Tullia made 1st down on a fake; two first downs in succession line bucks; lost 15 yards on fumble and kicked. McClendon made 1st down, added another with aid of offside penalty; then a first on plunges. Quarter ended with ball in Silverton's possession on Tullia's 32 yard line. Score: 0 to 0.

Second Quarter
Patton made first down thru line to Hornet's 20 yard line. Ball went over on tries at bucks and passes. Hornets could not gain and kicked. Owls made first down on bucks. Lost ball on fumble. Hornets made a first down thru line, then lost ball on downs. Owls lost ball on fumble again. Tullia had a 15 yard penalty slapped on them and had to punt. Owls made first down on line plunges, and half ended. Score: 0 to 0.

Third Quarter
Hornets kicked off. Owls made first down on long end run, could not advance again and had to punt. Tullia lost five yards on fumble, and were forced to punt; Owls blocked the punt and carried ball to Hornets 12 yard line. After gaining 7 yards, ball went over on downs. Tullia's ball on their own five yard line. With back to goal post Hornet punter made nice kick, which was returned for good yardage by McClendon. Silverton had

to kick and ball went out of bounds on Tullia's 22 yard line. When ball came back into Owls' possession, Hornets intercepted a pass, but had to punt. McClendon returned 8 yards to Tullia 42 yard line when quarter ended. Score: 0 to 0.

Fourth Quarter

This was a passing quarter, with both sides in desperate effort to register a marker. Silverton kicked to Tullia 10 yard line and it was returned 10 yards. Tullia kicked to Silverton's 20 yard line, and McClendon brought it back 10 yards. McClendon made 11 yards on a pass. Punted to Tullia's 10 yard line, 5 yard return made. Hornets suffered 15 yard penalty after some gain, and kicked to center of field out of bounds. Owls had to punt, and receiver was downed in tracks on Tullia 25 yard line. Hornets made a first down through line. Two forward passes netted two more first downs, but had to punt. Silverton's ball on their 24 yard line. Owls completed a long pass for first down. Another pass was tried, which Hornets intercepted and made long return to Owls' 25 yard line where the game ended. Score 0 to 0.

(Ed. note—The above story was taken from the files of the Briscoe County News, dated, Thursday, November 14, 1929.)

Weekly News Review President's Peacemaker Role Seen as Campaign Strategy

By Joseph W. La Bine

Politics

On Tuesday, November 8, the United States will elect an entire house of representatives, one-third of its senate and a host of governors. Since U. S. politics swings back and forth from Republican to Democratic domination, since the Democratic swing which began in 1933 has reached and passed its peak, the safest prediction is that Republicanism will start swinging back into power this year.

FRANKLIN ROOSEVELT At election time, a peacemaker.

party purification, November 8, election has resumed normal political color for the first time since 1930.

As in 1936, this year's Republican candidates can base a strong campaign on New Deal failure. Unlike 1933 and 1936, this year's Democratic campaign becomes essentially a defensive proposition. But developments of the past month show that the New Deal's defense will not feature such argumentative points as AAA, relief and budget-balancing, will attempt instead to shift public interest on Franklin Roosevelt's accomplishments as a peacemaker.

World Peace: The world may never know if President Roosevelt helped smooth over the Czech-German crisis, but his final message to Adolf Hitler and simultaneous pleas to every other world power came only a few hours before the Reichsfuehrer called his historic Munich parley. But, coming when it did, Roosevelt's intervention looked tremendously successful. Thus, praising the administration's foreign policy as a safeguard to world peace, Democrats hope the voting public will overlook the fact that Munich's meeting did nothing to help democracy's cause, was instead a bloodless victory for Germany.

Business Peace: If the administration's foreign policy helped win world peace, it also helped U. S. business. Upshot has been a tremendous stock market upturn, greater steel and automobile production, higher railroad loadings. But part of this upturn is also due to governmental "pump priming," which is just beginning to show its effect. Nevertheless these signs of optimism came at a time when U. S. business decided to quit warring on the administration, choosing instead to play ball until a Republican government throws out New Deal measures which it considers oppressive. President Roosevelt has asked for less "saber rattling" and more cooperation between government and business. Charles Hook, president of the National Association of Manufacturers, has assured him that business is eager for co-operation. Thus, Franklin Roosevelt looms as a peacemaker with business.

Industrial Peace: When the American Federation of Labor convened in Houston, Texas, the President messaged his desire for a settlement of the factional war between A. F. of L. and John Lewis' Committee for Industrial Organization. Obviously a solid labor front, though New Deal, would be a potent vote getter. How it could exercise this solidified strength against employers is an unpleasant thought, but the average business man is inclined to hope a patch-up will bring more conservatism to labor. Though the President's peacemaking effort has completely failed, the nation may well appreciate his gesture.

Despite the political connotations these peace efforts must certainly carry during election season, the President's self-chosen role of arbiter wins favor with a war-weary U. S. populace. Whether this popular appeal will overshadow Republican criticism on November 8 is anybody's guess.

Domestic In 1930 the census showed 25.3 per cent of all U. S. women over 16 were gainfully employed. By 1937, said John D. Biggers, resigning as head of President Roosevelt's unemployment census, the percentage had jumped to 31.7. Reasons: (1) technical and cultural changes; (2) economic necessity. Mr. Biggers found the corner bakery and laundry relieved Mrs. Housewife of many duties, leaving her free to boost the family's income or replace an unemployed husband as breadwinner.

His comment: "This is an economic and social trend worthy of consideration." A much more blunt comment came from the Rt. Rev. Msgr. Fulton J. Sheen, famed radiator and faculty member of the Catholic university at Washington: "The only real success for a woman, the only real vocation is motherhood. . . Why be equal to men when you are superior?"

Until this year, most U. S. citizens regarded the foreign spy as a comic strip and fiction character, although government intelligence officers have long known the nation is infested with agents from Russia, Germany, Italy and Japan. First real action to combat spies is the house committee on un-Americanism which has heard evidence connecting espionage with everyone from Shirley Temple to unnamed industrial magnates. Incoherent though its findings may be, the un-Americanism committee has crystallized enough U. S. sentiment to demand action. After reviewing the situation, President Roosevelt has laid plans for co-ordinating the work of such spy seekers as the army and navy intelligence departments, federal bureau of investigation, secret service and other treasury law enforcement units. Already in operation is a new law requiring all agents of foreign principals to register with the state department. Though the measure has no teeth, it will enable the U. S. to keep an eye on propagandists, thereby paving the way for action against spies.

Regardless of who holds power when civil service is expanded, it will create furor in the minority ranks because present job-holders will be favored. On this assumption, a furor will come in Republican ranks February 1 when 81,000 Democratic workers in so-called emergency agencies are moved into civil service classification. Another 44,000 may be added later.

Foreign Since the notorious peace of Munich, almost every day has seen the stars of Great Britain and France descend to new lows, torn by disension from within, heaped with ridicule from without. Hardly had Alfred Duff Cooper resigned from the British cabinet in protest against Prime Minister Chamberlain's "sell-out" before Winston Churchill arose in the house of commons to state his views. He prophesied that England will be dependent on German good will for its very existence. "We have sustained defeat without war, and the whole equilibrium of Europe has been changed," he summed up.

That Prime Minister Chamberlain agrees is shown by his insistence on a high-speed rearmament program, a move quite contradictory to his Anglo-German peace pact and his treaty with Italy. It is an admission that not even Mr. Chamberlain trusts Adolf Hitler or Benito Mussolini very far.

Meanwhile, France has been quick to make peace with Italy by recognizing her conquest of Ethiopia.

Winston Churchill is shown in a dark suit and hat, looking thoughtful. He is standing among other men in a public setting.

WINSTON CHURCHILL He, among others, was ashamed.

Her parliament, by overwhelmingly approving the Munich pact, agreed that no price was too high for peace even though it meant relegating France to the position of a second-rate power. But sorely-taxed Frenchmen want to know why they must pay for a huge army and navy that refuses to fight.

There are other signs, as well. The resignation of Czech President Eduard Benes in the face of growing public sentiment against weak-kneed democracies, indicates that Czechoslovakia is giving in to demands for co-operation with the Rome-Berlin axis. It is almost humorous to reflect that Great Britain has agreed to defend Czechoslovakia's integrity. Even more tragic is Chancellor Hitler's demand for reparations from Czechoslovakia, to be paid out of the \$150,000,000 loan recently granted the Czechs by Great Britain.

With central Europe turned over completely to dictatorship, with Russia breaking her French alliance and crawling back into silence, France and Britain apparently stand alone, friendless, merely tolerated by their "friends"—Italy and Germany.

Taxation Though campaigning politicians do not speak of it, next winter's congress will probably turn the income tax headache into a nightmare. With another federal deficit in prospect, with high income brackets already taxed to the limit, the solution will be a broadening of tax base on middle and low income groups, i. e., the man making less than \$50,000 a year. Present exemptions are \$1,000 for single persons, \$2,500 for married persons, with \$400 extra for each dependent under 18 years of age. If 2,067,736 persons filed 1935 returns on that basis, an estimated 8,400,000 would yield from \$200,000,000 to \$500,000,000 more under the proposed plan for reducing exemptions to \$500 for single persons, \$1,000 for married persons and \$200 for dependents. Chief victims would be those now paying in the low income brackets, a prospect that bodes virtual political suicide for any congressman who favors the measure. Only alternative would be federal sales taxation, which "horried" President Roosevelt when he first took office and has since been a dead issue.

War A weird combination of communistic-democratic government rules Loyalist Spain, plainly holding the sympathy of democratic France and England. Rebel Spain has the support of totalitarian Italy and Germany. Since the totalitarian team beat the democratic team at Munich's recent peace parley, Loyalist Spain wonders if she will not become another Czechoslovakia, sold down the river to keep peace in Europe's quarrelling family. This theory has been borne out in talk of an Anglo-French-Italian pact whereby Italy would withdraw the support to Rebel Spain (a move already started), whereby France would close her border against arms shipments to Loyalist Spain. Thus isolated, Spain's civil warriors would eventually be brought to talk peace. Since France and England are anxious to keep Italy's good will, there is every reason to believe that ultimate victory would come to Premier Benito Mussolini's very good friend and ally, Rebel Generalissimo Francisco Franco.

Bruckart's Washington Digest Old Trickery Again Being Used In Writing Views of a President

That Intangible Personality, the 'White House Spokesman,' Is Back on the Job; Makes Goats of Writers; Taxes Blamed for Added Burden Business Carries.

By WILLIAM BRUCKART WNU Service, National Press Bldg., Washington, D. C.

WASHINGTON. — The "White House Spokesman" is back! That ghostly, shy and sometimes playful figure has been resurrected from the grave where President Roosevelt interred his intangible personality early in March, 1933. He was placed there with proper ceremonies by Mr. Roosevelt after his witchlike voice had served during the administrations of Presidents Coolidge and Hoover, and after he had served valiantly as the source of one inspired news story after another. Mr. Roosevelt unmasked the "White House Spokesman" as just the President of the United States, speaking behind his hand. But lo! Here is that man again.

I could not help laughing a bit the other day when the "White House Spokesman" resurfaced on the front pages of metropolitan daily newspapers, in the work-a-day clothes of "authoritative White House sources." Grieving as most writers did that this trickery had to be employed in order to write a President's views, I enjoyed the humor of the situation, nevertheless. If the White House Spokesman was going to be reborn, what more proper place could there be than Hyde Park, N. Y., the President's summer home. That delightful home on the banks of the Hudson river is only about the length of an airplane runway from the fiction scenes of nightly riding by "the headless horseman of Sleepy Hollow."

But restoration of the "White House Spokesman" to his place of eminence is a serious matter. Use of such a disguise, such a mask, has no place in American life. Many a time in the period when Calvin Coolidge and Herbert Hoover occupied the White House, there were stories sent to all parts of the nation that came from the "White House Spokesman." It was a silly procedure. It was both silly and cheap. The head of the government was simply using the correspondent as a vehicle to carry the responsibility which the then occupant of the White House should have assumed.

Some stories were trial balloons; some were expressions of a personal opinion by the President which he was not quite ready to espouse publicly, and others were pieces of just plain trickery, given out with the understanding that the President should not be directly quoted. The course was adopted, so it was claimed, as a means of giving the writers all of the available facts right up to the minute.

Just Kidding and Fooling Readers of Newspapers Well, without questioning the sincerity of purpose, the fact remains that the writers were the goats. And here they are being made the goats again, and the public, the readers of newspapers, are to be kidded and fooled some more. What's the excuse? There is none. It is the same old ostrich and the same old sand in which he is hiding his head; so why do it?

The present, and rejuvenated, "White House Spokesman" had a good deal to say, behind this shadowy veil, about the desirability of a truce between business and labor, and to Secretary Ickes. Each of these has had several turns swinging a bludgeon at business men, and they will swing them some more.

Needs Encouragement From Leaders in Public Life The "White House Spokesman's" suggestion about a truce and co-operative effort between business and government brought a response from Charles M. Hook, president of the National Association of Manufacturers, who assured the President that "there will be no rattling of sabers as far as the manufacturers are concerned." He said there would be an upward surge in business "if there is encouragement from leaders in public life." I am not able to say what is meant by the "no saber rattling" beyond the obvious meaning of a willingness to shut the collective business mouth.

Actually, it appears the crux of the whole problem is to be found in the fact that throughout the Roosevelt administration there are many officials who blab and blab and have little or no idea of the matter they are discussing, while on the business side of the fence the fellows who pop off most are incapable of far vision.

Blame Taxes for Added Burden Business Carries The news dispatches from Hyde Park made reference to unfair stories about taxes. The "Spokesman"

specifically asserted that business interests were all wet when they asserted that federal taxes are heavier now than one, three or five years ago. It struck me as being a queer complaint, because federal taxes are higher; there are more of them in number and the rates on nearly all the old ones are higher. Treasury figures show that the federal government collected \$3,115,000,000 in taxes five years ago. The same official figures show collections of more than \$4,100,000,000 three years ago, and in the fiscal year ending June 30, 1937, the collections were announced as \$5,290,000,000. Then, on June 30, this year, the official figures recorded collections of \$6,240,000,000. To be absolutely fair, it must be considered that business was at its lowest ebb five years ago. Hence, tax payments were at the lowest. But, without attempting to cite all of the increases in rates and new taxes invoked, new taxes and new rates have been responsible, too, for the increased burden which business carries.

It is important, also, in connection with the consideration of taxes to call attention to the federal government's budget condition. At the end of September, when the first quarter of the fiscal year was completed, there was a deficit of more than \$700,000,000. The Treasury had been called upon to pay out \$700,000,000 more than it had taken in by way of taxes. If my country school multiplication still serves me, there is a deficit indicated for the current fiscal year of approximately \$2,800,000,000 since there are four quarters in each year. It may be less—or it may be more.

No 'Breathing Spell' Ever Has Taken Place In the matter of a truce between the government and industry, I believe I recall accurately the famous "breathing spell" of several years ago. Roy Howard, the Pittsburgh and New York newspaper publisher, wrote a letter in which he told the President of the need for co-operation between the government and business and suggested at the same time how encouraging it would be if business could be assured that government harassment of business was at an end. If I remember, Mr. Roosevelt said in his reply that the major portion of his New Deal reforms was completed and there would be a "breathing spell." It was about that time, too, that Vice President Garner was reported to have said it was time to let the cattle get fat; that they had been chased around until they were just skin and bones. He meant, of course, that if business was going to expand and re-employ workers, then on relief, the government must quit taking everything the employers received. Well, neither the "breathing spell" nor the fattening process ever has taken place.

Further, reference might be made to the fact that, not the "White House Spokesman," but numerous spokesmen for Mr. Roosevelt have been having great fun riding astride the neck of business. One can refer to the activities of Robert H. Jackson, trust buster extraordinary; to Thurman Arnold, who succeeded to Mr. Jackson's job in the department of justice; to William O. Douglas, or to Secretary Ickes. Each of these has had several turns swinging a bludgeon at business men, and they will swing them some more.

So, perhaps Mr. Roosevelt's analogy in which he compared the European situation and "settlement" with the idea of a settlement between government and business was not so far wrong. Perhaps the "settlement" by which Hitler took over great chunks of Czechoslovakia is the way the "authoritative sources" or the "White House Spokesman" would have our government take over most private industry.

Needs Encouragement From Leaders in Public Life The "White House Spokesman's" suggestion about a truce and co-operative effort between business and government brought a response from Charles M. Hook, president of the National Association of Manufacturers, who assured the President that "there will be no rattling of sabers as far as the manufacturers are concerned." He said there would be an upward surge in business "if there is encouragement from leaders in public life." I am not able to say what is meant by the "no saber rattling" beyond the obvious meaning of a willingness to shut the collective business mouth.

Actually, it appears the crux of the whole problem is to be found in the fact that throughout the Roosevelt administration there are many officials who blab and blab and have little or no idea of the matter they are discussing, while on the business side of the fence the fellows who pop off most are incapable of far vision.

Blame Taxes for Added Burden Business Carries The news dispatches from Hyde Park made reference to unfair stories about taxes. The "Spokesman"

specifically asserted that business interests were all wet when they asserted that federal taxes are heavier now than one, three or five years ago. It struck me as being a queer complaint, because federal taxes are higher; there are more of them in number and the rates on nearly all the old ones are higher. Treasury figures show that the federal government collected \$3,115,000,000 in taxes five years ago. The same official figures show collections of more than \$4,100,000,000 three years ago, and in the fiscal year ending June 30, 1937, the collections were announced as \$5,290,000,000. Then, on June 30, this year, the official figures recorded collections of \$6,240,000,000. To be absolutely fair, it must be considered that business was at its lowest ebb five years ago. Hence, tax payments were at the lowest. But, without attempting to cite all of the increases in rates and new taxes invoked, new taxes and new rates have been responsible, too, for the increased burden which business carries.

It is important, also, in connection with the consideration of taxes to call attention to the federal government's budget condition. At the end of September, when the first quarter of the fiscal year was completed, there was a deficit of more than \$700,000,000. The Treasury had been called upon to pay out \$700,000,000 more than it had taken in by way of taxes. If my country school multiplication still serves me, there is a deficit indicated for the current fiscal year of approximately \$2,800,000,000 since there are four quarters in each year. It may be less—or it may be more.

Floyd Gibbons' ADVENTURERS' CLUB

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

"Beast of the North"

HELLO EVERYBODY: It's sixteen-year-old Bob Shreves of 1333 Pacific Brooklyn, N. Y., who crashes into the Adventurers Club today and wins himself the rating of Distinguished Adventurer. A ten smacker check is on the way to him right now and Bob dragged it down with the story of a fight with wild animal—on the streets of Brooklyn.

Now it's been years since big game hunters roamed around Brooklyn looking for animals to shoot. Hunting parties have been giving it go-by since the days when Peter Minuit was mayor of New York. The town belonged to the Dutch. It took Bob Shreves, then eight years old, to get into trouble with one, in November, 1927, and just a few blocks away from the Long Island railroad station and the Williamsbridge bridge.

It was just twelve o'clock noon, when eight-year-old Bob filed out of Public School No. 15 with a bunch of other school kids and started State street toward his home, which was then at 146 South Elliott place. Bob was going home for lunch, but he wasn't in such a hurry to get home that he couldn't spare a moment to investigate a crowd of people on the street.

The Bear Looked Harmless.

The crowd was standing at the back door of a large theater. You know Bob went over and joined it. On the sidewalk by the stage entrance was a huge brown bear. Bob learned later that the bear was a train one—a part of an act that was playing in the theater. Two of the theater's helpers had him out there getting a little air.

"The bear was lying down," says Bob. "He was pretty old, and looked like a harmless creature. The helpers were holding him only by a small piece of worn clothes line tied around the collar on his neck."

That bear may have looked harmless—but Bob soon found out that he wasn't.

A lot of other people shared Bob's opinion that the bear would hurt anyone. Nearly the whole student body of Public School No. 15 hurried down to the theater stage door, attracted by the gathering crowd.

One great paw lashed out in a vicious swing.

Such a mob of kids you never saw in your life. They pushed and jostled one another as they crowded closer. They yelled and another and directed loud, shrill questions at the men who were holding the big brute. The bear began to get nervous—and then frightened. And the helpers began to get uneasy, too. They coaxed the bear to get up, and then began to lead him back into the theater again.

Broke Away and Charged the Crowd.

Then that mob of kids began milling and pushing in their effort to follow the bear in. Bob Shreves was way up in the front row, being pushed along by those behind him, when suddenly the bear fell into panic. He broke away from the two helpers with one toss of his great shaggy head. Then, swiftly, he turned around and charged the crowd.

He was coming right toward the spot where young Bob was standing—and with a mob of three or four hundred kids pushing from behind, there was no way for Bob to escape. A big boy in front of him screamed and turned to flee. And in his frantic effort to get away he ran squarely into Bob and bowled him over.

Bob fell flat on the ground. For a moment he was confused, around him now he heard the screams of other kids. Then he looked up—to see the bear charging straight at him—almost on top of him!

Bob's heart leaped to his mouth—and in another split second the bear was on him. One great paw lashed out in a vicious swing at Bob's head. Instinctively, Bob ducked. "If I hadn't," Bob says, "I would have ripped my face wide open. As it was, he took away a piece of my scalp as big as a man's hand. He was standing over me now, snarling and growling, and suddenly I found myself in his powerful arms."

"I was still conscious. I don't know why that slap on the head didn't knock me out. But it didn't, and at that moment I didn't even feel any pain up there. But I could feel the brute crushing the breath out of me with his paws. I could feel my ribs cracking under the pressure. And I could see him tearing at my shoulder with his teeth."

It was cold weather and Bob had on a heavy overcoat. That coat was all that saved his shoulder from being ripped wide open, too. But the overcoat was no protection against the squeeze of those powerful arms.

Was Slowly Crushing the Life Out of Him.

"I thought my chest was going to cave in," he says, "and my lungs felt as if they would burst. I tried to cry out, but that was impossible. I couldn't even draw a breath."

Meanwhile, one of the helpers had grabbed up the bear's rope again while the other ran in to get the trainer. Little Bob wasn't even conscious of that. He wasn't conscious of anything but the big, hairy animal that kept squeezing—squeezing—slowly crushing the life out of him. The last thing he remembered were shouts in his ears and strong hands taking hold of him, dragging him from the bear's embrace.

The next thing he knew he was in Cumberland hospital, with a badly lacerated head and right shoulder, and a broken rib—and the doctors told him that if he hadn't had on a thick overcoat he'd have been maimed for life, if not killed outright. But three months later Bob was out of the hospital, and all right except for a lasting scar on his head.

The bear weighed 880 pounds and stood seven feet tall when erect. He was the biggest critter Bob ever took on for a fight before—and since. And he's still wondering if Schmeling, or Joe Louis, or even Dempsey in his prime, could have done any better with that animal than he did.

Men Talk More Than Women

According to a noted psychologist, men do more talking than women and are naturally the more talkative sex. He says men like to hear themselves talk because they think what they say is more important than what women say. And, strangely enough, says Pearson's London Weekly, he asserts, women also believe that what men say is more important than their own chatter. This is attributed to the impression many men give women: that women are the inferior sex and not as intelligent in conversation as their male companions. Whatever the reason, it is generally agreed among psychologists that men do more talking than women.

Name Hugh Means 'Intellectual'

The name Hugh, of Teutonic origin, means "intellectual" or "intelligent." Hugh Capet, king of France in the Tenth century, founded the Capetian dynasty which lasted from 987 to 1328. St. Hugh was bishop of Grenoble in the Twelfth century. Other Hughs of the past were Latimer (d. 1555) English reformer burned at the stake; Legare (d. 1843) attorney-general of the United States; Miller (d. 1856) Scotch geologist who educated himself by reading in the intervals of his work; a stonemason and became one of the first writers to make geology popular; Baron Strathairn (d. 1866) English field marshal; and Cameron (d. 1918) Scottish painter.

THE LIFE OF THE PARTY

WNU Service

SYNOPSIS

Young Rex Hale calls on Casper Kneeland, friend of his father, in New York, and finds him proudly successful but strangely preoccupied. He tells Hale of his wife's death while insane, invites him for the summer to Halcyon Camp, his home on Long Island, and promises him he will be "useful" as his secretary there. Hale is joined at lunch by Fred Ainsworth, an unpopular college mate, also at Halcyon, who leaves him with a feeling of unpleasant mystery. He is met at the train by Mrs. Wilbur Nash, whom he questions about the menage, and experiences a disturbing premonition. The premonition is barely eased by the comfortable hospitality of Hosanna, Kneeland's elderly sister, and her friend, Ruth Forbes, middle-aged sophisticate. Hale is joined at lunch by Fred Ainsworth, an unpopular college mate, also at Halcyon, who leaves him with a feeling of unpleasant mystery. He is met at the train by Mrs. Wilbur Nash, whom he questions about the menage, and experiences a disturbing premonition. The premonition is barely eased by the comfortable hospitality of Hosanna, Kneeland's elderly sister, and her friend, Ruth Forbes, middle-aged sophisticate. Hale is joined at lunch by Fred Ainsworth, an unpopular college mate, also at Halcyon, who leaves him with a feeling of unpleasant mystery. He is met at the train by Mrs. Wilbur Nash, whom he questions about the menage, and experiences a disturbing premonition. The premonition is barely eased by the comfortable hospitality of Hosanna, Kneeland's elderly sister, and her friend, Ruth Forbes, middle-aged sophisticate.

under his apparent lack of the "progress" Kneeland wordlessly demanded. He held himself in with a tight rein. "I've got to learn all I can learn about the characters and interests of these people," he reminded himself. "I'll turn them inside out before I get through with them. But not yet."

The objects of his special study were the two younger Kneelands. He was increasingly disturbed about them both. Bert was riding for a nerve crash. He was increasingly moody and erratic.

But it was Joan who was Hale's greatest interest. He walked, swam, talked with her daily. He dined with her at night. They discussed countless subjects with apparent intimacy. Yet he never felt that he really knew her. If she had been the victim of a desperately unhappy love affair, she might have looked and acted as she often did—like a detached being, wandering in space. At such times it was impossible to interest or amuse her. At others she was animated, almost gay. There were hours, even days, when she was as natural with him as she was with Bert. There were other hours when she teased him unmercifully. She professed herself

young Hale. He had started something. He rather wished he hadn't. The whole thing might be nothing but a mare's nest. He had given it entirely too much importance in their talk. He returned with his plate, meditating on the best way to let down the exuberant youngster at the other end of the table. Before undertaking this he swallowed a cup of coffee. He felt better. Simultaneously Joan entered the room. Both men were startled by her pallor and the dark circles under her eyes, but she seemed in good spirits. She smiled and nodded, and Hale hurried to the sideboard to serve her. He always moved with surprising lightness and agility for so large a young man.

"A little of everything?" he asked as he raised dish covers.

"Heavens, no," Joan shuddered. "You ought to know by this time that I'm never interested in breakfast. Only a slice of hot toast and a glass of orange juice, please. And yes, Rose, I'll have some coffee. Thanks."

Hale brought her the toast and orange juice and returned to his own breakfast, feeling soft-pedaled.

He was impressionable. It had not taken him long to discover that

CHAPTER IV—Continued

The next fortnight was spent by Mr. Kneeland's new employee in an occupation one of our distinguished Presidents has described as "watchful waiting." He mingled. He cultivated every member of the group, even Ainsworth. He was reasonably successful in concealing his growing dislike of that young man, though he frequently intercepted and returned Ainsworth's barbed darts at his employer. He also interrupted without hesitation, and side-tracked, many of Craig's lurid medical yarns. He went on numerous motorboat excursions with Bert and was pained to find the youth increasingly nervous and fidgety.

Hale took frequent walks in the woods and along the shore with Joan or Mrs. Spencer Forbes. Miss Hosanna explained that she herself had all the exercise she wanted, around the house. She had. She was up early and late. She was constantly busy. Hale picked up her balls of silk or wool in her rest periods. He played frequent games of desperation or backgammon with her. He listened respectfully to her dietetic theories and her reiterated statements that all the dishes he liked best were "poison." He became increasingly popular with Joe, Banks, and Rose, and won Jane's heart by friendly attention to Daisy. He successfully concealed his interest in the fact that the animal, so robust when she arrived, was now in a low state of health. She moped and objected to petting. He had two more long talks with Casper Kneeland. One Kneeland again referred to his wife's tragic death. "She had puerperal insanity," he explained. "She tried to give me another son, and it finished her. I haven't spoken of it since, not even to Bert. Can't bear to talk about it."

Hale took care of all letters to Casper Kneeland which came to Halcyon Camp. He wrote a number of letters of his own. Two of these were addressed to distinguished psychiatrists he knew, one of them in Chicago and the other to whom he had once been of some service—in Paris. Unostentatiously and with considerable ingenuity he secured the fingerprints of most members of the household. Those prints, when developed, might lead to the discovery of the mysterious artist at Halcyon Camp, and the writer of the anonymous letters.

His collection of letters and sketches had grown. There was a sketch of a grave and a tombstone with his name on the latter. There were dancing skeletons labeled in the same way. They reminded him rather unaccountably of his dream, after the first office interview with Casper Kneeland. There was a large sketch of a skull. It was treated with a phosphorescent preparation and glowed at him brilliantly from the foot of his bed one night, after the lights were off. There were more misspelled notes, urgently repeating the advice of the original note that he leave Halcyon Camp. On one occasion there was a frog in his bed. Later a colony of ants were sheltered there. Several nights after this half a dozen wasps were let loose in his room. Twice his room was upset—his bed dismantled, the furniture overturned, a whirlwind of newspapers and torn scraps tossed about. Once Rose discovered this and cleaned it up. Hale made no explanation, and the maid's manner was distant for several days. The other time he found the litter first and cleared it away himself. Why should someone be so anxious to get rid of him? He didn't tell anyone about the petty persecutions, but he was increasingly irritated by them.

Meanwhile, he chafed mentally

In the speeding roadster the two men were silent.

one of his countless victims, and assured him that his indifference was blasting her life.

"What's really the matter with Joan Kneeland?" he once asked Craig, when he could endure the problem no longer.

The psychiatrist looked at him in surprise.

"Nerves," he said coldly. "Half our young girls are like that nowadays. Too many bad habits."

"She hasn't any bad habits," Hale insisted, "except perhaps that she smokes too much."

"Far too much," the doctor agreed. His thin lips smiled unpleasantly. "Her love affair with Bert isn't helping any," he ended.

"What the devil do you mean by that?"

"Just what I say. Though perhaps I should have said his love affair with her. He's crazy about her and she knows it. She knows he is suffering. 'Pity is akin to love.' Perhaps, after all, nature is trying to push her into marrying him."

"Damn you," Hale said under his breath. It was the first time he had lost his temper with any of them. He walked away, fuming under the memory of Craig's lifted eyebrows and ironic smile.

One Monday morning—the third after Hale's arrival at the Camp—Casper Kneeland came down to his eight o'clock breakfast. He found his new employee already at the table, consuming eggs and bacon. Hale was dressed in his new gray business suit. There was an air of alertness and energy about him which Kneeland privately felt was oppressive when exhibited before nine o'clock in the morning. He greeted Hale with a nod and ambled over toward the hot dishes on the sideboard.

"Good morning, sir," the secretary said cheerfully. "I thought if you didn't mind I'd drive into town with you."

"Eh? What's the idea of that?" Kneeland interrupted his inspection of the breakfast dishes to turn and stare at his godson. Realizing that his attitude was not hospitable he added gloomily, "It will be hot in New York."

"It will," Hale agreed. "But when there's work to be done I like to get started."

"Uh huh."

Kneeland filled his plate. He was always at his worst before breakfast, and he hated cheerfulness and conversation in others till he had drunk his coffee. He was also experiencing some dark doubts as to the wisdom of his arrangement with

the life of the house-party would be required to function at breakfast. Nevertheless, it was a time when he always felt at his best. He ate eggs and kidneys and bacon and three hot muffins and waited for someone else to speak. No one did. Rose refilled the coffee cups as seriously as if performing a religious rite. Uncle Cass stoked solemnly and grew more reconciled to life. At last Joan spoke.

"We have now reached the point where it is safe to smile across the table at Uncle," she told Hale. "Not hands across the table, you know—merely smiles. Don't speak yet. You have committed several times since you came to us the faux pas of wishing Uncle 'good morning.'"

"I have," Hale sighed.

"And a frost hung over the table and icicles hung from Uncle's eyebrows, while the hot food congealed on the sideboard. I know," Joan said sympathetically. "I saw it all every time you did it. I used to do it every morning when I first came to live with Uncle. I was young and heedless then. At last I learned that if I neither breathed nor spoke till he had eaten his breakfast, all would be well. He's quite human, from half past eight on."

Rex looked at his watch.

Device Sounds Alarm to Warn Family Before Fire in House Gains Headway

Within a few seconds after fire breaks out in your home the household can be warned by a howling alarm which is simply screwed into a light socket, says Popular Mechanics. This detector utters an unmistakable shriek if the temperature in the room rises at a sustained rate of 15 or 20 degrees per minute. This "rate-of-rise" thermostat will catch the fire before it has reached dangerous proportions, yet will not cause false alarms from ordinary changes in room temperature due to weather or winter heating of the building.

Plugged into a ceiling socket in basement, attic or closet—danger spots for fires in the home—it will detect any sudden surge of heat almost instantly. The rate-of-rise feature is operated by a small air-expansion chamber with an extremely sensitive diaphragm which bellows out when the temperature rises in the air chamber and closes an electrical contact. There is an additional thermostat which, in the event a smoldering, slow fire has not activated the alarm, will sound the howler

when the room temperature reaches 150 degrees.

The signal operates on alternating current and uses about eight watts. A tiny neon lamp consuming four-tenths watt shows that the current is on. The detector readjusts itself after the fire is extinguished and need not be replaced. Extension howlers and detectors can be connected for remote alarms.

First U. S.-China Trade

Immediately after the Revolution, in the year 1784, the famous Robert Morris and others fitted out the Empress of China to trade with China. The cargo consisted chiefly of gin-seng, and teas and other goods were brought back. When the American ship reached China the Chinese were told they were from America, and after some difficulty the Chinese finally understood the story and how they differed from the English that they knew of. "The New People" the Chinese called the Americans. The profits of the venture amounted to some \$30,000, about one-quarter of the investment.

How You Can Look Slimmer

IF YOU take a woman's size, you'll certainly enjoy having both of these smart, new, slenderizing styles. They're extremely becoming, and made up in materials and colors of your own choosing, they will be the joy of your life, one for house work, and the other for afternoon and dinner engagements. Both of these dresses

new and very becoming style, most flattering to large women. This dress will be lovely in velvet, crepe satin, thin wool or silk crepe.

The Patterns.

1559 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 4 1/4 yards of 35 inch material. 2 1/2 yards of ricrac braid.

1613 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. With long sleeves, size 38 requires 5 yards of 39 inch material; with short sleeves, 4 3/4 yards. Collar and jabot in contrast would take 3/4 yard.

Fall and Winter Fashion Book.

The new 32-page Fall and Winter Pattern Book which shows photographs of the dresses being worn is now out. (One pattern and the Fall and Winter Pattern Book—25 cents.) You can order the book separately for 15 cents.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate.—WNU Service.

are so very simple to make that you'll thoroughly enjoy doing it. Each pattern includes a detailed sew chart for the guidance of beginners.

The House Dress.

Notice how very practical and comfortable this dress is, with every detail you want for working freedom and slim lines. Darts make the waistline slim and neat, but not tight. The armholes are ample, the sleeves very short, and slashed for greater freedom. The skirt has sufficient, unhampering fullness at the hem. It's a diagram design, that you can finish in a few hours. For this, choose percale, calico, or gingham.

The Afternoon Dress.

Just wait to see how nice and slim your hips look, in this cleverly designed dress, with just a little fullness above the waist to emphasize the sleek, smooth cut below. This design gives you the fashionable bodice detailing in soft, lengthening jabot drapes that have a dressy, but not a fussy, look. Bishop sleeves are another

Uncle Phil Says:

Too Few Maps Out

If a young man maps out a career he generally achieves it.

An ounce of persuasion is better than a pound of compulsion.

Money talks pretty conclusively at times, but occasionally it gets rattled.

Because He Fails to Marry

From a bachelor's viewpoint marriage is a failure.

Contentment has one advantage over wealth: people don't try to borrow it from you.

Gossip is a deadly gas that is often fatal to friendship.

Leaders That Follow

Fashion leaders are so called because they follow the fashion.

We should strive to forgive and forget, but it always seems so much easier to forget our friends than our enemies.

We Hope They Got Home Before Moon Came Up!

A young farmer had bought a horse which was a wonderful jumper, and was riding him home. They came to a gate 10 feet high. The horse pricked up his ears, wagged his tail and gracefully jumped over.

A little farther on they came to a gate 14 feet high, and again the horse pricked up his ears, wagged his tail and sailed over with equal ease.

Farther on still they came to a railway bridge. Again the horse pricked up his ears, wagged his tail, but the squire shouted nervously, "Whoa, under this one, not over."

Can't Eat, Can't Sleep, Awful Gas PRESSES HEART

"Gas on my stomach was so bad I could not eat or sleep. It even pressed on my heart. A friend suggested Adierka. The first dose brought me relief. Now I eat as I wish, sleep fine, and never feel better!"

—Mrs. Jas. Fuller, Adierka acts on BOTH upper and lower bowels. Adierka gives your intestinal system a real cleansing, bringing out waste matter that may have caused GAB BLOATING, sour stomach, headaches, nervousness, and sleepless nights for months. You will be amazed at this efficient intestinal cleanser. Just one spoonful, usually relieves GAS and constipation. Adierka does not gripe, is not habit forming. Recommended by many doctors and druggists for 30 years.

Sold at all drug stores.

When Needed Most

A friend is one who walks in when the rest of the world walks out.—Anon.

for Stopped-Up NOSTRILS
due to colds

WHY try to open stuffy nostrils by blowing into your handkerchief until your nose is red? Simply insert a little Mentholatum into each nostril. Note how effectively, yet gently, it relieves the stuffed membranes. Instead of being a "blowhard," use Mentholatum. It's the clean, gentle way to open stopped-up nostrils due to colds.

MENTHOLATUM
Gives COMFORT Daily

Every Family Needs This FREE BOOKLET on TOOTH CARE

Your Health Tomorrow May Depend on the Care of Your Teeth Today

BUILDING AND MAINTAINING HEALTHY TEETH

From Infancy to Old Age

WIVES! Mothers! Husbands!

Every member of your family will benefit if you send for the comprehensive booklet, "Building and Maintaining Healthy Teeth—From Infancy to Old Age," offered free by C. Houston Goudiss.

It names the food substances, and the sources from which they may be obtained, required to help build and keep teeth sound and healthy. It explains the proper technique of correct dental hygiene and lists a number of important rules for dental health.

Address C. Houston Goudiss, 210 So. Desplaines St., Chicago, Ill. for your copy of this valuable booklet. A post card is sufficient to carry your request, but be sure to write your full name and address distinctly.

Favorite Recipe of the Week

Pumpkin Cake.

1 cup shortening, add sugar gradually. Blend in well beaten cream. Sift flour, baking powder, and spices together. Add pumpkin and milk, stir in. Add flour to pumpkin and mix alternately to cream mixture in 8-inch pan, well greased, in two layer pans. Bake 50 to 55 minutes for loaf, 35 minutes for layer cakes, in 350 degrees.

Cover With Mocha icing.

1 tb. strong coffee, 1 cup butter, 1 cup sugar, 1/4 cup chopped almonds

cream butter, add powdered sugar gradually, and cream well. Beat until light, and add chopped nuts.

BRISCOE COUNTY NEWS

"Official City and County News"

ROY W. HAHN
Editor and Publisher

James L. Allred Sports Editor

Entered as second-class mail matter at the post office at Silverton, Texas in accordance with an act of Congress on March 3, 1879.

If luck isn't with you as it should be, put a "P" before it, and continue to try.

I HEREBY RESOLVE—that this issue shall remain in the Briscoe County News until our city managers start a little constructive work toward surfacing our streets, or at least until the death of Yours True-ly. Dated this 9th day of June, 1938. (I've been wanting to know for a long time, how long a snotype slug will last.)

LAST WEEK I announced the "Sale Day" dollar special for subscriptions and said something about using the money very nicely while I am gone after the wife and boy. Well I didn't get rich but I appreciate those who were in and subscribed. They deserve special mention and here they are in bold face type:

- Beth Joiner
- Mrs. W. Allard (for Earl)
- Monroe Lowery
- W. B. Hughes
- Joe Brooks
- E. P. Harrison
- Mrs. O. F. Kolb
- T. A. McCain
- Mrs. W. T. Shelton
- L. T. Wood

Two other new subscribers last week were Curtis Bingham and Mrs. J. T. Wimberly of Frederick, Oklahoma.

THE OWLS LOST in football Friday to Lockney. Which, in my

opinion is the same as saying that they lost to the District Champs. Lockney has the largest, and the smoothest team that any coach would want. And when they hit—well Hank says that he got hit oftener and harder Friday than ever in his life. The Owls got a bad break on the start, but even then, we don't feel bad over getting beat by Lockney. The game is supposed to be run on the principles of "May the best team win"—and it did. And here is nominating Lockney as District Champions.

ONE SUGGESTION: Why not have the center carry a pocketful of rocks. As soon as he passes the ball back for a forward pass play, have him raise up and chuck the pass receivers on the back of the head so that they turn around in time to make a stagger at catching the pass.

OUR BAND WAS wrecked Friday by the dumbness of two of the trumpet players. Of course the boys thought it was smart to try to play without music. But when they can't play well enough to tell one piece from another, that makes it "dumbness". And no one would have blamed Mrs. Burson had she took her baton and gently but firmly tapped said boys to sleep. And the band would have been two players better off.

I GATHERED A little news this week from R. E. Brookshier, two locals in fact, and got this thrown in for good measure, "Say, now, I'm not going to keep your Society Column going forever with my family news". Tut-Tut.

HEADLINE IN THE Briscoe County News of September 30, 1926: "Rapture Expert Coming To"—Wonder who knocked him out?

I GOT A LETTER from Joe Blocker a few days ago and He thinks my column is petering out. He thinks maybe it's because he's not here to make the news. Well this feller Landers isn't so bad. The other day I had been in the office commenting in a nice friendly way on the service, the light bill, and so forth, and just as I got in my car I heard Landers tell Mrs. Womack that "That Hahn is the craziest bird I ever saw"—and I just want to go on record here and now by saying that I'm not a darn bit crazier than the present manager of Texas Utilities. And I'm not any crazier than

the former manager Blocker, and I don't think that they can find a manager that is any more sensible than I am crazy, or words to that effect. And since he thinks I'm crazy, I have been collecting two cigarets every time I meet him. And if he's crazy enough to let me get them I think that that proves that he is crazier than I am. I can afford to be crazy for a pack or so of cigarets a day—Landers is being crazy for nothing—and because he can't help it.

I'M JUST READY to start to Kansas as I write this. Here's hoping that you get your paper this week. It's up to Cranberry now—but if he doesn't get it out, we'll do as some of our advertisers say, "have an extra big one next week."

P. S.—AND IF THERE is anything else in this column this week, by heck I didn't write it.—R. H.

A PESSIMIST'S VIEW OF COTTON

Cotton is the overcoat of a seed that is planted and grown in the South to keep the producer broke and the buyer crazy.

The fiber varies in grade and staple, and the man who can guess nearest about these is called "a cotton man" by the public, a fool by the farmer, and a poor business man by his creditors.

The price of cotton is fixed in New York, and goes down when you have bought, and up when you have sold. A buyer for a big cotton mill was sent to New York to watch the cotton market. After a few day's deliberation, he wired his firm: "Some think it will go down, and some think it will go up. I do, too. Whatever you do will be wrong. Act at once."

Cotton is planted in the spring, mortgaged in the summer, and left in the fields in the winter.

103 Extra Eggs Per Hen!

The U. S. average per hen yearly is 82 eggs—but the Purina average per hen yearly is 185 eggs. That's a difference of 103 eggs—a difference you'll want in feeding your hens.

Ask anyone who feeds either Purina Layena, the complete laying mash, or Purina Lay Chow, the supplement to go with home grown grain, and you'll find that Purina Laying Chows not only make a difference in egg production but in keeping hens in good condition.

And, remember, Purina Laying Chows are fortified with that vitamin A ingredient—Pur-a-tene. So if you want Purina results, feed either Purina Layena or Purina Lay Chow. Your hens will lay at their best!

Fogerson Grain Company
WE APPRECIATE YOUR BUSINESS

POULTRY CULLING TIME

Folks if you intend to cull your hens let us help you. We will come out most any day and cull your hens and bring the culls to town and pay you the highest price the market can afford, and you will not have to be bothered with them. Why feed high priced feed to BORDERS? Cull them and receive the high prices on eggs this winter.

See us about your turkeys. Book them early and we will keep you posted on the prices.

To the Taxpayers Of Briscoe County:

At this writing there is around eighty thousand dollars in delinquent and unpaid taxes due the State and County. As the years mount, this sum continues to grow, and unless paid, the Tax Collector and the Commissioner's Court will have to take steps to collect these back taxes. The money collected in taxes goes to the upkeep of our government and when we fail to meet our obligations in that way, we are imposing on our fellow man. We are receiving the benefits that some one else is paying for. Is that fair?

In their work, they have made an effort to equalize that burden on all of us alike and when one of us fail, it makes it hard on some one else. Our Commissioners have been very lenient on us and the question now is whether or not we are going to force them to take drastic steps to collect them, or will we make every effort to avoid this by starting now and paying one or more years at a time and relieve this situation.

Check your tax account and make the decision. We will be glad to furnish a statement of all taxes due.

Yours truly,

N. R. Honea, Tax Collector

Mr. F. C. Gatewood and F. C. Jr. took Mrs. Lenora Gardner to Amarillo where she met the bus to go to her home at Guyman, Oklahoma.

Mr. and Mrs. Atlee Brotherton and family of Lockney were over for the football game Friday and while here visited with Mrs. Raymond Bomar.

Mrs. W. L. Jewett has purchased the Mrs. Bette Stinson house in the east part town and is moving it to a lot south of Mrs. Beaver's home.

Another sixth of them came to increase their earning power. Less business-like but just as practical is the reason given by another sixth of the girls—they wish to better fit themselves for successful marriages.

A variety of ideas were contributed by the other third of the student body, with a few honest souls admitting they came "for a good time" and because "it will help me to marry into a better family."

1939 FARM PROGRAM

With Texas Agricultural Conservation Association committee-men and state AAA workers back to their Texas A. and M. College headquarters after a regional conference in Fort Worth, field men went to work this week on a simplified farm program for 1939.

Chairman George Slaughter of the state committee said the bulk of 1939 cotton acreage allotments will be calculated and sent to farmers by December 1, well ahead of planting time, and in broad contrast to the situation which aroused criticism last year.

Because of late amendments to the farm act of 1938, allotments this past spring could not be calculated until April 7, or after most Texas cotton had been planted, Slaughter observed.

"Getting allotments to farmers around December 1," he said, "will give farmers the benefits of full facts before marketing quota referendum, expected to be set in the forepart of December."

Lesson for October 23

OUR DAY OF REST

LESSON TEXT—Exodus 20:8-11; Luke 13:10-17. GOLDEN TEXT—Remember the Sabbath day, to keep it holy.—Exodus 20:8.

Rest—how full of meaning that little word is when we recall that it means quiet for the struggling one, calm for the troubled, repose for the weary, tranquillity for the disturbed, cessation of labor for the worn-out one. God in His infinite wisdom saw that without rest man would soon destroy himself, and He made provision for one day in seven when labor should cease and man should be free for that re-creation of soul and body which should fit him for the labor of the week. Men in their greed have coveted the time God gave for rest and have used it for themselves, and the ragged nerves and broken bodies, to say nothing of the impoverished spirits of our day, testify that it can be done only at our peril.

Our study centers around Scripture passages which have to do with the Jewish Sabbath, but since it was essentially a day of rest, and afforded an opportunity for the worship of God, the principles surrounding it are applicable to our day of rest—the first day of the week, the Lord's Day.

I. Why We Keep a Day of Rest (Exod. 20:8-11).

1. God commanded that there should be a day of rest—one out of seven—and that should be sufficient to cause His people to "remember" the day "to keep it holy." It is cause for grave concern that Sunday has become a day of swimming, hiking, auto-driving, golfing, and one might go on with the list almost indefinitely. Many men or women who have had built into their own characters the stalwart virtues nurtured by family attendance at the house of God, have not only forgotten their own need and responsibility but are destroying every vestige of interest in divine worship in the hearts of their children. It is serious business to go astray oneself, but infinitely more serious to mislead one's own children.

Notice that the day of rest was to be not only for the family but also for servants and for visitors. The employer who operates his factory or office on Sunday violates this commandment. Note also that the man who is to rest on the seventh day is supposed to work on the six days. Some folk neglect to do both.

2. God's command is strengthened by the divine example (v. 11). We are not able to do all things that God does, but here we are privileged to follow His example.

II. How We Keep the Day of Rest (Luke 13:10-17).

The incident recorded by Luke does not give us an exhaustive list of things to be done on our day of rest, but it is interesting to note that our Lord was

1. In the house of God (v. 10). Jesus was in the synagogue. The distinguished apostle Paul never became too great or too good to attend divine worship. We all need to go to church (if it is at all possible for us to do so) to fellowship with others in the things of Christ. Let us have a revival of church attendance, and not only on Sunday mornings, but also on Sunday night and for midweek prayer meeting.

2. Alert to the needs of others (vv. 11, 12). It is not indicated that the woman asked to be healed. Jesus saw her need and met it. We can not do what he did, but there are needs that we can meet if we are bold and alert to see them and willing to help.

3. Active in service (v. 13). In spite of the criticism which He knew would come from the lazy and helpless standers-by, Jesus did the work of God. We may glorify God by being ready—yes, anxious—to serve in the church. Our daily work is set aside on the Lord's Day not that we should be indolent, but that we should be free to do the Lord's work.

4. Contending for the faith (vv. 14-17). Jesus met the unjust criticism (which, by the way, was leveled at the poor woman because the critic feared Jesus) by a masterly appeal to the law of the Pharisees (vv. 15, 16). But He did more than that, for He ably defended the rights of humanity as superior to the formalities of man-made law. The law is always supreme until the Lawgiver comes, and no law can hinder Him by its letter, as He fulfills its spirit.

We may not speak as Jesus did, that is to declare what the law is, but we may in His name, and by His grace and power declare the full counsel of God, defend it against its critics and withstand those who while bearing the name of Christian leaders only hinder the work of Christ (compare III John 9, 10). For such service we need His guidance, His wisdom, His power, and His grace.

God Sees the Heart

Neither is there any creature that is not manifest in his sight; but all things are naked and opened unto the eyes of him with whom we have to do.—Hebrews 4:13.

Great Britain Plays Safe

Picture Parade

Though England has not been invaded for 1,000 years, modern airplanes bring danger of bombing and gas raids. So A.R.P. (Air Raid Precautions) has been organized to teach civilians how to wear masks and defend themselves against bombs. Most masks sell for 75 cents and the government has an extra 40 million on hand.

This year, Britain is spending \$1,715,000,000 on rearmament, building anti-aircraft guns (above) and fixing out defense troops with oilskin suits (right) as protection against disastrous mustard gas. Though the nation is outwardly calm, A.R.P. has perfected an amazing organization of 600,000 community "wardens" who will have charge of A.R.P. fire brigades, first aid units, evacuation and contamination squads. Moneyed classes are building underground bomb-proof shelters where they will retire to live in comparative comfort during raids. But poorer classes cannot afford this luxury, indeed cannot even afford gas masks.

England hopes her coastal defense measures will drive away planes to forestall a repetition of World War raids which killed 1,414 people. One phase of this defense is the artillery, another the fantastic wire mesh supported by balloons, which would surround London and possibly scare off planes. A third phase is fast transportation of troops by planes, enabling England to move man power to any part of the coast in the event of invasion. Britain realizes the English channel is not so wide, that an enemy can knock at her front door within a few minutes after leaving the continent.

Post haste, British pilots see how fast they can take off.

Star Dust

- ★ Consolation Prize
★ No Publicity Wedding
★ Rolling Home Next?
By Virginia Vale

IT LOOKS as if the skids had been put beneath another foreign star. Columbia has had Dolly Haas on the payroll for a year—at \$1,250 a week, which may be a tidy little sum and nothing more to Columbia, but is a lot of money to a lot of us—and she was scheduled to play the lead in Lubitsch's "The Shop Around the Corner." She didn't make any other pictures; just waited for that one.

So—Lubitsch recently moved into the Selznick-International studio, ready to begin work on the picture, his first as head of his new unit in association with Myron Selznick. But he wanted, not Dolly Haas, but Janet Gaynor, for the lead. A disappointment for the lovely Viennese, no doubt. Incidentally, the demure Janet goes right on increasing in feminine charm all the time.

Janet Gaynor

Ronald Colman's marriage to Benita Hume rather startled a lot of people, who felt sure that he'd never marry again. It wasn't exactly the sort of ceremony that might have been expected, but Colman's knowledge of the publicity that attends any star's wedding no doubt prompted him in keeping his application for a license secret, and having a police judge perform the ceremony.

Ever since 1920, when he and his first wife separated, there have been rumors to the effect that the dashing hero of "If I Were King" was going to marry someone or other, although he has never been one of those young men about Hollywood who used rumored romances as a sure-fire way of garnering publicity. The beautiful Benita is just the wife one would select for him—best wishes to them both!

The fates seem to be agin' Ralph Bellamy, so far as owning a home is concerned. Last winter the California floods washed away his \$50,000 home in North Hollywood. This summer the Connecticut hurricane washed away the house and much of the land on his farm in that state. Looks as if he'd have to buy him a trailer and settle down in that.

I like Kate Smith; I like her new radio program Thursday nights, which keeps her right up there with the topnotchers. But I do not like her when I am waked up at the crack of dawn to receive a pale blue turtle with "Greetings From Kate Smith" across its painted back, accompanied by a box of fish food.

Any time the movies need a young and handsome man to conduct an orchestra—and really conduct it, too—they can't do better than to raid the field of radio and take Macklin Marrow. He has been guest conductor of practically all the big symphony orchestras but the Boston and he is undeniably both young and handsome. What's more, it was accidentally, discovered, the other day, that he screens well.

A friend of his got involved in making a commercial movie. She took a look at the young man sent by one of the model agencies, and they wouldn't do at all. Then she remembered him. Unlike many radio big-timers, he was delighted to do it, just for fun and to oblige a friend. With that picture serving as a screen test he should be able to sign his name to a Hollywood contract if he ever wants to.

Dorothy Thompson, our most famous woman news commentator, has also discovered something about herself as the camera sees her. She's on the air now on a program that includes Phil Spitalny's orchestra, and the other day a picture was taken of him leading the orchestra, with her at the microphone. It couldn't be sent out to the papers; the dignified Miss Thompson—or Mrs. Sinclair Lewis, just as you like—looked exactly like a pretty blues singer, instead of an important commentator on world affairs!

Harry Duncan of the "Radio Rubes" declares that he can tell which parts of the country are having bad weather by the amount of fan mail he gets from those sections. During New England's hurricane week the "Rubes" averaged two hundred letters a day, and he knew that the storm was really terrific when the postman brought four layer cakes. Thinks all New England must have been moored to their radios.

ODDS AND ENDS... Charlie Farrell's next stop on his come-back trail will be the male lead in "Talspin," with Alice Faye... "Drums" ought to go down on your list of the new pictures that you must see... Paramount wasn't too pleased when their starlet, Ellen Drew, told Philadelphia reporters that she has a three-and-one-half-year old son.

WHAT to EAT and WHY

C. Houston Goudiss Discusses Vitamins And Vision; Explains How and Why You Should Feed Your Eyes

By C. HOUSTON GOUDISS

FOR a number of years, scientists have stressed the importance of a well-balanced diet as a means of maintaining health, promoting growth and preventing disease. Recently, an even more significant development has occurred. It has been determined that a carefully chosen diet is absolutely necessary to preserve the general health and efficiency of every bodily function and that there is a close relationship between a good diet and good eyesight.

Your Food and Your Eyes

Many people regard their eyesight as one of the five senses which operate in some mysterious manner of their own! If they suffer from indigestion, they recognize that it is quite apt to be due to something they ate. If they are troubled with stomach, liver or kidney complaints, they quickly appreciate that prolonged dietary indiscretions may be at the root of the trouble. But it never occurs to them that what they eat may affect the eyes just as profoundly as it affects the internal organs.

It is not uncommon, during an attack of biliousness, to suffer a disturbance of the vision. But that disturbance usually disappears with the disorder that caused it. On the other hand, a deficient diet may produce eye troubles that have a far reaching effect upon health, efficiency, and even personal safety.

Night Blindness Explained

For example, it has been established that there is a definite relation between your vision and the vitamins in your diet; between your ability to drive a car safely at night, and the amount of vitamin A-containing foods that you consume.

To understand this astonishing fact, it is necessary to know that vision under faint illumination is accomplished by means of chemical changes in the pigment at the back of the eye. This is known as the "visual purple" of the retina and one of its important components is carotene, which is the active form of vitamin A.

The visual purple might be compared to the film in a camera. When you are in a dim light and the eyes are suddenly exposed to bright light, the visual purple is greatly reduced or bleached. This change results in a stimulation of the optic nerve and enables you to see clearly.

When an adequate supply of vitamin A is present in the body,

the visual purple is rapidly regenerated. But when the supply is inadequate, a much longer period elapses before the corrective chemical change takes place. During the intervening time, many people find it difficult to see.

That is the condition known as "night blindness." And it accounts for the fact that a large proportion of serious motor accidents occur at night. Victims of this deficiency disease are first blinded by approaching headlights, then cannot quickly readjust themselves after the oncoming car has passed. Their ability to drive safely is subsequently impaired for they cannot clearly see the road ahead, and they may miss dangerous curves, pedestrians or other vehicles.

A Common Complaint

Unfortunately, the prevalence of night blindness is not generally recognized, though it is held that urban dwellers are more conscious of it than those living in the rural areas. This is borne out by the fact that ocular disorders from vitamin deficiency are less common in urban than in rural areas.

Children Often Victims

Since the discovery of the close connection between vitamin A and the ability to see in dim light, scientists have tested large numbers of school children to determine whether vitamin A was present in their diet in adequate amounts. It was revealed that from 26 to 79 per cent of the children examined had incipient night blindness.

The same deplorable conditions were found among adults. Mild to moderate degrees of vitamin A deficiency were present in from 10 to over 50 per cent of each group tested.

Yet here is the remarkable thing—in nearly every case, a diet rich in vitamin A for a few weeks restored the vision to normal.

A Significant Experiment

An even more striking example of the power of food to affect the eyesight is to be found in the report of an experiment in which breeding sows were given food in abundance but lacking vitamin A for 160 days before and for 30 days after breeding. In three litters of 35 pigs, all were blind. In another litter of 14 pigs, all were

sightless. But under normal feeding, the same animals produced litters of pigs with normal eyes and vision. This experiment justifies the conclusion of one of our most noted food scientists, that the deficiency of essential food elements may so alter vital processes that even pre-natal changes may occur.

Cause of Other Eye Disorders Night blindness is not the only eye disease caused by an improper diet. Xerophthalmia or conjunctivitis, characterized by excessive dryness of the eyeball, has long been known to be caused by a vitamin A deficiency. It is also well known that a liberal amount of this vitamin will prevent that serious disease and will even effect a cure where destruction of the cornea has not progressed too far.

This suggests the tremendous importance of including in the diet foods rich in vitamin A—cod- and other fish-liver oils; milk and other dairy products; green leafy and yellow vegetables; and egg yolk. Experiments with rats, whose dietary requirements are similar to those of man, show a close connection between cataract and a deficiency of another vitamin—vitamin G. This is found most abundantly in meat, milk, eggs, fruit and vegetables.

Were she concerned about protecting the blessing of good eyesight alone, that would be sufficient reason why every homemaker should plan meals that are rich in vitamins. But it is not only the eyes which are dependent upon vitamins, for they have many other functions to perform.

An improper diet may cause people to drive automobiles blindly at night so that they are dangerous not only to themselves and their passengers, but to everyone on the streets and roads. A deficient diet will also send them through life with half-efficient bodies, half-efficient brains, half-efficient senses.

That is why I urge you to learn everything you can about food, so that in planning meals you will not only feed your eyes, your husband's eyes and your children's eyes, but will take advantage of the wonderful discoveries of nutritional science to make every member of the family so efficient that they will enjoy the best of health each day of their lives.

Questions Answered

Mrs. G. C. L.—Yes, indeed, nutritionists do approve of a mid-afternoon snack for most school children. A glass of milk and a slice of buttered bread with jam or preserves; fruit juice and oatmeal cookies; or a chocolate milk shake and graham crackers will provide fresh energy for late afternoon play. Without the between-meal lunch, some children become so fatigued that nerve strain results. Take care, however, that the snack does not destroy the appetite for the evening meal.

At a Standstill

The world is held back chiefly, not by bad men and women, but by good ones who have stopped growing.—W. T. P. Faunce.

HOW to SEW RUTH WYETH SPEARS

DEAR Mrs. Spears—I want to thank you for the clear diagram of how to hang draw curtains in your Book 1—SEWING for the Home Decorator. This was just what I have been needing as we have casement windows and

different from those of your neighbors and lend no end of style to your rooms. Double curtain rods are needed to give the crossed effect and a valance board is added to the top of the window as shown. Here the valance is the sort that comes with ready made curtains and the top is folded back to make it double. In thumbtacking it to the valance board, do not stretch it—just "ease it on" so that it hangs well. If you feel that the windows need color, the valance and tie backs may be of plain glazed chintz that repeats the strongest color in your room color scheme. A contrasting valance may be either plain or gathered.

Let Father and Young Son and Little Sister help you make the home a center of interest. Book 1—SEWING, for the Home Decorator contains many useful things that every one may take a hand in making. Book 2 shows you with pictures how to make many novelty gifts. Books are 25 cents each. Order both books today and get the patchwork quilt leaflet picturing 36 authentic embroidery stitches free. Address: Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

Buried City in Kentucky

An ancient buried city was discovered at Wickliffe, Ky. There are nine mounds, some of which have been excavated under the supervision of Col. Fain W. King and his wife. The burial mound contains 153 burials of three distinct types. The bodies were buried with pottery, tools, implements and jewelry.

In one mound the remains of 63 children were found with their dolls and other playthings.

Humble by Mistakes

The best of men and the most earnest workers will make enough of mistakes to keep them humble. Thank God for mistakes and take courage. Don't give up on account of mistakes.—Dwight L. Moody.

Quitauque News

Mr. and Mrs. Wes Woodward and son of Denver are visiting Dr. and Mrs. E. C. Price.

Frank Tunnell and son, James, of Quemada, New Mexico are visiting relatives and friends of Quitauque.

Tom Persons who is attending school at Tech spent the week end with home folks.

Mrs. Mildred P. Smyers and Mrs. Newberry of Childress were business visitors of Quitauque Tuesday afternoon.

Mrs. Della Griffith and children were visiting in Quitauque Monday night.

Miss Lola Mae Reagan and Namon Phelps were married Saturday night.

Mrs. W. P. Hall Passes Away

Mrs. W. P. Hall, a long time resident of Quitauque died Monday, October 17, 1938 at 1:15 P. M. at the Plainview Hospital, where she had been very ill for a week. Funeral services were conducted by Rev. Stephens of Olton a former pastor of Quitauque assisted by Rev. G. L. Keever. Interment was in the Quitauque Cemetery. Surviving Mrs. Hall are her husband, four daughters, Mrs. A. L. Patterson, Mrs. O. E. Hutchenson of Quitauque, Mrs. Bob Garrison of Oran, Texas, Mrs. Anna Wellman of Sparks, Nevada; two sons, Don Hall of Plainview, Texas and Geo. Hall of O'Donnell, Texas. Also surviving are seventeen grandchildren and three great grandchildren.

FARM SECURITY ADMINISTRATION

In continuing our story of the Farm Security Administration, let us review briefly the story published in last week's paper. During the depths of the depression a large number of farm families were forced to turn to the government for help.

Instead of carrying these families indefinitely on direct relief, the government set up the Farm Security Administration, a division of the U. S. Department of Agriculture, through which the farmer is helped to help himself.

Up to date the loans made by this agency to farmers who could not secure credit elsewhere had made it possible for approximately 47,000 farm families in the Southwest Plains region to continue their farming operations on a paying basis.

Of first importance in the services rendered in the assistance given farm families to make sound farm and home management plans, the foundation of the operations which will make them self-supporting. The necessary financial aid to carry out the farm and home plans is provided by rehabilitation loans. Supplementing them are farm debt adjustment services and cooperative loans, and where the need is temporary, emergency loans and grants. "Tenant Purchase" loans are also being made to a limited number of qualified farmers for the purchase of farms.

"Leto's" for the Gums

Do your gums itch, burn or cause you discomfort, druggists will return your money if the first bottle of "LETO'S" fails to satisfy.

BOMAR DRUG STORE

made to low-income farm families who need aid, are located on satisfactory farms and who show evidence that they can rehabilitate themselves if given the opportunity.

Applications for loans are made only through the county FSA offices, and after being recommended by district and county supervisors, are subject to the approval of the regional office. Persons eligible are farm operators who are either tenants or owners, farm laborers and others who have a farm background and whose major source of income when last employed was obtained from farming. They must be in need of assistance and unable to obtain the necessary credit from any other source.

Before such a loan is made farm and home plans must be worked out with the farm family. These plans provide for the use of approved agricultural practices, and indicate that the borrower's farm income under this plan will be sufficient to provide for his farming expenses, his family's living expenses, and repayment of the loan in an orderly manner within a period of five years. In some unusual cases, repayment of the loan is extended over a longer period of time.

Rehabilitation loans can be made for the purchase of livestock, equipment, seed feed, and any other things essentially needed for the operation of the farm. The borrower and his wife must sign a note for the amount of the loan. This note is secured by a chattel mortgage which covers his livestock, machinery and crops. Farmers who are eligible for loans do not have sufficient security to get a loan elsewhere, but FSA obtains the best security possible under the circumstances. The good character of the client and the supervision of farm and home operations by trained FSA supervisors constitute the main security for these loans.

All loan funds are advanced in accordance with terms of a "loan agreement" which provides a definite repayment schedule and a definite list of goods for which the loan is expended. Receipts, bills of interest is charged at five percent on the unpaid balance. Payments on the loans can be made at any time. In our next articles we will discuss service which is given with the loan and further services of the Farm Security Administration.

sale, or other evidence of the purpose for which loan funds have been used are obtained by the borrower.

Although agricultural conditions have been below normal since 1934 the living standards of most farmers in Region Twelve have been greatly increased except for a few isolated regions that suffered exceptional damage by drought. The farmers have been helped to take advantage of natural conditions, establish a live-at-home program, shift from a cash crop style of farming, and introduce approved practices for the conservation of soil and moisture. To maintain an equitable basis the Farm Security Administration draws written contracts with its borrowers to contract their land, produce a feed supply, follow a live-at-home program, seeding of land only when conditions are favorable, and in general follow only the best of approved sound farming practices.

Many of the farmers who came to the Farm Security Administration for help had none of the simplest things which are so often taken for granted on every farm. Over half of the applicants in some states had no cows, no chickens and no pigs; thousands were using steers to plow because they couldn't afford to buy a mule. The families didn't have jars for home canning, sickly children were dressed in rags, but they were scattered here and there, throughout the nation and people were ignorant of their suffering and despair.

In further articles we will go more deeply into the manner of servicing the loan after it is made. But just now a word about repayments.

Collections are provided for in the farm and home plans under which the loan is made. Periodic repayments, based on the sale of crops, livestock or livestock products are planned throughout the loan period. Funds advanced for livestock, tools, equipment, etc., are repaid over a period of five years (longer in certain special areas), usually in five equal installments. Loans for seed, fertilizer, feed, etc., are paid over a period of not to exceed two years, usually in two equal installments. Interest is charged at five percent on the unpaid balance. Payments on the loans can be made at any time.

TREASURE 5,000 YEARS FROM NOW

Five thousand years from now, archeologists will dig deeply into the grounds of the New York World's Fair 1939, unearthing a metal cylinder 7 feet in length and discover within it a "cross-section" of to-day. Scientists are busy now assembling the varied contents of this receptacle, to include microscopic books, small articles of every day use and motion picture film which will tell people of the 70th century how those of the 20th looked, dressed and behaved.

FOOTBALL - - -

(Continued from front page)

quarter when a Silverton man blocked their own punt which was recovered by Lockney on the Owls 14 yard line. The Longhorns picked up a first down on the 3 yard marker and on the fourth down Brothers of Lockney went off-tackle for the score.

The highlight of the game for Silverton fans and players came late in the fourth quarter when Hank Brown, Silverton's star backfield performer, intercepted a Lockney pass and returned it 42 yards to the Lockney 29. The Owls lost the ball on the third play when a Lockney player intercepted a pass and returned it to the Owls 46. The Owls forced the Longhorns to punt. The game ended with the Owls in possession of the ball on their own 14 yard line. Final score: Lockney 33; Silverton 0.

BEHIND THE SCENES - - -

(Continued from front page)

SALES TRENDS—Recent reports of merchandising activity in department stores indicate the following: jewelry—increasing demand for heavy costume jewelry; woman's full-fashioned hosiery—sales featured by popularity of subtle beige shades keyed to blend with colorful accessories; furniture—sales of mirror paneling for interior decoration and full-length mirrors for doors are moving rapidly; lamps—steady gains in low and medium priced floor and table lamps; toys—business about 25 percent above year ago.

THINGS TO WATCH FOR—Less scribbling on restaurant tablecloths, because of new paper napkins with tik-tak-toe and word puzzles already printed on them. Another magazine for children, called "Jack and Jill" . . . One more "dated" food to insure freshness: this time it's mayonnaise. . . Fewer misfits in men's suits following introduction of new photo-

graphic measuring unit . . . Fewer unpressed men's trousers due to a recently perfected type of pants with a permanent stitched-in crease . . . Innovation in the game of bridge, called parbridge, which can be played four different ways and can even supply the often missing "fourth hand".

HEADLINES IN NEW YORK

Half of America's lawyers earn less than \$2,000, Bar Association estimates . . . 100,000th ship passes through Panama Canal since it was opened in 1914 . . . Container Corporation of America

shows profit in third quarter against loss in previous months . . . Home building 350,000 new homes this year . . . Benefiting by quickened business activity, Libbey-Owens-Ford Company earned \$850,586 in quarter compared with loss in half, John D. Biggers, president reports . . . His company also jobs to 1,700 men during July, August and September . . . Produced on steel used in autos followed by price cut several popular makes of cars

IS YOUR HOME PROTECTED AGAINST FIRE???

What's the Answer?
By EDWARD FINCH

WHY DOES A DOG TURN ROUND AND ROUND BEFORE LYING DOWN?

THIS is an inbred instinct dating from the days before dogs became domesticated and their only habitat was the wilds of uninhabited countries. They were forced to "make their bed before they could lie in it" and did this by turning round and round, trampling the grass and brush beneath their feet, driving away insects.

RADIO REPAIRING
With the fall and winter programs beginning, it will pay you to have us check over your radio.
No matter what make, age, or style of radio you have, we will check it, furnish parts, and give you a guaranteed repair job.—We handle the genuine "Tung-sol" radio tubes.

You are MONEY AHEAD!
When You Buy **MANSFIELD** Tires
EXTRA MILEAGE Tires
Mansfield Tires are built with a reinforced DOUBLE CUSHION which gives added protection from punctures and blowouts.
The Duromix Tread, with its many sharp angles, minimizes skidding, because the tread members cling to the road to hold your car true on its course.
