Don't Worry About Us! **Colored do it!"

They tell us that the fat salvage problem has got to be licked in the small cities, the towns and on the farms.

Our country has to have one hundred million more pounds of used fats this year over last. And we're the people who must save it.

We've rolled up our sleeves! We'll save every drop and bit it is possible to scrapeand keep on doing it till the last Jap is licked.

HOW TO DO IT: Save all used fats in a tin can. Keep it handy to the stove. Scrape your broilers and roasting pans, skim soups and gravies, for every drop counts. Keep solid pieces of fat, such as meat trimmings and table scraps, in a bowl. Melt down when your oven's going, add the liquid fat to the salvage can. Take the can to your butcher as soon as it's full. He will give you four cents and two red points for every pound. Your County Agent or Home Demonstration Agent can give you full particulars.

100,000,000 More Pounds of Used Fats Are Needed This Year!

Approved by WFA and OPA. Paid for by Industry.

WeWant

With the harvest nearly half over, we want to tell you that we appreciate the fine patronage you are giving us. There are times when we are rushed off our feet AND WE LIKE IT.

CURLEE CLOTHES Not everyone realizes the secret behind

the comfort and lasting good looks that ar built into every Curlee Summer Suit. The fact is, of course, that the featherweight woolen cloth from which these suits are tailored is the coolest and most comfortable of all summer fabrics.

The secret lies in the light weight, the tailoring stamina of the long. hollow woolen fibers which have a thermostatic effect that shuts out heat while it lets your body breathe.

Cool, comfortable, long-wearing these Curlee Suits will solve the problem of your hot weather wardrobe. Come in to see them today.
