### RED CROSS DRIVE WILL OPEN MARCH 1, AND CONTINUE THROUGH MONTH—\$800.00 SET GOAL FOR BRISCOE CO.

As Chairman of the Red Cross Fund Drive I am profoundly interested that we raise our goal of \$800.00. Briscoe County thus far has been listed among those counties who have raised their goal and above.

It will take a lot of work upon the part of all of us and especially those whose names appeal below. The Red Cross is a worthy cause therefore the cause itself solicits our aid in helping the needy in our community and around the world. We have been very fortunate thus far over a space of years. It is always more blessed to give than to receive, but we cannot tell when a tragedy may come to our community. Through the Red Cross all tragedy stricken communities receive help and we can have a part in helping all those far and near who have had the misfortune of such tragedies that are peculiar to the realm of time.

This drive is starting the first of March and is to be completed by the last of March.

Following is a list of committeemen of Briscoe County: J. W. McCracken, Jr., Chairman; Mr. and Mrs. A. H. Jackson, Mrs. G. R. Dowdy, Mrs. Judd Donnell, Mr. and Mrs. Robert Hill, Pascal Garrison, John McCain, Mrs. Clifford Allard, Rev. Grady Adcock, Leo White, Milton Perry, Alton Steele (Rural District), Paul Ledbetter, Mr. and Mrs. Joe Mercer, Gabe Garrison, Don Garrison, R. M. Haverty, True Burson, Silvertown.

## Keeping Farm Records Is No Longer A Hobby

Keeping farm records isn't a big job. That is, it isn't if you have the Texas Farm Record Book.

Did you ever wonder how to avoid the large amount of trouble and work it takes to fill out your income tax return? Did you ever wonder how your farm operates from year to year? Can you remember from time to time just how much land, machinery, and farm products you have on hand? The farm record book is the answer to all these questions, says John G. McHaney, extension county agricultural agent at large of Texas A. and M. College.

Texas farmers received about two billion dollars last year from the sale of crops, livestock and livestock products. This is pretty big business, and is becoming very competitive. Such economic conditions as these, as well as others, have shown many farmers the importance of planning their yearly operations, and to check up from one year to the next.

Farm records serve as a basis for locating the weak and strong points in farm operations—a kind of mirror that reflects a whole year's business. And, too, records will point out any unsatisfactory performances on the farm before more serious losses occur, says McHaney.

When it comes to getting credit from loan agencies, farm records show these agencies the possibilities of the farm and give a list of the assets—in inventory form—located on the farm.

The Texas Farm Record Book was designed so it can be adapted to any farm conditions in the state, and to cut down on the

**Explosive Mines Still Jeopardize World Shipping**

NEW YORK.—Despite the mine-sweeping efforts of the navies of many countries since the end of World War II, the world's seaways are still not free from the danger of mines.

More than 200 ships have been sunk or damaged by mines since the war's end.

The United States navy says no guarantee can be given that even after all the sweepers have been called home, a mine will not pop up occasionally in the next 20 years. A World War I mine was discovered last July off Cape May, N. J.

The worst mine disaster since World War II was the recent sinking of the Danish steamer Kobenhavn. The small coastal excursion vessel blew up in the Kattegat with a reported loss of 200 lives.

**Many Ships Lost**

Figures released by a New York war risk insurance authority show that 251 ships of all nationalities have struck mines since V-E day in the Atlantic and Mediterranean, and since V-J day in the Pacific. Of this total, 116 were either sunk or declared a total loss.

Although the danger from mines has not yet been eliminated, it has been reduced immeasurably by a two-pronged international effort.

First, all navies with minesweeping facilities launched a coordinated program of mine clearance. This began with the establishment and maintenance of swept channels to permit resumption of essential traffic. Later, known minefields were swept.

The second phase of the program was the setting up of a system to enable shipmasters to pass safely through areas mined during the war.

**Pacific Headquarters**

In the Pacific the United States hydrographic office branch at Honolulu was designated as the agency to collect and disseminate all mine information. This data is circulated in a series of radio messages called "hydropacs" (Hydrographic information Pacific).

Interested governments were asked to forward information to Honolulu. These radio dispatches are given wide distribution throughout the area and are then issued in booklet form for the use of shipmasters.

In the Atlantic the main problem was centered in European waters. An international committee was set up in London known as the International Routing and Reporting Authority (IRRA). This body operates in much the same manner as the United States hydrographic office in the Pacific.

**Lights Lure Pests to Trap, Help Them Commit Suicide**

WOOSTER, OHIO.—One of these days, bugs that cause so much wreckage among crops may be obliging American farmers by simply committing suicide.

It's done with ordinary electric light bulbs, researchers at the Wooster experiment station said. The station has been working on them for ten years.

"Everyone who has ever tried to sit on an unscreened porch in the summertime knows that the porch lights will attract a bothersome gang of insects," said C. R. Neiswander, station entomologist. "We have put that knowledge to practical use in constructing a light trap."

"The lamp is placed in a dome with a funnel leading to a mason jar screwed on the bottom. The insects hit the lamp or the side of the dome, fall into the funnel and on into the trap."

What Neiswander likes about the light treatment is that it gets to bugs that have been showing an annoying immunity to poison sprays.

Here is one result: The May beetle. This bug is the parent of the white grub that feeds on plant roots. During the flying season as few as 12 to 15 traps have caught 20,000 beetles. No daddy beetles—no baby grubs.

**Lumberjack Claims Eating Championship of U. S. Army**

FT. MONMOUTH, N. J.—Ft. Monmouth claimed the eating championship of the U. S. army—it said it had a private who "thinks nothing of a breakfast of three dozen eggs, four to five grapefruit, a pound of bacon, a pitcher of coffee or a half gallon of milk."

The post public information office identified the man as Pvt. George Newhall, 22-year-old ex-lumberjack from Marquette, Mich. The announcement said Newhall had gained 30 pounds since he joined the army in 1944.

Newhall, 6 feet tall and weighing 223 pounds, takes his place regularly at the end of the mess line, the PIO announced, and cleans up anything remaining in the kitchen "after all his buddies have been served." His dinner diet at one recent sitting, the announcement said, consisted of "a five-pound meat loaf, a head of lettuce, creamed chicken and rice on the side, two ears of corn and a whole pie."

Newhall was described in the announcement as the wholesome, outdoors type.

**TO HAVE MONEY,  
LEARN HOW  
TO SPEND IT.**

Here is a simple system: Plan your spending, then save. First set aside funds to pay fixed expenses like rent, insurance, and interest and payments on loans. What you have left you can use for living, fun and future needs. But here's the secret: Before you start to spend, deposit something in your thrift account for tomorrow. Try it.

*is the most Beautiful BUY of all*

**The most Beautiful BUY for Styling**

Look at this exciting new Chevrolet from any point of view—inside and outside, front, side and rear—and you'll agree it's the smartest-looking automobile of this new year. For it alone, of all low-priced cars, brings you the distinguished beauty and luxury of Body by Fisher—the body featured on highest-priced cars.

**The most Beautiful BUY for Driving and Riding Ease—with new Center-Point Design**

Most sensational of all the advancements in this thrilling new Chevrolet for 1949 is the entirely new kind of driving and riding ease which it introduces into the low-priced field. New Center-Point Design—including Center-Point Steering, Center-Point Seating, lower Center of Gravity and Center-Point Rear Suspension—brings you driving and riding results heretofore found only in more expensive cars. The difference is so great—and so pleasing—that it's no exaggeration to say it is proving a revelation to all who drive or ride in this car. Remember—only new Center-Point Design can give these finer motoring results; and only the new Chevrolet offers Center-Point Design at lowest cost.

**The most Beautiful BUY for Performance**

What thrills you'll have when you drive this car! It's the only low-priced car with a Valve-in-Head engine—the engine which more and more makers of higher-priced cars are adopting—because it gives a much finer combination of performance, economy and dependability. And Chevrolet's world's champion Valve-in-Head engine holds all records for miles served and owners satisfied.

COUNTERFEITERS

Fake Money Floods U.S.

WASHINGTON.—Two huge counterfeit rings, one in New York and one in Chicago, are flooding the nation with bogus \$10 and \$20 bills representing millions of dollars.

Rings Are Separate

The New York bank officials said fake money also had been found in Chicago, but a secret service spokesman here said there was no connection between the two operations.

The Secret Service said the spurious New York bills had not been circulated beyond the New York area as far as it knew, but the Chicago ring had outlets in nearly all parts of the country.

The Chicago gang was said to have been active for several months. At first its product was found only in the Midwest. However, evidence of its operations has been found in Pacific Coast States, along the entire Eastern Seaboard and in the South.

Relatively little of the bogus money had turned up in Chicago, officials said. Two passers were under arrest, but the ring can not be broken until the printing machinery is discovered.

First in New York

The federal reserve bank in New York said commercial banks were taking daily losses from receipts of the fake bills. The counterfeit currency first was detected in New York when employees of the reserve bank there were sorting notes issued originally in Chicago for return to Chicago.

The commercial banks which sent the fake money to the Federal Reserve bank, not realizing that it was not good, were "out" the amount represented, a spokesman for the New York federal reserve said. He said that the member commercial banks were losing money every day because they could not trace the counterfeit currency.

He said the "money" has been turning up in substantial quantities in New York. He declined to reveal how much had been found, but said fake money had been coming in every day.

Officials estimated the amount of bogus money in the hands of the public might run in to "millions of dollars." They said the last big counterfeiting ring, operated by "Count" Victor Lustig in 1944, flooded the Midwest with \$2,500,000.

Is Ruling of Britisher Stealing Milk No Prank

LONDON.—The judge in the Marlborough street magistrates' court in there was no indication they were London had before him Jenny Frances Clark, an 18-year-old typist who came into prominence last summer when she defied the police by swimming across the Serpentine in Hyde Park in violation of the regulations. At that time her picture in a bathing suit was in many of the London papers.

This time she was charged with having picked up three bottles of milk outside a dairy on her way back from a dance early one morning. She told the judge she did it as a prank.

"Did you enjoy the joke?" asked the judge. "Did you get a good laugh out of it?" "No, I didn't," replied Miss Clark. "At the time I thought it was funny, but before I could have a laugh the policeman arrested me."

The probation officer testified that she found Miss Clark "to be a bit wild—a little out of hand." The judge, who said he would like to find out more about the young woman who had the faculty of getting into minor difficulties, remanded her in custody for a week.

'Live' Ammunition Found in Army Post Scrap Pile

HOUSTON, TEX.—When army officials at the San Jacinto depot learned that a large percentage of "live ammunition" was among the steel scrap shipments being received there, a busy hustle resulted as depot employees set to work to render the ammunition harmless.

Col. James W. Frazer said the shipments contained about 5 per cent "live" rounds. The ammunition ranged from 37 mm to 8-inch shells. It was believed the "live" rounds came from an army camp near Waco.

'Talker' Outfoxes Bandit

CHICAGO.—A young, well-dressed man walked into the Commercial Supply company here, pointed a gun at Harold Roman, the president of the firm, and said, "Turn it over."

"No cash," said Roman. "We just use checks."

"Gimme the checks," the gunman demanded.

"You'll only get into trouble," Roman insisted. "They can be traced."

The robber made Roman open the drawer of a desk and reached for a pile of stamps.

"It's a federal offense to steal postage stamps," Roman cautioned the gunman.

The robber hesitated, rifled through the desk and picked up \$30—in currency. Roman offered no comment. The robber fled with the cash.

Atoms May Produce Limited Electricity in Next Three Years

WASHINGTON.—David E. Lillenthal, atomic energy commission chairman, believes that an experimental atomic energy plant might be producing electricity within three years. This first plant would be purely experimental, he added, but within 20 years a sizable percentage of electricity would be produced by such plants.

Lillenthal denounced those who, he said, were trying to play down the atomic bomb as "just another explosive, another bomb."

"At first there arose a cult of doom, of dire things to come," he asserted. "We were told that atomic attack could mean a one-night war."

"Now it appears the pendulum is swinging to the opposite extreme. It is being asserted by some military men and some scientists that the atomic bomb is just another bomb, a super blockbuster, a piece of ordinance."

"This down-grading of the atomic bomb is the attitude of the Kremlin."

To accept this extreme could have these results, Lillenthal said: Revive the idea that atomic bomb stockpiling should be controlled by the military.

Give the impression that the United States plan for international atomic control was "quite senseless."

Give the impression that the atomic energy commission was "merely a munitions maker" and a civilian front behind which scientists could work without suffering pricks of conscience.

Lillenthal went on to say that both extremes of the pendulum were wrong and that his was the attitude being taken by the federal government. We explained that atomic energy was first seen as a weapon and therefore it was natural to think of it as such.

"But it is wrong to think of an application of a thing as the thing itself," he said.

**U. N. Finds Many Things About Which to Bother** LAKE SUCCESS.—From Beirut, Lebanon, the United Nations received word that a discordant note had been sounded in the amicable discussions of educators attending meetings of the United Nations educational, scientific and cultural organization.

The organization, it was reported, has been informed by its Austrian delegation that practically no country is adhering completely to the musical standard of "A" pitch, which was established in 1885 at Vienna.

Dr. Hermann Zeissl, head of the Austrian delegation, has urged the organization to summon an international conference on the subject. Happily, he points out, the standard tuning fork used at the 1885 meetings has been preserved in Vienna.

Dr. Zeissl holds that the standardization of "A" pitch at 435 cycles a second is no longer kept universally.

**Fish, Wildlife Service Plans Recipes for Cooks** WASHINGTON.—It may seem alien to a government agency with such virile responsibilities as the management of fur seal herds and the destruction of predatory animals, but the fish and wildlife service of the interior department works up recipes for the housewife. Its kitchen-counseling activities are part of a plan to make America more fish-conscious.

In line with this program, the service's branch of commercial fisheries maintains a spotless, well-equipped test kitchen at its technological laboratory on the campus of the University of Maryland at College Park.

Quick Dinner Dish

Eggs and cheese, two family favorites, team up in Eggs Goldilocks to make a good tasting, easy-to-prepare dinner dish. Attractive, too, with the yellow gold of the cheese sauce over stuffed eggs and toast.

Cheese is a "best buy." It is plentiful and in the class of foods which offer more for your dollar. It's a bargain in nutrition, too, supplying energy, phosphorus, calcium, vitamins A and C, and excellent protein (a half-pound of cheddar cheese furnishes as much protein as a whole pound of average beef).

Serve Eggs Goldilocks today and use cheese often in other dishes.

- Eggs Goldilocks
4 hard-cooked eggs
4 tablespoons mayonnaise
Salt and pepper
Toast
1/2 pound pasteurized process cheese
1/3 cup milk
Parsley

Cut eggs in half lengthwise. Remove the yolks, mash and combine with mayonnaise. Season to taste with the salt and pepper. Fill the whites. Cut squares of toast cornerwise and arrange on a chop plate. Place a stuffed egg half on each toast point. Melt the cheese in the top of a double boiler. Gradually add the milk, stirring until the sauce is smooth. Pour the sauce over the eggs. Garnish with parsley.

JOHN DEERE DAY IS MARCH 15, 1949 SILVERTON, TEXAS

Coffee Implement Company, local John Deere Dealer, invites all farmers and their families to attend their big John Deere Day Program at the Palace Theatre on March 15. Admission will be by ticket only, but tickets can be obtained free of charge at the Coffee Implement Company store.

"The Sugar Plum Tree" is the feature Hollywood production starring Billie Burke and Don Wilson. Coffee Implement Company says it's a rollicking comedy about two young people who have never been on a farm, and what they do when they receive one as a gift. It will prove to be Grade "A" entertainment for the entire family.

In addition to "The Sugar Plum Tree," several other brand new, all-talking pictures will be shown. They cover farm equipment and modern farming practices every farm family will find interesting and worthwhile to see.

Be sure to drop in at the Coffee Implement Company store for your free tickets if you haven't received them or need more.

Why are the windows on this barn like U.S. Savings Bonds?

Way back, when your grandfather was still very young, Pennsylvania farmers were doing a very strange thing.

They were painting the windows of their cow barns with ornate scenes of meadows and fields—sometimes they would even paint lace curtains on the windows.

All of this was done so that the cows inside the barn would be shut off from the bother and confusion of the outside world. They would see nothing but peace and contentment.

And it came to us that U.S. Savings Bonds are very much like these painted windows.

For Savings Bonds stand between you and financial worries. They assure you the peace and contentment of knowing that you have money on hand to meet future emergencies, hospital bills, and children's education.

And buying U.S. Savings Bonds is as easy as painting a barn window. For today, it can all be done automatically through your employer or local bank.

They do all the work for you. But it's you who collects the \$4 on every \$3 you invest in U.S. Savings Bonds. So right now, today—ask your employer or bank about the automatic way to buy U.S. Savings Bonds.

Automatic saving is sure saving—U.S. Savings Bonds

**VETERANS' NEWS**

World War II veterans receiving education or training under the GI Bill are urged by the Veterans Administration to include the name and address of their school or training establishment in all correspondence with VA.

This information should be included in addition to the clearly legible, complete name and address of the veteran and the extremely important claim number.

Student-veterans and job trainees who follow this advice will expedite any action on their case by VA and avoid delays often caused by lack of sufficient information contained in correspondence from veterans.

Veterans Administration has conducted a training program for corrective therapists at the Winter VA hospital in Topeka, Kansas, to broaden their understanding of the needs and problems of neuropsychiatric patients.

The course—the sixth given for corrective therapy personnel in VA hospitals—was a joint program of the Division of Physical Medicine Rehabilitation of VA's Department of Medicine and Surgery, and the Division of Adjunctive Therapy of the Institute of Psychological Medicine.

Training programs previously were conducted at VA general medical and surgical hospitals in Richmond, Virginia; Hines, Illinois, and Los Angeles, California. Two previous courses also were held at the Topeka hospital.

Future training programs are planned for the Topeka VA hospital and for other general medical and surgical hospitals, to keep corrective personnel informed of the latest developments in their field.

**Faith  
Dissolves Couples' Fear**

ATLANTA.—Mrs. W. L. Cash's first question when her 4-pound, 8 ounce girl was born was, "can she see?"

The doctor replied that the baby was normal in every respect.

Mrs. Cash smiled happily and the tension of the past months dropped away.

She and her husband, a piano tuner, have been blind since birth.

The mother, who does her own housekeeping, said a physician told her it would be dangerous to have a child.

"But I had faith," she said, "and I just couldn't believe the doctor was right."

**Average Income  
Of Family of Four  
Hits \$5,292 Peak**

NEW YORK.—The average American, by latest reckoning, gets \$1,323 a year or more than double his 1940 income. That is the figure just released by the National Industrial Conference Board.

The average includes men, women and children, which makes the average U. S. income \$5,292 for a family of four.

A year's income payments to individuals in Nevada total \$1,842 for every man, woman and child. In New York, it's \$1,781 per capita. Thus families of four in those two states are below average if they have \$7,000 a year income.

In eight states and the District of Columbia incomes average above \$1,600 per capita. That's \$6,400 for four people. The states are California, Nevada, Montana, North Dakota, Illinois, New York, Connecticut and Delaware.

These latest figures for a full year are for 1947. It may be higher when the 1948 totals are known. Even so, it is up 130 per cent since 1940.

In 1940 the national average per person was \$375. That year the family of four with \$2,300 a year was average.

Going back to the latest figures, the low income belt is in the south. This was also true in previous years. But Arkansas, with the lowest average in 1947, had \$710 per person which is well above the \$375 average of 1940.

**Plane Passenger Bound for  
Puerto Rico Lands in London**

NEW YORK.—Wrong Way Corrigan, who headed for California from New York and landed in Ireland, has a counterpart of Mrs. Emilia Garcia de Rivera.

Mrs. de Rivera, mother of 14 children, was worried about flying as fast as possible to Puerto Rico to visit her sick husband.

At La Guardia field, she rushed into a plane, apparently bound for Puerto Rico, and landed the next day—in London.

She explained in Spanish her predicament. She was placed aboard another plane and landed back at La Guardia field.

She did not have to pay the \$630 round trip fare.

Said Mrs. de Rivera, who has been visiting her daughter, Mrs. Evelina Toro in New York for six months:

"When does the next plane leave for Puerto Rico?"

**Boy Thief Conceals Loot  
Worth \$8,500 in Paper Bag**

ANTIOCH, CALIF.—For a week, Vernon Beard, 15, carefully guarded a paper bag, letting no one see its contents. Then police got a look, took the \$8,500 it contained and jailed Vernon.

Harry Boyer, chief of police, said the cash was loot from a burglary. He said the boy admitted that he hardly knew what to do with it. He spent a little for candy and milk shakes and was wondering if he should take a trip.

The money was stolen from the home of Jack Wolfe, Antioch merchant. Ever since, said Boyer, Vernon had been carrying it in the paper bag, or hiding it here and there, to return and pick up again.

Police said they matched Vernon's fingerprints from their juvenile files with prints discovered at another break-in and picked him up. Boyer said Vernon would be turned over to the California youth authority.

**American Women's Ambition  
For Sameness Irks Modiste**

NEW YORK.—"The trouble with American women is—they all want to look alike."

Mme. Eleanor Garnett leaned back in a dove-gray satin chair, flounced her taffy-colored braids, snapped fingers laden with headlight diamonds and continued:

"They go to a department store. They buy a dress. They pay too much. They come out looking just like the woman next door. And so they are happy."

Mme. Garnett, who looks like nobody else, is a designer who has arrived in New York from Shanghai to cut herself a slice of upper crust in the land of opportunity.

Her creations are spectacular enough to impress even the bored citizens of nearby Park avenue, and to cause some stirrings of alarm among other of the town's rarified couturiers.

## But Where?

It might be here! It might be anywhere in the United States. The Red Cross participates in an average of six disaster relief operations every week.

In 1948, 303 disasters last year the local chapters of the Red Cross were on the scene at once, had relief organized in a matter of hours, served as the funnel

through which flowed the nation's sympathy and help. Your contributions brought temporary housing... emergency food supplies... medical and nursing care to 312,400 victims. Later, thousands of these victims received long-term rehabilitation aid.

To carry on this mission of mercy, the Red Cross once again asks your help. So won't you give, and give generously?

**DOUBLE RING NUPTIALS READ UNITING ALLEN FRANCIS JOHNSON AND P. H. "NUKE" MAY**

In an impressive double ring ceremony in the home of the bride's parents, Allena Francis Johnson, daughter of Mr. and Mrs. L. W. Francis, became the bride of P. H. "Nuke" May, son of Mrs. Lillian May.

Vows were exchanged Sunday afternoon at 3 o'clock February 20, 1949, with Bro. Earl Cantwell, pastor of the Church of Christ of Rock Creek, officiating. Selections of traditional wedding music preceding the ceremony and during the exchange of vows included "I Love Thee", "I Love You Truly", and the wedding march from "Lohengrin" by Wagner. Vows were exchanged before an altar of pink gladioli and greenery, flanked by candelabra bearing lighted tapers.

Miss Guin Byers of Lubbock was the bride's matron-of-honor. She wore a cocoa-brown dress with matching accessories and a corsage of peach gladioli. Miss Beth Joiner, bridesmaid, wore a grey dress with cocoa-brown accessories and a corsage of pink sweet peas.

Billy Woods served as best man and Carol Brown served as an attendant. Ushers were Irvin Francis and Alvie Francis, brothers of the bride.

The bride attired in an aqua gabardine suit, accented with navy accessories, was given in marriage by her father. Her corsage was of white gardenias. She carried a white prayer book for something new, a linen handkerchief belonging to her late grandmother, Mrs. J. L. Francis, for something old; her something borrowed was a pair of pearl ear screws; her something blue was her wedding suit; she wore a silver dime for good luck in her right shoe.

Mrs. Francis, mother of the bride wore a black crepe dress with a corsage of white gardenias. The bridegroom's mother was attired in a black crepe dress with a corsage of white gardenias.

Immediately following the marriage ceremony a reception was held in the home of the bride's parents. The table was covered with a lace cloth and held a three-

tiered wedding cake topped with a miniature bride and groom and garlanded with pink gladioli and fern and flanked by white tapers. Assistants at the reception were Mrs. J. L. West and Mrs. Milton Frizzell, sisters of the bride.

The couple left immediately on a wedding trip to Arizona. Mrs. May graduated from the Silverton High School and attended West Texas State College at Canyon. Mr. May also attended school at Silverton. They will make their home near Silverton where he is engaged in farming.

Those attending the wedding were: Mr. and Mrs. True Burson, Mr. and Mrs. Tony Burson, Mr. and Mrs. Beth Joiner, Mr. and Mrs. Hubert Brown, Mr. and Mrs. Edwin Dickerson, Mr. and Mrs. Hollie Francis and Jimmy, Mr. and Mrs. Charles Francis, Mr. and Mrs. Loyd May, Mr. and Mrs. Elmer May and children, Mr. and Mrs. Milton Frizzell, Carolyn and Jerry, Mr. and Mrs. J. L. West, Mary Jane and Larry, Virginia May, Francis May, Mrs. Lillian May, Mr. and Mrs. L. W. Francis, Mrs. Billy Woods, Clayton Wood, Esdel Hutsell, Mrs. Earl Cantwell, Irwin Francis, John Francis, Alvie Francis, all of Silverton.

Mrs. Catherine Skeen and Miss Maude Dee Skeen, of Lubbock; Mr. Malcolm Miller, of Texline.
