## Body Of Billie Rampley Due To Arrive Sunday

### Vacation Church School Will Close Sunday Night

The Methodist and Presbyterian churches vacation school which started June 13, will close Sunday night with a program by the children who have attended the school. The regular preaching program will be given over to the program, Rev. Adcock announced.

Miss Janet Edmonson of Abilene is supervisor of the school, and has had an average attendance of 86 children each afternoon. The public is invited to attend the program Sunday night.

### Rayburn Burgess Is In Austin This Week

Rayburn Burgess left Sunday morning for Austin, Texas, where he went to take the examination before the Pharmacy State Board. Rayburn received his degree from the State University at Norman, Oklahoma, the early part of June, and is required to take the State Board Examination. He is expected home the latter part of this week.

While away his parents, Mr. and Mrs. E. E. Burgess, of Quitaque, are assisting his wife in operating the drug store.

### Leo White at College Station This Week

County Agent, Leo White, is spending this week at College Station attending a State meeting. He left Monday afternoon, and is expected home the latter part of this week.

### Visitors In Hodges Home Recently

Mr. and Mrs. T. J. Hodges had as their guests the past week their son and family, Mr. and Mrs. D. Hodges, of Houston, Texas. Sunday visitors were Miss Jewell Hodges, of Lubbock; Mr. and Mrs. Jack Buckley, of Amarillo, a granddaughter; Mr. and Mrs. Vernon Garrison, Tulsa; Mr. and Mrs. Arnold Turner. In the afternoon Mr. and Mrs. Silven Turner and Mr. Bob Turner.

Mr. and Mrs. Ewing Vaughan had as their dinner guests Sunday Mr. and Mrs. Allen Kellum and children.

## Woman Ordained as Minister

NEW YORK.—Rev. Victoria Smith Demarest raises her arms in benediction after her ordination as a Congregational minister, during ceremonies at the Broadway Tabernacle Church, during a few moments Flanking the pulpit are the ministers who ordained her. She is shown here with her mother, the Marchese Catherine Booth-Clibborn of Paris, is the oldest daughter of the late William Booth, founder of the Salvation Army. She is 91 and is still preaching evangelistic sermons in a church in Paris.

## Prepare for Battle

OSKALOOSA, IOWA.—Housewives stand by with brooms and umbrellas in case last summer's battle for the clms flares up again. State Highway Commission has rejected compromise proposal to keep trees from being removed for street widening project. Left to right: Mrs. Max Shrago, Mrs. George Darland, Mrs. Virgil Hill, all veterans of last year's street battle. Umbrella held by Mrs. Shrago is new one as old one was broken on worker who was uprooting a tree in front of her house.

## Harvest Gets Underway As Fields Dry-Good Yield Per Acre Reported

### Four Silvertown Girls Graduate From WTSC, Canyon

Four young women all graduates of Silvertown High School were graduates of West Texas State College this spring. They are Mrs. H. R. Fulton, Jr., of Canyon, Mrs. Max Evans, of Farmington, New Mexico, Miss June Wimberly, of Canyon, and Miss Wilma Francis of Silvertown.

Mrs. Fulton, the former Thelma Mercer, daughter of Mr. and Mrs. Joe B. Mercer, was a voice and piano major. Mrs. Fulton received many honors being a member of Alpha Chi National honor society, Who's Who her senior year, Gamma Phi Sorority and several music organizations.

Mrs. Evans, the former Nina Cantwell, daughter of Mr. and Mrs. Earl I. Cantwell, was a speech and dramatics major and was a member of several speech organizations.

Miss Wimberly, daughter of Mr. and Mrs. Carl V. Wimberly of Canyon was a music major. She was a member of Alpha Chi, national honor fraternity Who's Who, president of Gamma Phi Sorority, a beauty nominee, and a member of several music organizations. Miss Wimberly was awarded the PiOmega plaque for most valuable senior girl on senior day.

Miss Francis, daughter of Mr. and Mrs. J. Lee Francis was an art major. Miss Francis was a member of Alpha Chi, national honor fraternity, president of Delta Zeta Chic Society, president of Inter-Club Council, Chairman of the annual Club Presentation Ball, a College Beauty, and a member of Alpha Rho Tau, college art club.

### BIRTH

Mr. and Mrs. Loyd Hodges, of Cave Creek, Arizona, are the proud parents of a baby boy, born June 5, 1949, named James Boyd. Grandparents are Mr. and Mrs. T. J. Hodges, Silvertown.

Opal Joyce Bynum, of Amarillo, great-granddaughter of Mrs. Mattie Perry is visiting her grand mother.

Mr. and Mrs. Melvin Yancey, Mr. and Mrs. Albert Rowland and girls and Mr. and Mrs. Elzie Yancey and daughter, spent Sunday in Lubbock and attended a family reunion in the home of Mr. and Mrs. W. A. Yancey.

### "A Letter to Three Wives" Sun., Mon., June 19 and 20

For a real film treat see the picture at the Palace this Sunday and Monday, "A Letter to Three Wives" starring Linda Darnell, Ann Sothern and Jeanne Crain. With a cast like this you can't go wrong. It's a picture for the entire family.

Check advertisement on page two for the week's program.

### Carlyn Wimberly Complimented With Shower and Tea

Miss Carlyn Wimberly, bride-elect of William J. Montgomery, was complimented by a miscellaneous shower and tea on Saturday afternoon, June 11, given by Mrs. J. Lee Francis, Mrs. H. R. Fulton, Jr., Mrs. Cecil Franks and Miss Wilma Francis in the Francis home.

The serving table and the decorations carried out the honoree's chosen color of pink. Mrs. Francis, the honoree, and the mother of the honoree, Mrs. Carl V. Wimberly greeted the guests at the door. Mrs. H. R. Fulton, Jr., presided at the guest register, and Mrs. Cecil Franks at the punch bowl. Miss Wilma Francis and Miss June Wimberly, sister of the honoree, assisted in the gift room.

Attending were: Mesdames Joe Mercer, Ben O. King, Tom Bomar, Grady Wimberly, D. T. Northcutt, Warner Reid, Jackie Wingo, Harold Seefeldt, W. E. Redin, Alton Steele, C. F. Joiner, A. L. Redin, W. W. Martin, U. D. Brown, Edwin Crass, Earl Cantwell, W. H. Steele, J. E. Jewell, Hollie Francis, Allen Kellum, Clyde Mercer from Silvertown.

Out-of-town guests were: Mesdames W. C. Price, Lockney; G. N. Brown, Tulsa; R. A. Hodges, Canyon.

Several who were unable to attend sent gifts.

Mrs. Mozelle Sells spent the week end in Plainview with Mr. Sells' parents, Mr. and Mrs. Sells.

Mr. and Mrs. Doris Clifton and daughter, of Hereford, visited last week with her parents, Mr. and Mrs. Durward O'Neal.

Mr. and Mrs. Walter Cobb and daughter, Ravenell, of Quitaque, visited Sunday in the C. M. Chapell home.

## Funeral Held For Briscoe County Pioneer Friday

Funeral services were held Friday afternoon at 2:00 o'clock at the First Baptist Church for John A. Montague. Earl I. Cantwell officiated, assisted by Dr. Rodgers and Rev. Brookshier of Plainview. Mr. Montague passed away at Plainview hospital Wednesday night, June 8, following a long illness. Interment was made in Silvertown cemetery under direction of Stewart-Douglas Funeral Home.

John Alfred Montague was the son of Daniel and Linnie Montague. He was born in Montague County June 21, 1885 of a family of four brothers and two sisters. At the age of six he moved with his parents to Briscoe County and settled in the Lakeview community south of Silvertown. In May, 1906, he was married to Miss Verna Annie Davis. To this union were born five children, three sons and two daughters. His wife preceded him in death in October, 1941.

In 1944 he was married to Mrs. Minniebel Snowden. In 1945 they moved to Plainview, Texas where he resided at the time of his passing. Mr. Montague was a member of the Methodist Church 15 years prior to joining the Church of Christ which he had been a member for the past 30 years.

He is survived by his widow; three sons, Gordon of Silvertown, Jack of Tulsa and Marvin of Plainview, one step-son, Jack Bentley Snowden of Amarillo; two daughters, Mrs. Jewel Selby of Amarillo, and Mrs. Geraldine Smith, of Tulsa; two brothers, Dan Montague, of Silvertown and Sam Montague, of Portales, New Mexico; one sister, Mrs. Annie Smith of Las Anamias, Colorado. Six grandchildren also survive.

Pallbearers were: Emmitt Brookshier, Elbert Dickenson, Louie Kitchens, Lewis Francis, John Lee Francis, A. N. Redinger, R. E. Douglas and Edd Thomas.

### Out-of-Town Relatives And Friends

Mr. and Mrs. Paul Stanford and daughter, Mr. and Mrs. Ray Horn and son, Mr. and Mrs. R. E. Douglas, Lubbock; Mr. and Mrs. Jim Davis, Marshall Davis, Q. E. Brown and daughter, Miss Lalla Brown, Mr. and Mrs. Barney Brown, Mr. and Mrs. Aubrey Montague, Mr. and Mrs. Ernest Eads and son, Mrs. Ethel Montague, Mr. and Mrs. E. T. Evans, Mr. and Mrs. Clinton Brown, all of Amarillo; Mrs. John Hutchins,

### George Martin Resigns A. C. A. Effective June 15

George Martin, who has been in charge of the Briscoe County A. C. A. for the past four years, has resigned this position, effective Wednesday, June 15.

Bill Messimer, who has been employed in this office for a number of years, was named by the County Committee Tuesday as acting administrative officer, to carry on with the work which George had been handling.

Mr. Martin will devote his time to farming and ranching. He wishes to express his appreciation to the farmers for their cooperation during the time he was in charge of the A. C. A. office.

### Lions Club Meeting Postponed Until Thursday, June 23

The Lions Club regular meeting has been postponed from June 16 to Thursday night June 23. The date is being changed on account of wheat harvest. All members are requested to keep this change of date in mind and plan to attend Thursday night, June 23.

Mr. and Mrs. A. C. Fry and children, Glenn and Linda, were business visitors in Amarillo Monday evening.

Miss Jerry Browning and brother, Don Browning, of Tucuman, New Mexico, arrived this week to spend the summer with Mrs. Browning's mother, Mrs. Wade Welch on the McMurtry ranch.

Hereford; Mrs. Fannie Montague and daughter, Wanda, Mr. and Mrs. Bob Garrett, Floydada; Mr. and Mrs. Bill Smith, Las Anamias, Colorado; Mr. and Mrs. Hampton, Rex Montague, Mr. and Mrs. Red, Dr. and Mrs. Rodgers, Rev. and Mrs. Brookshier, Mr. and Mrs. Wilbur Wilson, all of Plainview; Mr. and Mrs. Edgar Bell, Tulsa; Mr. and Mrs. G. W. West, Mr. and Mrs. Lloyd Horn, South Plains; Mr. and Mrs. R. C. Green, Turkey; Mr. and Mrs. Robert Smith, Mr. and Mrs. Brunner, Miss Carlon Brunner, Lockney; Mr. and Mrs. Harry Burdon, Mr. and Mrs. Dean Burger and daughter, Pampa; and Mrs. Clarence Brown, Dalhart.

### Silvertown Pharmacy Installs New Air Conditioner

Rayburn Burgess at the Silvertown Pharmacy installed a big air-conditioner at the drug store last week that is giving off plenty of cool air. The new conditioner will take the place of ceiling fans that were being used to cool the building.

Mr. and Mrs. Perry Brandon and sisters, Misses Catherine and Angelin Brandon, Mr. and Mrs. Virgil Crow and baby, were dinner guests of Mr. and Mrs. H. S. Crow Sunday. Mr. Brandon was a buddy of Virgil's while in service in England.

Mr. and Mrs. Price Bradley, Mrs. Lula Vaughan, of Tulsa, visited Mr. and Mrs. Steve Duncan Sunday.

Mr. and Mrs. Douglas Yancey and children, of San Diego, California, were here last week visiting relatives.

Mr. and Mrs. Harold Hall, of Littlefield, visited Thursday in the home of Mr. and Mrs. Albert Rowland.

Miss Doris June Brown, of Fort Worth, is spending the summer with her parents, Mr. and Mrs. Sam Brown.

## Atomic Director Testifies

WASHINGTON, D. C.—Dr. Walter H. Zinn (left), of the Argonne National Laboratory in Chicago from which a small quantity of uranium disappeared in February, spent most of the day before the Joint Congressional Atomic Energy Committee. He is shown here with Sen. Brien McMahon (D., Conn.), committee chairman, and Sen. Bourke Hickenlooper (R., Iowa), right, ranking GOP member of the committee. The committee announced that it will make a complete study of Sen. Hickenlooper's demand for the resignation of AEC Chairman David E. Lilienthal.

## Rotary Hoe Is Classified as High Speed Cotton Chopper

The rotary hoe is doing a speed-up job of cotton cultivation, especially in West Texas and the Plains area.

Fred C. Elliott, extension cotton work specialist says it works best on the young cotton seedlings in getting rid of the grass and weeds early, the cheapest time to do it.

The main advantage to the rotary hoe is that it speeds up cultivation of early growing cotton. Later on, as the cotton gets taller, this weeding machine doesn't work so well because the plants outgrow it. So the cotton farmer turns to other methods of hoeing.

With all the spring rains farm-

ers got the past months, they're growing a pretty good crop of weeds right along with their cotton. Hand hoeing costs quite a bit, but the rotary hoe cuts hoeing costs down, Elliott says. A common mistake with rotary hoe owners is not operating fast enough. Most of the time a farmer figures he's tearing the seedlings up if he goes too fast. Not so with the rotary hoe.

There are a couple of things to remember when using this machine, Elliott reminds. First, don't set it any deeper than enough to break the crust of the soil. The shallow picking action of the picks pulls up the tender weeds and grass, leaving them to dry out in the wind and sun. The best time to do the job is about a week after a rain.

And second, the best operating speed for the rotary hoe is be-

tween six and eight miles per hour—at least four and a half mph., running in third gear.

By keeping the bed flat, you'll avoid throwing seed and grass around the cotton seedlings. It's a good idea to delay "dirting" the cotton until it gets a good start, Elliott concludes.

With the coming of drier weather in Briscoe County there will be plenty of rotary hoeing to do—and it's our guess much of the cotton crop will be saved through the proper use of this implement.

## DINNER GUESTS IN THE ED VAUGHAN HOME

Dinner guests in the Ed Vaughan home Sunday were: Mr. and Mrs. John Hacker and boys, of Hereford, Mr. and Mrs. Bud McMinn, Rev. and Mrs. Travis McMinn, of Happy, Eual Vaughan, and Mrs. Lottie Henderson and Dwain.

Mrs. B. J. Womack and Joe Lynn, of Amherst, and Mrs. Bruce Womack, visited last week in Sulphur, Oklahoma and Sherman, Texas.

Mr. and Mrs. A. A. Heard and children, of Fort Worth, are visiting her parents, Mr. and Mrs. S. P. Brown and other relatives.

## VISITORS IN DAN MONTAGUE HOME FRIDAY

Among those visiting in the home of Mr. and Mrs. Dan Montague Friday evening were: Mr. and Mrs. Bill Smith, of Los Animas, Colorado; Mr. and Mrs. Earl Cantwell and son, Elton; Mr. and Mrs. Wayland Fitzgerald and family; Mr. and Mrs. James Henderson, Mr. and Mrs. Merle Montague, Mr. and Mrs. Roy Montague and Mr. and Mrs. Ray Teeple.

## ATTEND MONTAGUE FUNERAL

Among the out-of-town relatives and friends who attended the funeral of John Montague Friday afternoon were: Mr. and Mrs. R. E. Douglas, of Lubbock; Mr. and Mrs. R. C. Greene and family, Turkey; Mr. and Mrs. Emery Mills, of Tulsa; Mr. and Mrs. Joe Wilson, Mrs. Fannie Montague, and Mr. and Mrs. Bob Garrett, of Floydada; Mr. and Mrs. Clinton Brown, Mrs. Moore and children, of Amarillo.

Mrs. Bud Alexander, of Stratmore, California, and her daughter and family, Mr. and Mrs. Willard Cobb and son, Glenn, of Orange, Texas, spent the week end with her father, T. D. Wallace.

## Nursery For Plant Demonstration of Sorghum Is Established

A sorghum nursery for plant demonstration and testing has been established at Texas Technological college at Lubbock.

One hundred varieties including some of the best known sorghums raised in the Texas plains area, and several new types never tried in Texas before are included in the small replicated plots. Dr. A. W. Young, head and professor of plant industry, said that the row tests are introducing sorghums from Kansas, Oklahoma and types sent to the college by the United States Department of Agriculture, Washington, D. C.

Information concerning each of the sorghums will be kept for publication, and inspection of the nursery by farmers of the plains area is invited at any time, Dr. Young said.

Irrigation will be available through the college system if needed, he said. The plots have been hand planted. Each variety is planted in three-row arrangements with the center row to be used for records.

Frigidaire at Simpson Chevrolet Company.

## PLANT MORE OPPORTUNITY IN YOUR FUTURE!

How will your finances stand ten years from now? Will you have the cash for home improvements, farm expansion, education for the kiddies? Will you be able to fulfill your dreams of long vacation trips, of rest and retirement?

You won't if you squander today's profits on overpriced purchases. You will if you salt away every cent possible in safe,

sure United States Savings Bonds, the crop that never fails.

With your money safely invested in Savings Bonds, you'll be growing every \$3 you invest into \$4 — in only ten years. And come what may — bad weather, bad times or bad luck — you'll have a sizeable nest egg to safeguard your future! Buy 'em at your bank or post office.

## INVEST IN U.S. SAVINGS BONDS

This is an official U. S. Treasury Advertisement—prepared under auspices of Treasury Department and Advertising Council

**ROWLAND COMPANY OF PLAINVIEW ANNOUNCES COMPLETION OF \$20,000 MANUFACTURING PLANT**

A new Plains fertilizer industry is taking shape in Plainview, where the Rowland Company has announced completion of a new \$20,000 plant for the manufacture of All-Crop Nitrow, the trade name of a 25 per cent nitrogen low-cost liquid fertilizer. With its daily capacity of approximately 2,000 gallons of Nitrow, the Rowland Company plant will help to overcome the local shortage of nitrogen fertilizer. In liquid form, Nitrow is ready for application through irrigation water to growing cotton, maize, and other area crops.

The importance of nitrogen as a plant food has long been recognized. For higher yields, better quality, and earlier maturity, nitrogen is a most essential fertilizer component. This has been repeatedly evidenced by the big increases in yields of crops following alfalfa and other nitrogen-producing legumes. Other plant foods, particularly phosphorous and potash, must be added from time to time to keep the soil in proper balance, but nitrogen is the responsive factor in all types of plant life. Ammonium nitrate, which is a bagged form of nitrogen fertilizer that corresponds to the Rowland Company's liquid nitrogen, has a good record in the Plains area on sorghums, cotton, wheat, and truck crops.

The liquid nitrogen manufactured in the Rowland Company plant is made by transferring 83 per cent Anhydrous Ammonia, a nitrogen gas, from an 18,000 gallon storage tank to mixing tanks, where it is combined with water, and passed through heat exchangers to other storage tanks. All-Crop Nitrow will be distributed to dealers and farmers in 50 gallon steel drums, for application directly to the irrigation water by means of a metering tube placed in the bung of the drum.

It is easier for the farmer to follow his fertilizer distribution down the rows with All-Crop Nitrow, for, when it combines

with irrigation water, it turns the water a milky color and gives off an ammonia odor. The Rowland Company estimates that the price of this new liquid nitrogen will be 45c per gallon to the farmer, plus a drum deposit.

The average application will be from 10 to 15 gallons per acre. Many farmers will make two applications to cotton and sorghums, of 8 to 10 gallons each. In this way, the plant is fed more continually, with the second application being about blooming or booting time, when the pull on reserve plant food is heaviest. A few drums of this material were used on maize by one farmer west of Tulla last season. Where he used no nitrogen, it took 14 rows to fill the combine hopper when harvesting, whereas 8 rows filled the same hopper where All-Crop Nitrow had been added to the irrigation water.

Liquid nitrogen is being used with good success in other areas which have soil types akin to the soils of the plains area. Most of our soils are slightly alkaline; liquid nitrogen, being slightly acid, helps to correct this alkaline condition and makes for better plant feeding. Cotton near Las Cruces, New Mexico, last season, usually a 2 bale-per-acre yield, was increased another one-fourth bale by use of this nitrogen in the irrigation water. Similar results were obtained on other crops.

In Louisiana and Mississippi delta regions, liquid nitrogen is being side-dressed to cotton and corn by dispensing from barrels placed on tractors. The Rowland Company is currently building a tractor unit for this purpose, for particular use on dry land where the irrigation method is impractical.

The Rowland Company has been one of the pioneers in the farm chemical field in the Plains-Pecos-Oklahoma section, operating the first mixing plant for bagged fertilizers and cotton dusts in the area. Nitrow nitrogen is

being made available through dealers in every community where there is irrigation. For this season, application to dry lands will continue to be on an experimental basis.

**SHIRLEY ANN FITZGERALD HONORED ON BIRTHDAY**

Mrs. Wayland Fitzgerald honored her daughter, Shirley Ann, on her ninth birthday Saturday, June 11, with a birthday party. Ice cream and cake were served to the following children:

Elaine McDaniel, Gail Lauderdale, Leah Dare Kellum, Mary Jane West, Kay Garrison, and Betty and Shirley Ann Fitzgerald.

**VISITORS IN BETH JOINER HOME**

Captain and Mrs. Harold Molyneux and family, of Long Island, New York, are here to spend the summer with Mrs. Molyneux's parents, Mr. and Mrs. Beth Joiner.

**Mr. and Mrs. Jim Baker and two children, of Austin, visited Wednesday night with Mr. and Mrs. Bud McMinn.**

**Frigidaire at Simpson Chevrolet Company.**

Elzie and Jack Teague, of Dimmitt, were business visitors in Silvertown this week.

**Dextrose Candy for Berlin's Children**

A Berlin youngster eagerly watches a German Red Cross nurse open a roll of N-R-G dextrose candy, one of 351,000 packages donated to the American Red Cross by Otto Schnering, president of Curtiss Candy Company, for overseas use. Over 300,000 rolls of the candy went to the American zone in Germany for distribution to children, elderly people and others who need more calories than they get in their regular, limited diets; and 153 chests were flown into Berlin via airlift planes. The balance of the candy went to the Philippines for patients in 10 leprosy hospitals in the islands whose diets are not limited but who need the morale lift such gifts give them.

**Tires 75,000 Miles Goal**

CAMBRIDGE, MASS.—Motor car tires good for 75,000 miles may be expected on the market before long, Dr. Charles P. Fryling of the Phillips petroleum company has reported.

Addressing the Northeastern section of the American Chemical Society at the Massachusetts Institute of Technology, Dr. Phillips said that further improvement in a new synthetic known as "cold rubber" would make the long-lived tires possible. He asserted that a production capacity of 200,000 tons of cold rubber would be available by the end of this year, enabling synthetic rubber to compete on favorable terms with the natural product.

In addition to making possible better rubber, Dr. Fryling said, the new process has reduced the cost of the synthetic product, since faster reactions with reduced overhead costs were now possible, and that fewer raw materials need be used.

**Old Boy Scout Trick Works to Bring Back Man Dead 15 Minutes**

LOS ANGELES.—Reid C. Lewis, 46, round-faced, slightly bald aircraft inspector, jokes about his return from the dead as the result of a doctor's recalling an old Boy Scout first aid trick.

"I thought the doctor was kidding when he first told me I'd been dead and brought back to life," Lewis said in his hospital bed. Lewis was brought back to life after he "died" on the operating table when undergoing minor surgery in the doctor's office.

The physician, who would not permit use of his name, said Lewis showed no signs of life for 15-minutes despite injections of a stimulant, coramine, directly into the heart and artificial respiration with pure oxygen pumped into the lungs.

"Then I recalled an old Boy Scout handbook first aid trick that said persons who had been drowned sometimes were brought back to life by breaking a bone," the doctor said.

"I snapped Lewis's 10th left rib with my hands. He came to life at once."

Lewis was not informed of his "death." He complained of a sore rib, his wife said, and wondered why the doctor did not perform the operation. The doctor had told her what happened but asked her not to tell Lewis until he could operate again.

"I just told him he must have bumped himself," Mrs. Sophia Lewis said. "That seemed to satisfy him."

**South Declared in Need Of More Skilled Workers**

NEW ORLEANS.—The South is in need of additional skilled labor for industrial expansion, delegates from 10 states were told at the first annual southern states apprenticeship conference here.

William F. Patterson, Washington, director of the U. S. labor department's bureau of apprenticeship, declared that if the industrial growth of the South continues, "There must be a great deal of punch put behind the apprenticeship program."

He said the skilled labor force of eight million in the United States was depleting itself by 5 per cent each year through the death of skilled laborers, retirement of others, and departure of some to other fields.

"The apprenticeship programs are feeding new men into the fields," Patterson added, "but there is not quite enough of them to retain the skilled labor force of the country."

He added that the unions are co-operating to build up the number of apprentices in each trade and the best job is being done by the building trades.

**Dog And Donkey Killed In Weird Road Mishap**

CARACAS.—In a triple crash recently in the municipality of Camunare, Uprachiche district, Estado Yaracuy, a dog, a donkey, and an automobile got tangled up in such a fashion that the dog died beneath the hooves of the donkey, while the donkey died beneath the wheels of the car.

When the donkey passed the house where the dog lived, the dog ran out barking. The donkey took to its heels with the dog after it and arrived at a bend in the road at the entrance to the village just as a car approached round the bend. The donkey lashed out with its hind legs and struck the dog, killing it a second before the car, unable to pull up, struck the donkey with its front wheels, killing it.

The car was wrecked—its radiator smashed in, headlamps broken off, its mudguards snapped, and its bumper broken.

It was announced that a triple "Judgment of Solomon" would be made, by which the owner of the donkey would compensate the owner of the dog, the owner of the car would compensate the owner of the donkey, while the owner of the donkey would in turn, compensate the owner of the car.

**A Change is in Order...**

**Change to OIL-PLATING!**

Safer! . . . In your engine, Conoco N<sup>th</sup> oil won't break down under heavy loads. It stands up under high temperatures and long hauls. Conoco N<sup>th</sup> is sturdy as an ox!

Low Running Costs! . . . because an engine OIL-PLATED with Conoco N<sup>th</sup> lasts and lasts. You save on repair bills. You buy less oil between drains.

Ready To Go! . . . because an added ingredient in Conoco N<sup>th</sup> attaches lubricant right to the metal. It won't all drain down—even overnight. . . your engine is actually OIL-PLATED!

Hoards Power! . . . because another exclusive additive in Conoco N<sup>th</sup> fights power-robbing carbon and sludge. Keep that hushed power with Conoco N<sup>th</sup>.

Mr. John Kincaid, of Portales, New Mexico, is visiting relatives and friends in Silverton.

Mr. and Mrs. Royce Vaughan, of Plainview, visited Mrs. Vaughan's parents, Mr. and Mrs. W. E. Autry, Sunday.

Mr. and Mrs. Bill Smith, of Las Animas, Colorado, visited relatives in Silverton over the week end.

Mrs. M. O. Blackshear accompanied her parents to Vernon Saturday where they will visit before returning to their home in Terrell, Texas.

FRIGIDAIRE at Simpson Chevrolet Company.

Virginia Lee Reid Is Bride of Charles Hawkins.

Canyon, June 11 (Special)—An afternoon ceremony held Monday afternoon in the First Presbyterian Church united in marriage Miss Virginia Lee Reid, daughter of Mr. and Mrs. J. W. Reid, and Charles Wallace Hawkins, son of Wallace Hawkins of Dallas.

A nuptial prelude played by Mrs. J. D. Barker, organist, included "Romance" by Preston and "At Dawning" by Cadman. Mrs. R. H. Fulton, Jr., sang "Ave Maria" by Bach-Gounod and "I Love Thee" by Grieg, accompanied by Mrs. Barker. The traditional wedding marches were used, and "The Lord's Prayer" by Malotte formed the musical background as vows were exchanged.

Attending her sister as matron of honor, Mrs. G. W. Lee, Jr., of Silverton was attired in a plum taffeta gown with fitted bodice, off-the-shoulder neckline and full ballerina length skirt. Matching elbow length mitts, satin sandals and a headband of Estereed daisies completed her costume. She carried a bouquet of white rosebuds.

The bridesmaids, Miss Virginia Hunter, in green, Miss Wanda Davis of Tulia, in blue, and Miss Leta McNutt of Plainview, in orchid, wore taffeta gowns, mitts, headbands and sandals styled identical to the matron's. Their bouquets were of Talisman roses.

Han Finger of Alvin was best man. Ushers and groomsmen were Tommie Welch of Artesia, New Mexico, Raymond Walston of Menard and Charles Bayles of Pampa.

Given in marriage by her father, the bride was gowned in white satin, fashioned with an illusion yoke joined to the molded bodice by a wide band of raised satin and seed pearl embroidery, long sleeves tapering to points and a full skirt, which gathered into a bustle effect and terminated in a train. Her finger-tip length veil of illusion cascaded from a coronet of seed pearls. Her bouquet was of Bouvardia, topped with two white orchids.

For her daughter's wedding, Mrs. Reid chose a self embroidered blue linen frock with a bluish pink picture hat and black accessories. Her corsage was of red roses.

Following the ceremony guests were entertained at a reception honoring the bride party in the home of the bride's parents. Laid with a lace cloth, the serving table was centered with an arrangement of white Estereed daisies and white rosebuds.

For a wedding trip to points in Colorado, Mrs. Hawkins traveled in a beige Palm Beach suit with copper accessories and an orchid corsage.

Mrs. Hawkins was graduated from West Texas High School. She is a last semester senior at West Texas State College, where she is a member of Pi Omega Sorority. Mr. Hawkins was graduated from high school in Dallas, attended New Mexico Military Institute, Roswell, and served in the Merchant Marines. He is a senior student at Sul Ross College, Alpine.

Out-of-town guests attending were: Wallace Hawkins, Mike Hawkins and Mrs. Edward C. Andrews, Dallas; Mr. and Mrs. G. L. Troutman, Mr. and Mrs. Frank Franklin Hager, Mr. and Mrs. G. K. Kenman, Dianne and Denny Jack, Dr. and Mrs. R. G. Fowler, Dumas; Mrs. C. M. Bayles, Pampa; Mr. and Mrs. Sid Reid, Hollis, Oklahoma; Bob Reid, Mrs. W. W. Tucker, Mrs. Melba Turner and Greg, San Angelo; Mr. and Mrs. Warner Reid, Mike and sue, Mr. and Mrs. J. W. Reid, Jr., Jim and Dick, Mr. and Mrs. G. W. Lee, Jr., and Marca Lynn, Silverton; Mr. and Mrs. Carl Daniels and Colly, Mr. and Mrs. J. H. Fowler, Lockney; Mrs. George Lee and Glenna, Lubbock; Mr. and Mrs. Wade Reid, Ft. Davis.

A bucket spray pump, equipped with a four foot extension rod and at least 15 feet of hose, is satisfactory for a few fruit trees around the home, but for spraying orchards up to 300 trees, a barrel spray pump which develops from 125 to 150 pounds pressure is more practical.

Mr. and Mrs. Jimmie Stevenson, Mr. and Mrs. Scott Durham and son, spent the week end with Mr. and Mrs. Nash Blessingame at Brice.

REDS COMPLAIN

Upright Man In Bad Shape

MOSCOW.—The government newspaper Izvestia complained today against a Soviet biologist who held that man started on the downward path when he began to walk on his two legs.

This scientist, the paper said, is "an ignoramus."

The biologist, Izvestia said, really was a former pro-Czarist officer who had managed to worm his way into Soviet science circles.

S. D. Antipin, chief of the department of biology at the Kishinev medical institute, was the challenged scientist. Izvestia said he had advanced this theory: Man's greatest tragedy occurred when he ceased to walk on all fours and cut himself off from the animal world by assuming an erect position. If man had continued to walk horizontally, and rabbits had learned to walk vertically, many of the world's ills would not exist.

Attacks Scientist Boris Lavrenev, Izvestia writer, scrutinized Antipin's career, and said he is a former soldier in Admiral Kolchak's White Guards, fought the Red army and then, when Kolchak was defeated, managed to pass himself off as a "biologist."

Lavrenev said Antipin taught at various medical and veterinarian institutions until he landed his job as a department head at Kishinev.

Citing some choice Antipinisms, Lavrenev quoted, "Every four-legged animal excels man. Since man raised his head up, he lost his sense of smell and by using artificial meat grinders instead of his own teeth he has weakened his chewing equipment."

Because of man's vertical position his internal organs are piled one atop another like the floors of a building. Antipin held, and his lungs are not properly ventilated, hence he is subject to tuberculosis.

"As the descendant of a four-legged animal, man is constructed on the horizontal principle and thus, by becoming vertical, he is as curious as a steam engine, rolling along on its back wheels," Antipin was quoted.

Dislikes Mouth Lavrenev said Antipin was especially displeased with the human mouth and fulminated against women's lips.

"No wonder many women paint their lips as if to say—see I'm human, not a monkey," Antipin said. Lavrenev said Antipin's magnum opus was entitled, "Rebuilding human organism on a horizontal principle, on the harmfulness of walking on the hind legs, and placing rabbits in a vertical position so as to lengthen their furs."

Lavrenev described Antipin as "an ordinary adventurer, crook, and ignoramus, slavishly addicted to idiotic Morganistic (Morgan is one of the leaders of the discredited Mendelian genetics school) ravings, having nothing in common with science."

Idols Washed in from Sea Plague Indian Magistrates

BOMBAY, INDIA.—Four idols were washed ashore on the Bombay beach. They were picked up by Hindu pandits, set under a pipal tree and worshipped.

Three of them were 18 inches in height and the fourth 9 inches. The first was the elephant-headed god, Gananapati, the awarder of all luck; the second the monkey god, Hanuman, who fought under Rama for the recovery of his wife, Sita, from the demon king in Ceylon, Ravana; the third of Nandi, the bull on whom god Shiva rides, and the fourth has not yet been identified.

None could say how they came to be washed ashore, but they are giving headaches to two officials—the curator who wants them for the museum if no one claims them, and the magistrate-collector who must accord permission if the people want to worship them.

Physicians Give Patients As Good Care as They Get

CHICAGO.—Physicians give their patients as good medical care as the doctors give themselves, the Journal of the American medical association asserts.

It said that a survey by Frank G. Dickinson, director of the association's bureau of medical economic research, showed that the average age of American physicians at the time of death was 67.3 years, as compared with 67.5 for the average white male.

Heart disease accounted for 42.2 per cent of the deaths among physicians studied, as against 38.9 per cent of the deaths among white males of comparable ages.

Cancer, second leading cause of death in this country, ranked third among physicians probably because of ability to recognize symptoms early and begin treatment promptly, the Journal said, adding:

"Apparently the members of the medical profession cannot give their fellow members longer life than their patients enjoy."

Miss Betty Marshall Wed to Robert Mooney

Miss Betty Marshall daughter of Mr. and Mrs. T. M. Marshall, of Silverton, and Mr. Robert Mooney, of Plainview, were united in marriage Saturday evening at 8 o'clock, June 11, 1949 at the home of the bride's grandmother, Mrs. J. W. Smith, in Plainview. Rev. Grady Adcock performed the ceremony. The house was decorated with white asters and pink roses.

The bride wore a light blue crepe street dress, with white accessories and carried a bouquet of orchids on a white bible. Miss Zelta Meadors of Plainview, bride's maid, wore a light beige dress, with white accessories. Elmer Smith, of Plainview, the brides uncle, served as best man. Attending from Silverton were Mr. and Mrs. T. M. Marshall and family.

Mrs. Mooney is a graduate of the Silverton High School, and attended Lipperts Business College, Plainview. At the present time she is employed with the Plainview Retail Merchants Association.

The couple will make their home in Plainview.

BIRTH Mr. and Mrs. Richard Loyd, of Lorena, Texas, are the parents of a baby boy, born June 8. Grandparents are Mr. and Mrs. S. P. Brown, Silverton.

BIRTH Mr. and Mrs. R. A. Edwards are the parents of a baby boy, born Sunday, June 12, weight 7 pounds, named Tommie Lynn. Grandparents are Mr. and Mrs. E. Posey.

BIRTH Rev. and Mrs. Orvill Richardson, of Vernon, are the parents of a baby girl, born June 15. Grandparents are Mr. and Mrs. C. C. Garrison, of Silverton.

Mrs. George Bishop, who has been with her parents, Mr. and Mrs. J. N. Cantwell, for several months, on account of serious illness of her father, returned to her home in Amarillo Tuesday. Mr. Cantwell is much improved.

Miss Gertrude May Perkins spent the week end with Mr. and Mrs. Lynn Perkins.

Mrs. R. M. Hill attended the annual home coming at Lipan, Texas June 5. This date being set apart also to receive donations for the cemetery association fund. \$850.00 was the amount received that day.

Wayne McMurtry who has been a patient in the Tulia hospital was brought home Tuesday. He is improving satisfactory.

Mrs. Bruce Womack and Mrs. H. Roy Brown made a business trip to Plainview Tuesday.

HELP YOUR WISHES COME TRUE! It's easy to keep wishing for things, never helping to make them come true. If you were the farmer above you might want more land, newer machinery or maybe a nest egg of security on which to retire. If you were this wife you'd probably have your heart set on home improvements, a modern kitchen or maybe a long vacation to Rio, Paris, Hawaii, the Orient. You can make these dreams come true by planting your dollars now in safe, sure U. S. Savings Bonds. Maturing in ten years at a \$4 for \$3 profit, they'll supply the cash for the schooling of your children and the fulfillment of your dreams. Start saving today at your bank or post office. Plant more opportunity in your future! INVEST IN U. S. SAVINGS BONDS This is an official U. S. Treasury Advertisement—prepared under auspices of Treasury Department and Advertising Council

# CLASSIFIED FOR RESULTS

## Miss Joy Reithmayer In Recital

An event of our school commencement-week which through mis-understanding was not reported on time is worthy of recognition even though a bit late.

Miss Joy Reithmayer was presented in recital at the high school auditorium by Mrs. Jackie Wingo, and gave genuine pleasure to her listeners. She was talented, poised and lovely. Her tone-depth, range, sweetness and expression were demonstrated in her various song-groups of four sacred numbers, three love lyrics and three popular semi-classics.

The audience was held in charmed surprise as the promising little artist sang with the abandon of a soaring lark and brought forth prophetic comments from many, that here is a budding prima donna.

By Mrs. Clyde Wright.

## PERSONALS

Mr. and Mrs. Raymond Hunt and children, of Victorville, California, are visiting this week with Mr. Hunt's parents, Mr. and Mrs. Sam Hunt.

Miss Eula Haley, of Clarendon, is visiting her niece, Mrs. Bob Hill and family.

Mr. and Mrs. C. B. Young and Mrs. Mattie Perry were dinner guests Sunday in the home of Mr. and Mrs. J. W. Brannon.

Mr. and Mrs. Lynn Perkins spent the week end with Mr. and Mrs. John D. Baird.

Bob Reid, of San Angelo, is spending this week at the Warner Reid farm while the Reid family is away.

Mrs. Lee Perkins returned home last Sunday from El Paso, where she visited her son, Sgt. and Mrs. William D. Guice.

## BIRTH

Mr. and Mrs. Johnnie Burson are the parents of baby boy, born Sunday, June 12, in the Lockney Hospital, weight 9 pounds and one ounce. The child has been named Jimmie Deen. Grandparents are Mrs. J. H. Burson and Mr. and Mrs. Cleates Jacobs, Rock Creek.

Mrs. A. A. Dunagan returned recently from Electra where she attended the marriage of her granddaughter, Miss Bryana Jean Jones.

## Their First Soap

BERLIN, GERMANY—Two tiny frauleins work up a lather with the first soap received in Berlin through the CARE soap drive. German children like these have never seen honest-to-goodness soap. Bob Hope, who saw their plight when he was abroad last year, is continuing to urge support of the CARE campaign on his radio show. The drive lasts till August 1, during which Time Lever Brothers will donate one cake of soap for every two Swan wrappers sent to CARE, Boston 1, Massachusetts. CARE delivers the soap to the children overseas.

## Fighting Flies by the Factory-Full

PITTSBURGH, PA.—Dressed to kill in her own conception of work clothes (pedal pushers and sport shirt), Shirley Cullom demonstrates the newest scientific weapon for wholesale attack on insects. Using electrically-compressed air, the power sprayer she wields treats 250,000 cu. ft. against flying insects in less than half an hour. Developed by Gulf Oil research, it adapts the principle originated by the aerosol bomb to large-scale use in food industries. Its mist is non-toxic to humans, imparting no odor and leaving no residue.

## Governor Signs Veterans' Land Bill

Legislation putting into effect the Veterans' Land Bill has been signed by Governor Beauford Jester. Present as the Chief Executive approved the bill, left to right: Rep. Reuben Senterfitt and Sen. John Bell, sponsors of the bill; Bascom Giles, Commissioner of the General Land Office, who originated the program; Bill McCraw, Dallas State Legion Commander; Bert Giesecke, former State Legion commander; Governor Jester; Judge Horace Shelton, former State Commander of the VFW; Ward Moody, State Adjutant of the Legion; and Alvis Vandygriff, Chief Clerk of the General Land Office.

## Hero

**Bests Sergeant York**  
**HONG KONG.**—The Chinese Communist radio has come up with a Sergeant York tale that goes the Tennessee sharpshooter one better.  
 It is said that a lone communist guerrilla, Chiu Yin-shan, armed only with a shoe, had captured 49 Nationalist soldiers while he was walking down a highway in Kiangsi province.  
 Chiu met seven Nationalists, the broadcast said, and having exhausted his supply of hand grenades, he pulled off his shoe, brandished it and shouted, "Hand over your arms or you die." Thereupon, according to the broadcast, the soldiers flung down their arms. Soon, 42 more soldiers appeared and surrendered when Chiu fired two shots from the captured rifles, the radio reported.

## Use of Television In Religious Work Being Recognized

**NEW YORK.**—That television will become increasingly important as a religious, as well as a cultural and entertainment vehicle, seems assured.  
 The possibilities of television have been recognized by religious leaders from the beginning, and church groups more and more are discussing ways of utilizing the new medium, described by one spokesman as "essential to the work of the Christian church today."  
 Television programs of religious interest already have become familiar to video audiences.  
 Latest innovation is a religious-news program, first of its kind, recently launched by station WRGB in Schenectady.  
 Known as "Through the Eyes of Religion," the new program consists of news analyses, talks, photo illustrations, and live shots. The program is now on a 10-minute spot every two weeks, but is expected shortly to be presented on a weekly basis.  
 Until now, the most impressive use of television has been in the presentation of significant church ceremonies.

## Cod Fish Experiment Seen Aid to Far North Explorers

**DETROIT.**—Future Antarctic and Arctic expeditions may benefit from experiments in which cod fish will get heat stroke.  
 The fish are Arctic cod which thrive in the icy waters of the far north. They are going to be dropped, by Dr. John Field of Stanford university, into waters comparable in temperature to those of the Pacific ocean off the California coast.  
 Human swimmers may shiver in these waters on a July day, but to the cod they are hot water. Although he expects the cod to die, Dr. Field has reason to believe they might survive if they could be adapted to the higher water temperatures by slow degrees. He will try this in later experiments.  
 Dr. Field's experiments are being carried on at Point Barrow, Alaska, under a contract with the U. S. office of naval research which is interested in the mechanisms by which animals and fish adapt themselves to extremes of heat and cold. He reported some of them at a meeting here of the federation of American societies for experimental biology.  
 Arctic cod, he found, can live in waters as cold as three degrees below freezing because their metabolism, or rate of bodily chemical reactions, hold up well at low temperatures.

## Cosmic Rays Are Born In Huge Galactic Clouds

**NEW YORK.**—Huge galactic clouds in the interstellar space are the "birthplace" of the mysterious cosmic rays that bombard earth from all directions, according to Dr. Enrico Fermi, Nobel prize physicist.  
 In reporting the new theory of the cosmic rays, Dr. Fermi believes that the rays originate from collisions between protons, atomic particles, with a magnetic field in a huge galactic cloud.  
 Other scientists have expressed belief the rays come from the sun or from far-off stars, but no hypothesis has been proved—hence, the many studies being made today of cosmic rays.  
 Dr. Fermi, inventor of the first uranium chain reaction pile that led to the atomic bomb manufacture, said his new theory was based on an idea originally proposed by H. Alfvén, a Swedish physicist, who called attention to the fact that the galactic clouds in interstellar space carry magnetic fields with them as they move about.  
 Fermi, writing in the Physical Review, said that the fast-moving magnetic fields acting upon protons, or atomic particles in space, would gradually accelerate them to energies, ranging from one billion volts to energies of one million times larger.

 Four Paint Brushes

Longer Life

PITTSBURGH, PA. — It's a well-known fact that amateur painters troy or waste more paint brushes through negligence than they wear through service. This is either due to characteristic American extravagance, or lack of knowledge regarding proper care. Pittsburgh Plate Glass company's brush division has reduced brush care to the few simple steps listed below, and illustrated in the panels above. (1) Dip the necessary Gold Stripe brushes of various sizes to do a good job. Don't use a two-inch brush to cover a large surface, nor a large brush for sash or trim work. (2) Immediately after using, clean your brush with the proper thinner. Don't let the paint harden in the brush. (3) Wash gently with mild soap suds and water and rinse in clear water. Don't ever leave a brush in water. (4) Then comb or brush the bristles straight, wrap carefully in jacket and permit it to dry without disturbing or bending the bristles. Don't stand a brush on the bristle end. These are the fundamentals of brush preservation. More detailed instructions may be picked up at your paint dealer when you purchase your brushes.

**AGRICULTURAL FILLERS**  
 Watch late hatched chicks close for symptoms of coccidiosis. If disease is suspected, immediate treatment is necessary. The newest orange juice to hit its bow on the market is a bottled juice which holds fine flavor and full vitamin C content for at least two weeks after refrigeration. The cost of operating farm machinery is more than one-third

the expense of operating farms in Texas. Eggs and canned corn are expected to be in plentiful supply in Texas during the month. Meringues baked on hot fillings cook more evenly and are less likely to "weep" than those baked on a cold pie, according to recent tests made by the New York State Experiment Station.

 125 Madison, Dept. 36 Chicago 3, Ill.

**BRITAIN WORRIED**  
 'Rock' Apes Grow Fewer

NEW YORK.—With fewer than 20 of the famous Barbary apes still left on the Rock of Gibraltar, Great Britain, ever conscious of the legend that "when the apes go, the British go, too," again is taking steps to "reinforce" the unique garrison at the gateway to the Mediterranean Sea.  
 Gibraltar's apes, the only simian species living wild in all Europe, have roamed the cactus-covered upper reaches of the 1,350-foot Rock for centuries, notes the National Geographic Society. Numbering 100 or more in the 19th century, they have dwindled alarmingly close to the disappearing point several times since. On each occasion a new batch of "recruits" replenished the colony.

**Apes Rounded Up**  
 As a focal nerve center in the war—General Eisenhower directed the invasion of North Africa from "Gib"—and a citadel bristling with military activity, the Rock no longer could risk the danger of roving apes possibly causing confusion and serious damage. Accordingly, they were rounded up and placed in captivity for the duration. Most of those at large today are replacements brought from Africa after the end of hostilities. The powerful tailless creatures, the size of big airdales, are not really apes. They are macaques, native to the forests of Barbary south across the strait in north-west Africa.

Scientists believe they first came to Europe in prehistoric times when the Mediterranean was a lake and the Strait of Gibraltar was dry land. The modern explanation is that pet macaques brought from Barbary frequently escaped or were freed from bondage by humans and found hospitality and sustenance in the labyrinths and vegetation of the Rock.  
 Even a few dozen Barbary apes running wild could make Gibraltar seem infested, so constant were their acts of mischief at times. Many are the stories of their destructive or playful descents, always by daylight, on shops, dwellings and barracks, as well as on civilian and military inhabitants of the community.

**Officially Protected**  
 In a noble experiment, the British gave the Gibraltar apes official protection in 1856. They were added to the garrison strength, given limited food rations and placed under a sergeant, "Keeper of the Apes." On one occasion they rewarded their benefactors by noisy warnings of an attempted surprise attack by a Spanish force. In general, however, they took advantage of their immunity by acts of thievery and damage to property and human dignity. The worst offenders were arrested and sometimes exiled to distant zoos. After 1880, their liberty was curtailed.  
 The leader of one band, caught stealing kits from the garrison, had his head and face shaved closely. His gang would have none of so bare-faced a scoundrel, and greeted him with a shower of sticks and stones. Whereupon he returned to take up humble quarters with the soldiers who had punished him.

**Auto Easy to Purchase in Prague for \$8,000**  
 PRAGUE.—If you want to buy a car for \$8,000, it can be done easily here. Just walk into any outlet for the nationalized automobile industry in Czechoslovakia and you can get a Skoda 1101 tudor sedan for a mere 415,858.80 crowns (\$8,317.16.)  
 If you have a ration permit, it will set you back only half that, 203,505.60 crowns, but you will have to prove very specifically that you have some really valid reason for needing a car.  
 On the free market you needn't prove anything except that you have the money. (Four hundred thousand crowns represents about 80 months of the average worker's pay, or about 10 months of the average top managerial salary in this country today.)  
 The Skoda 1101 is a small car, considerably smaller than the 1933 Chevrolet but a little larger than the German Volkswagen.

**Jerusalem Scrolls Found Oldest in Old Testament**  
 JERUSALEM.—A two-man scientific expedition to the Dead Sea has returned here with what they said was evidence that the Jerusalem scrolls are the oldest known manuscripts of the Old Testament. The world first learned of the existence of the scrolls when Syrian scholars called them to the attention of the American School of Oriental Research in Jerusalem a year ago. Discovery of the ancient leather-bound papyrus in a half-closed cave in August 1947, has been described as "the greatest manuscript discovery of modern times."  
 A first estimate of their age placed them in the first century before Christ. Their monetary value has been conservatively estimated at more than a million dollars. But their worth to the Christian-Jewish world is incalculable.

**HEALTH PROGRESS**  
 Newest Drug Fights Fever

LOUISVILLE, KY.—The army believes chloromycetin will make the country much safer against typhoid in wartime.  
 This was indicated by Col. William Spencer Stone, Washington, chief of army medical research, who came here to discuss communicable-disease control in a lecture sponsored by Alpha Omega Alpha, medical fraternity of the University of Louisville school of medicine. Colonel Stone was graduated at the U. L. medical school in 1929.

Colonel Stone pointed out that enteric diseases—those transmitted by food or water—are being given special attention by army researchers. The diseases have low incidence now, he said, but if safeguards such as water and milk controls were lifted, the number of cases would skyrocket because the population has developed little immunity.  
 In a similar situation, a breakdown of water sanitation caused 5,000 cases of typhoid in Berlin after World War II.

**Drug Fights Typhoid**  
 Chloromycetin would play a big role in case of a similar threat to the health of the people in the U. S. Should water protection fail, the drug could hold the fort against typhoid until proper purification safeguards could be set up again. Chloromycetin is rapidly being developed to the point where it can conquer these diseases in two days: Typhoid, typhus, Rocky Mountain spotted fever, undulant fever, and others.

It is an antibiotic which means it prevents reproduction of germs instead of killing them. It is the purified extract of a fungus found in a soil in Venezuela.  
 Scientists under Colonel Stone's medical research and development board discovered potentialities of using the drug against typhoid and some other diseases.

**Ray Method Used**  
 Experimenting in another direction, his researchers have developed an ultraviolet-ray method of disinfecting blood plasma to prevent jaundice being transmitted by it. Heretofore, Colonel Stone said, about 5 per cent receiving plasma ran the risk of getting jaundice, too. The army collaborated in this study with the University of Pennsylvania.

Colonel Stone said army scientists keep foremost in mind the status of diseases as related to the entire population so they can estimate what would happen in case of an "adverse situation."  
 As contrasted to enteric diseases which are fairly well controlled now, respiratory diseases are as prevalent today as ever. There are better treatments, Colonel Stone said, but the city-rural populations mingle more and cause greater spread of infections. Respiratory diseases also occur at a relatively younger age now, he reported.

**Pacific Coast May Expect Another Large Earthquake**  
 WASHINGTON.—The U. S. Pacific coast is headed for another large earthquake or a series of small ones, Dr. Beno Gutenberg, director of seismology at California Institute of technology, says.  
 "When, where, or why" the earthquake action will occur cannot yet be determined, he said. But, he added, "we know something is going on" because subsurface strains are increasing from Oregon to the Gulf of Lower California off Mexico.  
 He made his statement in presenting a paper on earthquake action prepared by Dr. Hugo Benioff of Cal tech. His prediction was based on Benioff's charting of earth movement on the Pacific coast.  
 Gutenberg said Benioff's charting has shown that the distortion of the subsurface and resulting strain, which was released by the San Francisco earthquake of 1906, is building up again.  
 Recent Pacific Northwest quakes bear no relation to the Pacific coast movement he said. The Pacific coast movement is in a zone known as the San Andreas fault while the Pacific Northwest quakes are believed to be part of an Alaskan fault.

**Seagulls Able to Identify Planes of Friendly Pilots**  
 SYDNEY, AUSTRALIA. — Seagulls at the Rose Bay flying boat base can identify the four-engined Sandringham seaplane used on the Tasman sea flights to New Zealand from others using the base.  
 When a Tasman plane approaches Sydney, the gulls take off with glad cries, to meet it and escort it to base. Other flying boats they ignore. There is almost no visible difference between the Sandringham and the Hythe flying boats which also use the base, but the gulls know every time. The birds are fond of the Tasman planes because maintenance men throw overboard scraps of food when servicing the plane at the base.

**MRS. BETH JOINER HONORED ON BIRTHDAY**

Mrs. Beth Joiner was honored with a surprise birthday dinner Sunday evening at the Joiner home. The honoree was presented with a beautiful set of crystal glasses by the following friends: Mr. and Mrs. Henry Howard, Mr. and Mrs. A. A. Howard, Mr. and Mrs. A. P. Dickerson, Mr. and Mrs. A. H. Chappell, Mr. and Mrs. Doc McGavock and Mr. and Mrs. Ed Thomas.

Claude Crossing Community Club Met June 9

The Claude Crossing Community Club met Thursday morning June 9, in the home of Mrs. Lee D. Bomar for coffee, in their regular monthly meeting, but due to muddy roads only eight were able to attend, those being Mesdames Obra Watson, Gordon Alexander, Chick Northcutt, Kemp Thompson, Albert Mallow, Gabe Garrison, Edd Thomas and the hostess, Mrs. Lee D. Bomar. Sunshine sister gifts were exchanged, and names drawn for the next three months. Mrs. Bomar served lovely hot rolls, butter, jelly and coffee. The next meeting will be July 14, with Mrs. Don Garrison.

Carlyn Wimberly Honored With Tea

Miss Carlyn Wimberly of Canyon, bride-elect of Bill Jo Montgomery of Pampa, was honored with a tea by Mrs. Grady Wimberly Tuesday afternoon, with Mrs. Harold Seefelt as co-hostess. The wedding is scheduled for June 18.

The guest list included Carlyn's former school mates, Mrs. J. W. Brannon, Mrs. Esdell Hutsell, Mrs. Charles Francis, Mrs. Carl Dean Bomar, Mrs. James Davis, Mrs. O. C. Rampley, Miss Wilma Francis, Mrs. Carl Wimberly and Miss June Wimberly, mother and sister of the bride-elect of Canyon also attended.

CARD OF THANKS

We would like to take this means of thanking each and every one of you for your kindness, words of comfort and the beautiful flowers during the illness and death of our husband and father. May God bless each of you.

Mrs. John Montague, Jack Bentley Snowden, Mr. and Mrs. Robert Selby, Mr. and Mrs. Gordon Montague, Mr. and Mrs. Jack Montague, Marvin Montague, Mr. and Mrs. Vinson Smith.

Mrs. W. A. Dickerson is visiting with her children in Canyon and Lubbock this week.

Mrs. B. N. Mason and daughter, Beth, spent several days last week with her daughter and family, Mr. and Mrs. Billy Mack Biffle in Levelland.

Texas Veterans Free To Select Privately Owned Land Tract For Farm or Ranch Home

By BASCOM GILES  
Commissioner of the General Land Office  
(Editor's Note: Second of a series of articles on the Veterans' Land Program.)

The recently enacted legislation implementing the Texas Veterans' Land Board will be the means of making the dream of thousands of Texas Veterans for a farm or ranch home of their very own, come true.

One of the most attractive features of this bill is that section which permits a veteran to personally select a tract of land suitable for agriculture or grazing held under private ownership in any sector of the State. It might be owned by kinsmen or by a corporation—it matters not to the Board.

What will matter to the Board will be that the veteran feels reasonably sure that it will serve his purpose and needs; that it must have at least half of the mineral rights unencumbered and that the land is worth the asking price.

After the veteran has made his selection his next step will be to furnish the Board with a complete abstract and description of the property so that it may be appraised. At the same time he files his application with the Board, he will pay to the Board his initial down payment of NOT less than five per cent of the total purchase price.

In the event the application is rejected the veteran's money will be refunded and he will be free to make another selection.

After the Board has appraised the land and approved the application for the loan for the balance, the applicant will be required to execute an on or before note for forty years at three per cent interest for the balance. After receiving his contract of sale he will be entitled to take possession.

EDITOR'S NOTE: (In the next issue Commissioner Giles will tell of the eligibility requirements for qualification for a farm or ranch home loan and the protection provided the veteran under the legislation.)

Operation of this part of the veteran purchase plan will eliminate the necessity for migration of veterans from one part of the State to another as a majority of the purchasers will select land adjacent to their homes where they are already familiar with production conditions. This factor will serve to lessen chances of failure.

Under the provisions of this section a veteran may purchase a tract of land up to \$10,000.00 but he will be required to tender the difference above the \$7,500.00 state finance maximum.

Another provision of the bill, sponsored by Senator John Bell and Representative Reuben Senterfitt, permits a veteran to purchase a tract of land owned by the State when such tracts are offered through duly advertised sales. The purchase will be made through sealed competitive bids with the award going to the highest bidder.

To make the contract valid the minimum five per cent down payment will accompany the bid. Proper application forms will be furnished by the Board on request. Each veteran will be limited to one purchase. However, he will NOT be limited as to the maximum amount of land he may be able to purchase under the full loan of \$7,500.00.

The term "state owned land" does NOT include Public School Land but will include land acquired by the State from other state or federal government agencies, or from individuals or corporations for the purpose of resale to Texas veterans, since the inception of this legislation.

Under the terms of the bill, veterans with combat connected disabilities will have a 90 day priority in financing, during which time non-disabled veterans applications will be held in abeyance.

PERSONALS

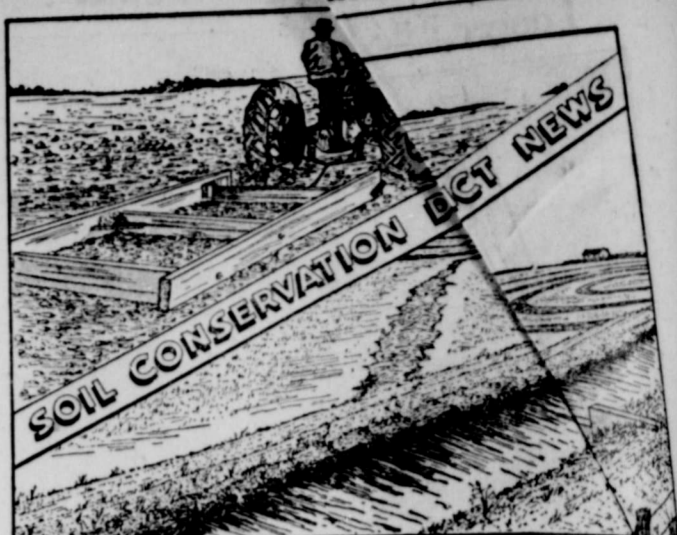

Mr. and Mrs. E. O. Davis, of Sterley, were visitors in Silverton Monday.

Mr. and Mrs. Warren Cope, of Vigo, were business visitors in Silverton Monday.

Mr. and Mrs. Paul Meador and son, Pete, of Clovis, New Mexico, visited over the week end with Mr. and Mrs. Bill Edwards.

Mrs. Bill Edwards and son, Harold, visited Thursday and Friday in Clovis, New Mexico, with Mr. and Mrs. Paul Meador. Mrs. Paul Meador, Mrs. Edwards' niece, Norma Leah Willis, of Riverside, California, accompanied her home to spend the summer.

Mr. and Mrs. Eugene Ridlehuber spent the week end in Lubbock visiting relatives.

Supervisors for Cap Rock District—Earl I. Cantwell, Obra Watson, Bray H. Cook, L. A. McJimsey and R. L. Brunson.

If there were some simple remedy for the ills of the land that could be applied broadside, the damage from erosion from recent rains would never have happened, but one man at the foot of a watershed can not protect his land from erosion, in fact, the mechanical measures he takes may even seem foolish to the untrained eye, but never the less they still do wonders for his land in holding most of the top soil on his farm and saving the organic matter he has built up in his soil.

This last point is why sheet erosion is so much more destructive than gully erosion. As you know, the organic content of the soil is within the top few inches, therefore, wherever flood waters are allowed to run, unchecked, over farming land the humus in the soil is washed away. Humus then has to be replaced before production is restored. Conservation starts at the top of a watershed. It starts before streams and gullies are running at full capacity and even overflowing across good farm land in places. It starts with building storage tanks and diversions in the pasture lands along mountain ranges and escarpments. It is checked in such a way that when it reaches the farm lands it is held under control by grassed waterways and terraces and other conservation measures. Every mechanical or natural conservation measure is a caution light. They are just as important as the caution lights we have placed along our streets and highways where the swift

flow of traffic might be injurious to life and property. Let the traffic move on when it can do more harm to society. Let streams of water move on when it can do harm no longer, but slow it down when it can destroy property and even destroy Sharp curves along a watershed or stream are just as destructive as a sharp curve on a highway. Flood waters are not slowed down by sharp curves.

No one man alone can handle the elements of nature. He must not only have the whole-hearted cooperation of his neighbors but every living person has a part to fill in conserving the soil. Organization against the destructive forces of nature is the answer. This approach has been used successfully in many parts of the country so we know we could do the same here. This district has as much to fight for as any other area in the United States. Let us wake up and organize against erosion before it is too late!

Lewis Johnson, of Perryville, visited their parents, Mr. and Mrs. R. L. Johnson and other relatives recently.

Mr. and Mrs. B. D. Cherry and daughter, Leta, of Borger, visited in the home of Mr. and Mrs. C. Cherry Sunday. Mrs. J. C. Cherry accompanied them home.

Mrs. Kenneth Bain, of Floydada, visited relatives in Silverton Saturday.

Rebuilding Lives and Homes Begins

Top, in Cape Girardeau, Mo., shelter, Red Cross Nurse Marie Brooks cares for Kenneth Probst, one of family of 13 who lost all possessions in May 21 tornado which levelled 21 city blocks. Emergency feeding, shelter, medical care is followed by Red Cross aid in restoring possessions and health to victims of storms where their own resources cannot meet needs. Below, Red Cross building expert checks demolished 6-room home of Robert Gilmer, Amarillo, Texas, veteran, who lost everything in May 15 tornado. Expert will follow through on this and scores of other homes where complete or partial building and repair is financed entirely from Red Cross disaster funds. Three-quarter million dollars has been set aside for such long-range help to storm and flood victims stricken in 6 states in first three weeks of May. Aid is always given outright on basis of what is needed to restore family to normal life; can range from replaced kitchen equipment to entire, new furnished home or medical care for as many years as it takes disaster victims to recover.
