Supervisor To Be Elected At San Jacinto Oct. 4

Owls Hold Matador Class A Team to 7-0 Score

The Silvertown Owls went down to defeat for the second week to Class A Matador 0-7. Two costly fumbles by the Owls within the 20 yard line were the deciding factors. Our inability to snag a pass was another factor.

Donald Rhea again was the big name in the Owl attack with a lot of help from Darrell McWilliams and Donald Paige. Bobbie Baird ripped off a couple of good gains from fullback. Again Francis and Finney Hutsell led the forward wall attack. Hutsell is playing good ball.

Tuesday was set aside for a scrimmage with Tulia. Tulia scored 3 TD's in 40 minutes and so did the Owls. Tulia kicked all 3 goals and Donald Rhea kicked 2. We still have a fighting team that will make itself known in district play.

Tickets On Sale For Junior Football Game Sept 27

The Silvertown Junior Owls will play Tulia Juniors, September 27, on the local field. The purpose of the game is to make money to buy suits for the Silvertown Junior team.

The price of the tickets are: Adults \$1.00 and students 50c. Everyone is cordially urged to buy a ticket and help the Junior team.

Mr. and Mrs. Rex Vaughan, of House, New Mexico, visited over the week end with his parents, Mr. and Mrs. L. V. Vaughan.

The resident land owners of subdivision No. 1 of the Cap Rock Soil Conservation District will assemble at the San Jacinto School on Friday evening, October 4, to elect a member from that subdivision to serve on the Board of District Supervisors.

Subdivision No. 1 is bounded on the north by the Armstrong county line, on the west by the Swisher county line, on the south by the Silvertown-Tulia road and the Silvertown-Antelope road and on the east by the Cap Rock.

Obra Watson has been serving as supervisor from that subdivision since the organization of the district. The term of one member of the five man board expires each year which makes each supervisor elected for a five year term. Other members of the board are: Bray Cook, subdivision No. 2, Earl Cantwell, subdivision No. 3, L. A. McJimsey, subdivision No. 4, and R. L. Brunson, subdivision No. 5.

The meeting at San Jacinto will be at 8:00 p. m. and the election will be held in conventional form. Leo White, Briscoe County Agent, says that these supervisors carry a great deal of responsibility and the person who is elected should feel that his neighbors are behind him. The only way to make him feel that way is to have a large group of voters at the meeting to show the interest in soil and water conservation.

Presbyterian Auxiliary Met Mon.

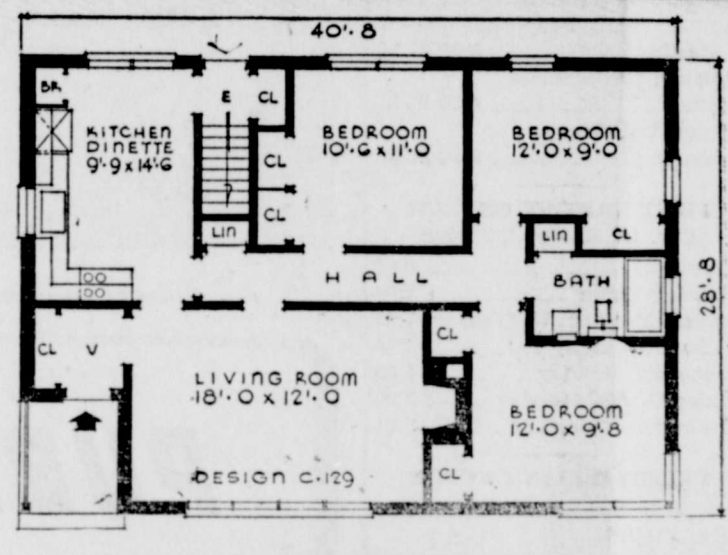

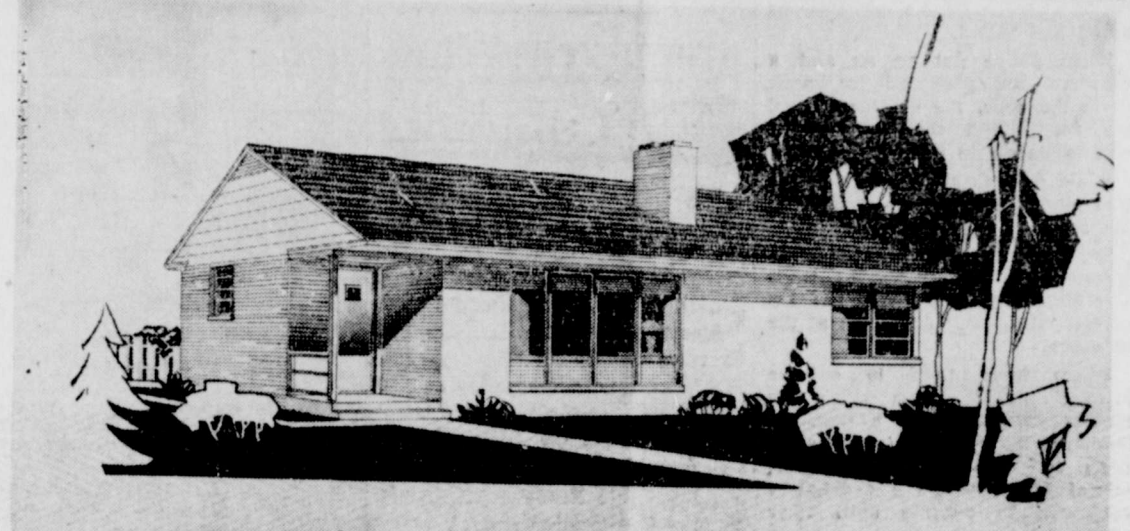

The Presbyterian Auxiliary met in the S. S. Rooms Monday at 3 o'clock, with twelve members present.

The program was the yearly prayer retreat, "All of God's Children."

The next meeting will be October 3, at the home of Mrs. Gordon Alexander at 2:30 p. m.

Those having dinner with the Shorty Hartmuts Sunday were: Mr. and Mrs. Paul Ledbetter, and sons, Mr. and Mrs. Buster Wilson and son, Mr. and Mrs. Bud McMin.

A HOME TO LIVE IN

Design C-129. There are three bedrooms, living room, combination kitchen-dinette on one floor and a full basement. Closets are plentiful with a coat closet for each entrance, broom closet in the kitchen, linen in the bathroom, a closet in the hall and wardrobe closets in the bedrooms. All rooms open into the hall for easy circulation.

The living room is entered through a vestibule and has a fireplace flush with the end wall. There are four windows with ventilators under.

The exterior is brick veneered and the gable ends have wide siding finish. The simple roof has asphalt shingles and extends over the stoop for protection of the front entrance.

The overall dimensions are 40-3 feet by 28-8 feet. The floor area is 1,126 square feet and the cube is 21,957 cubic feet.

For further information about plan features and type of construction address the Home Building Editor of the News, or see your local lumberman.

Willson & Son Lumber Company Are Building Warehouse

Work is underway at the Willson & Son Lumber Company yard this week on a combination show room and warehouse for the lumber company. The building will be about 25x50 feet in size and located just south of their present office.

The new structure will serve as a show room and warehouse, and will give the yard some much needed space for their stock of merchandise.

Simpson Machinery Company Announce Ferguson Tractor

Simpson Machinery Company announce the new Ferguson Tractor and Ferguson System Implements and parts line, as a recently added line for Silvertown and this area.

In this issue of the News appears an advertisement calling attention to the new line and their open house to all who are interested in good machinery.

Simpson Machinery Company will also be official headquarters for genuine Ferguson system implements and parts, and invite everyone to visit them at anytime. John Earl Simpson and his men will be glad to serve you.

Quarterback Club Will Sell Bleachers Seats

Following a meeting of the P. T. A. which is scheduled for Thursday night, September 22, the Quarterback Club will sell bleacher seats to anyone who is interested in buying. The bleachers will have 600 seats and in the center will be 300 that will be offered for sale for a 5 year period at \$10.00. This is being done to get money to buy and put up the ball stadium which will be permanent.

Fred Mercer and daughter, Junis, attended the football game Saturday night and visited with Joy Brown in Canyon.

Mr. and Mrs. Sidney Rodgers and son, of Plainview, visited in the home of Mr. and Mrs. John Vaughan Sunday.

Local Men Become Ill At Matador Friday Night

Cecil Seaney, son of Mr. and Mrs. George Seaney, became ill Friday night while attending the football game between Silvertown and Matador, and was rushed to the Silvertown Hospital Clinic where he has been under treatment, and has been critically ill. His condition is reported by his parents as improved.

Pascal Garrison, son-in-law of Mr. and Mrs. Seaney, and son of Mr. and Mrs. Gabe Garrison, was also taken seriously ill with appendicitis at the ball game at Matador and was rushed back to Silvertown where he underwent an operation. He is reported to be doing nicely.

First Meeting of Boy Scouts Organization Monday, Sept. 19

The first meeting of the newly organized Boy Scout Troop met in regular session Monday, September 19. The first meeting was conducted toward completing tenderfoot requirements.

The troop is presently made up of: Harold Edwards, Joe Vardell, Gene Minter, Doyal Tiffin, Eddie Jasper, Donald Cherry, Dessor Thompson and Loyd Jasper. There is a place for three more boys who want to be scouts.

Harold Edwards was selected temporary patrol leader of patrol No. 1 and Donald Cherry patrol leader of patrol No. 2.

The meeting was under supervision of Blackie Blackshear, scout master, Bill Stodghill, assistant scout master, and Knox Stewart, Institutional representative.

The local Lions Club is troop sponsor.

Attend Funeral of Aunt at Dora, New Mexico

Mr. and Mrs. Henry Price attended the funeral and burial of her aunt, Mrs. Jessie Allen, of Dora, New Mexico Monday.

Mrs. Allen passed away Sunday and funeral services were held at Dora, and burial was made at Cousey, New Mexico.

Mrs. Helen Martin, of Fort Pierce, Florida, is visiting her aunt, Mrs. Jeff Simpson.

Negro Is Given Life For Slaying Crosby Sheriff

"Younger Brothers" At Palace Theatre Sept. 27 and 28

"The Younger Brothers", a Technicolor western, is said to be just a little different from most western pictures.

True, the film has the usual tight-lipped heroes, villain in black sombrero, stock settings, and plenty of hard riding and straight shooting, but the over-all effect is still very satisfying.

The film relates the experiences of the Younger Brothers, a trio of tough, on-the-wrong-side-of-the-law men, who turned bad when their land was taken from them by ruthless land grabbers. However, the Youngers are prepared to go straight and having been paroled if they remain straight for two weeks.

A former detective, who lost his job because of his inability to nab the trio, is determined to get the Youngers into trouble and by conniving to get them involved with a gang of bandits led by a tough, Annie Oakley-type woman.

Naturally, the plan is foiled, the bank was help up but the money was saved by the Youngers, and the boys get their pardon.

All action is fast-moving and punchy and the playing of the principals leaves little to be desired. Wayne Morris, James Brown, Bruce Bennett and Robert Hutton, play the four Younger Brothers.

Rev. J. L. Aldridge Will Preach October 25

Rev. J. L. Aldridge will preach at the Presbyterian Church October 25, at 3:00 p. m.

Everybody is cordially invited to hear him.

Dr. and Mrs. L. M. McClendon and son, Max, of Childress, visited with Mr. and Mrs. T. C. Bomar and Mrs. Emma Frieze Sunday.

A 110th jury Monday afternoon after slightly more than an hour's deliberation, adjudged George Holland, a negro, guilty of murder with malice in the August 2, 1948, slaying at Ralls of Crosby County Sheriff J. J. Pierce, and recommended a punishment of life imprisonment.

The defendant accepted the verdict, which was signed by W. Coffee, Jr., as foreman, and was sentenced by District Judge Alton B. Chapman.

Holland was convicted in a former trial of the case, in the 72nd district court of Lubbock county, and a recommendation of death was made by the jury. The Court of Criminal Appeals reversed the judgment and remanded the case for a new trial.

Venue recently was changed to the court of Judge Alton Chapman upon motion of Judge Dan Blair of the 72nd district.

Defense Offers No Evidence
The court of criminal appeals held that Holland had been deprived of his right to file his bills of exception.

In the trial Monday, just as in that at Lubbock, the defense did not offer any evidence. It had sworn witnesses, but did not call them. No motions were filed, newsmen were informed.

The state was represented by 110th District Attorney John Stapleton, Crosby County Attorney Lloyd Wicks, Jr., 72nd District Attorney Lyd Croslin and assistant District Attorney E. G. Pharr.

The defense was conducted by A. C. Cooke and Bryan B. Dillard, of the Lubbock law firm of Dillard, Cooke and Dillard.

It required approximately one hour to complete the jury. The state completed its evidence before noon. After the noon recess the defense announced it would close without offering evidence.

Mr. and Mrs. C. O. Allard and Mr. W. Allard visited Mrs. W. Allard Sunday afternoon who is a patient in the Tulia hospital. She underwent surgery last week, and is reported to be doing nicely.

Newly Crowned 'Miss America'

ATLANTIC CITY, N. J.—Miss America of 1949, Jacqueline Mercer of Phoenix, Ariz., receives the first of the major prizes awarded following her triumph in the annual "Miss America" pageant here. The 18-year-old chestnut-haired dramatics student accepts the keys to a new Nash Ambassador sedan from E. M. Christie, eastern sales executive of Nash Motors. Nash is a sponsor of the pageant's \$25,000 scholarship fund, \$5,000 of which goes to "Miss America" and the rest to 15 runners-up.

THE THREE MELODY NOTES, above, who will give their rendition of many classical numbers and recall many favorite songs of yesterday, nightly, in one of the greatest Musical Revues ever held in West Texas. The Gertrude and Randolph Avery Musical Revue, which will be presented nightly at the 32nd annual Panhandle South Plains Fair, September 28 through October 1 at Lubbock, is full of Boardway's latest songs, music and humor.

The Century of Progress Study Club

The newly organized Century of Progress Study Club met in the first regular meeting of the 1949-50 season on Wednesday, September 14, in the local Red Cross Club Room.

Mrs. Harold Seefeldt opened the business session by reading of the minutes written from the club's organization early in June.

Mrs. James Davis brought forth a discussion of the constitution of by-laws, which she followed by a report by the yearbook committee.

Twelve members of the charter membership of 16 were present. Following the program, Mrs. Carl Dean Bomar, hostess at this meeting proposed the meeting adjourn.

Our club is grateful for the sponsorship of the 1925 Study Club and to the ladies who have responded to the questions which have arisen in organizing this club for the young women of our city.

September 28, 1949 will be the second meeting date with Mrs. J. W. Brannon, Jr., as hostess.

Mr. and Mrs. W. A. Smithee and daughter, of Clovis, New Mexico, spent the week end with relatives here.

Thresa Crass spent the week end with Joy Brown in Canyon.

The T. C. Bomars are driving a new Chevrolet.

ROCK CREEK CLUB NEWS

The Club members entertained the community with an ice-cream supper in the home of Mrs. W. H. Fitzgerald September 8.

The Club met September 13, with Ruth West, and one quilt was almost completed.

Members present were: Verna Allison, Mrs. W. W. Reid, Eula Shelton, Margaret Frizzell and Florene Fitzgerald. Visitors present were: Mrs. Jimmy Cantwell and Vyrone Cantwell.

The next meeting will be with Mrs. C. L. Wilson on September 27. We will exchange "Sunshine Sisters" gifts on this date.

FRANCIS NEWS

DINNER IN THE J. R. STEEL HOME

Mr. and Mrs. J. H. Stone, of Tonkawa, Oklahoma; Mr. and Mrs. W. A. Springer, of Hereford; Mr. and Mrs. J. Lee Francis, Dale and Garland, were dinner guests in the J. R. Steele home Sunday.

Mr. and Mrs. Edwin Crass, Pat and Bobby, visited in Amarillo Saturday and Sunday. Their daughter, Tresea, spent the week end with Joye Brown at W. T. S. C. at Canyon.

Mr. and Mrs. John Gill visited in Canyon and Amarillo over the week end.

Mr. and Mrs. Jimmy Cantwell visited friends in Lubbock Sunday.

Public Is Irked As Policemen Try Blue Law Support

HATTIESBURG, MISS.—Police tried to enforce Sunday blue laws, but the shows went on and patrons got into the acts.

Shuttling back and forth in a steady rain from their theaters to the police station, 24 managers, projectionists, and ticket sellers and takers were arrested, released on bond and arrested again for a total of 86 times. Three projectionists made the trip eight times.

Three policemen reported that movie patrons peppered them with tomatoes.

At the Saenger theater, a projectionist locked himself in the projection room in an effort to keep the show going. A policeman simply doffed his cap and used it to block the projection outlet. The screen went black. Patrons booed and yelled.

When police got an ax and a crowbar and prepared to break down the door, the theater opened the room, and the projectionist was taken off to jail.

While he was gone, organ music was played and couples danced on the stage.

To prevent their ticket sellers from being arrested, some theaters closed the box offices and accepted "free will" donations at the entrance.

Police have tried to enforce Mississippi's blue laws which ban motion pictures after 6 p.m. on Sundays. Despite the numerous arrests and interruptions, however, all of Hattiesburg's six theaters continued to operate until their regular closing times.

Musical Notes to Test Hearing of US Sailors

CHICAGO.—The navy is experimenting with a musical-note test which it hopes will prove to be a quick, easy method to discover men with extra-acute hearing.

Such men are needed to operate sound-detecting and ranging gear used in anti-submarine warfare.

The present time-consuming method of testing hearing ability in the navy is the measurement of the distance a person can hear a whispered number of phrases.

This test is generally satisfactory but not detailed or selective enough to meet special needs.

The new method is more accurate, standardized, and can test as many as 300 men at one time.

It consists of a pulsating pure sound which gradually decreases in intensity. Single, double, or triple pulsations alternate as the intensity decreases.

Poor Highway Systems Costly to Car-Owners

WASHINGTON.—Poor highway systems over the country are the greatest obstacle to economical and low-cost automobile transportation, an analyst of the Brookings Institution reported.

He contended that unless more and better traffic arteries were provided, the motorist stood to lose all the benefits he might obtain from technological improvements of the automobile.

The study, conducted by Wilfred Owen of the institution's staff, noted that only five to ten cents of the "highway transportation dollar" was being currently spent on highways. This proportion the author regarded as too low. The rest of the dollar is absorbed by the purchase price of the car, gasoline, repairs and other operating items.

This he found to be the case just as an unprecedented 40 million motor vehicles, 20 per cent more than the prewar peak, were in competition for highway space. Furthermore, most of today's roads were declared not adapted to the requirements of heavy volumes of high-speed traffic resulting from population shifts, and a notable trend from urban to suburban areas.

German Electric Seine May Aid Whale Hunters

FRANKFURT, GERMANY.—Two Germans have developed an electrical device which, they say, attracts fish of a predetermined size, stuns them with a slight electric shock and causes them to fall into the net.

Physicist Konrad Kreutzer and Hamburg engineer Herbert Peglow designed the apparatus for fishing sparse deep sea banks, but it has been tried out successfully in fresh water.

At Hamburg they are fitting out a former German mine sweeper, with which they hope to revolutionize the fishing industry.

In front of a normal trawl net they trail a metal plate attached to a generator. By varying the type and the strength of the current fishermen could lure big or small fish, which develop symptoms of anesthesia. They are then scooped up in the trawl.

The invention can also be applied to the whaling industry, it is said. "Shocked" whales could be brought alongside for inspection, then killed or rejected.

Electra Collects \$228 From Parking Meters

Electra, Texas.—Revenue of the new parking meters for the third week was \$228.40. Total to date has been \$713 for a three-week period. Two hundred meters have been installed and an additional 50 have been ordered.

Plowing under cotton stalks before frost is the most dependable method for controlling boll weevils. A heavy roller-type stalk cutter with disk harrow attached does a good job of stalk destruction and makes plowing easier. Stalks may be covered by bedding or by using a one-way plow.

Device Aids Electric Organ to Make Use Of Its Own Echo

CHICAGO.—A device no larger than a golf bag, which makes it possible for the electric organ to create and utilize its own echo, provides a modern substitute for the reverberation provided by the stone walls and high vaulted ceilings of large cathedrals.

Official name of the unique device is the Hammond reverberation control. And its sole function, according to engineers, is production of the echoes which alone assure full organ performance.

Explaining the use of reverberation control, organ experts point out that echo is present in varying degree in all music and in most cases, being that part of sound which reaches the listener's ear by reflection from neighboring surfaces, rather than by straight air line. Because early churches mainly were large and solidly constructed, most people naturally learned to prefer organ music with considerable echo, they add.

Need of the echo-maker became acute when some churches built their acoustics especially for speech—a situation that is not the best for musical reception. It also provides the only way in which real organ music can be secured out-of-doors, since the absence of walls would otherwise mean the absence of reverberation and even the largest organ would sound thin and shrill.

The reverberation unit takes the place of nature's own echo by picking up a part of each tone signal from the organ console and carrying it through a mechanism that delays each sound. The delayed signals are amplified and sent on to join the original unaltered electrical impulses or signals.

What the ear then hears is the original music as played by the organist followed quickly by its echo or reverberation, just as in a building part of the music reaches the listener directly and part of it is reflected from walls and ceiling and reaches the ear later than the original music.

The length of the reverberation time is also controlled by the unit, this being an important factor in producing a natural-sounding echo. Some churches have a reverberation as low as three seconds and other large churches run up to 11 seconds.

Book of Paper Matches Helps Identify Citizen

HAMILTON, OHIO.—A book of paper matches carrying the advertisement of a service station in Covington, Ky., provided the only clue for Hamilton police in solving the identity of an amnesia victim.

Chief John A. Bippus reported a man walked into police headquarters and asked assistance in learning his identity.

"Where am I? What's my name? I've lost my memory," the victim said.

The only clue police found in searching the man was the book of matches bearing the name of the Graham service station, Covington, Ky. Robert Welch, assistant chief, telephoned the station and after describing the victim learned he was John Graham Sr., 54, 1422 Madison ave., Covington, owner of the station.

John Graham Jr., who came to take his father home, told police that the elder Mr. Graham had been ill.

Auckland Hot Springs Prove Value in Actual Instance

AUCKLAND.—Maoris, who placed faith in the curative value of the Keteahi hot springs long before the white man came to New Zealand, recently demonstrated the powers of the waters on the flank of Mount Tongariro.

A party of natives, arriving by auto, carried a 250-pound invalid up to the springs on a stretcher—a rough four-mile trip uphill—and placed him in a bath made in the stream flowing from the hot springs.

Then he was housed in a tent they had erected. After a few days, they reported, the man, who had been crippled by rheumatism, was able to walk to the springs alone and shortly left almost completely cured.

Soviet Humorist Would Make Penalty Fit Crime

MOSCOW.—A humorist in Izvestia, the Soviet government newspaper, suggested today that factory administrators producing poor quality goods be sentenced to wear or use personally their own products.

Author of the article is G. Ryklin. He said the heavy-set director of Riga garment factory should be forced to wear the suits, with narrow, short breeches and pants legs of uneven length sent to Moscow department stores.

He suggested the director of a factory at Sarapul turning out squeaky radio phonographs be condemned to listen to his own machines for six months.

Chlordane Proves Itself Effective Against Ants

Newest and most effective insecticide against cockroaches—"water bugs"—and certain kinds of ants is chlordane, which has proved a more powerful killer of these particular pests than DDT, says Dr. F. Gray Butcher, entomologist of North Dakota Agricultural college extension service.

In the research being conducted by entomologists of the U. S. department of agriculture, chlordane shows promise also against carpet beetles, clothes moths and some other household insects, but further testing is needed before recommendations are made.

Two-percent chlordane sprays, with oil or water base, now are for sale in many department, drug and hardware stores under various trade names. When buying, shoppers should note whether 2 per cent chlordane is among the ingredients listed on the container. Oil-base sprays are transparent and often slightly straw-colored; water-base sprays look milky white. Both evaporate after spraying leaving an invisible odorless film on surfaces to kill pests coming in contact with it. The killing power of the film lasts weeks or even months.

Butcher advises that chlordane should not be used for general spraying of rooms, as DDT may be used. It should be directed only on places where the insects crawl, hide or enter the house. If preferred, it may be applied with a paint brush.

In general, use the same precautions as when spraying with DDT or other insecticides. Remove foods and utensils in the kitchen before spraying cupboards and replace them only after the spray dries. Wash hands after using. Any oil spray may irritate skin, nostrils or throat so care should be taken to have the room well-ventilated and to aim the spray carefully.

Nazi War Crimes Evidence Exhibited at Duke Library

Complete records of the Nazi war crimes trials at Nuernberg have been received by the Duke university library.

Thirty-nine wooden cases, weighing more than two tons, made up the shipment. Duke was one of 12 institutions in America chosen to receive the documents. Two other Southern universities were selected, the Universities of Georgia and Arkansas.

Copies of the evidence presented in the trials amounts to 132,855 pages. This does not include the accounts of the early trials of top-ranking Nazis in 1945-6.

The Duke law library received a complete transcript of these early trials, totaling 17,077 pages, in February, 1947, through former law school dean H. C. Horack.

The documents are available to the public in this country at Duke and the following other places:

The United Nations at Lake Success, N.Y., New York public library, Military Academy at West Point, Harvard law school, University of Washington law school, Stanford and Northwestern universities and the Universities of California, North Dakota, Georgia and Arkansas.

Value of Astronomy

Astronomical observations are necessary for the determination of time and of accurate positions on the surface of the earth. Modern physics is closely allied with astronomy because in the stars we may observe atoms under conditions of temperature and pressure that we can never hope to duplicate on earth. Scientists first learned that atomic energy could be released by studying the sun and stars, where such processes are going on all the time. However, the chief value of astronomy is probably a philosophical one that is no less real even though it is intangible, and that is the concept it has given us of the place of man in the universe of which he is part.

Swine and Salt

Allowing swine to consume excessive amounts of salt without giving them all the water they can drink is worse than feeding no salt at all, according to a veterinary bulletin. Two severe outbreaks of salt poisoning are described in which affected pigs developed convulsions, paralysis and blindness, and some of them died.

One of the outbreaks was blamed on failure to provide enough salt during the fattening period followed by an abrupt change to a feeding schedule that allowed the pigs as much salt as they wanted. Being starved for this mineral, they ate too much of it. In the other outbreak, snow had melted into a salt dispenser and pigs drank the brine.

Aid to Cancer

Recent animal studies indicate that a new radioactive cobalt-nickel alloy material made in the atomic ovens at Oak Ridge, Tenn., may, like radium, become a useful aid for the treatment of cancer. Available both as wire and in the form of needles, this alloy can fit into certain places impossible to reach with radium. A break in a radium gas-filled needle may cause injury to a patient or contaminate the surroundings, but a similar break in the radioactive wire makes no difference.

SUITED FOR FALL

Free Cotton Classing Program Grows In Texas

Texas cotton producers, 111,000 strong, are members of organized groups that are cooperating with the Cotton Branch, Production and Marketing Administration, USDA. This agency handles the free cotton classing and market news services as provided for by the Smith-Doxey Act, says F. E. Lichte, extension cotton gin specialist and chairman of the Smith-Doxey State Review Committee. Other members of the committee are Fred C. Elliott, extension cotton work specialist and E. A. Miller, extension agronomist.

Lichte says this committee in 1949 has processed and approved 1,151 applications from organized groups in 167 Texas counties. He adds that 1,563 gins are cooperating with the 111,000 producers who are growing one of the 16 approved varieties of cotton on 9,686,250 acres of land.

This free classing and market news service program has enjoyed a steady growth since its beginning in 1938, says Lichte. Since 1946, 20 counties with 106 organized cotton producer groups have come into the program. Their membership today is 20,000 greater than in 1946 and 145 more gins are cooperating, says Lichte.

The applications processed by the Texas committee go to the Production and Marketing Administration, Cotton Branch, offices in Dallas and Bakersfield, California. The office in California handles that section of the state west of the Pecos River, says Lichte. Personnel from the PMA offices have cooperated and materially assisted in making possible the steady growth of the program, he adds. The actual classing of the members' cotton is done by the eight regional PMA offices in the state.

The office serving Briscoe County is located at Lubbock. Leo White, County Agent, reports that 98.7 per cent of the cotton ginned in Briscoe County last year was classed by the Lubbock office.

American Legion Will Meet Thursday Night, Sept. 22

American Legion Post No. 402 meets Thursday night, September 22, at 7:30 p. m. at the County Court Room. All members are urged to come.

J. E. MINYARD,
Commander.

Miss Madeline Owens Wed to Oliver Clark of Quitaque

Miss Madeline Owens, daughter of Mr. and Mrs. Mathew Owens, of Quitaque, and Oliver Clark, son of Mr. and Mrs. Pete Clark, of Quitaque, were united in marriage Saturday night at 9 o'clock at the Baptist parsonage, with Rev. G. A. Elrod officiating. Attendants were Mr. and Mrs. Clifton Jones, of Hobbs, New Mexico.

Only the immediate families of the bride and groom attended the ceremony. Mr. and Mrs. Clark will make their home in Silvertown at Mrs. Emma Frieze's home. Mr. Clark is employed at the Tunnell Grocery.

Local People Attend Picnic at McKenzie Park Sunday

Among those from Silvertown who joined a group in Lubbock Sunday and went to McKenzie Park for a picnic were: Mr. and Mrs. J. W. Brannon, Jr., and son, Fred; Mr. and Mrs. J. W. Brannon, Sr., and son; Mr. and Mrs. Richard Hill; Mr. and Mrs. Seymour Brannon and son; Patsy, Linda and Lou Ellen Brannon.

Mr. and Mrs. W. A. Sullivan, Mr. and Mrs. Hugh Sullivan, of Morton, Texas; Mr. and Mrs. Elbert Sullivan and daughters, Mr. and Mrs. Jack Jenkins, son and daughter, Mr. and Mrs. L. G. Hoover and son, all of Levelland, Texas; Mr. and Mrs. W. A. White and daughter, Mr. and Mrs. Jim Templeton and son, of Amherst.

Mrs. W. A. Sullivan is a cousin of J. W. Brannon. They had not seen each other in about 25 years. Everyone had a very enjoyable time.

Mrs. Albert Mallow Entertained Club

Mrs. Albert Mallow entertained the ladies of the Claud Crossing Community Club Saturday morning, September 17, with a nine o'clock breakfast.

Eleven members and four visitors were present. Sunshine sister gifts were exchanged, and names drawn for the next three months.

Mrs. Mallow served lovely cinnamon rolls, nuts, coffee and cocoa.

The next meeting will be with Mrs. Chick Norcutt, Thursday afternoon, October 13.

Frigidaire at Simpson Chevrolet Company. 10tfc

State Mission Week of Prayer to be Observed

State Mission Week of Prayer, September 27, 1949, at the First Baptist Church, Wednesday and Thursday program as follows:
Leader: Mrs. C. O. Allard.
Theme: Glean of the Lone Star State in Evangelism.
Song: Let the Lower Lights by Burning.

Meditation: Mrs. R. C. Hutsell.
Prayer: Mrs. R. E. Stephens.
Song: The Light of the World is Jesus.
Talk: A Star of First Magnitude—Mrs. Sam Brown.

Prayer: Mrs. L. K. Gilkeyson.
Testimonies—What the Mary Hill Davis offerings has meant to rural churches. Mrs. A. D. Arnold.

Prayer—Mrs. M. L. McMinn.
Talk: Radiant Rays in Rural Ways—Mrs. J. E. Wheelock.

Pageant: Star of the Wild Wood. Mesdames Jackson, Dowdy and Clara Bell Stodghill.

Solo—Neath the Old Olive Tree. Mrs. G. R. Dowdy.

Meditation—Mrs. G. A. Eirod.
Prayer for our Leader: Mrs. C. M. Chappell.

A Cluster of Stars:
Star Gazer—The W. M. N., Mrs. Zollie Bomar.
Light Bearer—The Brotherhood,

Lions Club Appoint Committee to Work On Paving Project

In a regular meeting of the Silvertown Lions Club last Thursday night a committee composed of J. E. Minyard, Carl Crow and M. O. Blackshear were appointed to work out a plan to make it possible to build a paved road to the Silvertown Cemetery.

Two or three routes are being considered, and when some definite route, or routes can be decided upon, the committee will likely pass a petition to secure the required signatures for the purpose of calling a road bond election in road district No. 7, to build a paved highway to the Silvertown Cemetery.

Mr. and Mrs. Roy Burgess and daughters, of Quitaque visited Mr. and Mrs. Rayburn Burgess Sunday.

Mrs. Wimberly.
The Lone Star—The Sunday School—Mrs. Lyon.

A Service Star—Baptist Training Union.
Collegiate Star—The Baptist Student—Mrs. May Bomar.

Union—Mrs. A. P. Dickenson.
Solo—Follow the Gleam—Mrs. Burton Hughes.
Prayer—Mrs. Jim Bomar.

It's Your Job!

Nothing is more important to the future security of our Nation than the proper educating of our youth.

And while our teachers and school officials are directly responsible for this important job, it no more their responsibility than it is each of ours.

It is our duty, also, to see to it that the children have the right kind of food to support their bodies while they study and play. **YOU WILL ALWAYS FIND GOOD FOOD AT OUR STORE**

Y & M FOOD MARKET

WHY THE MISSOURI PACIFIC RAILROAD STRIKE?

Over twenty years ago, the Congress of the United States passed the Railway Labor Act. It was hailed by union leaders as a model for the settlement of labor disputes.

efficiently or economically if the leaders of the unions ignore agreements or laws.

Provisions of the Law which are Disregarded

There are five ways under the Railway Labor Act to settle disputes over the meaning of contracts:

- 1—Decision by National Railroad Adjustment Board.
- 2—Decision by System Adjustment Board for the specific railroad.
- 3—Decision by arbitration.
- 4—Decision by neutral referee.
- 5—Decision by courts.

The Missouri Pacific Railroad has been and is entirely willing to have these disputes settled in accordance with the requirements of the Railway Labor Act. Regardless of this fact, the union leaders have shut down that railroad.

Innocent Bystanders Suffer Losses and Hardships

There are about 5,000 engineers, firemen, conductors and trainmen on the Missouri Pacific. They are known as "operating" employees, and are the most highly paid of all employees on the nation's railroads, but their strike action has resulted in the loss of work to 22,500 other employees of the Missouri Pacific. In addition, they have imposed great inconvenience and hardship upon the public and the communities served by that railroad.

The Railway Labor Act was designed to protect the public against just such interruptions of commerce.

If these men will not comply with the provisions of the law for the settlement of such disputes, then all thinking Americans must face the question, "What is the next step?"

President Truman's Board Condemns Strike

There is an established legal method for handling disputes involving existing written contracts—just as there is such a method of settling any contract dispute which you may have in your daily life.

The President of the United States appointed a Fact Finding Board to investigate and adjust the Missouri Pacific dispute. This Board reported, in part, as follows:

"... It is with a deep sense of regret that we are obliged to report the failure of our mission. It seems inconceivable to us that a coercive strike should occur on one of the nation's major transportation systems, with all of the losses and hardships that would follow, in view of the fact that the Railway Labor Act provides an orderly, efficient and complete remedy for the fair and just settlement of the matters in dispute. Grievances are so numerous and of such frequent occurrence on all railroads that the general adoption of the policy pursued by the organizations in this case would soon result in the complete nullification of the Railway Labor Act..."

Obviously the railroads cannot be run

There is no Need for Strikes

THE LEADERS of the Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, Order of Railway Conductors, and the Brotherhood of Railroad Trainmen on the Missouri Pacific Railroad have refused to avail themselves of the peaceful means provided by this Act for settling their disputes. They insist that they be the sole umpire of their own disputes over the meaning of contracts.

With all of the available methods for the interpretation of contracts, there is no need for a strike or even a threat of a strike, but the leaders of these railroad unions have ignored the ordinary procedures established by law and insist upon imposing their own interpretations of their contracts by means of a strike.

The wheels have stopped rolling on the Missouri Pacific. They may stop rolling on other railroads at any time. Recently the Wabash Railroad was forced to discontinue operation for several days under similar circumstances.

What are These Strikes About?

These strikes and strike threats are not about wage rates or hours. They result from disputes over the meaning of existing contracts. They cover claims for a full day's pay for less than a day's work, or for payments for services performed by others who were fully paid for the work done.

How Much DOES A WATER SYSTEM COST?

It's Easy to Figure in Dollars and Cents, BUT...

The important questions to ask yourself are—How many hours of needless drudgery will it save? How much more time will I have for profitable work? How much will it actually increase my farm production?

We can answer these questions. Let us show you how a Dempster Water System pays for itself, then begins paying you. Come in today for details about a dependable Dempster system to fit your needs.

Women's 1925 Study Club Met Wednesday, Sept. 21

The Womens 1925 Study Club met Wednesday afternoon, September 21, in the club room for the first meeting of the year. There were sixteen members present.

Mrs. R. G. Alexander presided during the business session. Mrs. R. M. Hill was hostess and leader for the day.

The following program was presented:

Clubs are just Women—Mrs. R. G. Alexander.

What Constitutes a Good Club Member—Mrs. Roy Coffee.

Achievements of the State Federation—Mrs. Avis Cowart.

Review of the by-laws—Mrs. Fred Lemons.

Club Collect—In Unison.

PERSONALS

Corporal Jack Paige left Friday for Boloxi, Mississippi, after having spent a fifteen day furlough at home.

Gordon and Donald Alexander went to Dallas Wednesday. Donald went for a re-check for a back injury at the hospital.

Mrs. W. Allard was brought home Wednesday from Tulia where she has been a patient in the hospital. Her condition is reported improved.

Mr. and Mrs. John McCain and family, visited Sunday in the Lone Star community with Mr. and Mrs. J. B. Mercer and Mr. and Mrs. Wylie Nance.

Mr. and Mrs. Richard McGowan and little son, of Dumas, moved to Silvertown recently to make their home with his mother, Mrs. Rhoda McGowan who is ill.

Mr. and Mrs. Fred Garrison, of Plainview, made a short visit Tuesday with his parents, Mr. and Mrs. C. C. Garrison.

Mrs. Roy McMurtry made a business trip to Amarillo Tuesday.

Captain and Mrs. Green and children, who have been stationed at Toyko, Japan, for the past two years, visited his sister and family, Mr. and Mrs. Bob Hill last week. Captain Green will be stationed in Washington, D. C.

Mrs. W. T. Haley and Mr. and Mrs. Ernest Davis, of Plainview, visited in the home of Mr. and Mrs. Bob Hill Sunday.

Hoyt Hill, of Childress, visited relatives in Silvertown Sunday.

Mrs. Betty Cumby and Jesse Hill were business visitors in Amarillo Wednesday.

Mr. and Mrs. T. C. Bomar made a business trip to Plainview and Tulia Tuesday.

Mr. and Mrs. J. M. Thompson spent the week end in Denton visiting Mrs. F. M. Autry and Dr. and Mrs. C. L. Oliver. Mrs. Autry returned home with them.

Mr. and Mrs. J. J. Vardell, Mr. and Mrs. R. E. Sweek, Mr. and Mrs. Afton Teague and Ted Vardell visited Mr. and Mrs. M. A. Kendrick in Hollis, Oklahoma Sunday.

D. O. Bomar, of Lubbock, was a business visitor in Silvertown Wednesday.

Mrs. Bruce Womack is a patient in the Briscoe County Clinic Hospital this week.

PERSONALS

BIRTH

Mr. and Mrs. Roy Montague are the parents of a baby boy born Sunday, September 18, at a Plainview hospital. The child has been named Roland Clyde.

Mr. and Mrs. Merle J. Montague and little son, were dinner guests of his parents, Mr. and Mrs. Dan Montague Sunday night. Mr. and Mrs. Ray Teeple were supper guests of her parents, Mr. and Mrs. Dan Montague Friday night.

Joe Ray Stodghill is confined to his bed this week from a knee injury.

Mart Self and Eva Lou, and Mr. and Mrs. J. L. Self and baby, visited Mr. and Mrs. LeRoy McGowan in Plainview Monday.

Mr. and Mrs. H. L. McWaters, Mr. and Mrs. Joe McWaters, Mr. and Mrs. Ashel McDaniel visited Mr. and Mrs. Billy McDaniel at Amherst Sunday.

Visitors in the James Patton home last week were: Mr. and Mrs. Floyd Damron and daughters, Mr. and Mrs. Walter Damron, of Sudan, and Mrs. Maud Kivcannon, of Portales, New Mexico.

Miss Novia Teague, daughter of Mrs. Silas Teague, had an appendectomy at the Silvertown Clinic Monday.

Don Cornett, son of Mr. and Mrs. Onar Corner, entered the Briscoe County Clinic Monday. He is suffering with pneumonia.

Mrs. Oscar Lee Thompson, who has been a house guest in the home of Mr. and Mrs. R. E. Brookshire left for her home in California Tuesday.

A. W. Morton, of San Angelo, spent the week end with his sister and family, Mr. and Mrs. Jesse Hill.

Tech College Will Have Exhibit at Texas State Fair

A fair within a fair. That's the kind of exhibition Texas Technological college will have on display at the Texas State Fair which opens its doors in Dallas October 8th.

Features of the Texas Tech booth include scheduled showings of the color picture of life on the campus, "Futures Unlimited," and an "admatic" screen which will show 120 full-color views of campus activity throughout the day. A demonstration loom from Tech's Textile Engineering department will produce guest towels with "Texas Tech" woven into the cloth.

The booth will be in the fair spotlight on October 12, which has been designated as "Texas Technological College Day" by the fair's agriculture public relations committee.

Enlarged photographs of the Tech campus and laboratory scenes will border the exhibit, which will be open until the fair closes October 23.

Mrs. Jay Custer, of Childress and Mrs. T. W. Devenport, of Wellington, were week end guests in the homes of Mrs. Nnar Cornett and Wade Welch.

Mrs. M. L. Welch and sons, Carol and Ronald, were dinner guests of Mr. and Mrs. Bill Long Sunday.

Mr. and Mrs. Hershel Vaughan and children, of Hollis, Oklahoma, spent the week end with relatives.

Rev. and Mrs. Grady Adcock attended a church meeting in Plainview Friday.

Joe Welch, of Wichita Falls, Texas, visited in the home of Mrs. M. L. Welch Sunday.

Mr. and Mrs. K. L. Jones, of Slaton, spent last week end in the W. N. Weast home.

Mr. and Mrs. C. M. Chappell visited Saturday night in Borger with Mr. and Mrs. Mack Gaston, and Sunday they visited in Amarillo with Mr. and Mrs. Coy Chappell and family.

New Beef Cattle Barns Now in Use at Tech College

Students in the animal husbandry department at Texas Technological college are now using the new beef cattle barns recently completed at a cost of \$70,000.

Located one mile west of the main campus, the three barns are constructed of corrugated steel, with a steel frame and superstructure and concrete floor.

The main barn has 27 pens where cattle will be kept for instructional purposes. Show cattle also will be penned in the main barn, which has cross ventilation and safety walks for the livestock. Concrete drinking troughs with separate drainage and an aluminum safety gate are features of each pen.

In the nursing and fitting barn, facilities will permit students to clip, wash and curl show cattle in specially equipped stalls. There are seven wash stalls for class work and six nursing stalls.

The barn group which covers four acres and is surrounded by seven pens, includes a feed and storage barn.

W. L. Stangel, edan of agriculture, said plans call for the completion of the group with a fourth building which will provide living quarters for four students. Under a rotating plan, two senior and two junior students would gain valuable experience during their final two years of undergraduate work by being responsible for the care of cattle.

New Bulletin Deals With Site for Woolen Textiles

The advantages of West Texas as a site for wool textile manufacturing are stressed in a new bulletin released by the Texas Technological College Research committee.

Titled "Wool Textile Industry Survey for West Texas," the bulletin was prepared for the West Texas-Santa Fe Industrial committee of the West Texas Chamber of Commerce, Abilene. Its main purpose is to point out desirable plant locations in West Texas near the source of raw materials.

"It is not intended as a definite instruction for locating a specific mill in a given locality," the committee points out. Rather, it is aimed at presenting the broad picture to the woolens industry.

In support of its contention, the committee cites the 1947 wool production figures, which show that 25 per cent of the total clip came from West Texas. Of this, 95 per cent was of "the highest quality combing wool," the committee says.

"West Texas is strategically located in that it is not far south of the center of the United States," the report continues. "It is nearer to the farm west, southwest and far west markets than is the northeastern section—its location should enable it to take advantage of the South American markets."

The bulletin also points out the location of the only textile engineering school west of the Mississippi river at Texas Technological college.

Besides location, the bulletin also mentions the favorable labor supply, transportation facilities and taxation program which make the West Texas area attractive to manufacturing concerns.

Mr. and Mrs. D. H. Davis spent the week end in Garden City, Kansas.

Mrs. E. W. Clifton and daughter, of Dimmitt, visited in Silvertown last week with relatives.

Mrs. Fred Lemons and Mrs. Avis Cowart, made a business trip to Amarillo Wednesday.

AGRICULTURAL FILLERS

Poison ivy and wood vine are very similar in appearance. But the leaves furnish an easy means of identification of each. The harmless wood vine has five-fingered leaves whereas, poison ivy has only three-fingered leaves.

Legumes for soil improvement is a good bet for land that will be taken out of wheat, corn or cotton next year. Soil and climate have a lot to do with legume growth, so find out which varieties do best in your county, and plant them now.

Reared crops of almonds, walnuts and filberts are expected this year. Housewives can take this as a tip to assemble their favorite recipes for nut dishes—and keep an eye out for new ways to include nuts in family meals.

World War and Partition Have Expanded Calcutta

Does the Indian Union's steam-
ing, teeming port city of Calcutta,
together with its suburbs on both
sides of the Hooghly River, com-
prise the world's most populous
metropolitan area?

At the last official count, made in
1941, greater Calcutta showed a
total of not quite 2,500,000 inhabi-
tants. Matched with official figures
for other large cities at that time,
India's industrial titan failed to
rank among the 10 largest cities in
the world, notes the National Geo-
graphic society.

A current dispatch, however,
claims that 12 million people are
today quartered in the greater Cal-
cutta region—a larger total than
generally claimed even for London
or New York. The Calcutta esti-
mate stirs a question—What has
been happening at India's great
crossroads of trade between East
and West?

Lying behind the active Burma
front, Calcutta was swollen by a
steady influx of workers during
World War II years. Railway shops,
metal-working plants and jute
mills poured forth war materials.
Military men of many nations were
stationed at and near the city.
Soldiers on leave boomed hotel and
amusement trade.

When independence legislation in
August, 1947, set up the separate
states of India and Pakistan, the
cleavage divided Bengal province.
Hindus and Parsees, unhappy in
East Bengal and other parts of
Moslem Pakistan, began a large-
scale migration.

Because Calcutta in West Bengal
offered prospects of employment,
rations, and accommodations, the
crowded city stood out as the refu-
gees' goal. At its peak last Septem-
ber, the migration ran as high as
15,000 people a week.

Grass Stains on Rayon Must Be Removed at Once

Grass stains on rayon can be-
come troublesome and difficult to
remove. Prompt action is impera-
tive in order to prevent the stain
from "setting" and injuring the
fabric.

Miss Helen Zwolanek, clothing
specialist, University of Illinois
college of agriculture, says to first
check the material to determine
whether it is washable. If it is
washable, sponge the grass stain
with warm, soapy water and
with denatured alcohol and then
rinse it thoroughly. If the material
contains acetate rayon, dilute the
alcohol with two parts of water.

For nonwashable rayons, sponge
the stain with alcohol—diluting it
for acetate rayon. Use a light
brushing movement and work from
the outside of the stain toward the
center. This prevents forming a
ring. If the whole garment is some-
what soiled, you may need to have
it dry-cleaned after the stain is re-
moved. The alcohol will tend to
clean the fabric as it removes the
stain, leaving a clean spot in the
soiled garment.

Soviet's Northern Front

Baltic states are considered by
the Soviets as part of the strategic
region of the Northern Front. Re-
gion "A" comprises Karelia and
Estonia; region "B", Lithuania
and Latvia. Lithuania and East
Prussia are supposed to form the
second line of rocket bases. For-
tification works are supposed to
have been erected along the line
at Liepaja, Mazeikiai, Upper Venta,
along the Dubysa and Nemunas
rivers to Drushininkai and Gar-
dinas. Underground installations
with oil cisterns and ammunition
stores were being completed. For-
tifications are surrounded by
medium-sized, camouflaged air-
ports. Red Army and MVD garri-
sons are usually stationed in the
neighborhood of such installations.
Near Siauliai is a large airport
where at one time thirty-two-motor
fighters and four bombers of a new
type were located.

"Good Egg Program"

"An egg is only as good as the
care it gets from the nest to the
frying pan," says Irving J. Mork,
poultry agent of North Dakota
agricultural college extension ser-
vice. He has outlined the following
points as a "good egg program"
for the guidance of producers who
are interested in marketing high
quality eggs.

1. Produce clean eggs.
2. Gather eggs often, in a wire basket.
3. Cool eggs rapidly and hold them in a cool place.
4. Produce infertile eggs.
5. Case and handle eggs properly. Pack eggs large end up.
6. Market eggs at least twice a week.
7. Sell eggs on a graded basis to dealers properly equipped to handle eggs.

Roof Repair

Asphalt strip shingle roofs are
repaired in two steps. First, re-
move damaged shingle by lifting
tab in second course above dam-
aged shingle and removing nails,
then lifting the tab in first course
above damaged shingle, remove
nails, then both shingles. Second,
replace with a new shingle of same
size and similar color by nailing
new shingle with at least six nails
at each course, then stick the ends
of all loosened tabs with asphalt
cement.

Attend Wedding at Happy Saturday Night

Mr. and Mrs. W. G. Byrd, Mr.
and Mrs. W. L. May, Mr. and Mrs.
J. W. McCracken attended the
wedding Saturday night of their
granddaughter and niece, Esther

Elders Give Hints for Better Methods of Office Housework

CHICAGO.—The national association of building owners and managers has come out with some hints for better office housekeeping. Here are the suggestions:

Get rid of cuspidors. They are unsanitary and make a floor hazard.

Wipe desks, tables and cabinets away from the walls. They may have paint and plaster. Lack of space between furniture and the walls makes it hard on the cleaning.

Use casters on swivel chairs, typewriter stands, and other movable equipment. Defective casters damage floor coverings.

If you want to pin up something, use a cork bulletin board. Keep keys and charts off the walls.

Use desk calendars.

Keep floors and the tops of cabinets free of books, magazines, papers, samples, etc. They collect dust.

There is no reason why our "homes" should not be kept as neat and smart looking as our "offices," says the association.

Newspaper Secret Award Solves Mystery of Murder

CHICAGO.—The Chicago Sun-Times has disclosed that its \$100,000 "secret witness" reward plan succeeded in solving the murder of wealthy 79-year-old recluse.

A reader sent the paper a coded message that solved the year-old slaying and resulted in the arrest and conviction of Calvin Hoffman, 28, the Sun-Times said.

Under the simple code system developed by the Sun-Times, the paper did not know the name of its secret tipster and it probably never will be learned.

Hoffman confessed to Police Sgt. Harry Deas and assistant chief's attorney Abbey Blattberg, that he was one of a gang of six men who beat Herman Engelhard to death in a robbery attempt that netted only \$12, the paper said.

Police also arrested Mrs. Earline Madison as a result of the tip. Hoffman's confession said the robbery attempt was planned in her home. Three other men implicated by Hoffman are believed serving sentences for other crimes. One other man is being hunted.

Engelhard was killed in his flat in a South Side slum. He was a bachelor and police could uncover no clues. Officers said the crime may have gone unsolved unless the paper had set up its reward plan which resulted in the secret tip.

The Sun-Times instituted the system after a Federal Bureau of Investigation report revealed more than 100 Chicago murders last year went unsolved.

Boy Hidden for 14 Years By Mother, Ignores Her

BOSTON.—With a trembling, smallboy, "no," Gerald Sullivan, 14, turned away from the mother who was accused of keeping him a "hidden boy" most of his life.

The mother, Mrs. Anna Sullivan, 43, and son met outside a closed court where she had come to plead with a judge to return her boy.

They have been apart since last March 14 when Gerald started the world on his first day of real freedom.

In ragged dresses and with black curls down to his shoulders, Gerald told police of his escape from a tenement room in which he said his mother kept him locked.

He said he knew nothing of the world outside except what he could see through a slit below a nailed curtain.

His mother—in a weeping interview with newsmen—said she loved the boy and meant him no harm.

Professor Declares Music Now Lacking Originality

PITTSBURGH.—Dr. Curt Sachs of New York university says today's popular music lacks originality.

"All the song writers use the same old clichés over and over again," the 67-year-old music historian said when he came here to speak at Carnegie Tech.

But Dr. Sachs added that the fault doesn't lie completely with the songwriters.

"People prefer what's familiar because it's easier," he said. "Song writers cater to that common human preference."

Housework May Set Off Sudden Asthma Trouble

ATLANTIC CITY.—The endless routine of housework can sometimes be the trigger setting off sudden asthma affliction in the harassed housewife, the American medical association was told.

As Dr. Francis M. Rackemann of Boston explained it, she just becomes worn out and begins wheezing.

Often difficult relatives can be a precipitating factor, too, he said.

WAC RESERVE REGULATIONS ARE EASED

Austin, Texas September 22.—A recent decision of the Army regarding the Women's Army Corps Reserve clarifies the fact that if otherwise qualified, marriage or the existence of dependents will not be a bar to enlistment in the WAC Reserve, Colonel Oscar B. Abbott, Executive of the Texas Military District, announced here today.

Also of interest to the present WAC Reserve Officer is the new regulation which authorizes their assignment to any service branch of the Organized Reserve Corps. WAC Reserve Officers who desire

and who are qualified for a detail in another Reserve branch are to contact their Organized Reserve Corps Instructor to make proper application.

The recent changes in regulations have made many more units available for the assignment of WACs not presently assigned to active units. They can obtain an immediate assignment to a unit in order to assure the accumulation of required points toward Reserve retirement and for retention on the active Reserve list.

Texas continues to lead all other states of the Fourth Army Area in WAC Reserve enlistments and appointments. Former service

PURINA
"HIGH ENERGY" PLUS
LAYING
CHOWS**

Purina Research tests prove that these new High Energy Plus Laying Chows make more eggs on less feed than Purina's 1948 formulas. They are the most efficient, most economical laying rations in all Purina's history! In every bag, you get these four big extras!

EXTRA VITAMINS
Added vitamins and better control of vitamin quality result in better condition of birds through the year!

EXTRA PROTEIN QUALITY
Egg whites and yolks are made from several kinds of proteins. Purina this year gives you a higher-quality blend of proteins.

EXTRA PALATABILITY
There's new appetite appeal in Purina Laying Chows. The taste is better... texture is better... hens like it better!

EXTRA EGGS
All of this adds up to extra eggs on less feed. Purina Research Farm Tests have proved this new saving to poultry raisers.

Here's How New CCC Crop Storage Loan Program Works

One of the Nation's first farmers to purchase new crop storage facilities through the CCC financing program is Irvin McKibben of Maddock, N. D. Steps by which he completed the transaction form a pattern of experiences which will be shared by thousands of wheat and corn growers this Summer and Fall as their own applications are processed. They are shown in the photo-story above.

1—After pricing the building he wanted, McKibben submitted application for the loan to his County Production Marketing Committee. Such loans may be for as much as 85 per cent of the desired structure's cost. Members of the Benson County PMA Committee which approved McKibben's application are three fellow farmers who meet once a week, and who are assisted by a full-time secretary. They are (left to right) K. B. Sandven of York; Margaret Scott, secretary, of Minnewaukan; Albert Thompson, chairman, of Sheyenne, and I. J. Leier, vice chairman, of Esmond.

2—His application approved, McKibben arranged with Agsco Steel Buildings, Inc., Quonset dealer at Grand Forks, to construct one of these multi-purpose farm buildings on his land. Upon its completion some 10 days later, the structure is inspected by PMA Committeeman Leier (at left, with McKibben). Leier certifies that it meets CCC requirements for crop storage.

3—The first truck load of McKibben's wheat crop is dumped into the newly-completed building, which can be used for other small grains and also will be useful to shelter machinery or livestock when cleared of grain. Had McKibben's requirement been for ear corn, he could have obtained a Quonset equipped to dry as well as store that crop.

4—A few days later, a check payable to the building supplier is handed McKibben by V. A. Helberg (right) president of the Farmer's State Bank at Minnewaukan. The check represents proceeds of the bank's loan to McKibben, who is to repay in five years at 4% interest.

WILLSON & SON LUMBER COMPANY
We Appreciate Your Business

so far as our experience leads us to have an opinion.

The evidence available at the present time indicates that there are several advantages as well as some disadvantages in pumping lake water. Of course, one of the main interests in pumping lake water is for irrigation of our crops. We know that in many cases a drink of water at the right time could turn a crop failure into a profitable yield. Some farmers think it possible that the increased yield on 75 to 100 acres will pay for the pumping plant in one year. Other years there may be little or no advantage from lake irrigation due to an abundance or limited supply of rainfall. The lakes are sometimes dry when water for irrigation is needed most. Through observation the farmer is in the best position to know the possibilities of the lake as far as the supply of water is concerned.

Another fact that will serve to make lake pumping more practical is the salvation of fertile soil in the lake beds for crop and grass production. If the lakes in the pastures as well as shallow lakes on the cropland were kept dry, some of the best grass or crops could be grown on this land.

There has been a great deal said about the chemical advantages of the lake water over well water. We have no accurate information on this but there should be a certain amount of fertility in lake water due to soil washing into the lake. A good many of the plant nutrients probably remain in solution.

Several things should be considered before a lake pumping project is set up. A general survey should be made of the proposed land to be irrigated including a soils map and a topographic map. This survey will show the amount of land that can be irrigated and how far the water must be piped. Ordinarily it is not practical to pump water more than 800 feet. Also, the survey will show where the pit should be dug in which to set the suction hose of the pump and the size of the pit needed. If it is determined that irrigation from the lake will be practical, the type and amount of equipment needed will have to be considered. This will be based on the amount of water available, acres of land to be watered, and the economic and financial condition of the farmer. Equipment for pumping 100 gallons per minute a distance of 800 feet will cost about \$3200.

Under the right conditions lake pumping can be profitable, and due to the abundance of lakes on the high plains several of these kinds of conditions exist. However, we would suggest that you have your project analyzed by a competent person before venturing out too far.
