6 Boys Enroll In Silverton 4-H Club Work

Farmers Gin Co. First Bale 1949 Cotton

The first bale of locally produced cotton for 1949 was ginned last Wednesday evening for Whitfill whose farm is south of town about three miles. The bale weighed 472 pounds and was middling 15-16. 780 pounds of seed was caught which is estimated to be worth \$40.00 at the time of ginning.

Members of the Silverton school and the cotton for Mr. Whitfill and the premium for producing the first bale was donated to the Quarterback Club fund to appear in the bleachers seats. The amount amounted to \$215.00.

Local People Attend Night Breakfast at Amarillo Sunday

Those attending the flight breakfast at Tradedwind Airport in Amarillo Sunday morning were: Coffee, Jr., and daughter and her-law, Mr. and Mrs. J. W. Benson, Jr., and Mr. and Mrs. Crass.

Mrs. Betty Linn left Tuesday for her home in San Saba, Texas after having visited the past three weeks with her brother, Mr. and Mrs. J. N. Cantwell.

Mrs. Bud McMinn and Mrs. A. Arnold visited Miss Fayree McMinn in Plainview Monday.

Mr. and Mrs. T. C. Bomar and Mrs. W. T. Davenport are on a business trip to Albuquerque, New Mexico the early part of this week.

Joe H. Smith, Jr., and children, and Van, of Hereford, visited over the week end with his parents, Mr. and Mrs. Joe H. Smith, Sr.

Enrollment in boys 4-H Club work was completed this week at the Silverton school with a total of seventy six boys in the club. County Agent Leo White reported that the group was much larger than any previous year and because of the large number of boys it will be necessary to divide them into smaller groups.

Most of the boys are undecided about their project program; however, more boys are interested in feeding beef calves than any other type of project. Twenty four boys said they wanted to feed calves and eleven boys are going to feed pigs. Others will have various kinds of crops for their demonstration. The boys who live on irrigated farms like to have cotton or grain sorghums while the boys from dry land farms are partial to wheat.

Troop No. 62 Met at Power Plant Building Monday Evening

Boy Scout Troop 62 met in regular meeting at 7:30 p. m. Monday evening at the power plant building. Roll call found the following members present: Doyle Tiffin, Eddie Jasper, Joe Vardell, Harold Edwards, Donald Cherry, Derron Thompson, Loyd Jasper, and Gene Minter. New members accepted to our square of squares were Tommy Strange and Sidney Marshall.

Sidney Marshall and Doyle Tiffin were nominated for troop scribe, with Sid receiving the vote. The Owl patrol under the able guidance of Harold Edwards bested the Wolf patrol led by Joe Vardell, in the knot relay race, however the Wolves are vowing vengeance.

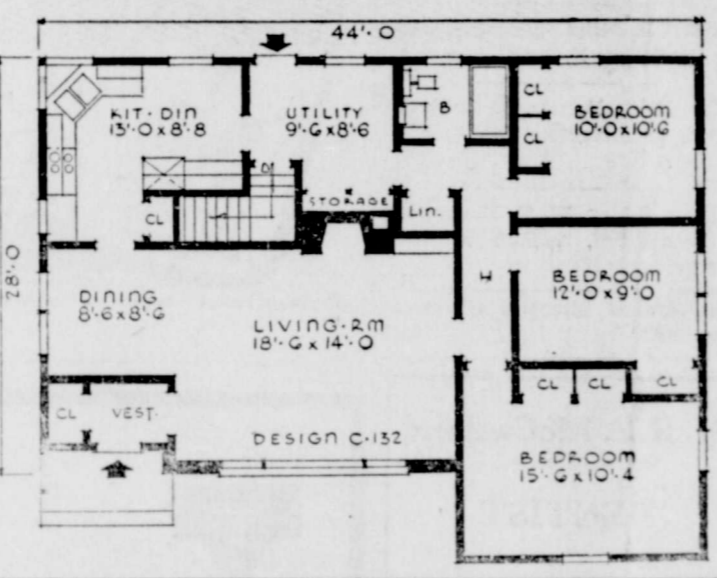

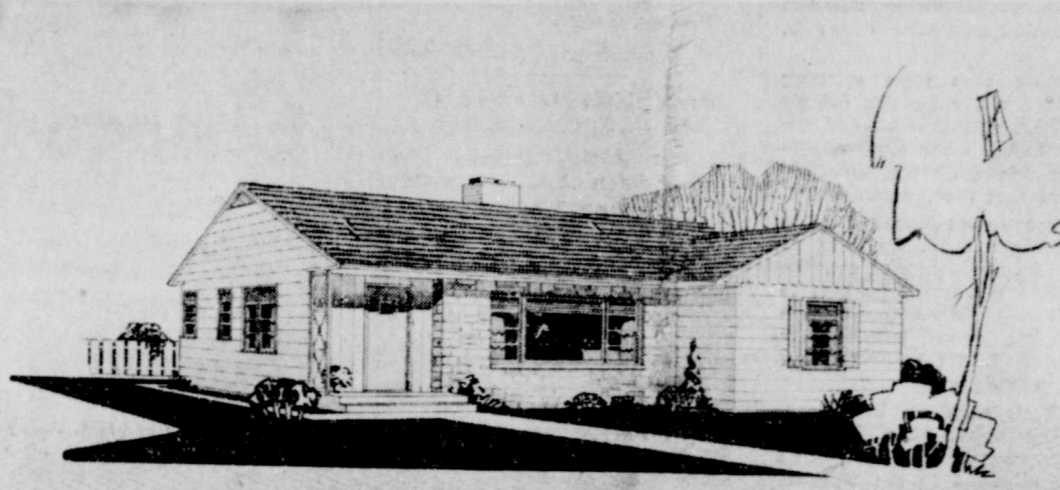

We have a place for one more boy that is really on his toes and anxious to be a scout. Next meeting will be Monday, October 1. Sidney Marshall, Troop Scribe.

TO ALL FOOTBALL FANS!

See the big Southwest Conference games at the Palace Theatre each week. We have contracted for 12 big S. W. C. game pictures. These pictures are filmed each Saturday and we will show them the following week. Watch our theatre front for the dates of these big games.

Mrs. R. M. Haverty, who has been a patient in the Plainview hospital for the past two weeks was brought home Saturday. She is reported much improved.

A HOME TO LIVE IN

Design 152. This attractive house has an interesting floor plan. There are three bedrooms and bath, a large living room with dining alcove and a kitchen with dining space. There is a full basement with the stairs leading down from the utility room. This utility room has a cabinet for coats and storage. If desired, a lavatory could be placed against the bathroom wall.

With minor changes this place is adequate without a basement. The laundry equipment and heating plant would then be placed in an enlarged utility room making use of the fireplace chimney. An alternate sketch showing the arrangement without basement stairs may be had upon request.

The bedrooms have wardrobe closets and there is a large linen closet in the hall, a closet in the kitchen and a coat closet in the entrance vestibule. The living room has a large double glazed picture window and cross light from the dining alcove. There are book shelves beside the fireplace.

The exterior finish is wide siding except that the living room wall is faced with stone. The roof lines are low and simple, extending over the recessed entrance.

The overall dimensions are 44 feet by 34 feet. The floor area is 1319 square feet and the volume is 25,572 cubic feet, including the basement.

For further information about the type of construction and plan features address the Home Building Editor of the News or see your local lumberman.

Water Survey Be- gins In Three Plains Counties

Childress, September 28 — A Bureau of Reclamation water survey of the Prairie Dog Town Fork of the Red River and its tributaries in Childress, Briscoe and Hall Counties, got underway this week. Headed by Harry P. Burleigh, state planning engineer for the bureau, the survey is to determine the availability and need of water in this and two other areas in the state. Burleigh will confer with West Texas Chamber of Commerce officials to determine the work to be done on the rivers.

In a letter to Dr. Roy Barr, director of the Upper Red River Flood Control and Irrigation District, H. E. Robbins, regional director of the Bureau of Reclamation in Amarillo, said water in excess of municipal and industrial demands "could be utilized on about 8000 acres of land adaptable for irrigation."

Dr. Barr says his group will take issue with this statement because they feel irrigation could be used on almost all the land in this area.

Pointing out the perennial water shortage of cities and communities in this general area, and noting the acute Childress water deficiency in particular, Robbins felt a storage reservoir on the Prairie Dog Town Fork and Mulberry Creek, with canals and or pipe lines, would be a possible solution.

Singing Announced For Sunday at Church of Christ

Singing will be held at the Church of Christ Sunday, October 2, at 2:30 o'clock. Everyone is invited to attend and take part in the singing.

Mr. and Mrs. John D. Baird and Mike, visited Mrs. Baird's grandmother, Mrs. W. D. Payne, in the Amherst Hospital Sunday.

Owls To Play Quitaque Club Friday Night

COTTON PICKERS' WAGE SCALE SET AT \$1.50, \$1.75

Lubbock, September 26.—Wages for pulling apparently have leveled off in Tri-State counties where the 1949 cotton harvest has moved into its second and third weeks.

The Texas Employment Commission reports growers in Childress, Hall and Motley counties are paying pullers from \$1.50 to \$1.75 in the field, with an additional 25 cents a hundred for weighing and hauling.

Childress and Hall counties relayed demands for 1,000 more workers each over the week end. Rufus Emmons, Motley county agent, said approximately 150 additional workers are needed at Matador and vicinity.

One of the largest week end demands for labor came from Lamesa, Dawson county, where the average yield is up to one-half bale an acre. Growers said they could use as many as 4,200 workers.

William O. Whiteside, Brother of T. R., of Silverton, Dies

Paris, Texas, September 24th—Stricken with a heart attack at Mount Pleasant while en route to the Paris and Longview High School football game here, William O. Whiteside, 43, Longview oil company executive, died in a Paris hospital Friday night.

Whiteside was vice president of the Byrd-Frost Oil Company, of Longview, and superintendent of the plant there.

He is survived by his wife, and two daughters, Miss Lenore and Miss Billie Jo Whiteside, all of Longview; a brother, T. R. Whiteside, Silverton, and two sisters, Mrs. Elmore Jordan and Mrs. Moore Stewart, Blackwell.

The body was taken to Longview Saturday and burial was to be held there Sunday.

Mr. and Mrs. T. R. Whiteside attended the funeral of his brother.

BAKE SALE SATURDAY

The Senior Class is sponsoring a bake sale Saturday, October 1, at Tunnell's Grocery Store. Starting at 9:00 Saturday morning. "Men if you are hungry and your wife wont cook you anything, come in and take home a cak or pie and make your wives ashamed."

Mrs. Ruth Watley, of Amarillo, visited in Silverton Tuesday.

The Owls will journey to Quitaque Friday night, September 30, to play what we hope will be our first winning game.

Last Friday night Quitaque held the tauted Kress Kangaroos to a 6-14 tally in what was supposed to be a "pushover". The Panthers had fire and determination in their hearts that night and almost won a ball game by it. The score was 7-6 until the last minute of the game and Kress managed to squeeze across another tally.

Quitaque has a fellow by the name of Lewis in their backfield that is a whirling dennis. He runs right into the arms of his opponents and just when they think they've got him, he spins right out and is gone. Our boys will have to go some to pin this fellow down. Another standout is big 6'3" Hawkins at 195 pounds. If Silverton can stop these two boys we may be able to hold the score down a little.

Some folks at Quitaque are confident their boys will win, some are giving 7 points.

Silverton is in good condition except for left half Billie Wilson, he sprained an ankle in a scrimmage against Tulia last week and it is doubtful that he will be ready to go.

Billie Ray Satterfield is rounding into shape. He bursted a blood vessel in his foot on the first night of practice and has been sidelined ever since. Billie could be a big help to the Owls, he can throw that ball.

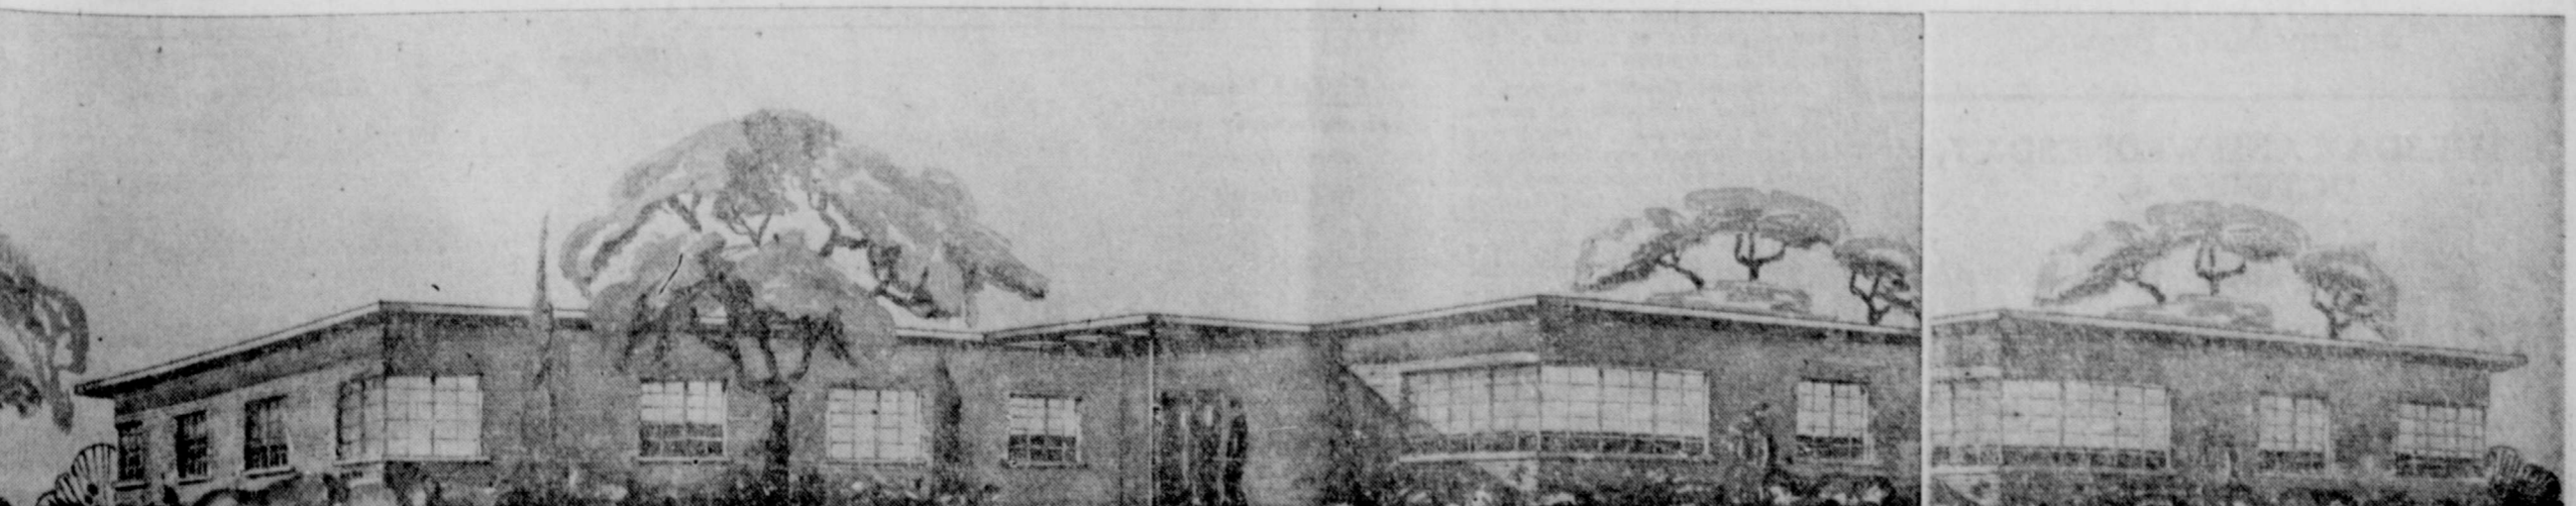

"Stampede" at the Palace Theatre October 2, 3

Rod Cameron, Gale Storm, Johnny Mack Brown and Don Castle make up a competent and exploitable quartette of principals with which to bill this Saturday story of the Old West filmed in sepia tone against majestic scenic background to which the narrative and performance measure up nicely.

This week's theatre program appears on page two of the News.

MRS EVELYN DOVALI INJURED IN CAR ACCIDENT

Mrs. Evelyn Dovali, formerly Evelyn Kolb, is in a hospital suffering a broken neck from being in a car accident recently. Last reports was to the effect that she was doing well. Her husband and father who were with her at the time of the accident was not hurt. Mrs. Dovali, resides at 206 Sampson Street, Lafayette, Louisiana.

A ground breaking ceremony for the new \$42,000 Cerebral Palsy Treatment Center was held Wednesday, September 21 at the site of the regularly scheduled meeting of the Lubbock Rotary Club, co-sponsors of the project. The new building, to be located at 24th Street and Avenue M in

Lubbock, will be one story masonry construction providing facilities for physical therapy, occupational therapy and speech therapy for the cerebral palsied. The treatment center, at present located at 1317 Tenth Street in Lubbock, completed its first year of operation on August 22. Dur-

ing the year 202 cases of cerebral palsy were registered for treatment and 2997 treatments were given. Seven clinics were held with 289 examinations being made in clinic. Clinics were held at approximately two month intervals with two orthopedists specializing in the care of the cerebral

palsied present to examine the patients in each clinic. One fourth of the cases treated during the past year were two years of age or less when registered. The youngest child registered was five months of age. Cases came to the treatment center from 80 towns and sur-

rounding areas in Texas, New Mexico and Colorado, extending southeast 500 miles to Cuero, Texas and north about 325 miles to Holly, Colorado. Cases coming to the center are referred by their local physicians or by orthopedic specialists. During the last year 102 physicians

referred cases for care at the center. Facilities of the treatment center are available to all cases in need of care. The next clinic for the examination of patients will be held Monday, November 14 with Dr. C. B. Sadler, Amarillo and Dr. E. T. Driscoll, Plainview

examining patients. Parents are requested to register children at the center at some time before the clinic date. Further information may be obtained by writing Dr. E. E. Snell, director, or by calling Lubbock 6541.

It Will Pay to be on The Alert for Hog Cholera

Hog cholera continues to take a heavy death toll of swine in Texas and there is no good excuse for this loss, says Dr. W. C. Banks, extension veterinarian of Texas A and M College. The disease could probably be eradicated, he continues, if all Texas swine producers followed a program of strict sanitation and used the highly successful vaccinations recommended for the control of hog cholera.

The most widely used method of vaccination is known as the serum and virus of simultaneous method. The live virus of hog cholera and a hog cholera antiserum are injected at the same time. This method produces immunity in from seven to ten days after being administered to healthy pigs. The immunity in normal pigs is usually strong enough to give lifetime protection and the cost is moderate, says Banks.

The big disadvantage of using the serum and virus method is that live virus is introduced on the premises. Carelessness or misuse can cause an outbreak of hog cholera. Once vaccination is done with serum and virus, it is wise, says Banks, to repeat the vaccination year after year on all pigs raised.

The advantages of the "kill" vaccine method are based on the facts that the virus in the vaccine have been killed and it will not introduce hog cholera on clean premises nor can susceptible pigs become infected from it. In addition, this vaccine can be used on ailing or unthrifty pigs without the risk of adding one disease to another.

One disadvantage with this method is that about three weeks are required for the animal to develop immunity. Pigs do not develop a lifetime immunity from this vaccine. For this reason, swine kept for breeding purposes must be given several injections, says Banks. An injection given about two weeks after weaning will give protection until the pigs are fat and ready for market. Breeding animals should be re-injected after about six months and again once each year.

On the basis of available information, Dr. Banks says he believes that the use of the dead vaccine is better suited to the needs of a majority of the swine producers in Texas. Its use will eventually lower the incidents of hog cholera in the state, he thinks.

Dr. Banks believes that outbreaks caused from faulty vaccination or from the vaccination of parasite infected animals can be prevented if a veterinarian is employed to do the job. He is in a position to examine the pigs and to determine the proper procedures to follow in safely immunizing the herd.

Mrs. Orren Burnside, of Phoenix, Arizona, who has been visiting in the home of her brother and family, Mr. and Mrs. Grady Wimberly and her mother, Mrs. J. T. Wimberly, returned to her home last week.

Mr. and Mrs. Ted Hester and children, of Quitaque, Mr. and Mrs. R. E. Sweek and children, Mrs. Glen Smith and children, were guests in the home of Mr. and Mrs. Donnie Hester Friday evening.

Women Found Able As Men At Car Wheel

MILWAUKEE. — Stifle those laughs about women drivers. The girls are just as handy with the wheel as with the skillet.

That's the opinion of several driving instructors here. One believes that the best pupils are housewives in their early 30s. Why? He doesn't know.

The driving instructors chuckle over some of the incidents that occur during lessons.

"An elderly widow with a Dixie drawl was proceeding down Lake dr. on a busy afternoon when suddenly she wound up in the left lane," related instructor Roger L. Moody.

"Oncoming cars were splitting up around her like the tide around a rock. Her instructor steered the car over to the other side, whereupon she drawled, 'We sure did get out of that nice, didn't we.'"

Another anecdote Moody likes to tell concerns a man. Learning to shift on Lincoln Memorial dr., the man yanked the steering wheel to the right and placed the car in line with the lagoon. Immediately he reached for the brake but stepped on the gas instead.

The wheels were on the grass, with the car poised for a leap into the water when the novice handed over the situation to the teacher. He never returned for another lesson.

Many Questions Asked

Are there many stupid questions? Yes, the instructors say, but "you get so used to dumb questions you cease to consider them dumb." Shifting frequently is difficult for beginners. Irritated, they inquire at stops: "Do I have to shift and start all over again?"

From back seat to front seat driver is quite a jump for some women.

"It's hard for many women to learn to steer," an instructor said. "They're used to being passengers and looking to the side. Now they have to look ahead."

Sex, age and occupation have little influence on whether a pupil will make a good driver.

Some teen agers take to autos like race horses to a track. Others plod along and fail to earn their licenses from the state motor vehicle department even after finishing the customary six lessons and being awarded their diploma from the school.

A former B-24 pilot learned the fundamentals in two hours while a used car dealer quit in despair.

From 16 to 78

Youngsters of 16 take the course. The oldest pupil was 78. He had bought a new car but could find no one with patience enough to teach him to drive. He learned in three weeks. Most of the pupils take 10 days.

"A woman about 40 said she was happier about getting her driver's license than her marriage license," an instructor commented.

Families have registered; so have bridge clubs, prospective drivers for welfare groups, two rabbis and a young policeman.

Milk Among U.S. Top Five in Popular Drink Tests

NEW YORK.—People who think the average U.S. citizen is a hard-drinking man-about-town have another think coming, on the basis of figures that show just what he drinks each year.

Milk, beer, soft drinks, coffee and canned fruit and vegetable juices are the nation's five most popular beverages, according to an American Can Company analysis of government and industry figures.

On a per capita basis, the average inhabitant of this country last year consumed some 180.5 quarts of milk, 71.2 quarts of beer, 48 quarts of soft and carbonated drinks, 38.7 quarts of coffee and 8.3 quarts of canned fruit and vegetable juices, as compared with 4.7 quarts of hard liquors. Cans are used in some form in the packing and distribution of all five of the favorites, the study showed.

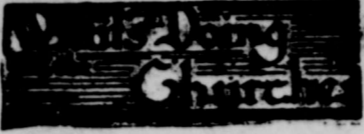

An almost five-fold increase in per capita consumption of canned fruit and vegetable juices during the past 10 years was noted in the analysis. New methods and processes for canning fresh-flavored orange, tomato and grapefruit juices were given credit for a major part of the increases.

No figures were available on consumption of the world's number one drink—plain water.

Yo-yo Staging Comeback In Several Universities

ANN ARBOR, MICH.—A University of Michigan philosophy professor had to stop a class because of a disturbance in the last row. Upon investigation he found the student trying a difficult "loop-the-loop" with a yo-yo, the latest college fad.

Once apparently buried with raccoon coats, goldfish-swallowing, crew haircuts, and midget golf, stores at Ann Arbor report a huge sale of the spinning disks to Michigan students.

A Change is in Order...

Change to OIL-PLATING!

Different!

With Conoco Nth Motor Oil you have OIL-PLATING! An exclusive additive in Conoco Nth fastens an extra shield of lubricant right to the working parts of your car's engine. They're always safe!

Reduces Cost! ... OIL-PLATING protects your engine from wear—shrinks repair bills! No damaging "dry-friction" starts!

Goes Farther! ... Another additive in Conoco Nth fights combustion acids—combats carbon and sludge.

Stays on the Job! ... Conoco Nth is tough because it's made from top-quality paraffin-base crude. It stands up under hard driving and heavy loads.

Oil-Plate today at your Conoco Mileage Merchant's!

Many Fall Prey to Gold Lure Found in Maps

PHOENIX, ARIZ.—Those "archaic maps" of the legendary Lost Dutchman gold mine are in vogue again.

The way the story goes, millions of dollars in gold await the fortunate person solving the mystery of the location of the long lost mine in the rugged Superstition mountains.

The range is located in Maricopa and Pinal counties of Arizona.

Legend says the Lost Dutchman produced untold wealth for a Spanish family named Peralta and later Jacob Walz, popularly known as "Snowbeard," the Dutchman.

The Phoenix Chamber of Commerce, backed by the sheriffs of the two counties, believes the production and sale of these "authentic maps" is a big business for someone.

Happens Every Summer

During recent decades the sale of maps has brought a far greater return than has the mine.

Every summer, chamber officials report, they receive letters reading like this:

"I have come into possession of an old map showing the location of the Lost Dutchman mine. Can you please send me information on how to outfit an expedition?"

Sheriff Lynn Earley of Pinal and Cal Boies of Maricopa urge extreme caution on the part of the would-be fortune hunters. They estimate almost 20 persons have lost their lives in the barren Superstitions.

Both advise prospective map buyers and those who believe they hold the key to the treasure to use extreme care and caution in accepting the validity of maps and in attempting to explore the mountain fastnesses.

They have issued a joint statement of warning:

"No one should attempt to enter the Superstitions between the months of May and November. In most years there is no water available in the mountains and death from thirst is a definite possibility.

"Any accidental injuries in the mountains might be fatal, and the rugged nature of the terrain makes any exploration extremely hazardous even under ideal conditions."

Asked to Register

Well aware, however, that adventurous prospectors will continue to enter the mountains, the sheriffs have asked members of all such parties to register with them before setting out.

"Hire a competent guide and carry provisions and water for the contemplated stay," they advise.

The story of the Lost Dutchman remains a favorite tale around Arizona campfires.

According to the old legend, the Peralta brothers, Spanish prospectors, discovered rich deposits of gold in the Superstition mountains. They worked the claims for several years before raiding Apache Indians forced them out.

Primitive ore grinders found in the mountains are believed those of the Peraltas.

Later Jacob Walz, the Dutchman, was credited with finding rich ore deposits. He died in Phoenix in 1892 without divulging his secret.

Uranium Discovery Prize Spurs Prospector Army

CHICAGO. — With the atomic energy commission offering \$10,000 rewards for each acceptable discovery of uranium deposits, a growing army of amateur prospectors annually is buying more than \$200,000 worth of a new-type Geiger counter designed to aid them in their search for the deposits, it was learned yesterday.

The instrument, called a nuclear "sniffer," weighs 2 pounds, can be carried in a coat pocket and generates 1,200 volts from two flashlight batteries. In the presence of uranium and other radioactive substances the counter emits clicks through a telephone head set.

Four young Chicago scientists developed the counter. John Kuranz, 27 years old, a physicist and vice president of the Nuclear Instrument and Chemical Corporation of Chicago, which the scientists have built into a million-dollar yearly business, said the counter was being distributed through large department stores.

Scientist Says Children Not Taught How to Listen

STATE COLLEGE, PA. — Although children spend most of their time in school listening, few teachers ever have bothered to teach the science of constructive listening, one educator says.

As a result, Dr. Miriam E. Witt said, "many children half listen or daydream through the day's activities."

Dr. Witt, of Pennsylvania state college, advocates classes in listening. She said it is inherent in almost every classroom activity, and as such, should be taught.

"The effectiveness of the teaching of listening," she said, "can be measured in terms of new learnings, better adjustment to environment, personal pleasure, and satisfaction and behavior."

Extinction Confronts 'Red Howler' of Colombia

A tough old conservative is the red howler monkey of northern Columbian jungles.

Families stick to their old homes and old ways until they starve to death, showing almost no ability to adapt themselves to changing times such as characterizes many of their close relatives. This is stressed by Dr. Philip Hershkovitz in a report on the mammals of northern Columbia issued by the U. S. National museum, Smithsonian institution.

Hershkovitz was at first puzzled by what seemed the endless variety shown by these animals. It was as if they were split into many races. But the difficulty is explained, he says, when their strong conservatism is considered.

"The red howler," he says, "is a comparatively sedentary animal, sluggish in movement, conservative in habits. Combined with its great ability to survive environmental fluctuations is its small capacity for adaptation to such changes."

"Under normal environmental conditions this howler, with its enormous vitality and almost complete freedom from predators, will flourish. Its natural habitat is rich with food and water. However, many red howlers taken by a few while large populations confined to small relicts of primary forest. In these habitats clans of howlers have become isolated from the rest of the population. With continued deforestation they will be exterminated. Individuals persist, however, as long as nature provides them with a suitable tree and its fruit."

Chemical World of Future Envisioned by Scientist

A chemically transformed world of tomorrow, in which the United States alone could support a billion citizens living in earthenware houses and eating fats from coal, sugar from trees, and proteins from yeast, has been envisioned by a Harvard chemist who received a gold medal and \$1,000 cash for helping to build a new industry out of sand.

He is Professor Eugene G. Rochow, winner of the biennial Leo Hendrik Baekeland award of the North Jersey section of the American Chemical society.

The world he pictures, which could have a total population as high as 15 billion, would be made possible largely by the use of inexhaustible instead of exhaustible raw materials.

Houses, for example, would be built of excavated earth fused into bricks and slabs on the spot. Meat and eggs would disappear from man's diet, because the animals producing them consume too much food. Cellulose from trees, a highly efficient type of plant, would be converted into edible sugars—and synthetic clothes, as well.

Right now, Professor Rochow believes, metal shortages in this country have reached the point where automobile manufacturers should merely lend cars to purchasers, instead of selling them, to guarantee complete recovery of scrap.

Flocks—Large and Small

Big flocks produce more eggs per hen than small flocks! This recent report by the USDA's bureau of agricultural economics, says D. D. Moyer, extension specialist in poultry at Ohio state university, tells only half the story. What he feels is important is that good laying records follow good management practices, and the more chickens a poultry raiser has, the better job he tries to do with them. Many small flocks are left to themselves, Moyer points out, and a poor laying record results. When the flock gets above 100 in number, the owner tends to make poultry more of a business.

"As a result," he adds, "they keep up-to-date on new methods, buy quality chicks, feed them scientifically and house them properly."

Rotation of Tires

Extra low pressure tires must be regularly rotated and regularly checked for correct air pressure. Like all other pneumatic tires, they should be rotated every 3,000 to 4,000 miles by this formula: spare to right rear, right rear to left front, left front to left rear, left rear to right front, and right front to spare. Thus the wear on all tires is equalized and tire mileage is kept below vehicle mileage. For example, if all five tires are rotated at 3,000-mile intervals, they will show only 12,000 miles of wear after the vehicle has been driven 15,000 miles.

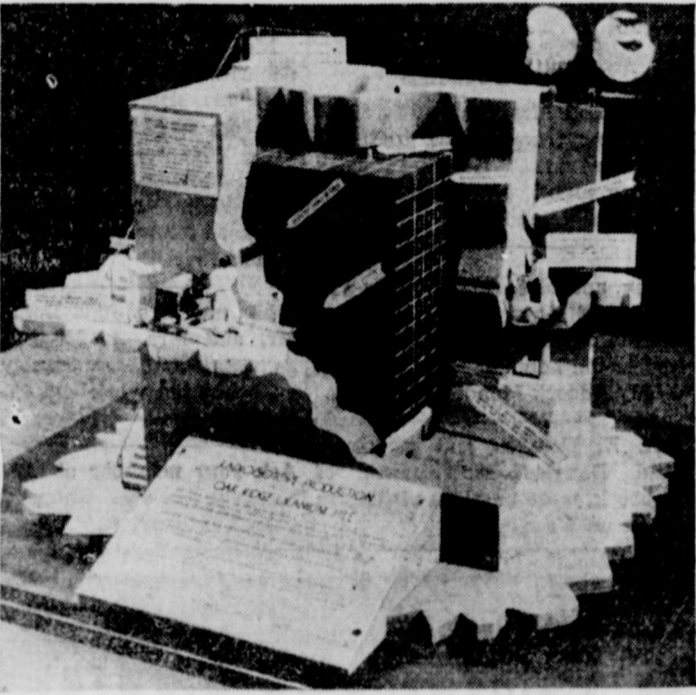

Kitchen Convenience

Sufficient cabinet space to store at each work center the utensils which are first used there is a cardinal rule in kitchen convenience, says Miss Vera M. Ellithorpe, extension home management specialist, Kansas state college. Among the storage convenience features that may be included are: Cutlery drawer, Lazy Susan shelves for utilization of corner cabinet space, step-up shelves for spices, cup racks, towel racks, tray racks, plate racks, metal-lined drawers for flour, sugar, bread, etc., and louvered drawers for vegetables.

SOUTH-BOUND BRAHMA (Yankee View)

Savage stock and reckless riders combine to make the Texas Prison Rodeo the fastest, wildest show in the world. Now in its 18th year, those who have attended say, "There's nothing like it in the whole wide world." It will be held every Sunday during October in Prison Stadium, Huntsville, Texas.

STATE FAIR 'ATOM PILE'—This model of a uranium pile is a small segment of one of the dramatic exhibits in the "Man and the Atom" show coming to the 1949 State Fair of Texas Oct. 8-23 direct from the famed American Museum of Atomic Energy at Oak Ridge, Tenn., cradle of the atom bomb. Admission to exhibit will be free.

DRS HUET AND LEWIS

SPECIFIC CHIROPRACTORS
PHONE 1844

Veigel Building, Plainview, Texas
"CAN WE IGNORE SUCH AMAZING RESULTS?"

Arthritis

CASE NO. 409: Woman, age 50, had condition medically diagnosed as Arthritis and Rheumatism. She was extremely nervous, suffered kidney disturbances, and had unbearable pain in all muscles. She was constantly under the treatment of Arthritis "shots" and sleeping powders which did no good. She came to our Clinic for a Neurocalometer spinal and X-Ray examination. After one adjustment this woman was free from pain. Still under service, she says, "I am 98% improved: Chiropractic has made it possible for me to enjoy my work and family again."

Stomach Ulcers

A middle age lady was under weight and bothered with severe headaches. Medical diagnosis: gall stones, stomach ulcers and chronic appendicitis. A careful analysis was made with Neurocalometer and X-Ray followed by precision adjustments. Now in her own words, "Today I feel like a new woman, thanks to the Neurocalometer and X-Ray system of health building."

Headaches

CASE NO. 12: This woman age 28, came to the clinic complaining of severe headaches which would occur at frequent intervals. Backaches were another complaint, and she was extremely nervous.

X-Rays revealed a subluxation (misalignment of one of the upper neck vertebrae) which was causing a pressure on the spinal cord at the base of the skull. After a series of Chiropractic corrective adjustments this pressure was permanently relieved and the patient reported that her complaints had disappeared.

Agreed

"After practicing medicine for 15 years, and spinal orthopedics for 10 years I am daily astonished at the remedial power of Chiropractic spinal adjustments as a cure of disease." LeForest Potter, M. D. Orthopedist, New York.

NEUROPYROMETER AND X-RAY

Rose-Picker

Pickin's are good, says lovely Jill King of Tyler, who will be one of 16 beauties in the Queen's Court of the Texas Rose Festival to be held in Tyler Sept. 30, Oct. 1 and 2. Recent rains in the Tyler area have assured one of the largest rose crops on record.

Mr. and Mrs. E. R. Hutson and children, of Tulla, spent Sunday in the home of Mr. and Mrs. John McCain.

Walter Bean, Roney Bearden and Theodore Strange who are attending Texas Tech college, at Lubbock, spent the week end with home folks.

Allen Kellum and Grady Wimberly went to Frederick, Oklahoma, Sunday. They were accompanied by Mrs. J. T. Wimberly who will spend the winter with her daughter, Mrs. Lela Kellum.

GOOD FOOD

OUR SCHOOL KIDS TODAY ARE AMERICA'S FUTURE LEADERS...

They may have trouble spelling Mississippi right now and even more trouble telling you where it is, but it's nothing to be alarmed about 'cause they are learning fast. And it's up to us to do all we can to help them.

For that freckle-faced boy and pig-tailed girl will be the leaders in America's future homes and business.

These children should have the utmost in FOOD. At our store you will find all of the nice fresh groceries you will be needing to supply their daily food requirements.

Tunnell Grocery

Polio Hitting More Adults Says Duke Epidemiologist

No longer an "infantile disease," poliomyelitis is now attacking persons over 20 to an increasing degree, according to a Duke hospital physician.

And, "when older persons are infected, there is a greater chance of paralysis and death," says Dr. D. S. Martin, epidemiologist at Duke. "In the epidemic here in 1944," he pointed out, "only a few persons infected were over 20 years of age, but the case fatality rate was much higher in this group."

Meanwhile, "all over the world, almost without exception, this increase in the number of cases of polio in adults suggests that immunity is decreasing," Dr. Martin said.

In the New York City epidemic in 1916, 80 per cent of cases were in children under five, but in 1944, only 25 per cent of cases were in children of this age group.

Most significant aspect of immunity is that in rural areas there is apparently less immunity to the virus than in crowded cities. Explanation may be that people in crowded regions pick up the virus in small doses and develop an immunity.

One study showed, Dr. Martin said, that 71 per cent of the urban population in one area was immune, but only 20 per cent of the rural.

Generally, residents of suburban areas in the better-than-average income groups are hardest hit.

Immunity to polio is highest in tropical areas and in heavily-populated countries where sanitation conditions and living standards are lower. Frequent contact under poor conditions of sanitation permits the population to acquire the disease and develop immunity to it.

Know Your Feed Source, Is Advice to Stockmen

How animals may develop illness due to a mineral deficiency, even though that mineral is abundant in the local soil, is explained by the nutrition committee of the American Veterinary Medical Association.

Many owners find it necessary to "import" hay and grain because they do not produce enough to feed their stock. "Take the example of an eastern stockman who buys hay and grain from the Great Lakes region," the committee said. "Iodine deficiency does not exist in that stockman's area, but it does exist around the Great Lakes. Because his animals are fed almost entirely on this iodine-deficient feed, borderline cases of goiter may develop. And the same goes for cobalt, manganese, and other minerals."

Producers of commercial feeds nearly always guard against this possibility by fortifying their products with essential substances not naturally present, the committee said.

But if stockmen mix their own feeds, they should know the source of the ingredients. Laboratory analysis should be made of feeds from questionable sources, and necessary vitamins and mineral added if the analysis reveals deficiencies, the committee advised.

Even Faster Jet Planes
Boeing XB-47 Stratojet, holder of the all-type transcontinental record at an average speed of 607 miles per hour, is to be equipped with even more powerful jet engines, Boeing Airplane company announces. Installation of the General Electric J-47 turbojets in one of the two experimental XB-47's will service test the new, higher power, engines for use in the production B-47's now being built for the use of the air force at the Boeing Wichita, Kans., division. Use of the new G-E J-47's will raise the total power of the Stratojet more than 25 per cent. Each of the new engines develops more than 5000 lbs. thrust, compared with 4000 lbs. thrust per engine of the earlier J-35 turbojets.

Home Accident Hazards
Your home is not a "haven of safety and happiness" unless it is free from accident hazards. You might ask yourself these questions to check on a few of the most usual points of difficulty: Are your rugs skid-proof? Do you have a screen for your fireplace? Are electric cords and plugs in good repair? Are there handrails for your stairways? Are windows opened for ventilation securely screened? When using a sharp knife, do you always cut away from you? Are poisons and medicines clearly labelled and stored out of reach of children? Do you immediately wipe up water and grease spilled on the kitchen floor? Is some member of your family qualified to give first aid?

Tarnished Silver
Tarnish can be removed from silver with an aluminum pan, containing water in which a spoonful or so of bicarbonate of soda is dissolved. Put the silver in the solution, and heat the pan if you want to speed up the process. A rather complex electrochemical reaction takes place, in which the sulfur is removed from the tarnish (which consists of a chemical combination of silver and sulfur) and the silver is redeposited.

PERSONALS

Mr. and Mrs. Dean Allard and Mrs. Roy McMurtry visited with Mr. and Mrs. Ollie Nall and Mrs. Jessie Honea in Quitaque Sunday afternoon.

Mr. and Mrs. C. C. Garrison and Mr. and Mrs. Fred Garrison spent Sunday in Crosbyton visiting Mr. and Mrs. Keltz Garrison.

Mr. and Mrs. R. L. Bigham, of Lubbock, are spending their vacation with Mrs. Bigham's parents, Mr. and Mrs. H. P. Howard, and while here they are helping drill in the wheat and cut the feed crop.

Mrs. Bud McMinn, Mrs. A. D. Arnold, Mrs. W. L. McMinn and Mrs. Grady Wimberly called on Mrs. J. H. Burson Thursday evening.

Mrs. Royce Vaughan, of Plainview, visited Sunday with her parents, Mr. and Mrs. Ennis Autry.

Ross Wayne Dowdy, of Amarillo, spent the week end with his parents, Mr. and Mrs. G. R. Dowdy.

Mr. and Mrs. N. A. Lyde and daughters, of Lubbock, spent the week end with her parents, Mr. and Mrs. Wylie Bomar, Sr. Mrs. Lyde and children remained for a week's visit.

Mr. and Mrs. Ennie Autry and children, Marjorie and Tommie, visited relatives in Denton recently.

Mr. and Mrs. Dee Garvin and family, visited with Mr. and Mrs. Ralph Garvin recently in Robert Lee, Texas.

Mr. and Mrs. Roy Henderson and Mr. and Mrs. Dock Wallace made a business trip to Amarillo Tuesday afternoon.

Ask your neighbor about Frigid-aire, she has one. Simpson Chevrolet Company. 39-tfc

Mrs. Jim Bomar, Mrs. A. D. Arnold, Mrs. W. L. McMinn and Mrs. Bud McMinn visited Mother Noblett Monday

Mr. and Mrs. Printz Brown visited Sunday afternoon in Dimmitt with Mrs. Brown's parents, Mr. and Mrs. J. W. Anderson and Mrs. Bill Ellis.

Mr. and Mrs. R. D. Wheelock and children, of Canyon, visited Sunday afternoon with his parents, Mr. and Mrs. J. E. Wheelock.

Guests in the home of Mr. and Mrs. Joe Brooks over the week end were: Mr. and Mrs. S. N. Stevenson and Mr. and Mrs. Harlan Maxwell, of Midland, Texas. The group left Sunday for various points in Arkansas, accompanied by Mrs. Joe Brooks and son, Hubert. They expect to return home Saturday.

Mr. and Mrs. E. A. Belling and daughter, Mary Lou, visited relatives in Plainview Sunday afternoon.

Mrs. Maud Anderson, of Cleburne, is visiting her sister, Miss Emma Force and brother, P. B. Force.

Mrs. J. W. Lyon, Sr., of Quitaque, spent the week end with her son, Judge and Mrs. W. Lyon, Jr.

Mrs. Durward Schmidt and little son, Gene, and Miss Blanche Thompson, all of Lamesa, spent the week end in the home of their parents, Mr. and Mrs. J. M. Thompson, also their grandmother, Mrs. F. M. Autry.

Mr. and Mrs. Esdell Hutsell visited her parents, Rev. and Mrs. R. C. Joiner Sunday.

L. E. Paige and son, Donald, left Sunday for Dallas where Mr. Paige will receive medical treatment.

Styling Stars of Tomorrow

THE FOUR MODEL CARS, which were some of the top winners in the 1949 Fisher Body Craftsman's Guild competition, brought \$14,000 in university scholarships to the youthful designers pictured behind their models here. The boys and their scholarships are (left to right) Howard Assel, Canton, O. (\$4,000); William Ogram, Tallahassee, Fla. (\$4,000); Bert Ray, Austin, Texas (\$3,000), and Clair Smith, Jr., York, Pa. (\$3,000). Six other model builders winning scholarships were Elia Russinoff, Detroit (\$4,000); Robert Cihl, Yonkers, N. Y. (\$2,000); Roger Teter, Elkins, W. Va. (\$2,000); Gale Morris, Portland, Ore. (\$2,000); Lew Jacobs, III, Fayette, Mo. (\$1,000), and Robert Meditz, Malverne, N. Y. (\$1,000). Boys may now enroll for the 1950 competition.

DEMONSTRATION Finger Tip Cultivating

Cultivating with a team is good, as you know, but very slow and expensive. And the old hand-lift tractor job is just as tough, slow and tedious by comparison with Ferguson Finger Tip Cultivation. That's why we're offering to demonstrate for you, on your own place—to let you see the difference, the big improvement, by comparison. We bring the equipment to you. No obligation. Phone for a date for your demonstration.

Lions Club Will meet October 6th In Regular Session

Attention Lions! We are hoping for a continuance of the pretty weather, and all will be tired from work, but don't forget our meetings for the next few weeks, as we hope to have something that will help you to get rested at the meetings.

At our next regular meeting at 7:30 October 6, we will have the local entertainment we promised you recently and kinda fell down on it as one of the participants was almost sick.

Those of us who went to the Tulia clubs meeting last Thursday night came home rejoicing not only at the wonderful food furnished by the ladies of the Legion Auxiliary for the Tulia club and their friendly fellowship, but we heard our new district governor, Dr. C. A. Cryer, who is also president of the Phillips College at Borger. He made one of the most uplifting talks anyone ever heard, and he has promised our club he would visit and address us as soon as he can arrange to do so.

Also, we expect some well known speakers and visitors next within the next few weeks, who are inspiring and outstanding lions, including Mr. H. C. Winborn, "the weatherman" for the night of October 20th, Mr. Cal Farley, president of Boys Ranch for the night of November 3, when he will have just returned from the world series, though Cal always has a good message on whatever subject he chooses, and then for the night of November 17 we have the promise of that ace commentator and good lion, Wess Izzard, editor of the Amarillo News Globe, who has just returned from Europe.

Among the other men we hope to have before the end of the year are Dr. Marshall, president of Wayland College, ex-missionary to China and world student and traveler; Col. L. R. Hagey, ex-mayor of Amarillo. Perhaps we also can secure Drs. Golden and Cornett, all of whom are great speakers to men and lions.

Remember lions, we now number near 400,000 in membership, and have several thousand clubs in 28 nations of the world, and that we are stressing world peace and love among the peoples of the earth.

Our membership and attendance are good, but we would like to have more men of our local surroundings as members. We are trying to do some uplifting things in the spirit of lionism. If you would like to join and unite with us, we are sure Lion Secretary Conrad C. Alexander will be glad to take your application.

Program Committee.

CECIL SEANEY IS IMPROVING

Cecil Seaney, who has been confined to the local hospital for a week with a ruptured appendix, was able to be released from the hospital Sunday. Cecil is recovering satisfactorily and is able to be up and around town this week. The News erroneously stated last week that Cecil was taken ill at the Matador ball game, as was Pascal Garrison. Cecil did not attend the game, and was at home at the time he became ill enough to be carried to the hospital.

Pascal Garrison, who underwent an appendicitis operation recently was discharged from the local hospital last Saturday. Pascal is able to be up and around town.

CARD OF THANKS

We wish to express our appreciation for the flowers, cards and other kind things and words of encouragement received while we were ill in the Briscoe County Clinic Hospital.

We also want to express our appreciation to the doctors, nurses and hospital staff for their good care and kindness we received while patients there.

Let us all pull and boost for our home town hospital.

Mr. and Mrs. Pascal Garrison, Mr. and Mrs. Cecil Seaney.

FRIENDSHIP SUNDAY SCHOOL CLASS HOLD BUSINESS MEETING

Twelve members of the Friendship Sunday School Class of the First Baptist Church met in the home of Mrs. Don Garrison Thursday evening in a business and social meeting to organize their class for another year's work.

Mr. and Mrs. Roy Mack Walker were called to San Jon, New Mexico, last week to be with her mother, Mrs. Porter Arnold, who was ill. They returned Wednesday, and reported her mother's condition as much better.

Ask your neighbor about Frigid-aire, she has one. Simpson Chevrolet Company. 39-tfc

INFANT DAUGHTER OF MR. AND MRS. ODOM BURIED SEPTEMBER 22

Sharon Jeane, infant daughter of Mr. and Mrs. J. J. Odom, of Vigo Park was born dead at birth, Wednesday, September 21. Grave-side rites were held at Tulia cemetery Thursday, September 22, conducted by Rev. G. A. Elrod, pastor of the First Baptist Church of Silvertown. Stewart-Douglas Funeral Home had charge of arrangements.

Survivors include the parents, one brother, Johnnie Dwayne, and sister, LaJuana.

Ask your neighbor about Frigid-aire, she has one. Simpson Chevrolet Company. 39-tfc

How to Give Space Effect Without Adding to Cost

With each additional square foot of floor area in a house costing from \$10 to \$15, it pays to get the most comfort and spacious effect out of a small floor area, comments Miss Vera M. Ellithorpe, extension home management specialist, Kansas state college, Manhattan. "Most of us live in small houses so we need to learn how to make the best possible use of floor space," the extension specialist points out. "Storage walls instead of chests of drawers or dressers will make good use of floor-to-ceiling space in storage space. "Another suggestion is to build in storage for bedding, clothes, toys and out-of-season clothing below the mattress and springs. Use furniture that is small in scale, simple in design and medium to light in color to give an effect of space. Large pieces of dark furniture against a light background crowd a room."

How to Plant a Tree—And What Kind to Plant

In most cities the planting of street trees is controlled by local civic authorities in order to maintain an interesting uniformity of species and avoid trouble with up-lifted sidewalks and the wrong planting of fragile, easily broken trees. Now that effective spraying methods have been found for the control of the bark beetle which carries the Dutch Elm disease, American elms may again be planted.

For planting in residential urban areas, the following kinds are recommended by Howard Taylor, president of the American Association of Nurserymen: Red oak, sugar and Norway maple, thornless honey locust, scarlet oak, shingle oak, silver linden, little leaf European linden, sweetgum and corktree. In acid soil regions, pin oak can be used.

Set the tree the same depth it grew in the nursery as revealed by the soil mark on the trunk. Dig a good sized hole. It is better to make a five dollar hole for a two dollar tree than a two dollar hole for a five dollar tree. If the subsoil is clay or hardpan remove it and substitute coarse gravel for better drainage.

Untangle the roots, cut off any bruised or broken ones with sharp shears. Set the tree in the hole and spread out the roots. Do not let them cross, wind around, double under or crowd. Cover the roots with good topsoil and then tramp it firm. Pour in a bucket of water.

Hambletonian's Family Tree

Hambletonian, famous trotter, was the son of Abdallah and a crippled cast-off known as the Charles Kent mare. While the sire was a descendant of Messenger, famous English stallion brought to America in 1801, Hambletonian's dam was so no-account that Jonas Seely, Jr., was glad to unload both the mare and her gangling foal on Rysdyk who had to scrape up the needed \$125 from friends to get his dubious horseflesh. He of the Orange County Dutchman died in 1870, six years before Hambletonian, he was a wealthy man from the variously estimated stud fees (between \$185,000 and \$300,000) earned by the great stallion.

Bakers Always Busy

Practically all bakery products are produced, wrapped, distributed, and sold within a 24-hour period, according to the American Bakers association. Bakers work 'round-the-clock to meet the tremendous demand for a continual flow of fresh baked goods. One large baking company even employs its own weather man to insure fresh products. Knowing that on rainy and windy days thousands of housewives will not go shopping, a good forecaster can predict tomorrow's big city bread requirements down to within a few hundred loaves.

Famous Stallion

Hambletonian, the famous stallion after which the sulky derby is named, was foaled just 100 years ago, five miles from Goshen. He was ugly, he never won a race, but he earned between \$200,000 and \$300,000 in stud fees for his amazed owner, William Rysdyk, who acquired the colt and his crippled mother from breeder Jonas Seely for \$125 — and good ridance, thought Seely.

Meaning of "Light Year"

A light year and an ordinary year differ in this respect: The year is a unit of time and the light year is a unit of distance. The velocity of light is about 186,000 miles per second, so in a year it will travel 5,880,000,000 miles. This distance is one light year.

New Bed Linen Colors via Dye-Bath!

Harmonizing colors are the latest thing in sheets and pillow cases — and you can get those new cheerful tones for your present stock of white linens, as this budget-wise housewife is demonstrating. A few dime packages of all-fabric dye are all you need to tintex your linens any color you wish. The dye comes in 52 colors, including such pastels as pink, tea rose, maize, peach, beige, light blue and Nile green. Use of automatic washer for dyeing sheets and other bulky articles is recommended by Tintex Home Economics Bureau.

CHARIOT RACE

The chariot race is a regular feature of the Texas Prison Rodeo held each Sunday during October. There's laughs and thrills galore as inmate clowns race these savage Brahma bulls in one of the most comical acts of the "Greatest Prison Show On Earth", held at Prison Stadium in Huntsville.

OUR BABY, SHARON JEANE ODOM

The little empty bassinets Prepared by mother's hands With loving care and happiness, For a baby that has gone to a distant land.

Little Sharon Jean, we know You have a better home than ours Your little bed is made by one Who's love is greater than ours.

Just a little mound of earth So tiny to be a grave Oh how can we render so soon to God, The beautiful gift He gave.

Our hearts are near breaking For thy voice we shall not hear Your clinging arms around our necks We shall miss those blessings dear.

You have missed the tears and heart aches Of this world you will not know Would we bring you back For its sorrow and strife, Oh No.

Our Lord is good, His gifts are great He gives and He takes away He knows best for His children, His will we must obey.

Written by her Grandmother MRS. L. H. ODOM Vigo Park, Texas.

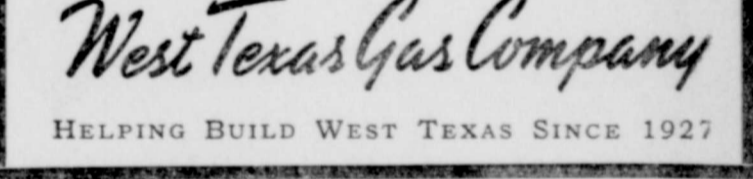

Notice of Change In Billing Procedure

To keep pace with the rapid growth of the area, West Texas Gas Company has installed the newest, modern IBM (International Business Machines) accounting and billing machines.

The installation of this system has made it necessary to change the mailing date of many gas service bills. The mailing date of your bill may be one of those changed. You may receive your gas service bill either earlier or later than usual.

This in no way effects the amount you pay. The due date on the bill is ten days from the date rendered.

We will appreciate your cooperation in making this change possible.

Doctor Treats Healthy Folks In Risky Roles

NEW YORK.—Most doctors treat sick people. But Dr. Vincent Nardiello's patients generally are strong, healthy brutes built like human bulldozers.

They just happen to be in an unhealthy business.

As a house physician at Madison Square Garden, Dr. Nardiello never runs short of variety. His cases range from a cowboy's brain concussion induced by a horse to a small boy's stomachache induced by too much circus candy.

The spectators, you see, are a health problem, too, in an arena which seats 18,000.

The doctor has repaired the fractured wrist of a Democratic judge who fell off the platform during a Republican rally (no foul play was proved). He has treated the black eyes of fight fans who got to fighting, themselves. He has ministered to spectators for heart attacks brought on by thrills, for slight bruises caused by a rodeo calf which suddenly appeared in the box seats, and for some of the world's classiest bites at championship dog shows.

Cowboy Customers

During the circus, Dr. Nardiello averages about 10 kids a day who are brought to his office with complaints of headaches, dizziness or stomach pains all brought on by overeating.

But generally the short, chunky house doctor is kept busiest by the assorted athletes and performers most of whom are in top shape when they enter the Garden.

His most frequent customers are the rodeo cowboys. During their stand at the Garden, he averages 15 to 20 cases of dislocated shoulders, fractures, bruises and rope burns every night. In recent years there were two cowboys who died within four minutes after being kicked by horses.

The most durable athletes Dr. Nardiello knows are hockey players.

"I'll never forget Johnny Mowers, the Detroit goalie," the doctor says. "One night about five years ago he was smashed squarely in the teeth by a flying puck. He took 20 stitches and was back on the ice in 15 minutes."

He Needed 1,500

The biggest single job the doctor ever had at the Garden occurred in 1947, when he inoculated some 1,500 circus employes, including the tattooed lady, for smallpox.

One of the most tragic involved treating a trapeze flyer for shock and hysteria a few years ago. The man had tried to jump from an aerial platform after seeing his wife and partner miss her grip and fall to her death.

The performers closest to the doc's heart are the fighters. He used to be one himself, fighting for a time as a lightweight to work his way through medical school.

Dr. Nardiello is 60 and still very busy. He generally doesn't leave the Garden until after midnight, and the Garden is dark only one or two nights between Labor day and late spring, when the circus ends.

Man Obtains Court Order To Get Bed from Stepson

BOSTON.—It took a court order, but George MacMasters may sleep now in the master bedroom of his Holbrook home.

His 14-year-old stepson, John Rock, must stop "usurping" the big bedroom and from now on must sleep in a smaller room in the attic.

Judge John E. Swift fixed the sleeping arrangements in Suffolk county superior court. At MacMasters' request he issued a temporary injunction restraining the boy.

The 40-year-old linoleum-factory pressman had charged that he was "prevented from enjoying the ease and comfort of my own home." He asked the court to declare his stepson a trespasser in the home.

MacMasters told Judge Swift his stepson's "misbehavior is inspired by his mother," Mrs. Ann Rock MacMasters, from whom MacMasters is seeking a divorce.

Electric Shocks to Test Elephant Fence Strength

PORT ELIZABETH.—Giving a herd of wild elephants electric shocks to save them from extinction has posed the problem of how strong a shock must be given to make an elephant jump.

In erecting an electrified fence to discourage the dwindling herd of elephants of the Addo bush near here from straying over farm lands where the farmers will wage war on them, the keepers mapped a plan to test the shock.

The elephants will be led to the fence by a trail of oranges—about 1,000 oranges being used—with the idea that the beasts will follow the juicy trail and lean against the fragile-looking fence to knock it down. Then they'll get a surprise. When experts find how much current is needed, they will fence the whole area where the elephants roam.

Mrs. Pearl Simpson Honored on Birthday With Luncheon

A large number of Mrs. Pearl Simpson's friends and relatives gathered at her home last Friday and surprised her with a covered dish luncheon, in honor of her birthday. They brought a number of beautiful gifts and many who were unable to attend sent gifts.

Those attending were: Mesdames Stella M. Brookshier, Florence M. Fogerson, Stanley Fogerson, Eula G. Devenport, Carrie Tice Bomar, Mollie L. Stone, Julia E. Bomar, Lydia M. Arnold, Jennie V. Fisher, Alma J. Hill, Dorn A. McMurtry, Rilla J. Dickerson, Nannie J. Bomar, Doshia M. Stodghill, Linnie M. Campbell, Opal Hill, Alma L. Elrod, Ton L. Brooks, Tresa E. Shivers, Ola Mills, Delia A. Riddle, Manemma Hutsell and Nancy J. Brooks.

Miss Norma Jo Teeple, who is a student at W. T. S. T. C., Canyon, spent the week end with her parents, Mr. and Mrs. Raymond Teeple.

Gorilla Beaten Panther Ruled Outclassed

SEATTLE, WASH.—It was generally agreed that Barantu, a 312-pound gorilla, never had a chance in a two-hour death struggle with a startling 185-pound black panther.

Authorities and the owner of the two animals expressed their surprise that despite the weight advantage, Barantu was fighting far better than expected.

According to witnesses, the gorilla passed the entire two hours seeking to ward off the savanna onslaughts of the enraged panther.

More than 400 persons were virtually hypnotized by the death struggle in a cage at a Liberty animal show. When the battle ended, the gorilla lay dead, apparently murdered by show attacks. Before the attendants could remove the gorilla, the panther had his arm off and inflicted numerous painful wounds.

It was probably the first time in history a gorilla had ever met a panther in mortal combat, according to Edward Johnson, Superintendent of the Woodland Park Zoo in Seattle.

The native habitat of the gorilla is Africa and the panther comes from Asia, he said.

Ruby Smith, San Diego, one of the owners of the show, said "Barantu was the loser from the beginning." The panther attacked him with his claws and while about all the gorilla could do was try to avoid him.

In Seattle, Johnson said gorillas are peace-loving animals who do not attack others unless attacked. They are mainly vegetarians, he said.

Local Voters Slated To Ballot in Two Elections Nov. 8

Two proclamations by Governor Allan Shivers authorizing two special elections.

The first election will be held throughout the State on Tuesday, November 8, for the purpose of adopting or rejecting, any or all, of the Constitutional Amendments submitted by the 51st Legislature of Texas at the Regular Session in 1949, and also for the purpose of electing 21 members to the State Board of Education, as provided by acts of the 51st Legislature.

The other election will also be held on Tuesday, November 8, but will be for the purpose of

electing a Representative to the State Legislature to succeed I. B. (Dock) Holt, who resigned on June 30, to accept the postmaster'ship at Olton.

Mr. and Mrs. John McCain had as their guests Saturday night, the following: Mr. and Mrs. E. L. McCain and family, of Fort Collins, Colorado; Beuford McCain, Lubbock; Mrs. Fred Fortenberry and Elmo, of South Plains; and Cecil and Clifton McCain of Silverton.

Mrs. J. T. Gilkeyson and son, "Punkin", are in Strater, Illinois, with her father who is critically ill.

25 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

for your ENGINE'S SAKE!

RENEW THE OIL FILTER ELEMENT REGULARLY... AS SPECIFIED

Keep the filtering system on your tractor in top-notch working condition by changing the filter element regularly. No dirt, sludge or abrasive material can reach vital engine parts if you do this. The new International Harvester "umbrella" type element affords full protection for 120 hours of tractor use (100 hours for Diesel engines). Constructed on the same principle as the "micronic" filter elements used by the Armed Forces it filters out every bit of abrasive material, even the tiniest particles. It requires no bothersome cleaning—you simply discard the dirty, used element and replace it with a clean, new one. Inexpensive... easily changed... keeps engine oil clean twice as long.

Let us supply your needs now.

Teacher Warns Against Educating Selfish Ones

RICHMOND, KY.—The president of the College of the Bible said here to increase the intellectual powers of a selfish person is to endanger freedom and menace peace.

Delivering the baccalaureate address at Eastern State College, Dr. Riley B. Montgomery said:

"An education that increases knowledge and develops the intellect but fails to strengthen the character may... lead to disappointment and ultimate failure.

"Life can be continuously thrilling when we constantly search for knowledge and truth, but when we make it a continuous experiment in social responsibility and a continuous adventure in religious living."

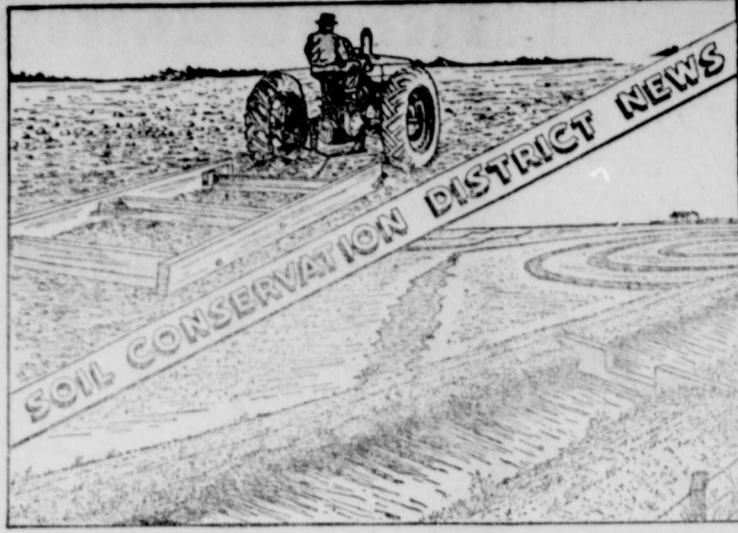

LIBRARY NOTES !

"The Book of Stillmeadow" by Gladys Taber. "The Universe and Dr. Einstein" by Barnett. "Young Mrs. Savage" by Stevenson. The Library is open for the

public each Tuesday and Saturday afternoon from 12:45 until 5 o'clock. All current magazines are in the Library for your reading pleasure.

If your card has expired please come in and renew. If you have never had a card. Come in and purchase one. \$1.00 per year. Your Library needs your support.

Mr. and Mrs. Leroy Saul, and children, of Kress, and Mr. and Mrs. Gabe Garrison and Max Garrison, called in the Don Garrison home Sunday afternoon.

Supervisors for Cap Rock District—Earl I. Cantwell, Chairman; Obra Watson, Bray H. Cook, L. A. McJimsey and R. L. Brunson

Erosion needs to be controlled on grassland as well as on cultivated land. Excess water and wind can have a very destructive effect on overgrazed or mismanaged native pasture.

To properly manage a range we must know the grasses that are most palatable, produce the most forage and grains, and protect the land. Grasses are indicators of the condition of the range and whether it has been used properly. Nature has provided that the grasses present on different sites before they are disturbed, produce the highest yield in forage and pounds of beef. When over used the better grasses are taken out, and annual weeds and poor quality grasses fill the bare spots. This reduces the pounds of beef that can be produced on a given area. A rule of thumb often used in correct grazing is to take half the grass and leave half. This system provides ample protection for the land and produces enough mulch so that the young seedlings can survive.

Several practices aid in correct grazing. Under certain conditions rotational or deferred grazing gives the grass a chance to pick up vigor and produce seedlings. Water and salt can be used in getting a proper distribution of grazing. Where it is difficult to get enough water from well, it may be that a dam will alleviate the problem. The Cap Rock Soil Conservation District is anxious to help the ranchers anyway possible in the application of grassland conservation practices.

Mr. E. C. Newman was in the Soil Conservation office Monday, inquiring about an improved pasture mixture. His farm is located three miles east and two miles south of Silverton. He plans to seed about four acres and if this proves successful, he will seed a larger acreage next year.

Mrs. M. E. Noblett had the following children to visit her over the week end: Mr. and Mrs. Ira Noblett and son, of Amarillo; Sid Noblett, of Duncan, Oklahoma; Mr. and Mrs. Ernest Noblett, Duncan, Oklahoma, and Mrs. Gertrude Baker, of Oklahoma City, Oklahoma.

CARD OF THANKS

We wish to thank our many friends and neighbors for their beautiful flowers and blessings during the loss of our baby. Mr. and Mrs. J. J. Odom and children.

Cotton Stripping Is Stressed by Many Farmers

College Station, September 28—Cotton has made exceptionally good growth in most sections of the state this year. Right along with a heavier set of bolls there has been rank growth of leaves. Many cotton growers are turning their attention to cotton defoliation—that is, using chemicals to make the leaves fall so cotton will mature faster and be easier to pick.

The chemical which has been used the longest and has given good results is finely ground calcium cyanamid (SI-AN-AM-ID), according to M. K. Thornton, Extension agricultural chemist of the Texas A & M College System.

Thornton says cotton should be dusted with calcium cyanamid at the rate of 30 to 35 pounds per acre. It can be dusted from airplanes or with ground dusting machines. The dust must stick to the leaves in order to get good defoliation. Early in the morning, while dew is still on the leaves, is a good time to dust, says Thornton, or after a rain while the air is still moist. He adds that defoliation is likely to be a failure if dusting is done during extremely dry weather or when there is no dew on the cotton leaves.

A spray of ammonium thiocyanate (THI-O-SI-AN-ATE) dissolved in water and applied at the rate of 10 pounds per acre gives good results in drier sections of the state. This spray has not been tested thoroughly under Texas conditions and therefore cannot be definitely relied upon.

Removing leaves from cotton has several advantages. It makes picking easier—whether it's done by hand, by spindle picking machines, or by mechanical strippers. There is less leaf stain on lint. Bolls open more uniformly and earlier. And there's less greenstuff left for boll weevils to live on.

Thornton suggests that you see your county agricultural agent for more information on chemical defoliation of cotton.

Steele Family Reunion Held at Tulia Park

Those attending from here were Mr. and Mrs. Louie Kitchens and Joe; Mr. and Mrs. Wade Steele; Mr. and Mrs. Alton Steele, Kay and Jim Edd; Mr. and Mrs. Joe Mercer; Mr. and Mrs. John Gill; Mr. and Mrs. J. Lee Francis, Dale and Garland; Mr. and Mrs. J. R. Steele, Connie and Ray Lee; Mr. and Mrs. Cecil Frank, of Amarillo; Mr. and Mrs. H. R. Fulton and Jim Mercer, of Canyon; Mr. and Mrs. W. A. Springer and Charles, of Hereford; Mr. and Mrs. Elbert Summers, Clint and Donna Gale, of Hart; Polly Steele of Lubbock; Mr. and Mrs. J. H. Stone, of Tonkawa, Oklahoma; Mrs. E. C. Harris, Fargo, North Dakota.

Mr. Travis McMinn, of Happy, visited his parents, Mr. and Mrs. Bud McMinn Sunday morning.

Mr. and Mrs. Dick Higgins, of Hale Center, Mr. and Mrs. K. N. Tiffin and Doyle and Mr. and Mrs. Bailey Hill and children, visited Mr. and Mrs. J. C. Hill Sunday.
