BRISCOE COUNTY NEWS

THE CIRCLE AROUND YOUR NAME MEANS YOUR SUBSCRIPTION HAS EXPIRED

VOLUME 42, NUMBER 13 PUBLISHED EVERY THURSDAY AT SILVERTON, BRISCOE COUNTY, TEXAS THURSDAY, MARCH 30, 1950

Here is that good Irishman, Joe O'Neal, and his family, in their modern farm home about six miles southwest of Silvertown. Left to right, they are: Mrs. Pauline O'Neal, Lettie Marie (standing), Clela Faye, Joe O'Neal, and Eldon Kent O'Neal, 7-year-old son. There's a happy family for you, folks!

Makes Small Farm Pay by Using Fertilizer

By Zeke Brown
In the Southwest Plainsman
Amarillo, Texas

The News is reproducing several articles this week on Briscoe county and local people written by Zeke Brown for the Southwest Plainsman of Amarillo and published by that paper of recent date. Our thanks go to Mr. Brown for his courtesy.

Down in Briscoe County there is a 40-year-old farmer who is one of the biggest boosters in all of West Texas in the use of commercial fertilizers. He is Joe O'Neal, who bought a 240-acre farm about six miles southwest of Silvertown in 1936. He

had lived in the county since 1920, or since he was 10 years old. "I use 20 per cent superphosphate on my land," he says. "You really put something in the ground when you use fertilizer. For instance, I will put my wheat land in hubam clover if the bugs ruin the wheat. We use from 800 to 900 pounds of fertilizer to the acre." Joe O'Neal plants anything that will grow on his place, from blackeye peas to cotton. He has a peach orchard, also. He put down an irrigation well in 1936, the second in the county, and now irrigates all of his 218 acres of cropland. He has several opportunities to buy more acreage and had another farm for awhile. "But I believe I can make more

money by concentrating on my small farm than by spreading out too much," he surmises. Mrs. O'Neal was Miss Pauline Parker of Vaughn before her marriage. The O'Neals have three children, Lettie Marie, 14; Eldon Kent, 7, and Clela Faye, 4. They have the REA. They have used Butane gas for heat since 1937. They built their present modern residence six years ago. They have only enough Jersey cows to furnish the family with milk and butter. By use of commercial fertilizer and irrigation Joe O'Neal finds he has plenty to do to keep his farm going. And he is making a good living for himself and the family.

CARBON PAPER at the NEWS

Owls Thump Floydada 10-9 Tuesday Afternoon

In a game of errors, the Silvertown Owls nudged the Floydada Whirlwinds Tuesday afternoon 10-8. Instead of wondering who was going to make the next error. However, since it was the first game for both clubs, the errors are understandable. Billie Ray Satterfield pitched an outstanding game for the Owls despite the fact that it was the first game of the season. Billie scattered 4 hits but allowed one home run. He also garnered one of the six hits that the Owls were able to get. Others getting hits were: Dean McWilliams with a home run; Darrell McWilliams with a double; Carlyle Satterfield with a double; Donald Rhea with a double; Donald Bean with a single.

The Whirlwinds led most of the way and it looked as if the game was in the bag for them but a hit or two and an error or two helped the Owls considerably. It was one of those games where if anyone hit the ball, they were reasonably sure of getting on base because both teams looked ragged on the defense. From a defensive standpoint, the only highlights of the game was a high fly ball caught by Wayne McMurry in centerfield. A difficult catch behind second base by Donald Paige. Another good catch by Carlyle Satterfield at shortstop. And the work of Billie Satterfield backing up the throws of the wildmen from the field, of which he saved a couple of runs. Zephyr Bingham and B. Satterfield teamed up to nail a man a home plate to shut off

J. M. Lemons Here Wednesday—Health Improved

J. M. Lemons, who has been away for several months, and a part of the time was in the Plainview hospital, where he underwent an operation, was here Wednesday attending to business. Since he was released from the hospital Mr. Lemons has been living at the Hilton Hotel in Plainview. Mr. Lemons said he was feeling fine, but would continue to stay in Plainview for awhile where he would be near the hospital. Rev. and Mrs. Grady Adcock and Mrs. Joe Smith attended Mr. V. R. Gardner's funeral at Tulia last Wednesday afternoon. La Rue Gilkeyson, of Lubbock, spent the week end with her parents, Mr. and Mrs. Luther Gilkeyson. Mr. and Mrs. Troy V. Cox attended the funeral of Mrs. E. M. Dennis in Memphis Saturday.

a Whirlwind rally. Next Monday the Owls take on the Lockney Longhorns at the local field, game time 2 o'clock. The Longhorns will come to town seeking revenge for a couple of lickings suffered at the hands of the Owls last year. The last thing the Lockney boys said last year was, "Just wait until next year." Well, this is next year, and the two teams meet again and what the outcome will be is anybody's guess. It will be a game well worth seeing. The two teams play a return game next Thursday at Lockney.

P. T. Clark Buys A. J. Jones Jewelry Business In Silvertown

A. J. Jones, watchmaker, announces that he has sold his business to P. T. Clark, of Turkey, Texas, who has assumed management of the business. Mr. Clark comes to Silvertown well recommended in his line of work, being an engraver as well as a watchmaker. Mr. Jones states that he will be in Silvertown until after the first of the month, following which he plans to go to Dallas for medical treatment. Mr. Clark will continue to handle the collections for West Texas Gas Company in connection with his watchmaking and jewelry business.

PALACE THEATRE REDECORATING LOBBY OF SHOW BUILDING

Work which has been under way several days at the Palace Theatre is nearing completion this week. The lobby has been changed and sides entrances will now be used set off with drapes. A show card panel has been added where originally only railing was used. This feature of the change in the lobby will greatly eliminate much noise and make back seats much more comfortable. The front portion of the lobby has been finished in sheet rock and covered with paint which gives it a new appearance of neatness. Panels will be used for show billings. Stapling Machines and staples at the News office.

Funeral Services Held Tuesday For W. L. May

W. L. May, age 65, passed away early Monday morning at his home in Silvertown, after a short illness. His death was attributed to heart ailment. Funeral services were held Tuesday, March 28, 1950, at the First Baptist Church at 3 o'clock, and the body was carried to Las Cruces, New Mexico, for burial. Rev. G. A. Elrod, local pastor, conducted the services.

William Lenard May was born March 31, 1885 in Leon County, Texas. He moved with his parents to Coke County at the age of 13. He was married to Miss Annie Williams, and to this union five children were born, three boys and two girls. The family lived in Roscoe, Texas, and from there they moved to Las Cruces, New Mexico, where he resided for fifteen years. He was married to Mrs. Della Wann, July 26, 1941. They moved to Silvertown about two years ago, and besides farming interest, he has been employed with Willson & Son Lumber Company.

He is survived by his wife, three sons, Morris May, Leon May and Joe E. May, of Las Cruces, New Mexico; two daughters Mrs. Fountain Porter, of Hatch, New Mexico; Mrs. Bill Greer, of El Paso, Texas; two sisters Mrs. T. C. Price, of Bronte, Texas; Mrs. Louisa Johnson, of Winters, Texas; seven grandchildren and one great grandchild.

"Always Leave Them Laughing" At Palace April 2 and 3

Comes now Mr. Television himself, none other than Milton Berle, to endow a hilarious comedy with significance and excellent entertainment. Starring Milton Berle, Virginia Mayo, Ruth Roman, Bert Lahr, Alan Hale, Grace Hayes, Jerome Cowan.

It's Mr. Television Himself—the one and only Milton Berle, in a fast-stepping, light-hearted saga of the show world, the New season's tip-top hit.

J. D. McCUTCHEN'S BODY BEING RETURNED HERE FOR RE-BURIAL

Douglas Funeral Home was notified Monday that the body of J. D. McCutchen would arrive in Tulia Saturday morning at 10:30, for re-burial at Silvertown. Mr. Douglas said Wednesday evening that funeral services were pending.

J. D. McCutchen was born February 18, 1921, and was killed in action in Germany August 24, 1944. He is the son of Mrs. Eddie McCutchen of Lubbock. He is also survived by his wife, two children, Terry David and Karen Dee; one sister, Mrs. H. B. McClendon, of Lubbock; one brother, A. T. (Slats) McCutchen, of Plainview.

The News will carry the obituary in full next week.

P. T. A. Meet With Mrs. Albert Mallow To Practice Program

Members in the cast of the P. T. A. program met at the home of Mr. and Mrs. Albert Mallow Wednesday night for a rehearsal. Those present were: Mr. and Mrs. Louie Reithmayer, Mr. and Mrs. George Seaney, Mr. and Mrs. J. B. Webster, Mr. and Mrs. Pascal Garrison, Mr. and Mrs. Eugene Riddlehuber, Mr. and Mrs. Wilmoth, Mr. and Mrs. Herman Ely, Jack Strange and the "Cap Rock Band."

Mrs. J. E. Wheelock visited in Lubbock Monday with her nephew and family, Mr. and Mrs. Glen Ford.

Mrs. Mike Mason made a business trip to Amarillo Saturday and while there she visited relatives.

Last Rites For Mrs. Florence Lee Allen, Jackson, Miss.

Last rites were held in Jackson, Mississippi, March 20, 1950, for Mrs. Florence Lee Allen wife of the late George W. Allen of Jackson, Miss. She passed away Thursday, March 16, in the Briscoe County Hospital at the age of 82 years, 3 months, 12 days. Rev. L. S. Polk and Robert Stinnett of Jackson conducted the service. Interment was made beside her husband in Lakewood cemetery in Jackson.

Grandmother Allen was born December 5, 1867 at Delhi, Louisiana, the daughter of Mr. and Mrs. F. A. Comfort. She was a member of the Baptist Church. She was married to G. W. Allen, January 12, 1888 and to this union was born six children, five of whom are living. She was preceded in death by her husband and one child.

Survivors are four sons and one daughter, with whom she was making her home at the time of her death. They are: R. L., and O. W. Allen, of Jackson, Mississippi; C. H. Allen, Mineral Wells, Texas; G. A. Allen Fort Worth and Mrs. L. C. Yates, Silvertown, and several grandchildren. She is also survived by her only brother, W. A. Comfort, of Jackson, Mississippi.

Mr. and Mrs. Earl Cantwell were eating dinner when the photographer caught up with them one day this month in their nice country home in the Francis community of Briscoe County. Mrs. Cantwell has lived in the vicinity her entire life so little dusters never worry her since she has known about them since her childhood. Her parents are Mr. and Mrs. Dan Montague, pioneer settlers. Earl Cantwell is one of the most useful citizens of West Texas.

Cantwell Shows Bench-Leveling to Briscoe Folk

By Zeke Brown
In the Southwest Plainsman
Amarillo, Texas

"At least 50 percent of the irrigated land in Briscoe County should lend itself to bench leveling," declares Earl Cantwell, chairman of the board of supervisors of the soil conservation district in that county.

Mr. Cantwell has 26 acres in bench leveled irrigation this year. "We lose 30 percent of our rainfall from the run-off," he points out. "If this method of irrigation will save this extra 30 percent, we will always make good crops every year."

Earl Cantwell, now 44, has been a minister for 30 years, he says, starting at the age of 14. However, he is what is known as a "country preacher" since he makes his living on his 200 acre farm in Francis community, 13 miles southwest of Silvertown, where he has lived for 21 years. His wife is the former Miss Inetha Montague, daughter of Mr. and Mrs. Dan Montague, pioneer settlers of the county. Mr. and Mrs. Cantwell have two children.

"I preach to four congregations," Mr. Cantwell says. "One is at Turkey, one at Tulia, one at Rock Creek (near home) and one in Lubbock, with an occasional appearance at West Amarillo Church of Christ."

Mr. Cantwell also owns an interest in a cabinet shop in Silvertown that is operated by Jim Crow. In addition to all of these interests, he has served on the county PMA board and was its chairman at one time as well as serving as chairman of the soil district board now. As to the present outlook, Mr. Cantwell says the green bugs are worst in wheat this year than he has ever known before and he estimates the damage from them will be 80 percent of the crop. Mr. and Mrs. Cantwell have a nice 6-room residence, most of which he built himself during the last few years.

In his bench-leveling operations he has had the assistance of Scott Amend of Plainview, district conservationist, as well as help from Carl Dwyer and his technicians of the Silvertown office. Alvin Jackson did most of the work on the job, assisted by Carl Minch.

Mr. and Mrs. Berton Hughes had as their dinner guests Saturday Mrs. Hughes' parents, Mr. and Mrs. R. E. Frenfro, of Belcher, Texas. They brought Robert home who had spent a week with his grandparents. They all visited Mr. and Mrs. Hubert Hall and daughter of Memphis Saturday night and Sunday, and attended the birthday celebration of Mr. R. D. Hall.

County Agent Leo White has his own "mourner's bench" in his office at Silvertown where Don Garrison, farmer, get into a comfortable position for a conference on green bugs. Garrison lives four miles northwest of Silvertown. White has been county agent down there for the past five years and has chalked up a record that covers everything from running terrace lines to selection of calves for his club boys. Just now he is involved with "the battle of the century, the fight against the greatest scourge of green bugs in history of the Panhandle"

Mrs. Joe Smith and Mrs. Grady Adcock attended the District Executive meeting in Plainview last Wednesday at the home of Mrs. J. D. Strickland.

AGRICULTURAL CENSUS COMING UP NEXT MONTH

Texas farmers and ranchmen will soon be receiving a copy of the 1950 agricultural census questionnaire and each is requested to fill it out and have it ready for the census taker when he calls next month. The questionnaire is being sent to all rural route box-holders in small towns where there are a considerable number of farmers. The copy should not be disregarded, says Tyrus R. Timm, extension economist of Texas A. and M. College, but should be studied carefully and completely filled in with accurate information. Here's why.

The Census of Agriculture provides an inventory of our farms and farm resources. It gives facts indispensable in dealing with current farm problems. It benefits everybody, because it gives a picture of what is happening in the rural areas of the state and nation and includes facts on land use, crop and livestock production, how many people live on farms, kinds of machinery used, farm home facilities and a large number of other equally important items.

In most states, it provides the major source of county figures on agriculture as well as the basic information on the changes, growth and improvements in agriculture in each county. Timm points out that the information taken from the census often is used in planning programs designed to improve farming and rural life and farm organizations likewise base many of their decisions on this information. The annual estimates of the production of crops and livestock products are based upon figures obtained in the nationwide farm cen-

sus but most important, it provides the basis for the making of allocations among counties of quotas for the acreage of many important farm crops.

Timm says the information you give the census enumerators is confidential and cannot be used for taxation, investigation or regulation. An act of Congress provides the protection. Every person who fills out a census form or answers the questions asked by an enumerator are likewise required to give accurate and truthful information.

The accuracy of the farm census will depend upon the cooperation of every farmer and ranchman. The accuracy of the county totals depend upon accurate returns from each individual for county totals are obtained by adding the individual reports together.

When you get the agricultural census questionnaire, don't throw it away, but answer every question asked completely and accurately for as Timm points out, the farm census is mighty important to agriculture.

Rev. G. A. Elrod is teaching the book of Acts, Tuesday, Wednesday and Friday nights at Whiteflat Baptist Church near Matador, Texas. The Rev. Scruggs is the pastor at Whiteflat.

Mr. Virgil Baldwin, of Lubbock, spent from Saturday night until Monday morning with Mrs. Baldwin and children and Mr. and Mrs. W. A. Rowell.

Mr. and Mrs. Ware Fogerson left last Wednesday on a business trip to Fort Worth, Dallas, Texas, Kansas and Lewiston, Louisiana. They returned Saturday.

New Telescope Is to Be Shared By 3 Countries

GLENBROOK, CONN. — A new type of telescope, the first of its kind ever built, designed to penetrate further than ever before into the vastness of the Milky Way with its hundreds of billion stars has been transferred by its makers to representatives of three nations. They will collaborate in its use in South Africa.

The new telescope, a marvel of optical precision, will enable astronomers to photograph areas in the Milky Way 30,000 light years, or 186 quadrillion miles away. It will produce star images of near-perfect quality over an area of the sky equal to almost 100 times the area covered by the full moon.

Its penetration into space will be three times greater than present instruments of similar design, which limited the detailed exploration of the Milky Way to a distance of 10,000 light-years. (A light-year is the distance traveled by light in a year at a speed of 186,000 miles a second, or six trillion miles.)

Is Giant Camera

The new explorer of space is known as a Baker-Schmidt type of telescope, a greatly improved version of the famous telescope invented by Richard Schmidt of Hamburg, Germany, which combined the ability of the reflecting telescope to penetrate to great distances with that of the refractor type's ability to cover a wide area of the sky with perfect image quality over the entire photographic plate.

The Baker-Schmidt type was designed by James G. Baker, research associate of the Harvard Observatory and consultant to the Perkins-Elmer corporation here, which built the first model of this type.

The Schmidt telescope, actually a giant camera, has one mirror and a correcting lens. The Baker-Schmidt telescope-camera has two mirrors in addition to the correcting lens. The addition of the secondary mirror makes it possible to use a flat photographic plate, instead of the curved plate of the conventional Schmidt telescope.

This flat field, or flat focal surface, it was explained, makes it possible to photograph stars with one-hundred-thousandth of the light of the faintest star seen by the naked eye in no more than twenty minutes, much faster than ever before. The flat field also makes it possible to photograph a much larger area of the sky than ever before.

Jointly Owned

The telescope will be owned and jointly operated by three world famous observatories—the Harvard Observatory, the Armagh Observatory of Northern Ireland, and the Dunsink Observatory of the Republic of Ireland. Astronomers of each observatory will work on separate sections of the Milky Way at the Boyden Station of the Harvard Observatory of Bloemfontein, Orange Free State, South Africa, headquarters of the "Hub of the Universe" expedition, as the venture is named.

Harvard has staked out a claim to the center of the Milky Way, while the two Irish groups will study the outer parts of the vast galaxy, of which our solar system is an insignificant part some 30,000 light-years away from the center.

Mechanical Brain Human Enough to do Cheating

KELLOGG, ILL.—A mechanical brain so human it even "cheats" has been developed by an 18-year-old scientific wizard here.

The machine can beat any human at ticktacktoe without cheating, says its inventor, Noel Penney Elliot, a senior in Kellogg high school.

But still it will try to chisel a little if its human opponent isn't careful.

The game is played by switches and lights in nine squares on top of the 13-inch-square, 10-inch-high machine. The hapless human throws a switch in a square to start the game.

Instantly the machine comes back with its move, "without even stopping to think," says the husky, bespectacled young scientist. And so on until the machine either has won or tied.

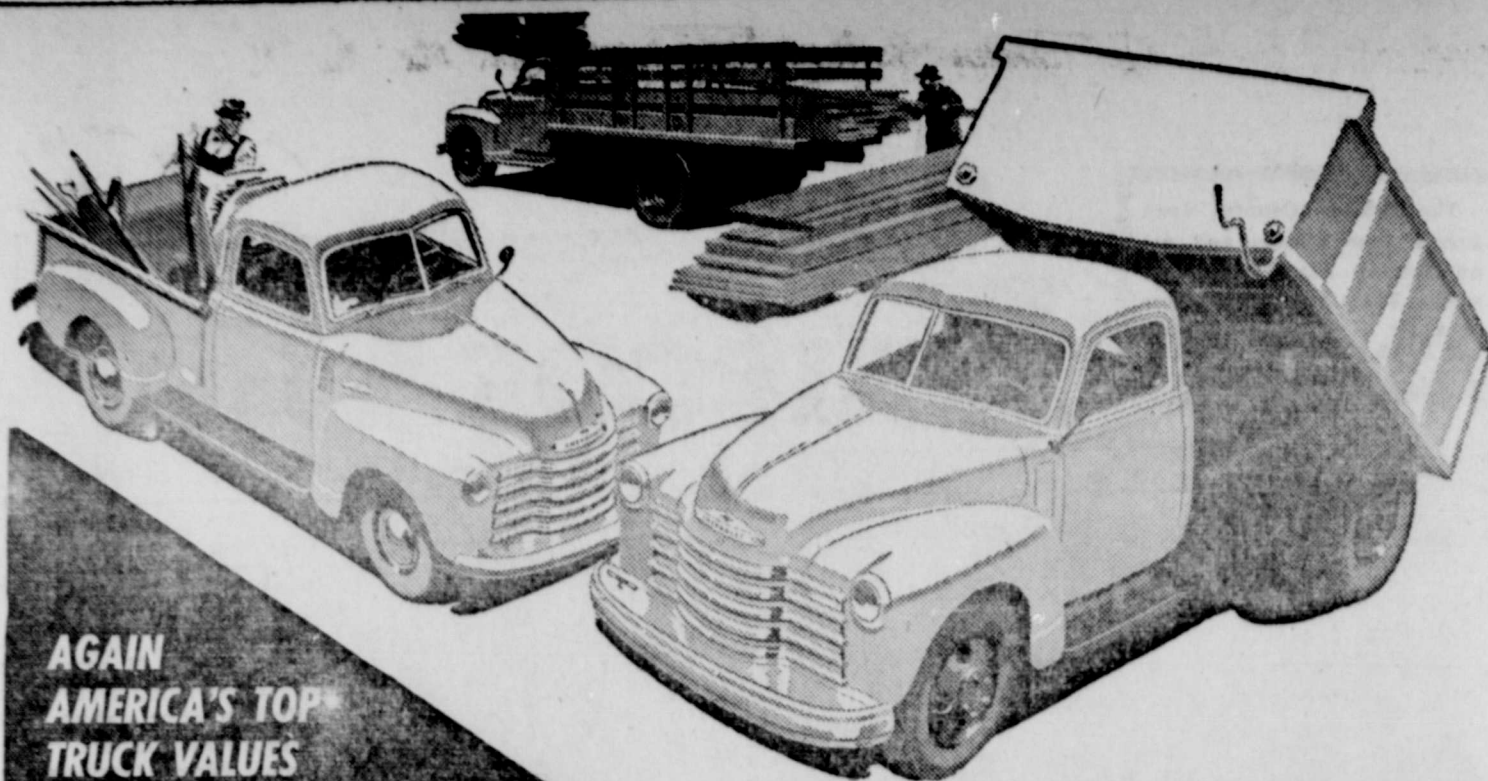

"I catch it cheating now and then," Noel said. "Sometimes it will turn on lights in two squares during one turn. I'm working on it to see what the cause is."

Teen-Ager Out-Wrestles Assaulter, Who Escapes

CLEVELAND, OHIO. — A girl teen ager who learned wrestling tactics by watching television routed a street thug here.

Marion Vilt, 17, told police that when the man grappled with her, "I grabbed his index finger and bent it back hard. He let go and I punched him twice. He ran one way and I ran the other."

She also created her brother, Don, a football player of Bowling Green university, with teaching her some of the tricks.

THE CENTURY OF PROGRESS STUDY CLUB MEETS

The Century of Progress Study Club met on March 22, in a short business session. Immediately following Mrs. Coleman Garrison, hostess for the afternoon, turned the program over to Mrs. Ewing Vaughan. Mrs. Vaughan brought a lecture on Decoration through Art. She discussed art in the subjects we had studied throughout the year. Pictures were shown on each subject. Two of Mrs. Vaughans paintings were shown. Both of them will be entered in the State Art Exhibit this spring. They were done in pastels, one of vivid hue and one in soft color. These paintings are originals and she explained her inspiration for each. This was a very interesting program, and Mrs. Edell Hutsell thanked Mrs. Vaughan for the entire club.

Twelve members were present. Adjournment.

50,000 Miles - No Wear!

1. Driven 5 Years in 10 Weeks! For 70 days, six brand-new cars raced over the broiling Mexican-border desert at 60 m.p.h. . . . putting amazing new Conoco Super Motor Oil to one of the most punishing tests ever devised. After 50,000 miles of continuous driving, engines showed no wear of any consequence . . . in fact, an average of less than one one-thousandth of an inch on cylinders and crankshafts. Startling proof—factory finishing marks were still visible on piston rings!

2. New-Car Mileage! This rugged road test—equal to 5 years' normal mileage—proved that Conoco Super Motor Oil, with proper crankcase drains and regular care, can keep your new car new! Gasoline mileage for the last 5,000 miles of the test-run was as good as for the first 5,000 miles . . . actually there was an average difference for the fleet of only 4/100 of a mile per gallon!

3. New-Car Power! Quicker Starts! Yes—Conoco Super Motor Oil's extra protection keeps that factory flash . . . that showroom smoothness . . . year after year! Conoco Super Motor Oil OIL-PLATES metal surfaces to make your engine last longer, perform better, use less gasoline and oil! Conoco Super Motor Oil virtually stops wear before it starts . . . keeps your engine new and clean. New Conoco Super Motor Oil is the great new modern wear-fighter!

Hays-Gaither

Miss Bonnie Lou Hays, daughter of Mr. and Mrs. E. W. Leuty of Silverton, Texas, was united in marriage to Mr. James Clifford Gaither, son of Mr. and Mrs. T. J. Gaither of 801 Fairview, Fort Worth, Texas, March 11, 1950 at the Polytechnic Methodist Church Chapel, Fort Worth, Texas with Rev. Hayden Edwards officiating.

Miss Alma Jewel Leuty, sister of the bride, was maid of honor. Mr. Eddie Richards, a friend of the groom, was best man.
The bride chose as her wedding dress a navy blue crape with red accessories and wore a corsage of white gardenias.
The couple will be at home at 1312 Ash Crescent St. Fort Worth, Texas.

CARD OF THANKS

Words fail to express our appreciation to the people of Silverton for their kindness and help during the illness and passing of our mother and grandmother. For the words of sympathy, beautiful flowers and deeds. Also to Dr. Shy, the hospital staff, Mr. and Mrs. Watson Douglas, Rev. and Mrs. G. A. Elrod and those who were faithful in sitting up in the last weeks of her life. May God bless each of you.

Mr. and Mrs. L. C. Yates,
Mr. and Mrs. Doyle Stephens and Donna,
Mr. and Mrs. Riley Yates.

Mrs. Arnold Banks, Mrs. Edwin Crass and Mrs. D. Garvin were visitors in Borger, Saturday.

Pres, Cons of Pasteurizing Presented to Dairy Farmers

Dairy farmers were warned recently that pasteurization is not a substitute for healthy cows and sanitary methods of milk production—and that failure to recognize this will prove harmful to the entire dairy industry.

Pointing out that "vigorous organized opposition to pasteurization continues to flare up," the Journal of the American Veterinary Medical Association aired both sides of the pasteurized milk controversy, and cited these facts:
Pasteurization has so increased the popularity of milk and milk products that 27 million cows are now scarcely enough to supply the demand, in contrast to former times when farmers had many less cows yet more milk than they could sell.

The heating process used in pasteurization, whereby disease germs are destroyed, takes little if anything from the nutritive value or flavor of the milk.
Objection to universal or compulsory pasteurization is based on the assumption that it will encourage slipshod methods of production because "pasteurization will make it safe."

Unfortunately, some advocates of compulsory pasteurization have said or implied that the importance of healthy cows and sanitary production methods could be minimized or forgotten in the face of universal pasteurization.
The article concluded that pasteurization is an unquestionable protection to the health of milk consumers, but that it cannot and should not be used as a cover-up for deficiencies in herd health and cleanliness.

U.S. Population Doubles During Past 50 Years

Population of the United States at the mid-century mark, well over 150,000,000, is just about double what it was at the beginning of the century. Thus, the numerical gain in the nation's population in the last 50 years has been as great as in nearly 300 years between the colonial settlements and 1900.

The rate of population gain in the past half century has varied widely over the country. First among the states in this respect is California, the present population of which is more than seven times what it was in 1900. As a result, California now ranks second in population, having advanced from 21st place at the turn of the century.
Arizona has six times its 1900 population, and the state of Washington five times, with the figure for Florida just a little short of that. Other states whose populations have more than quadrupled since 1900 are Oregon and Nevada. Statisticians point out that in the far West as a whole the population is five times what it was 50 years ago.

At the lower end of the scale are Vermont, with an increase of less than 10 per cent in 50 years, and Iowa and Nebraska, with increases of about 20 per cent.
In general, the rate of gain has been lowest in northern New England and in much of the farm areas in the Midwest and South.

Facts About Utah

Utah is planning giant dams to increase its electric power. The state will probably take a leading part in the production of synthetic fuel from its tremendous coal reserves extending for 13 thousand square miles. The resins contained in Utah's Huntington and Salina Canyon coals already go into lacquers and varnishes. Utah is the world's only producer of gilsonite, wurtzilite, and ozokerite, or natural beeswax. With Colorado, it produces virtually all United States uranium and has enormous deposits of potash and phosphorus, vital fertilizer constituents. From its Great Salt Lake comes an important supply of salt. By itself, it is estimated, Utah could supply the world for 1,000 years with commercial gypsum.

Starring Under Suspicion

The startling, one of the nation's worst nuisance birds, is now under suspicion as a disease carrier. The American Veterinary Medical association reports that veterinarians have isolated the virus of Newcastle disease, a serious poultry malady, from a young starling found near Ithaca, N.Y. Newcastle disease is a respiratory-nervous disorder that kills many chickens and other poultry and causes heavy losses in egg production. Investigating veterinarians think the starling contracted the disease from its parents, who may have come into contact with an infected poultry flock while ranging for food.

Venezuela Encourages Immigrants

With a scant four and a half million people to occupy a country bigger than Texas and Louisiana, Venezuela needs an enlarged and well-balanced population to exploit the land's riches and tame an undeveloped wilderness. That explains why the Venezuelan government recently threw open the immigration doors to 2,000 Europeans monthly. And, in effect, laid down the red carpet, too. Not only are immigrants urged to come to Venezuela but the government is offering them grants of rich, well-watered farm land, plus long-term, low-interest loans for machinery and equipment.

Mr. and Mrs. R. Seaney and Mr. and Mrs. W. A. Holt were visitors in Plainview Saturday.

Mr. and Mrs. Oscar McGavock of Tulia, were visitors in Silver-ton Monday.

Do Stay For Brunch

Easter season is a time for easy hospitality. If you like coffee cake, and everybody does, it's just the thing to serve for something in a hurry. And this cake is extra good with a topping of chopped nuts and cinnamon teased together. One more thing, when you remove your coffee cake from the oven, you'll avoid that maddening sticking to the pan if you place it first on a cold damp cloth a few moments before turning out.

And here's the way you make it.

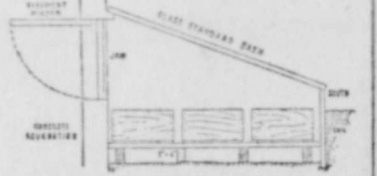

Easter Morning Coffee Cake

1 1/2 cups sifted, all-purpose flour	1/2 cup chopped nuts
1 cup sugar	2 teaspoons Royal Cream of Tartar Baking Powder
3/4 cup Blue Bonnet Margarine	1/2 teaspoon salt
1 teaspoon cinnamon	1/2 cup milk
1 tablespoon melted Blue Bonnet Margarine	1 egg, well beaten

Sift together in mixing bowl flour and sugar. Mix in Blue Bonnet Margarine thoroughly with pastry blender or 2 knives. Reserve 3/4 cup of this mixture and blend in cinnamon, melted margarine and nuts. To remaining flour mixture, add baking powder, salt, milk and well beaten egg. Beat well. Turn into well greased 9-inch cake pan; sprinkle with cinnamon-nut mixture. Bake in moderate oven at 375° F. about 40 minutes. Yield: one 9-inch cake.

Early Tips For Anxious Gardeners

While winter winds are still howling around the door, enthusiastic gardeners can get a head start on Mother Nature, and insure garden-fresh mature crops ready for the table as much as a month earlier than usual. An easy-to-build basement window hotbed makes this possible, and saves money by allowing the home-growth of plants and sets ordinarily bought from a nursery.
The window hotbed is simple in construction (as shown in sketch), consisting of glass sash resting

Hotbed Built Into Window
on a wooden frame, backed up against a basement window. Seeds are planted in flats placed under the sash, and the open basement window (must be Southern exposure) provides cellar warmth.

Use of the right type of glass is important in the construction of the frames. Pennvernon glass is one of the best. It transmits sunlight evenly, abundantly and directly, making the hotbed more efficient. Crops that can be started in frames with fine results include: lettuce, cabbage, cauliflower, broccoli, tomatoes, peppers, egg plants, mungbeans, summer squashes, celery and cucumbers.

Here's another idea for the gardener who finds time hanging heavy while the ground is still snow or frost-bound. Prepare garden tools for the rigorous work they'll get during the coming season. A good paint job protects them, and by using different, bright colors, makes them easy to locate against the brown and green of the earth and grass. From a safety angle that's important. It's surprising the number of twisted ankles and bruised shins that result from stumbling over dirt-camouflaged garden equipment.

Also, according to Hayes Quinn, noted color authority for Pittsburgh Plate Glass Company, science has proved that light colors have a tendency to make heavy loads seem lighter. It's worth a try, if a bright yellow wheelbarrow will take pounds off the payload.

These are just a few of the ways gardening can be made easier and safer through the use of

Color for Garden Tools
paint. Others will be discovered as this practice is carried out.

Sen. LeBlanc Continues Rationing of Hadacol

The continued increasing demand for HADACOL, one of the truly great medical discoveries given to the world by Senator Dudley J. LeBlanc, has made it necessary to decrease the ration allowance on HADACOL from six bottles to two bottles.
"We placed the limit at two bottles to a customer only after trying every other alternative," said Senator LeBlanc. "The de-

ployees are working shifts around the clock but one bottle each after another comes up. We expect to lick them all but meanwhile we are asking our customers to have patience and accept no inferior substitutes.
"For instance, when I created HADACOL I read every available authoritative medical and drug book in order to use the very finest ingredients regardless of cost. For instance, I read on page 234, U. S. Dispensary, 23rd edition, that 'Theoretically Calcium Glycero-phosphate should for many purposes be superior to most other calcium salts because it represents both calcium and phosphoric acid in a soluble combination.'
"Little did I realize when I made Calcium Glycero-phosphate a part of the now famous HADACOL formula that in time the demand for this great medical discovery—HADACOL—would be so great that we would use up the entire available supply in the United States of this product. But that is exactly what we have done and great plants throughout the nation are now working to increase their facilities to expand production of this essential ingredient which blends with other expensive products to help so many million suffering people in distress."
Yes, in HADACOL Senator LeBlanc envisioned the medicine that would bring blessings to folks of all ages, and in perfecting this formula he worked in his own small laboratory, sometimes 18 to 20 hours a day. Perhaps others could have placed the same ingredients in a medicine, but it remained for him to develop a formula which contains the most expensive ingredients of their kind. For instance, he uses Vitamin B-6 which costs at the factory \$550 a kilogram, which is less than half a gallon.

We invite everyone to visit our shop for their barber work.
MARLER BARBER SHOP
HAROLD MARLER

Hundreds Tell Bob Wills Of Hadacol's Numerous Blessings

Hundreds of folks, who are benefiting every day from taking HADACOL meet at the Trianon Building in Oklahoma City where Bob Wills, famous band leader, and his Texas Playboys broadcast each noon for HADACOL.
"It looks like all my fans are getting wonderful benefits from HADACOL," said Wills. "It is a real pleasure to broadcast for HADACOL because the folks taking HADACOL are so enthusiastic that I feel like I am performing a real service for mankind."
Hundreds have told Wills of the blessed benefits of HADACOL and the following statement by Miss Betty Lou Lobb, 720 College St., Bethany, a well known singer, is a good example.
"I was tired, run down and lost my appetite. I suffered with gastric disturbances. I had tried almost everything but it didn't seem to help me. I had heard about the wonderful results HADACOL had been bringing to so many of my friends. Soon after taking HADACOL I was feeling much better, had no gastric disturbances and had a wonderful appetite. I am no longer nervous. I am sure that HADACOL has helped me a great deal and I recommend it to my friends."
Miss Lobb suffered with a deficiency of B Vitamins and important Minerals which HADACOL contains.
A lack of only a small amount of the B Vitamins and certain Minerals will cause digestive disturbances. . . . Your food will not agree with you. . . . You will have an upset stomach. . . . You will suffer from heartburns, gas pains, and your food will sour on your stomach, and you will not be able to eat the things you like for fear of being in misery afterwards. Many people also suffer from constipation. And while these symptoms may be the result of other causes, they are surely and certainly the symptoms and signs of the lack of the

Bob Wills Hears About HADACOL'S Blessings

Bob Wills, famous western music band leader, loves to talk with his fans at the Trianon Building auditorium in Oklahoma City about the blessings of HADACOL. In the picture above Miss Betty Lou Lobb, 720 College St., Bethany Okla., a very promising young singer, tells Bob how HADACOL has helped her. Hundreds of folks who are obtaining rich blessings from the precious B Vitamins and Minerals in HADACOL visit Wills each week for his network broadcast, which is originated from KBYE, Oklahoma City, Oklahoma's western music station, and sent over a leased wire to stations, KRMG, Tulsa; KWHN, Fort Smith; KGLC, Miami, Oklahoma; KLYN, Amarillo, and KWFT, Wichita Falls.

B Vitamins and Minerals which HADACOL contains. And if you suffer from such a disorder, there is no known cure except the administration of the Vitamins and the Minerals which your system lacks.
HADACOL contains not only one, but 5 of the B Vitamins. HADACOL contains not only one, but 4 of the necessary Minerals. It comes to you in liquid form, easily assimilated in the bloodstream so that it can go to work right away.
It is easy to understand, therefore, why countless thousands have already been benefited by this amazing tonic, HADACOL.
So, it matters not who you are. . . it matters not where you live. . . or if you have tried all the medicines under the sun, give this wonderful preparation a trial. Don't go on suffering. Don't continue to lead a miserable life. Many persons who have suffered and waited for 10 to 20 years or even longer, are able now to live happy, comfortable lives again because HADACOL supplied the Vitamins and Minerals which their systems needed. Be fair to yourself. Give HADACOL a trial. Demand the genuine HADACOL. Accept no substitutes.

Research in Electronics Promises New Living Modes

Everything from cooking to conventions may be in for radical changes in the next 50 years if the electronic science continues the progress made in the first half of the 20th century, Walter Evans, Westinghouse vice president predicts.

The age-old plaint of housewives, "hours spent over a hot kitchen stove," may fade in the face of new food processing and packaging methods specifically designed to use electronic heat for cooking. This new approach is expected to eliminate many of the difficulties encountered in current experiments where the dielectric stove has been merely substituted for the kitchen range, and what's more new packaging methods will eliminate the "tough steak" by making possible electronic tenderizing prior to purchase.

The last refuge for the American male—the convention—may become as obsolete as the kitchen range. Telephone television may provide across-the-desk discussion, eliminating the time and money spent in long-distance travel for brief business meetings.

At that though, if the "social" convention persists it will be safer than ever with television and radar combined under electronic control to provide ultrasafe transportation by air, sea or rail.

However, Evans cautions that these and a host of other developments will depend on the success of basic research for higher-powered vacuum tubes, capacitors, transformers, resistors and other components as well as a more thorough investigation into new or partially-used frequencies.

Gains Against Tuberculosis Accelerated by Chest X-Ray

The tuberculosis death rate in the United States for 1949 set an all-time low record showing a reduction of about 10 per cent from the figure of the year before. The present rate in the population is only about one-half that of 12 years ago.

The gains against tuberculosis have been accelerated during the postwar years, and should the recent trend continue, the disease before long will be relegated to a minor position among the causes of illness and death in our country.

At present, only one state (Arizona) has a tuberculosis death rate of over 60 per 100,000 population. In 1933, when nationwide figures first became available, 19 states and the District of Columbia had rates of 60 or higher.

Intensified public interest and support, of which the Christmas seal campaign is part, is seen as an outstanding factor in accelerating the decline of the tuberculosis death rate. Since the end of the war, case finding has been pushed in an ever widening area, and at present about 10,000,000 persons a year are receiving X-ray examinations.

At the same time, efforts have been initiated to increase the facilities for the care and treatment of tuberculosis. Recent research on streptomycin and other new drugs promises that chemotherapy may play a larger role in the future.

French Port of Dunkerque Regaining Its World Trade

Dunkerque, scene of the epic British evacuation of World War II, is rapidly regaining its prewar position in France's economy.

The city's main activity, shipping, now almost equals its 1938 tempo. With most of its docks and warehouses rebuilt, the war-wrecked harbor ranks fourth—its former place—among French ports in world commerce. Only Marseille, Le Havre and Rouen handle more trade today.

Until the German blitz of May, 1940, Dunkerque was just another place name to most of the world. Then overnight it became a word eloquent of dogged courage and stirring drama as 330,000 British and French troops were snatched from the battered beaches and evacuated to England by the amazing improvised armada that included everything from warships to tugs and small pleasure craft.

When allied forces re-entered the town almost five years later, they found a dead city. Grass grew in the streets. Hollow skeletons of masonry stood crumbling where buildings had been. The prewar population of some 31,000 had shrunk to only a few score. The city and its once proud harbor had to be rebuilt almost from scratch.

Heat Generated by Dentist Determined by Scientist

Preliminary results on first extensive studies undertaken to determine heat generated in the mouth during dental drilling has been reported by a University of Michigan scientist.

A maximum rise of 140 degrees during laboratory tests was reported by Dr. Floyd A. Peyton, professor of dentistry.

However, he pointed out that the average temperature rise when drilling tooth enamel is about 100 degrees, and about a 33-degree rise occurs when drilling the dentin underlying the surface enamel.

Dr. Peyton said that preliminary studies with steel, diamond point and carborundum cutting tools suggest that less temperature rise occurs when drilling is done at low speeds, with small cutting tool sizes and with light pressure applications. He also indicated that continuous force on the cutting instrument causes greater heat than an intermittent method of drilling for two or three seconds and stopping for a second.

Experiments with the new gas propelled abrasive technique now under development show there is no significant temperature changes during drilling, Dr. Peyton declared.

He said that future experiments are planned to study the effect of temperature changes on mouth tissues.

The above results described by Dr. Peyton were all obtained from measurements made on extracted adult molar and bicuspid teeth. The temperature changes were recorded by inserting a fine wire into a small specially drilled hole through the enamel on the side of the tooth. This wire, called a "thermocouple," was attached to an automatic recording instrument.

Mr. and Mrs. R. E. Pitts and daughter, of Cordell, Oklahoma, spent Saturday night and Sunday with Mr. and Mrs. O. G. Hogue and children. Mrs. Pitts and Mrs. Reid are Mrs. Hogue's sisters.

Mr. and Mrs. C. E. Yates and son, Thumper, and Mr. and Mrs. Bobby Holder and son, Mike, of Lubbock, were visitors in the home of Mr. and Mrs. E. E. Miater Saturday night.

Wall Paper — The Magic Touch

Chicago Tribune Prize Homes Photo

Wall paper provides a striking background in this dual purpose room. By day it is an attractive living room. After dark it provides ample sleeping quarters for unexpected guests. This same arrangement can be applied to a bedroom, den, or a one-room apartment.

In contrast to the monotone tailored couches, a bold patterned paper with one of the new dark ground colors, adds spark and variety. Whatever the setting, there are many exciting wall papers that will show it off to advantage. April is Wall Paper Style Month, so get on the bandwagon and select the paper of your choice.

TEXAS INDUSTRIAL WEEK—Robert E. Clements of Amarillo, president of the Texas Manufacturers Association, is shown receiving from Governor Allan Shivers a proclamation designating April 1-8 inclusive as the first annual "Texas Industrial Week." The Texas Manufacturers Association and other organizations will undertake activity during that week to emphasize the importance of industry and commerce to the state's economy. TMA has approximately 2,000 members organized in 21 chapters, and works to maintain a favorable atmosphere for business in Texas. Shown, left to right, are: T. J. Butler of Austin, TMA director; Ed C. Burreis of Houston, TMA executive vice president; Mr. Clements; Hugh Burdette of Pampa, TMA regional vice president; and Governor Shivers.

FINER FLAVOR, GREATER ECONOMY, GARDEN - FRESH FRUITS, VEGETABLES
