Silverton Roping Club To Hold Rodeo May 26-28

The Silverton Roping Club has announced that they will hold a three day rodeo commencing Friday, May 26, and continuing through Sunday afternoon, May 28. The stock will be furnished by Jay Wise, and plenty of excitement will be furnished the crowd. There will be calf roping, ribbon roping, bull dogging, saddle bronc riding, bare back riding, girls barrel races. There also will be two big dances Friday and Saturday Music by Cliff and Joy and the Caprock Playboys.

Funeral Services For Raymond Lee Womack Tuesday

Last rites were held Tuesday at 3 o'clock at the Church of Christ for Raymond Lee Womack, age 26, conducted by Earl I Cantwell, assisted by Arnold Banks. Interment was made in the Silverton Cemetery under direction of Douglas Funeral Home. Raymond Womack was injured Sunday afternoon, May 14, about 4 o'clock, when he was thrown from a motorcycle he was riding on the highway about a mile west of town. It was thought that he lost control of the motorcycle when it hit a bump in the highway. He was brought to the local hospital with a serious head injury, and died Monday morning about 10 o'clock. Raymond was born September 17, 1924, and died May 15, 1950. He was a graduate of Silverton school, and was associated with his father in the garage business until the early part of this year. He is survived by his wife, one daughter, Lee Ann, age 2; his parents, Mr. and Mrs. Bruce Womack, and one brother, Billy Joe Womack, of Amherst.

Property Owners on Main St. Put up for Cemetery Fund

The following property owners on Main street have put up checks with Carl S. Crow to go to the Silverton Cemetery fund, providing the paving bond issue carries to pave Main street May 27. If the bond issue fails to carry their money will be refunded, Mr. Crow stated Wednesday morning. Other property owners on this street have promised to pay to the cemetery fund, Mr. Crow said. Appearing in next week's issue of the News will be the names of the ones who have paid since the following names were turned in:

Lem Weaver	\$300.00
William Long	112.50
James Jeffries	112.50
T. T. Crass	150.00
Troy Burson	100.00
Elmer May	100.00
Louis Grabbe	225.00
Mrs. H. E. Fowler	112.50
W. W. Milton	112.50
J. T. Love	450.00
Bud McMinn	112.50
A. D. Arnold	75.00
Bryant Eddleman	112.50
Mrs. F. M. Autry	100.00
J. W. McCrackin	100.00
Tony Burson	50.00
D. F. Wulfman	1 50-foot lot.

"Montana" at the Palace Theatre May 21 and 22

A nicely-mounted Western with enough of twist to make it interesting is "Montana", in Technicolor, featuring Errol Flynn and Alexis Smith. The story twist comes in with attempts by sheep herders to move in on the grazing lands of Montana. The cattle barons are of the opinion that the sheep spoil the land for the cattle and proceed to use all attempts to keep them out of the state. Flynn, bringing in hundreds of sheep, tangles with Miss Smith who heads the faction of cattle ranchers.

A. L. Redin Resigned as Principal of Elementary Grades

A. L. Redin has resigned principal of the elementary of the Silverton school. She retain her position as arithmetic teacher, she announced this Redin accepted the position principal during the war when almost impossible to secure needed teachers. She kept the long as she felt that she giving necessary service to school. For the last two years asked to be relieved, but her position when a qualified principal was not found. Now are more plentiful. Mrs. thinks a man as elementary school will be a help in many and is happy in helping to one.

Acres of Land Bought for Silverton Cemetery

S. Crow announced this that he and twenty other Silverton has brought five of land adjoining on the side of Silverton Cemetery. C. Bomar, with option of lot each, size 18x24 Crow stated that when the acres is surveyed into lots would be more than three lots. He interested in buying lots requested to see Carl S. Crow, as charge of the project, to sell more lots to pay sense of having the land, and to build a fence and guard.

Rain Saturday Night Amounted to .48 Of An Inch

According to the rain gauge at Bomar One-Stop Station Silverton received .48 of an inch of rain Saturday night. East of Silverton the rain was reported heavier. Most of the county received from a quarter to one-half inch. Farmers generally are getting ready to plant their row crop. Some few had planted before the last moisture and it is coming up.

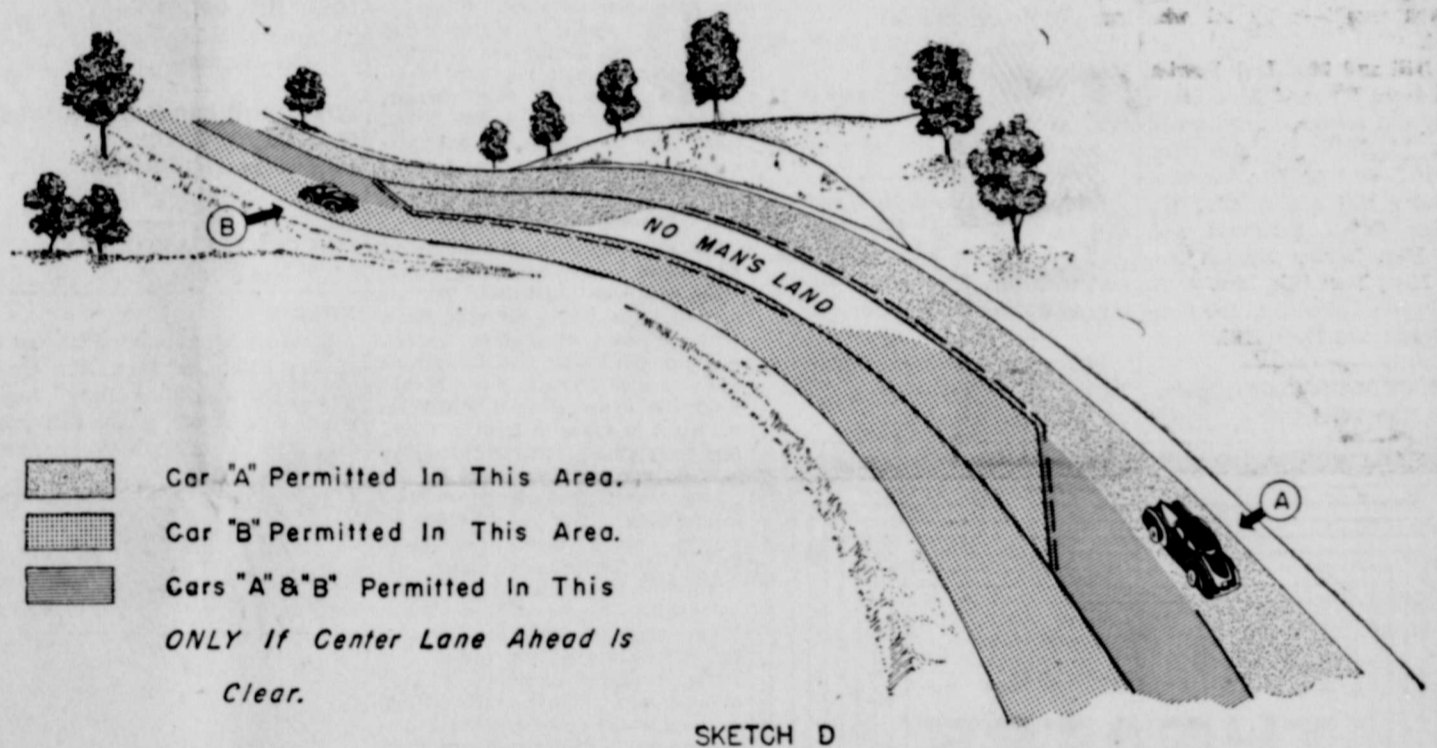

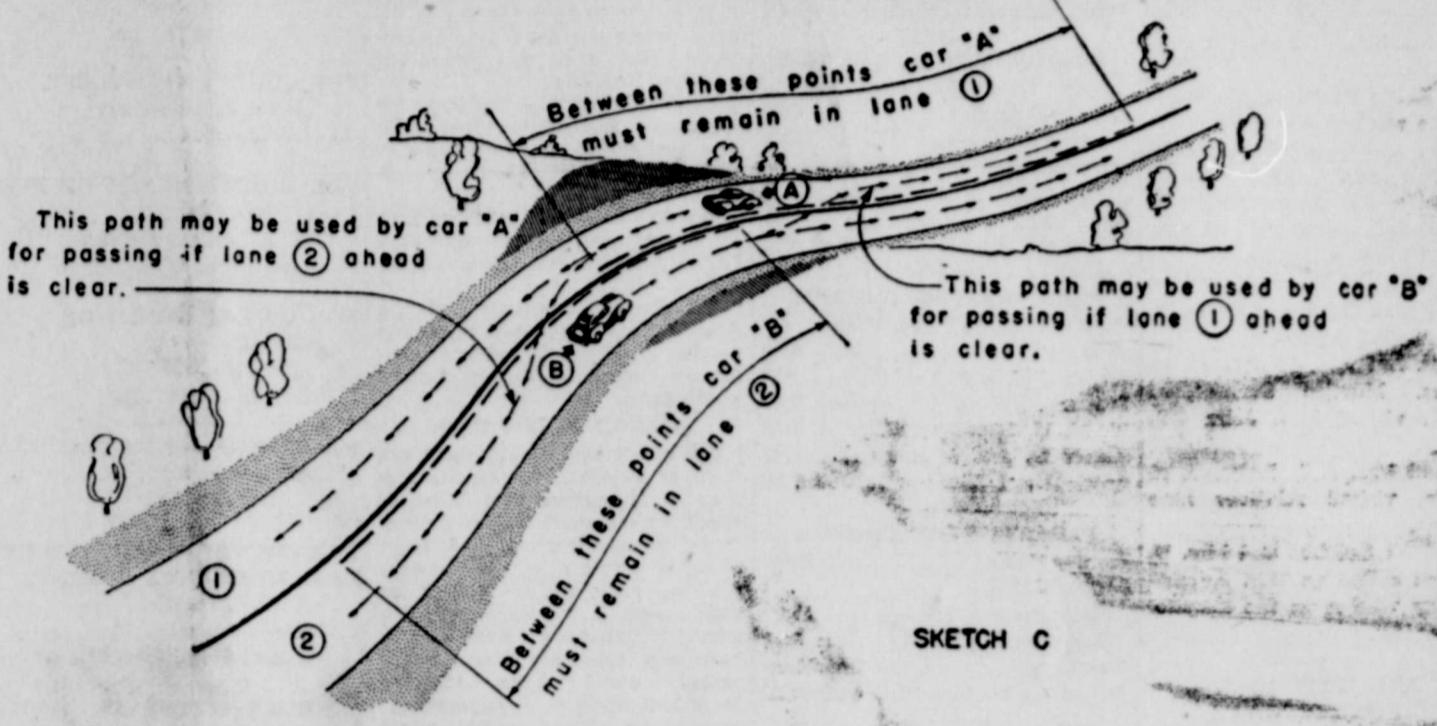

C. G. McEwen Carried to Veterans Hospital at Fort Worth

C. G. McEwen, who has been ill for sometime, was carried to a Veterans Hospital at Fort Worth Tuesday by Haskell Jackson and Shafe Weaver, where he will receive medical treatment. He is the son of Mrs. C. B. Young.

Jeanne Dudley Journalism Graduate From Tech May 22

Miss Jeanne Dudley, daughter of Mr. and Mrs. Milton Dudley, of Silverton, is among the list of spring graduates in Journalism from Texas Technological College. Miss Dudley's college minor is English. Graduation date is May 22, 1950.

Barrier Lines For No-passing Zones Should Be Observed at all Points

Take a look at the broken or dashed line in the sketches shown below and then look again. This is a barrier line for a no-passing zone, and it can be readily recognized on the road because it is yellow paint covered with thousands of small glass beads that reflect light from car headlights at night to make the strip more visible.

This is a companion line for the center line on two lane roads and lane lines on three lane roads at points where you do not have a clear view of the road ahead for a distance of at least 1,000 feet, and there are some 23,000 miles of highways on the State Highway System on which such points are marked. The broken yellow barrier line is one of the big guns fired by the Highway Department in the battle for traffic safety. The Highway Commission recently provided ammunition in the form of a \$500,000 appropriation for highway pavement markings during the year 1950.

What does the broken yellow barrier line mean? It means that you are violating the law when you cross a barrier line that is on your side of the center line, and you are subject to arrest and fine if you are caught. Even if you are not caught, it means that you are inviting a chance to shake hands with death.

Remember that it takes about 2,400 feet or six and one-half blocks for you to pass a car traveling 50 m. p. h. when you are traveling 60 m. p. h. and there is a car in the opposite lane traveling toward you at 60 m. p. h. When the dashed line is in your lane you cannot see the roadway ahead for more than 1,000 feet, or three blocks, and blind flying is hazardous.

Last year's toll from violations of the broken barrier line was 22 dead, 109 injured, and \$689,350 in economic loss. The accidents that resulted in this toll of deaths, injuries, and property damage cannot be justified on the basis of a mistake in judgment on the part of motorists—they were violations of the law: violations in which the innocent as well as the guilty paid the price.

Don't let your impatience get the better of you and try to pass when there is a broken yellow barrier line in your lane unless directed to do so by an officer, for you are not only endangering your own life but that of an innocent motorist as well.

Mrs. C. F. Joiner Has Eye Operation at Corpus Christi Mrs. C. F. Joiner went to Corpus Christi last week and had a serious eye operation soon after arriving there. Last reports received by her daughter, Mrs. Alvin Redin, are that the operation was successful. Mrs. Joiner is doing as well as could be expected. Her present address is 1654 Fifth Street, Corpus Christi, Texas.

'TEAMED FOR DEFENSE' The first Armed Forces Day in American history, to be observed May 20, will emphasize the unification of the Army, Navy and Air Force in a three-pronged instrument for national security. Unification Force is already at work in the various far-flung American military posts throughout the world. Photo, left, shows Navy aviation machinist's mate, second class, J. Ritchy, of Swayzee, Ind., and Sgt. J. L. Kunsman, USA, of Easton, Penna., getting acquainted on police duty at the Naval Base, Norfolk, Va., before embarking on the great combined Army-Navy-Air Force exercises in Puerto Rico, called "Operation Portrex," held in February. Photo, right, Capt. D. G. Donaho, Commanding Officer of the Naval Operating Base, Argentina, Newfoundland, congratulating Sgt. Ollie Keller, captain of the Greenland Air Force basketball team, which was picked to represent the Air Force North Atlantic Area in the Military Transport Service Tourney held at Great Falls, Mont., in March, while Col. Edward P. Kern, Commanding Officer of the McAndrew AF Base, in Newfoundland, gives a well done to Robert E. Johnson, aviation machinist's mate, captain of the Navy NOB quintet. The Navy team defeated the Air Force in the Base Command Basketball Championship Playoffs, but participated only for the honors. (Official Navy Photographs)

Many Problems Barring Rocket Space Journeys

CHICAGO, ILL.—There's no hurry about planning that inter-space rocket flight, folks. There's a lot of kinks to be ironed out in the transportation angle first. At least that's the conclusion of four German rocket experts, now with the American armed forces. They point out that solar radiation, weightlessness and meteors are some of the major obstacles that must be overcome before man can rocket out into inter-stellar space.

They discussed the problems for physicians and military personnel at a symposium space medicine at the University of Illinois professional colleges.

The air force set up a department of space medicine at Randolph field, Texas, at the close of the war.

The German scientists and two American rocket experts gave this version of how a passenger, zooming out beyond the pull of gravity, would fare:

450,000 Miles Per Hour

The space ship would shoot upward at 450,000 miles an hour. A man could survive that burst of speed for the short time necessary to get the rocket into motion. However, a person's nervous system does not react quickly enough for such speed. In the two-tenths of a second required for a passenger to have any conscious reaction, the rocket would have traveled 25 miles. Electronic engineering, possibly by remote control, might be a solution.

The rocket would streak through the atmosphere so fast its metal skin would heat 1,112 degrees fahrenheit. Then, out in space, the real trouble would start.

One peril would be meteors that normally burn themselves out when they pass through the earth's atmosphere. Even a tiny meteor, slightly larger than a BB pellet, could plow through the ship, knocking out its cabin pressure. A large meteor would demolish the rocket.

Passengers Weightless

The passengers would undergo an experience no one has even known. They would be weightless. The air around them would be weightless. Without some ventilation system, a warm cloud soon would surround their bodies. Their own breath would be a problem. It would remain out in space in front of them. Any body sweat would create a fog in their compartment.

They would experience strange discomforts. Their hair, having no weight, would stand up. Their clothes would bag oddly. Solar X-rays from the sun would be another major danger. These X-rays probably would pass through the metal skin of the rocket. If the walls were lined with thin plates of lead to keep the X-rays out, this in itself would cause another radiation danger. Cosmic particles striking these lead plates would create deadly ray showers.

Dr. Wernher Von Braun, a V-2 rocket expert, said rocket fuel now is no problem. He said a three stage rocket 200 feet high and 60 feet in diameter probably could do the job. Such a rocket, he said, probably could be landed with retractable wings and tricycle landing gear.

Hindu Houdini Remains Buried for 87 Hours

BOMBAY.—Huge crowds saw a 45-year-old yogi, Swami Ramdasji, dug out alive from an "airtight" cement crypt where he had been "buried" for 87 hours on a bed of nails.

To make things even tougher, the little man with the big black beard had been "completely submerged" in water until his release after three and one-half days in the coffin-like niche. Ramdasji climbed into the wooden coffin. He lay on a bed of nails—just like you see in the magazine cartoons—and the sides of the coffin also had nails jutting into his flesh.

The coffin was then sealed inside an eight-by-eight-by-six-foot cement crypt. Ramdasji's disciples then sat by the crypt day and night chanting Hindu vedic prayers while keeping a sacred fire burning. On top of the crypt they placed coconuts and flowers.

Then they bored a small hole into the crypt. But it didn't help the yogi man. Into the hole they pushed a hose from a near-by hydrant and immersed the air-starved Hindu in water.

Many of the thousands of people who rose before dawn to make sure of a ringside seat at the disinterment obviously believed the Swami had bitten off more than he could chew this time.

They watched tensely as his followers hacked the cement away with picks. Then they crawled down to the coffin with blankets. They lifted Ramdasji, still in a Yogi trance and dripping wet, onto a dais where all could see him.

They slowly massaged his head, arms and body until he opened his eyes, looked slowly around—and smiled.

Doctors pronounced him all right.

POLITICAL COLUMN

Subject to the action of the Democratic Primaries the Briscoe County News has been authorized to announce the following candidates for the offices set above their names:

FOR SHERIFF AND TAX ASSESSOR AND COLLECTOR:

Raymond K. Grewe
Frank Gillespie
Glynn Morrison
W. R. (Bill) Hardin

FOR COUNTY AND DISTRICT CLERK:

Dee McWilliams.
(Re-Election)

FOR COUNTY TREASURER:

Annie J. Stevenson
(Re-Election)

FOR COMMISSIONER OF PRECINCT NO. ONE:

H. A. (Dick) Bomar.
(Re-Election)

FOR COMMISSIONER OF PRECINCT NO. 3:

Alton Steele
Fulton Gregg

FOR COMMISSIONER PRECINCT NUMBER FOUR:

Milton Dudley

FOR COUNTY JUDGE AND EX-OFFICIO COUNTY SUTP.

J. W. Lyon, Jr.
(Re-Election)
Robert Hamilton

DISTRICT ATTORNEY 110th JUDICIAL DISTRICT OF TEXAS:

John B. Stapleton

FOR STATE REPRESENTATIVE OF THE 120th REPRESENTATIVE DISTRICT OF TEXAS:

Harold M. LaFont
(Re-Election)

FOR CONGRESS 18th CONGRESSIONAL DISTRICT

May 6th Special Election
LeRoy LaMaster

FOR COUNTY ATTORNEY:

C. D. Wright

Road Bond Election Ordered By Court May 27

NOTICE OF ROAD BOND ELECTION

The State of Texas, County of Briscoe.

To the resident qualified electors of Road District No. 7, of Briscoe County, Texas, who own taxable property in said district, and who have duly rendered the same for taxation:

TAKE NOTICE that an election will be held on the 27th day of May, 1950, within Road District No. 7 of Briscoe County, Texas, to determine if said Road District shall issue bonds and if an annual ad valorem tax shall be levied annually on all taxable property within said Road District, sufficient to pay the annual interest and provide a sinking fund to pay the bonds at maturity, in pursuance of an Election Order made and entered by the Commissioners' Court of Briscoe County, Texas, on the 24th day of April, 1950, and which order is in words and figures as follows to-wit:

ORDER FOR ROAD BOND ELECTION

The State of Texas, County of Briscoe.

ON THIS the 24th day of April, 1950, the Commissioners' Court of Briscoe County, Texas, convened in special session at the regular meeting place in the Courthouse at Silverton, Texas, with the following members of said Court being present and in attendance, to-wit:

J. W. Lyon, Jr., County Judge, Presiding; and H. A. Bomar, Commissioner Precinct No. 1; B. K. Hamilton, Commissioner, Precinct No. 2; Alton Steele, Commissioner, Precinct No. 3; O. M. Dudley, Commissioner, Precinct No. 4; and the following absent: NONE, constituting a quorum; and passed the following order:

ON THIS the 24th day of April, 1950, came on to be heard the petition of more than fifty (50) of the resident taxing voters of Road District No. 7, of Briscoe County, Texas, the said petition having been set down for hearing on this date by an order of the Commissioners' Court of said County, entered on the 3rd day of April, 1950, and

WHEREAS, at the time and place set for said hearing the matter came on for hearing and consideration, and it appearing to the Court that due and legal notice of the date and place of said hearing has been given in the manner and for the length of time required by law, the Court proceeded to hear all evidence offered for and against said petition, and it appearing to the Court that the said petition is signed by more than fifty of the resident property taxing voters of said Road District No. 7, who own taxable property in said District and who have duly rendered the same for taxation; and

IT FURTHER APPEARING to the Court that the proposed improvements would be for the benefit of all taxable property situated within said Road District No. 7, of Briscoe County, Texas; and The said petition prays that an election be held within said Road District No. 7, of Briscoe County, Texas, to determine the following proposition:

"WHETHER OR NOT the bonds of the said Briscoe County, Texas, Road District No. 7, shall be issued in the amount of \$16,000, bearing interest at a rate of not to exceed 4 1-2% per annum, payable semi-annually, and maturing at such time as may be fixed by the Commissioners' Court, serially or otherwise, in not to exceed twenty (20) years from the date thereof, in conformity with the Constitution and laws of the State of Texas, particularly Section 52 of Article 3 of the Constitution, and Chapter 16, Acts 1926, First Called Session, as amended, for the purpose of the construction, maintenance and operation of macadamized, graveled or paved roads and turnpikes or in aid thereof throughout Briscoe County Road District No. 7, and whether or not taxes shall be levied annually on all taxable property in said Road District sufficient to pay the annual interest and provide a sinking fund sufficient to pay the bonds at their maturity."

AND IT FURTHER APPEARING that if voted and issued, the proceeds of said bonds will be applied to the construction, maintenance and operation of the following roads:

(a) Beginning at a point on State Highway 207 at the Southwest corner of the town section of Silverton;

Thence East approximately one and one half miles to the cemetery gate;

(b) Beginning at a point on Main Street in Silverton, Texas, said point being at the intersection on the south edge of Blocks Nos. 62 and 63;

Thence South on Main Street to the edge of the town section.

AND IT FURTHER APPEARING to the Court that said Road District No. 7 of Briscoe County, Texas, has been duly and legally established by order of the Commissioners' Court of Briscoe County, Texas, passed on the 12th day of May, 1921, recorded in Volume 2, pages 618-620, of the Minutes of the Commissioners' Court of said County; and

IT FURTHER APPEARING to the Court that said petition is in all things regular and that the proposed bond issue of SIXTEEN THOUSAND DOLLARS (\$16,000) does not exceed the constitutional limitation of one-fourth of the assessed valuation of the real property of said Road District No. 7 of Briscoe County, Texas; and

IT FURTHER APPEARING to the Court that no money derived from the proposed issue of bonds is to be expended on the construction of any designated State Highway;

IT IS THEREFORE considered, ordered, adjudged and decreed, and the Court does now so order, consider, adjudge and decree that the said petition be granted and that an election be held within and for said Road District No. 7, of Briscoe County, Texas, on the 27th day of May, 1950, which is not less than thirty (30) days from the date of this order to determine the following proposition:

"WHETHER OR NOT the bonds of the said Briscoe County, Texas, Road District No. 7, shall be issued in the amount of \$16,000, bearing interest at a rate of not to exceed 4 1-2% per annum, payable semi-annually, and maturing at such time as may be fixed by the Commissioners' Court, serially or otherwise, in not to exceed twenty (20) years from the date thereof, in conformity with the Constitution and laws of the State of Texas, particularly Section 52 of Article 3 of the Constitution, and Chapter 16, Acts 1926, First Called Session as amended, for the purpose of the construction, maintenance and operation of macadamized graveled or paved roads and turnpikes or in aid thereof throughout Briscoe County Road District No. 7, and whether or not taxes shall be levied annually on all taxable property in said Road District sufficient to pay the annual interest on said bonds and provide a sinking fund sufficient to pay the bonds at their maturity."

IT IS FURTHER ORDERED that if voted and issued the proceeds of said bonds will be applied to the construction, maintenance and operation of the following roads:

(a) Beginning at a point on State Highway 207 at the Southwest corner of the town section of Silverton;

Thence East approximately one and one half miles to the cemetery gate;

(b) Beginning at a point on Main Street in Silverton, Texas, said point being at the intersection on the south edge of Blocks Nos. 62 and 63;

Thence South on Main Street to the edge of the town section.

The said election shall be held under the provisions of Chapter 16, General Laws of the State of Texas, passed by the 39th Legislature at the First Called Session thereof.

All persons who are legally qualified voters of this State and of this County, and who are resident property taxing voters within said Road District No. 7 of Briscoe County, Texas, who own taxable property within said District and who have duly rendered the same for taxation, shall be entitled to vote at said election.

IT IS FURTHER ORDERED that the ballots for said election shall be prepared in sufficient number and in conformity with House Bill Number 357, passed by the Fifty-first Legislature in 1949, and that printed on such ballots shall appear the following:

"FOR the issuance of the bonds and the levying of the tax in payment thereof"

"AGAINST the issuance of the bonds and the levying of the tax in payment thereof"

EACH VOTER shall mark out with black ink or black pencil one of the above expressions, thus leaving the other as indicating his or her vote.

THE POLLING PLACES and the officers for said election shall be, respectively, as follows:

Voting Precinct Number One. Polling Place, Briscoe County Courthouse (County Judges Office). Election Officers: J. W. Monroe, Presiding Judge; Mrs. Florence Ferguson, Judge; R. L. O. Riddell, Clerk; Mrs. Georgia Allard, Clerk.

Voting Precinct Number 3. Polling Place, Rock Creek (at Church of Christ Bldg.) Election Officers: J. Lee Francis, Presiding Judge; Edwin Crass, Judge; U. D. Brown, Clerk; Lowell Calloway, Clerk.

Voting Precinct Number 7. Polling Place, Briscoe County

Map Shows Early-day Census of Panhandle Counties

Story by Jerry Malin

In 1880, the federal census showed there were 1,607 persons living in the 26 counties now generally designated as the Panhandle of Texas.

The above map shows how these 1,607 persons were distributed over the Panhandle. It was drawn by Ernest Archambeau, Amarillo insurance man whose hobby is historical research.

The map was processed for publication by Jerry Malin, writer of the Amarillo Daily News column, Panhandle People.

Malin picked out the following as some of the most interesting highlights shown by Archambeau's research:

The four persons living in Swisher County listed "mustang hunting" as their occupation.

In Hutchinson County one man named his chief occupation "re-cuperating health."

In the Fort Elliott list a soldier was listed as having no occupation and under "remarks" was written, "Insane."

Among the odd occupations was "adolf maker," and Malin has been trying for months to find out what that means.

A brick mason noted his occupation and their added, "Unemployed for one year."

Not a single person listed his occupation as "Cowboy," but there were hundreds who named "herd-

ing cattle" as their occupation. There was one miner, and several "gamblers."

Out of the entire population there was only one teacher, A. F. McKenzie of Hemphill County.

The only doctor in the Panhandle, according to the census rolls, was S. M. Cummings who lived in Tascosa. Of course, the army had some doctors at Fort Elliott, but all the military personnel were listed as "soldiers."

Only 31 children were listed as attending school "during the past 12 months."

There were three lawyers, all living in Mobeetie.

The nearest railroad shipping point was at Dodge City, Kansas. During that year of 1880 the Panhandle was new land, and new

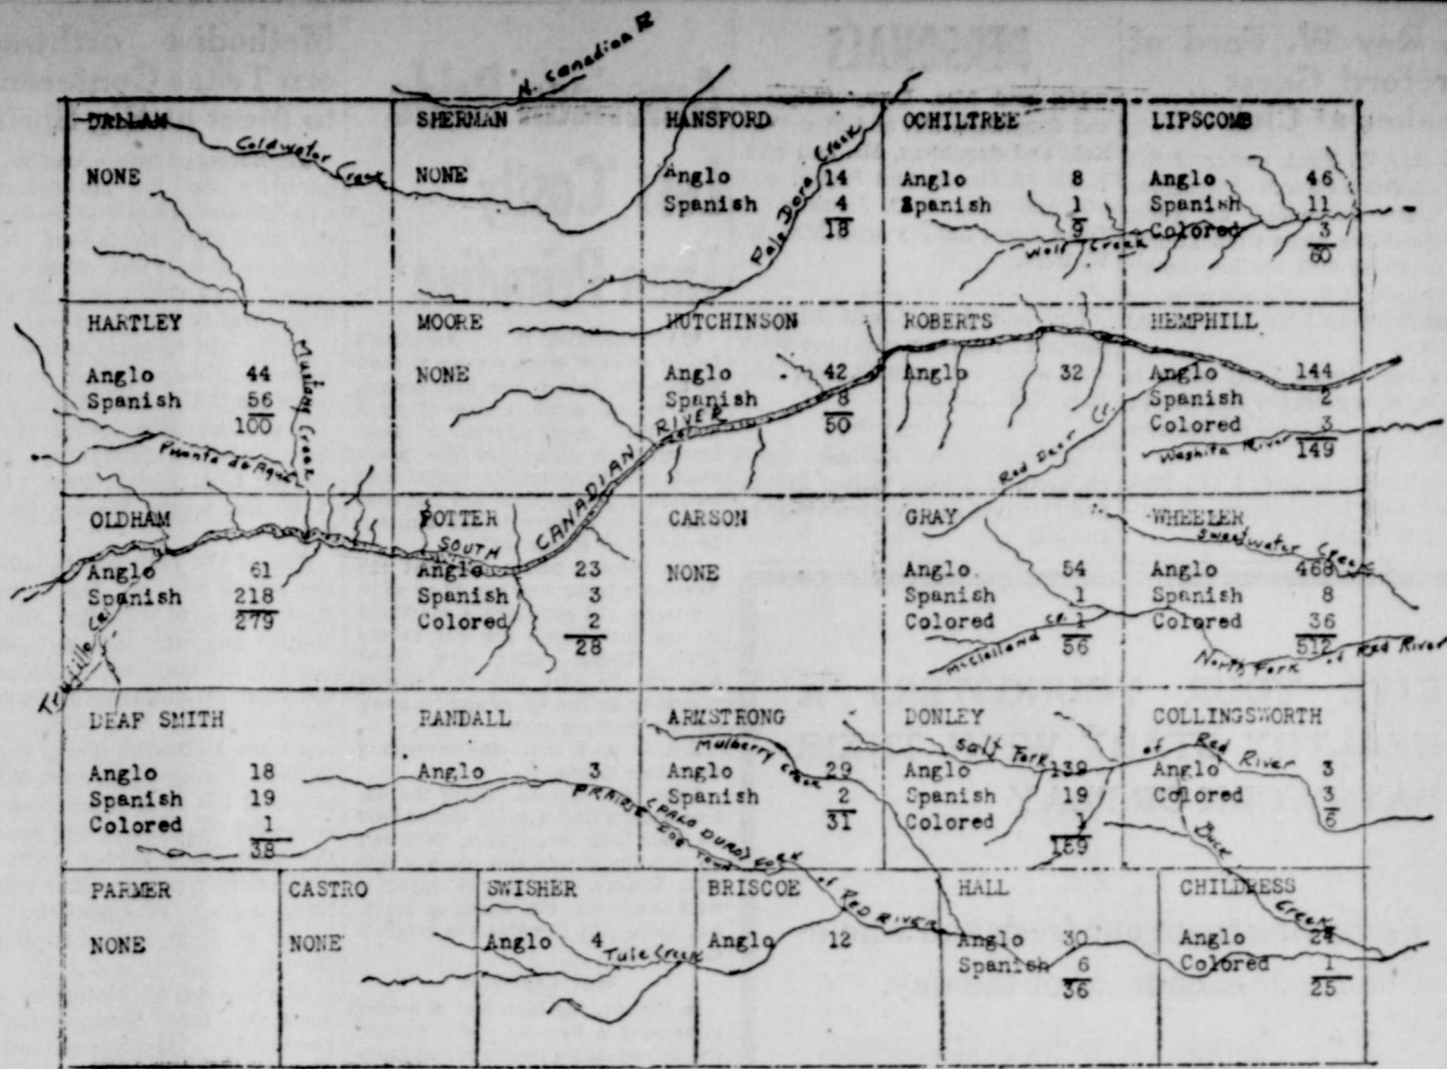

people came trekking in chiefly from the midwest, Colorado and Western states. Only a small percentage came from other Southern states.

There were no public roads, no public schools, and law enforcement was primarily a local matter.

Wheeler County, as may be seen on the map, had the largest population. However, out of the 512 listed as living in Wheeler County, 296 were soldiers stationed at Fort Elliott.

By races, 1,198 were Anglo, 358 were Spanish and 51 were negro.

Since 1880 was 70 years ago, there are some persons still living who were enumerated then. Malin is interested in knowing the name

ing cattle" as their occupation. There was one miner, and several "gamblers."

By races, 1,198 were Anglo, 358 were Spanish and 51 were negro.

Since 1880 was 70 years ago, there are some persons still living who were enumerated then. Malin is interested in knowing the name

of anyone now living in the Panhandle who was listed on the first census rolls in 1880.

In contrast to the horde of census enumerators employed this year to take the 1950 census there were only seven employed in 1880.

Take a look at the map, a good look. You'll notice the population centers were near running water. That is significant. It tells us today that making a life in the Panhandle in those days was mostly a matter of survival.

What a far cry for those of us living in the Panhandle today! While we perhaps can't begin to really understand the hardships, the heartaches and the struggles of the pioneers, we can at least look about us and ask, "Why is

the Panhandle a great and wonderful place to live in today?"

The physical aspects of the country are the same now as they were in 1880. The credit for our prosperity today must go to the pioneers, to that hardy and rugged band of 1,607 souls who fought loneliness and odds with a spirit we could well do to revive today in our comparatively easy security in order to leave the coming generations as a great heritage as the pioneers of 1880 left to us.

Mr. and Mrs. Ed Edgington, of Little Rock, Arkansas, visited several days last week with Mrs. Edgington's brother, Mr. and Mrs. H. C. Seefeldt.

Dr. Roy W. Ford of Hereford Guest Speaker at Club

Dr. Roy W. Ford, pastor of the First Christian Church of Hereford has been announced as guest speaker at the Lions Club Thursday night at 8:45 at the church auditorium. Others appearing on the program will be local mixed quartette.

The Boy Scouts local troupe is working on a program that will be presented at the club in the near future.

If you plan to attend call Mrs. Seaney who is in charge of preparing the food.

PERSONALS

Mr. and Mrs. Leroy Shipman and daughters, Mr. and Mrs. Paul Reid and daughters, Mr. and Mrs. P. H. McKinney and Peggy, and Mr. and Mrs. J. C. Johnson, of Tulia, spent Sunday with Mrs. W. W. Reid.

Mr. and Mrs. Lavell Blassingame of Plainview, spent the week end with her parents, Mr. and Mrs. Dee Garvin.

Mrs. Herman Robinson and children, of Borger, visited friends and relatives in Silvertown over the week end.

American Bride Less 'Costly' Than Primitive

WASHINGTON, D. C.—America's lovely women may set up a howl at this, but it's a fact that American brides come cheap—original cost, that is—compared to their less-civilized sisters of the grass skirt sets in primitive lands. And no less a source than the National Geographic Society is the authority for that statement.

The society points out that the American lover who has \$2 or so in his jeans can purchase a marriage license and hustle his gal to the altar. There, after the usual pledges, he can slip the parson whatever he can spare and be away on his honeymoon.

But it isn't that simple among primitive tribes.

Take New Guinea. There the native swains find a price tag of \$600 on their lady loves. True, they can go into the woods and pluck a few wild flowers and maybe spear a wild boar for the wedding feast, but there still remains the original cash outlay.

May Cost \$250

In Nigeria, the high cost of brides is causing a fine old-to-do. Among the Ibo-speaking people of that country, a shapely, pretty gal may win for her pappy as much as \$250, while the parents of a homely girl with skinny pipes and buck teeth would have to be satisfied with three mangy goats.

Around the world where bride-buying is an accepted custom, a girl must hide her head in shame unless she earns something for papa.

Among the Kaffirs, members of the Bantu race of South Africa, a girl who is not bought with cattle is dubbed an "old cat" by her campfire sisters. An "old cat" down there adds up to one word—"worthless."

With the Kuki-Lushai people of Assam, India, a young man is expected to give a few gourds of fire-water to his sweetheart's parents when he calls to ask her to be his own.

Groom Goes to Work

If the folks accept him, he moves in on the girl's father and goes right to work. He becomes a servant in the household for three years. Then, if he has behaved, he is free to wed. But another two years of servitude is required before he can go into the woods and cut down the material for his own thatch hut.

In Alaska, the situation is different. A hopeful suitor of the Kenai doesn't bother to ask for parental consent. He slips silently into the old man's igloo and begins to cook, clean and take care of steaming up water for the baths. If he does a good job, he is allowed to work on for a year, then he can marry the girl and start igloo inhabiting on his own.

All of which makes America a wonderful country.

We fellows expect, by tradition, to have the papa-in-law foot all of the bills for the wedding, give us a set of sterling and maybe a new house for a wedding present.

Alienation of Affections Wrong, Even in Dog Case

NEWPORT NEWS, VA.—Alienation of affections, even when it's only puppy love, won't be tolerated here, the court said.

That was the ruling of Police Judge John Massey when he found himself confronted with a new version of the old "eternal triangle."

The defendant, Lee Miller, was charged with cursing and abusing. His accuser was Thessalonia Smith. Miller denied any back room language. Instead, he charged that Smith had petted and fed his dog so much that he just didn't like it and told Smith so.

The judge observed: "It looks like the main charge should be alienation of affections of a dog, and I've never heard of it before."

Then he ordered: Miller to pay a \$10 fine for incorrect language.

Smith to ignore Miller's pup's advances and, above all, to stop feeding it.

Heroism Held Inherent in Entire Human Race

PITTSBURGH.—According to a declaration by a hero-recognizing agency, which preferred to remain anonymous, heroism is an "inherent trait in the human race."

It was contended that "heroism is prompted by what happens on the spur of the moment and what the man has in him."

But the basic characteristic of human nature itself is to try to help. Therefore a great percentage of people would respond to the situation and try to be helpful. It's an inherent quality of a human being.

"Station in life doesn't have much bearing on heroes. They come from all walks of life, the poor, rich, and middle class. We have no heroes under the age of 9—a child doesn't distinguish between danger and nondanger. After that heroes can be any age. Heroism frequently is almost a reflex action."

Methodist Northwest-Texas Conference to Meet at Big Spring

Big Spring, Texas—Around 350 ministers and 250 lay delegates will convene in the 41st session of the Methodist Northwest Texas Conference at First church, Big Spring, at 10 o'clock May 24. Park Place, Wesley Memorial and First churches will be hosts to the Conference. Bishop William C. Martin of the Dallas-Fort Worth Area, will preside. Big Spring pastors are Alsie H. Carleton, First church; I. A. Smith, Park Place; C. C. Hardaway, Wesley Memorial.

One of the high points will be the appearance of the Circuit Riders' Quartet with Rev. Roy L. Smith, one of the publishing agents, on May 26, celebrating 160 years of Methodist Publishing House history. The Riders will represent Methodist pioneers clad in 18th century style. Dr. Smith is one of the most popular speakers in the church and will address the Conference Friday night.

The Conference preacher will be Rev. Robert E. Goodrich, Jr., pastor of First Methodist church, Dallas.

Ex-students of Methodist colleges will have their customary banquets—McMurray college, Thursday evening; Texas Wesleyan, Friday morning; Southern Methodist university, Friday evening.

Purpose of the Conference will be achieved in the informational and inspirational features, in reviewing the results of the past year's work and in projecting plans for the coming year, including the reading of the appointments of ministers to their charges on Sunday afternoon, May 28.

Groundwork for the business of the Conference was laid at a meeting of Bishop Martin and the district superintendents with board and committee leaders at Plainview May 8.

Assisting Bishop Martin in the direction of the Conference will be the cabinet composed of nine district superintendents: H. C. Smith, Abilene; E. D. Landreth, Amarillo; W. E. Hamilton, Clarendon; J. O. Haymes, Lubbock; R. L. Kirk, Perryton; Marvin L. Boyd, Plainview; J. H. Crawford, Stamford; O. P. Clark, Sweetwater; T. M. Johnston, Vernon. The six-year term of Landreth will expire and Bishop Martin will appoint a new superintendent to the Amarillo district.

Persons who will attend the Conference session from Silvertown include Rev. and Mrs. Grady Adcock, and Mr. Arnold Turner.

"Mr. Cavalier" Visited Silvertop Monday

"Mr. Cavalier," dressed in original costume, paraded through our city Monday in his musical car, heading a procession of automobiles, bearing Cavalier banners, featuring R. J. Reynolds Tobacco Company's new extremely mild king-size Cavalier Cigarettes.

After the parade, "Mr. Cavalier" visited with the crowds in the downtown stores, passing out complimentary Cavalier cigarettes.

Tall, dashing and handsome, young "Mr. Cavalier" created quite a sensation, especially among the fair sex.

Cavaliers are now on sale in stores all over town.

HOUSEHOLD MEMOS... by Lynn Chambers

Serve Flavorful Breads for Winning Meals
(See Recipes Below)

Flavorful Breads
FRAGRANT YEAST BREADS and quickly made hot breads are positive guarantees that no menu can get into the doldrums. They can lift ordinary breakfasts to glorious heights; with salads or as sandwiches, they can spur luncheons to the winning menu class; and, for dinners or suppers, they can provide that extra touch that makes the meal perfection. If you have the time to spare, make a light yeast raised dough and spice it with cinnamon or nuts. When time is scarce, put together a quick, baking powder bread and serve with a flourish.

WHEN EITHER TYPE of bread contains fruit, it will keep moist and fresh for several days. If you plan to use it for sandwiches, that's the kind to choose. When you want to serve and eat most of the bread immediately, choose the other varieties.

Date Filled Coffee Cake
(Makes 1 cake, 8x8 inches)
Filling:
1/2 cup brown sugar
1 tablespoon flour
1 tablespoon cinnamon
1/2 cup melted butter
1/2 cup chopped walnut meats
1/2 cup chopped dates
Combine ingredients and mix well.

Batter:
1/2 cup shortening
1/2 cup sugar
1/2 teaspoon vanilla flavoring
1 egg
1 1/2 cups flour
1 1/2 teaspoons baking powder
1/2 teaspoon salt
1/2 cup ready-to-eat bran
1/2 cup milk

Blend shortening, sugar and vanilla. Add egg and beat well. Add sifted dry ingredients and bran alternately with milk. Pour half of batter in greased eight-inch square pan. Cover with date filling, reserving 1/4 cup for topping. Spread rest of batter over filling. Sprinkle remaining filling over top. Bake in preheated moderate oven (350°) about 45 minutes.

***Cinnamon Nut Loaf**
(Makes 1 loaf and 6 2-inch muffins)
1 package yeast, compressed or dry
1/2 cup lukewarm water
1 cup milk
1/2 cup sugar
1 teaspoon salt
1/2 cup melted shortening
3 1/2 cups sifted enriched flour
2 eggs
1/2 teaspoon vanilla extract

Soften yeast in lukewarm water. Scald milk. Add sugar, salt and shortening. Cool to lukewarm. Add eggs. Beat well. Add softened yeast. Mix well. Add more flour to make a stiff batter. Add vanilla extract. Beat thoroughly until smooth. Cover and let rise until bubbly (about one hour). Stir down and spread a thin layer of batter into loaf pan. Sprinkle 1/2 of Cinnamon-Sugar Nut Filling over bat-

Spicy Lemon Nut Bread
(Makes 1 loaf)
3 cups sifted enriched flour
4 1/2 teaspoons baking powder
1/2 teaspoon soda
1 1/2 teaspoons nutmeg
1/2 cup sugar
1/2 cup chopped nuts
1 egg, beaten
1 medium-sized lemon
1 cup milk
3 tablespoons melted shortening

Sift together flour, baking powder, soda, salt, nutmeg and sugar. Add nuts and mix well. Combine eggs, milk and shortening. Cut lemon in fourths, remove seeds, and put lemon through food grinder. Add to egg and milk mixture. Add to flour mixture and stir until flour is moistened. Spread in greased paper-lined loaf pan. Bake in moderate oven (350°) 1 1/4 hours.

LYNN SAYS:
Make Better Yeast Breads
By Following these Rules
Leftover egg yolks may be used easily in yeast bread dough. Use two egg yolks with one tablespoon of water in place of one whole egg. If the kitchen is too cool to have the dough rise properly, place the dough in a closed cupboard next to a pan of warm water. To get a crisp crust on yeast breads and rolls, do not grease the dough before baking. Let cool uncovered.

People Safer Than Animals
Germ War, Doctor Says

If another war should come, America's herds and flocks might be easy targets for test-tube warfare, but the danger is not as great as armists have claimed.

This is the word from a man who directed some of the nation's wartime preparations for defending the livestock industry against possible germ warfare.

He is Dr. R. A. Kelsler, former chief of the Army Veterinary Corps and now dean of the School of Veterinary Medicine, University of Pennsylvania.

In an address before the New Jersey Veterinary Medical Society, Trenton, N. J., Dr. Kelsler declared that "there is no justification whatever for some of the predictions of vast potentialities and dire results inherent in biological warfare."

"On the other hand," he said, "an attitude of complete complacency and the assumption that nothing of consequence could be accomplished through biological warfare also could be a mistake."

If such warfare were waged, people would have a better chance of surviving it than animals in farm herds and flocks, he pointed out. The spread of an infectious disease on human beings usually is more or less limited to the family unit. Also, people can be alerted quickly to protect themselves against health threats.

Animals, however, ordinarily live in large herds, droves, or flocks, sharing the same grounds, quarters, and feed—with the result that infectious germs can spread rapidly among them and strike down large numbers at once.

"Moreover," Dr. Kelsler added, "getting contaminated or infected need to animals would offer less difficulty and less risk of detection than would be the case with man."

Farmers Urged to Guard
Against Livestock Poisons

Farm items that most people never think of as dangerous to animals are responsible for many cases of accidental livestock poisoning every year.

A veterinary medical bulletin lists poisonous plants, chemicals or seed treatment, polluted drinking water, fertilizers, insecticides, rat poisons, lead paint, cleaning and polishing agents, and certain medicine chest remedies as sources of stock poisoning.

With the exception of toxic plants, most of these items are not suspected when there are unexplained deaths in herds and flocks, the bulletin points out. Instead, owners are likely to blame commercial feeds or hostile neighbors when animals appear to have been poisoned.

In some cases, even an autopsy by a veterinarian does not reveal the exact cause of death, and a further search must be made. Feed troughs and floors should be examined, a search made for pills containing lead paint, and the entire farm grounds inspected for possible sources of poison.

The erroneous belief that hogs can eat "anything" and digest it explains many pig losses on farms throughout the nation, the bulletin states. If it were not for the fact that pigs easily vomit toxic agents, more of them would die of poisoning.

Farmers are urged to put a mental tag of "Poison" on all products not known to be safe and to be careful when using such products around livestock. This will help to prevent needless losses.

Rain by the Yard

Looking at long-time averages, Hawaii probably can claim about the wettest spot on the globe's dry land. On the seaward slope of its Mt. Waialeale, 42 feet of rainfall is recorded in an average year. But for vast spreading Hawaiian acres, where sugar cane and pineapple grow, irrigation is essential to the crops. The vapor-laden monsoon off the Bay of Bengal drowns forests of the mountains of Burma and Assam in rain that totals 30 feet a year at some points. Most of it falls in two summer months. In contrast, desert reaches on the several continents vie for "driest" honors with points where annual rainfall ranges from virtual zero to one inch.

Enameling New Woodwork

If new interior woodwork is to be enameled, the first step is to apply a liquid filler. After that should come one or two coats of enamel undercoater, tinted to approximate the finishing color desired. These should be followed by one or two coats of gloss or semi-gloss enamel. At least twenty-four hours drying time should be allowed between coats and any surface irregularities should be removed with sandpaper after each coating—except the last—has dried thoroughly.

Calf Pneumonia

Clean quarters free of drafts and a plentiful supply of dry bedding are essential to the control of calf pneumonia. It is also important that no healthy calf be placed in a pen vacated by a sick calf until the old bedding has been removed and the pen thoroughly cleaned and disinfected. Another worth while precaution is to raise calves in small groups, rather than to put them all together.

Tree Expert Gives Tips
On Spring Care of Trees

Spring is the time when most of the important types of tree care are administered.

Take out "hangers"—the dangling branches left by winter storms. Prune out dead or unsightly limbs. Branch space choice trees by selective thinning to thwart wind breakage. If a tree shaded the house too much last summer, have it properly pruned now. Remember that character pruning adds gracious touches to trees—bringing out their branching habits and lending harmony to your landscape.

If you have elms, be certain to prune out and burn all dead and diseased branches by May 1. This will destroy any overwintering bark beetles which may wing their way to healthy trees and transmit the dread Dutch elm disease.

Paint over cuts that have been made on trees after the wounds have dried. Use a standard wound dressing.

Early spring is the best time to adjust braces and cables and other tree supports. A few years of normal growth may cause a cable to become a drawback on the continued healthy progress of a tree.

Cut out fire blight cankers on apple, pear, flowering crab, hawthorn and mountain ash. Prune below the point of infection, using sterilized instruments. A Bordeaux spray at time of bloom of these trees is effective if combined with sanitary pruning to stamp out fire blight.

Prune out black knot of cherry and plum the same way.

If you haven't fed your trees, do so as soon as possible. And prepare to give them a delayed dormant spray just before the buds open. Trees are friends. Treat them well and care for them properly. They will repay you richly in companionship and beauty.

Teen-Age Workers Injured
More Often in Work Mishaps

Teen-age drivers have come in for their share of criticism, but how about teen-age workers?

Well, the National Safety Council says the picture isn't very rosy there, either.

The U. S. department of labor found that workers under 18 years of age are injured more frequently in industrial accidents in manufacturing plants than are workers 18 years of age or older, performing the same type of work.

Workers 18 or older had an average injury frequency rate of 15.7 (disabling injuries per 1,000,000 man-hours worked). But the rate for the younger workers was 22.9.

The frequency of permanently disabling injuries, such as finger amputations, was nearly twice as high for workers under 18 as for the older group.

The council says that the same characteristics of youth which give teen-agers a higher traffic accident rate apparently apply also to work habits—lack of experience, impulsiveness, daring, and the desire to show off.

Solve Felting Problem

Laundries have solved the felting problem by the installation of washers which gently squeeze soapy water through the fabric with squeeze rolls under little or no pressure. Or they may use a type of washing equipment that uses only a circulation of the soap solution through the fabric to do the washing. Another type of machine has a very slow-moving cylinder (about 8 to 10 revolutions per minute). Some plants employ no friction at all in the washing of wools. They use a machine with a cylinder divided into three pockets. The wool fabrics or blankets are merely dipped into the soap solution and then allowed to drain as the cylinder revolves.

Figure Slimmers

How you do your housework may make a great deal of difference in whether you keep the waistline down, according to William Shaw of Chicago. He suggests these techniques. When you pick up the children's toys, Sunday's newspapers, or the snippings of cloth in your sewing room—bend squarely from the waist with legs stiff and straight. Occasionally, squat with back vertical and head held erect. Keep the posture erect when you go up and down stairs. And when you use the vacuum cleaner on draperies and walls, give your midsection a good stretch. Move arms freely and easily and clear into the shoulders.

Rayon Output

In 1949, for the first time in 11 years, rayon production declined. Specifically, a decline of 12 per cent is reported—a total of 993,800,000 pounds, compared to 1,124,300,000 in 1948. Viscose high tenacity yarn was the only category of rayon produced in the U. S. showing an increase. A total of 289,000,000 pounds was purchased in 1949, compared with 263,100,000 pound. In 1948, a 10 per cent increase. Production of acetate filament yarn dropped 12 per cent; viscose-cupra textile filament yarn, 15 per cent; acetate staple, 23 per cent; and viscose staple, 30 per cent.

Water Bath Tests New Bodies

Newest test developed by Fisher Body is this "water bath" in which hundreds of gallons of water are shot at each body. An inspector rides inside the body through the test, searching for a possible leak. The rubber shroud covering the dash panel prevents water from entering holes there for the steering wheel, pedals and for the wiring.

Electric

it's the Best Way to cook

Clean, cool, fast, sure...
That's your electric range!
No easier, more pleasant way to cooking success than this gleaming, streamlined "master chef." Completely automatic... all you do is set the dial for broil, boil, bake, roast or fry... and leave the rest to low cost electricity! Constant, even heat... at selected temperature... will insure foods prepared perfectly. And you've no sooty pots and pans to scour, no "pot watching," no tooting hours in the kitchen! Saves time... energy, too!

Electric cooking is easy on your budget! Just a few cents a day will care for regular, extra... or elaborate meal preparation. Low cost, dependable electric service makes it so.

See the display of new electric ranges at your dealers. You'll echo the phrase... "it's the best way to cook!"
