Future Farmer to our Great Britain this Summer

Alton Brazell, Lubbock, Texas, has been selected to represent the Future Farmers of America in the British Isles this summer. Alton served as National Vice-President, State Vice-President, President of the Lubbock Future Farmers Alumni Association, and has recently been elected secretary of the State Future Farmers Alumni Association. He is an Anderson-Newton scholarship winner. He received the American Farmer award in October, 1948. At a banquet early in 1949, Alton was credited with having traveled more at his own expense to promote vocational agriculture than any other person in Texas during the past three years. He put a lot into the organization from his initiation as a Greenhand in 1943. This was confirmed once for all with the selection of Alton as National Vice-President representing the Southern Region in 1948-49. During this time he traveled a total of 162 days in the best of F. F. A., and traveled 20 miles. Alton left Chicago on June 12, for London. His plane will land in London. While there he will be guest of the National Federation of Young Farmers' Clubs of Great Britain. All of his expenses in London will be paid by the Future Farmers of America. While in London, his expenses will be paid by the host. He will go to Paris for a brief visit before the return trip, and will return by air from Paris on September 4, arriving in New York. The major purpose of this international exchange is to promote better understanding between the two countries.

Briscoe National Farm Loan Ass'n Hold Meeting

On Saturday, June 3, 1950 the Briscoe National Farm Loan Association held its annual stockholders meeting at the office of the association at Quitaque, Texas. There were 23 members and two visitors present.

Purpose of the meeting was to elect a board of directors, and officers of the association for the ensuing year. J. B. Bray was the only member of the board of directors whose term had not expired. Directors elected were Luke Lane of Turkey, Bill Edwards and Carrol Garrison of Silvertown, and J. A. Mayfield of Quitaque. The chartered territory of the Briscoe N. F. L. A. is all of Briscoe County and Precinct No. 4 of Hall County.

A report of the past years operations and the financial condition of the association was given by J. T. Persons, secretary-treasurer, who also stressed the need and responsibility of the members to advise their friends and neighbors of the advantages of, and purpose for which Federal Land Bank Loans may be made. The secretary-treasurer also pointed out to the stockholders that the National Farm Loan Associations of Texas owned the Federal Land Bank of Houston, that the FLB was not a government institution, the government has no money in the FLB, it is a cooperative lending agency, completely owned by the farmers and ranchers of Texas, who have FLB loans, and who receive dividends on their NFLA stock from the earnings of the association through the Federal Land Bank.

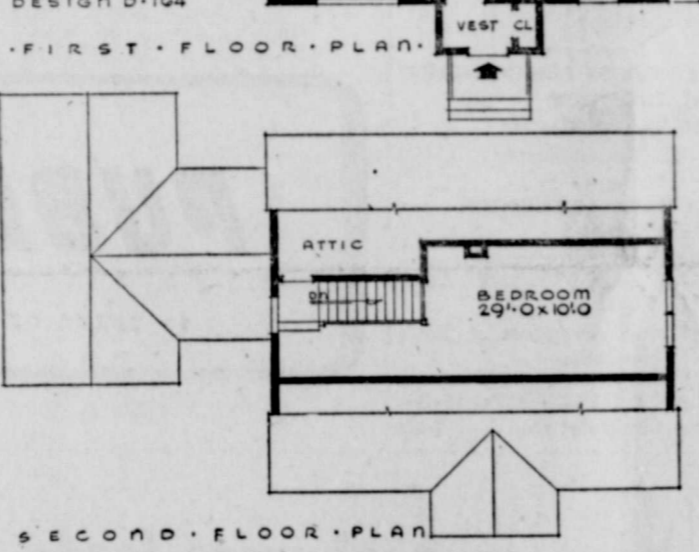

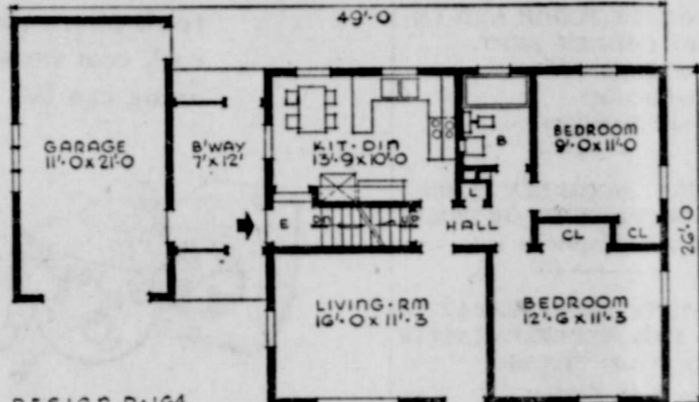

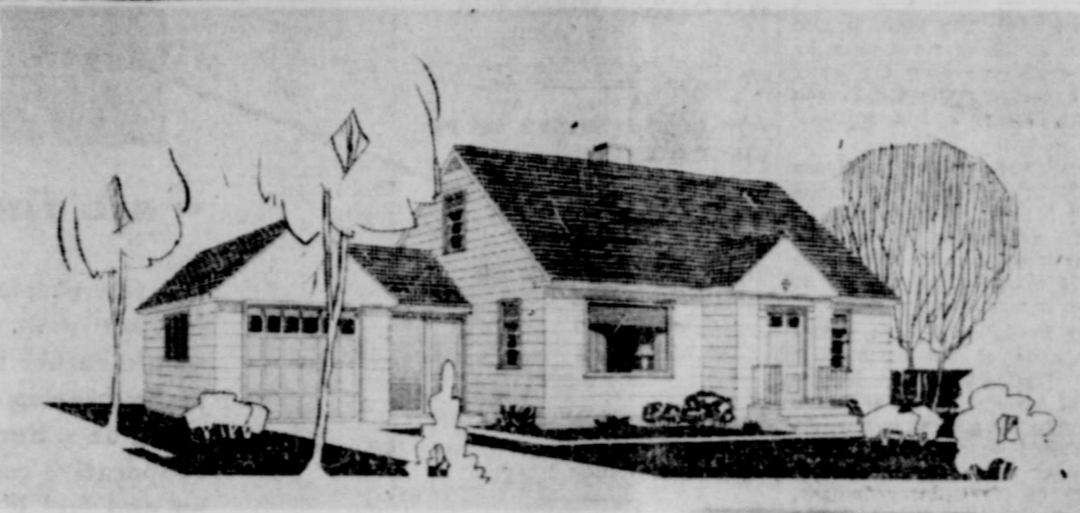

After a short question and answer session, and talk by Leo White, County Agent of Briscoe County, refreshments of ice cream and cake were served by Sue Barrett, secretary-treasurer, assisted by Lila Fern Jones.

Following adjournment of the stockholders meeting the board of directors met and elected the following officers: J. B. Bray was re-elected President; Bill Edwards was elected Vice President; J. T. Persons, Secretary-Treasurer, and Sue Barrett, Assistant Secretary-Treasurer.

Mr. and Mrs. F. C. Gatewood and daughter, Joy Ann, spent the week end in Lubbock visiting Mr. and Mrs. W. T. Davis and Mr. and Mrs. Verne Bearden.

New Texas Almanac at News office, \$1.00 each.

A HOME TO LIVE IN

DESIGN D-164. This small house is expandable to the extent that an additional dormitory room can be finished on the second floor whenever necessary, and the breezeway and garage can be left off and added at a later date. The first floor has two bedrooms, bathroom, living room and combination kitchen - dinette. Plumbing is concentrated with the laundry in the basement directly below the adjoining kitchen and bathroom. Kitchen cabinets line two walls. The counter is arranged in a U-shape with the sink in the center, the stove on the right and the refrigerator on the inside wall. Closets include a coat closet, linen in the hall and wardrobe closets in the bedrooms. Exterior finish is siding and asphalt shingles on frame construction. Dimensions are 30 feet by 26 feet. Floor area is 780 square feet and the cubage 17,160 cubic feet, not including garage. For further information on the type of construction see your local lumberman.

"Mrs. Mike" At Palace Theatre June 18 and 19

"Mrs. Mike" a great book becomes a greater picture, showing at the Palace Theatre Sunday and Monday, June 18 and 19.

Sergeant Dick Powell of the Canadian Northwest Mounted Police and Evelyn Keyes, comely miss from Boston, fall in love. She marries him despite his warnings that life will be tough in the sparsely populated, freezing northwest. As his wife she experiences the hazards of loneliness, fear and unexpected epidemics; imbibes wisdom and courage from the new friends she meets; and inner happiness in her role as the wife of a man whose work is so important. But when her infant daughter dies of diphtheria, Evelyn decides she cannot stand it any longer and plans to return to Boston. Powell does not try to stop her and has himself transferred to another post; but when he arrives, there is Evelyn—who has decided to stick it out.

Next week's program appears on page two.

Hay Making Time at Hand in Many Sections of the State

College Station.—Rains of the last few days over most sections of the state have generally been beneficial to the hay meadows and crops that are grown for hay.

E. A. Miller, extension agronomist of Texas A. and M. College, says farmers and stockmen should cut and store a plentiful supply of hay for it is tops among the roughage feeds.

He says there is a best time to cut every kind of hay and it varies with the crop to be harvested. If the hay crop is left too long before cutting, it becomes coarse and loses much of its feed value, especially the protein and vitamin A.

Sudan and johnsongrass should be cut as soon as the first seed heads begin to form, or even a little earlier to get the full feeding value of high quality, protein-rich hay. Cowpeas should be left until the first seed pods begin to ripen. Prairie grass, says Miller, can generally be left until time and labor are available for the haying operation, but it will lose quality if left too long.

Sweet clover should be cut for hay before the stems become tough and woody—before it blooms. He says it is important to leave a five or six inch stubble on the biennial sweet clover—so that they may sprout out again. Alfalfa should be cut for hay when the field is one-tenth to one-fourth in bloom or when the young shoots begin to show up at the base of the plants.

If the alfalfa is a new planting, Miller says, it is a good idea to let one cutting of the crop make seed or at least go to the full bloom stage before cutting. This will give the plants a chance to develop a stronger root system and thus increase the productive life of the field.

Allard Reunion June 17-18, Oakdale Park, Glen Rose, Texas

The Allards are moving in on Glen Rose, Texas, Saturday and Sunday, June 17 and 18, to honor the oldest members of the clan, namely Ed M. Allard, age 89, Fort Worth, Texas; Joe B. Allard, age 81, Cooper, Texas; and Walter Allard, age 79, of Silvertown, Texas.

The clan has met annually since 1940 in Oakdale Park to honor the oldest living members.

In the early 1840's a pioneer couple Aaron Allard and wife, Polly Weaver, with their eight children emigrated from Morgan County Missouri to what was then Hopkins County, Texas, and settled at the present town of Klondike. Bringing with them their cattle and slaves. Thus was started the Allard Clan of Texas.

It was here the mother died in 1850 and the father married again three years later to a widow with three children, a Mrs. Rhoda Alexander. The father passed away during the Civil War.

After a few years the younger generation hoping to better themselves emigrated to Erath, Johnson, Brown, Sterling, Briscoe and Potter Counties and to New Mexico, and helped pioneer this section.

Later on when the war between the states came these noble pioneers did their part to settle this conflict and some of them helped guard the frontier with the Texas Rangers. Several were in the noted Dove Creek Battle with the Indians (and one H. Allard the father of your townsman, Walter Allard, was shot in the hand by an Indian in this battle.) Walter and Dutch Allard are all the ones that are living from this family.

Today descendants of this pioneer couple are living all over the United States and each year meet in this colorful reunion.

The clan is so well organized they have elected a president, Austin Allard, of Ada, Oklahoma, and a secretary, Mrs. Lela Hurley, Walnut Springs, Texas. They wish to invite all members who live in Briscoe County to meet with them and help celebrate this occasion.

Walter Allard and sons, Roy, Clifford, Dean and Earl and daughter, Mabel, are members of our clan.

MRS. LELA HURLEY, Secretary of Allard Clan.

Parachuting Wave

LAKEHURST, N. J.—Roberta Clevenger, second WAVE to graduate from the parachute riggers school at Lakehurst Naval Air Station, on the ground just after her graduation jump. Students must bring back their ripcord or treat the class. Roberta waves hers in triumph.

Aberdeen-Angus Breeders Plan Field Day July 19

A field day for Aberdeen-Angus breeders and West Texas cattle men will be held at Texas Technological College July 19, Dean of Agriculture W. L. Stangel has announced.

Dean Stangel said Tech would play host to the visitors while the actual field day will be under the direction of A. C. Chesser, Littlefield cattle man.

Plans are being made to accommodate around 500 ranchers and farmers, Dean Stangel said.

MELBA JO WOODS AND TRUMAN MERRELL OF QUITAQUE MARRY

Miss Melba Jo Woods and Mr. Truman Merrell of Quitaque, were united in marriage Saturday evening, June 10 at 8:30.

Rev. G. A. Elrod performed the single ring ceremony.

Mr. and Mrs. Irvin McJimsey and children spent the week end in Amarillo with relatives.

Elrods Will Visit in California

Rev. and Mrs. G. A. Elrod left Monday on a two weeks vacation. While away they plan to visit Mrs. Elrod's two sisters in Los Angeles, California.

HUGH STODGHILL'S HAVE FAMILY REUNION SUNDAY

The home of Mr. and Mrs. Hugh Stodghill was the scene of a family reunion and dinner Sunday.

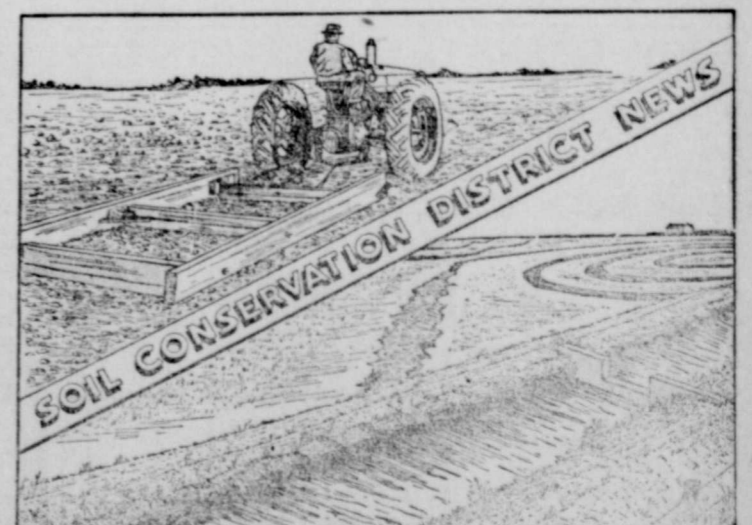

Those present were: Mr. and Mrs. Roy H. Stodghill and family, of Birmingham, Alabama; Mr. and Mrs. Hugh Saunders and family of Brice, Mrs. Mozell Saunders and boys of Dalhart, Mr. and Mrs. Bill Stodghill and family, Silvertown, Joye Reithmeyer, Clifton and Joe Stodghill.

Rev. and Mrs. Edwin Norris and son, of Plainview, visited Mr. and Mrs. Mart Norris Friday night. They also visited other relatives.

Legume hay, alfalfa, clovers and cowpeas, must be raked into rows before the leaves shatter. Grass hay may be left in the swath until it is fairly well cured. If a pick-up baler is not used, it is best to stack the hay in small piles before the leaves shatter. Then bale or place in haystacks when it is sufficiently cured.

Two important changes take place during the hay curing process, says Miller. The water content of the plants drops from around 75 percent to 15 or 20 percent and the chemical change is referred to as "sweating" or fermenting. During the sweating process the hay develops an aroma and becomes more palatable, adds Miller.

One of the secrets of producing high quality hay is getting rid of the moisture in the hay as fast as possible and at the same time keeping the bright green color. In the humid sections of the state, the use of artificial hay driers makes possible the production of high quality hay that contains plenty of vitamin A, says Miller.

The Supervisors of The Cap Rock Soil Conservation District are: Chairman, Earl I. Cantwell; Vice Chairman, Bray Cook; Secretary, Chester Burnett; L. A. McJimsey and Glynn B. Morrison.

Terracing is now being completed on some of the farms where the wheat has been harvested. These systems that are completed will insure better protection of the land and a conservation of our limited rainfall.

Soil conservation service technicians have run lines for Orville Turner and Mrs. T. R. Whiteside. Mr. Turner's farm is located 1 mile west and 3 miles north of Silvertown. Mrs. Whiteside's farm is located 2 miles south and 2 miles west of Silvertown. Both of these farms are fairly flat in comparison with some of the land in the district, but terracing them will help prevent erosion and also help get a more even distribution and a fuller utilization of the rainfall. The upper part of the slope on Mrs. Whiteside's farm has been terraced previously.

Soil Conservation Service technicians have been assisting several cooperators with irrigation problems. Mr. D. N. McGavock's farm is 6 miles south and 1 mile east of Silvertown. The farm is flat and successful system could easily be worked out, if the well were more desirably situated. Mr. McGavock was unable to get a successful amount of water on the higher ground. Approximately 80 acres will be irrigated this year by means of an elevated ditch. If the well holds up, pipe will be installed next year so that all of the cultivated land can be irrigated.

Irrigation ditch lines have recently been run for Loyd Bullock near San Jacinto and J. W. Dillard, 9 miles west and 1 mile south of Silvertown by SCS technicians.

LIVING MEMORIALS

Richard C. Yarbrough, Quanah, Tex., and 6-year-old Freddie Gilchrist, Cooksville, represent two generations of polio victims who benefited from bequests left the Texas Scottish Rite Hospital Crippled Children, Dallas. Freddie is a patient now and Yarbrough, now a State welfare worker, was a patient in 1933. The annual Memorial Services, May 7, will honor the men and women, who leaving bequests to the hospital in their last wills and testaments, made possible the help to Freddie, Yarbrough, and thousands of other Texas of generations past, present and future. Hastings Harrell, Dallas, will be the principal speaker for the services which will be broadcast at 3:30 p.m. over TQN network.

COME IN AND SEE FOR YOURSELF!

IN, TEXAS

Paul Reid and Mrs. Reid after Paul, visiting the past home by Mrs. Reid's niece and Jo and Charles home with them

was admitted to hospital Sunday for

Alfred Hunt of Mr. and Mrs. day.

THE COUNTRY PRESS SAYS

Jefferson, Ohio, Gazette: "No one has any moral right anywhere or at any time to keep others from working."

Baltimore, Md., Daily Record: "We are inclined to believe that business executives may well consider going actively into politics themselves as a matter of self-preservation."

Bozeman, Montana, Chronicle: "This editor is probably off-side in making any inquiry regarding the billions of I. O. U.'s now piling up in the treasury department at Washington. As long as no one in Washington seems to pay any attention to the growing depth of moneyless paper, this old fellow is probably unnecessarily disturbed."

Santa Fe, N. M., New Mexican: "The continuing growth of the Federal government and the vast power of the President in granting benefits to large groups of voters makes it possible for the President to perpetuate himself in office—not by meritorious service but by patronage and favor."

Caffin, Kansas, Clarion: "Payments of Social Security old age benefits . . . are not being paid out of the money that was paid into the government treasury in payroll taxes. That money is gone—used up by the Federal spenders. All that represents it is government bonds issued for the social security money which the government has borrowed. Interest on these bonds is used to pay social security benefits and this interest is paid by taxpayers, in addition to the money they have already paid in as a payroll tax."

Goldbeach, Oregon, Reporter: "During the last 100 years the per capita debt of the people of the United States has been multiplied 600 times in size. In the year 1850, the public debt was \$2.77 per person. The Treasury Department reported in February this year that the debt now amounts to \$1,697.00 for each man, woman and child in the United States. (About \$6,800 for the average family.)"

FLOYD COUNTY ASSOCIATIONAL WORKERS' CONFERENCE

Pansy Baptist Church one mile north of Crosbyton — Dickens Highway, Tuesday, June 13, 1950. Theme: Cooperative Program.

10:00—Song and Praise, Rev. Tom Harmonson.

Prospectors for Uranium Face Wild Michigan Area

Tenderfoot and sourdough uranium prospectors invading Michigan's upper peninsula are likely to discover that a smattering of frontier-day know-how is almost as indispensable as their modern Geiger counters.

The going definitely favors the rough-and-ready type in the vicinity of the latest reported strike of the No. 1 atomic age metal. This Baraga county section of the Wolverine state is one of the country's remaining wild and remote regions. Bears are fair game the year around, and the forest is so dense that periodically manhunts must be organized to search for strayed or lost visitors.

The newly found deposits of uranium-rich pitchblende ore lie along the Huron river, some 15 miles northeast of L'Anse, the Baraga county seat, which has a population of almost 3,000. The town, largest near the strike, is surrounded by heavy woods and was, for many years, a camping site for French explorers, trappers and missionaries.

A member of the Austrian House of Hapsburg; an Englishman, homesick for his native land, and an American automobile tycoon have left their impress in the wilderness area but most of the country is much as it was 50 years ago.

Father Frederick Baraga, called "The apostle of the northwest" was the Hapsburg who founded the village of Assinint in 1843 and gave his name to the present county. An accomplished linguist, he compiled a grammar and dictionary in the language of the Ojibwa Indians, the local tribe with which he labored.

Farm Wagon Disappearing As Truck Takes up Burden

Not many farmers own both a truck and a trailer used for moving crops to market, says the U.S. department of agriculture. But nearly half the farmers own one or the other, according to a survey by the bureau of agricultural economics.

Many farm trucks, of course, are heavy duty equipment, but the survey show that about 40 per cent of the trucks are rated at half-ton capacity or less. Some trailers are for delivery of heavy or bulky loads and are hauled to town by a tractor. Many, however, are light equipment for hauling behind the farm automobile. Few farmers have both a truck and a trailer.

The farm wagon is now almost out of the picture, the bureau survey says. The estimate is that only about two and one-half per cent of the total tonnage of farm products hauled from farms, to initial markets is carried in wagons. Buyers do about 22 per cent of the hauling from farm to market. Hired equipment accounts for hauls about a third; and the farmers haul the remainder with their own trucks and trailers.

Important examples of hired hauling are milk routes and truckers that specialize in hauling livestock to market. Buyers who haul include poultry and egg buyers. Some processors who contract for delivery of crops to canneries, sugar factories and the like do their own hauling.

Air-Minded Franklin

Benjamin Franklin was present at many of the trials and experiments with balloons in France. He saw the first ascent of human passengers in a free balloon at the Chateau de la Muette in Passy. The Marquis d'Arlandes and Pilatre de Rozier, the scientist, were raised about 500 feet into the air, burning straw, as they went, in a grate underneath the balloon. Their perilous journey took them across the Seine to a safe landing in Paris. That evening, the Marquis, together with Mongolfier, called on Franklin. What was said by these adventurous spirits has not been recorded but the next day Franklin wrote to Sir Joseph Banks, "I am sorry this experiment is so totally neglected in England, where mechanic genius is so strong."

British Life Insurance

Record purchases of new life insurance in British companies last year brought ownership totals in those companies to a new high level at the start of this year. This was accomplished in spite of a decrease in the other major savings channels, national savings. The '49 life insurance purchases of 550,000,000 pounds were about 4 per cent over the record set in the previous year and double those of 10 years ago. Life insurance ownership had reached 5,350,000,000 pounds at the end of 1948, up 400,000,000 pounds in the year and 50 per cent over the ownership of ten years before.

Weight of Rails

Rails ranging in weight from 50 to 155 pounds per yard are in use on the class I railroads of the United States. On trunk line railroads, rail weights range from 85 pounds upward. The weight of rails in Class I railway track throughout the United States was increased from an average of 82.89 pounds per yard in 1921 to 100.73 pounds per yard in 1948. At the beginning of 1949, there were 132,504 miles of mainline railroads equipped with rails weighing 100 pounds or more per yard.

POLITICAL COLUMN

Subject to the action of the Democratic Primaries the Briscoe County News has been authorized to announce the following candidates for the offices set above their names:

FOR SHERIFF AND TAX ASSESSOR AND COLLECTOR:

Raymond K. Grewe

You can haul more loads . . .
more miles . . . for less . . .
with Chevrolet Trucks

Take time out to talk to some Chevrolet truck users. You'll find it revealing. You'll discover that Chevrolet trucks pay their way by hauling more loads—more miles—for less! And you'll find that this extra measure of value is even more apparent in the new Chevrolet models. Definitely, they're America's first-choice trucks. Heavy-duty units feature a brand-new 105-h.p. Valve-in-Head engine with the power to pull heavy loads and conquer steep grades. They offer new Power-Jet carburetion for smoother, quicker operation. They bring you the fast, safe shifting of Chevrolet's 4-speed Synchro-Mesh transmission. But whatever your hauling requirements, Chevrolet trucks are your best bet. See them in our showroom. You'll agree.

HOUSEHOLD MEMOS

Meat Loaf, Potato Salad Makes Ideal Meal
(See Recipes Below)

Meals—Indoors or Out
WEEKEND plans have a way of going awry, depending upon who drops in and what the weather turns out to be. Fortunate indeed is the homemaker who can serve from four to eight people readily, or set the dining room table or bring the meal to the back porch.
Meals for such weekends should be planned with care so there will be ample food, but none to waste. Choose combinations that can be reheated and served later if they're not eaten.
Good staples for menus include potato salad, ham or chicken. Have salad ingredients washed and chilling so that you can use as many or few as needed. A plain cake which can be frosted at the last minute, or some creamy citrus sherbet nestling in the refrigerator will solve dessert or snack problems conveniently, and with a flourish.

***Spicy Potato Salad**
(Serves 6 to 8)
3 pounds cooked potatoes
1/2 cup pickle juice
1/2 cup finely chopped onion
2 teaspoons salt
1/2 teaspoon pepper
2 teaspoons celery seed
1/2 cup chopped sweet pickles
3 hard-cooked eggs, chopped
1/2 cup mayonnaise
Pare and dice potatoes; add pickle juice and allow to chill in the refrigerator for 1 hour. Add onion, salt, pepper, celery seed, chopped pickles and eggs. Blend in mayonnaise, mixing lightly but thoroughly chilled in refrigerator.

***Ham Loaf**
(Serves 6-8)
2 pounds ground, smoked ham
1 pound fresh pork, ground
1 cup soft bread crumbs
1 egg, slightly beaten
1/2 cup milk
1 teaspoon prepared mustard
1 teaspoon worcestershire sauce
1 small onion, grated
1/2 cup sweet pickle relish
2 tablespoons melted butter
2 tablespoons brown sugar
Whole cloves
Combine ham, pork, bread crumbs, milk, mustard, worcestershire sauce, onion and pickle relish; mix lightly but thoroughly. Lightly grease a 9x5x3-inch loaf pan; line with waxed paper and grease lightly. Pack mixture firmly into pan. Combine butter and sugar and spread over top of loaf. Insert whole cloves on top of meat mixture. Bake in a moderately hot (375°) oven for one hour or until done. Pour off excess drippings that form during baking. Serve hot or cold.

***Ham Loaf**
(Serves 6-8)
2 pounds ground, smoked ham
1 pound fresh pork, ground
1 cup soft bread crumbs
1 egg, slightly beaten
1/2 cup milk
1 teaspoon prepared mustard
1 teaspoon worcestershire sauce
1 small onion, grated
1/2 cup sweet pickle relish
2 tablespoons melted butter
2 tablespoons brown sugar
Whole cloves
Combine ham, pork, bread crumbs, milk, mustard, worcestershire sauce, onion and pickle relish; mix lightly but thoroughly. Lightly grease a 9x5x3-inch loaf pan; line with waxed paper and grease lightly. Pack mixture firmly into pan. Combine butter and sugar and spread over top of loaf. Insert whole cloves on top of meat mixture. Bake in a moderately hot (375°) oven for one hour or until done. Pour off excess drippings that form during baking. Serve hot or cold.

***Ham Loaf**
(Serves 6-8)
2 pounds ground, smoked ham
1 pound fresh pork, ground
1 cup soft bread crumbs
1 egg, slightly beaten
1/2 cup milk
1 teaspoon prepared mustard
1 teaspoon worcestershire sauce
1 small onion, grated
1/2 cup sweet pickle relish
2 tablespoons melted butter
2 tablespoons brown sugar
Whole cloves
Combine ham, pork, bread crumbs, milk, mustard, worcestershire sauce, onion and pickle relish; mix lightly but thoroughly. Lightly grease a 9x5x3-inch loaf pan; line with waxed paper and grease lightly. Pack mixture firmly into pan. Combine butter and sugar and spread over top of loaf. Insert whole cloves on top of meat mixture. Bake in a moderately hot (375°) oven for one hour or until done. Pour off excess drippings that form during baking. Serve hot or cold.

***Ham Loaf**
(Serves 6-8)
2 pounds ground, smoked ham
1 pound fresh pork, ground
1 cup soft bread crumbs
1 egg, slightly beaten
1/2 cup milk
1 teaspoon prepared mustard
1 teaspoon worcestershire sauce
1 small onion, grated
1/2 cup sweet pickle relish
2 tablespoons melted butter
2 tablespoons brown sugar
Whole cloves
Combine ham, pork, bread crumbs, milk, mustard, worcestershire sauce, onion and pickle relish; mix lightly but thoroughly. Lightly grease a 9x5x3-inch loaf pan; line with waxed paper and grease lightly. Pack mixture firmly into pan. Combine butter and sugar and spread over top of loaf. Insert whole cloves on top of meat mixture. Bake in a moderately hot (375°) oven for one hour or until done. Pour off excess drippings that form during baking. Serve hot or cold.

HERE'S A flavorful way to cook chicken. It may be served hot, but, if desired, the pieces of chicken may be removed from the seasonings and cooled to be served cold on a picnic supper.
Chicken Saute
(Serves 6)
1 frying chicken, cut in pieces
3 tablespoons butter or substitute
1/4 cup flour
Serve chilled tomato juice with lemon to start off porch suppers. Pass with the juice a plate of cream cheese balls rolled in finely cut dried beef.
Dress up meat loaves with a pineapple topping by placing slices of pineapple in bottom of a greased loaf pan. Pack meat mixture on top of fruit. Serve the loaf inverted.
Fold diced ham in your supper waffle batter and make them more tempting. Serve with tossed salad and a colorful fruit dessert, and the meal's complete.

LYNN SAYS:
Here are Flavorful Summer Eating Tips
Green or snap beans from the garden will take on a real taste appeal when they are mixed, just before serving, with some crisply fried, crumbled bacon and lightly cooked chopped onion.
Fresh or canned grapefruit segments and diced pears marinated in apricot nectar in the freezing tray make an excellent appetizer or dessert course for hot weather eating.

LYNN CHAMBERS' MENU
*Spicy Potato Salad *Ham Loaf
Corn on the Cob
Bread and Butter Sandwiches
Carrot Sticks
Olives
Celery
*Orange Sherbet
*Easy Cake with Whipped Cream and Bananas
*Recipe Given

2 teaspoons salt
1/4 teaspoon pepper
1/4 teaspoon thyme
4 green onions, chopped
1/2 pound mushrooms, quartered
2 tablespoons lemon juice
1 teaspoon sugar
1 teaspoon salt
1/2 cup apple juice
2 medium tomatoes, diced
2 tablespoons chopped parsley and chives
Heat butter in heavy skillet. Mix flour, salt, pepper and thyme in paper sack. Shake pieces of chicken in this seasoned flour mixture.
Brown chicken in skillet. Add onions and mushrooms. Cover and simmer for three minutes. Mix lemon and apple juice, sugar and salt and pour over chicken. Cover and simmer for five minutes. Add tomatoes. Cook slowly for an hour, or until chicken is fork tender. Sprinkle, before serving, with parsley and chives.

HERE'S A SIMPLY mixed cake which is delicious when laced with whipped cream, sliced bananas and maraschino cherries. If you prefer, a simple lemon-orange flavored or chocolate icing may be used.
***Easy Cake**
(Makes 2 8-inch layers)
1 1/4 cups sifted cake flour
1/2 cup lard
1/2 cup sugar
2 teaspoons baking powder
1/2 teaspoon salt
1/2 cup milk
1 teaspoon vanilla
2 eggs
Cream together 1/2 cup flour and lard. Add the remaining flour, sugar, baking powder, salt and 1/2 cup milk. Stir and beat vigorously until smooth and fluffy. Add remaining milk and beat thoroughly. Add eggs, one at a time, beating thoroughly after each addition. Pour into two greased 8-inch cake pans and bake in a moderate (350°) oven for 20 to 25 minutes. Frost when cool.

***Orange Sherbet**
(Makes 3 pints)
1/2 cup sugar
1 1/2 cups unstrained orange juice
1 cup evaporated milk, thoroughly chilled
2 tablespoons lemon juice
Add sugar to orange juice and stir until dissolved. Chill. Whip milk until very stiff. Fold in lemon juice, then orange-sugar mixture. Pour into cold freezing trays and freeze until firm.

***Orange Sherbet**
(Makes 3 pints)
1/2 cup sugar
1 1/2 cups unstrained orange juice

Latresa Cox Honored With Party on her Third Birthday

Latresa Cox enjoyed her third birthday Thursday afternoon with a lawn party at the home of Mrs. Berton Hughes. A few games were played. The children enjoyed opening the gifts. Snap shots were made during the party. Cake, Dixie cups and smack sandwiches were served to fifteen children and their mothers, the hostesses Mrs. Berton Hughes and Mrs. Troy Cox.

Mrs. Dean Allard and her mother, Mrs. Bob Stevenson, of Canyon, left Wednesday for Cheyenne, Wyoming and Rexburg, Idaho. They will visit their son and brother, Mr. and Mrs. Al Stevenson and family and their daughter and sister, Mr. and Mrs. Martell Grover.

Mrs. R. E. Hilburn, of Wichita Falls, visited over the week end with her brother, Roy McMurtry,

Texas Military District Public Information

Qualified officers, both in the regular army and in civilian components of the army, may apply for transfer on a voluntary basis to the Corps of Engineers, Ordnance Department and Signal Corps, according to announcement today by Colonel Oscar B. Abbott, Chief of Texas Military District.

Only male reserve officers now on active duty who are physically fit for general service may apply for transfer. Other specific requirements must be met with reference to education, training and experience, it was pointed out in the announcement.

Transfers for regular army officers to the Corps of Engineers and Ordnance Department will be limited to persons in permanent grade of Major and below, and for the Organized Reserves and other civilian components, these transfers are limited to officers in grade of Lieutenant Colonel and

below. No specific limitation as to grade is made for transfers to the Signal Corps.

Officers in civilian components may make application to Fourth Army Headquarters through the local Inspector's office or comparable headquarters. Final action on all applications will be taken by the Department of the Army.

Mr. and Mrs. L. G. McDonald and son, Bobby, of Mercedes, Texas visited last week with Mrs. McDonald's mother, Mrs. D. W. Mayfield and sister, Mr. and Mrs. Perry Thomas. Mr. and Mrs. McDonald were enroute to their summer home near Denver, Colorado, where they will spend the summer. Mrs. Mayfield accompanied Mr. and Mrs. McDonald and will visit several weeks.

Mrs. George Seaney and Mrs. Pascal Garrison visited Mrs. Wade Chitty in Tulia Monday. Mrs. Chitty has been critically ill in a Plainview hospital but is able to be at home.

POTATO HARVEST IS NEXT NEAR ALTUS, OKLAHOMA

Altus, Oklahoma—An estimated \$50,000 to \$75,000 will be added to the Jackson county payroll during the next few weeks as a result of the second commercial potato harvest in this area.

More than 400 laborers have been brought into the area to help with the harvest of the Irish potatoes, and the payrolls from the two processing sheds and local farmers is expected to hit from \$10,000 to \$15,000 weekly. The harvest will be resumed this week and continued for about five weeks.

Mr. and Mrs. Wade Reid of Fort Davis, Texas, are visiting their brother and sister, Mr. and Mrs. Warner Reid.

Rev. and Mrs. H. L. Burnam of Spur, spent Friday afternoon with Mr. and Mrs. Ray C. Bomar. Mrs. Mario Bishop, of Amarillo, is visiting this week with her parents, Mr. and Mrs. J. N. Cantwell.

PERSONAL

Mr. and Mrs. Haskel Jackson and daughters visited in Quitaque Sunday with Mr. and Mrs. Rayburn Burgess.

Mrs. Clyde Hutsell underwent surgery last Thursday at the local hospital. Her condition is satisfactory.

Mr. and Mrs. Don Patterson of Wichita, Kansas visited from Saturday until Tuesday with Mr. and Mrs. John McCain.

Mr. and Mrs. James Patton and family and Mr. and Mrs. Glen McWilliams and daughters spent the week end in Fort Sill, Oklahoma with Mr. Patton's sister, Mr. and Mrs. Ted Wynn. They also enjoyed an outing at Medicine Park.

Mr. and Mrs. Scott Smithee and Faith, spent the week end at Amherst with Mr. and Mrs. Luther Caraway.

Coy Chappell, of Amarillo, visited Sunday with his parents, Mr. and Mrs. C. M. Chappell.

Mr. and Mrs. J. W. Chapman, of Lubbock, visited Mr. and Mrs. E. E. Minter Friday.

HINTS ON FREEZING VEGETABLES—HOME FREEZERS ARE IDEAL EQUIPMENT

Home freezers are fast becoming a part of the food preservation equipment in rural as well as city homes. This method of food preservation is enabling the homemaker to do a better job of providing the family with fresh vegetables the year-round. A good supply of vegetables is needed for balancing the diet and according to Louise Mason, extension foods and nutrition specialist of Texas A. and M. College, home freezing or using a freezer-locker box to store surplus vegetables for later use is one sure way to have them when they are needed.

Miss Mason says there are several factors that will have a bearing on the quality of the frozen vegetables and these should be kept in mind when vegetables are being prepared for freezing. Speed is important and there should be no delays from the time the vegetables are gathered until processed and stored.

She points out that vegetables begin to lose food value and flavor as soon as they are gathered. During the summer months, she says it is best to gather the vegetables in the morning, but be sure they have reached their peak in flavor and texture, for freezing does not improve their quality.

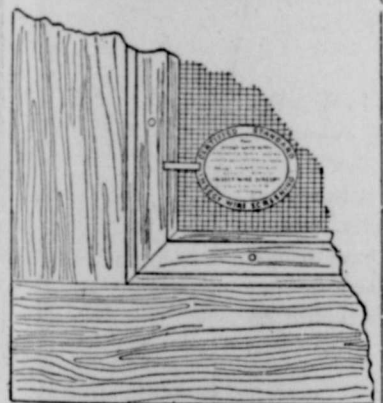

It is necessary to scald vegetables in boiling water, before freezing, to prevent loss of quality and to preserve the vitamin content. Freezing alone does not stop the enzyme action in vegetables and if they are not scalded, this action will cause undesirable odors to develop along with the loss of flavor and color.

Each vegetable, she says, requires a different scalding time and she suggests that you see your local county home demonstration agent and get a copy of B-175, Frozen Foods. This bulletin is new and instructions are given in detail on how each vegetable should be handled from the time it leaves the garden until it is ready for storage.

She says when vegetables are properly scalded, packed, processed and stored at about zero F., they will retain their quality for one year. The vegetables that cannot be successfully frozen are tomatoes and salad greens, such as lettuce, parsley, endive, cabbage, celery and onions.

Irish potatoes should mature before they are dug. Immature potatoes do not keep well. Potatoes should not be dug when they are covered with water blisters (small elevated white spots) on the skin. Delay harvesting until the blisters have disappeared.

Your Home
By Frances Ainsworth

Spring-time is my favorite season of the year! I'm always so happy when I can open my windows and doors and let the clean fresh Spring air sweep through every room in the house. We just had screens put in all our windows last week, and so I've been enjoying that Spring air every morning since . . . opening the windows long enough to really bring Spring-time inside.

Speaking of screens, I had several new ones put in this year . . . and discovered something that I think will interest you, too. When the screens were brought to the house I noticed a small label on the frames, and asked the serviceman about it. He told me that the label signified that the screening used complied with all requirements of a special U. S. Department of Commerce standard for Insect Wire Screening—and that the label was my guarantee of the best in quality and dependability. He went on to explain that only those using standard insect wire screening were allowed to use the label, and that the standards were set after exhaustive tests of screen material to find just what was best for protecting homes against those pesky mosquitoes and other insects. This standard type must be a certain size mesh and wire, and durable.

These new requirements were instituted just a few weeks ago . . . and are now in use by window screen manufacturers throughout the country. You're undoubtedly getting set for screens, too—for Spring and Summer protection—and I know you, too, will want to make sure you're getting the best in quality. That's why I knew you'd be interested in learning about Certified Screening and how it will help you in determining top quality.

THE HIGH PLAINS WATER CONSERVATION AND USERS ASSOCIATION

Formation of water conservation districts which would blanket the high plains area was urged today by W. O. Fortenberry of Monroe, president of the High Plains Water Conservation and Users Association.

Currently three counties, Dallam, Hockley and Lamb, are petitioning for designation of underground water reservoirs by the State Board of Water Engineers. Then they can proceed with elections creating districts.

"Every county on the high plains which depends on underground water for irrigation should be investigating the merits of forming a district," Fortenberry said. The organization he heads embraces 13 county water users associations, plus the Petersburg Water Conservation Association.

"To protect our water and our water law, to conserve and replenish our water supply, now is the time to organize water districts," Fortenberry said.

Recent attacks on the underground water law passed in the spring of 1949, together with repeated suggestions to the Texas Water Code Committee that a state agency regulate water use, make it necessary to form districts to protect the present law, he pointed out. That would refute charges that the law is unworkable.

To protect the water supply, a wide-spread program of recharging, well spacing and waste prevention would meet conservation needs, he added.

The High Plains Association is composed of water users associations in Lamb, Lubbock, Hale, Bailey, Castro, Dallam, Briscoe, Floyd, Randall, Parmer, Deaf Smith and Crosby counties, and the Petersburg association. It has been identified for several years with the right to fend off state control of underground water.

Gigantic Street Parade Saturday, July 1-4 p.m.

Probably no other theme has been the subject of so many paintings, poems and musical compositions as the sea. Here it is for the first time in modern table silver. First, William S. Warren, master silver designer, made an oil painting, (above), of the elements which represent the sea in a mood of romance and adventure: the mermaid's silhouette, (upper left), the fairy-like sea shell, (upper right), the swaying flora of the sea serving as a setting for the ocean's gem—a pearl, (lower left), the graceful breaking wave, (right center), and the gay bubbles of spray. All of these he then translated into third dimension beauty in sterling silver for Wallace Silversmiths' newest tableware pattern "Romance of the Sea."

TECH SUMMER ENROLLMENT TOTAL SHOWS SLIGHT DROP FROM 1949
A total of 2,723 students are enrolled at Texas Technological college for the first summer session, and almost a fourth of them are graduate students who have returned under the emphasis of the Gilmer-Aiken bill. The bill, passed by the last state legislature, places a wage premium on teachers' advanced degrees. The total was a slight decline from the 2,839 registered during

the first term of the 1949 session. However, 714 were enrolled in the graduate division, a sharp increase over the 442 graduates on the 1949 roll.

Elm trees produce wood that is hard, heavy and tough and can be used for many things on the farm. Most elms can be grown from seed.

Patent Office Rounds Out 160 Years of Inventions

A document signed by George Washington April 10, 1790, established the United States patent system, now 160 years old.

Thomas Jefferson saw to it that the patent system got off to a good start. As secretary of state he was the first patent office administrator. He was also the first examiner and personally examined every application. Jefferson himself was an inventor. While he did not use his office to take out patents for his inventions, he is credited with having devised an improved moldboard for the plow and was the first to introduce the swivel chair.

On March 14, 1794, the patent office acknowledged the first great American invention. On that day Eli Whitney obtained his patent for the cotton gin. The word "gin" is a contraction of the word "engine." This invention boomed our cotton industry from a low place in the production scale to the highest in the world. It marked the birth of our textile industries.

Later came the distinguished list of inventors that includes Cyrus H. McCormick, inventor of the reaper; Samuel Colt and his revolver; Samuel F. B. Morse, the telegraph; Charles Goodyear, vulcanization of rubber; Elias Howe, the sewing machine; Robert Fulton, the first commercially practical steamboat; George Westinghouse, the air brake; John W. Hyatt, Celluloid and the plastics industry; Eli H. Janney, the car coupler—this coupler and the air brake were vital to expansion of the railroad industry; Joseph F. Glidden, barbed wire; Alexander Graham Bell, telephone; and Ottmar Mergenthaler, the linotype.

Precautions to be Taken When Laundering Nylons

Nylon fabrics are easily laundered, but there are a few precautions to be observed to get good results.

Some people report that their white nylons have shown yellow or grey cast. This can be prevented by washing white nylons separately from colored articles, and by using a mild detergent of water softener and soap if water is hard.

Deposits from soap and hard water will give nylon a grey cast just as it does other fibers. Although colors in garments may be fast, they often leave enough discoloration to give an off-white tinge to white nylon.

Strong bleaches will weaken nylon just as it will other fibers. They should therefore be used carefully and only when necessary. The amount recommended for a normal cotton bleach should be satisfactory for nylon. As far as nylon itself is concerned, any properly made nylon fabric is washable, but dyes, finishes, and trims may not be. So, if you find manufacturer's instructions of whether to wash or dryclean a garment, it is well to follow them.

Nylon is easy to store but make sure that it is clean and in a cool, dark place; nylon has no attraction for moths and silver fish; spots are often easily removed with soap and water, but, if some are resistant, the usual household cleaning fluids will remove spots from nylon too; some nylon fibers require pressing and these usually iron better slightly damp, but care should be exercised to always use a warm iron. High temperatures damage and yellow nylons.

Niagara Falls Exhibitions

Tightrope walkers have taken death-defying trips across Niagara falls. The master of them all was Jean Francois Gravelet, known as Blondin, who in 1859 presented a show experts say has never been duplicated. Performing on a cable stretched across Niagara river, Blondin skipped, pranced, ran, turned somersaults, walked backwards, sat down, reclined, walked with baskets on his feet and on stilts. The 20th century brought the barrel riders with Mrs. Anna Edson Taylor, "Queen of the Mist," achieving the distinction of being the first person to survive a trip over Horseshoe falls in a barrel. Others were to follow but so many lost their lives that U.S. and Canadian police now forbid such exhibitions.

Africa's "Gold Coast"

British-governed West African country stands in sixth place among the world's gold-producing regions. Its annual production exceeds half a million ounces. The ore at Obuasi, 100 miles inland from Takoradi, the Gold Coast's only deep-water port, assays very high—an ounce of gold to the ton. Diamonds were discovered in 1919 by panners of river gold, however. A newly found diamond field midway between Takoradi and Obuasi, described as "phenomenal," is expected to increase Gold Coast diamond export volume.

Diagnosis of Cancer

Research indicates that the Huggins blood serum test is not adequate for diagnosing cancer. The simple but rough screen test for cancer fails to pick up enough cases of cancer, and may indicate cancer where there is none.

Mrs. Dawson of Hobart, Oklahoma visited recently with her daughter, Mr. and Mrs. Oles Hogue. Mrs. Hogue and children accompanied her home and spent a week returning Thursday.

Jeannie Garvin, who was among the graduating class this spring, entered business college in Plainview Wednesday.

Mr. Charley Garrison underwent surgery last Thursday at a Crosbyton hospital. His condition is reported as satisfactory.

J. P. Ledbetter, of Amarillo, is visiting his cousins, Don and Ronald Ledbetter.

Mr. and Mrs. H. P. Ledbetter and children, of Amarillo, spent last Thursday night with Mr. and Mrs. Paul Ledbetter.

Mr. and Mrs. Edd Emmons of Grapevine, were recent visitors of Mr. and Mrs. Paul Ledbetter. Mrs. Ledbetter's sister.

Mr. and Mrs. Chester Strickland and Kay Nelle, of Denton, spent the week end with Mrs. C. M. Strickland.

Repelling Bats

In general bats are harmless and even useful, as they feed on various kinds of flying insects, but a colony established in an attic may become objectionable. The best means of getting rid of them is to close the holes through which they enter. All openings should be sealed except one, which should be left open until about half an hour after dark, when the bats are out for food. Then, if the last one is sealed, they should be kept out.

Ewe Care

Breeding ewes require considerable attention at lambing time, particularly if the weather is cold. They should have dry, well-ventilated shelter. Ewes having their first lambs frequently require more attention than older ewes. The flock owner needs to be on the job some at night, as well as during the day to insure a high percentage of lamb crop.

March, Month of Artists

There are only eight out of March's 31 days that do not mark the birth of one or more lions of arts and letters. This list starts off with Augustus Saint Gaudens, sculptor, on March 1st, and finishes with Nikolai Gogol, Russian writer, and Franz Josef Hayden, an Austrian composer, on March 31. A partial roll call turns up artists Vincent Van Gogh, Sir Henry Raeburn, Michelangelo, Fra Angelico, Nathaniel Currier (Currier and Ives prints), Anthony Vandyke, Rosa Bonheur and Francisco Jose de Goya; and sculptors Gutzon Borglum and Jo Davidson.

Allow Time When Mixing Colors

Different colors of paint, enamel and lacquer dry in different ways. Some dry lighter. Some change quite a little. Consequently, if you can't match a wet sample of the coating material—when you think you're close to the desired result—be sure to brush out a sample and let it dry. It's best to brush out your sample on a surface similar to that on which the coating will be used.

Bicycle Accidents

Study of the claims paid on the lives of industrial policy-holders during 1946 through 1948 show that seven-eighths of the fatal bicycle accidents were collision with motor vehicles, and that most of the remainder were the result of falls off bicycles. Three-fourths of the deaths were among boys five to 19 years of age. There is evidence that motorists are giving increasing attention to safety.

MRS. JACK DAVIS HONORED WITH SHOWER AT HOME OF MRS. EDD EDWARDS.

Mrs. Jack Davis, nee Francis Norris, was honored with a miscellaneous shower at the home of Mrs. Edd Edwards Wednesday afternoon. Hostesses were: Mrs. Haskell Jackson and Mrs. Edd Edwards. The bride and bride's mother and grooms mother were presented with carnation corsages. Refreshments of punch and cake were served to about forty guests, and many sent gifts.

MRS. CARL TIDWELL HONORED AT BRIDAL SHOWER TUESDAY AFTERNOON

Mrs. Carl Tidwell a recent bride was honored at a bridal shower Tuesday afternoon in the home of Mrs. Winston Hamilton. Hostesses were Mrs. Judd Donnell, Mrs. J. W. Brannon, Jr., Mrs. James Patton, Mrs. Winston Hamilton, Mary Lou Bellinger, Mary Tom Bomar, Dorothy Heckman and Vonna Wood.

Guests were received by the honoree, her mother, Mrs. Snook Baird and the grooms mother, Mrs. Dave Ziegler. Mary Lou Bellinger presided at the register book. Dorothy Heckman greeted the guests in the bedroom where the gifts were displayed.

The serving table was laid with a lace cloth. The centerpiece was a ship. In the center was a miniature bridal couple. Punch was poured by Mary Tom Bomar and Vonna Wood. Cakes were also served.

About fifty guests called during the afternoon and many sent gifts.

Beth Mason is spending this week with her cousins, Karen and Donna Sue Eddings, at Estelline.

Mr. and Mrs. Judd Donnell visited relatives at Canyon and Amarillo Sunday.

Mr. and Mrs. Boyd Scott of Roswell, New Mexico, spent last week with Mr. and Mrs. Warner Reid. Mrs. Scott is Mrs. Reid's sister.

Buddy Stallcup, of Tucumcari, New Mexico, spent last week with his sister and family, Mr. and Mrs. Wade Welch.

Mr. and Mrs. John Lee Francis and son, Dale, returned Saturday from Grand Prairie where they have been for treatments.

Patsy Ruth Johnson of Tulsa, visited several days last week with her grandparents, Mr. and Mrs. C. M. Campbell.

Mrs. Wood Hardcastle, of Skeltytown, Texas, and Mr. and Mrs. Otto Hardcastle, of Los Angeles, California, visited relatives in Silvertown Friday.

Leroy Vardell returned to the Veterans hospital in Amarillo last Wednesday after spending two weeks with his parents, Mr. and Mrs. J. J. Vardell.

What was the RIGHT thing for this Driver to do?

Suppose you were driving the car in front. The driver behind wants to pass, and you see that he may run into a car coming from the opposite direction. If you are wise you will put out your hand and signal him not to pass. But, if he comes abreast of you too fast, keep to the right to provide clearance.

Drive RIGHT with Phillips 66

Phillips 66 Gasoline provides the fast, smooth response you want whenever you may be faced with a "ticklish" driving situation. Thanks to improved refining methods, this great motor fuel now gives smoother anti-knock performance, faster acceleration and greater power than it ever did before! It's right for safe, pleasurable driving.

You can get new, improved Phillips 66 Gasoline now, at your Phillips 66 Dealer's.
