Ballots for Election Mailed This Week to Farmers

Ballots for election of 1951 county committeemen and delegates to the county convention being mailed this week. We will mail all eligible voters to mark their ballots as they see fit and place them in the envelopes enclosed with the ballots in time for them to reach this office not later than 5:00 p. m. on the day of election, which is, November 18, in all communities except Felope Flat community, which is, November 16, 1950. In event you do not get your ballots mailed, take them in person to the office of election in your community.

Be sure to vote as your communitemen probably have more effect on your business than county officials.

P. M. A. News Reporter.

Rogers Wins Congress Race In Tuesdays Election

Complete returns in Tuesdays election in Briscoe County gave Rogers a lead over Ben L. All voting boxes were in Antelope Flat, and at the time of going to press this box out. Rogers received 414 votes; Ben L. 195. Rogers was elected over the ticket by a vote of something like 2,000.

Home Destroyed By Fire Last Friday Morning

A farm home on the Rowell farm 7 miles southwest of Silvertown was destroyed by fire Friday morning when the J. A. Bradley family were setting up housekeeping on the farm. The Bradley's had moved in and Mrs. Bradley was preparing dinner on an oil stove while Mr. Bradley was trying to hook up the butane system. An open gas line caused the gas to the cook room to be ignited. The house contents was a complete loss. Mr. and Mrs. Bradley are the parents of Mrs. W. M. Hood, of Silvertown, and their daughter and son were with them at the time of the fire accident. The children lost their coats and sets in the fire. Mr. Bradley received burns in an attempt to smother the flame.

Armsted W. Self Shows Improvement; Now in California

Mr. and Mrs. M. B. Self, Mrs. M. B. Self, of Mineral Wells, and Mr. J. L. Self returned home Friday afternoon from Oakland, California, where they visited their son, and brother, Sgt. Armsted W. Self in a U. S. Naval Hospital. Mr. Self said Billy was in high spirits, and his condition was satisfactory. The family visited with him for sometime while he was in the hospital. Billy was injured in a fight at sea and was brought back to the states from Japan some ten days ago where he is receiving medical treatment at a U. S. Naval Hospital, Ward 44-A, Oakland, 14, California.

Dennis Raye Dickerson Celebrated Fourth Birthday

Dennis Raye Dickerson celebrated his fourth birthday in the home of his grandparents, Mr. and Mrs. Bob Dickerson November 3. Dennis was playing several games the children formed a circle on the floor, the gifts were put in the center and all had a good time singing what each brought. Cream and cake was served and fifteen of his little friends and mothers.

District Conference To Be Held Here November 21

District Conference will meet at the Silvertown Methodist Church on November 21. This will be an all day meeting. Methodist women will serve the noon meal. Every woman is urged to help with the meal. They are planning on 200 to 250 persons to be served at noon, therefore, every Methodist woman that can help let it be known. There will be delegates from every church in the Plainview district present.

Dr. Shy Undergoes Surgery Thursday at Local Hospital

Dr. J. M. Shy underwent extensive surgery at the local hospital Thursday morning, November 2, at 8 o'clock. The surgery was performed by Dr. Norman Harris, assisted by Dr. Youngs and Dr. Witt. The doctor had been ill for the past six months and had been worse recently. Miss Stroud, superintendent of nurses, reports that he is doing fine and should soon be able to be out again.

Stores Will Be Open Here Saturday, November 11

After the attention of the business firms in Silvertown were called to Armistice day being on Saturday, they passed a petition and a majority of the business firms signed and agreed to stay open Saturday, November 11. Earlier in the year in a meeting they voted to close on this holiday, but it seems most of them were unaware of the date being on Saturday.

Owls Will Play Matadors There Friday, November 10

The Silvertown Owls will go to Matador Friday night, November 10 to meet the Matador Matadors on their field. Coach Hank Brown said this is the first year Matador has played conference 2-B ball. He also stated that one-half the gate receipts would go to Silvertown. The score between Estelline and Matador was 7-6 in favor of Estelline. Friday night's game should be a good one. Game will start at 7:30 p. m.

"Curtain Call At Cactus Creek" November 12-13

Donald O'Conner is advance man for a pioneer repertoire troupe which includes Gale Storm, the girl he loves. The show plays Cactus Creek just as Walter Brennan and his gang stick up a bank. Brennan goes to Powder River as a member of the show and when the bank there is knocked off, O'Conner is jailed as a suspect. Freed by Brennan, O'Conner is chased all over Arizona by a posse who would hang him as a bandit and by the bandits who would exterminate him as a double crosser. Brennan solves the problem by surrendering to O'Conner, who gets a large reward and a "yes", from Gale, and the story ends with O'Conner opening his own show with Gale and Brennan. Next weeks program appears on page two.

Presbyterian Auxiliary Met Monday

The Presbyterian Auxiliary met Monday, November 6, in their all day meeting in the home of Mrs. R. G. Alexander. Mrs. True Burson reviewed the book Rural Prospect by Mark Rich, she was assisted by Mesdames Dickerson and Tony Burson. Mrs. Fred Lemons gave the devotional and presided. Seven members were present.

Mart Norris and daughter, Fern, were business visitors in Tulia Saturday.

Mrs. Paul Oliver, of Quitaque, visited Mrs. C. L. Bradley Sunday.

CHRIST FORGIVES MARY BAGDALENE
 Christ, (portrayed by Millard Coody) forgives Mary Magdalene during the pageant sequences in a scene from the religious film "PRINCE OF PEACE." This unusual cinecolor feature based on the famous Lawton, Oklahoma, Easter pageant comes to the Palace Theatre, Silvertown on Thursday, November 16th for one day only.

4-H MEMBERS OBSERVING ACHIEVEMENT WEEK THROUGHOUT TEXAS

Texas 4-H club members, more than 113,000 strong, will join with the nearly 2,000,000 members in the nation to observe National 4-H Achievement Week, November 4-12.

Working towards their 1950 theme, "Better Living for a Better World", 4-H youth have been a busy group during the past year. They have produced and conserved food, worked to make their homes more comfortable and attractive, helped to supply the extra labor needed to produce crops and livestock and furnished "know how" for making their farms more efficient and productive. During National 4-H Achievement Week, they will report to the nation on just what they have done. The local volunteer 4-H leaders and the outstanding members will be recognized for the contributions they have made to the welfare of their state and nation.

The officers of the 4-H clubs in Texas, their leaders and extension agents have made plans for achievement banquets, tours, achievement days and other special events for the week. Exhibits will be placed in show windows and 4-H members will tell service clubs, farm organizations, school assemblies and other groups about their work. The winners of state awards will be honored in many counties by their fellow members and leaders.

A glance at the accomplishments of 4-H members throughout the nation reveals that 16,000,000 quarts of food were preserved during the year; 100,000 acres were planted to gar-

dens; they produced 9,000,000 birds in their poultry demonstrations; they own one million head of livestock and the list could be extended to cover just about every job in the home and on the farm. They participated in many worthwhile activities such as farm safety fire prevention, health work, soil conservation, wildlife conservation, tractor maintenance and a large group of others.

Their work is not limited however to producing and conserving the food and feed they produce for they devote much time to personal improvement programs. They participate in leadership training activities, citizenship work and group discussions that help them to better ties, citizenship work and group discussions that help them to better understand some of the important social and economical factors that are now at work in the world. They study and practice democratic procedures and are doing their part to develop the good-neighbor spirit at home and abroad.

Texas 4-H members are extending an invitation to the public to join with them in their observance of National 4-H Achievement Week.

BIRTH

Mr. and Mrs. Leroy McGowan are the parents of a baby boy born November 3, in Plainview hospital named Steven Darrell, weight 7 pounds. Grandparents, Mr. and Mrs. M. B. Self; great-grandparents, Mr. and Mrs. H. L. O. Riddell.

Mr. and Mrs. J. S. Fisher, Mrs. J. C. Archer, Mrs. Pearl Simpson were business visitors in Tulia Monday.

The Prince of Peace is coming.

Hydrogen Bomb Explosive Found In Ordinary Water

PHILADELPHIA—The research institute of Temple university has announced the discovery in ordinary water of tritium, the form of heavy hydrogen that is the key explosive for hydrogen bombs.

The tritium now planned for American H-bombs is to be made in atomic reactors yet to be built. A little already has been made in existing American reactors. Tritium, like the other forms of hydrogen is a colorless gas.

The reactor tritium is said to cost nearly half a billion dollars a pound. Despite that, the water discovery shows no present promise of substituting. The water extraction appears to be both less productive and far more costly.

With the new tritium-detection method, it may not be necessary to wait until an H-bomb is exploded to gather the evidence. For at present manufacture of tritium is a presumption that it is intended for H-bombs. If in manufacturing, a little tritium is spilled into water, it will spread widely.

Even when diluted to a few atoms per drop, this tritium can be detected by the new methods announced recently. For example, it was reported that a gram of tritium spilled into the world's greatest river, the Amazon, could be detected all the way downstream and far out into the ocean. A gram is a twenty-seventh of an ounce.

Tritium had been suspected in water for more than 20 years, and partly identified by the spectro-scope. The recent discovery used radio-activity.

Norway Announces New Auto; Sells for \$700

NEW YORK—An Oslo dispatch reports that Norway has become the newest automobile producing nation—with a car weighing 450 pounds and costing 4,500 Norwegian crowns (\$700).

It is a three-wheel car, its chassis mostly hard aluminum plate one-tenth of an inch thick. It has no doors, passengers get in through the top, then replace the roof; it does better than 100 miles on the gallon.

With its motor in the rear, the 10-foot by 4-foot car seats two.

Road to Popularity Found Same for Rich and Poor

STATE COLLEGE, Pa. — Drs. M. R. Feinberg and D. H. Fryer, following a study of 2,500 adolescent boys, report the road to popularity is much the same whether you come from the swanky or poor part of town.

That is, they said, rich boys become popular — or unpopular — among their classmates in exclusive schools for much the same reasons as do poor boys attending schools in underprivileged areas.

Here are some of the findings of the study:

"Popular" boys generally appear to have made an adequate adjustment to their parents and teachers. The parents share their interest in sports and other school activities. The boys got good marks in their studies, despite participation in athletics and social affairs. Finally, they appeared to have the ability to "relate" themselves to many individuals at the same time.

In contrast, "unpopular" boys had "more withdrawn" personalities. Their parents were not interested in athletic or social activities; and the boys themselves were not athletic. They seemed to prefer "pursuits which can be conducted alone—hobbies such as reading for pleasure, listening to the radio or attending movies." The boys disliked most of their teachers.

Vegetable Hawker Signed By Opera—to Tend Horses

LONDON, Eng.—Fred Evans, London vegetable dealer, is going to appear with the famous La Scala Opera Company of Milan, but he can't sing a note.

He will take the part of a 19th century peasant in the opera L'Elisir D'Amor and lead two aged white horses, Tommy, 32, and Tulip, 35, across the stage.

Italo Tajo, bass, will be in a Landau drawn by the horses and will sing his first aria while Fred holds the horses for fifteen minutes.

"To tell the truth I felt a bit of a fool at the rehearsals—standing there doing nothing and everyone else singing their heads off," Fred said. "But as long as it suits the company it suits me."

He got the job when he was asked to supply the horses.

New Suits Ask \$4,909,527 In Canadian Ship Disaster

CLEVELAND, O. — Law suits seeking \$4,909,527 from Canada Steamship Lines, Ltd., have been filed in behalf of heirs of 85 persons killed last September 17, 1949, in the Noronic ship disaster at Toronto.

In other suits pending in the U.S. court of appeals the steamship company has sought to limit liabilities to \$445,000. These suits involve claims of \$6,500,000 for death, personal injury or property loss.

The Noronic took 119 lives among the 524 passengers aboard the ship when she burned.

GIRL SCOUT MEETING

The Girl Scouts met Friday, November 3, from 4 until 5 at the fire hall. We discussed how to make money for our Christmas party. We decided to sell programs Thursday at the ball game between Turkey Jrs. and Silver-ton Jrs. The price will be 5 cents or whatever you wish to pay. We hope that the boys won't have to change their numbers as they did in the last home game. Be sure and come to the ball game Thursday night and buy programs from the Scout Girls.

Reporter.

PERSONALS

Mrs. R. C. Hutsell who has been in the local hospital for the past week was taken home Sunday. She was feeling improved.

Visitors in the home of Mrs. Pearl Simpson Friday afternoon were: Mrs. Jim Bomar, Mrs. C. R. Badgett, Mrs. J. S. Fisher, Mrs. T. C. Bomar and Mary Tom Bomar.

Esdell Hutsell and Dick Guest, of South Plains, made a business trip to Abilene Sunday.

Mr. and Mrs. Jack Billingsley and sons spent the week end in Lubbock.

Mr. and Mrs. Homer Ragland, Sr., of Dimmitt, spent Sunday in the home of their daughter, Mr. and Mrs. Elzie Yancey.

Mr. and Mrs. Glenn Allen and daughter, of Amarillo, spent Sunday with her mother, Mrs. J. H. Burson.

Mrs. Homer Ragland and Mrs. Elmer Vaughan and daughter, Mrs. Elzie Yancey, Mrs. Albert Rawland and Norma Faye, made a business trip to Lubbock Monday.

Mr. and Mrs. Jimmy Tidwell and son, Mike, of Hobbs, New Mexico, spent the week end with her parents, Mr. and Mrs. Clyde Hutsell.

Built for tough service — all ways! CHEVROLET TRUCKS with Chevrolet's Hypoid Rear Axle

Chevrolet trucks are engineered to "take it," in every way. Chevrolet's heavy-duty hypoid rear axles offer maximum strength... with single-unit housings formed into tubular steel beams, and splined axle-to-hub connections that deliver power more evenly. Gears last longer, too... pinion gear is ball-bearing supported at each end, with adjustable thrust pad to prevent distortion on extra heavy pulls. Add these advantages to powerful Valve-in-Head engines, Synchro-Mesh transmissions, and channel-type frames. Then you'll know why Chevrolet is the most popular truck in America. Come see these great Chevrolet trucks today!

West of the Railroad Track, Silverton, Texas

The Supervisors of The Cap Rock Soil Conservation District are: Chairman, Earl I. Cantwell; Vice Chairman, Bray-Cook; Secretary, Chester Burnett; L. A. McJimsey and Glynn B. Morrison.

I own this plot of land, and have bought it through sweat and labor. It is mine to do with as I please. It is mine to build up or destroy. I can take all from it and put nothing back, because that is my privilege as owner. The land will produce good all my life no matter how I treat it, so why should I worry? The attitude expressed here was fairly prevalent at one time but is rapidly declining. The evidence of its decline

and the desire of the farmers to properly care for their land are expressed in the Cap Rock Soil Conservation District by the increased use of soil and moisture conservation practices.

The desire to control the water and protect the land has resulted in the farmers using more and more mechanical structures such as terraces and diversions. Dams are being constructed, improved methods of irrigation used, lakes drained, etc. These mechanical practices are important and have an outstanding place in the program, but they need soil management practices to back them up. They can not do the job properly without assistance.

Several farmers have told me that their land takes water slower, blows and washes worse and bakes harder and more often than in previous years. Most of the farm-

ers realize this is caused by improper and heavy usage. We might compare the soil with a good athlete. He needs the best conditioning practices possible to keep in top shape. Any factors such as improper nutrition, lack of rest, abuse, etc., will tear down his productive power. The same is true of the soil. For top production agronomic practices have to be used that will keep it in best condition. However, the soil has the advantage that it can recover from abuse if given a chance before it is too far gone.

A healthy soil has a strong resistance against the cancer of erosion. The elements necessary for high production are present and the soil is in condition to take up water rapidly. As more and more is taken from the soil and nothing returned, erosion takes the hold and starts eating away the precious inches of top soil. The soil loses much of its resistance, and erosion leaves its scars or ruined land.

As with any disease, it is better to prevent or control erosion rather than try to remedy the efforts after it has devastated the land. One of the best methods is use of the land according to its capabilities. Land that is steep or shallow should be kept in pasture, and grazing restricted to the extent that a good cover is maintained. All cultivated land in the district should have legumes grown on it. The legumes condition the land so that it can absorb and hold greater amounts of water, in addition to putting nitrogen back to the soil. Proper crop residue management will add organic matter and condition the soil to better resist erosion. High residue producing crops are the im-

portant means of having good residue management. Strip cropping also provides protection against erosion. These agronomic practices, cover cropping, strip cropping, range improvement, etc., are important, but they cannot do the job alone. It takes a complete program including these practices as well as the mechanical structures such as terraces. When the mechanical and agronomic practices are used together they help each other to adequately hold the soil and maintain its production.

The Prince of Peace is coming.

Miss Jeannie Garvin, of Plainview, spent the week end with her parents, Mr. and Mrs. Dee Garvin.

The Prince of Peace is coming.

FARM NEWS From the County PMA Committee

Farmers of Briscoe county on November 16, and 18, 1950 will have an opportunity to elect the committeemen who will administer the Agricultural Conservation Program, price support, acreage allotment, marketing quota and other production programs in 1951. Elections will be held as follows: F Community—Antelope School house, November 16.

AC&E Communities—PMA office, Silverton, November 18.

B&D Communities—City Hall, Quitaque, November 18.

At these elections farmers will be voting for three members of a community committee and a delegate to the county convention where a county committee will be elected.

According to J. E. Wheelock, chairman of the Briscoe county committee, no farmer who is eligible to vote should pass up the opportunity to "voice" his choice of the three farmers in his community best qualified to administer farm programs in 1951.

PERSONAL

Mrs. Bill Tension stepped on a rock and her foot slipped causing her to fall on the sidewalk Saturday morning and broke a bone in her foot. Several hours later Mrs. Tension went to the hospital and had her foot put in a cast.

Larry Turner and Wayne McMurtry, who are attending New Mexico Military College at Roswell, spent the week end with relatives.

Mr. and Mrs. George Edmonds and family, of Happy, visited Sunday in the home of her mother, Mrs. J. W. Bragg. Mrs. Bragg accompanied them home for a visit.

Mr. and Mrs. Ray C. Bomar went to McLean Wednesday for a car.

Mrs. Henry Price visited in Lubbock with Mr. and Mrs. Jimmy Price and Stanley Price.

The Prince of Peace is coming.

Let's Face Facts!

- The Panhandle needs a Congressman who will STICK — and who will STAND UP for his district—
- It is only through seniority and experience that he can give the Panhandle the representation it needs — and MUST HAVE, if our interests are to be protected.
- Our all-important agriculture, our industrial development, the Canadian River dam, our rightful place in the Defense Program . . . a stabilized economy and a future offering continued prosperity — all of these DEMAND that we send to Washington

• A Democrat

as our Congressman. Any other approach is to ignore our own self-interests and to sleep on our rights. It is time to WAKE UP, and to be realistic.

IT TAKES AFFIRMATIVE THINKING AND AFFIRMATIVE ACTION TO GET THINGS DONE IN CONGRESS!

● WALTER ROGERS, our Democratic nominee, is mature, able and well-qualified. He offers balance and stability and is pledged to fight for all the interests of our district.

He offers the Panhandle CONSTRUCTIVE leadership.

● Let's quit wasting time!

Ballots for Election Mailed This Week to Farmers

Ballots for election of 1951 county committeemen and delegates to the county convention being mailed this week. We will mail all eligible voters to mark their ballots as they see fit and return them in the envelopes enclosed with the ballots in time for us to reach this office not later than 5:00 p. m. on the day of election, which is, November 18, in all communities except Flat (Antelope Flat) community, which is, November 16, 1950. In event you do not get your ballots mailed, take them in person to the office of election in your community to vote as your committemen probably have more effect on your business than county officials.

P. M. A. News Reporter.

Progress Wins Tuesdays Election

Complete returns in Tuesday election in Briscoe County gave Progress a lead over Ben. All voting boxes were in Antelope Flat, and at the time of going to press this box was out. Progress received 414 votes; Ben, 195. Progress was elected over the Ben by a vote of something like 2,000.

Farm House Destroyed By Fire Last Friday Morning

A farm home on the Rowell 7 miles southwest of Silvertown was destroyed by fire Friday when the J. A. Bradley family were setting up housekeeping on the farm. The Bradley's had moved in and Mrs. Bradley was preparing dinner on an oil stove while Mr. Bradley was to hook up the butane gas system. An open gas line caused the gas to the cook room and the gas ignited. The house contents was a complete loss. Mr. and Mrs. Bradley are the parents of Mrs. W. M. Hood, of Silvertown, and their daughter and children were with them at the time of the fire accident. The children lost their coats and sets in the fire. Mr. Bradley lived burns in an attempt to smother the flame.

St. Armsted W. Self Shows Improvement; Now in California

Mr. and Mrs. M. B. Self, Mrs. Self, of Mineral Wells, and Mr. Self, of Silvertown, returned home Friday afternoon from Oakland, California, where they visited their son, and brother, Sgt. Armsted W. Self in a U. S. Naval Hospital. Mr. Self said Billy was in high spirits, and his condition was satisfactory. The family visited with him for sometime while he was in the hospital. Billy was injured in a fight at the time of the Korean war and was brought back to Silvertown from Japan some ten months ago where he is receiving medical treatment at a U. S. Naval Hospital, Ward 44-A, Oakland, 14, California.

Pennis Raye Dickerson Celebrated Fourth Birthday

Pennis Raye Dickerson celebrated his fourth birthday in the home of his grandparents, Mr. and Mrs. Bob Dickerson November 3. After playing several games the children formed a circle on the floor, the gifts were put in the center and all had a good time singing what each brought. Ice cream and cake was served to fifteen of his little friends and their mothers.

District Conference To Be Held Here November 21

District Conference will meet at the Silvertown Methodist Church on November 21. This will be an all day meeting. Methodist women will serve the noon meal. Every woman is urged to help with the meal. They are planning on 200 to 250 persons to be served at noon, therefore, every Methodist woman that can help let it be known. There will be delegates from every church in the Plainview district present.

Mr. and Mrs. Paul Standifer, of Lubbock, spent the week end with her parents, Mr. and Mrs. D. H. Davis.

Mrs. Leroy Shipman was a business visitor in Tullia Monday.

Dr. Shy Undergoes Surgery Thursday at Local Hospital

Dr. J. M. Shy underwent extensive surgery at the local hospital Thursday morning, November 2, at 8 o'clock. The surgery was performed by Dr. Norman Harris, assisted by Dr. Youngs and Dr. Witt.

The doctor had been ill for the past six months and had been worse recently. Miss Stroud, superintendent of nurses, reports that he is doing fine and should soon be able to be out again.

Mrs. Earl Simpson and Mrs. Edwin Davis visited in Plainview Friday and Saturday with Mrs. Simpson's mother, Mrs. Hudgins, who recently suffered a heart attack.

Stores Will Be Open Here Saturday, November 11

After the attention of the business firms in Silvertown were called to Armistice day being on Saturday, they passed a petition and a majority of the business firms signed and agreed to stay open Saturday, November 11.

Earlier in the year in a meeting they voted to close on this holiday, but it seems most of them were unaware of the date being on Saturday.

Owls Will Play Matadors There Friday, November 10

The Silvertown Owls will go to Matador Friday night, November 10 to meet the Matador Matadors on their field.

Coach Hank Brown said this is the first year Matador has played conference 2-B ball. He also stated that one-half the gate receipts would go to Silvertown.

The score between Estelline and Matador was 7-6 in favor of Estelline. Friday night's game should be a good one. Game will start at 7:30 p. m.

"Curtain Call At Cactus Creek" November 12-13

Donald O'Conner is advance man for a pioneer repertoire troupe which includes Gale Storm, the girl he loves. The show plays Cactus Creek just as Walter Brennan and his gang stick up a bank. Brennan goes to Powder River as a member of the show and when the bank there is knocked off, O'Conner is jailed as a suspect. Freed by Brennan, O'Conner is chased all over Arizona by a posse who would hang him as a bandit and by the bandits who would exterminate him as a double crosser. Brennan solves the problem by surrendering to O'Conner, who gets a large reward and a "yes", from Gale, and the story ends with O'Conner opening his own show with Gale and Brennan.

Next weeks program appears on page two.

Presbyterian Auxiliary Met Monday

The Presbyterian Auxiliary met Monday, November 6, in their all day meeting in the home of Mrs. R. G. Alexander.

Mrs. True Burson reviewed the book Rural Prospect by Mark Rich, she was assisted by Mesdames Dickerson and Tony Burson.

Mrs. Fred Lemons gave the devotional and presided. Seven members were present.

Mart Norris and daughter, Fern, were business visitors in Tullia Saturday.

Mrs. Paul Oliver, of Quitaque, visited Mrs. C. L. Bradley Sunday.

CHRIST FORGIVES MARY BAGDALENE

Christ, (portrayed by Millard Coody) forgives Mary Magdalene during the pageant sequences in a scene from the religious film "PRINCE OF PEACE." This unusual cinecolor feature based on the famous Lawton, Oklahoma, Easter pageant comes to the Palace Theatre, Silvertown on Thursday, November 16th for one day only.

Thursday, November 23 Will Be Observed By Silvertown School

Superintendent M. G. Moreland handed the News the following item pertaining to the Thanksgiving holiday. It is self explanatory and reads as follows:

"Recently it was announced that the Schools would observe the last Thursday in November as Thanksgiving. Due to several reasons we are going to change this to the Fourth Thursday, November 23, instead of the last Thursday November 30.

"We found that most other schools were observing the 23 and we found also that the State Teachers Association meets on this week-end and some of our teachers would like to attend this meeting.

"Classes will be dismissed at the close of the day on Wednesday, November 22, and be resumed on Monday, November 27.

"Be sure and note the change of date."

31 Ratings Are Listed In Quotas for Recall To Active Duty

New Orleans, Nov. 9.—Naval Reservists in 31 specific ratings are listed in the quotas for recall to active duty during January, February and March, 1951, Eighth Naval District headquarters has announced.

This is in line with the current Navy expansion program. Congressional sources said the program represents an increase from about 375,000 officers and men at the time the Korean crisis came about, to approximately 580,000. The increase is being accomplished both by recruiting and procurement of new personnel and recall of reservists.

The announcement of national quotas follows the Navy's recent report on status of recall of its reservists. It also lists Waves and non-rated men to be called in during the first quarter of next year.

The national quota includes about half of the 31,000 reserves required during the first six months of 1951, the Navy said.

It is evenly divided between petty officers and non-rated personnel, and includes 16 chief petty officer ratings and 29 specialties in lower petty officer ratings.

Exact numbers in ratings for the remaining three quarters of 1951 have not been specified, the Navy said. But the general pattern for the second quarter is expected to be similar to first quarter recalls.

After July 1, 1951, recalls will be composed of about 5000 non-rated men per month, chiefly those with less than six months of prior active service, and relatively few petty officers.

The Navy pointed out that recalls would affect both volunteer and organized reservists.

Mr. and Mrs. Bud McMinn and Mrs. Paul Ledbetter were in Plainview Friday, while there they visited Miss Fayree McMinn.

4-H MEMBERS OBSERVING ACHIEVEMENT WEEK THROUGHOUT TEXAS

Texas 4-H club members, more than 113,000 strong, will join with the nearly 2,000,000 members in the nation to observe National 4-H Achievement Week, November 4-12.

Working towards their 1950 theme, "Better Living for a Better World", 4-H youth have been a busy group during the past year. They have produced and conserved food, worked to make their homes more comfortable and attractive, helped to supply the extra labor needed to produce crops and livestock and furnished "know how" for making their farms more efficient and productive. During National 4-H Achievement Week, they will report to the nation on just what they have done. The local volunteer 4-H leaders and the outstanding members will be recognized for the contributions they have made to the welfare of their state and nation.

The officers of the 4-H clubs in Texas, their leaders and extension agents have made plans for achievement banquets, tours, achievement days and other special events for the week. Exhibits will be placed in show windows and 4-H members will tell service clubs, farm organizations, school assemblies and other groups about their work. The winners of state awards will be honored in many counties by their fellow members and leaders. A glance at the accomplishments of 4-H members throughout the nation reveals that 16,000,000 quarts of food were preserved during the year; 100,000 acres were planted to gar-

dens; they produced 9,000,000 birds in their poultry demonstrations; they own one million head of livestock and the list could be extended to cover just about every job in the home and on the farm. They participated in many worth while activities such as farm safety fire prevention, health work, soil conservation, wildlife conservation, tractor maintenance and a large group of others.

Their work is not limited however to producing and conserving the food and feed they produce for they devote much time to personal improvement programs. They participate in leadership training activities, citizenship work and group discussions that help them to better ties, citizenship work and group discussions that help them to better understand some of the important social and economical factors that are now at work in the world. They study and practice democratic procedures and are doing their part to develop the good-neighbor spirit at home and abroad.

Texas 4-H members are extending an invitation to the public to join with them in their observance of National 4-H Achievement Week.

BIRTH

Mr. and Mrs. Leroy McGowan are the parents of a baby boy born November 3, in Plainview hospital named Steven Darrell, weight 7 pounds. Grandparents, Mr. and Mrs. M. B. Self; great-grandparents, Mr. and Mrs. H. L. O. Riddell.

Mr. and Mrs. J. S. Fisher, Mrs. J. C. Archer, Mrs. Pearl Simpson were business visitors in Tulsa Monday.

The Prince of Peace is coming.

Hydrogen Bomb Explosive Found In Ordinary Water

PHILADELPHIA—The research institute of Temple university has announced the discovery in ordinary water of tritium, the form of heavy hydrogen that is the key explosive for hydrogen bombs.

The tritium now planned for American H-bombs is to be made in atomic reactors yet to be built. A little already has been made in existing American reactors. Tritium, like the other forms of hydrogen is a colorless gas.

The reactor tritium is said to cost nearly half a billion dollars a pound. Despite that, the water discovery shows no present promise of substituting. The water extraction appears to be both less productive and far more costly.

With the new tritium-detection method, it may not be necessary to wait until an H-bomb is exploded to gather the evidence. For at present manufacture of tritium is a presumption that it is intended for H-bombs. If in manufacturing, a little tritium is spilled into water, it will spread widely.

Even when diluted to a few atoms per drop, this tritium can be detected by the new methods announced recently. For example, it was reported that a gram of tritium spilled into the world's greatest river, the Amazon, could be detected all the way downstream and far out into the ocean. A gram is a twenty-seventh of an ounce.

Tritium had been suspected in water for more than 20 years, and partly identified by the spectroscopic. The recent discovery used radio-activity.

Norway Announces New Auto; Sells for \$700

NEW YORK—An Oslo dispatch reports that Norway has become the newest automobile producing nation—with a car weighing 450 pounds and costing 4,500 Norwegian crowns (\$700).

It is a three-wheel car, its chassis mostly hard aluminum plate one-tenth of an inch thick. It has no doors, passengers get in through the top, then replace the roof; it does better than 100 miles on the gallon.

With its motor in the rear, the 10-foot by 4-foot car seats two.

Road to Popularity Found Same for Rich and Poor

STATE COLLEGE, Pa. — Drs. M. R. Feinberg and D. H. Fryer, following a study of 2,500 adolescent boys, report the road to popularity is much the same whether you come from the swanky or poor part of town.

That is, they said, rich boys become popular — or unpopular — among their classmates in exclusive schools for much the same reasons as do poor boys attending schools in underprivileged areas.

Here are some of the findings of the study:

"Popular" boys generally appear to have made an adequate adjustment to their parents and teachers. The parents share their interest in sports and other school activities. The boys got good marks in their studies, despite participation in athletics and social affairs. Finally, they appeared to have the ability to "relate" themselves to many individuals at the same time.

In contrast, "unpopular" boys had "more withdrawn" personalities. Their parents were not interested in athletic or social activities; and the boys themselves were not athletic. They seemed to prefer "pursuits which can be conducted alone—hobbies such as reading for pleasure, listening to the radio or attending movies." The boys disliked most of their teachers.

Vegetable Hawker Signed By Opera—to Tend Horses

LONDON, Eng.—Fred Evans, London vegetable dealer, is going to appear with the famous La Scala Opera Company of Milan, but he can't sing a note.

He will take the part of a 19th century peasant in the opera L'Elisir D'Amor and lead two aged white horses, Tommy, 32, and Tulip, 35, across the stage.

Italo Tajo, bass, will be in a Landau drawn by the horses and will sing his first aria while Fred holds the horses for fifteen minutes.

"To tell the truth I felt a bit of a fool at the rehearsals—standing there doing nothing and everyone else singing their heads off," Fred said. "But as long as it suits the company it suits me."

He got the job when he was asked to supply the horses.

New Suits Ask \$4,909,527 In Canadian Ship Disaster

CLEVELAND, O. — Law suits seeking \$4,909,527 from Canada Steamship Lines, Ltd., have been filed in behalf of heirs of 85 persons killed last September 17, 1943, in the Noronic ship disaster at Toronto.

In other suits pending in the U.S. court of appeals the steamship company has sought to limit liabilities to \$445,000. These suits involve claims of \$6,500,000 for death, personal injury or property loss.

The Noronic took 119 lives among the 524 passengers aboard the ship when she burned.

GIRL SCOUT MEETING

The Girl Scouts met Friday, November 3, from 4 until 5 at the fire hall. We discussed how to make money for our Christmas party. We decided to sell programs Thursday at the ball game between Turkey Jrs. and Silvertown Jrs. The price will be 5 cents or whatever you wish to pay. We hope that the boys won't have to change their numbers as they did in the last home game. Be sure and come to the ball game Thursday night and buy programs from the Scout Girls.

Reporter.

PERSONALS

Mrs. R. C. Hutsell who has been in the local hospital for the past week was taken home Sunday. She was feeling improved.

Visitors in the home of Mrs. Pearl Simpson Friday afternoon were: Mrs. Jim Bomar, Mrs. C. R. Badgett, Mrs. J. S. Fisher, Mrs. T. C. Bomar and Mary Tom Bomar.

Esdell Hutsell and Dick Guest, of South Plains, made a business trip to Abilene Sunday.

Mr. and Mrs. Jack Billingsley and sons spent the week end in Lubbock.

Mr. and Mrs. Homer Ragland, Sr., of Dimmitt, spent Sunday in the home of their daughter, Mr. and Mrs. Elzie Yancey.

Mr. and Mrs. Glenn Allen and daughter, of Amarillo, spent Sunday with her mother, Mrs. J. H. Burson.

Mrs. Homer Ragland and Mrs. Elmer Vaughan and daughter, Mrs. Elzie Yancey, Mrs. Albert Rawland and Norma Faye, made a business trip to Lubbock Monday.

Mr. and Mrs. Jimmy Tidwell and son, Mike, of Hobbs, New Mexico, spent the week end with her parents, Mr. and Mrs. Clyde Hutsell.

CHEVROLET TRUCKS

with Chevrolet's Hypoid Rear Axle

Chevrolet trucks are engineered to "take it," in every way. Chevrolet's heavy-duty hypoid rear axles offer maximum strength... with single-unit housings formed into tubular steel beams, and splined axle-to-hub connections that deliver power more evenly. Gears last longer, too... pinion gear is ball-bearing supported at each end, with adjustable thrust pad to prevent distortion on extra heavy pulls. Add these advantages to powerful Valve-in-Head engines, Synchro-Mesh transmissions, and channel-type frames. Then you'll know why Chevrolet is the most popular truck in America. Come see these great Chevrolet trucks today!

West of the Railroad Track, Silverton, Texas

The Supervisors of The Cap Rock Soil Conservation District are: Chairman, Earl I. Cantwell; Vice Chairman, Bray-Cook; Secretary, Chester Burnett; L. A. McJimsey and Glynn B. Morrison.

I own this plot of land, and have bought it through sweat and labor. It is mine to do with as I please. It is mine to build up or destroy. I can take all from it and put nothing back, because that is my privilege as owner. The land will produce good all my life no matter how I treat it, so why should I worry? The attitude expressed here was fairly prevalent at one time but is rapidly declining. The evidence of its decline

and the desire of the farmers to properly care for their land are expressed in the Cap Rock Soil Conservation District by the increased use of soil and moisture conservation practices.

The desire to control the water and protect the land has resulted in the farmers using more and more mechanical structures such as terraces and diversions. Dams are being constructed, improved methods of irrigation used, lakes drained, etc. These mechanical practices are important and have an outstanding place in the program, but they need soil management practices to back them up. They can not do the job properly without assistance.

Several farmers have told me that their land takes water slower, blows and washes worse and bakes harder and more often than in previous years. Most of the farm-

ers realize this is caused by improper and heavy usage. We might compare the soil with a good athlete. He needs the best conditioning practices possible to keep in top shape. Any factors such as improper nutrition, lack of rest, abuse, etc., will tear down his productive power. The same is true of the soil. For top production agronomic practices have to be used that will keep it in best condition. However, the soil has the advantage that it can recover from abuse if given a chance before it is too far gone.

A healthy soil has a strong resistance against the cancer of erosion. The elements necessary for high production are present and the soil is in condition to take up water rapidly. As more and more is taken from the soil and nothing returned, erosion takes the hold and starts eating away the precious inches of top soil. The soil loses much of its resistance, and erosion leaves its scars or ruined land.

As with any disease, it is better to prevent or control erosion rather than try to remedy the efforts after it has devastated the land. One of the best methods is use of the land according to its capabilities. Land that is steep or shallow should be kept in pasture, and grazing restricted to the extent that a good cover is maintained. All cultivated land in the district should have legumes grown on it. The legumes condition the land so that it can absorb and hold greater amounts of water, in addition to putting nitrogen back to the soil. Proper crop residue management will add organic matter and condition the soil to better resist erosion. High residue producing crops are the im-

portant means of having good residue management. Strip cropping also provides protection against erosion. These agronomic practices, cover cropping; strip cropping; range improvement; etc., are important, but they cannot do the job alone. It takes a complete program including these practices as well as the mechanical structures such as terraces. When the mechanical and agronomic practices are used together they help each other to adequately hold the soil and maintain its production.

The Prince of Peace is coming.

EDITORIAL

In going to school, students are holding one of the most important jobs of their entire life. Because it is during this period that the foundation is established for their whole future. Without a strong foundation, that future cannot possibly be secure. Some students seem to think that this part of their life is the most unimportant and is to be treated in the least respect. But those people who did not have the opportunity to go to school or didn't take advantage of that opportunity will be eager to tell them that without, at least, a high school education they will be chosen last when a prospective employer is seeking some one to work for him. True, going to school is not a job that will bring you a paycheck every Saturday night in the immediate present. But look to the future and remember how much brighter it will look if you have the background of a good education.

MEET THE SENIORS

Donald Bean was born in Silvertown, March 6, 1933. He has lived in Silvertown all of his life. Donald has belonged to the F. F. A. for four years. He has lettered in football three years, and is co-captain of his team. He has played basketball three years and baseball two years. He is vice president of the Senior class and was president of the Junior class. He was class favorite his sophomore year. Donald is planning on going to college after his senior year.

NEW BLEACHERS GLITTER WITH COLOR

Well kids! How do you like the new bleachers? They are green on top and silver on bottom. The F. F. A. boys are working on them. The bleachers are supposed to seat three hundred. The bleachers are for Silvertown mostly. The pep squad sits over on the north side or the yellow line. The bleachers are divided by yellow lines. At the north and south ends of the yellow lines it is general admission. In the center it is reserved.

SOPHOMORE NEWS

The Sophomore class had a class meeting Thursday, November 2 at 9:00.

Beth Mason was elected to be the representative from the sophomore class for the crowning of the football queen.

Beth chose Joe Wayne Brooks as her escort.

The class also discussed how much their class dues should be. There was some discussion about what the class would do for Christmas, but no definite plans were made.

FRESHMAN NEWS

The freshmen had a class meeting Thursday morning. They chose Ruby Underwood as their attendant for the football queen. For her escort she chose Gale McPherson.

JUNIOR NEWS

The Junior class met November 2 to choose a Dutches to walk with the football queen at the coronation. Peggy Hold was chosen and she chose Richard Tunnell as her escort.

They discussed having a Christmas party but nothing was definitely decided.

SENIOR NEWS

The Seniors chose as their football queen attendant, Dorothy Heckman. She chose Darrell McWilliams as her escort.

F. F. A. NEWS

The initiation of the chapter farmers was held Tuesday, November 7. The sweetheart contest was held last Tuesday. At press time, the results weren't known.

The Prince of Peace is coming.

F. H. A. NEWS

Last Saturday morning the F. H. A. held a bake sale. They made approximately \$40.00 which will be used to fix their room. They plan another one in a short time.

LONELY HEART'S PROBLEMS

Dear Prunelli:
I have been going with Ted steady for a year and lately I have discovered that he has been stepping out on me and going with other girls. I know I should quit him but I love him so much it would tear my heart in shreds. Please advise me what I should do, Prunelli, and help me through my terrible heartache. I know you will tell me what's best that I should do.

Yours Heartbrokenly,
P. D. Q.

Dear P. D. Q.:

Your story touches me very deeply and after studying your problem carefully I find you are one of many girls suffering from the same cause. Here is my advice to you. Go out with other boys. Probably when he sees this he will realize that you don't care. He will come back to you on bended knees and beg your forgiveness. If by chance this does not work drop him because he isn't worth a grain of salt and will only bring you heart aches. Hoping I've helped,
Sincerely yours,
Prunelli Pill.

ARE YOU A BIG GIRL NOW, OR DO YOU NEED HELP?

Do you need help and advice? Is your heart broken? If so please send your letters to the Journalism Class in care of Mrs. Porter and I will do my best to solve your problems.

Write Lonely Hearts Problems, The Journalism Class care of Mrs. Porter, Silvertown High School Room 12.

MEET YOUR TEACHERS

Miss Gunn was born July 17, 1929 at Flomot, Texas. She went to school at Flomot for 12 years. She went to college at West Texas State majoring in Home Economics. She graduated from college in May of 1950, and is teaching her first year at Silvertown High.

WHAT WOULD HAPPEN IF—

Nosey didn't see all.
Billy Jones beat Joe Lee's time with Dottie.

Eudean and Gay weren't mad at Sunshine.

Joe Wayne and Ruby really broke up.

Joe went steady with Wayma.
Gloria, Beth and Edna didn't have a blind date.

Bonnie only knew the truth about Speedy.

Sunshine hadn't gone with Red.
Keith and Patsy didn't go together.

Millie's ankle ever gets well enough so she can go to the Canyons.

Sam had a date.
Plainview boys didn't come over here on Sunday night.
Jim Baird gained weight.

CORONATION OF FOOTBALL QUEEN

By Buford Clemmer

The football queen was Mary Tom Bomar, her attendant was Mary Lou Bellinger. They were escorted by the football captains, John Francis and Donald Bean. All the football boys had an escort.

The class attendants were:
Freshman: Gale McPherson, Ruby Underwood.

Sophomore: Beth Mason, Joe Wayne Brooks.

Juniors: Richard Tunnell, Peggy Holt.

Seniors: Darrell McWilliams, Dorothy Heckman.

The Prince of Peace is coming.

NOSEY

Warning: Nosey sees all and tells all!

For instance, Nosey saw Patsy and Keith together again Saturday night and Sunday afternoon. Also heard that Dottie was with Joe Lee again Sunday night. Heard they had fun, too. Sunshine is getting good—Friday she was with Red Calvert and Henry McPherson Saturday night.

Couples seen at the dance Friday night: Sunshine and Red, Mary Lou and Pat, Millie and Carl, Gloria Ann and Donnie, Edna and Buford, Gloria and Darrell, Jo Dean and Buddy. Musn't be enough girls to go around. Saw Melvin, John, Norman, Donald, Dean and Darrell stag Saturday night.

Nosey spied a new couple around town Saturday night—John and Ruby.

Nosey wonders why Wad was so dressed up Sunday night. Won't you tell us Wad?

Tenna, we hear you and Joe Davis were in Turkey Saturday night. Did you have fun?
Nosey peeped again. This time she saw Estelle and Pug in Quitaque Saturday night with a couple of good looking boys.

Joe and Wayma are really getting thick lately. It is rumored that they might even be getting ready to go steady.

Riley, Willie, Ray, Gale, Joe Ray, and Tommie Strickler, were in Turkey and Quitaque Saturday night.

MUSIC NOTES

Joe to Wayma—"Baby Doll."
Carroll to Edna—"I Don't See Me In Your Eyes Anymore."

Football boys to Coach—"Why Does It Get So Late So Early?"
Schwatz to Beth—"If You've Got The Money."

Buford to Edna—"Slow Boat to China."
Carl to Millie—"Forever and Ever."

Gay to Ted—"Feuding, Fussing and Fighting."
Darrell to school—"Prison Without Walls."

Bonnie to Joe—"You Were Only Fooling."
Mary Lou to Pat—"Let Me Call You Sweetheart."

Billy to Gloria—"What a Fool I Was to Ever Let You Go."
Tuffy to Sunshine—"Remember Me."

QUESTION OF THE WEEK

By Darrell McWilliams

The question of the week for this week is: "How do the students of S. H. S. like the new bleachers; and loud speaking system?"

Roy Hyatt says that both of these accomplishments are something that we have been needing for a long time.

Norman Jasper says that they are very nice and that the bleachers help the looks of our campus.

Sam Lusk, when asked what he thought, "said that they are a wonderful addition to our stadium, and that we should be very proud of them."

Red Stevens said, Ah! they're pretty good.

Jim Baird says that they will contend to bring out larger crowds to our football games, since some people didn't like to stand up throughout a game.

I have not had time to question everyone on what they think about these new improvements; but I am sure everybody will join me in congratulating the Quarter Back Club, and the Parent Teachers Association for their work toward acquiring these two much appreciated things.

PANTHERS SCORED OVER OWLS 7-6

By Dick Turner

The game was even the first quarter; neither team scored. The air was cold and this kept the ball on the ground most of the time. The boys' hands were too cold to pass. The Panthers broke loose in the second quarter for the first score. The Panthers lead 7-0 at the end of the first half.

The Owls came back in the third quarter with Darrell McWilliams and Joe Brooks carrying the ball. Joe Brooks went over for the T. D. The Owls missed the extra point making the Owls behind. The score stood 7-6 at the end of the game.

My goodness, Mary Tom, we all like that car you were in Sunday before last. We couldn't see the boy you were with, we were too dazzled by his car. Won't you please tell us his name.

Say, Junis! Why don't you put your dieting in the paper? Other people might want to use it.

The Prince of Peace is coming.

GIRL SCOUTS HELP V. F. W.

The Intermediate Girl Scouts sold "poppies" for the ladies auxiliary who handle this sort of business.

I was in the drugstore and saw the auxiliary buying the girls malts and sundies. The girls said "They sold quiet a few poppies and made a little money."

Gay Merrell, Feature Editor.

JOKES

Gloria to salesgirl—"I'd like a refund on this perfume. I don't care for the man it attracted"

A woman is only as old as she looks—unless another woman is doing the looking.

It is wise to apologize to a man if you are wrong—and to a woman if you're right.

SCHOOL NURSE MARRIED

We have not had any details but heard rather directly that our School Nurse, Mrs. Wise, had married over the week-end. We understand that she will resign her job as School Nurse. We regret to lose her as our nurse but wish for her the best in her matrimonial venture.

The Prince of Peace is coming.

Coming November 16

Are Our Texas Highways Being Destroyed by 1% of Highway Users?

This question is presented squarely for the first time by the Texas Tax Journal in its booklet, "The Case of the One Per Centers."

Every Texan who wants good highways, adequate for 99 of every 100 users, should write for a free copy of this revealing booklet.

Approximately 99% of all Texas motor vehicles are registered for a gross weight of 20,000 pounds or less.*

All Texas taxpayers, including your Texas Railroads, have reason to be concerned about the high cost of constructing and repairing our highways and the prospect of building more costly roads made necessary by the operation of highway "box cars."

No one has any desire to bar vehicles of reasonable size from our highways, so long

as each pays its fair share of construction and repair costs.

Other Texas taxpayers should not be required to shoulder the burden of a road system for highway "box cars", representing only 1% of highway users.

Every Texan interested in good highways without increasing the growing tax burden should fill out the coupon below and get a copy of this valuable booklet.

Make Home Piano Less Conspicuous

Make your piano as discreet as it is musical is often a matter of home decorations, points out Kate C. Archer, extension agent in home furnishings, Kansas State College, Manhattan.

The upright piano has a beautiful and a nice grace of line and pleasing with no decorations on it," says Mrs. Archer. "Any articles are placed on it, they should be low ones. A horizontal picture is best above it."

Never, if your upright is quite distinguished you might consider putting it the same hue as walls, and using the background color wallpaper. Pianos can be placed in space dividers between living and dining rooms or may be placed in an alcove in a bedroom.

It is satisfactory to place a space on either side given a radio or record player or a record. Such a musical group, placed for easy listening is a nice solution.

It always appears larger when it is against a narrow wall, particularly between two windows; when close to an entrance; when it is the best-lighted or most prominent wall; when it is across from it stands alone against a wall without other furniture.

Top' Grows Bigger, Becomes Scarcer

New dangers loom for the bareback riders, and death-defying trapeze artists? Yes, say "top" friends, but not in terms of the ever-present risks of individual performers. The fear is a slow process of attrition.

The brain stem is about the size of a man's thumb and from four to five inches long. It extends from the top of the neck, where it connects to the spinal cord, up within the skull to the two cerebral hemispheres of the brain.

From a two-year study of normal and abnormal activity in this region, Dr. Magoun, a professor of anatomy, has come to the conclusion that the brain stem serves normally to keep the rest of the nervous system awake. He was associated in the study with Dr. D. B. Lindsley, professor of psychology, and Dr. Giuseppe Moruzzi, visiting professor from the University of Pisa, Italy.

The professor reports that by direct stimulation of the brain stem of sleeping animals it is possible to produce all the features of wakefulness. Destruction of the brain stem, on the other hand, leaves animals in a state of pathological sleep.

Early Railroads

The earliest railroads in the United States were built of wooden rails with thin strips, or "straps," on top to provide a running surface for the wheels. These were called "straprails." Iron rails 18 inches in length were imported from England as early as 1831.

The first rails of American design were made in the United States in 1844. By 1850 most railroads were being built of iron rails. The first Bessemer steel rails manufactured in the United States were rolled at the North Chicago Rolling Mills on May 25, 1865, and by 1880 about 90 per cent of all tracks in the United States were laid with steel rails. At the end of another ten years, 80 per cent of the country's railroads were equipped with steel rails, and by the late 1890's steel rails almost completely replaced iron rails.

It's in the Finish

Multicolored pearls are no longer thought of as imitations, but as fashion accessories, acceptable in themselves. The impression of depth and softness in a pearl is the result of light reflections from the multitude of facets within the shell, making it impossible to focus on any single layer. In multicolored pearls, this effect is caused by layers of crystals incorporated in the finish which is applied to plastic and glass beads. The beads used are guanine or pearl essence crystals. They are obtained from fish scales and are only 40 microns of an inch in thickness.

Gregorian Calendar

In 1582, Pope Gregory VIII ordered a simple reform. Astronomers showed him that the sun is some 11 minutes less than 24 hours. In the course of a Julian century, spring's first day had moved forward from March 21 to March 11.

To correct this, Gregory directed that October 4, 1582, be followed by October 15, and that leap-year days be omitted in the last year of each century except years divisible by 4 (as 1600). His reform reduced the annual error to 26 seconds, which will add up to one day by the year 4000 A.D.

New Theory of Earth's Origin Proposed at U. C.

A new theory to account for the creation of the earth has been offered by Dr. Wendell Latimer, professor of chemistry at the University of California, in a report in the technical journal, Science.

The theory is a composite of ideas suggested by geologists and astronomers, together with some theories on the chemistry of creation set forth by Dr. Latimer, who is an expert on thermodynamics, the science concerned with the mechanics of heat.

Dr. Latimer's suggestions begin with the assumption that the earth was formed by condensation of a cold cosmic cloud, which is in agreement with other modern ideas on cosmology. The scientist then proceeds to cite in detail the chemical reactions which reinforce this theory.

These particles fell together at varying speeds, the heavier, metal particles concentrating at the center, the lighter materials on outer layers. Heat from the radioactivity of potassium and other elements provided the energy for the chemical reactions within the earth which produced the atmosphere, water, and mountains and continents of the earth.

It appears that about half of the solid particle material in the universe has condensed into planets and stars, Dr. Latimer said. The remainder is in the great cosmic clouds which still exist in space, clouds from which new planets and stars are being created in the continuing evolution of the universe.

Northwestern Scientists Unravel Secrets of Sleep

Northwestern University scientists believe they have discovered the mysterious mechanism in man which puts him to sleep and wakes him up.

Dr. H. W. Magoun of the medical school said today that changes from wakefulness to sleep seem to depend upon periodic variations in brain function now believed to originate in the brain stem.

The brain stem is about the size of a man's thumb and from four to five inches long. It extends from the top of the neck, where it connects to the spinal cord, up within the skull to the two cerebral hemispheres of the brain.

From a two-year study of normal and abnormal activity in this region, Dr. Magoun, a professor of anatomy, has come to the conclusion that the brain stem serves normally to keep the rest of the nervous system awake. He was associated in the study with Dr. D. B. Lindsley, professor of psychology, and Dr. Giuseppe Moruzzi, visiting professor from the University of Pisa, Italy.

The professor reports that by direct stimulation of the brain stem of sleeping animals it is possible to produce all the features of wakefulness. Destruction of the brain stem, on the other hand, leaves animals in a state of pathological sleep.

Metallurgical Specimens

A simple, inexpensive method for mounting metallurgical specimens at temperatures only slightly above room temperature and without the external application of heat has been developed by Denton L. Smith of the national bureau of standards.

The technique employs a denture material of modified acrylic resin as the mounting. This material consists of a polymer and monomer which, when mixed in the proper proportions, will polymerize or set under pressure at room temperature. As the amount of heat generated by the polymerization reaction can be controlled by varying the amount of resin present, the new procedure makes it possible to mount a wide variety of specimens for polishing and microscopic study without disturbing the crystal structure.

Ownership of Farmlands

Private individuals owned nearly 85 per cent of farm land in United States, according to a recent bureau of agricultural economics study. Nearly 6 per cent belonged to corporations, another 6 per cent was public and 3 per cent was owned by Indians. Since farm land can be owned by practically anyone, owners were engaged in a wide variety of occupations. About 65 per cent of the owners of farm land were farmers, 8 per cent retired farmers, 3 per cent housewives, 10 per cent business-professional and 14 per cent clerical-laborers. Anderson found that 41 per cent of the farm acreage of the United States was in farms of 1,000 acres or more.

Blackleg in Cattle

Blackleg is caused by a spore-forming germ which can live for years in the soil. It may enter an animal's body through small cuts and punctures in the skin, or through grazing. "Suspect blackleg," an American Foundation for Animal Health bulletin urges, "if young cattle develop a high fever, lose appetite, become lame and show great depression. Typical swellings caused by the disease give off a crinkling, tissue-paper feeling if they are touched. Also of great importance is to burn or bury deeply under lime the carcasses of animals which have died."

IT'S USUALLY THE SAME STORY—HUNT SAFELY DON'T KILL YOUR NEIGHBOR

This is the time of the year when hunting accidents take their heaviest toll of lives. Most accidents could be prevented if the simple rules of safety with firearms are observed. "Trigger happy" hunters, says R. E. Callender, extension specialist in wildlife conservation of Texas A. and M. College, endanger the lives of every other hunter in the woods or fields and also cause much damage to wildlife. Their wild shooting leaves many birds and animals crippled and these are lost because they are not usually found until they are dead.

Practicing safety with guns in the fields or woods then, says Callender, is just a good conservation practice and it applies to both humans and wildlife. He reports that almost two-thirds of all hunting accidents result from three causes: humans in line of fire, mistaking humans for game and hunting with the safety catch off on the rifle.

He points out that good sportsmanship is just good manners. It includes using the right gun for the right game, hunting only in season and not taking more game than can be used even though the bag limit may permit the hunter to take more. Bird hunters, he says, should use a trained dog to retrieve crippled birds. The careful and wise hunter puts out cigarettes and campfires, breaks matches before dropping them and leaves the area where he has hunted in good condition.

Here is Callender's code of safety for the hunter. Treat every gun as if it were loaded; it is usually the empty gun, they thought it was empty, that takes the most lives. Loaded guns should never be carried in an automobile. The gun barrel and action should always be checked to make sure there are no obstructions in either. The gun should be carried so that the hunter always has control of the direction of the muzzle, even if he should stumble. The good hunter never pulls the trigger until he is sure of his target and never points a gun at anything he doesn't intend to shoot.

He says loaded guns should never be left unattended and that the hunter should unload his gun before climbing a tree or over a fence. Bullets fired at flat, hard surfaces, or at objects on the surface of water may ricochet and hit objects not thought to be in the line of fire. Last but very important, he says gunpowder and alcohol should never be mixed for the results can be disastrous. The intelligent hunter will be thinking about how he can aid in conserving the wildlife of the land so that he and other hunters will have areas where they can continue to enjoy one of America's greatest sports in the years ahead. Wasteful and careless hunting habits on the other hand, says Callender, can destroy the protection, vegetation and even the wildlife itself. It's up to every hunter, he concludes, to see that this situation does not exist in the areas where he hunts.

AGRICULTURAL FILLERS

Cotton farmers are urged to purchase their minimum insecticide needs at this time or at least within the next few weeks. Farmers and distributors by taking delivery now can keep the insecticides and at the same time, help the storage and transportation situation.

Buy and store insecticides now for use on the 1951 cotton crop. They'll cost no more and possibly less than next spring and summer when you need them.

Hauling and spreading barnyard fertilizer daily will prevent the nutrients from leaching out and being lost before it is hauled to the field or pasture for spreading.

The week of November 1-12 is National 4-H Achievement Week. America's 2,000,000 4-H members (approximate) will join together during the week to show to the world their 1950 accomplishments.

Although the farmhouse is the business center of the farm, its location should be considered from the standpoint of its relationship to other buildings, roads, water supplies and the prevailing winds.

Fleshing, finish and pinfeathers, or the lack of pinfeathers, are the important factors to consider when selecting quality turkeys.

Mr. and Mrs. H. Roy Brown had all their children Sunday for lunch. Mr. and Mrs. Milton Dudley and family, Mr. and Mrs. Arnold Brown and family, Mr. and Mrs. Norland Dudley, and Mr. and Mrs. Durwood Brown and children, of Plainview; Miss Jeanne Dudley, of Farwell, and Mrs. Dudley of Texas City.

The Choice of Champions - DODGE "Job-Rated" TRUCKS

49 out of 86 champion truck drivers choose Dodge!

Champion drivers know champion trucks! The nation's state champions... with proved reputations for safety records and driving skill... competed recently in New York at the National Truck Rodeo. Given the privilege of driving any make truck, these champions selected Dodge for national competition by more than 2 to 1 over all other makes combined!

FIRST TROPHY in the Straight Truck Class was won by Richard Wold, Glendening Motorways, Inc., St. Paul, Wold, Minnesota State Champion, drove a Dodge GA-152 1 1/2-ton "Job-Rated" Truck.

FIRST TROPHY in the Tractor, Tandem-Axle Semi-Trailer Class was won by O. E. Chapman, Pacific Intermountain Express, Oakland, Calif. Chapman, Colorado State Champion, drove a Dodge YA-142 4-ton "Job-Rated" Truck.

SECOND TROPHY in the Tractor, Tandem-Axle Semi-Trailer Class was won by Robert Rudesill, Glendening Motorways, Inc., St. Paul, Rudesill, Minnesota State Champion, drove a Dodge YA-142 4-ton "Job-Rated" Truck.

THIRD TROPHY in the Tractor, Tandem-Axle Semi-Trailer Class was won by Harry W. Pollock, Johnson Motor Lines, Inc., Baltimore, Pollock, the Maryland State Champion, drove a Dodge YA-142 4-ton "Job-Rated" Truck.

THIRD TROPHY in the Straight Truck Class was won by R. D. Wallace, Johnson Motor Lines, Inc., Charlotte, Wallace, who is North Carolina State Champion, drove a Dodge GA-152 1 1/2-ton "Job-Rated" Truck.

THIRD TROPHY in the Tractor, Single-Axle Semi-Trailer Class was won by Frank Kirkpatrick, Columbia River Truck Co., Portland, Kirkpatrick, the Oregon State Champion, drove a Dodge JA-128 2 1/2-ton "Job-Rated" Truck.

Scientist Creates 'Fog' With Aid of Ping Pong Ball

A Cornell psychologist has succeeded in creating a fog with a ping-pong ball.

Conducted for the U.S. air force, the experiment is designed to test a theory of depth perception new to psychology.

Many psychologists believe that man's ability to see a three-dimensional world is due to a process which is the brain's duty, rather than the eye's. Dr. James J. Gibson, professor of psychology at Cornell, holds another theory—that this kind of perception can be explained in terms of images on the retina of the eye.

Dr. Gibson maintains that texture is the most important property of a surface. In fact, he is trying to find out whether a surface without texture can be seen at all.

The ping-pong ball "fog", conceived at Cornell by Dr. Julian E. Hochberg and an assistant, Gideon Seaman, is being used to create a world without any surfaces.

Dr. Gibson has constructed a pair of goggles from the two halves of a ping pong ball. When a subject, wearing the goggles, is placed in a specially-lighted perception room, he can see brightness or darkness but he can't see any surfaces, because the celluloid is so close to his eyes that he can't make out its texture. Because of the absence of texture, he has the sensation of being enveloped in a fog. By this means the Cornell scientist can study what we see when we can't make out surfaces.

Cooperative, Democratic Teachers Most Admired

The nation's school children have their own ideas of what it takes to make an effective teacher. And the youngsters' ratings of their teachers are apt to be much different from the ratings of school supervisors and superintendents.

This is the opinion of Dr. Paul A. Witte, Northwestern university professor of education, who analyzed approximately 90,000 letters from American school-age youngsters. The letters on the subject, "The Teacher Who Helped Me Most," were written to the Quiz Kids radio program.

Prof. Witte found that the teachers most admired by the first to twelfth grade pupils were those with a "cooperative, democratic attitude."

In one of the letters describing her favorite teacher, one school child said: "Our class is just like one big happy family; I am not afraid of school any more." Another youngster wrote: "She made me feel good and comfortable at school—just like you were home in your living room."

Other teachers who ranked high with their students, according to Prof. Witte, were those who had such qualities as "kindness and consideration for the individual," "patience," "wide interests," "pleasing personal appearance and manner," "fairness and impartiality," "sense of humor," and "good disposition and consistent behavior."

In Grandma's Day

When grandma kept house some half century ago she and the maid worked hard from the time the sun came up in the east until it set in the distant west. In those gay 90's there was an old saying that a housewife's work was never done. That epitomized the fact that in those days housework was something of real drudgery. There were no labor saving devices which the housewife and maid enjoy today. These modern conveniences are the electrical harnessed servants that do the work in minutes that in the long ago required hours.

Venezuelan Ore Development

The U.S. ambassador to Venezuela said at a recent press conference in Caracas that "there was prosperity and peace in Venezuela." He added that the country was progressing, supported by the petroleum industry and by the recent development of the iron ore fields. It is estimated that Bethlehem and U.S. Steel corporations have invested one hundred fifty million dollars in the development of this industry.

Boost Steel Output

Five western steel producing states made 5.3 per cent of the nation's raw steel in 1948 compared with 2.5 per cent ten years earlier. The tonnage output of these states west of Missouri increased nearly fivefold during the same period. Steelmaking furnaces in California produced 2,013,600 tons in 1948, exceeding the record of the previous year by 12.3 per cent. Colorado, Utah, Washington and Oregon combined to exceed their 1947 peak output by nearly 5 per cent.

U.K. Hydroelectric Plant

Loek Sloy—a mountain lake 800 feet above sea level and about two miles northwest of Loch Lomond—is the site of the largest hydroelectric development in the United Kingdom. It is the first of 20 such Highland projects to be completed. After centuries of oil lamps, coal and peat heat, Highland homes are now beginning to enjoy the luxury of electricity.

Embezzlers Tell What Spurs Them To Commit Crimes

LOS ANGELES, Calif.—Dr. Donald R. Cressey of the University of California, in a study of embezzlers, reports that embezzlement of money by persons to whom it is entrusted is not simply the result of "criminal tendencies" or the classic temptations of "wine, women and waging."

He reports this misapplication of money results from a coincidence of these prime factors:

The development with an individual of a financial problem that he does not feel he can share with anybody; perception that access to other people's money presents a possible solution to the problem, and rationalization by the individual of pseudo-legitimate grounds for misusing the money.

Typical "non-sharable" problems, the sociologist said, are when a bank teller loses heavily on the races, but in his position cannot afford to admit any connection with gambling; and when a business or professional man makes a disastrous investment without consulting anybody and thereafter is ashamed to admit his ineptness.

The opportunity factor is the handling of other people's money under circumstance where it can presumably be "borrowed" briefly without being missed.

The rationalization factor in embezzlement is not the ultimate self-justification in which most criminals indulge, but justification before the crime which in retrospect often does not seem plausible even to the malefactors themselves.

Sometimes, Dr. Cressey found, the rationalization involves admitted dishonesty, but dishonesty that is presumed to have justification. Thus in one case a man who thought he was not receiving adequate pay took the difference out of his employer's till; later, when he got an increase above what he thought was his due wage, he tried to reimburse the till accordingly—but was caught before he finished.

He suggested that in dealing with apprehended embezzlers it should be borne in mind that most of them realize the error of their ways even before they are caught. Of the other, imprisonment alternatively may bring their standards back into proper adjustment or through exposure to criminal ideologies, may confirm their twisted value scales.

Soviet Union Haircut Adopted by Satellite

PRAGUE, Czechoslovakia — Russia's satellites are now copying the Soviet army's hair cut. The Czech army newspaper Obrana Lidu reported that from now on that country's soldiers will have their heads shaved like Soviet troops.

The writer said one private, who already had had his head shaved in accordance with regulations, told how "his girl burst into tears when she saw him without hair."

The writer then advised the soldier to forget the girl "because she evidently cares only for his hair and not that he is a defender of our people's democratic homeland."

Synthetic Topsoil Grows Bigger, Greener Vegetables

CHICAGO, Ill.—Dr. Eduard Farber of Washington, D.C., told the American Chemical society recently sawdust can be turned into synthetic topsoil to grow bigger, greener vegetables.

Chemically treated sawdust becomes like humus, he reported. Erosion robs the nation of millions of tons of precious topsoil annually. And lumbering piles up mountains of sawdust, estimated at 60 million tons a year, for which there are no great uses.

The new chemical process might help solve both problems. Early tests with sawdust have been promising. From 10 to 40 tons of converted sawdust were applied to an acre of soil. Seeds germinated sooner and more of them germinated, he said.

Leaves were bigger and greener, and the weight of the produce like radishes, beets, onions and tomatoes were greater.

The sawdust is treated with mineral acids, at temperatures well over the boiling point of water but not hot enough to char the cellulose material in the sawdust, he explained. The sawdust forms humus substances by loss of water and some acid reactions.

New Theory of Creation; Milky Way Born of Clouds

WASHINGTON—A new theory of creation has been presented by Dr. Lyman Spitzer, Jr., director of the Princeton university observatory. He says latest astronomical evidence indicated the stars of the Milky Way were formed about three billion years ago out of "flying cosmic clouds."

Dr. Spitzer offered no explanation where the flying clouds came from. The report said it "still is a complete mystery."

The theory is that great gas clouds, thinner in substance than the purest vacuum ever produced on earth, gradually condensed into individual stars as a result of gravity and the "pressure" of light.

SAN JACINTO NEWS

Mr. and Mrs. Gilford Flowers entertained the school children with a Halloween party Tuesday night.

Mr. and Mrs. Wayne Preston and daughter have moved near McLean, Texas. Wayne is employed on the Jim McMurtry ranch.

Miss Bettye Culwell was crowned football queen at Tulia Friday night.
