H. O. (Herb) HODSON

Southwestern Public Service Company Promotions

Promotions were forthcoming today (Thursday) for two officials of the Southwestern Public Service Company, with the announcement by J. E. Cunningham, president, that J. G. (George) Ausman has been elevated to the position of executive vice president, and that H. O. (Herb) Hodson has been named vice president and operating manager.

Mr. Ausman has been associated with the Southwestern Public Service Company since 1928. He moved to Amarillo as Operating Manager in March, 1944, and was made Vice President in January, 1947. Mr. Hodson joined the Southwestern Public Service Company organization as Superintendent of the Pecos Valley Division with headquarters in Roswell, New Mexico in 1938, and has been Chief Engineer of the Company with headquarters at Amarillo since 1941. Mr. Ausman and Mr. Hodson have, during the last seven years, directed the planning and construction of new power plants and other equipment costing approximately \$100,000,000.

"These promotions," said Mr. Cunningham, "are in line with the Company's policy of obtaining its officers from within the Company's organization so that the Company's official family consists of friends and neighbors of the people served and are thoroughly familiar with local problems and requirements."

"Our Company is faced with a big financing job," Mr. Cunningham continued, "we will, during this year, spend about \$20,500,000 on new equipment, more than our total sales. This expansion has been going on for two years and, with the speed-up due to the national emergency, will continue indefinitely in the future. We have had to raise, and will have to continue to raise, almost \$20,000,000 per year in new money from outside the territory served. This money comes from large life insurance companies and from individual investors from coast to coast. The raising of the new money necessary to finance the continued expansion of electric power capacity, which is vital to war plants and residential and commercial customers, is becoming almost a full-time job, requiring a great deal of traveling from coast to coast."

"So far," Mr. Cunningham concluded, "we have been able to maintain our operating efficiency at a level meeting approval of investors who furnish our new money. The promotions of Mr. Ausman and Mr. Hodson are designated to further improve our operating organization."

Other Vice Presidents in the operating organization are A. R. Watson, Amarillo, and H. L. Allen, Lubbock. Mr. W. F. Stanley, Financial Vice President, and Mr. H. L. Nichols, Board Chairman, office in the Mercantile Bank Building, Dallas, Texas.

Mr. and Mrs. Chick Northcutt, Mr. and Mrs. Kemp Thompson and boys attended the community party at San Jacinto Friday night.

J. G. (George) AUSMAN

Funeral Rites For James Taylor At Lockney

Masonic rites were conducted at 3 o'clock Wednesday afternoon, January 24, at the Lockney Cemetery for James Whitfield Taylor, pioneer teacher in the Texas Panhandle and New Mexico.

Mr. Taylor, 76 years old, died Sunday at Mountain View, Arkansas.

He came to Texas from Arkansas more than 50 years ago and taught in rural schools in Floyd County and in New Mexico before returning to Arkansas to teach. He was a graduate of New Mexico State Teachers College at Las Vegas.

Mr. Taylor was married in 1898 to Miss Jennie Brown, member of a pioneer Floyd County family. She died in 1902. Their children are Mrs. Bishop Whittington, of Lockney, and Mrs. Donie Hanson, El Salvador, Central America.

In 1914 Mr. Taylor was married to Miss Gertrude L. Dupuy of Elida, New Mexico. She is among survivors who include their daughter, Mrs. Leslie Taylor Dooley, of Highlands California, and Robert L. Taylor, Mountain View, Ark. Other survivors are two sisters, Mrs. Lucy Guthrie, of Strawberry, Ark., and Mrs. Maggie Bourland, Canyon; two brothers, Millidge H. Taylor, Lockney, and P. C. Taylor, Breckenridge; nine grandchildren and three great-grandchildren.

Mr. Taylor was a 32nd degree Mason. He held membership in the Little Rock Consistory of the Scottish Rites order.

Mr. Taylor was a brother-in-law of H. Roy Brown. He was a former resident of Briscoe County, having taught school at Lakeview south of Silvertown.

Among those from Silvertown who attended the funeral of Mr. Taylor were: Mr. and Mrs. H. Roy Brown, Mrs. Milton Dudley, Arnold Brown, Grady Wimberly and L. D. Griffin.

Cheaper by the Dozen Showing at Palace February 4-5

A true story of family life in the '20's written by two of the children, this relates the somewhat unorthodox but successful methods by which Frank Gilbreth, an industrial engineer, raises his brood of a dozen children. His methods include the playing of foreign-language records while the children are bathing, so they can study and cleanse themselves at the same time, and the calling of family council for important decisions. But father dies of a heart attack while enroute to Europe for important industrial conferences. The family sticks together by sharing the housework and getting jobs, and the mother, Myrna Loy takes over Gilbreth's work.

Next week's program appears on page two.

Mickey Cornett and Johnnie Ted Bingham, who are attending the State University at Austin, spent the week end with home folks. Mrs. J. D. and Mrs. Johnnie McGavoc, were business visitors in Amarillo Thursday.

A HOME TO LIVE IN

Small House Planning Bureau, St. Cloud, Minnesota

DESIGN C-196. The plan shown here has many features which are worthy of close study. For instance, the bedroom wing, consisting of three bedrooms and bath is served by a minimum of hall.

The living and dining rooms are combined into one room with corner windows, a bay window centering on the fireplace, a storage cabinet, book shelves and coat closet.

Entry from the rear has a lavatory, large storage closet for supplies, toys, equipment, etc., and a convenient lavatory. A connecting door from entry to rear bedroom makes that room available for double duty as workroom or den.

Corner cabinets and a sideboard in the kitchen still leaves space for kitchen dining in addition to the dining room.

Frame construction is used throughout with siding and asphalt shingles.

Floor area is 1213 square feet and 23,322 cubic feet.

For free detailed information about construction see your local lumberman.

Watkins-McMinn Marriage Plans Announced Here

Mr. and Mrs. Bud McMinn announce the engagement and approaching marriage of their daughter, Fayree, to Melvin Watkins, son of Mr. and Mrs. L. A. Watkins, of Plainview.

The wedding will take place Thursday, February 15, 1951 at 7 o'clock in the evening at the parental home. The bride-elect's brother, Rev. Travis McMinn, of Brownwood, will officiate.

Basketball Games Here Friday Night With Quitaque

Coach Hank Brown announced that the local basketball boys and girls will play Quitaque teams here Friday night. The first game will start at 7 p. m.

On February 5, Matador basketball teams will play the local teams, both boys and girls. Game will be called at 7 p. m. This will be the last game of the season, Coach Brown said.

1951 Heart Fund Drive Starts Here February 1

Billy Wood, American Legion Commander and Carl S. Crow, Adjutant, are in charge of the 1951 Heart Fund Drive that is scheduled to start February 1. The purpose of this drive is to secure funds to fight heart disease.

Plastic hearts are being placed in all the business houses in Silvertown, and donors are asked to drop their contributions to this cause in the container.

Mr. Crow explained that this is the only way a drive will be made for the Heart Fund.

Fat Stock Show To Be Held Here February 23

The directors of the Briscoe County Junior Fat Stock Show set the date, premiums and classes for the 1951 show in a recent meeting.

On February 23 the FFA and 4-H members in Briscoe County will exhibit their steers and pigs and compete for the blue ribbons and almost \$600 in premiums. The directors agreed upon a slight increase in premiums for the pig classes and in the lower bracket of the calf classes. A new class of calves has been added where a group of two calves fed and owned by the same exhibitor will compete in a separate class.

The exhibitor of the Grand Champion calf will receive a total of \$50 and \$25 goes to the exhibitor of the Grand Champion pig.

County Agent, Leo White and Vocational Agriculture teachers, G. H. Bunch and H. P. Parker are helping the exhibitors shape up their calves and pigs for the show. Over 40 calves and 15 pigs are expected to be entered in the show. These figures compare with 26 calves and 12 pigs entered in the 1950 show.

Chappell Family Are Slowly Improving From Injuries

G. W. Chappell, son of Mr. and Mrs. Andy Chappell, who was injured in a car crash with his parents during the holidays, and who has been in an Amarillo hospital for treatment was brought home Saturday. His condition is satisfactory. His father still remains in the hospital, however, his condition is reported improved. His mother has been moved out of the hospital to the home of a son in Amarillo, and reports indicate she is doing fine.

Judge Lee Nowlin Will Be Guest Speaker Tonight

Judge Lee Nowlin, president of the Plainview Lions Club will be guest speaker at the Silvertown Lions Club regular meeting tonight (Thursday).

Judge Nowlin appeared before the club several weeks ago, and is an able speaker. All members are urged to keep this date in mind.

Mrs. Ova Wimberly, of Tulia, and brother, O. B. Ratliff, of Denver, Colorado, visited in the home of Mr. and Mrs. Grady Wimberly last week.

Mrs. Ruby Elliston left last week for Fort Worth where she will visit her daughters, Mr. and Mrs. Peter Hoyt and family and Mr. and Mrs. A. G. Tedlock and family.

Grandma Vaughan Celebrates 99th Birthday Sunday

Sunday, January 28, at the home of Mr. and Mrs. Shine (Herbert) Stephens twelve miles south of Turkey 130 registered guests gathered together to celebrate Grandma Vaughan's 99th birthday.

Each guest brought a covered dish and dinner was served picnic style from two long tables in the Stephens dining room.

The three tiered birthday cake with 99 candles and the word "Grandmother" was the centerpiece for the tables. There were several bouquets of flowers and pot plants as well as many other gifts brought by her friends and relatives.

The afternoon was spent showing pictures on the screen of grandma's 98th birthday and taking new pictures of the event of the day.

Several guests came in the afternoon that were unable to be there for lunch.

All parted in the late afternoon wishing Grandma many more birthdays.

Those present for the occasion were: Mr. and Mrs. Neal Vaughan, Oakview, California; Jimmie Hall, Santa Barba, California; Elbert Stephens and family; W. A. Stephens; Boliby Cardia and Cecil Stephens, Portales, New Mexico; Loyd Stephens; Doyle Stephens; R. E. Stephens, Plainview, Texas; Lyndon Stephens and daughters, Portales, New Mexico; Bailey Henderson and Lawton, Lockney; Sidney Rodgers and children, Plainview; Clyde Lightsey; John Vaughan; Elmer Vaughan and Lola Mae; Ralph Vaughan, of Happy; Van Crawford, Tulia; Willie Vaughan and Betty, Happy; Ewing Vaughan and children; Homer Stephens and children; Walter Brannon and daughters; Paul Ledbetter and sons, R. T. Rain and children, O'Donnell; French McGavock, Happy; Bud McMinn;

Wallace Rain, O'Donnell; Rex Holt; Ray C. Bomar; Doug Arnold; W. L. McMinn; Johnnie Arnold; H. P. Howard; Simmie Vaughan, Happy; Price Bradley, Tulia; Ora Roy, Littlefield; Cephus Flowers, Tulia; Gilford Flowers, Vigo Park, Texas;

Joe Hood, W. M. Hood, Charles Cole, Happy; Doyle Younger and Mr. and Mrs. Perry, of Jefferson, Texas;

Mrs. Lottie Henderson and Dwain; Gaston Owen, Quitaque; Mrs. J. E. Wheelock; Mrs. Jim Bomar, Mrs. M. L. Welch, Veral Vaughan, Eural Vaughan;

The honoree, Grandmother Vaughan, the hosts, Mr. and Mrs. Shine Stephens.

Mr. and Mrs. Mart Self Visit Son at Corpus Christi

Mr. and Mrs. Mart Self and Zobie, of Silvertown, and Mrs. Orville McGawen and son, of Plainview, spent the week end in Corpus Christi with their son and brother, Sgt. Billy Self. Billy is getting along nicely. It will be sometime before he can be up and about. He is still confined to his bed and wheelchair.

While his parents were there they carried Billy to a picture show, and Saturday night his doctor let him spend the night with his family.

Friends from San Antonio and Quitaque visited Billy Sunday afternoon.

It will be remembered that Sgt. Billy Self was wounded in action since the outbreak of the Korean disturbance.

Mr. and Mrs. Kenneth Davis and daughters, of Snyder, Texas, visited Sunday in the home of Mr. and Mrs. E. C. Newman. The Davis family lived in Union City, Tennessee, before moving to Snyder.

Buster G. Boland, of Amarillo, was a business visitor in Silvertown Monday.

Lt. E. A. Bellinger, Jr., of Rome, New York, spent the week end with his parents, Mr. and Mrs. E. A. Bellinger, Sr.

DR. BUFORD L. NICHOLS

Dr. Buford L. Nichols Will Speak Feb. 11 at First Baptist Church

Dr. Buford L. Nichols will speak Sunday night, February 11 at the First Baptist Church. Dr. Nichols went to China in 1937. He is professor of Old Testament and Hebrew and Ethics in the China Baptist Seminary. He has been pastor of Tenthon Church, where Lottie Moon labored.

Dr. and Mrs. Nichols have three sons, Buford, Jr., John Conner, and David.

They arrived for their furlough in September, 1950. He hopes to return to China after one year. His time is being given to speaking in China and Mission work there while on his furlough.

Keep this date in mind for you will appreciate hearing him speak on China and our mission work there.

M. O. BLACKSHEAR

O. M. Blackshear Former Silvertown Man in Olton Hospital

O. M. Blackshear, of Olton, former local manager for Southwestern Public Service Company, is in the Olton hospital where he was carried about two weeks ago, when he fell from a light post while working.

Mr. Blackshear suffered internal injuries and several broken ribs from the fall. His condition had been considered critical until last Saturday, when he showed considerable improvement.

A. H. Jackson visited Mr. Blackshear Sunday and said he was doing fine. Mr. Blackshear was transferred to Olton last summer by the utilities company.

Miss Estell Bradley Wed to Bill Gilbreth January 28

Miss Estell Bradley, daughter of Mrs. John Bradley, and Bill Gilbreth, were united in marriage Sunday afternoon, January 28, in the parlor of the First Baptist Church at Lockney. Rev. Cobb read the marriage vows. The only attendants were the parents of the bride and groom.

Mr. and Mrs. Gilbreth are at home on their farm three miles northeast of Lockney.

THE ONE PER CENTERS

Many recklessly extravagant statements have been made by and about the trucking industry in Texas; so many that the public interest demands that the entire picture be made clear.

Everyone agrees that there is a place in the transportation industry for trucks. How big they should be—how fast they should run—how much they should pay for use of the public highways as rights-of-way—are questions which the truckers dispute with the public.

Highway safety, highway costs, and highway damage are involved.

Present day highway boxcars are 45 feet long and 8 feet wide. If loaded to legal capacity in Texas, they weigh 48,000 pounds, and combined with all other trucks weighing (loaded) 20,000 pounds or more, they comprise only about one per cent of the total number of motor vehicles registered in Texas.

For this one per cent of registered highway vehicles, Texas taxpayers are paying for more costly roads and bridges, facing ever-increasing maintenance costs and suffering untold damage to Texas public roads.

The farm truck, the automobile, the city delivery truck, and practically all other privately operated highway vehicles comprise the 99% for whom Texas' present highways were constructed and could be maintained for about one third of the cost presently imposed on the 99% by only one per cent of Texas highway users. The Texas Tax Journal, Frank R. Connolly, Editor.

High yielding pastures are a cash crop and should be treated as such.

PREVENT LOSSES FROM SWINE ENTERITIS BY USING GOOD SANITATION

Losses from swine enteritis can be most effectively guarded against by using good sanitation and management practices, says E. M. Regenbrecht, swine husbandman for the Texas A. and M. Extension Service.

Regenbrecht recommends isolating newly-purchased swine from the home herd for at least three weeks—until they are known to be free of disease.

He advises keeping swine away from old hog lots, contaminated pastures, stagnant pools and other sources of infection.

Swine that are suffering from internal or external parasites, or from vitamin deficiency, may be more severely affected by enteritis than healthier animals. Regenbrecht points out that it is best to supply adequate rations to avoid lowering the hogs' resistance to disease.

By earmarking their sows, farmers can identify and weed out the sow "carriers" of enteritis from their herds.

Regenbrecht advises farmers to watch their hogs closely for scouring, loss of weight, and failure to convert feed into gains. At the first sign of trouble, isolate the ailing hogs from the apparently healthy ones and get a veterinarian to diagnose the disease.

Enteritis symptoms are similar to those of other swine diseases. If swine suffering from enteritis are treated or vaccinated for other diseases, the result may be disastrous.

Cotton farmers are reminded that treating planting seed will aid them to secure a better stand and will also help to control angular leafspot and soreshin.

Adrenal Gland Plays Role When One Suffers Injuries

Another step forward in better understanding the important role played by the adrenal gland in helping the body recover from injuries has been achieved, a University of Michigan doctor states.

Dr. Jerome W. Conn, an associate professor of internal medicine, reported to the American Association for the Advancement of Science on research he has been conducting at the university.

His study has shown that the adrenal gland calls upon a substance in the blood known as cholesterol to help in producing the huge amounts of adrenal hormones needed in prolonged periods of stress which the body undergoes at the time of an injury.

Cholesterol, produced largely by the liver, is the basic compound of adrenal hormones, including cortisone, the hormone found to be beneficial in the treatment of rheumatoid arthritis, Dr. Conn says.

In his experiments, Dr. Conn found the cholesterol content of the adrenal gland could be reduced 70 per cent within three hours by artificial stimulation which produced conditions similar to those created within the body during periods of prolonged stress.

This artificial stimulation was achieved through use of ACTH, the pituitary gland hormone which causes the adrenal gland to produce its hormones.

The effect of this prolonged stimulation of the adrenal gland has important implications for future study of several diseases, including those of the heart, liver and kidney as well as hardening of the arteries, according to Dr. Conn. These diseases are all associated with an unusual production or use of cholesterol.

Wool Scarce; Give Blankets Extra Care for Longer Life

Treat your wool blankets with the gentle care that precious possessions deserve. Textile scientists of the U. S. department of agriculture have pointed out that U. S. production of wool this year is one of the lowest on record.

Frequent airing of blankets in use not only is good sanitary practice but helps them last longer and hold their fluffy warmth and comfort. When a blanket is thrown back loosely so fresh air reaches both sides, the wool has a chance to get back its natural springiness which makes for warmth. But care should be taken not to throw a blanket over anything sharp, such as a peaked bedpost, which may pierce or pull it, or on anything that may stain it. Loose bed springs, sharp metal corners or even roughened wood may also catch and tear blankets or other bedding.

For best service and comfort blankets should be large enough to come up well over shoulders and still tuck firmly in the bottom of the bed. Short blankets often wear out early because they take so much pulling and strain.

A blanket stays clean longer if the bed is made so that the sheet turns back over the top of the blanket 8 to 12 inches. If the sheet is too short, a strip of cloth, basted over the top or the full length of the blanket, is good protection against soiling the wool. A covering over the blanket, or even a third sheet used on top, gives added warmth because it holds still air in the fluffy wool.

For Pig Protection

A pair of clean rubber boots is worth more than any medicine in protecting pigs from a fatal intestinal disease called transmissible gastroenteritis. Best means of controlling it is to move healthy pigs as far away as possible from the sick ones. Many farmers do this, a veterinary medical bulletin points out, but they overlook the fact that their shoes can spread the infection. Attendants who have walked through infected hog quarters should put on a pair of clean boots before entering healthy quarters, the bulletin cautions. The disease, believed to be caused by a virus, is marked by severe diarrhea, vomiting, and rapid loss of weight. Young pigs are hit hardest, with death losses sometimes running as high as 90 per cent.

Mr. and Mrs. D. T. Northcutt and son, Pat, left Saturday for Cleveland, Ohio, to attend an R. E. A. meeting.

The More He BREAKS The More He MAKES

Texas motorists, Texas highways and Texas taxpayers should be protected against the ONE PER CENTERS.

ONE PER CENTERS are truck combinations weighing, loaded, 20,000 pounds or more. Only one of every 100 vehicles registered in Texas pays a license fee for 20,000 pounds or more. FEWER than three out of every 1,000 are registered for more than 40,000 pounds.*

Our highways should be SAFE for ALL the people—individuals, commercial users and the military alike.

Texas highway tax dollars should be conserved and used wisely. This can be done

- (1) by limiting the weight (gross load and axle load) that may be transported legally by the ONE PER CENTERS and
- (2) by enforcing the law against those who persist in overloading.

*"The Case of The One Per Centers," an article in The Texas Tax Journal, July-August, 1950

Texas highways are paid for by and belong to ALL THE PEOPLE. Highways adequate for 99% of Texas users—individual and commercial—can be constructed and maintained for about ONE-THIRD of the cost made necessary by the weight of the ONE PER CENTERS.*

This is your problem. Send for your copy of the booklet, "THE CASE OF THE ONE PER CENTERS," which tells you, among other things, why

THE MORE PAVEMENT HE BREAKS,
THE MORE PROFIT HE MAKES.

The story of a faith that paid off

**YOU KNOW IT'S TRUE BECAUSE IT'S HAPPENED TO YOU
AND YOUR FRIENDS AND NEIGHBORS**

PROBABLY YOU'VE never thought of yourself as a maker of history. But you are. And here is how you, as a citizen of the United States, are creating the greatest success in all history.

Remember back in 1941 when the Defense Bonds you were buying suddenly had to become War Bonds? How you and your neighbors pitched in to buy them in ever-increasing numbers, to back our fighting men and to help achieve the victory of World War II? After V-J Day, when those bonds became Savings Bonds, you continued to buy them because you had learned how regular saving could build security and contentment for yourself and those you love.

The face of the land has undergone some dramatic changes in those years since V-J Day. Now the landscape is dotted with new homes that Savings Bonds built. Thousands upon thousands of new automobiles travel the highways—Savings Bonds cars, bought with the product of individual thrift. On the farms, Bond-purchased equip-

ment has helped produce bumper crops and prosperous years. Everywhere in America, man's urge to get into business for himself has become a bright reality. So has the ambition of loving parents to send their children through college. Time and time again, Savings Bonds have made those dreams and many others come true.

You KNOW they've come true, because it's happened to you or to some of your own friends.

And this is only the beginning of the story. Even after accomplishing so much, millions of American families still enjoy the financial security of owning more than fifty billion dollars—*fifty thousand million dollars* in Savings Bonds. More than at the peak of war-time Bond holdings!

How much money is that? It's enough

to build a new \$10,000 mortgage-free home for every family in San Francisco—and Sacramento—and Salt Lake City—and Denver—and Kansas City—and St. Louis—and Indianapolis—and Cincinnati—and Pittsburgh—and New York City—and the whole state of Texas!

And every week, everywhere in America, new millions of dollars are added to the total—as crisp new Savings Bonds are typed up with your name on them.

Kind of a king-size success story, isn't it? Your success story because you and the millions of your neighbors are living it right now. Your own faith in America—your own desire for the warmth of family security and independence—have made the story of United States Savings Bonds the thrift miracle of all time.

***For your security, and your
country's too, save now - through regular
purchase of U.S. Savings Bonds***

SPORTSMANSHIP

Guest Editorial by Gay Merrell
 Sportsmanship is the principle base of all good athletes. To be a good sport you must be friendly and cooperate with your fellow players.

A good sport does not fuss and get mad when something doesn't come his way.

Getting mad about something doesn't set a good example for the younger generation which is about to follow in your footsteps.

Some examples you might follow are: When two teams are playing basketball, one of the teams are going to loose. If your team is the looser don't get mad about it, because if you had won you wouldn't have wanted them to get mad at you. A good way of expressing sportsmanship is the Golden Rule, "Do unto others as you would have them do unto you."

The high school girls of Silverton also want to express to the freshman girls who were initiated into the FHA their hearty appreciation for being such wonderful sports about the way they were being treated.

To the girls who weren't sports, well, we hope they develop a different attitude.

NEW GYM CEILING MARRED BY YOUNGSTERS

By Darrell McWilliams
 A few days ago, some grade school boys decided that in the attic above the gym floor, would be a good place to play. While the boys were running around on the rafters above the gym, one of them fell through some of the ceiling material. It was lucky that the boy straddled a rafter; or he would probably be dead now, or maimed for life. As a result of this carelessness, nearly a complete section of the new ceiling has fallen down. Careless acts like this are dangerous as well as destructive, so let's do all we can to prevent any such mishap of this kind.

MEET THIS SENIOR—BILLY DON STEVENSON

Billy Don Stevenson was born on September 20, 1933 at Silverton. He started to school at Silverton in 1940. He graduated from grammar school in 1947.

Since 1947, when Billy Don entered high school, he has been a member of the FFA for four years. He has come out for football for four years; lettered one out of the four. He has played basketball for three years.

Billy Don plans to go to the navy after graduation.

Ah! Ain't love grand, at least with Billie and Naydene. Nosey saw them together again Wednesday night at the ball game. Milton and Maetra were together again Wednesday night. Gloria and Darrell were at the show Wednesday night.

RUNGS ON THE SOCIAL LADDER

By Joe Monday
 Question: In leaving a streetcar or bus, does the woman go before or follow the man?
 Answer: The man gets off first and helps her down.

Question: When a boy is walking with two girls where should he walk?
 Answer: The boy is always on the outside.

Question: When at a party who should suggest going home first, the boy or the girl?
 Answer: The girl is supposed to suggest it.

Question: When walking with a person who stops to speak to a friend whom you do not know, what should you do?
 Answer: Keep walking slowly, do not stop to listen.

Question: Is it correct for a girl to ask a boy to call on her?
 Answer: Yes.

Question: When a boy calls on a girl at what time should he leave?
 Answer: No later than 10:30.

Question: When getting in a car or cab where should the girl sit?
 Answer: She should sit in the right hand seat. The man gets out first.

Joe Wayne and Donna were together Friday, Saturday, and Sunday night.

PERSONALS

BIRTH

Mr. and Mrs. Leo Comer, of Amarillo, are the parents of a baby boy, born January 29, 1951. Grandparents are Mr. and Mrs. Wylie V. Bomar, of Silverton.

Miss Julia Moreland, of Plainview, spent the week end with her parents, Mr. and Mrs. M. G. Moreland.

Morris Moreland, of Canyon, student at W. T. S. C., was home with his parents, Mr. and Mrs. M. G. Moreland during the semester.

Mrs. Bud McMinn and daughter, Fayree, Mrs. W. A. McJimsey, Mr. and Mrs. Paul Ledbetter, were shopping in Amarillo Thursday.

Mrs. Bud McMinn and daughter, Fayree, Mrs. Paul Ledbetter, Mrs. Irwin McJimsey were attending to Pubiness in Plainview Friday. Fayree remained over the week end with Mr. and Mrs. Ed Watkins.

Mr. and Mrs. C. R. Vaughan, of Oakview, California, and Mr. and Mrs. Jimmie Hall, of Santa Barba, California, came to Grandma Vaughan's birthday celebration and are visiting ten days with other relatives.

Genuine Frigidaire Refrigerators at Simpson Chevrolet Co.

PERSONAL

Mrs. Welton Letfar and son, Terry, of Munday, were guests of her sisters last week, Mrs. Lee D. Bomar, Mr. and Mrs. Wayne Crawford, Mr. and Mrs. Donald Alexander. Mrs. Alexander took them home Saturday.

Mr. and Mrs. Charles Cowart and family visited Saturday afternoon in Amarillo with Mrs. Cowart's sister, Mr. and Mrs. G. H. Pendley. Mrs. Pendley and Mrs. Cowart's brother and family, Mr. and Mrs. J. D. Gresham, of Albuquerque, New Mexico, was also there for a visit.

Mr. and Mrs. A. J. Rowell and family were dinner guests of his mother, Mrs. W. A. Rowell Sunday.

Teenager Gets Appetite Back; Thanks Hadacol

HADACOL Supplies Vitamins B₁, B₂, Niacin and Iron Which Her System Lacked.

According to Sara Loraine Beck, Box 253, Coker, Alabama, when a person is only 15 years old and feels terrible, can't eat or sleep the way they should, it's mighty bad. That is the way Loraine says she used to feel, but that was, of course, before she started taking HADACOL. Loraine found that taking HADACOL helped her system overcome deficiencies in Vitamins B₁, B₂, Niacin and Iron, which HADACOL contains.

Here is Loraine Beck's own statement: "I was run-down, sick and skinny and weighed only 90 pounds before I used HADACOL. I would not eat because I had no appetite. Now I weigh 123 pounds and have an appetite. I feel a lot better. I have been taking HADACOL 10 months and am still taking it. I am 15 years old. HADACOL has done me lots of good."

Texas Venture
 In Education • 1876-1951
 Our first state college—Texas A. and M. is now in its seventy-fifth year

In recent months much has been written of amazing new developments in the forestry field through the breeding of hybrid trees, producing a fast-growing, vigorous new tree in much the same manner as scientists have produced hybrid corns and other valuable new plants. Success in this field would revolutionize forestry practices. Thirty years ago a little-known Texas scientist working on the A. and M. campus produced hybrid oak trees which are campus landmarks today. This pioneering opened up an entirely new field which is now coming to the attention of the world. Hilge Ness, who produced hybrid oaks by crossing the overcup oak and the liveoak, was chief botanist of the Texas Agricultural Experiment Station and professor of Botany at the college for many years. He joined the staff in 1889, after graduating from Texas A. and M., and served until his death in 1928. A distinguished scientist, he had great influence as a teacher and researcher, and made valuable contributions to Texas agriculture through the production of many useful new plants, one of which was the Nessberry, a cross between the dewberry and raspberry, which still bears his name.

Alaska's Brooks Range Explored by Scientists

A majestic graveyard of 300 million years ago is the great Brooks range of northern Alaska, spanning North America's northern part and perhaps the least explored under the American flag.

A systematic paleontological examination of parts of these mountains has been in progress during the past two summers, conducted by a United States geological survey party led by Arthur L. Bowsher, Sr., Smithsonian Institution paleontologist on detached duty with the survey.

The area where these mountains now exist was once the bottom of a shallow sea, during the Permian, Triassic, and Jurassic eras of earth's history known as the Mississippian, when the dominant form of life—at least the most abundant—consisted of crinoids and their relatives. This was the heyday of these curious animals, which were, for the most part, attached by stems to the sea bottom. Their skeletons were composed of tiny plates of calcium carbonate very similar to chalk. Thick limestone strata of the Brooks range were made up of broken fragments of the skeletons. In other sections, however, the crinoid remains are excellently preserved.

The crinoids were found by the geologists in great variety, for the most part representing species hitherto unknown to science. At the same time represented by the fossils, the climate was probably somewhat warmer than at present, and the animals were apparently able to enjoy favorable living conditions for as long as 30 million years. Life on the land was already well established, and there were many primitive fishes in the seas.

Hitherto, there has been little geological explanation of this region.

Synthetic Spearmint Oil Made from Orange Peels

Synthetic spearmint oil for flavoring has been produced from orange and grapefruit peels. It was announced at the 118th national meeting of the American chemical society held in Chicago.

The new product will supplement and partially replace the natural material, according to Dr. Carl Bordenca, of the Southern Research Institute, Birmingham, Ala., who reported the research work leading to the perfection of the process.

Manufacturers of chewing gum and other products using spearmint flavoring will welcome this new source of supply, since the availability and quality of natural spearmint oil have been variable in past years as a result of the seasonal nature of production and the dependence on crop conditions, the report said. The new process also will solve a problem for the citrus canning industry, for whose by-product orange and grapefruit peels only a limited demand exists at present.

Carvone, as the synthetic spearmint is called, occurs in natural spearmint oil to the extent of 65 per cent and is indistinguishable in color and taste from the natural material, Dr. Bordenca declared. Partial substitution of carvone for the natural oil has already been accepted for certain uses, he said.

The Hunting Commandments

1. Treat every gun with the respect due to a loaded gun. This is the cardinal rule of gun safety.
2. Carry only empty guns, taken down or with the action open, into your automobile, camp and home.
3. Always be sure that the barrel and action are clear of obstructions.
4. Always carry your gun so that you can control the direction of the muzzle even if you stumble.
5. Be sure of your target before you pull the trigger.
6. Never point a gun at anything you do not want to shoot.
7. Never leave your gun unattended unless you unload it first.
8. Never climb a tree or a fence with a loaded gun.
9. Never shoot at a flat, hard surface or the surface of water.
10. Do not mix gunpowder and alcohol.

Danger of Infection

There is danger of infection in every break in the skin. Germs may be present on the skin, fingers, clothing and unclean dressings, in droplets sprayed from the mouth or nose in sneezing, laughing, or talking. The cleansing and disinfection of all serious wounds should be left to the doctor. First aid stops with the checking of the bleeding, the application of a sterile dressing, and measures taken to prevent or lessen the severity of shock. For small wounds, cuts and scratches, paint the wound with an antiseptic, such as mild tincture of iodine and when the iodine is dry, cover it with a sterile cloth pad, or compress. Blood poisoning sometimes results when "just a scratch."

Dawn of Air Day

Army airplanes flew around the world in 1924. The Air Service became the U. S. army air corps in 1926. In 1927, the great research and development center was established at Wright field, Dayton, Ohio. That same year an air corps plane flew nonstop from California to Hawaii. Maj. Carl Spaatz, Capt. Ira Eaker, and Lt. Elwood Quesada, destined to become famous commanders in World War II, kept the tri-motored "Yellow", "Question Mark," in the air for almost 151 hours by refueling in flight in 1929.

Nepal, Gurkha Homeland, Guards Doorway to India

The independent Kingdom of Nepal has marshaled its best known "natural resource" — the fierce Gurkha soldier — to guard isolated mountain ramparts adjoining Tibet, where invading Chinese communist troops are on the march.

Nepal, a small country some 500 miles long and 100 wide, is a rectangular "buffer state" wedged between India and Tibet along the awesome heights of the Himalayas. Pro-Western in its ties, the ancient kingdom is now being subjected to a menacing propaganda barrage from communist China.

As the homeland of the Gurkha warrior caste, Nepal has contributed thousands of the famed tribesmen to the British and Indian armies. All are volunteers, and they have won many decorations for bravery and efficiency in two world wars and innumerable lesser campaigns.

Traditionally this mountain kingdom has been known as a land "where nearly every man is a soldier." Since 1768 the various tribes of Nepal have been ruled by the warlike Gurkhas. Upper class titles are modeled on Western military rank. Although the nation itself has lived in peace for many years, Nepal maintains a standing army estimated at 50,000—relatively large in proportion to a population of less than seven million.

It is a country of remarkable geographical contrasts. In the south bordering India is a malarial belt of lowlands, annually ravaged by monsoon floods from silt-laden rivers which rise in the mountains and empty into India's sacred Ganges. Beyond the lowlands are the Siwalik mountains and farther north are the great Himalayas, including many towering but unnamed peaks. Mt. Everest, highest mountain in the world at 29,022 feet, rises majestically at Nepal's northern border.

Wide Range of Temperature Makes Hot Water Ideal Heat

Hot water is a flexible heating medium.

The temperature of water used for heating can be varied as the outdoor temperature rises or falls.

Thus in mild weather the controls which automatically govern the temperature of the water in the boiler can be set for 90 to 100 degrees.

In more severe weather it can be advanced to 120 to 150 degrees. During extreme weather, a temperature of from 180 to 200 degrees may be utilized when and as required.

Changing the temperature of the heating medium in accordance with outdoor temperature has two advantages. First of all, it prevents the discomfort due to overheating. Second, it saves fuel because it prevents the waste which results from overheating.

It is during the mild weather of early fall and late spring that the flexibility of hot water is most appreciated. By circulating water at a low temperature, the radiators or other heat distributors will be just barely warm to the touch. Thus the discomfort resulting from overheating caused by a sudden rise of outdoor temperatures will be prevented.

Thrombosis Fatalities

Coronary thrombosis, contrary to popular impression, is not usually fatal immediately or within a short time.

Results of a study by a leading insurance company show that 70 per cent of a group of persons who had had one or more coronary attacks were still alive at the end of five years, 50 per cent at the end of 10 years, and 43 per cent at the end of 12 years. The study traces survivorship among 540 men for whom life insurance disability benefits were approved because of heart conditions.

"Winter Scours"

Milk production in many dairy herds is going to be cut back sharply during the coming months by "winter scours." When a cow suddenly refuses feed, appears dull, secretes less milk and scours badly, the owner may suspect that the animal has eaten spoiled or frozen feed. But if other cows in the herd rapidly develop the same symptoms, the trouble may be winter scours, a quick-spreading infectious disease. Veterinarians have isolated the germ which causes the malady; it is a "vibro" organism, related to a germ which sometimes causes abortion in cattle.

To Measure Humidity

Measuring humidity is commonly done with two similar thermometers, one of which has a cotton wick, dipping into water, wrapped around the bulb to keep it wet. With published tables (known as "psychrometric tables") the humidity may be determined from the reading of the thermometer with dry bulb, and the number of degrees below this which the wet-bulb thermometer shows. For a dry-bulb temperature of 70 degrees, and 50 per cent humidity, the wet-bulb instrument would read about 58 degrees, i. e., a depression of 12 degrees.

Barbecue the Lamb, Parsley the Spaghetti (See Recipes Below)

Economical Main Dishes

WHEN THE BUDGET'S sorely pressed, food, like every other item, will come in for its share of economy.

In expensive meat cuts, extended wisely with nourishing and filling foods like potatoes, lentils and vegetables offer tasty substitutes for roasts, chops and steak.

You can add interest to meats by varying the carbohydrate (starchy) food with them, like parsleyed spaghetti and savory noodles.

Parsley Spaghetti with Barbecued Lamb (Serves 4-6)

- 1 chopped medium onion
- 2 tablespoons butter
- 1/4 cup cider vinegar
- 2 teaspoons brown sugar
- 1 can tomato paste
- 1 1/2 cups water
- 1 teaspoon Worcestershire sauce
- Few drops tabasco sauce
- 2 cups cooked lamb, cubed
- 1 tablespoon salt
- 3 quart boiling water
- 8 ounces thin spaghetti
- 2 tablespoons butter, melted
- 1/4 cup finely chopped parsley

Saute onion in butter until tender. Add vinegar, sugar, tomato paste, and tabasco sauce. Cover and simmer 15 minutes. Add lamb; simmer until heated. Meanwhile, add salt to rapidly boiling water. Gradually add spaghetti so that water continues to boil. Cook uncovered, stirring occasionally, until tender. Drain in colander. Toss with melted butter and finely chopped parsley. Serve with barbecued lamb.

Skillet Noodles and Beef (Serves 4-6)

- 2 tablespoons butter
- 1 cup thinly sliced onions
- 1 cup chopped celery
- 1 pound ground beef
- 2 cups diced raw carrots
- 1 No. 2 1/2 can tomatoes
- 1 cup water
- 1 tablespoon salt
- 1/2 teaspoon chili powder
- 1 tablespoon Worcestershire sauce
- 8 ounces egg noodles

Melt butter in large heavy skillet over low heat. Add onions and celery; saute 5 minutes. Add ground beef, stirring occasionally, until meat is brown. Add remaining ingredients, including the uncooked noodles; mix thoroughly. Cover skillet; simmer 40 minutes, stirring occasionally.

Baked Sauerkraut and Frankfurters (Serves 4-6)

- 1 No. 2 1/2 can sauerkraut
- 2 teaspoons sugar
- 1/2 teaspoon caraway seeds
- 2 medium cooking apples
- 1/2 cup thin onion slices
- 1/4 cup melted butter
- 6 frankfurters

In a mixing bowl, combine sauerkraut, sugar and caraway seeds. Place half of sauerkraut mixture in bottom of a 2-quart baking dish. Core apples and cut into 1/4-inch

Lynn Chambers' Menu

- *Tamale Pie
- *Chef's Salad, Oil Dressing
- *Crusty Bread, Garlic Butter
- *Orange Sherbet, Sugar Cookies
- *Beverage
- *Recipe Given

slices. Place half of onion and apple slices on sauerkraut mixture; dot with butter. Cover with remaining sauerkraut mixture. Add remaining onion and apple slices. Arrange frankfurters on top. Cover and bake in moderate oven (350°) 45 minutes. Serve immediately.

Lamb Paprika (Serves 4)

- 4 slices bacon
- 1 tablespoon butter
- 1 medium onion, sliced
- 1 pound shoulder lamb or mutton, cut in small pieces
- Flour
- Pinch of rosemary
- 1 teaspoon salt
- 1 to 1 1/2 teaspoons paprika, to taste
- 1/2 teaspoon pepper
- 1/2 cup canned tomato
- 1/2 cup beef bouillon
- 1/2 teaspoon caraway seeds
- 2 medium potatoes, sliced

Fry bacon and remove from pan. Add butter. Fry onion and meat, dredged lightly with flour, until golden brown. Blend seasonings except caraway seeds, with tomatoes and bouillon. Pour over meat. Place bacon slices on top of meat. Cover and bake in moderate oven (350°) for 30 minutes.

Arrange potatoes on top of meat and baste with sauce in pan. Cover and bake another 30 minutes. Tie caraway seeds in muslin bag and drop in center of pan before baking. Remove when serving.

***Tamale Pie**

- 1 cup corn meal
- 3 1/4 cups water
- 1 teaspoon salt
- 2 tablespoons olive oil
- 1 tablespoon chili powder
- 1 green pepper
- 2 tablespoons onion flakes
- 1/2 cup hot water
- 1/2 pound ground beef
- 1/2 teaspoon pepper
- 2 teaspoons chili powder
- 1 No. 2 can tomatoes
- 1/2 cup chopped ripe olives
- 1/2 cup shredded cheese

Make mush of corn meal and boiling salted water. Add olive oil and chili powder. Line casserole with 1/2 of the mush. Fry green pepper and onions (soaked in 1/4 cup water) in oil until clear. Add meat, salt, pepper, chili powder. Stir until meat changes color. Add tomatoes. Simmer till thickened. Add olives. Turn into casserole. Sprinkle with cheese. Top with remaining mush. Bake in moderate oven (350°) 30 to 40 minutes.

Apple butter spoils readily because it does not have a high sugar content. Place in refrigerator after opening.

Buy spices once a year in small quantity, as they lose flavor on standing, even though not opened. Highly seasoned sauces with many spices and high vinegar content keep well for months. Store in cool place without light.

Honey should not be discarded when it crystallizes. Loosen by placing in water that is not over 140°. Higher temperature may injure flavor as well as color.

Always purchase your fish last, but store it first when you get home. The coldest place in the refrigerator, right under the freezing unit, is best for it.

All fats require a cool, dry, dark place for storage. They should be tightly covered at all times to avoid contact with strong odors which fats readily absorb.

LYNN SAYS:

Check on Food Storage To Save Money

Do not plan to keep sweet syrup on hand for long periods, as flavor deteriorates rapidly. For the time you must keep them, store in a cool dark place.

Use chicken within a day or two after purchasing, if it's fresh. Wrap loosely in waxed paper for refrigerating.

Both tea and coffee will lose flavor if they are not kept tightly covered. A cool, dry place is best for them.

Self Feeding Mixtures Of Salt and Cottonseed Meal

Although livestock men differ in opinion as to the value of self-feeding a mixture of salt and cottonseed meal to cattle—particularly to breeding animals—the practice is growing in popularity. The practice is aimed at reducing the amount of labor normally required for feeding supplements to range cattle. Mixing a high percent of salt with protein supplement or grain limits the amount of feed consumed when the mixture is fed free-choice. The value of this method of feeding depends on whether or not cattle suffer ill effects from a high intake of salt over a long period of time. An experiment was conducted at the Texas Agricultural Experi-

ment Station, College Station, during the winter of 1949-50 to compare the results of hand feeding two pounds of cottonseed meal daily with self feeding a mixture of salt and cottonseed meal. Thirty-five Angus, Hereford and Shorthorn cows were used in the test. They were divided into two groups as nearly alike as possible with respect to age, breed, weight and expected date of calving. The groups were run during the winter on two 200 acre Brazos county upland pastures. An abundance of dry winter forage was available, and the groups were alternated every two weeks to reduce the effect of the different pastures. One group of 18 cows was hand fed two pounds of cottonseed meal per head daily in feed bunks. The other group of 17 cows was given free access to a mixture ranging

from 15 to 25 percent salt and 85 to 65 percent cottonseed meal. Water was obtained from a stream about a quarter of a mile from the feeding location. In order to limit the daily consumption of cottonseed meal to about two pounds, the beef cattle specialists increased the salt content of the mixture as the cows consumed more feed. As feed consumption dropped off later in the spring, the salt content was reduced. The self fed group consumed an average of 2.19 pounds of cottonseed meal and 95 pounds of salt per day over the 107-day test period. The hand-fed group received two pounds of cottonseed meal per day over the period. Since the dry winter forage was low in nutritive content and somewhat unpalatable, the cows did not consume enough to maintain

their weight. The average loss in weight per cow was about the same for both groups, 155 pounds. Thirteen calves were dropped in the self-fed group and 12 in the hand fed group. The calves from the salt-fed group averaged 162 pounds at 79 days of age, while those from the hand-fed group averaged 164 pounds at 85 days of age. Five cows of the salt-fed group scoured periodically. One cow started scouring January 16, was too weak to weigh January 27, and died February 6. No scouring was observed in cows of the hand-fed group. The specialists concluded from this experiment that self feeding mixtures of salt and cottonseed meal may cause scouring and death losses of breeding cows when the salt intake is one to one and one-half pounds per day and the pasture and water conditions are similar to those existing in this trial. However, they think that this system of feeding supplements might possibly be practical under ideal conditions of feed and water supply. More experiments with the use of the salt-cottonseed meal mixtures are now being conducted.

AGRICULTURAL FILLERS

Now is the height of the season for pruning, watering and fertilizing many of the shrubs and trees used in landscaping the farmstead. Since about 90 percent of all farms in Texas now have electricity, there is little excuse for farmers to do their chores in the dark. Following a good management and feeding program will help maintain high egg production during the winter months. Families should keep an inventory of all durable goods. In the case of a fire, tornado, explosion or theft, many families do not know exactly what to claim as a loss when the insurance adjuster calls on them. Better keep two copies—one at home, the other in a safety deposit box. Select the site for the home orchard with care. A well-drained, sandy loam soil is preferable. It should be free of nematodes and away from the old orchard. New-

ly cleared land is not recommended and the site should have a slight slope and be free from air

pockets. Last year more than 200 enterprises involving over 20,000 chick-

ens were made in the Texas Chicken of Tomorrow Program. TRY A NEWS WANT AD.

Which Twin?

HAS THE Electric HOME LAUNDRY?

The glamour girl, of course. All she does is put the clothes in her automatic washer, set the dials, and leave the rest to Reddy. Then, when they're washed sparkling clean, into the dryer they go and once more, Reddy takes over the hard work. Reddy keeps the water hot, too, with an automatic electric water heater, that's as clean and dazzling as an electric light bulb. Ironing is easier, too, when it's done on a modern, electric ironer. Don't get worn out by back-breaking wash days. Be drudgery-free, be happy, let low cost electric service do the hard work.

SOUTHWESTERN PUBLIC SERVICE COMPANY 26 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

the Railroads RESPECT...

What is the TRUTH?

the Labor Unions seek to REPUDIATE this agreement!

At various states in the present dispute with the brotherhoods of railroad operating employees... the railroads agreed to arbitrate. The union leaders refused. ... the railroads accepted the recommendations of President Truman's Emergency Board. The union leaders refused. ... the railroads accepted the White House proposal of August 19, 1950. The union leaders refused. Finally an Agreement was signed at the White House on December 21, 1950. Now the union leaders seek to repudiate the Agreement. The railroads stand ready to put the terms of this Agreement into effect immediately, with back pay at the rates and date indicated. The Agreement is given in full below.

MEMORANDUM OF AGREEMENT

Washington, D. C. December 21, 1950

- 1. Establish 40 hour week for yardmen with increase of 23 cents effective October 1, 1950, and additional 2 cents effective January 1, 1951. 2. Set aside 40 hour week agreement until January 1, 1952, and establish 6 day work week for yardmen. Effective with the execution of the formal agreement, yardmen from the date of execution of the formal agreement, yardmen required by the carrier to work on the 7th day to be paid overtime rates except engineers who shall receive straight time rates for the 7th day. This does not create guarantees where they do not now exist. On and after October 1, 1951, three months' notice to be given of desire to go on 40 hour week. Provide for consideration of availability of manpower and 4 cents per hour if and when the 40 hour week actually becomes effective. 3. Settle rules for 40-hour week and 6 day week. 4. Grant yard conductors and brakemen other rules such as daily earnings minimum, car retarder operators and footboard yardmasters as recommended by Emergency Board No. 81. 5. Settle following rules: Initial Terminal Delay (Conductors and Trainmen) Interdivisional Runs Pooling Caboose (Conductors and Trainmen) Reporting for Duty More than One Class of Service Switching Limits Air Hose (Conductors and Trainmen) Western Differential and Double Header and Tonnage Limitation (Conductors and Trainmen, all Territories) 6. Road men to receive 5 cents per hour increase effective October 1, 1950 and additional 5 cents per hour increase effective January 1, 1951. 7. Quarterly adjustment of wages on basis of cost

of living index (1 point to equal 1¢ per hour. First adjustment April 1, 1951. Base to be 176). 8. Agreement embodying principles applicable to yardmasters to be entered into for benefit of yardmasters. 9. Effective October 1, 1950, the basic hours of dining car stewards shall be reduced from 225 to 205 hours per month; no penalty overtime to accrue until 240 hours have been worked, the hours between 205 and 240 to be paid for at the pro rata rate. Effective February 1, 1951, overtime at time and one-half shall accrue after 220 hours have been worked. The basic monthly salary to be paid for the 205-hour month shall be the same as that now paid for the 225-hour month. Except that four dollars and ten cents (\$4.10) shall be added to the present monthly rate effective January 1, 1951. 10. In consideration of above, this agreement to be effective until October 1, 1953, and thereafter until changed or modified under provisions of Railway Labor Act. Moratorium on proposals for changes in wages or rules until October 1, 1953, as follows: No proposals for changes in rates of pay, rules or working conditions will be initiated or progressed by the employees against any carrier or by any carrier against its employees, parties hereto, within a period of three years from October 1, 1950, except such proposals for changes in rules or working conditions which may have been initiated prior to June 1, 1950. Provided, however, that if as the result of government wage stabilization policy, workers generally have been permitted to receive so-called annual improvement increases, the parties may meet with Doctor Steelman on or after July 1, 1952, to discuss whether or not further wage adjustments for employees covered by this agreement are justified, in addition to increases received under the cost of living formula. At the request of either party for such a meeting Doctor Steelman shall fix the time and place for such meeting. Doctor Steelman and the parties may secure information from the wage stabilization authorities or other government agencies. If

the parties are unable to agree at such conferences whether or not further wage adjustments are justified they shall ask the President of the United States to appoint a referee who shall sit with them and consider all pertinent information, and decide promptly whether further wage increases are justified and, if so, what such increases should be, and the effective date thereof. The carrier representatives shall have one vote and the referee shall have one vote. 11. If the parties cannot agree on details of agreement or rules they shall be submitted to John R. Steelman for final decision. The usual protections for arbitrators, miscellaneous rates, special allowances, and existing money differentials above existing standard daily rates will be included in the formal agreement. The foregoing will not debar management and committees on individual railroads from mutually agreeing upon changes in rates, rules and working conditions of employees covered by this agreement. J. R. Steelman, Chairman Eastern Carriers' Conference Comm. J. B. Steelman, Chairman Western Carriers' Conference Comm. J. B. Steelman, Chairman Southern Carriers' Conference Committee
