THURSDAY, JUNE 7, 1951

## Veterans Take Heed; Time Is Drawing Near to Cut-Off

Veterans are warned of the cut-off date for education or training under provisions of Public Law 346, the GI Bill, which is rapidly approaching. After July 25, 1951 no application for job training or a course of education in any institution will be accepted for those veterans discharged before July 25, 1947. Since the law states that education or training must be initiated within 4 years after termination of the war or date of discharge whichever is later and July 25, 1947 is the official termination of the war for GI Bill benefits, those men who were discharged after July 25, 1947 are not effected by the cut-off date but must start their training within 4 years from date of discharge. Disabled veterans who wish to take training under Public Law 16 are also not effected by the July 25 cut-off date but may enter training at any time. Another important thing to remember is that schooling or training must be continuous after July 25. It will no longer be possible to interrupt a course of training and reenter at a later date except for normal vacation periods or severe illness. Any veteran wishing to enter a vocational school before the cut-off date should contact Mr. I. H. Turney, coordinator, or Paul Miller, service officer. For training on the job they should contact the Service Officer.

Those veterans who have allowed their GI Insurance to lapse but wish to all or a part of it must reinstate their insurance before the term expires or lose all further rights to GI Insurance. The term period is 8 years from the date the insurance was first taken out if prior to January 1, 1946 and 5 years if after that date. The new insurance law deprives veterans of the privilege of taking out new insurance.

Dividends at the approximate rate of 50 cents per \$1000.00 per month are now being paid on insurance that has been in effect at least three months since January 1, 1948. This dividend is being paid for a three year period from the anniversary date in 1948 to anniversary date in 1951.

## Deep Wildcat Will Be Drilled in Hall County

Amerada Petroleum Corporation has scheduled an 8,500 foot wildcat in Hall County, nine miles east of Turkey.

It is the No. 1 Lafayette M. Hughes, 1,980 feet from south and west lines of section 101, block S-5, D&P survey.

## Attend Funeral of Gus Schmidt At Lamesa

Mr. and Mrs. J. M. Thompson were in Lamesa last Tuesday where they attended the funeral of Mr. Gus Schmidt, father of their son-in-law, who passed away suddenly on Sunday evening with a heart attack.

Rev. Cole, of Fort Worth, Texas, formerly of Lamesa conducted the funeral at the First Baptist Church in Lamesa.

## MRS. PRICE IS HOME FROM TEMPLE

Mr. and Mrs. Henry Price returned home early Saturday morning from Temple, Texas, where Mrs. Price underwent surgery four weeks ago, at the Scott and White Hospital. Mrs. Price is recovering satisfactorily.

Sergeant Horace Morrison, of Lakeland Air Base, San Antonio, is home on a thirteen day furlough visiting his mother, Mrs. Mollie Morrison and children, and his sister, Mrs. C. L. McWilliams.

Mr. and Mrs. Glen Lindsey visited in Plainview Sunday afternoon with friends.

## Summer Work in Homemaking Being Taught by Miss Gunn

Summer project work in homemaking has begun with twenty girls working for one-half credit in homemaking. The girls will put in one hundred thirty five hours for their one-half credit.

For a group project at the school house the girls are going to paint some in the homemaking room and refinish an old book case for the room. Their first meeting was Tuesday, June 5, and at that time they started on their group project.

Miss Gunn will be in the community until June 22 helping the girls and the homemaking room will be open for anyone that wants to come up and work in the homemaking room. Friday, June 8, she will go to Abernathy for a meeting concerning homemaking and on Wednesday, June 13 she will go to Tula.

September third has been set for the girls to have their project and reports finished and at that time their grade will be determined and whether or not their work is worthy of one half credit.

## Fifth Division American Legion Will Meet June 9, 10

Over 600 delegates of the 195 American Legion Posts in the 5th Division will gather in Plainview Saturday and Sunday, June 9 and 10, for their annual convention, 5th Division Commander Charles C. Gibson of Amarillo has announced. The Legion's 5th Division is composed of Posts in the 16th, 17th, 18th, 19th and 21st Congressional Districts.

Election of a new Division Commander will top the business activity, Gibson said. Candidates for other State Legion offices may also be nominated or endorsed. Gibson, Amarillo newspaperman, is among the candidates for State Commander and has been endorsed by the 17th, 18th and 21st Districts. The State Convention will be held in San Antonio August 17, 18, 19.

A delegate and an alternate to the National Legion Convention will also be selected.

William McCraw of Dallas, former attorney general of Texas and now State Legion membership chairman, will be the principal speaker at the Plainview convention, Gibson said. Other speakers on the program include State Commander Bill Elkins of Killeen, State Adjutant G. Ward Moody of Austin, National Executive Committeeman H. J. Bernard of Houston and Bob Sisson, manager of the Lubbock VA Regional office. Mrs. H. L. Lyle of Cisco, State president of the Auxiliary, will attend.

Dr. D. H. Reed of Portales, State Commander of the New Mexico Legion, will also speak. McCraw's main address to the joint session of Legion and Auxiliary delegates is slated for 11:30 a. m. Sunday immediately following a memorial service to be conducted by Rev. Lester D. Cochran of Brownwood, State Chaplain. The other speakers will appear on the afternoon program.

Gibson urges all Posts in the Division to send in their credentials at once to assure the success of the convention.

The 40 and 8, the Legion's fun and honor society, will "wreck" the new members Saturday and Sunday night were: Mr. and Mrs. Frank Fisch, Mr. and Mrs. Lee Davenport, Mr. and Mrs. Beth Joiner, and Mr. and Mrs. Derrell Thomas, of Canyon.

Mr. and Mrs. Paul Joiner, of Corpus Christi, and Mrs. Sam Davis of Denton, are visiting their father, C. F. Joiner, and sister, Mr. and Mrs. Alvin Redin.

Mr. and Mrs. Harold Hall, of Tula, visited friends here Sunday.

Mr. and Mrs. Wylie Bomar, Sr., visited Sunday in Crosbyton with Mr. and Mrs. Joe Blocker.

## Baptist Student Center Planned for West Texas State

A Center for Baptist Student activities at West Texas State College is being planned by Baptist leaders of the Panhandle-Plains region according to announcement of Truett Smith, Director of Baptist student activities at the college in Canyon. The new building will replace the temporary residence that has served as a center for Baptist students since 1946 when it was bought by the Baptist General Convention of Texas for this purpose. The location is on ample ground immediately

across the street from the campus entrance to the administration building.

Completion of this building will mark another link in the advancement of West Texas State College where Methodists and the Church of Christ already have buildings for their activities among students of these faiths. All these church properties are adjacent to the campus, but of course are not legally connected with the college which is operated by the state. Such provisions by the religious groups have the full approval of the college administration as a contribution to the welfare of students, and elective college credit is given for courses in Bible offered at these centers.

## "Our Very Own" Showing at Palace June 10 and 11

Ann Blyth's little sister, Joan Evans, discovers that Ann is an adopted child, and tells her so after an argument concerning Ann's boy friend, Farley Granger, for whose attention Joan has been making an obvious play. Stunned, Ann learns her real parents' identity from her distressed foster mother, and visits her real mother, where—amid a rather sordid, party atmosphere—she finds that she and her mother have nothing in common. Ann is very unhappy and bewildered until her rich but unloved friend, Phyllis Kirk, makes her realize how lucky she is to have the affection of her foster parents. A few days later Ann, her peace of mind restored, gives her high school commencement address—on the blessings of family life.

Next weeks program appears on page two.

## Matched Roping at Local Arena Tonight, Thursday

The Silvertown Roping Club will hold a matched roping with Floydada Roping Club at the Silvertown Roping Arena tonight (Thursday) starting at 8 o'clock.

After the matched roping there will be open jackpot roping.

## ATTEND NEPHEW'S WEDDING AT VEGA SUNDAY

Mr. and Mrs. Edd Thomas attended the wedding of Mr. Thomas' nephew, Bill Lynn Thomas and Miss Billie Hillburn, at the First Methodist Church at Vega Sunday. The couple will make their home at Lamar, Colorado.

Mr. and Mrs. Derrell Thomas, of Canyon, visited Monday night with his brother, Mr. and Mrs. Edd Thomas. Mr. and Mrs. Thomas are moving to Lamar, Colorado to make their home.

Supper guests in the home of Mr. and Mrs. Edd Thomas Monday night were: Mr. and Mrs. Frank Fisch, Mr. and Mrs. Lee Davenport, Mr. and Mrs. Beth Joiner, and Mr. and Mrs. Derrell Thomas, of Canyon.

Mrs. D. N. McGavock and Mrs. R. G. Chisum, of Tula, J. D. McGavock, Lola Chisum, Mr. and Mrs. Bood Myers and children, H. T. Myers, and daughters, visited friends in Amarillo Friday.

Mr. and Mrs. W. G. Byrd and Mrs. Adell May visited their grand son and nephew, Wylie Byrd, at Tula last Monday.

## Installation of New Officers For Lions Club Tonight

The Silvertown Lions Club will meet tonight and install their officers for the new year. At this meeting E. E. Minter, who has served as president of the club for the past year and who has done a commendable job, turns this all important office over to Gordon Montague.

Other officers and directors to be installed are as follows: Fred Mercer, first vice president.

Ralph Glover, second vice president.

Pascal Garrison, third vice president.

W. H. Tension, secretary-treasurer.

Leo White, tail twister.

George Seaney, lion tamer.

Directors: Alton Steele, Doc Mynyard, Rev. H. M. Secord, Merle J. Montague.

## Silvertown Defeated Umbarger 15-2 In Sunday's Game

In the Irrigation Belt Baseball League games Sunday Tula defeated Nazareth, 7-3; Silvertown bombarded Umbarger, 15-2; and Vigo Park outslugged Hart 18-10.

In the game between Silvertown and Umbarger, Glover and Smith were outstanding hits. It is reported that all the players did well.

Vigo Park will play Silvertown here Sunday, June 10. This is expected to be a good game.

Mr. and Mrs. Wesley Pichard and his mother, Mrs. R. C. Pichard, of Los Cruces, New Mexico, visited Tuesday night with Mr. and Mrs. W. G. Byrd and other relatives.

Mr. and Mrs. J. A. Morgan, of Los Angeles, California, are visiting Mrs. Morgan's sister, Rev. and Mrs. G. A. Elrod.

Mr. and Mrs. Miles Anderson, of Tula, are visiting in San Francisco, California, and while away their twin daughters, Gay and Kay are visiting with Mr. and Mrs. Roy Mayfield.

Mr. and Mrs. T. C. Bomar and daughter, Mary Tom, made a business trip to San Angelo recently.

Mrs. Norma Lee Long and Mrs. Joe Burleson, of Amarillo, and Mrs. Bundy Campbell, of Matador, visited recently with Mrs. Roy McMurtry and Mrs. Avis Cowart.

## Allard Clan Will Hold Reunion at Glen Rose, Texas

Glen Rose, Texas, June 5.—The 10th annual reunion of the Allard Clan will be held June 16-17 at Oak Dale Park here.

Honored will be the oldest living descendants of Aaron Hardin Allard, who came to Hopkins County and Earth County from Missouri in the 1840's. They are Ed M. Allard, 90, of 3128 Ave. G, Fort Worth; Joe B. Allard, 82, of Cooper; his twin sister, Mrs. Media Allard Gaddis, of Exeter, Cal.; Walter Allard, 80, of Silvertown, and I. A. Allard, 74, of 1014 College, Fort Worth.

Austin Allard of Meridian, Miss. is president of the clan and Mrs. Lela Hurley of Walnut Springs is secretary.

## Miss Theresa McKay Becomes Bride of Denzil Ray Vaughan

Miss Theresa McKay, daughter of Mr. and Mrs. Lon E. McKay, of Turkey, and Denzil Ray Vaughan, son of Mr. and Mrs. J. E. Vaughan, of Silvertown, were married in Clovis, New Mexico, Saturday, May 19 at 10:30 a. m.

Miss McKay was a member of the 1951 graduation class of Turkey High School. Denzil graduated from Silvertown school in 1948. They spent their honeymoon in Dallas before returning to Silvertown to make their home he is engaged in farming.

## MISS MARTIN WED TO CHESTER BOGGS

Miss Georgia Estell Martin and Chester Luther Boggs, both of Turkey, were united in marriage by Rev. G. A. Elrod at the First Baptist Church in Silvertown May 29, at 7:45 p. m.

Mrs. A. H. Boggs and Gordon Riley, of Turkey attended the ceremony.

Mr. and Mrs. M. G. Moreland accompanied their son, Morris, to Amarillo Sunday where he has accepted a position as salesman with Clowe & Cowan Hardware Company.

## Final Rites Held Wednesday For P. D. Jasper

Funeral services for P. D. "Put" Jasper, Briscoe County pioneer, were held Wednesday afternoon at the high school auditorium.

Mr. Jasper died early Monday morning, June 5, at the local hospital after a short illness.

Earl I. Cantwell, Church of Christ minister, officiated. Mr. Jasper was a member of the Rock Creek Church of Christ.

Deceased was born in Comanche County, Texas, April 1, 1881, the son of F. N., and Mary M. Jasper. He was 70 years, 2 months and 4 days old.

He came to Briscoe County in 1899. He married Alta L. Poole, September 14, 1910. To this union were born five children, four daughters, Delpha Lee, deceased in infancy; Mrs. Modean Callaway, Mrs. Mae Pearl Rowell, Dawn Jasper; one son, Alva C. Jasper, all of Silvertown; five grand children, Wayma Ray and Gay Lynn Callaway, W. D., and Vaughnell Rowell and Billie Nye.

He is also survived by twelve brothers and sisters. They are: Tom Jasper, Friona; Bettie Hodges, Memphis; Will H. Jasper, Portales, New Mexico; John P. Jasper Claude, Mattie Jasper Burrows, Texhoma; Bob Jasper, Lubbock; Kattie Jasper Washington, Flomot; Annie Jasper Ross, Tula; Fannie Jasper Thompson, Memphis; Nat Jasper, San Diego, California; Katie Jasper Spear, Tula; Milton Jasper, Silvertown; He was preceded in death by one brother, Ben Jasper, and one sister, Clara Jasper.

Interment was in the Silvertown Cemetery under the direction of the Douglas Funeral Home.

## FOWLERS VISIT IN MISSOURI

Mr. and Mrs. Clay Fowler returned last Thursday from a week's visit at Bonne Terre, Missouri, with Mr. Fowler's sister, Mr. and Mrs. B. V. Fox.

Mr. and Mrs. W. B. Fort and daughter, Miss Willa Fort, of Transville Gap, Texas, visited Monday night with Mr. Fort's sister, Mrs. Jeff Simpson.

## A HOME TO LIVE IN

## SMALL HOUSE PLANNING BUREAU, ST. CLOUD, MINNESOTA

Design B-212. This plan shows a separate dining room in front, opening from the end of the living room. In addition there is a large well lighted area in the kitchen for dining. There are two bedrooms, bath and full basement.

The living room has a wood-burning fireplace, double glazed picture window and is entered through a vestibule by way of a covered stoop.

Circulation is exceptionally good with all rooms being reached from the hall, and the bedrooms isolated from the living area. Closets are well placed and ample, one at each entrance, hall and linen closets and wardrobe closets in the bedrooms.

Exterior wall are finished with front and a band of red brick in front extending from the wide fireplace chimney.

Floor area is 1136 square feet, and cubage of 22,268 cubic feet. For further information see your local lumberman.

## "CREEP FEEDING BEEF CALVES" WILL ADD AS MUCH AS 100 POUNDS

By creep feeding their beef calves, livestock men can add as much as 100 pounds of weight per head by weaning time, according to U. D. Thompson, assistant extension animal husbandman, according to U. D. Thompson, assistant extension animal husbandman of Texas A. and M. College.

A "creep"—an enclosure with openings large enough for calves to enter but too small for older cattle—is inexpensive and easy to build. This arrangement gives calves access to additional feed. Specifications for building a practical creep feeder and suggestions for locating it are given in a new Extension Service circular, Circular 289 also gives suggested rations for feeding sucking calves and directions for starting the calves on feed.

Thompson points out that an important advantage of creep feeding is the better condition of the cows at weaning time. They are not suckled down so much when the calves receive additional feed.

In addition to being heavier and having more finish, creep-fed calves grow out more uniformly in size and condition. There is little shrinkage at weaning time. Creep-fed calves usually sell for a higher price per pound than calves that are not creep-fed.

Thompson recommends that livestock men consult their county agent about creep feeding calves this year and to also pick up a copy of Extension Circular 289, "Creep Feeding Beef Calves."

Burel Long, and son, of Los Angeles, California, are visiting relatives here.

## JACKSONVILLE TOMATO MARKET NEWS OFFICE OPENED JUNE 1

A market news office to cover the East Texas tomato crop activities opened in Jacksonville on June 1. Eugene Paulson, veteran market news reporter of the Production and Marketing Administration of the U. S. D. A. will be in charge of the new office.

This market news service is furnished to farmers, shippers and other interested persons without cost. Reports on shipments, prices and other conditions of the East Texas tomato crop will be issued daily during the tomato harvesting season.

Persons who can use these daily reports and would like to receive them should direct their requests to the Jacksonville office. Paulson's office will be in room 204, Post Office Building.

## PERSONALS

Mr. and Mrs. D. G. Joiner and daughter, Miss Verlyn, of Fort Worth, are visiting their brother and uncle, C. F. Joiner, who is a patient in the local hospital.

Mrs. Geo. Edmons and son, Elmo, of Happy, visited Tuesday with her sister, Mrs. Annie Stevenson.

F. H., and Carl Turbeville, of Gainesville, visited in the home of Mr. and Mrs. S. P. Brown last week.

Mrs. Wayne Crawford and daughter, Mary, Mrs. Donald Alexander and children, spent several days with their parents, Mr. and Mrs. J. C. Morton, in Goree, Texas, recently.

## Long-Due Navajo Education Right Now is Reality

Brigham City, Utah—Navajo Indian youngsters, 1,288 of them, are currently enrolled in a year-old institution here that promises relief to a much-debated issue. The government's Intermountain Indian School is located on a 1,000 acre campus nearly 500 miles from the reservation and offers firm grounding in English, arithmetic, trade subjects, home economics and other basic subjects.

The completely modern school boasts a swimming pool, dormitories, dining rooms, shops, and classroom facilities equal to that to be found anywhere.

Dr. George A. Boyce, superintendent, believes that the school will turn out graduates capable of competing for jobs in fields never before open to Navajos, enabling a great number of them to leave the squalid reservation where 65,000 tribesmen now live at a meager subsistence level.

The situation is a sharp contrast to that of the past, and, at long last, is an indication that the nation is really determined to give the Indian his due. World War II tests found the young Navajo tribesmen to be shockingly close to 100 per cent illiterate, despite the treaty signed in 1868 promising adequate schooling for the tribal children.

The present Intermountain school came about as a result of the abandonment of the Bushnell Hospital, which occupied the site during World War II. The one and two story brick and wood structures were originally built at a cost of \$12,000,000, with \$2,550,000 spent for remodeling over the last two years.

Starting with an operational budget of \$1,421,820 for the current year, Dr. Boyce has gathered a staff of 269 employees. Sixty-six are Navajos and forty-five members of other tribes. Due to the fact that the chief educational difficulty is in teaching English to the children, a high proportion of the Indian staff members serve as teacher-interpreters and house mothers.

The three schools operating on the campus feature basic curriculum planned to serve children in selected age groups, those with a previous knowledge of English, and teen-agers who must graduate before completing a full quota of academic years.

The progress that the school has been making, and will make, is evident. Standard testing data similar to that used in the California school system, indicate that 672 pupils who have completed one full academic year at Intermountain registered a median gain of 1.6 years in such subjects as English and arithmetic, progress that the instructors believe comparable to that in metropolitan schools.

But academic classes are not the only classes at Intermountain. Full emphasis is placed on the inculcation of work skills and living habits. It is necessary to teach children arriving at the school the proper use of knife and fork, shower baths and plumbing facilities totally lacking in reservation homes.

"Learn by doing," is practically a school motto. A student council system is maintained and older boys and girls learn to handle food stuffs by managing the campus canteen. Scout troops have been formed as have a score of hobby clubs.

"Town visits" are also a method of teaching students the basic fundamentals of city life. Trips to Brigham City and Salt Lake City are sponsored, with municipal buildings, libraries, newspaper plants and radio stations all receiving visits.

The campus chapel is an exhibit of Democracy in religion. Catholic, Protestant and Mormon church services are conducted on Sundays and the church leaders of each denomination visit the school one day in mid-week for an extra hour of religious instruction.

## Undeclared Wars Not New To Uncle Sam's Marines

WASHINGTON, D. C.—Undeclared wars may be a new experience to most of the Americans now fighting in Korea, but the Marine Corps has been fighting in them for over a century and a half,—from Tripoli to Tientsin.

In addition to the present Korean war, Leathernecks have fought in nine major undeclared wars, and 14 smaller engagements, (one of which took place near Seoul, Korea in 1871).

The Marines' first undeclared war was one against the French, 1798-1801. After that they fought against the Barbary Pirates (this later became a declared war), Seminole Indians, Philippine insurrectionists, Boxer revolutionists, Nicaraguan bandits (twice), and revolutionists in the Dominican Republic and Haiti.

Among the minor engagements in which Marines participated are battles in Sumatra (1832), China (1854, '55, and '56), the Fiji Islands (1858), the Straights of Shimonoseki, Japan (1863), Samoa (1899), Vera Cruz, Mexico (1914), and even the capture of John Brown at Harper's Ferry (1859).

The Marines have fought in seven declared wars.

## AGRICULTURAL FILLERS

Taxes on Texas farm and ranch real estate increased in 1950 for the fourth straight year. The average increase for the state was four percent.

Taxes on Texas farm and ranch real estate in 1950 varied from an average of five cents per acre for the Trans-Pecos area to \$3.41 per acre in the lower Rio Grande Valley.

Fresh strawberries can be successfully frozen whole, sliced, crushed, pureed, or made into sparkling juice.

In addition to being heavier and having more finish, creep-fed calves grow out more uniformly in size and conditions. There is little shrinkage at weaning time.

In 1950 Texas farmers and ranchmen purchased 228,286 tons of superphosphate. It was used primarily under legumes and on pastures.

Cotton farmers are urged to make regular inspections of their fields of growing cotton for harmful insects. Get them early.

### Commanders Praise Front Line Morale Of Troops in Korea

A Pentagon general who toils far into each night to insure that Korean commanders are supplied equipment and trained troops is finding inspiration these days in a letter he received from a United States Army battalion commander who is leading army troops in battle.

"I've taken off at first light with them," the battalion commander writes, "fought all day and into the night, buttoned up on a mountain peak in two feet of snow, beat off two counterattacks during the night—and when morning came, found them ready to move out. No gripes, no despair—

"How can you help but love men like that? I've almost decided that United States Army men just don't crack."

The commander said his battalion is well-trained, tough, sound as a dollar, and loves to fight. At the time he wrote, the battalion had been in regimental reserve for five days.

"The men don't like it," he said, "they'd rather be on the move and so would I."

"I've got three rifle companies that are top-notch. There's little to choose between them. In planning an attack, I can toss a coin to determine the company that's going to make the main effort."

"In the past two months, we've experienced almost every type of operation in the book except a river crossing and we're looking forward to that in the near future."

"Of course, the most outstanding thing about this outfit—and it's none of my doing so I can brag about it—is the spirit of the men themselves."

"Whenever I feel low, I get out among them and talk with them—it's the best medicine in the world for the commander who wonders how much further he can push his outfit before it begins to crack."

### Determined Traffic Officer Finally Gets Drunken Driver

OSHKOSH, Wis.—Lt. Harry Kripner, traffic officer of Oshkosh, by gosh, is not a man to give up easily. Kripner recently nabbed a weaving motorist, but he had to get his squad car out of a ditch to do it.

As Kripner pulled alongside the weaving car, a third auto hit the squad car. The pursued motorist drove on and Kripner and the other vehicle went into a ditch. The occupant of the third car was injured, so Kripner saw that he was cared for and then radioed for an ambulance.

The officer then backed his own car out of the ditch and caught up with the weaving vehicle, whose driver received a \$100 drunken driving fine.

### Blind Brothers Successfully Manage Large Family Farm

KAUKAUNA, Wis.—If you hadn't been told, you would hardly guess the truth as you watch the Willems brothers, Henry and Aloysius, go about the work on the farm that has been in the Willems family for 100 years. Even after you know, it is hard to believe that the two brothers, who move so quickly and surely, are both blind.

For almost 30 years Henry and Aloysius have managed the farm and done all the chores. They have daily milked 30 head of cattle and care for a sizeable flock of chickens and several hogs.

"We don't do field work, such as silo filling and plowing," Henry explains. "We have good neighbors and they help us out. If they are busy we hire someone to do it. We make our own decisions as to when it is time to plant."

Although the brothers sold much of their stock at a recent auction, they still have "enough to fuss around with" on the farm.

Recreation is not a big problem for the two. Both enjoy trips to town for a chat with neighbors and during bad weather spells they listen to "talking books" supplied by the state.

Three sisters, Alvira, Malenia and Hilaria, live with the brothers, and take care of all paper work connected with management of the farm.

### Cluster of Cabs Tips Cop To Illegal Poker Session

MILWAUKEE, Wis.—Anyone looking for a taxicab at 2:45 here on a recent morning would have been faced with trouble finding one, providing he was not in one given block.

Patrolman Eugene Buraczewski, although not looking for a cab, discovered eight of them parked in a neat row while walking his beat early in the morning. This would ordinarily not have bothered the patrolman at all, except for the discovery that none of the vehicles had drivers.

Buraczewski felt it his duty to investigate the situation. He noticed that lights were burning in only one nearby residence—on the second floor.

As he neared the room, he overheard voices. "I'll raise," then, "Two aces win." He returned to an alarm box and called the station for help. One cabbie faced charges of running a gaming house, the others of being patrons.

### Ordnance Sergeant Kept Marine Rifles Active in Korea

WITH THE FIRST MARINE DIVISION IN KOREA—Many a news account of the northeast Korea winter fighting said that UN rifles and machine guns "froze" in the sub-zero temperatures.

The man who probably did more to overcome this crippling obstacle than any other was Marine Technical Sergeant Frank T. Varsage of Solana Beach, Calif. His official title is ordnance and ammunition chief in a battalion of the Fifth Marine regiment.

As soon as the First Marine Division collided with the North Korean winter, Varsage realized the need for some method of weapons protection. Ordinary lubricating oil sealed rifles and machine guns as effectively as a welding job. Washing weapons with gasoline and firing them dry was tried but friction soon caused the mechanism to jam.

The ordnance chief dropped all other work and spent a precious week experimenting. He came up with a conglomeration of graphite grease, diesel oil, 80 octane gasoline and No. 10 motor oil.

First he coated an M-1 rifle with the "stuff." After 48 hours in 15-below weather the rifle functioned properly. He repeated this, this time including a rifle treated with ordinary oil and another dry. Oil permitted 100 per cent stoppages; the non-treated weapon scored 60 per cent. The rifle coated with the "stuff" fired perfectly.

During the most critical days of the Chosin reservoir operation, the "Varsage Lubricant" kept rifles and automatic weapons firing for most of the division.

### Speechless Talking Cow Never Finishes the Act

RANGOON—Papa Saya Thin is a tent show magician who made quite a hit with the native population who thronged to see his talking cow.

The little town of Pegu, south Burma went almost en masse to witness this modern marvel. Thin led his "talking cow" onto the stage and explained to the audience the animal would answer any questions.

Then he draped it with a showy blanket—and bedlam broke loose. Someone in the audience had noticed an assistant slipping beneath the blanket. The act turned into a disappearing one as magician, assistant and speechless cow fled before a shower of brickbats and chairs.

### Army Employs German Dogs As "Walking Radar" Patrol

FRANKFURT, Germany—American infantrymen on Europe's defense line now have available the services of walking radar. Twenty-seven German shepherd dogs patrol the lines in absolute silence, picking up the enemy by scent or ear at distances up to 400 yards.

At Graefenwoehr, the army's dog training center, the animals are required to pass rugged tests. They must crawl through barbed wire and around log obstacles for 100 yards while live in machine gun ammunition whines overhead and ground charges of dynamite explode with deafening concussions.

Along with their dogs crawl their masters, members of the 42nd infantry scout dog platoon command. Each man has a dog assigned to him and they train together constantly.

Talking and barking are taboo, and a number of silent communication methods are used between man and dog. Most common is the raising of the hair on the back of the neck.

The platoon is the only one of its kind among the American forces in Europe.

Recently two of the dogs were used to track down a prisoner escaped from a military police stockade. It took the animals less than an hour to discover him, hiding in the brush.

### This Family of Eighteen Believes in Big Numbers

CLIFFWOOD BEACH, N. J.—Mr. and Mrs. Joseph Carey apparently like the patter of little feet around the house. Recently they welcomed the 18th addition to their family in 18 years of married life.

Carey, 51, the father of the large brood, admits that it often gets a little difficult to manage his family on the \$90 a week he earns as a boiler engineer. "But we always get along," he says, "and sometimes even have spare money for little luxuries."

The family lives in a six room house which they get rent free in exchange for papa's services as caretaker and custodian.

All but \$10 of Carey's weekly check goes for the food bill, the remainder for miscellaneous items, such as laundry, and for the upkeep of an old, yet reliable auto.

Clothes, as in any large family, are passed from one offspring to another.

Mama Carey has an unusual philosophy about childhood diseases. When one of them catches measles, mumps and chickenpox, "I let them all catch it. Then we get it over with at the same time."

### PERSONALS

Mr. and Mrs. Geo. Jones and Billy, Mr. and Mrs. T. D. Wallace, spent the week end in Childress on business. They also visited in Turkey with Mr. Wallace's daughter, Mr. and Mrs. Alga Turner.

Mr. and Mrs. Bill Middleton, of Amarillo, visited Mr. and Mrs. C. R. Badgett Wednesday. They were enroute to Carlsbad, New Mexico, where they will visit the caverns.

Mrs. Ray C. Bomar was a business visitor in Tulla Friday.

Mrs. Irma Piercy, of Vigo Park, was shopping in Silverton Thursday.

Mr. and Mrs. H. Roy Brown visited Thursday night with his brother, Mr. and Mrs. Sid Brown at Cedar Hill.

Mrs. Grover Mantell and boys, of Idaho, and mother, Mrs. Minnie Stevenson, of Canyon, are visiting in the home of Mr. and Mrs. Dean Allard.

Mr. and Mrs. Geo. Jones and Billy, and Mrs. W. W. Yancy made a business trip to Lubbock Monday.

### VISITS SON IN LOUISIANA

Mrs. Jim Whiteley spent last week in New Orleans, Louisiana, visiting her son. She reported a very enjoyable trip.

The expanded soil testing service of the A. and M. College can handle and analyze up to 100 soil samples per day. The charge for the analysis is small but the recommendations from the laboratory may save farmers, ranchers or gardeners and others much expensive fertilizer. Low yields are not always caused by low soil fertility.

### June 18 Date Set For Meat Markets to Post Retail Beef Ceiling

The nation's more than 300,000 meat markets will have until June 18 to post official OPS retail beef ceiling price lists, the Lubbock district office of price stabilization announced this week. This county is in the Lubbock district. Because of delays in printing the official lists, the agency extended the posting requirement for two weeks from June 4. Retail ceiling prices above which retailers cannot charge for beef went into effect May 14 and posting of the official ceilings had been scheduled to begin within 20 days. Although the retail beef posting time is being extended until June 18, retailers have been required since May 14 to display their individual prices for cuts of beef by grades. These prices must not be more than the ceiling price. When the official lists are available, housewives will have a readily available check that these

prices are not in excess of official OPS ceilings.

The 3 by 17-inch posters in black ink on white paper are now being prepared by the government printing office. There will be 54 different charts—one for each of the three groups of retailers in the 18 retail zones into which the nation is divided.

The posters, which carry the title, "Retail Ceiling Prices for Beef", are expected to be available in the Lubbock OPS District Office well in advance of the June 18 deadline. That date has been selected to make sure that an adequate supply will be available in all district offices.

As soon as copies are received by district offices they will start mailing them to retailers who have filed OPS Public Form No. 5. Additional copies of the lists may be obtained from district offices.

OPS Form 5 is the one on which a retailer notifies the OPS of the group into which his store falls—Group 1, 2, 3, or 4. Since most retailers of meat also handle groceries, most of them filed OPS Form 5 when the grocery ceiling price regulations, CFR 15 and CFR 16, were issued and have their classifications.

Retailers may display the price lists as soon as they get their copies from the district office. They may use either the official list which will be furnished free or one that is an exact copy of the official OPS list if the printing is legible and at least as large.

The price list must be placed at or near where the meat is sold and where customers can readily see and read it. At least one list must be posted for each 20 feet of meat counter space.

Price officials also called attention of those firms who sell consumer services that their deadline for filing ceiling prices is June 16. The sellers of such services are required by ceiling price regulation 34 to post their ceiling prices in their place of business and mail a duplicate copy to the Office of Price Stabilization, Broadway Building, 1202 Texas Avenue, Lubbock, Texas.

This list must also carry an adequate description of each service performed. Among the firms and services included in the regulation which has been in effect more than two weeks, are: Barbers and beauticians; auto, radio, and household appliance repairs; laundry and dry cleaning and tailor shops; shoe repairs; parking lots, filling stations, checking accounts, bowling alleys, skating rinks and golf fees, and admissions to amusement parks, as well as many amusement and recreational facilities and countless trade and personal services.

### Duck That's Not a Duck; India's Bombay Duck—Fish

When is a duck not a duck? The answer is easy: When it's a Bombay duck, for that makes it a fish.

The Bombay duck—for which India is now reported to be seeking new export markets in the United States and Canada—is a member of the fish family Synodontidae.

This family is otherwise known as the lizard fishes—to bring in still other creatures, and make the layman's chances of mistaken identity even greater. Such fishes are characterized by scaly lizardlike heads, and wide-gaping mouths lined with rows of sharp, pointed teeth.

The name "Bombay duck" applies to the dried and salted food product, esteemed as an Indian delicacy, rather than to the fish itself, which belongs to the species Harpodon nehereus within the family Synodontidae.

Just how the Bombay-duck term came about is obscure; but it is significant that this dried fish was long exported from Bombay and west India's Malabar Coast. Other names are bummalo or bammalo fish, sometimes used to designate the fresh fish.

The Harpodon is taken in varying quantities along both the eastern and western shores of the Indian peninsula, as well as off Burma. It is found not only in the open sea, but also in many of the rivers and estuaries of the warm Indian Ocean region.

The first report of the species, then given another name, followed its discovery in 1815 in the mouths of the Ganges.

### Fish-Eating Bats Captured In Gulf of California

Specimens of the bizarre fish-eating bat Pisonyx, one of the least known of North American mammals, have been added to the Smithsonian Institution mammal collections as a gift from the National Geographic Society.

They were collected in the Gulf of California by Lewis Wayne Walker. They are confined to small islands in this gulf and seem to live entirely upon small fish which they catch by gliding low over the water.

It is supposed that the fish are caught in their hind claws, which are very long, thin, and blade-like. With these claws they scoop up the fish.

It is quite doubtful, Smithsonian mammalogists say, that the bat actually dives for its prey, although at times its body may be pretty well immersed.

Some other bats are also known to be fish eaters. They have developed the ability to land on the surface of water and take off again, an extremely difficult undertaking. This creature, however, had adapted itself to an almost completely fish-eating existence.

It is seldom seen, since it lives among the rocks of small, uninhabited islands which are rarely visited by hunters or collectors.

### Radio Waves

Near a transmitter radio waves travel directly to the receiver antenna, but farther away these "ground waves" are intercepted by the curvature of the Earth. At a height of 30 to 250 miles there is a region called the ionosphere which bends the waves down again, and so carries them around the Earth. The very short waves used in television are not ordinarily affected, and that is why they do not carry much farther from the transmitter than one can see. The ionosphere has several layers, made of atoms partially broken or ionized, mainly by the Sun's radiation. The heights of these layers, and their relative effectiveness, vary between night and day and also from one season to another, so this affects long-distance radio transmission. Some frequencies are transmitted better at night, while others are most effective in the daytime.

### Not Always Best

While United States Army troops in Korea have a variety of standardized multiple rocket launchers on hand, they have made little use of them. If it is desired to put over a very large volume of firepower very suddenly for a short period only, the rocket has a distinct advantage over heavier guns. On the other hand, if the fire is to be continued for a considerable time, the rocket is very uneconomical. In a manner of speaking, every time a gunner shoots a rocket, he also shoots away his gun. On a pound-for-pound basis, the gun can outstrip the rocket because the gun, in a short while, can shoot up its own weight in ammunition.

### Appetite Factor

In its food research program, the Army has found that environmental factors have an important bearing on a soldier's attitude towards food. These environmental factors include climate, topography, and conditions of assault, support, and survival. The sights, din and odors of battle are likely to affect the soldier's willingness to eat certain kinds of food and cause his inability to eat others. So also are the stresses of anxiety, fear, monotony and fatigue. As a result, experiments are being made in various cooperating research laboratories by feeding animals under conditions of excitement and stress.

### Self-Employed Persons Under New Security Act

Apparently there is some misunderstanding of the self-employed person's obligations under the amended Social Security Act, according to John R. Sanderson, manager of the Amarillo Social Security office. Old-age and survivors insurance is not optional for people who are working for themselves in their own trade or business, or as partners in such enterprises. If you are self-employed and derive as much as \$400.00 in net profit from your business or businesses in any taxable year after December 31, 1950, your social security coverage is compulsory by law.

Sanderson pointed out that the only exceptions are income derived from self-employment as owneroperator of an agricultural enterprise, and self-employment income derived from practice as a physician, lawyer, dentist, osteopath, chiropractor, optometrist, naturopath, veterinarian, architect, CPA, licensed, registered or full-time practicing public accountant, Christian Science practitioner, professional engineer, or funeral director.

As a self-employed person you do not report yourself along with your employees. Your self-employment income must be reported annually on your income tax form 1040 Schedule C, especially revised for this purpose. Your first such report is due March 15, 1952, covering your self-employment income for the taxable year 1951 and payable along with the report is your self-employment social security tax, which is 2 1/4 percent of the first \$3,600 of your net business profit. If you are a partner in a business, the tax is levied on the first \$3,600 of your distributive share of the partnership net profits, whether or not the profits are distributed.

Mr. and Mrs. Clay Fowler and Jack Strange have returned after picking "berries" in Kansas and Missouri.

Miss Anna Lee Anderson visited last week in Amarillo with friends.

### PERSONALS

Mr. and Mrs. M. K. Summers visited Sunday in Plainview with Mr. and Mrs. H. B. Heath and children.

Mr. and Mrs. J. M. Gardner, of Abernathy, Texas, visited Sunday afternoon with his sister, Mrs. C. M. Hill.

Ted Hancock spent last week in Lubbock visiting his grandparents, Mr. and Mrs. L. B. Hancock, and his aunt, Mrs. Ralph Chaney.

Mrs. Steven Duncan was able to be moved home Friday after spending the past week in the local hospital.

Mr. and Mrs. Weldon Kiker and girls, of Tullia, and Paul Whitesell, of Amarillo, were Sunday visitors of Mr. and Mrs. Floyd B. Williams and Martina.

Mr. and Mrs. C. C. Garrison and Mr. and Mrs. Fred Garrison visited with Mr. Garrison's mother at Matador Sunday afternoon.

Mr. and Mrs. W. Coffee, Jr., spent most of last week in Amarillo with his father, W. Coffee, Sr., who is quite ill.

Jim Burleson is visiting his sister, Mrs. Roy McMurtry and other relatives here.

Saturday afternoon Mr. and Mrs. Lawrence Wright and three children of Borger, visited Mr. and Mrs. C. D. Wright. They were enroute to Plainview.

Mrs. Sam Thompson and Mr. and Mrs. Ben Martin were dinner guests of Mr. and Mrs. Kemp Thompson.

Judge and Mrs. C. D. Wright were supper guests of Mr. and Mrs. Kemp Thompson Sunday.

### CARD OF THANKS

I wish to sincerely express my appreciation to my friends for their kind deeds, cards and flowers during my illness in the hospital. Also do I want to thank the doctors and nurses for their kindness during my illness.

Mrs. Ralph Glover.

Mr. and Mrs. Leo Comer and children, visited Sunday in Plainview with relatives.

Lowly Earthworm Actually Some Sharp Character

FRANKFORT, Ky. — You don't have to be too close an observer to know that, as far as the earthworm family is concerned, spring has been around for some time.

This might not sound too interesting unless you are a zoologist, but, in bare truth, no one but the zoologist knows what an interesting specimen Mr. Crawler really is. In fact, he is almost phenomenal.

Zoologists, who know more about the worm than anybody—except, maybe a few fishermen, are becoming more and more confused about the fellow as time goes by. For instance, there are around 1,000 classified species. Size ranges from a bare fraction of an inch to the Australian jumbo special variety that has been known to measure five feet.

Individually the little earthworm is not too important. He grows into adulthood in a period of less than six months and goes about in a century-old manner, eating dirt—or rather seeking the organic matter found in the dirt by taking it into the digestive system and seemingly just boring himself around the earth.

It is through group effort that the worms really make their contribution to civilization. Crawlers, like humans, like to gather in rich areas. In an acre of good soil there might be nearly a million earthworms. As the busy worms go about their usual procedure of taking in dirt to obtain the organic matter therein, their burrows offer the soil room to breathe and also provide drainage for rain. They might be called underground tillers of the soil for they contribute heavily to preservation of the good earth and the creation of new soil.

And just why are there so many worms? It's simple. Crawlers are hermaphroditic. Every earthworm is both a male and a female, although two worms are needed to produce an offspring.

After fertilization both worms return to their life of eating dirt and later give offsprings. One mating is believed sufficient for a worm's lifetime and is said to produce several groups of young.

In case you have never been able to decide, the earthworm does have two ends. The head is the slim, tapered end and the tail is, of course, the other end.

Although he is equipped with a special reproductive ability, you can kill Mr. Crawler by cutting him into. A full grown worm is made up of little rings or segments, from 100 to 150 in number. If less than 15 rings are whacked off from the tail, the reproductive organism furnishes a new tail and the worm goes about his business. If part of the head is clipped, the reproductive organism still functions, but the part produced is always a tail and the worm eventually dies from starvation, having no way to feed. Whack more than 15 rings from either end and Mr. Crawler is definitely a gone gosling, for part of the reproductive system is lost.

The sometimes quoted belief that it "rains" the worms found on the ground after showers is an untruth. The rain swells the earth and cuts off the oxygen supply and the earthworms simply come up for air. Which is probably what he would like very much to do when he finds himself attached to some angler's hook and several feet under water.

Hollywood's Favorite Chimp Victim of Compound Fire

THOUSAND OAKS, Calif.—One of Hollywood's engaging comics, and consistent scene stealer, Tamba, a five year old performing chimpanzee, is dead.

A veteran of scores of movies and television shows, Tamba performed in many pictures. His latest film was "Bedtime for Bonzo."

The chimp was suffocated along with three other apes and a baby kangaroo when fire broke out in the chimp house of the World Jungle Compound, filling the cages with smoke.

Tamba, alias Bonzo, Pierre, Jo Jo and Rollo, understood more than 1,000 words and 500 commands. His salary was \$500 a week.

He recently double crossed his press agent by flunking an intelligence test, but psychologists credited him with the intelligence of a three year old child.

Dr. Berger Comments On Mrs. Jackie Wingo's Travel

Dr. Roy G. Berger, director of the Amarillo Center says, Mrs. Jackie W. Wingo of Silverton, received the Master of Education degree from West Texas State College, at the end of the spring semester. Probably a statement to that effect was made in the Briscoe County News, but it is not at all likely that anything was said about the fact that to speed up her earning of that degree, Mrs. Wingo has driven from Silverton to Amarillo to sit through 3-hour night classes at the Amarillo Center and drive back to Silverton the same night. She has done this for three semesters.

"Consider," Dr. Berger continued, "the distance that Silverton is from Amarillo, the rain and the sleet and the snow that sometimes made those miles dangerous driving, the hours of study those night courses required, and add to these

the fact that Mrs. Wingo was teaching school, through the daytime. In terms of respect for Mrs. Wingo, the sum total will be a little staggering.

Dr. Berger went on to say that one other student from Silverton deserved equal praise although she has not yet won the degree she is working for. She is Florence Parker.

Both Mrs. Wingo and Mrs. Parker are teachers in the Silverton schools.

Visitors in the home of Mrs. W. A. Dickerson Sunday were: Mr. and Mrs. Garland Dickerson, of Floydada, and Mr. and Mrs. Wayne Davis and children of Canyon.

for our country's defense  
will see my twins  
through college!"

MRS. MARY CALLON OF INDIANAPOLIS, INDIANA  
CAN TELL YOU—IT'S PRACTICAL  
AS WELL AS PATRIOTIC TO BUY BONDS FOR DEFENSE

"I have twin reasons for buying bonds," says Mary Callon, introducing 17-year-old Jack and Janet. "I've been a widow since my children were 8, but they'll have a college education. The U. S. Savings Bonds I've bought will see them through."

Mrs. Callon says, "In 1942 I enrolled in the Payroll Savings Plan at the U. S. Naval Ordnance Plant where I'm an executive secretary. I put 10% of my pay each week into bonds. I've discovered it's regular saving that makes saving possible at all!"

"By careful managing, the twins and I live comfortably. How thrilled I'll be to see them enrolled in Butler University this fall, thanks to my U. S. Savings Bonds! Every breadwinner should buy bonds—there's no better way to save money!"

*Mrs. Callon's story can be your story, too!*

What Mary Callon did, you can do, too—start now! It takes just three simple steps.

1. Decide to put saving *first*, before you even draw your pay.
2. Save a regular amount *systematically*, week after week or month after month.
3. Sign up *today* in the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

You'll be providing security for yourself, your family, and our free way of life.

**U. S. SAVINGS BONDS ARE DEFENSE BONDS—  
BUY THEM REGULARLY!**

### Take Strawberry Chiffon Dessert Before Fresh Berries Bow Out

The strawberry season is much too short for everyone who likes such desserts so you can't serve them too often during their limited availability at the market. Put your next pint of the beautiful berries, in a Strawberry Chiffon Dessert like the one in the picture. It's made with unflavored gelatine and whipped evaporated milk. It stakes an honest claim for thrifty dessert honors. Only one pint of berries, but it serves 8!

Like all dishes made with unflavored gelatine, Strawberry Chiffon Dessert can be made hours in advance of serving time. If you'd like to make Strawberry Chiffon Pie, turn the mixture into a baked 10-inch pie shell instead of a mold.

#### Strawberry Chiffon Dessert

1 pint strawberries  
1 envelope unflavored gelatine  
1/2 cup water  
1/2 cup sugar  
1/2 teaspoon salt  
3 tablespoons lemon juice  
1 teaspoon lemon rind  
1 tall can icy cold evaporated milk

Wash strawberries with a fork reserving 3 for garnishing. Soften gelatine in water; place over boiling water and stir until gelatine is dissolved. Remove from heat; add sugar and salt and stir until dissolved. Add strawberries, lemon juice and rind; chill until the mixture is the consistency of unbeaten egg white. Whip chilled evaporated milk until stiff in gelatine mixture. Turn into 1 1/2 quart mold. Chill until firm. To serve, unmold and garnish with whipped cream and sliced strawberries.

YIELD: 8 servings.

### Tasty Tuna Patties

A cook who can come up with a tasty tuna patty of melting richness should be revered in song along with the lass who could make a cherry pie. For tuna patties, combining the delicate goodness of tuna flakes with seasonings and crumbs, are truly a gustatory delight.

A tuna patty, with velvety textured mayonnaise baked in should be the hardest-to-please man's sigh with contentment.

#### Broiled Tuna Patties

1 hard cooked egg  
6 1/2 ounce can tuna, flaked  
3 cups fine dry bread crumbs  
1 tablespoon finely cut parsley  
1/4 teaspoon salt  
1/4 teaspoon black pepper  
1 cup mayonnaise  
Lemon slices  
Paprika

Finely dice the eggs and combine with the tuna, 1 cup of the bread crumbs, the parsley, salt, pepper and mayonnaise. Mold into 5 or 6 patties, and cover them on both sides with the remaining crumbs. Under low heat until golden brown and heated through. Garnish with lemon slices sprinkled with paprika.

### Florida Cake Goes To Camp

Made to ship safely; stay fresh indefinitely and to please any palate anywhere, Florida Cream Cake with orange juice in its batter to camp. This season's big juicy Valencia oranges are ideal to use in such recipes.

#### Florida Cream Cake

4 egg whites  
1/2 cup sugar  
1/2 cup heavy cream  
3 teaspoons grated Florida orange rind  
1/2 cup Florida orange juice  
2 cups sifted all-purpose flour  
3 teaspoons baking powder  
1/2 teaspoon salt

Beat egg whites until stiff; gradually add 1/4 cup of the sugar and until very stiff. Whip cream with 1/4 cup of the sugar; fold beaten egg whites. Add rind and orange juice. Sift together flour, 1 cup sugar, baking powder and salt; fold into orange-cream mixture. Turn into 8-inch spring form pan lined with waxed paper or a 9x5x3 inch loaf pan. Bake in a slow oven (325°F.) 1 hour and 15 minutes.

### Quartermaster Corps

When the United States began sending its troops into Korea, the Army's Quartermaster Corps, which had reduced its personnel and facilities to a pattern commensurate with the requirements of the post-World War II army, was ready for the task. The entire organization was so constituted that it could readily expand to meet any eventuality. Proof of the Quartermaster Corps' ability is in its World War II record. The Corps reached its peak expansion in 1945 with 54 general officers, 30,744 other officers, and 467,266 enlisted personnel. Between December 7, 1941, and August 1, 1945, the Quartermaster purchases totaled more than 20 billion dollars not including petroleum, oil and lubricants. On August 14, 1945—VJ Day—the Corps was in the process of buying, storing, and issuing approximately 41,000,000 pounds of foodstuffs per day, or at the rate of 15 billion pounds a year.

### Volunteer Population

Tennessee was first among the four states of the East South Central region in rate of population growth between 1940 and 1950. During the decade Tennessee's population increased by 12.9 percent, the highest rate of growth for the state in 50 years. This compares with an increase of 6.5 percent for the region as a whole during the decade of the 1940's. Alabama was second among the East South Central states in rate of population increase during the 10-year period, and Kentucky was third. Mississippi lost population for the first time since the decade of the First World War, but the loss was quite small, amounting to about 5,000 people, or 0.2 percent.

### Smoke Signals

The average conception of smoke bombs used by the Army is that they produce a billowing, white screen for advancing troops. Smoke bombs, however, also are in bright colors of red, green, blue and yellow. These are used for ground-to-air and ground-to-ground signaling with the message for various colors differing from day to day. One day, a green smoke might mean "Have spotted a troop concentration—lay on a barrage," another day it might be the signal to begin an attack. The colors are used in various combinations to give a wide variety of messages. The smoke bombs are in the form of hand grenades and artillery shells.

### 'Makura' Means Pillow

The English translation for the Japanese "makura" is pillow. But there all resemblance between a makura and a pillow ceases—except that they were both designed for the same purpose—to support the head during sleep. The difference is in the type of support they each provide. The makura resembles a sap log in shape. It is about 18 inches long and six inches in diameter. Although it is made of cloth, it's far from comfortable, for it is stuffed tightly with buckwheat grains. On the more comfortable side, our pillows are filled with waterfowl feathers and down, or completely with down if that is preferred. Imagine the rest one would get if he slept on a pillow such as the Japanese use!

### New Type Spark-Plug

Industry now has a new type rust-proof spark plug which is made of Monel with a nickel adjustable center electrode and a "shatter-proof" ceramic insulator. It has twice the life of the ones previously in use.

### Black, White and Pink Kitchen

An attractive modern kitchen in which black, white, pink and pale gray are used effectively is indicative of a new trend in kitchen decoration. Where white cabinets used to be the rule, more color is now capturing popular interest. An example of this is the kitchen where the ceiling and cabinets are painted cherry blossom pink and walls are enameled mist gray. White appears on the stove, sink and refrigerator. Gleaming black emphasizes the baseboard and the breakfast nook chairs. Black and white checkered curtains hang at the windows.

Mr. and Mrs. Otis Strange, of Amarillo, were visitors in Silverton Sunday.

### PERSONALS

Mr. and Mrs. R. E. Brookshier took Mrs. J. S. Brookshier to Amarillo Sunday where she went by train to Kansas City to visit relatives.

Mrs. D. N. McGavock, Mrs. R. G. Chisum and daughter, Lola, and Mr. and Mrs. J. D. McGavock attended a family reunion at Lamesa last Sunday.

Sunday dinner guests in the D. N. McGavock home were: Elder and Mrs. E. E. Degge, H. T. Myers and daughters, Mrs. Pearl Simpson, Leonard McGavock and children, Mrs. R. G. Chisum and daughter, Lola.

Mr. and Mrs. Charles Kelly, of Abilene, were week end guests of her parents, Mr. and Mrs. Lee Davenport.

Donna and Charles Mayfield left May 23 for San Antonio, and San Benito, Texas, on a ten days visit with friends.

**Making Poultry Pay**  
—THE DR. SALSBERY'S WAY  
A good poultryman watches for trouble signs in his flock. Right now, cecal "bloody" coccidiosis is troubling many raisers. To prevent and control this disease, use Dr. Salsbery's Ren-O-Sal Tablets. They act quickly, prevent outbreaks and heavy losses. Put Ren-O-Sal in drinking water. Protect poultry during warm, damp months of spring and early summer. See us at once. **BADGETTS PHARMACY**

Self-Employed Persons Obligated Under New Security Act

Dr. C. C. Schmidt, camping chairman of the South Plains Council, Boy Scouts of America, announced that the summer camp for all the Boy Scouts of the South Plains opened for a four week's session, starting Sunday afternoon, June 3.

C. W. Post Memorial Scout Camp is located 2 1-2 miles Southwest of Post, Texas. The Council is offering this summer four one-week periods, June 3-9, June 10-16, June 17-23, June 24-30. 160 Boy Scouts are registered for the first week of camp; 155 for the second week, 150 for the third week. There is still some additional room for the fourth week, June 24-30.

W. R. Postma, council executive, will serve as camp director; J. B. Johnston, district executive from Laamesa, program director; Ray L. Howard, district executive from Plainview, director of waterfront; Raymond Lupfer, district executive from Lubbock, director of special activities; Oscar Sherrill, district executive from Lubbock, commissary director; A. J. Finney, better known as "Jabbo", will again serve the camp as head chef.

All parents and friends are cordially invited to visit the camp each Friday evening. Since no facilities will be available for the evening meal for the parents, each parent is reminded to bring a picnic supper with them. Each week's camp will start with supper on Sunday evening and will close following lunch on Saturday.

Mr. and Mrs. Joe Beyer and daughter, Beverly, of Hutchinson, Kansas, visited in the home of Judge and Mrs. C. D. Wright last Friday.

Mr. and Mrs. Oner Cornett took their son, Mickey, to Plainview Sunday where he caught the bus for Austin, where he will attend the next six weeks of school at the University of Texas.

C. L. Stalcup, of San Bernardino, California, who has been visiting his daughter, Mrs. Wade Welch the past two weeks left for his home Sunday.

Checked Your Fire Insurance Coverage Lately?

It's too late to check or increase the amount of fire or other insurance on farm buildings after a disaster has struck. And according to C. H. Bates, extension farm management specialist of Texas A. and M. College, it is quite common to find "under-insured" farm properties in Texas.

Building costs have risen steadily during the past few years, and unless insurance policies are changed in keeping with these costs, the actual protection becomes lower and lower. To offset these increases, Bates suggests that farmers check their policies now to make sure that the insurance coverage on all farm buildings is adequate.

He illustrates with what happened a few weeks ago to a farmer in north Texas. This farmer lost by fire a dairy barn, machinery shed and grain bins. These buildings had a total undepreciated value of \$3,380. The complete settlement from his insurance amounted to \$1,040—a difference of \$2,340 between the cash settlement and the inventory values which were only a fraction of the total replacement costs under present conditions.

This farmer through careful planning can replace each \$1,000 of 1939 building values by spending now about \$2,380. Chances are that he may feel so "cramped" for funds that the replacements will be inferior to the buildings lost. He must have the replacements to stay in business and he needs them now.

Such an experience can be disastrous to a family just getting started in farming and can cause even the well-established farm family to under go many privations. Bates, therefore, urges farmers to review their insurance needs in the light of present day building costs and make the needed adjustments.

Mr. and Mrs. M. G. Moreland and son, Morris, went to Conchus Dam, New Mexico, on a fishing trip last week.

Mr. and Mrs. Geo. Seaney visited their son, Mr. and Mrs. Cecil Seaney Sunday.

Light and Color Important To Realization of Beauty

Wouldn't this be a drab and gloomy world without color? And, did you ever stop to realize the magic that the human eye performs in bringing this multicolored world to you? Do you know, for example, that in looking at violet for one second your eye receives 800 trillion waves to produce the sensation of this hue?

Much about light and color was a deep mystery until comparatively recent times. Aristotle's theory that colors were blends of light and dark was held for many centuries. Then, in 1666, Sir Isaac Newton noticed that sunlight passing through a prism was split into all the colors of the rainbow, and he evolved the theory that colors were not blends of light and dark but the component parts of light.

Now it is thought that light has an atomic as well as a wave structure, and Professor Albert Einstein says it also has mass. The colors a substance will give off are the same as those it will absorb when light strikes it. Every type of matter has its own special spectrum. In sodium, for example, the spectrum is chiefly yellow; in calcium, violet.

The visible spectrum contains waves ranging from red (these waves are the longest—one thirty-five-thousandth of an inch from crest to crest) to violet (these are the shortest—one sixty-seven-thousandth). In between are orange, yellow, green, and blue.

Color has been of incomparable value to man in science and industry. It enables him to detect poisons in the blood stream, thus helping in the diagnosis of various diseases. It enables him to identify dangerous elements in foods, and elements in various metals, permitting qualitative and quantitative analysis.

Iron Ore Imports Set Highest Mark in History of Nation

Nearly 9.2 million net tons of iron ore came into the United States last year from 15 foreign countries. That was the largest amount ever imported, exceeding the 1949 total by about one million tons. In 1945 imports were only 1.3 million tons.

Meanwhile, rapid progress was made in the development of iron ore deposits in Venezuela after more than a dozen years of planning and investment. The first ore from one new property in that country arrived at an eastern port of the United States in the latter part of March.

Venezuela is expected to become an important source of ore for the United States. The property shipping the first ore, mentioned above, is one of two developments in Venezuela. It is expected to produce eventually at the rate of 3,000,000 tons a year and may later yield 5,000,000 tons a year.

Cites Early Detection

The decrease in deaths from mouth cancer during the last 10 years can be attributed in part to early detection of the disease by the dentist, a cancer specialist reported in The Journal of the American Dental Association. Dr. Leonard B. Goldman, director of the cancer prevention and detection center at Queens General Hospital, Jamaica, N.Y., said that "since most persons visit their dentists periodically, early cancer often may be found during a routine dental examination." Dr. Goldman, who is also professor of radiotherapy at the New York Medical College, Flower and Fifth Avenue Hospitals, New York City, urged an extension of dental health education. "To the well-known advice, 'See your dentist twice a year,' should be added the slogan: 'Your dentist can help you prevent mouth cancer,'" he said. Dr. Goldman listed as factors in mouth cancer infected gums, jagged teeth, ill-fitting dentures and excessive smoking.

Eye Exercises—Good or Bad?

Eye exercises are beneficial in some cases but useless or even dangerous in others, according to the Better Vision Institute. The value of such exercises depends on the nature and seriousness of your visual errors. Also, it is emphasized, eye exercises should only be attempted under the direction of a qualified specialist who has thoroughly examined your eyesight. Seeing is an acquired skill, and most people fail to use all their potential visual abilities. Some develop good visual skills, while others develop faulty seeing habits although their eyes may be structurally perfect. One scientist taught servicemen to recognize various types of planes and ships in 1/100 of a second and to read two or three times faster than they ever had before. Some of the men retained their new visual skills, but others relapsed into old habits.

Correcting Squint

Excellent results have been accomplished through the use of visual training to correct squint. Thousands of children have regained normal eyesight in this way, without surgery. A typical visual training program consists of three 30- to 60-minute periods a week. Many people with mild seeing faults have about a 50-50 chance of benefiting from such training. But unless improvement is noticed immediately, and progress is constant the value of continuing is questionable. Competent examinations are important.

Witches Will Ride Imported Brooms; U. S. Supply Down

The wives and witches of America will be buying and flying more brooms from overseas this year than ever before.

The ladies aren't calculated to like them very much, however. Sweepers made from imported broomcorn are more brittle, less durable than those fashioned from stocks of U.S. corn-straw. Nevertheless, the price of both foreign and domestic brooms is likely to be about the same—highest in history.

Ever since World War II, production of American broomcorn has slowly but steadily declined. Increased importation of foreign broomcorn became necessary after the smallest crop on record was brought in last year. Bad weather joined with a cut in acreage to trim the harvest to a meager 25,900 tons, slightly over half that of 1949's crop.

Even with favorable weather conditions the future of the home-grown broom brush appears uncertain. After the war American housewives jumped at the chance to buy mechanical sweepers. Brushes and brooms made of plastic and nylon also flooded the market to win a measure of popularity. Broomcorn farmers noted uneasily the consumer trend, and many decided to take action.

By 1947 farmers across the broomcorn country—Oklahoma, Colorado, Texas, New Mexico, Kansas and Illinois—had switched in considerable numbers to wheat and other crops which, unlike broomcorn, benefited from the government price support program. Also, unlike broomcorn, wheat is reaped mechanically and poses few labor problems.

Side View Mirrors on Specs Is Latest of Inventions

Rear-vision mirrors are standard equipment on motor cars, but side-view mirrors on spectacles are a brand-new idea. One such device is about a quarter of an inch wide and three-quarters of an inch long, and is attached behind the right lens of the glasses, next to the nose.

It was prescribed by an eyesight specialist to correct a rare visual difficulty known as hemianopsia, which means inability to see over certain segments of the visual field. Hemianopsia is caused by a disorder of some of the optic nerve fibers connecting the eye and the brain. One or both eyes may be affected.

The side-view mirror was designed to pick up objects on the patient's blind side and reflect them to that part of the retina still able to see. In this way the visual image is detoured over the remaining good nerves from the eye to the brain, avoiding the fibers which have gone out of operation.

Dog Distemper

Distemper is one of the most common diseases among dogs. Most dogs are constantly exposed to the virus that causes distemper, and few escape having the disease to some degree. Distemper is highly contagious and often fatal. However, dogs can be protected against it by vaccination, and now an entirely new type of canine distemper vaccine is available to veterinarians. This product, a modified live virus vaccine which gives lasting immunity, is produced by Lederle Laboratories Division, American Cyanamid Company. The result of many years of intensive research, this new vaccine insures against distemper with only one injection. Previously, dog owners had to visit the veterinarian a number of times for a series of injections to acquire any kind of immunity against canine distemper. This new vaccine is a chick embryo-adapted strain of distemper virus passed through embryonated eggs. Because the virus is so weak in the modified form, the vaccine is entirely safe in that it will not produce distemper. At the same time it eliminates post-vaccinal accidents which often occur with the old-fashioned, virulent virus vaccines.

New 'Copter Invented

A spidery helicopter with 12 "legs" to "walk" through the sky has been invented by John Sidney Neale, Hendon, London, England. He has obtained U.S. patent No. 2,540,404 for his helicopter with four three-bladed rotors. A sketch in the February 6, Official Gazette, shows a passenger-carrying fuselage similar to the conventional transport plane. One rotor is fore and one aft on this fuselage. By an outrigger arrangement, there is attached a nacelle of similar but narrower design. The other two rotors are fore and aft on the nacelle. The power plant is in the nacelle. Manufacturing rights have been assigned to the Pennine Aircraft Limited.

Special Finish For Corn

The canned fruits and vegetables you eat today would not keep their right-from-the-garden appearance if it weren't for the interior can finishes especially designed for the purpose. The canning of corn presented an exceedingly tough problem to solve. At first, when corn was canned, black spots developed which canners called "corn black." Actually, it was sweet, delicious corn—picked and canned at the right time—but it didn't look right and people wouldn't buy it. So the canners developed a durable finish.

FRANCIS NEWS

HELPING HAND CLUB

Mrs. Scott Smithee entertained members of the Helping Hand Club at a regular meeting on Thursday, May 31, at her home. Mrs. Edwin Crass, vice president, conducted the business session. The meeting time was changed from 2:30 until 3:00 p. m. The next club meeting will be Thursday, June 14, at 3 o'clock at the home of Mrs. Frank Mercer.

Lavelle Caraway, of Amherst, is visiting this week in the Scott Smithee home.

S. H. Brown, of Indian Gap, Texas, spent the past week visiting his brother, U. D. Brown and family and other relatives here.

Mrs. Cecil Franks and daughter, of Amarillo, visited last week with her parents, Mr. and Mrs. John Lee Francis.

SAN JACINTO NEWS

Congratulations to Betty Culwell and Dan Preston, who graduated from Tulia high school May 28.

Rev. Jordan the new Methodist pastor moved to the parsonage the past week.

Mr. and Mrs. J. K. Milam visited his parents at Sudan over the week end.

Mr. and Mrs. Woodrow Bice and children attended the graduation exercises of the Amarillo High School May 29. Their nephew, Clois Wayne Kemper, was one of the 1951 graduates.

Rev. and Mrs. Ernest Leka and children have been visiting relatives at Waco and Tyler, Texas, the past two weeks. The children remained for the summer.

Friday night, June 8, is church social night at Vigo Park Community building. Cake and punch will be served.

PERSONALS

Mr. and Mrs. Joe H. Smith, Sr., visited Monday and Tuesday in Hereford with their son and family, Mr. and Mrs. Joe H. Smith Jr.

Mr. and Mrs. Joe H. Smith visited Mr. and Mrs. Curtis McGehee at Wayside Wednesday and attended Memorial services there.

Mrs. T. R. Whiteside spent the week end in Blackwell with her mother-in-law. She returned Monday.

Mrs. J. D. Hawkins, of Colorado City, visited her daughter, Mrs. A. J. Rowell who is ill. Ricki and Marsha Rowell returned home with their grandmother for a visit.
