THE FLAG OF THE UNITED STATES OF AMERICA ... HOW TO DISPLAY IT

Floyd County Wildcat Is Closed in Granite Formation at 10,384

The Houston Oil Company's No. 1 John S. Laekey wildcat in northwest Floyd County is to be plugged and abandoned. The test was drilled to a total depth of 10,384 feet in granite wash.

The test failed to show any sign of possible production in any zone it drilled through. It was started for a try in the Pennsylvania lime reef. It failed to find any appreciable reef build up. The exploration was much lower, geographically, than had been expected.

The test was in section 11, block D-2, GC&SF survey.

Clarendon Legion Post Sponsor Dances July 3 and 4th

In conjunction with the 75th Anniversary and Annual 4th of July Celebration that will be staged in Clarendon again this year, the Clark-Brock Post No. 126 of the American Legion is sponsoring a dance each night on the 3rd and 4th of July. The dances will be held in the newly purchased, remodeled, air-conditioned and centrally located Legion Hall formerly occupied by the Pastime Theatre. During the day-time hours, the hall will also act as the central meeting place for out of town visitors and old timers throughout the county. In addition, the Post is holding open house for all the member post in the 18th Congressional District on both days of the celebration and plan the formal opening and dedication on the morning of July 4th. All the members are justly proud of this new home and are anxious to show it off.

'The Painted Hills' Showing at Palace July 1 and 2

Lassie, favorite of millions, is back again in her greatest adventure, pulsing with drama and thrills, in a rugged, technicolor story of the great outdoors.

Prospector Paul Kelley hits a rich vein. Going back to town to tell his partner he learns the latter has died and that Bruce Cowling has bought in and is his new partner. Cowling, greedy for gold, hoves Kelly off a ledge to his death and buries the body. But Kelly's dog, Lassie, finds the grave and Cowling, afraid the animal will reveal the crime, poisons it. Lassie is saved by two Indian children and accompanies Gary Gray, son of Kelly's dead former partner, back to the mine. You will have to see this picture to learn how it ends.

Next weeks program appears on page two.

Mr. and Mrs. Bob Smith and Mrs. Ben Garvin will visit in Huffman with relatives during the holidays. Mr. and Mrs. Smith's Beauty Shop will be closed July 3, and 4, but will be open July 5. Mrs. Garvin will remain at Huffman for a longer visit.

Mrs. M. P. Stone, who has been visiting her daughter, Mr. and Mrs. Carl Culpepper, in Fort Worth for some time, returned home Tuesday night. She was accompanied by Mrs. Charlie Barrett.

Mrs. Grace Iron, of Amarillo, spent the week end in the home of her brother, Mr. and Mrs. Clyde Lightsey.

Farm Offices Moved This Week to New Location

The PMA and Soil Conservation Offices have been busy this week moving to their new location, which is in the building recently vacated by the Y. & M. Grocery.

Bride Elect Honored With Luncheon at Bundy Home

Jackie Wingo, bride-elect, of Fred Mercer, Silvertown, was honored with a luncheon and coffee last week. The wedding is scheduled to take place in June.

Mrs. Orville T. Bundy entertained with a luncheon at her home on Wednesday, June 20, 1951 at 1:00 p. m. honoring Jackie Wofford Wingo.

Yellow and blue pansies decorated the place-cards. Garden flowers centered each of the tables and coral gladioli was arranged on the desk beside the bride's book.

Following luncheon, Edna Ferber's "The Barn Cuts Off The View" reviewed by Mrs. Alvin Jackson was enjoyed by the honoree, Mesdames Gordon Montague, W. E. Schott, Jr., J. E. Minyard, James R. Clanshan, G. W. Lee, Jr., Conrad Alexander, Hank Brown, L. D. Griffin, Jr., Louie Kitchens, Albert Mallow, O. M. Dudley, Joe Foster of Lockney, Texas, Harold Ownby of Phoenix, Arizona, L. W. Kiker of Plainview, Texas, Lily Wofford and the hostess.

Coffee given at Schott home. Mrs. W. E. Schott, Jr., honored Jackie Wingo with a coffee on Friday, June 22, 1951 at 10:00 a. m.

The rooms and serving table was decorated with garden flowers.

Those who attended were the honoree, Mesdames James R. Clanshan, J. E. Minyard, Hank Brown, L. D. Griffin, Jr., Lily Wofford, Carl D. Bomar, J. W. Reid, Jr., Clarence Anderson, Harold Ownby of Phoenix, Arizona, Joe Foster of Lockney, M. A. Payne of Hale Center, and Paul Yannello of Detroit, Michigan.

Business Will Close For Fourth of July In Silvertown

The First State Bank and Post-office will be closed July 4, and several business firms expressed themselves in favor of closing up for the day. However, "We'll close if every one else will" did not give the News authority to say that the town would close.

On account of the farmers being busy it is thought that all elevators and machinery firms will be open to serve their customers.

Mr. and Mrs. Milton Clemmer and Mr. and Mrs. Jim Clemmer visited Sunday in Hart with their daughter and family.

Hugh Stodghill made a business trip to Amarillo Tuesday.

Mrs. Lilly Wofford, Mrs. Jackie Wingo and Ann Wingo spent the week end in Frederick, Oklahoma with relatives.

Elder and Mrs. E. E. Degge visited Tuesday night with their son in Plainview.

Mr. and Mrs. Earl Dillard and family, of Plainview, spent the week end with Mr. Dillard's niece, Mr. and Mrs. Joe Brooks and family.

Out-of-Town Relatives Here for Paul Reid Funeral

Among the out-of-town relatives here to attend the funeral of Paul Reid, Wednesday, June 20, were: Mr. and Mrs. Ted Reid, of Canyon, Texas; Mr. and Mrs. A. A. Jones, Mr. and Mrs. Boone McCracken, of Quitaque; Mr. and Mrs. George McCracken and family, of Allenreed, Texas; Mr. and Mrs. Coy Chappell, of Amarillo; Mr. and Mrs. Mack Gaston and children, Dallas; Mr. and Mrs. C. A. Johnson and children of Tulla.

Out-of-Town Friends:

Mr. and Mrs. Harley Workman, Mrs. J. N. Snodgrass, Lockney, Texas; Mr. and Mrs. R. L. McKinney and family, Mr. and Mrs. Bob Roberts and Muriel Diane, of Amarillo; Mr. and Mrs. Homer Vaughan and Dickie, Dyersburg, Tennessee; Mr. and Mrs. E. D. Cockham, Mr. and Mrs. L. L. Nelson, Carlton Gardner, Mr. and Mrs. L. H. Fowler, Mr. and Mrs. Ben Fowler, Mr. and Mrs. Jack Fowler, Mr. and Mrs. Cross McDaniel and Sue Ward, all of Tulla; Mr. and Mrs. Fred Fortenberry and Elmo, of South Plains; Jau-nita Dickerson, Lubbock; Mr. and Mrs. Tom McDaniel, Mrs. R. N. McDaniel and Mrs. Wilbur Wilson, Plainview; Billie McDaniel, Muleshoe; Warren Formby, Spur, Texas; Mr. and Mrs. Otis Wilson, Mrs. A. F. Van Meter, Quitaque; Mrs. Carter, of Gasoline.

Active Pallbearers Were:

Harley Workman, Alvie Mayfield, Homer Vaughan, Snooks Baird, Johnnie Lanham, Joe McWatters, Ashel McDaniel and Milton Dudley.

Honorary Pallbearers Were:

Fred Mercer, George Martin, Bob McDaniel, W. E. Schott, Alvin Redin, Roy Mayfield, R. L. McKinney, Elmer Lanham, Jr., and Glenn Morrison.

Silvertown Baseball Team Defeated Hart Team 13-2

In the Irrigation Belt Baseball game Sunday the Hart team played Silvertown here. Silvertown defeated Hart 13-2. This leaves Silvertown five wins and three losses.

They will play Nazareth Sunday, July 1, at Nazareth.

Gandson of Mr. and Mrs. A. P. Dickenson Top Student

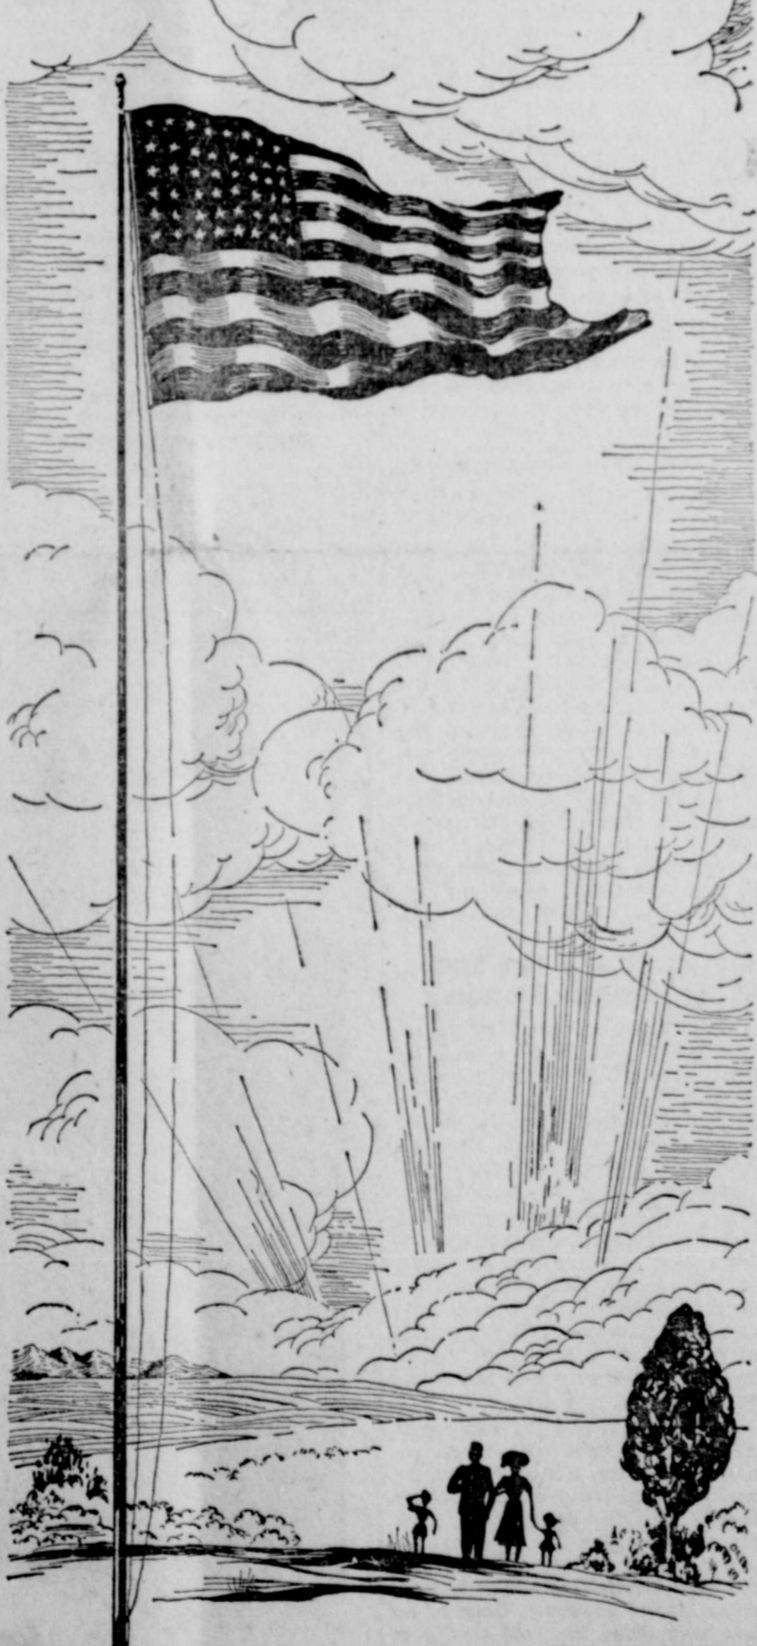

Don Dickenson, son of Mr. and Mrs. Albert Dickenson, of Blue Springs, Missouri, and grandson of Mr. and Mrs. A. P. Dickenson, of Silvertown, is at Kemper Military, Boonville, this week attending the Missouri Boys State.

Don, 17 year old junior in Blue Springs high school was selected by the teachers as the most outstanding student and sponsored by the American Legion Post Blue Springs, Missouri.

Mrs. Gladys Wise, Mr. and Mrs. Sid Bogan, Miss Mary Ollie Person, were guests in the home of their sister, Mr. and Mrs. W. E. Schott Sunday.

Mr. and Mrs. Pete Yates and daughters, of Houston, visited Tuesday night with Mr. and Mrs. T. J. Hodges, Mrs. Yates' grandparents. They were enroute to Colorado Springs, Colorado on a vacation trip.

Sheriff Raymond Grewe made a business trip Monday to east Texas.

The work that we do is the making of the flag.
I am not the flag; not at all. I am but its shadow.
I am what you make me; nothing more.
I swing before your eyes as a bright gleam of color, a symbol of yourself, the pictured suggestion of that big thing which makes this nation. My stars and my stripes are your dream and your labors. They are bright with cheer, brilliant with courage, firm with faith, because you have made them so out of your hearts; for you are the makers of the flag, and it is well that you glory in the making.
—FRANKLIN K. LANE

Methodist Daily Bible School Starts July 2

Rev. H. M. Secord, pastor of the Silvertown Methodist Church announced that the Methodist Daily Vacation Bible School will start with registration Saturday, June 30, from 3:30 to 5:30 p. m. at the church.

The school will consist of bible study, games, worship and music. All children of age from four to fifteen years are invited to attend this school, Rev. Secord stated.

The school will consist of bible study, games, worship and music. All children of age from four to fifteen years are invited to attend this school, Rev. Secord stated.

FARM PROGRAM From the County PMA Committee

As a further step in consolidating the soil and water conservation efforts of the U. S. Department of Agriculture, Spencer Long, chairman of the Briscoe County PMA Committee, say that arrangements have been made for the Soil Conservation Service to be responsible for the technical phases of the permanent type practices of the Agricultural Conservation Program.

This would be for such practices as terracing, constructing dams, laying out contour strips, reorganizing the farm irrigation system and a number of similar practices.

The technical services needed will be provided either by SCS personnel or qualified persons under their direction. Mr. Long says. He urges farmers of Briscoe County who are cooperating in the ACP and who intend to carry out soil and water conservation practices requiring technical assistance to make arrangements for such assistance early to avoid delay and to give the county PMA Committee an opportunity to make the best use of this technical service.

Mr. Long says the SCS responsibility includes checking on the need for the practices, location, layout, any necessary supervision in construction and determining if the practices have been carried out in accordance with requirements to qualify for assistance under the ACP. In Briscoe County, Carl Dwyer of the Soil Conservation Service will be in charge of this phase of the soil and water conservation work of ACP, he said.

Arrangements for this service, however, should be made with the County PMA Committee, he explained.

Mr. Long looks upon this consolidation of effort in conservation as a forward step in building better farms in Briscoe County.

Mr. and Mrs. Paul Yannello and children, Louis and Meg, of Detroit, Michigan, and Mrs. Murray Payne, of Hale Center, visited last Friday in the home of Mr. and Mrs. Clarence Anderson. Mrs. Yannello will be remembered here as the former Miss Geraldine Biffle.

Mr. and Mrs. O. B. Cox, of Houston, Texas, are visiting with Mr. and Mrs. C. A. Grewe. They will also visit Mrs. Cox's brother, E. H. Dietrich, who is a patient in a Plainview hospital while here. Mrs. Cox is a sister of Mrs. Grewe.

Mr. and Mrs. G. R. Dowdy had as their week end guests their friends, Mr. and Mrs. Jim Martin, of Odessa.

Funeral Services For P. A. Jones Held at Lometa June 19

P. A. Jones passed away in a Haskell County hospital on Sunday, June 17 at 11:15 a. m.

Funeral services were conducted at the Methodist Church in Lometa on June 19 at 10:30 a. m. by the Rev. O. F. Kattner, pastor of the Lometa Methodist Church.

Mr. Jones was born on May 17, 1874 and had lived in Lampasas County for the past 30 years. He had been in the grocery business until the past few years. His wife the former Minnie Culpepper, predeceased him in death in 1948.

He is survived by three daughters: Mrs. Dewey Brooks, of Austin, Mrs. Garrett Cossings of Coppas Cove, and Mrs. H. H. Lacy of Kilgore; four sons: Ernest of South Dakota, Alton and Leona of Leonard of Rochester and Lee of Lampasas, and 15 grand children. Pallbearers were Gordon Smith, Otis Brooks, Lee Roy Whitehead, Howard Pearce, N. E. Clark and Mart Adams.

Burial was in the Lometa Cemetery with Briggs-Gamble Funeral home in charge.

Mr. Jones was a former resident of Silvertown and Briscoe County, having lived here a number of years ago, and will be remembered by all old timers. He was in the ranching and stock farming business when he lived here.

Warner Reid Children Winners at Rodeo in Hallettsville

Mr. and Mrs. Warner Reid and children, Mike, Sue and Tuffy, and Pearl Thompson of Stinnett, have just returned from a trip to Hallettsville, Texas, where Mike, Sue and Tuffy were contestants in the State High School Championship Rodeo. Mike and Sue entered the barrel racing with 26 other girls from all parts of Texas. Sue placed fifth. Mike made the best total time and was awarded a sterling silver belt buckle with "Texas High School Champion" engraved on it.

Tuffy made the best time in the senior contest. His prize being a \$200.00 scholarship to any college, and a double Navajo blanket for second best in calf tie down.

The first four winners in each event has the privilege of attending the National Show for school children which will be held in Sulphur, Louisiana.

VISITORS IN FRANK FISCH HOME

Visitors in the home of Mr. and Mrs. Frank Fisch, of the Frances Community last week were: a brother and wife, Mr. and Mrs. Bill Fisch, of Keswick, Iowa, and a sister and husband, Mr. and Willis Cheney, of Deep River Iowa. These same two couples visited here thirteen years ago.

On Friday the group and Mr. H. T. Myers and daughters and Mr. and Mrs. Berle Fisch and girls, spent the day with Mr. and Mrs. Bood Myers and children. Sunday was spent with Mr. and Mrs. Berle Fisch, including Mr. and Mrs. J. N. Haun, of Plainview, Texas. On Monday the folks all enjoyed the day with Mr. and H. T. Myers and girls.

Mr. and Mrs. Willie Amil Smith and baby have moved to Memphis, Texas, to make their home, and Mr. Smith will continue to be employed with Borden Milk Company.

COTTON SPRAYING RECOMMENDED TO CONTROL INSECTS

Good control of cotton insects has been obtained experimentally with nozzles that delivered quantities of spray ranging from 1.8 to 12.5 gallons per acre. The important thing is to apply the proper amount of insecticide, says Texas A. and M. entomologists.

For farmers who have trouble figuring the amount of poison they are applying per acre, Extension entomologist A. C. Gunter has a simple solution. He suggests filling the tank with water and spraying an acre of ground. Then, the gallons of water used can be determined, and the amount of insecticide needed in the tank can be figured.

For example, a farmer with a 50 gallon tank might want to apply one pound of poison per acre. If five gallons of water were required to fill the tank after one acre had been sprayed, he would need 10 pounds of poison in the 50 gallons of spray solution.

Under experimental conditions dusts and sprays have given equally good insect control. But because of weather conditions common to Texas, applying insecticides by spraying is preferred by many farmers. A. and M. entomologists believe the hollow cone type nozzles give better coverage than the fan type nozzles. An ideal spray pressure is about 60 pounds.

One nozzle per row gives satisfactory control of cotton plants that are not more than 10 inches high. For plants between 10 and 22 inches high, two nozzles per row are needed. Three nozzles per row are recommended for plants over 22 inches high—with one on each side and the third directly above

the row. Gunter says it is usually better to have the spraying equipment mounted on the rear of the tractor. This keeps the insecticide from collecting on the tractor and getting on the operator.

Texas A and M agricultural engineers have developed plans for a new home made row crop sprayer. The design for rear mounting, which will permit cultivation along with the spraying operation. Plans for constructing this sprayer may be obtained by requesting Plan No. 379 from county Extension agents.

Gunter suggests that cotton growers ask their county agents for copies of the 1951 Guide for Controlling Cotton Insects.

FROM A READER'S SCRAP BOOK:

Three monkeys sat in a coconut tree discussing things as they're said to be. Said one to the others, "Now listen, you two, there's a certain rumor, that can't be true—that man descended from our noble race. No monkey ever deserted his wife, starved her babies and ruined her life. And you have never known a mother monk to leave her babies for others to bunk; or to pass them on from one to another till they scarcely know who is their mother. And another thing you'll never see, a monk build a fence around a coconut tree, and let the coconuts go to waste, forbidding all others to have a taste. Why if I were to put a fence around a tree, starvation would force you to steal from me. Here's another thing a monk won't do—go out at night and get on a stew, or use a gun, a club or knife, to take some other monkey's life. Yes, man descended, the ornery cuss; but brother, he didn't descend from us."

Spending Habits In Marked Shift From Pre-Korea

WASHINGTON—The American consumer's "appetite" for various goods and services appears to have experienced a striking shift since the war as compared with prewar years, according to a study of personal consumption expenditures by the U.S. Department of Commerce.

In general, there has been a greater concentration of the consumer spending dollar on durable goods and on food at the expense of some of the nondurable goods and the service sectors of the economy. This trend was evident well before the Korean impact on the economy, even though in some areas intensified by that development.

True, all classifications of goods and services have experienced a marked increase in dollar sales in the last decade, accompanying the rise in total personal consumption expenditures from \$72.1 billion in 1940 to an annual rate of \$195.8 billion in the fourth quarter of 1950, a 172 per cent increase. However, durable goods and the food classification have shown a substantially greater percentage gain than this, while the other classifications have lagged.

Boom in Durable Goods

The greater-than-normal concentration on durable goods purchases, led by automobiles, was particularly pronounced in the last half of 1950. As a result, purchases of automobiles and parts in the fourth quarter of 1950 were at an annual rate of nearly \$13 billion, or almost five times the \$2.7 billion of such expenditures in 1940, and at the same time were equivalent to 6.5 per cent of all personal consumption expenditures in that period compared with 3.7 per cent in 1940.

The second biggest percentage gain was shown by furniture and household equipment where consumer expenditures rose from \$3.8 billion in 1940 to an annual rate of \$13.1 billion in the fourth quarter of 1950, a rise of 245 per cent. The entire durable goods classification hit an annual spending rate of \$30.0 billion in the fourth quarter of 1950, nearly four times the \$7.9 billion total of 1940, with its proportion of total personal consumption expenditures rising from 11 per cent to 15.3 per cent in the period.

Food Expenditures Rise

Food expenditures have risen to a level considerably above their prewar relationship to income.

Total expenditures for food and alcoholic beverages, which are classified together in the Department of Commerce analysis, rose from \$20.7 billion in 1940 to an annual rate of \$62.1 billion in the fourth quarter of last year, an increase of exactly 200 per cent. The rest of the nondurable goods section showed an expenditure increase from \$16.9 billion to \$42.2 billion in this period, a rise of 150 per cent. For services, total expenditures increased from \$26.6 billion to \$61.5 billion for the period, a rise of about 130 per cent.

Hoppy's Sidekick Now Star Of Big Television Program

NEW YORK, N.Y.—Gabby Hayes, the familiar sidekick to such famous stars of the west as Hopalong Cassidy, Gene Autry and Roy Rogers for many years, has finally branched out on his own, and bids fair to rival them all for popularity.

Gabby, cast in the role of the comic companion for the dashing Westerners, has deserted Hollywood for a show of his own on television. On his popular NBC video offering Sunday afternoon the bearded old character tells stories to two youngsters and also introduces stories in American history that are dramatized by live actors.

Although his business address is different, Gabby's appearance remains the same. He still wears the heavy collection of facial sage brush familiar to kids everywhere. During performances, he takes out his upper bridge to stay in part with his characterization, which has become almost authentic. Only 66, he has been doing the "old coot" act in show business since 1910.

A reported salary of \$125,000 lured Gabby away from the wild west.

Pianist Finds Arrangements Fine—But Something Wrong

NEW YORK—Pianist Alexander Brailowsky was once scheduled to play a concert in a small South American city, where no other concert artist had ever appeared. The virtuoso was fearful, lest the auditorium manager, certainly of no experience, would bungle the arrangements. However, the moment he stepped on the stage, his fears left him. The hall was packed.

The audience greeted him wildly and he was forced to take one bow after another. Finally the din ceased and he turned to take his seat at the piano. With lifted costails, he stopped aghast at the discovery that there was no piano on stage!

Frantic efforts were made to locate that one item forgotten by the auditorium manager, but none was found and the concert was called off.

NOTICE OF COUNTY'S INTENTION TO RECEIVE BIDS FOR THE PURCHASE OF CERTAIN ROAD MACHINERY

Notice is hereby given that SEALED BIDS, addressed to the County Judge of Briscoe County, at Silvertown, Texas, will be received by the Commissioners' Court of Briscoe County, Texas, at the office of the County Judge until 10:00 o'clock A. M. on the 9th day of July, A. D. 1951, for the purchase of the following described road machinery for the maintenance and improvement of the roads in and for said county, to-wit: One Diesel Crawler Tractor of approximately 90 horse power; 74" Tread and with 20" Track Shoes; Equipped with electric starter and other standard attachments; Such tractor to be equipped with cable operated Bulldozer and with double drum rear mounted cable control unit; And one used, four wheel cable operated Scraper of approximately 8½ cu. yd. struck capacity. All to be delivered immediately to Silvertown, Texas.

It is the intention of said Commissioners' Court to issue warrants in an amount not to exceed \$10,500.00, bearing interest at the rate of not exceeding four and one-half per cent per annum, in payment of such machinery, over and above the cash payment.

Such SEALED BIDS will at said time be publicly opened and read before the Commissioners' Court of said County.

The Commissioners' Court of Briscoe County reserves the right to reject any and all bids.

This notice is given in strict compliance with the provisions of Chapter 163, Acts 1931, Regular Session of the 42nd Legislature of Texas, and all amendments thereto, and pursuant to an order of the Commissioners' Court of Briscoe County, Texas.

J. W. LYON, JR.,
County Judge, Briscoe County, Texas. 24-2tc

"I got the story on
50,000 Miles-No Wear
and changed to New Conoco Super Motor Oil"

says W. R. Abel
Traveling Salesman
El Paso, Texas

"I travel 40,000 miles a year," says Mr. Abel. "Since I've changed to new Conoco Super I never have to add a quart between drains, and I've had no engine trouble."

SHOP FOREMAN

"I have 50,000 miles on my Chevrolet, using Conoco Super," says Nick Motzner, Shop Foreman, Twin Falls, Idaho. "The motor has never been torn down, oil consumption is at a minimum, and gasoline mileage averaged 23 miles to the gallon."

TAXI OPERATOR

"I've had a decided decrease in maintenance costs and gasoline consumption since changing to Conoco Super," reports Goddard Langlais, Taxi Fleet Operator, Lafayette, La. "I only wish all my cabs had been broken in with Conoco Super."

"50,000 Miles-No Wear!" Proved Here:

After a punishing 50,000-mile road test, with proper drains and regular care, engines lubricated with new Conoco Super Motor Oil showed no wear of any consequence; in fact, an average of less than one one-thousandth inch on cylinders and crankshafts. AND gasoline mileage for the last 5,000 miles was actually 99.77% as good as for the first 5,000!

Unsulphured Molasses Gingerbread Key

Just as you use a specific type of flour for rolls and cake, or a definite shortening, you use unsulphured molasses rather than other types for a gingerbread with sweetness and delicate aromatic flavor. This unsulphured molasses has the sweetness of sugar because it is the concentrated juice of sugar cane, aged and blended. But it is more than a natural sweetener; it has distinction of flavor and on that flavor the popularity of gingerbread is based. Gingerbread muffins are an excellent hot bread with the main course. In cup cake style, gingerbread comes in for dessert honors. To dress them up cut a cone out of the top of the cakes and fill the cavity with whipped cream and fit the "top hat" back in place. Baked in layer style, gingerbread dessert squares may be garnished with spiced canned applesauce or a chocolate or lemon sauce. The following recipe makes enough for the cup cakes and muffins or one layer square.

Grandma's Homemade Gingerbread

2 1/2 cups sifted all-purpose flour	1/2 cup shortening
1 teaspoon salt	1/2 cup sugar
1 teaspoon double-acting baking powder	3/4 teaspoon soda
1 teaspoon ginger	1 cup unsulphured molasses
2 teaspoons cinnamon	2 eggs
3/4 teaspoon cloves	1 cup hot water

Sift together flour, salt, baking powder, ginger, cinnamon and cloves. Cream shortening, sugar and soda. Add unsulphured molasses. Stir in 1/2 cup flour mixture. Beat in eggs. Add hot water alternately with remaining flour mixture. Beat 1/2 minute. Turn into 12 well greased 2 1/4-inch muffin pans and 12 2 1/4-inch muffin pans. Bake in a moderate oven (350°F.) 20 minutes. For gingerbread layer, turn batter into a well greased, lightly floured 9 x 9 x 2-inch pan. Bake in a moderate oven (350°F.) 45 minutes.

Higher Education Doesn't Help Gal's Matrimonial Chance

NEW YORK, N. Y.—Higher education seemingly hinders rather than helps the American girl's chances for romance that leads to matrimony.

Among women at ages 35 to 44 with less than seven years of schooling, almost 95 per cent have been married at one time or other, according to Metropolitan Life Insurance Company statisticians, whereas among those with more schooling the proportion married declines to 90 per cent for high school graduates, and to 83 per cent for those with at least one year of college.

Girls with higher education who do marry, the statisticians observe, acquire husbands with more schooling.

Encouraging to marriage-minded girls is the finding that prospects for an early marriage, traditionally excellent for the average American girl, have become even brighter in recent years. The total number of married women in the United States has increased by some 8,000,000 since 1940, now standing at about 38,000,000.

"The present total reflects the marriage boom of the war and immediate postwar years," the statisticians point out, "and is a record high, not only in absolute numbers but percentage-wise to the adult population as well."

The statisticians also show that: American wives are relatively young—two fifths under 35 years of age, and only one sixth over 55.

In three fourths of all families the wife is somewhat younger than her husband. In only one family in eight is she older than her spouse, and then generally by a small margin. In the remaining eighth of the families, husband and wife are the same age.

About two out of every three American women were employed at some time before they were married, and many continue to work after marriage until the first baby comes. Almost one half of all wives are employed through the first year of marriage, as against less than one in five at the time of the fifth wedding anniversary.

Currently, the odds are two to one that the wife will outlive her husband!

Russians Have Developed New Crossword Stickler

MOSCOW—Crossword puzzle fans have long been familiar with a three-letter word defined as a Central Asiatic animal—the Yak. Now the Soviet press has come up with a new puzzler.

A special dispatch from Ulan Ude, capital of the Buryat Mongolian Republic, says that a new, valuable type of agricultural animal has been produced by cross breeding the Tibetan yak and domesticated cattle. The new animal—crossword material, for sure—is called a hainyk, which roughly could be translated as "sturdy."

Ah, Texas, Even the Birds Are Better Than Average!

LOS ANGELES—Zoologists at the University of California at Los Angeles have disclosed that the Texas nighthawk has been fitted by nature with a built-in cooling system in its mouth. The inborn icebox allows the bird to sit on its nies in 110-degree temperatures, they say.

According to the scientists, the natural refrigerator works like this: When temperatures rise, the bird opens its mouth; unique throat muscles fan air over large veins; moisture from oral surfaces is evaporated, cooling the hawk's blood supply.

Dr. Raymond B. Cowles said that nature apparently worked out this system. The night-flying bird, which has no sweat glands, must sit on eggs under a broiling sun. They cover their eggs during the day, he explained, not to keep them warm, but to keep them from being parboiled.

Evon Animal Life Hard Hit By the Housing Shortage

CHICAGO—With the housing shortage, what more could one expect?

George E. Green built a two-flat bird house three years ago and put it up in a mulberry tree in his back yard.

He was not too surprised when a family of squirrels took up residence in the first-floor flat this year. After all, there is a shortage of hollow trees in the neighborhood.

He was startled, however, when two blackbirds inspected the second-floor flat, found it to their liking, and moved right in. So far, all is harmony.

Village of 40 Persons Likes Police Chief Very Much

MANTOLOKING, N.J.—This seashore resort village of 40 persons was apparently very grateful for Police Chief J. Harrison Herbert's long service record. They gave him a gift of \$1,400 and 25 silver dollars when he celebrated his 25th police anniversary. His wife received a watch and an elaborate floral bouquet.

A lot of money for so few people to give? Sure, but it works this way. Mantoloking jumps to a summer population of 1,500 and the summer residents helped out, too.

PERSONALS

Don Thompson, of San Angelo, came Friday night to visit in the home of Mr. and Mrs. R. E. Brookshier. He returned home Sunday afternoon.

Mr. and Mrs. Silas Ellis and children, Billy, Bobby and Grady, and Joe Blackwell, all of Amarillo, visited Sunday with Mr. and Mrs. Edd Thomas.

Mrs. Cyrus Puckett, of Amarillo, visited last week with her parents, Mr. and Mrs. Lee Johnson and her sister, Mrs. Dee Reid, of Grants Pass, Oregon, and Mr. and Mrs. Ernest Dickerson and son.

Mrs. Durward Brown, of Plainview, came for her little son, Joe Lewis, who visited several days in the home of his grandparents, Mr. and Mrs. H. Roy Brown.

Mr. and Mrs. Brubs Bomar and family, of Amarillo, spent the week end with relatives in Silvertown.

South Side Square Mrs. Mollie A. Morton, Owner

June with its bounty of dairy products suggests cottage cheese as a nutritious and smooth addition to double-decker gelatine salads. A tomato aspic layer contrasts appetizingly in color and flavor. The unflavored gelatine used to firm both halves of these individual, main dish salads is responsible for the perfection of the blend. With open-faced deviled ham sandwiches, potato chips and radish roses a party plate is ready for luncheon club or graduation class gatherings.

Tomato Cottage Cheese Party Molds

Cottage Cheese Layer:

1 envelope unflavored gelatine	1/2 teaspoon salt
3/4 cup cold milk	2 teaspoons grated onion
3/4 cup very hot milk	1 cup finely diced celery
2 cups cream-style cottage cheese (1 pound)	1/2 cup finely diced green pepper

Soften gelatine in cold milk. Add hot milk and stir until gelatine is dissolved. Blend in cottage cheese; add salt, onion, celery and green pepper. Divide mixture between 12 individual molds and chill until almost firm.

Tomato Aspic Layer:

2 envelopes unflavored gelatine	1/2 teaspoon salt
1 cup cold tomato juice	3/4 teaspoon pepper
2 1/2 cups hot tomato juice	2 tablespoons lemon juice

Soften gelatine in cold tomato juice. Add hot tomato juice; stir until gelatine is dissolved. Stir in salt, pepper and lemon juice. Chill until consistency of unbeaten egg white. Turn on top of cottage cheese layer in individual molds and chill until firm. Unmold on salad greens. YIELD: 12 servings.

Summer in Korea Signals Coming Monsoon Season

Summer, the season of barefoot boys and fishing poles, is winging in, and almost everywhere it is welcome. In Korea, however, the warm season has an ominous note. Approaching Korea summer walks with a sound that armies loathe—squish, squish atop—the sound of clinging, gooey mud. The monsoon season is on the way.

High over the war-devastated peninsula, a giant weather-wheel is swinging. As winds reverse their direction, the warm hand of the Asiatic monsoons breaks the grip of winter.

Mud to suck at combat boots and swamp heavy trucks and guns in gooey mire; fog and solid overcast to ground United Nations planes; torrential rains turning paddy fields and mountain roads into lakes and rushing streams—for ground soldier and airman alike, the dreariest weather of the year is close at hand.

April Battle

April and May are months of transition between dry cold and wet heat. As the pressure patterns shift, a battle is joined above the land. All winter great masses of cold Siberian air have reached south from the steppes of Asia. The ground has been frozen, the skies clear and dry. Now moist air from the southern seas begins to move northward. Over Korea's mountainous spine, the fronts meet.

Whirling cyclonic storms roar down from Manchuria and east from central China. Fog rolls in from the Sea of Japan. It snows one day, rains the next, then snows again. In the air, icing conditions sink to levels below the mountain peaks, the cloud ceilings stay even lower.

Korea's summer monsoons will last through September. The southerly winds normally bring about ten times as much rain in July as in January, wettest and driest months of the year respectively. Rain falls on more than half the days of an average July. The rains are heavy and sometimes last for days at a time. Clouds blanket the drenched landscape 17 to 20 days out of the summer months; only two to three days are completely clear.

Summer Typhoons

In early June begins the critical season for great tropical typhoons. From the region of the Marianas Islands far out in the Pacific, these storms sweep west-northwest into the China Sea, then sometimes curve northeast to cut across Korea. On an average of every few years, such a storm reaches disaster proportions. The normal year brings Korea one or two tropical storms of typhoon intensity.

Between the monsoon rains, thunderstorms raised by boiling convection currents, and typhoons, heat and humidity settle like a moist quilt over the soggy hills and coasts. In August at Inchon on mid-Korea's Yellow Sea shore, the average humidity is 94 per cent. In the central mountains it may be slightly less—when it isn't raining.

Scientist Suggests Agency To Control 'Rainmaking'

WASHINGTON, D.C. — Vannevar Bush, wartime research chief and now president of the Carnegie Institution, said recently he believed it is possible to make rain "under certain conditions" and proposed creation of a special agency to control the "new art."

"Man has begun for the first time to effect the weather," Bush told a special senate subcommittee. "No man can tell where it may end. Before the decade has passed we may be affecting the environment in which we live in a most extraordinary manner."

The group is considering a number of weather-control bills.

Farm Woman Gaining Poetic Fame Never Took Lessons

CLARION, Iowa — Mrs. Berton Ross, who lives on a farm a mile south of Clarion, is gaining quite a reputation as a poet, although she "never took training" and knows nothing about "poetic feet or meter."

Her friends have known of her talent for some time, but only recently has her fame extended the boundaries of Wright county.

She recently received the prize of the week from Chicago Daily Drivers Journal on "Pa's News Time." Two other of her compositions appear in Kitchen Klatter, a Shenandoah radio station publication.

The versatile and prolific poetess also contributes to the United Presbyterian, and her poems are often read over radio station WHO, Des Moines, and station KVFD, Ft. Dodge. The Iowa Brochure of Poems also contains some of her work.

Mrs. Ross began composing about 12 years ago. Until that time she had no idea that she possessed any special gifts. Now she is often called upon to write special poems for weddings, anniversaries and such, and often appears before clubs and groups.

The poems come easy to her. "When I'm busy around the house," she says, "they keep buzzing around in my head."

Small Utility Room Creates Definite Storage Problems

Most utility rooms are too small. A utility room should be at least 100 square feet of space in order to accommodate the necessary equipment and to provide enough space for working.

Many utility rooms are used for the storage of screens and storm-windows, children's playthings, garden tools and other articles as well as housing the house heating boiler, water heater, and laundry equipment.

Owners invariably find that the demands for storage space increase with the number of years that a house has been occupied. A small crowded utility room is a serious disadvantage.

Utility rooms that are too small also create a problem in connection with laundry equipment. Despite the advent of automatic washers, laundry trays still have many uses. If the utility room is too small, there is usually not enough room for a two-compartment laundry tray.

A two-compartment laundry tray is a great convenience because one compartment is available for rinsing or for bluing clothes while the other compartment can be used at the same time for soaking clothes or handling them in some other manner.

Texas City Explosive Gains Favor as Able Fertilizer

Ammonium nitrate, the Dr. Jekyll-Mr. Hyde compound which figured in the disastrous Texas City explosion a few years ago, is rapidly gaining favor as a fertilizer and may become the preferred material for direct application to the soil. Dr. R. C. Tallman of the Lion Oil Company, El Dorado, Ark., told the American Chemical Society. The compound is employed in both explosives and fertilizers.

Although its plant-food properties had long been known, ammonium nitrate had been used before 1943 only in solutions for the preparation of mixed fertilizers, according to Dr. Tallman, who is manager of planning and survey in Lion's research division. Some ammonium nitrate was released from government plants for fertilizer use in 1943, however, and since then the compound has enjoyed a meteoric rise to prominence as a fertilizer material, he said.

"Due to its comparatively high nitrogen content, its wide adaptability to soil and climatic conditions, its comparative resistance to leaching and, probably of greatest importance, its low cost per unit of nitrogen," Dr. Tallman stated, "there are those who feel that ammonium nitrate will eventually be the nearly universal fertilizer for direct application."

Heart Condition Cure

A serious heart condition, caused by tuberculous inflammation of the membrane which surrounds the heart, is being cured by two San Francisco doctors through surgical removal of the diseased membrane. Pericardiectomy—as the removal of this membrane is called—was performed on four patients suffering from the tuberculous pericarditis. The doctors report three of the patients are cured and the fourth shows progressive improvement. The Journal of the American Medical Association carries this report by Drs. Emile Holman and Forrest Willett of the Stanford University School of Medicine and the San Francisco Veterans Administration Hospital. The mortality rate from tuberculous pericarditis has been high, the doctors said. Tuberculosis germs attacking the membrane around the heart cause it to become thickened and inflamed, putting pressure on the heart. Patients become increasingly disabled by cardiac compression. In the past, patients have been treated by prolonged bed rest.

Consumer Economy

Thanks to one of the greatest production records in the nation's history, the consumer sector of the economy is currently better prepared than at any time within the past decade to meet the austerity demands of the rearmament program, according to the U.S. Department of Commerce. As illustrations, the Commerce Department gave the following selected production achievements between 1946 and 1950: close to 5 million new non-farm dwelling units; almost 21 million new passenger automobiles; 21 million electric refrigerators; 75 million radio sets; 12 million television sets; over 17 million washing machines; and 18 million electric and gas ranges. As a result, per family holdings of major durable goods are currently at a record high, it is estimated.

The Wet Spot

The apparent wet spot on highways is a form of mirage, like those that appear in desert regions. The road, especially if dark in color, absorbs energy from the Sun's rays and becomes quite hot, so there is a layer of heated air just above. Rays of light from the sky, coming at a low angle and which would normally be absorbed by the dark surface of the road, are bent upwards by this heated air layer, and they reach your eyes. This is similar to the familiar effect of light being reflected from a wet spot on the road, and that is the interpretation we give at first to what we see.

JULY 1

Silverton at Nazareth
Umbarger at Vigo
Tulia at Hart

PERSONALS

Mr. and Mrs. Hubert Brooks and Mrs. Manley Wood took Mr. Wood to Plainview for a check-up Friday at the hospital. He is doing fine.

Mrs. Robert London made a business trip to Plainview and Canyon Friday.

Mrs. Charles Lindsey and girls left Friday for their home in Abilene, after spending a week with her parents, Rev. and Mrs. G. A. Elrod.

Mr. and Mrs. A. D. Arnold and son, Gean, Carroll Garrison and Jerry, are visiting their son, Gerald Arnold and family in Yuma, Arizona this week.

Rev. Calcoat, of Tulia, and Tom Olive, of Plainview, were week end guests in the home of Mrs. G. T. Olive. While here they did carpenter work for Mrs. Olive.

Mr. and Mrs. Roy Morris and Miss Mary Jo Thompson accompanied Cpl. Alvie Morris and Cpl. Fritz Tuber to their base at Fort Hood, Texas Sunday.

Eddie and Miss Eunice Cox visited in Plainview with relatives and friends.

Miss Roberta Campbell and mother, Mrs. R. L. Campbell, of Hereford, were guests of Mrs. T. L. Anderson and Miss Anna Lee Anderson Wednesday and Wednesday night.

Mrs. Henry Price made a business trip to Tulia Saturday morning.

Mrs. Lilly Wofford spent the week end in Frederick, Oklahoma, visiting Mrs. Lela Kellum and Mrs. Wimberly.

Harold Ownby came Saturday for his wife and children who have been visiting Mrs. Ownby's parents, Mr. and Mrs. Clyde Wright. They left Monday for Dallas and Winthrop, Iowa.

Mr. and Mrs. Clyde Wright were business visitors in Tulia Monday afternoon.

Judge C. D. Wright attended the District Bar Association meeting at Spur recently.

Mr. and Mrs. M. G. Moreland visited in Tulia Sunday afternoon. Mr. and Mrs. J. W. Lyon, Sr., of Quitaque, visited in the home of their son Sunday, Mr. and Mrs. J. W. Lyon, Jr.

Mr. and Mrs. W. G. Byrd left Sunday morning for Bronte and Robert Lee, Texas, where they will visit their daughter.

Mrs. J. W. Lyon, Jr., left Tuesday for Lebanon, Tennessee, where she will visit her parents. Stanley Price, of Lubbock, spent the week end with his parents, Mr. and Mrs. Henry Price. Mrs. Price took him to Lubbock Monday morning, and Mr. and Mrs. Jimmy Price returned with Mrs. Price to drive the car.

Mr. and Mrs. J. W. McCracken were business visitors in Tulia and Plainview Tuesday.

Mr. and Mrs. Ed Edwards spent several days this week in Dallas on business.

Mr. and Mrs. Chester Strickland and daughter, of Denton, are here this week visiting relatives, and Mr. Strickland is attending to farm interest.

Mrs. W. A. Rowell, Miss Virginia May and Mrs. Elmer May, were visitors in Lubbock last Thursday.

Joan Loomer, of Fort Worth, who has been visiting in the home of Mr. and Mrs. Henry Price returned to her home last Sunday.

Results in Controlling Moss Growth in Fish Ponds Good

Good results in controlling moss growth in fish ponds are reported each year by J. W. Stufflebeme, Washington county agricultural agent.

Recently, Stufflebeme reported that top moss in the Matchett Lake, a privately owned pond eight miles from Brenham, was killed within 48 hours after the water was treated with sodium arsenite.

However, Stufflebeme said it took longer than the usual three weeks for the underwater growth to disappear. He attributed this to the dry, cool weather that prevailed after the lake was treated.

A lake or pond should be measured very carefully and the amount of water figured before sodium arsenite is used, warns R. E. Callender, wildlife conservation specialist for the Texas Extension Service. If the application is too strong, it will kill the fish as well as the moss.

Callender recommends that anyone who has a moss infested lake contact their county agricultural agent before starting a control program.

AGRICULTURAL FILLERS

The planting of supplemental forage crops is insurance against a shortage of summer grazing and forage for winter feeding.

Many Texas cotton farmers favor the use of sprays for controlling insects. The reason—sprays can be used with good results even on dry, rather windy days. Recent experiments have shown that very little water is needed as an insecticide carrier.

Fireproof housekeeping should be practiced by every homemaker. It just means doing the job neatly and thoroughly.

The recreation program conducted by the Texas Agricultural Extension Service provides a training ground for the development of talent, social poise and self confidence of youthful rural leaders.

Foreign students from some 20 different countries will participate in the activities planned for the 1951 Texas 4-H Club Roundup.

The annual Texas 4-H Roundup and Extension Conference will be held on the campus of Texas A. and M. College during the week of June 24-29.

At least one and preferably two tons of good hay should be put up during the haying season for each cow in the dairy herd.

CARD OF THANKS

We take this means of thanking each of you who helped us kindly and unselfishly during the illness and death of our little son and nephew. We especially want to express our appreciation to Drs. Shy and Youngs and each nurse on the hospital staff and Mr. Seaney, Mr. Steele and Mr. Douglas.

Mr. and Mrs. G. C. Hagger and family; Mr. and Mrs. O. M. Thornton and family; Mr. and Mrs. Jim Clemmer and family.

PERSONALS

Mr. and Mrs. Geo. Seaney visited Sunday night in Plainview with Mrs. S. A. Shearer and daughter, Miss Lillian Shearer.

Mrs. Hilda Stallcup, of Tucumcari, New Mexico, visited her daughter, Mr. and Mrs. Wade Welch Wednesday. Mrs. Welch and Mrs. Stallcup went to Amarillo to visit her brother who is in the Veterans Hospital.

Mrs. Bob Hill and Mrs. C. L. Wilson visited their mother, Mrs. W. T. Haley at the Plainview hospital last week. Mrs. Haley underwent surgery and is reported doing fair.

Sgt. and Mrs. Milton F. Clemmer, of South Gate, California, left Wednesday after a week's visit with Milton's parents, Mr. and Mrs. Jim Clemmer.

Mrs. T. C. Bomar and daughter, Mary Tom, visited Thursday in Canyon with Mrs. Noah Amerson. Mary Tom remained for a longer visit with Mrs. Carl Hair, Mrs. Bomar and Mrs. Pearl Simpson met Mary Tom in Tulia Saturday morning.

Mr. and Mrs. Elza Turner, of Dimmitt, visited relatives in Silverton Sunday.

Mrs. M. B. Self is visiting in San Antonio with her daughter, Mr. and Mrs. Sidney Cowan. Her son, Billy Self accompanied her to San Antonio. He was to report for duty in Corpus Christi.

PERSONALS

D. O. Bomar, of Lubbock, was a business visitor in Silverton Thursday.

Mr. and Mrs. Bud McMinn visited Sunday in Plainview with Mr. and Mrs. R. E. Stephens, in the afternoon they all drove over to Olton to see Mrs. Luther Campbell who is a patient in the hospital there. She underwent major surgery on Friday. She is doing fine.

Guests in the home of Mr. and Mrs. H. Roy Brown Wednesday night were: Mr. and Mrs. Monroe Smith, of Lockney; Mrs. Mary Lee Dillard, of Floydada, Mrs. K. C. Bristow, of Buckeye, New Mexico.

Mrs. T. R. Whiteside and Mrs. Avis Cowart left Wednesday morning on a vacation trip to Greeley, Colorado.

Mrs. W. L. Kerr and children, of Denton, are visiting their mother and grandmother, Mrs. F. C. Gatewood and family.

Mr. and Mrs. Otis Wilson and Mrs. Van Meter, of Quitaque, were business visitors in Silverton Wednesday.

Mr. and Mrs. M. O. Blackshear and daughter, Joan, of Olton, were business visitors in Silverton Saturday.

Mr. and Mrs. Grady Wimberly visited in Canyon with Mr. and Mrs. Carl Wimberly.

D. F. Wulfman who has been a patient several days in the local hospital was moved to his home Monday morning.

CARD OF THANKS

We want to express again our
deep appreciation and gratitude
for the numberless acts of kind-
ness bestowed upon Paul and
family during his long illness. It
was this wonderful help that made
his last months bearable, and his
passing somewhat easier. He was
not always able to personally
thank each of you, but each kind
deed was received with humility,
and with pride in having such
friends. His life was made bright-
er, and the bleak years of suffer-
ing was made easier by his friends
and neighbors, and Paul was so
very grateful.

We ask God to bless you as He
blessed Paul, and to ease your
burdens, as ours were eased by
you—our friends.

Mildred, Lawanda and Paula,
The Reid and Chappell families.

nis O'Keefe

DELIGHTFUL PEACH DRINK

A SULTRY summer after-
noon, you have no will to
move about, and guests are ex-
pected. There's no need to get
in a hurry over refreshments.
Nobody wants heavy food and
nothing will be more appreci-
ated than a delicious cold drink
with good cookies to nibble on.
To enhance the appearance of
the drinks you serve, be sure
your glasses are crystal clear,
and of an attractive design. It
is important to use plenty of ice
cubes as a lukewarm drink has
no appeal. If you are serving
bottled fruit beverages, spark-
ling water or ginger ale, it
should be thoroughly chilled be-
fore using. Fruit juices, too,
should be chilled before mak-
ing drinks.
Here is a delicious drink to
serve guests. It can be topped
with ice cream or whipped
cream.
GEORGIA GINGER CREAM
2 cups peach nectar
Pale dry ginger ale
Whipped Cream or Ice Cream
Divide peach nectar among
4 tall glasses. Fill glasses with
ice cold pale dry ginger ale. Top
each glass with whipped cream.
Stir gently to mix.

Keep Cool With Florida Frosts

The sun may keep the temperature up these summer days, but you
can keep your own temperature down by eating and drinking wisely.
And probably the wisest choice in a way of beverages are fruit
juices, which you can get now so conveniently canned right at the
source of their goodness, in the Florida citrus grove country.
Canned citrus juices contain plenty of vitamin C, which is a daily
need summer as well as winter, for grownups and children alike.

Citrus Soda

For each soda, combine 2/3 cup chilled Florida orange juice
with 1/3 cup chilled gingerale in a tall glass. Add a large
scoop of vanilla ice cream and two straws, and you have a
treat in any weather.

*"The bonds I bought
for our country's defense
will see my twins
through college!"*

MRS. MARY CALLON OF INDIANAPOLIS, INDIANA
CAN TELL YOU—IT'S PRACTICAL
AS WELL AS PATRIOTIC TO BUY BONDS FOR DEFENSE

"I have twin reasons for buying bonds," says Mary Callon, introducing 17-year-old Jack and Janet. "I've been a widow since my children were 8, but they'll have a college education. The U. S. Savings Bonds I've bought will see them through."

Mrs. Callon says, "In 1942 I enrolled in the Payroll Savings Plan at the U. S. Naval Ordnance Plant where I'm an executive secretary. I put 10% of my pay each week into bonds. I've discovered it's regular saving that makes saving possible at all!"

"By careful managing, the twins and I live comfortably. How thrilled I'll be to see them enrolled in Butler University this fall, thanks to my U. S. Savings Bonds! Every breadwinner should buy bonds—there's no better way to save money!"

Mrs. Callon's story can be your story, too!

What Mary Callon did, you can do, too—start now! It takes just three simple steps.

1. Decide to put saving first, before you even draw your pay.
2. Save a regular amount systematically, week after week or month after month.
3. Sign up today in the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

You'll be providing security for yourself, your family, and our free way of life.

**U. S. SAVINGS BONDS ARE DEFENSE BONDS—
BUY THEM REGULARLY!**

Iron and Steel Industry Sets High Wage Levels

Iron and steel wage rates and the total payroll of the industry reached new high levels in 1950.

The record high payroll of the industry in 1950 is estimated to have exceeded \$2.3 billion, surpassing the previous high mark, \$2.2 billion in 1948.

Wage earners worked an average of 39 hours a week in the first 11 months of 1950, but after the first four months, when operations were retarded by shortage of coal...

The basic or minimum wage rate at most iron and steel plants was raised 12.5 cents to \$1.31 an hour in December 1950...

Revolutionary War Deaths No Match for Korean Figures

The nation's war dead since "the shot heard 'round the world" was fired by Yankee farmers in the Battle of Lexington on April 19, 1775, totaled about 996,500—some 3,550 short of the million mark—on the battle's 176th anniversary.

Should the Korean War continue with American combat casualties running at the recent rate of 1,000 deaths a month, "GI-X," the unknown millionth soldier to be killed in all U.S. wars since 1775 will fall about August 1.

American military deaths in Korea during the first six months of hostilities exceeded by more than 1,100 the total number of colonial soldiers killed during eight years of the Revolutionary War.

The first nine months of war in Korea claimed 9,600 American lives, according to Defense Department reports. During the same period from June 25, 1950, to March 25, 1951, automobiles on the home front killed 28,400 men, women and children, nearly three times the number of U.S. soldiers lost in Korea.

Since the first fatal automobile accident 51 years ago, nearly 975,000 persons have been killed in traffic.

Eliminating Allergies

Quick, permanent relief from a long list of stubborn complaints, including high blood pressure, relative sterility and sexual frigidity, is often obtained by eliminating allergic foods, "house dust" or smoke.

Seafood Shipping

Shipment of live seafood, including lobsters and shrimp, to any part of the country is now possible. Lining seafood packages with a transparent plastic film which allows the entrance of oxygen to just the right extent, permits lobsters to live inside the sealed containers.

Speaker Rayburn Surpasses Record Set by Henry Clay

WASHINGTON, D.C.—Sam Rayburn of Texas has served the longest tenure as speaker of the house, surpassing the record of Henry Clay.

Rayburn assumed the post on Sept. 16, 1940, filling a vacancy created by the death of William B. Bankhead of Alabama.

Congressional library statisticians have figured that Clay served a total of 3,056½ days between 1811 and 1825.

Rayburn has also exceeded the

Dr. R.F. McCasland DENTIST Heard and Jones Building Phone 25 Tulia, Texas

At the very moment you're reading these words, this man is standing ready to risk his life for America—and for you.

Is there anything that YOU can do to help HIM?

Yes. Starting right now you can buy more... and more... and more United States Defense Bonds. Sign up for them today—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank. Defense is your job, too!

The U. S. Defense Bonds you buy give you personal financial independence

Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will some day buy you a house, or educate your children, or support you when you retire.

So go to your company's pay office—now—and sign up for regular Defense Bond purchases through the Payroll Savings Plan. In this plan, you may save as little as \$1.25—or as much as you want—each week.

Return of Welsh 'Exiles' Moving Musical Rite

CARDIFF, Wales—The "land of foreigners" is preparing a golden voiced welcome for an unparalleled number of its "exiles" in 1951.

The "land of foreigners", as if you didn't know, is the Principality of Wales. The somewhat unkind term is the one by which the mountainous, mysterious land was known to the Anglo-Saxons for centuries after they, foreigners themselves, drove King Arthur and his native British knights into the hills, in spite of everything Merlin could do. The "exiles", of course, are any Welshmen unfortunate enough to live in more barbarous, uncouth lands, and, as far as the Welsh are concerned, that includes England, too.

The factor that made Wales "the land of the foreigners"—its inaccessibility for centuries—had an incidental effect which makes it one of the most interesting countries in the world today. To a greater extent than any of the other diverse peoples who make up the British population, the Welsh have preserved an ancient culture and language almost completely uncorrupted by outside influences. To visit the Eisteddfod, the great national festival of Wales, which will begin August 6 this year, is to be transported to the almost legendary world of 1,500 years ago.

Much Ceremony
The welcome to the exiles is one of the most moving of the traditional ceremonies of the Eisteddfod. The exiles, numbering more than a thousand, and headed by the Leader of the Welsh Exiles, are conducted to the stage in a ceremonial procession.

After the ritual welcome, whose origin is lost in the mists of antiquity, the whole gathering joins in the singing of Welsh hymns and folk tunes. Since there are ordinarily more than 30,000 people present and since each of them, as are all Welshmen, was "born with a thrush in his throat", the great pean is an unforgettable musical experience.

This year, according to the British Travel Association, the Eisteddfod takes on added significance, for it has been designated one of the 29 major arts festivals being held as part of the Festival of Britain.

It's a safe bet that few of the others will rival it in the eyes of the visitor. The oldest cultural event of its kind in the world, it dates back in more or less its present form to the Twelfth Century, although it is believed that gatherings of the bards may have been held as early as the Fifth Century.

Cultural Expression
There's much more to the Eisteddfod than singing. It is the highest expression of the Welsh cultural tradition. Each day for a week, there are competitions between poets and prose writers, singers, musicians and artists of all kinds. In the evenings there are concerts by the magnificent choir of 700 voices, which has been training for two years for the occasion. This year the choir, drawn from the region of Llanrwst, the site of the 1951 Eisteddfod, will feature Dvorak's Sabat Mater and Brahms' Requiem.

The musical and dramatic events will be interspersed with rituals and ceremonials performed by bards in flowing white, blue and green robes. They will be culminated by the Chaining of the Bard (The Welsh Poet Laureate for the year.)

The ancient Eisteddfod has recently acquired a young and lusty brother in the Llangollen International Eisteddfod which will be held for the fifth time this year, during the week beginning July 3. The National Eisteddfod is strictly Welsh in character; the Llangollen festival annually brings together outstanding choral and folk-dancing groups from all parts of the world. In their picturesque national costumes, they compete for a variety of prizes during the day and join together in the evenings for informal concerts and dances.

Satisfied Customers Keep Restaurateur in Business

BLUEFIELD, Va.—The magic of good cooking was exhibited here recently.

Pete Loizos now owns a fashionable, well equipped restaurant because citizens of Bluefield like his cooking. Pete once owned a \$14,000 establishment across the line in Bluefield, W. Va., but it didn't succeed. He lost his lease and was forced to move.

A group of satisfied customers came to the rescue. They raised \$14,000 and turned it over to Loizos for stock in a new restaurant. Pete started a new restaurant 50 feet over the state line in suburban Bluefield. He borrowed \$70,000 from the bank and set himself up right.

Skeptics said Pete had another failure on his hands because the restaurant was so far from downtown, but in 18 months he had paid back \$30,000 of the bank loan. Last year Pete gave a dinner for all those who had contributed to the \$14,000 ante. They surprised him by turning over all their stock in his restaurant—no strings attached. Pete's place looks like a sure hit.
