Barbecue for Ex-Students of Silvertown School Homecoming to be September 4th, Former Judge O. R. Tipps Will Speak

Quarterback Club Will Meet to Elect Officers Sept. 17

The Quarterback Club will meet Monday night, September 17, at the school building at 8 o'clock for the purpose of electing officers for the year.

The club also announces that they have seats at the football stadium for sale at \$8.00 a seat for four years.

Those who do not have tickets will be charged 15c for each seat for the game Friday night to see the game between Silvertown and Kress.

American Legion to Meet Thursday Night At Methodist Church

A call meeting of the local American Legion and Ladies Auxiliary has been made for Thursday night, September 13, at 8 o'clock at the Methodist church. The purpose of the meeting is to make plans for the zone meeting to be held here September 22.

All members are urged to keep this date in mind and plan to attend.

Mr. and Mrs. Buster Cox and children, of Mederia, California, visited her sister, Mrs. Clarice Bradley and daughters recently.

Mr. and Mrs. Bill Gilbreth, of Lockney, visited her mother, Mrs. Clarice Bradley Sunday.

Mrs. Alice Dameron, of Lubbock, who has been visiting her sister, Mrs. T. D. Wallace, returned to her home Sunday morning.

Elder and Mrs. E. E. Degge moved to Plainview Tuesday where they will make their home. He was pastor of the local Church of Christ.

Plans this week for the ex-students' homecoming of the Silvertown school are being formulated, and the out-of-town speaker for the occasion has been selected. Judge O. R. Tipps, former resident of Briscoe County and also a former county judge and ex-officio, of this county, who now lives at Wichita Falls, Texas will give the main address.

Students and teachers of all schools now included in the Silvertown Independent School District are to be included in the homecoming.

Prizes will be given to the oldest student to register and also one to the student coming the greatest distance to attend the gathering.

F. F. A. PREPARE BARBECUE

The F. F. A. Class of the school will prepare the barbecue for the event and those planning to attend should write or contact Glenn Bunch, vocational agriculture teacher, and make plate reservations, not later than September 27, so he may know how many plates to prepare.

Football Team Will Play Game

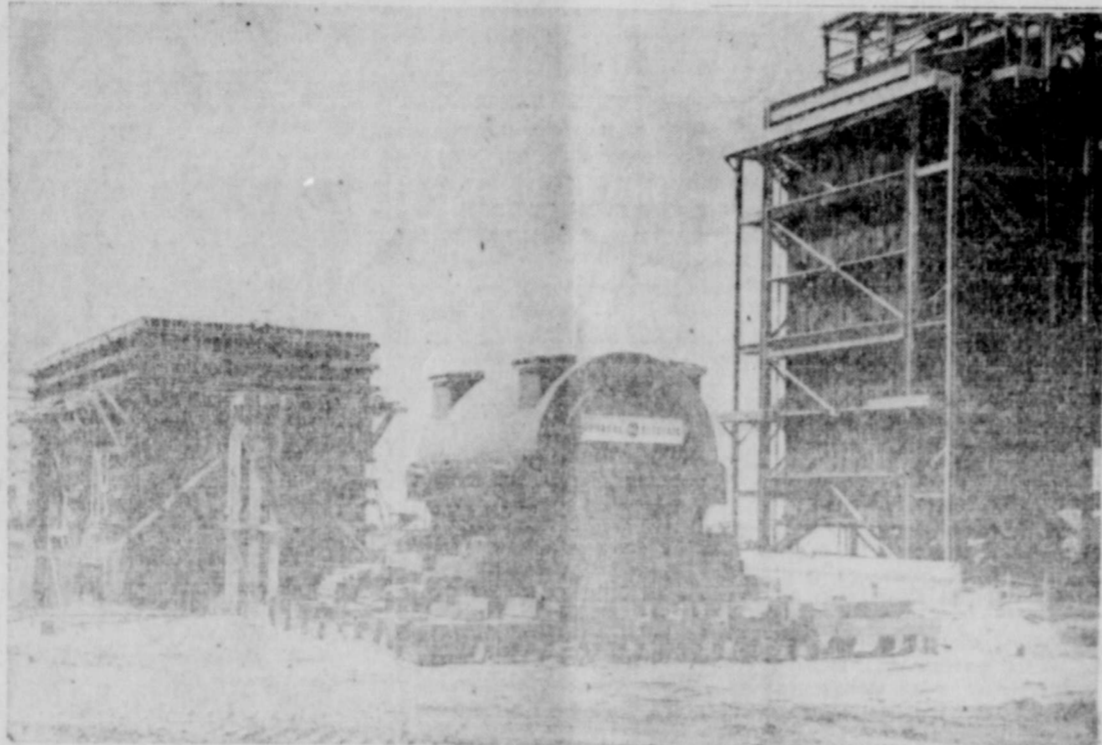

The Silvertown Owls will play Claud football team in the evening, starting at 8 o'clock. This is expected to be a well-played game as the teams are about equally balanced for play.

Bob Thompson Wins First Prize at Rodeo Sunday Afternoon

Rain late Saturday afternoon made it impossible for the Silvertown Roping Club to hold their rodeo Saturday night as had been announced. However, they did put on a good performance Sunday afternoon to a big crowd.

Bob Thompson, of Silvertown, was the winner of the first trophy, a \$225.00 saddle; Troy Watley, of Bushland, second, a \$75.00 buckle set, and third prize, a rope can, went to Morris Stephens.

Mr. and Mrs. Claud L. Bowman, of Burkburnett, Texas, visited his sister, Rev. and Mrs. G. A. Elrod last week.

Pictured here in the background is the generator starter which is a part of the enormous turbine generator to be installed at plant X. This turbine generator is so large that it is necessary to ship it broken down from General Electric's factory in Schenectady, New York. On the left in the background is the turbine generator foundation. To the right in the background is the boiler unit in plant X which is under construction.

Southwestern Public Service Company's Super-Power Plant Moves Nearer Completion With Arrival of Huge Generator

Plant X, Southwestern Public Service Company's super-power plant, located 4 miles south of Earth and 9 miles north of Armerst, moved one step nearer completion recently with the arrival at the plant site of the huge 50,000 kilowatt turbo-generator.

The new unit, scheduled to go on the line sometime during the summer of 1952, is the first of two which are included in the present plans for the Plant X location. The second unit, a 100,000 kilowatt machine, is scheduled to be in operation in mid-1953.

The new 50,000 kilowatt machine will be the largest single unit installed on the Southwestern Public Service Company system. It will be, that is, until it is followed a year later by Plant X's second unit, the 100,000 kilowatt generator. When the two machines are both on the line, Plant X will be the largest single power plant on the integrated system, and its capacity alone will be greater than was the entire system capacity in 1943.

The new generator, manufactured by the General Electric Company at their Schenectady works, was shipped to Armerst, the nearest rail point to the power plant site. Because of its huge size, the turbo-generator was shipped "broken down."

The entire unit weighs 257,000 pounds, with the largest single piece weighing 199,000 pounds. When the machine is installed, it will be 53 feet in overall length, 14 feet wide and 15 feet high.

Plant X will be the Southwestern Public Service Company's 11th base-load power plant. It will be tied into the integrated system by a 115,000 volt line, with the connections at the Tucco Plant, near Abernathy, and the Clovis, New Mexico plant. The system generating capacity will be more than 400,000 kilowatts when the first Plant X unit goes on the line. The entire system capacity in 1943 was 112,000 kilowatts.

The plant is located close to the geographic load center for Southwestern's 45,000 square mile service area. The load growth in the Plains Division has been one of the largest in the entire system, another factor contributing to the plant's location.

Material delays have moved the completion date for the plant back one month, but it is anticipated that it will be in operation before peak loads are on the line next summer.

Associate Justice Clyde E. Smith Will Speak September 15

Judge Clyde Wright requested the News to announce that the Honorable Clyde E. Smith, an Associate Justice of the Supreme Court of Texas, will speak at the Methodist Church in Silvertown on Saturday evening, September 15 at 8:30 p. m.

His subject will be "Americanism—What it is—and How to Keep it."

Everyone is invited to attend. This is the first time a judge of our Supreme Court has made an appointment to make a speech in our County, so lets have a good crowd and fill the church and hear a good talk on a very important subject.

Silvertown Received 2.12 Inches of Moisture

Silvertown has received, since last Friday night, 2.12 inches of moisture. Most of the precipitation fell Saturday afternoon and night, and while it was lighter in some places, most of the county received rain.

Southwest of Silvertown Saturday afternoon, J. E. O'Neal reported that he received 75% hail damage to his crop, and several of his neighbors received considerable damage.

No hail damage has been reported from the rain received Tuesday afternoon and night.

Ray Savage has gone to Fort Worth where he will be employed at the Consolidated Air Plane Plant in that city.

Mr. and Mrs. J. O. Fanning, of Justin, Texas, were guests of Rev. and Mrs. G. A. Elrod last week.

Silvertown Owls Opened 1951 Football Season Sept. 7

The Silvertown Owls opened their 1951 football campaign Friday night, September 7, against the powerful Dimmitt Bobcats and came out on the small end of a 19-0 score. It was a closer game however, than the score would indicate as everyone agreed that it was a very good defensive game.

Dimmitt's southpaw quarterback, Douglas Dennis, scored in the second period on a quarterback sneak from the two yard line. A 15 yard roughing penalty against the Owls set up the touchdown. The Owls were held to one first down in the first half to five for the Bobcats. The half ended 6-0.

The second half was played in the rain and there were several fumbles. In the third quarter halfback Glenn Brown scored on a 55 yard punt off right tackle. The extra point was scored on a pass from Dennis to Brown. Dimmitt's final tally came in the fourth stanza when Glenn Brown again broke loose on a 15 yard run, again over right tackle. The try for extra point was fumbled.

Silvertown's top gainers were Joe Brooks and Joe Munday, but the whole team played a good game with a line doing lots of good blocking and tackling.

Dimmitt had 8 first downs to 3 for the Owls. Final score 19-0. Silvertown takes on the ever powerful Kress Kangaroos Friday night, September 14, at the local field.

L. E. PAIGE BUYS PRODUCE AND ICE HOUSE BUSINESS

Hugh Nance announced this week that he has sold the Produce and Ice House business he has been operating in connection with his grocery business to L. E. Paige, and that Mr. Paige would devote his full time to taking care of the business.

HOWARD HOTCHKISS HERE FURLOUGH

Howard Hotchkiss, of Fort George G. Meade, Maryland, arrived home Sunday for a visit with his parents, Mr. and Mrs. H. T. Hotchkiss. Howard has completed his basic training and will report to Camp Lawton, Washington, after spending a twenty-one day furlough at home.

Mr. and Mrs. Jackie McDaniels and Mr. and Mrs. Bob McDaniels, of Amarillo, were week end guests of their parents, Mr. and Mrs. Bob McDaniels.

Silvertown Vs. Kress On Local Grid Friday Night

The second home game of the season of Silvertown Owls will be held Friday night when they plan to meet the Kress Kangaroos on the local field. This should be a close game, some of the fans predict.

Captains were elected last Thursday for the Silvertown Owls, they are Richard Tunnell and Joe Munday.

Local Boys Enroll At N. M. M. I. In Roswell

Mr. and Mrs. Durwood Davis and son, Carol, and Mr. and Mrs. D. T. Northcutt and son Pat, and Wayne McMurtry went to Roswell, New Mexico, last week where Pat and Carol entered school at New Mexico Military Institute.

Wayne McMurtry and Larry Tunnell went to Roswell Monday where they will also be students.

"I'd Climb the Highest Mountain" September 16, 17

William Lundigan, as a rural minister, takes his city-bred bride, Susan Hayward, to a Blue Ridge Mountain spot where the isolation and the stern job of earning a living under primitive conditions create rugged individualists. There is a sharp-trading storekeeper, Gene Lockhart; an agnostic whose children can't play with the others, Alexander Know; a kindly overworked doctor, Frank Tweddell; a young man, Roy Calhoun, in love with Lockhart's daughter, Barbara Bates, and other types to be found in such a place. The minister and his wife, with the help of the doctor, use the church for a hospital during an epidemic; they bring happiness to the children of the agnostic; the minister's wife breaks up the designs of a city woman on her husband.

When it comes time for the clergyman to leave the farewell is a fervent tribute to a homespun hero.

Next weeks program appears on page two.

Mr. and Mrs. Ewing Weaver, of Sundown, visited Mr. and Mrs. Lem Weaver Sunday.

TB Chest X-Ray Survey to be Here October 5th, 6th

Friday and Saturday, October 5 and 6, are the days set for the mass x-ray survey in Silvertown and Briscoe County. The hours will be from 8:30 to 5:30 p. m. and the place is to be announced later.

The mobile unit from the State Department of Health will operate here two days this year according to announcement made by Mrs. Claud Allison, who is in charge of arrangements. The P. T. A. is sponsoring the drive and are urging that every citizen over 15 years of age come and get an x-ray.

Purpose of the mass survey is to detect tuberculosis or other chest abnormalities in early stage so that the disease may be treated successfully. There is no charge for the x-ray and it takes only a minute of time. It is not necessary to remove clothing.

Mrs. Allison, heading the local drive is writing on her organization and hopes to have it before the people of the county so that as many as possible may avail themselves of the service.

Large Crowd Attend Simpson Chevrolet Opening Saturday

A large crowd attended the opening of the New Chevrolet home last Saturday. Patrons and friends started coming in soon after they opened up Saturday morning, and continued to drop in until closing time, to inspect the new building.

The show room was beautifully decorated with flowers sent with congratulations to the firm by many friends of the owner, John Earl Simpson and the personnel.

HOME ON FURLOUGH

Private First Class Buck Hardin, of Fort Leonard, Missouri, is home on a fifteen day furlough visiting his parents, Mr. and Mrs. Bill Hardin.

Harold Smith, of Berger, Mrs. Paul Smith and Jimmie Paul, of Clarendon, Mrs. W. T. Haley, Mrs. J. H. Greene, Jackie and Deana, of Plainview, visited recently in the home of Mrs. Bob Hill and Mrs. C. L. Wilson.

Mrs. Wallace Rains, of O'Donnell, visited her brothers, Joe and Charlie Hood and aunts, Mrs. E. J. Vaughan and Mrs. Mary Rogers Sunday afternoon.

PRICE DANIEL TO OPEN TRI-STATE FAIR

TEXAS' FIGHTING ATTORNEY GENERAL—Price Daniel will officially open the annual Tri-State Fair in Amarillo September 24. Daniel has gained nationwide attention in his fight to save the Texas tidelands for the public schools and in praise from the Senate Crime Committee for his work against organized crime.

Control of diseases by seed treatment gives extra plants and healthier plants.

FOR A BETTER CROP

Control of seed borne stinking smut or bunt, scab seedling blight, seed decay and root rot can make a lot of difference in the stand and yield of wheat. In the photograph are shown the plants produced from both untreated seed and seed which was properly treated with seed disinfectant to control these diseases.

The wheat seed in this test showed a laboratory germination of 74%, but when 100 treated seeds and 100 untreated seeds were planted, the treated

seed produced 86 plants and the untreated produced 32 plants. The effectiveness of seed treatment in reducing losses to seed diseases has resulted in differences in yield of several bushels to the acre in some years. That's why the Texas-Oklahoma Wheat Improvement Association and state extension services urge farmers to plant only cleaned and treated seed. For information on the locations of cleaning and treating plants, farmers are advised to contact their county agent.

FARM NEWS

From the County PMA Committee

1951 Grain Sorghum Price Support Rate

The loan rate for grain sorghums that grade No. 2 or better for Briscoe County is \$2.09 with a deduction of storage charges provided it is stored in an approved warehouse. This storage deduction is 1-0 of a cent per day per bushel from the time of storage until March 30, 1952.

Cotton Loan Rate For 1951 Crop

The cotton loan rate for Briscoe County has been announced at 3148 per pound, basis middling 15-16. The rate will vary on different grades and staple lengths. Cotton loans will be handled by clerks approved by the cotton branch.

1951 Cottonseed Support

Price support loans of 1951 crop cottonseed will be available at \$65.00 per ton. The support reflect 90% of the January 15, 1951 parity price of \$71.00.

Further information regarding the loan program may be had by contacting your local P. M. A. office.

Big Crops Needed in 1952

Another high production effort in 1952, particularly for the feed crops, will be required to again meet the expected requirements and maintain stocks at levels made desirable by the present emergency conditions. Major efforts in the 1952 production goals program will be to obtain needed supplies of feed grains and still maintain high production of fiber, oilseeds, and food grains without impairing the productive capacity of American Farms.

A larger wheat acreage goal

has been announced for next year. The 78,850,000 acres would be a little above the big acreage seeded for the 1951 harvest and with normal yields, would produce a crop of about 1,165 million bushels, well above the crop this year.

A. C. P. Practices

We still have plenty of money to assist farmers of Briscoe County to carry out additional approved practices under the 1951 A. C. P. Program.

F. H. A. News

A lot of work has been done in the homemaking room this summer. The walls have been painted a pale green. A light and dark green plaid linoleum has been put on the floor. Venetian blinds window screens and door screen were put up. We are expecting to get a new machine soon. There are 48 girls enrolled in homemaking this year.

Tuesday night, September 4, the first F. H. A. meeting of this year was held. The purpose of this meeting was to elect officers. They are as follows:

President, Mary Dudley; vice president, Junis Mercer; secretary, Joni Douglas; treasurer, Peggy Holt; parliamentarian, Kay Steele; song leader, Ruby Underwood; reporter, Millie Marshall.

Chaptee mothers were also elected. They are: Mrs. Milton Dudley, Mrs. Edwin Dickerson, Mrs. Elbert Stephens.

It was decided that meeting would be held on the second Tuesdays of each month.

Millie Marshall, Reporter.

Water and Oil Are Lifeblood Of Saudi Arabia

WASHINGTON, D.C.—“Where do oil and water mix?” makes a trick geographic quiz question.

The answer: In an Arabian Nights land between the Red Sea and the Persian Gulf, Saudi Arabia. There, an American oil company working a vast and productive oil concession is now cooperating with King Ibn Saud for the distribution of a documentary color film that will help educate Arabs in ways of conserving their precious water supply.

Scarce water and abundant oil are the mainsprings of Saudi Arabia's life and modern economy, says the National Geographic Society. Long before the current movie project, pioneer oil men were faced with the interdependence of the two elements.

Quantities of water are needed to drill for oil and to maintain the crews and settlements that produce this machine-age lubricant. For its part, the oil industry has turned up numerous new water sources which not only meet its own purposes but aid in the development of the country as a whole.

Water To Be Tapped

Except in the mountainous west and southwest rims, Saudi Arabia's annual rainfall amounts to only about three inches. There are virtually no permanent streams in a land whose more than half a million square miles are spread over largely rocky plateau and inhospitable desert. Brief and torrential downpours send occasional wild floods along the wadies, or water courses, but during most of the year these ditches and gullies are dust dry.

Yet there may be considerable water waiting to be tapped beneath the arid, forbidding crust of Saudi Arabia. Just where and how much is not yet known. Geologists from the U. S. Interior Department are now conducting a survey of Saudi Arabia's water resources as a Point Four project to assist underdeveloped nations.

Meanwhile, nature's green and fertile oases continue to serve the wandering riders of the desert, while new man-produced oases have been made possible through modern drilling equipment and skill.

It is here that oil and water meet most strikingly in the operations of Aramco, the Arabian American Oil Company which holds the exclusive concession for some 450,000 square miles of Saudi Arabian territory.

Wells Beside Pipeline

In addition to water installations at its producing oil fields in the Persian Gulf region, and the scattered water wells sunk here and there in once totally parched desert hinterlands, the company has drilled about 40 such life-giving wells along the recently completed Tapline that carries oil to the Mediterranean.

Wherever this water has gushed forth at pump stations and other points of the 1,068-mile pipeline, Arab wayfarers have gathered with their herds of sheep, goats, and camels.

Indirectly, the huge oil royalties paid to Saudi Arabia (now estimated to have reached some \$90,000,000 a year) have also provided the government with funds for far-reaching national development programs, including various irrigation and other water works.

The earliest and one of the most important of these modern projects was the model farm at the Al Kharij oasis near the capital, Riyadh, where oil-industry engineers again dabbled in water. Using power-driven pumps, a 10-mile concrete canal, and other irrigation aids, these Americans laid the groundwork for the large-scale production of grains, fruits and vegetables that has made Al Kharij a garden spot of arid Saudi Arabia.

Brannan Suggests Naming Tater Bug 'Russian Beetle'

VIENNA, Austria—Charles F. Brannan, U.S. Secretary of Agriculture, jokingly suggested that the name of the Colorado beetle (potato bug) should be changed to “Russian beetle.”

The secretary was commenting at a news conference on charges made by the Communists last year that U.S. planes dropped potato bugs in Hungary and Czechoslovakia.

The U.S. official is making an inspection tour of agricultural projects in Europe.

Bull Calf Tries Ski-Jump; None the Worse for Wear

OSLO, Norway—The village of Frederikstad in southern Norway believes that it has a great vaudeville performer, if he could only be induced to repeat his performance. The town reported what it believed to be the first successful ski-jump ever made by a bull calf.

The calf was ambling along the top of the well-known Oeya ski-jump, when it sat down on its haunches and shot down the 40-foot long run.

Tail flying, the animal made a perfect three-point landing, shook itself and then walked away.

PERSONALS

Mr. and Mrs. Wylie Bomar and Mr. and Mrs. Lee Bomar made a business trip to Amarillo Monday.

Mr. and Mrs. Geo. Wayne Rampley, of Meade, Kansas, spent the week end with their parents.

Mr. and Mrs. Bob Heathe and daughter, Barba, of Lubbock, visited Mr. and Mrs. L. D. Griffin, Jr., last Wednesday and Thursday.

H. Roy Brown made a business trip to Tulia Friday.

Notice!

An election to be held in county court room at courthouse, Monday, September 24, 1951 at 8 o'clock, for the purpose of selecting two directors for Briscoe County Clinic Association to fill the expiring term of Mesdames W. W. Douglas and Ray C. Bomar. 36-3tp

Mr. and Mrs. Prentice Richards and Mrs. Joe Richards, of Cache, Oklahoma, visited relatives and friends here from Saturday until Wednesday.

Mrs. J. W. Lyon, Sr. and Mrs. Ray Persons, of Quitaque were business visitors in Silverton Saturday.

Mr. and Mrs. W. H. Tension accompanied their son, Billy, to Brownwood recently where he entered Howard Payne College for the term.

Mike Edens returned last Monday from California where he had spent the summer with his mother.

WASHING BACK TO SCHOOL

LET REDDY DO IT!

Yes, when it's "Back To School" for the children, it's "Back To Big Washings" for Mother. But there's no reason to break your back with hand scrubbing or wringing or hanging the clothes on the line. Let Reddy Do It.

Reddy's wash day team, automatic washer, clothes dryer, ironer and electric water heater, will carry all the heavy wash day load for you. They make washing simple, if not downright easy—and they leave you fresh for many other household duties.

Reddy's back is strong — it's electrified — put your washday work on him.

A HOME TO LIVE IN

SMALL HOUSE PLANNING BUREAU, ST. CLOUD, MINNESOTA

Design A-221. Not shown on the sketch, but included in the working drawings, is single garage attached to the kitchen side by means of a breezeway.

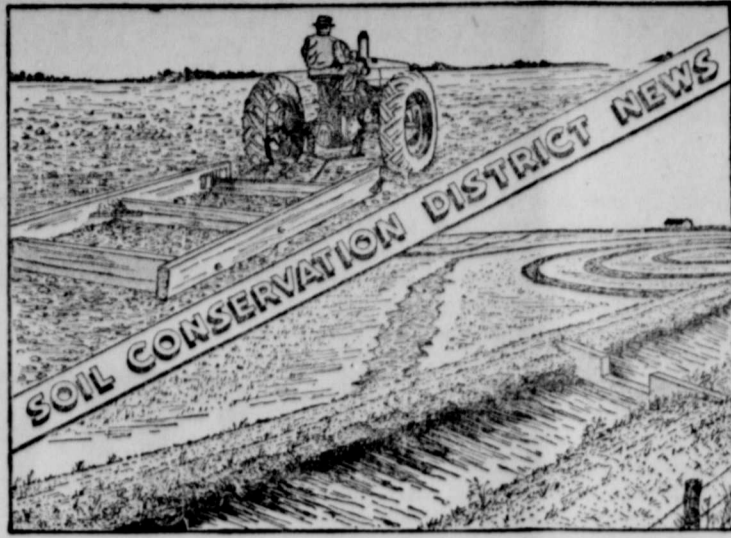

There are three bedrooms, bath, living room and combination kitchen-dinette. The utility room contains the heating plant, hot water heater, service sink and laundry equipment, besides

a storage closet and supply cabinet.

The first floor is an insulated concrete slab laid over a bed of gravel. Construction is of frame with exterior finish of siding and asphalt roof shingles.

A large linen cabinet is located in the bedroom hall and wardrobe closets, with overhead storage, are used throughout.

Floor area is 1195 square feet and cubage is 14,888 cubic feet. For further information see your local lumberman.

The Supervisors of The Cap Rock Soil Conservation District are: Chairman, Earl I. Cantwell; Secretary, Chester Burnett; Guy Edens, L. A. McJimsey and Glynn B. Morrison.

Wounded Soldiers Recovery Rates Up To New High in War

WASHINGTON—Soldiers wounded in combat against Communist forces in Korea have a much better chance of surviving than the doughboy of 1918 or G.I. Joe of World War II.

Army Medical Service officials say that 97.4 per cent of American soldiers wounded in Korea recover after receiving medical care. This compares with 95.5 in World War II and 92 per cent in World War I.

Ever since the Army was created more than 176 years ago, the Army's medical services have worked constantly to lower the death toll among wounded soldiers, and, as result of progress in medicines and surgical techniques, the fatality rate has decreased steadily.

One of the chief concerns of a battlefield commander is the problem of supplies of all types, and high on the priority list are medical supplies. While the movement of medical personnel is relatively easy, they can accomplish little without proper equipment, instruments and medications.

Experience gained during World War II went a long way toward simplifying the problem of medical supply to the Army field forces in Korea, but Korea presented many unique problems and, during the past year, many improvements have been made.

Now, on short notice, the Army Medical Service can deliver anywhere in the world a single package which may range in size from a 3,000-bed hospital to a 10-bed infirmary.

The packages are assembled at the Louisville (Ky.) Medical Depot. The various types of supplies—ranging from vaccines and serums to refrigerators and office equipment—are received there from medical and general depots throughout the United States. At the Louisville assembly point, all items are processed, waterproofed, packaged, crated, marked for identification, and identified in numerical sequence for loading and unloading.

What we are getting at is this: Your Soil Conservation Service as well as your PMA have been trying to get farmers in this district to try different practices and crops for years. As a general rule you have been reluctant to do so and yet you will have to try these practices on your own farm to be satisfied that they will work, even if experiments are carried on in the near vicinity. Will you be willing to let them use a part of your farm or try the practices on your own farm after they have been more or less proven?

The Family Farm Policy Review was held in Briscoe County August 28, 1951. There were approximately 50 people attended the meeting and we feel some good points were brought out.

There was one point stressed at the meeting that we feel could have been discussed at greater length and more fully, had time permitted. It was in regard to the establishment of sub-stations of experiment stations in this area. We feel that you are fully justified in desiring this set up, but would like to bring up a few more points in regard to it. For one thing, certain farmers in the area will need to practice by letting the experiment stations use a small portion of their farms for these experiments. Even after this is done and the practices prove to be satisfactory, the other farmers will have to try the same practices to see if they will work on their farm. The conditions within the Cap Rock Soil Conservation District vary widely from farm to farm.

Washington—Shades of Dick Tracy! The military is working on a fabric suit of armor capable of stopping a .45-caliber bullet.

Navy Works on Fabric Suit That Will Stop .45 Bullets

WASHINGTON—Shades of Dick Tracy! The military is working on a fabric suit of armor capable of stopping a .45-caliber bullet.

Navy officials recently informed a House appropriations subcommittee that the wonder fabric is a laminated plastic known as doron.

Capt. Frank P. Gilmore, controller of the Navy's Bureau of Medicine and Surgery, says there is one disadvantage to the new body armor. It weighs 5 to 7 pounds.

A GI in Korea, however, might welcome that extra poundage for the safety angle involved.

Steel Company Discovers There is No 'Heat Sickness'

CHICAGO—An intensified medical and safety program is helping employees of U.S. Steel's Chicago area mills beat the heat as midsummer temperatures soar.

The program is based upon an important medical discovery: That there is no such thing as heat sickness and that cases known as heat exhaustion, heat cramps and heat prostration are due largely to poor physical condition, improper rest and faulty diet.

U.S. Steel's hard-hitting campaign to reduce summer heat's toll in employee health has met with marked success since the program began in 1941. Only 41 cases, most of them minor, have been reported so far this year in Chicago area plants—a reduction of 90 per cent in ten years.

Workers are urged to get plenty of sleep and to take cool baths daily. "Beat the heat" wafers and candies are made available to all employees. They contain scientific amounts of salt and dextrose for the replacement of body losses of salt and sugar. More than 40 million salt tablets have been given to U.S. Steel workers in the past seven years.

A color film showing the right way to combat heat fatigue has been used extensively in the mills. More than 100,000 copies of "beat the heat" comic books have been distributed. These books, illustrated pamphlets and posters stress proper

If you are willing to let the experiment stations use a portion of your land in order to broaden your knowledge and understanding, you should also be willing to use a portion of that land trying things on your own hook. The reason I am saying these things is that as yet we do not have sub-stations in this district. Likely additional appropriations will be necessary if they are established. This will probably take a good while, if they are established, and it is possible that they will not be. While we

are waiting why not find out some information, by trying some practices on our own hook? Hubbard clover was introduced or used here in that manner and has proven satisfactory. Why not try others? Your local soil conservation service will assist you in any way possible. If you want to try some new crop for instance, contact us and we will give you whatever assistance is available.

Mr. and Mrs Tate and Baby Honored With Reception

Mr. and Mrs. C. F. Tate and their new daughter, Jackie Carol, were honored with a reception and shower in the home of Mr. and Mrs. Joe Brooks Sunday, September 9, 1951 from 4 to 7 o'clock p. m.

The guests were greeted by Mrs. Joe Brooks and Mr. and Mrs. C. F. Tate. Mrs. Hubert Brooks registered the guests who in turn were introduced to the honoree, Jackie Carol, by her grandmother, Mrs. Dick Bomar. A corsage of baby orchids, a gift of Mr. and Mrs. Watson Douglas and Mr. and Mrs. F. M. Arnold was pinned to her bassinet.

Mrs. Tate's corsage was of white carnations.

Refreshments of punch and cookies was served by Mrs. Keith Tiffin and Mrs. Printz Brown. The serving table was decorated with pink and blue ribbons forming bows at the corners, and centered with a floral arrangement in the form of a baby carriage. Pink and blue flowers were used throughout the entertaining rooms.

The gifts were shown by Mrs. Jim Brooks and Mrs. Albert Mallow.

125 guests called and many sent gifts who were unable to attend.

Hostesses were: Mesdames Joe Brooks, Austin Bailey, Keith Tiffin, Printz Brown, Jim Brooks, Hubert Brooks and Albert Mallow.

SOMETIMES IT MAY TAKE WEEKS,

BUT

Want-Ads

IN

Always Pay!

YOU'RE looking at the "stinger" of a B-26—eight .50 caliber machine guns that could spell eight kinds of trouble for anyone who tried to attack your country. You're looking, too, at a very important friend of yours. For this young Air Force armorer is doing a job in defense of America and you.

But defense is *your* job, too. And one of your important defense jobs is to make yourself a member of the "ground crew" by buying U. S. Defense* Bonds regularly. For, remember, it's your financial security that helps provide the American economic strength behind the armed force which protects your home.

So *today* sign up for bonds through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank. You can't make a better buy—for Defense Bonds are as safe as America!

The U. S. Defense Bonds you buy give you personal financial independence

Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will some day buy you a house or educate your children, or support you when you retire. Remember, too, that if you don't save regularly, you generally don't save at all. So go to your company's pay office—now—and sign up to buy Defense Bonds through the Payroll Savings Plan.

Don't forget that bonds are now a better buy than ever. Because now *every Series E Bond you own* automatically goes on earning interest (every year) for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not \$25—but \$33.33! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's, too, buy Defense Bonds now!

***U. S. Savings Bonds are Defense Bonds
Buy them regularly!**

QUALITY WHEAT VARIETIES

Producers are reminded that the wheat they plant this year should be a variety that will produce a quality product. According to Fred ...

The Texas Agricultural Experiment Station variety tests show that the better quality varieties are also among the highest yielding varieties. The varieties recommended for the principal wheat areas of Texas are Comanche and Westar for highest yield and quality. Wichita and Triumph are earlier maturing varieties of satisfactory quality. Quana, a new variety, of excellent quality is specifically recommended for the Rolling Plains, North and Central Texas areas. Quana is not winter hardy enough for Panhandle conditions.

Comanche, says Dines, is more widely adapted than any other variety and is of the highest quality. It also does well under irrigation in the Panhandle and South Plains areas. Seed wheat is scarce in some areas of the Rolling Plains, North and Central Texas but is ample in most South Plains and Panhandle counties. County agents, grain elevator operators and seed dealers have available lists of seed producers, says Dines and he recommends that the quality varieties be used to seed the increased acreage asked for by the USDA.

Norse Uncover Clues to Lives Of the Vikings

WASHINGTON, D.C.—The discovery of a 1,000-year-old silver hoard, unearthed in excavations at Trondheim, Norway, has brought to light new details for the gradually unfolding story of what life was like in Viking times.

This latest find, which includes old German and Arabic coins, along with pieces minted by 11th-century King Canute and two rare silver crucifixes, is expected to provide additional clues to the far-flung routes of conquest and trade followed by Scandinavia's dreaded sea warriors.

Archeologists already have accumulated a considerable mass of information on the Vikings' character and exploits. From burial mounds, ancient home sites, and military camps excavated on Baltic islands, in Scandinavia, Britain, and elsewhere, have come revealing relics of ships, arms, work tools, and household goods. With them often have been found ornaments, money, church treasures, and other valuable articles obtained through plunder or trade in the long ago.

Terrorized All Europe

The term "Viking age" is usually applied to the period between the 9th and 11th centuries when predatory raids by the Scandinavian sea rovers were terrorizing all Europe. Authorities trace three main invasion channels, although the routes often crossed and merged.

The Swedish Vikings sailed their dragon-prowed ships across the Baltic and ravaged northeastern Europe, finally reaching deep into the heart of Russia and beyond. The Danish raiders swarmed out against England, and into France, Germany, and even the Mediterranean.

Norway's Vikings, too, scoured the Mediterranean, the Continent and the British Isles. In addition, these bold sailors and settlers reached the New World centuries before Columbus was born. It is now generally accepted that Norse navigators, led by Leif Ericson around the year 1,000, established temporary settlements on what they called Vinland, somewhere along the eastern coast of North America.

Many still-disputed objects which have turned up in the north Middle West and other U.S. regions have been attributed to Viking origin. One, the "Kensington stone," with ancient runic characters and a 1362 date, was discovered near Kensington, Minnesota, in 1898.

Ship Graves Valuable

The famous Newport, R. I., round tower is another well known relic, long believed by many to be an 11th-century Norse church, although latest research suggests it may be merely a windmill of colonial times. In an Ontario, Canada, museum is a collection of authentic Viking weapons found near Lake Superior; but it, too, is the subject of controversy, since there is a suspicion the arms may have been brought to the New World at a relatively recent date.

Today's students of the Viking era are particularly grateful for the old sea fighters' custom of burying important personages in real ships outfitted with the comforts and utilities of their period. Three outstanding examples of such graves have been unearthed in Norway at various times. Now on exhibit at Oslo, one of the burial ships was left in the condition it was found; the others were carefully repaired.

Zoologist Advises Man To Harvest the Desert

LOS ANGELES—Like the Indian, the white man should turn to the desert for a potential supply of valuable agriculture products.

This is the opinion of Dr. Raymond B. Cowles, professor of zoology on the Los Angeles campus of the University of California, who specializes in research on the flora and fauna of the desert.

He says that selective breeding could turn the millions of square miles of unproductive, desolate land into a supplement for man's use—not by irrigation, but by harvesting plants already adapted to the drying winds, burning sun and infrequent rainfall.

"In our deserts the ethnobotanical records indicate that there are scores of food-producing plants that in the wild, unimproved state supported populations of many thousands of Indians," Dr. Cowles said.

By bringing desert plants from other parts of the world, new species might be introduced under controlled conditions, thus adding to our own rich resources.

Such products as native tobaccos, bunch-grasses for cattle raisers, dropseed grain used as food by Indians, and chia (a variety of mint), with research and special breeding, might be standardized so that they could be harvested with ordinary grain-harvesting machines.

"In addition to these items there are plants that produce beautiful natural dyes; others yield strong fibers, aromatic oils in great profusion and variety, and vegetable fats and waxes that rival sperm oil in their characteristics," revealed the U.C.L.A. zoologist.

"I took the Blindfold Test"

-that new Dodge Oriflow Ride sure opened my eyes!"

Says DANIEL F. HOWARD, JR. of New York City, "The Blindfold Test convinced me! The new Dodge Oriflow Ride really levels out the worst kind of bumps and ruts," continues Mr. Howard. "No ride has ever been so smooth."

Come in! Try it!

FEEL HOW NEW ORIFLOW RIDE MAKES ROUGHEST ROADS BOULEVARD-SMOOTH!

There's something new and wonderful in riding smoothness you notice from the very start!

Blindfolded you ride over a bumpy road. You're told the ruts are there—but you don't feel them!

Now you experience in other cars as the new Dodge Oriflow Ride levels out the rough spots. And with

blindfold off you'll be amazed you traveled over such bumps and chucks.

Words alone can't tell it all! That's why we invite you to take this daring "Blindfold Test" today.

You could pay up to \$1,000 more for a car and still not get all the extra roominess, ease of handling, famous Dodge dependability!

Floydada Man To Head Scout Finance Drive

Dr. F. B. Malone, president of the South Plains Council, Boy Scouts of America, announced today that J. M. Willson Jr., of Floydada has been selected as Campaign Chairman of the simultaneous council-wide Scout Finance Campaign to be conducted from October 8th to November 5th this fall.

Mr. Willson is associated with his father, J. M. Willson, Sr., in the lumber business and is general manager of the Builders Mart in Floydada. Mr. Willson has been very active in Boy Scouting affairs for the past several years and currently is serving as chairman of the council's finance committee.

The council-wide scout finance campaign for the support of the council's work for the year 1952 will start with the big gifts committee's kick off in all of the 20 counties on October 8th.

General solicitations groups will pick off on October 15th. All communities will report and check in their results at the annual council business meeting and banquet to be held at the First Baptist church in Lubbock on November 5th.

Mr. Willson is active in Lions Club, Rotary Club, American Legion, and is an active worker in the Methodist church.

West Texas Mountains Give Evidence of Primitive Age

Approximately a ton of fossils representing the teeming life of 200,000,000 years ago—the so-called Permian era of earth's history—was collected this summer in the Glass Mountains of west Texas by Dr. G. Arthur Cooper, Smithsonian Institution curator of invertebrate paleontology.

The fossil deposits of the Glass Mountains are one of the most abundant sources of the great variety of Permian creatures. During the Permian era these mountains apparently were near the southeast shore of a large inland sea that covered much of our present Southwest. A considerable variety of sea-bottom and pelagic creatures representing the primitive life of the time apparently gathered off small rocky reefs close to the shore.

Among the most abundant of these were goniatites. They were of the group with chambered shell known as cephalopods, sea creatures with much the same internal mechanism as squids and octopuses of the present. These goniatites were mostly small, ranging up to 4 inches in diameter.

Abundant on the reefs also were creatures belonging to the general class of protozoans—which exist now mainly as microscopic animals, many of which are internal parasites. They are characterized especially by consisting of single cells.

Protozoans are the most primitive forms of animal life but were not always small or microscopic. Some Permian protozoans called fusulines reached a length of over 2 inches. Other later kinds living in the more recent past attained approximately the size of a silver dollar.

Further explorations for fossil-bearing Permian rocks are being carried out this summer in New Mexico by A. L. Broussier and W. T. Allen, of the Smithsonian staff. Here also was an embayment of an ancient sea where primitive creatures congregated in great abundance.

Modern Colorado Mining Rush Is Search for Uranium Ores

Colorado mines gold, as well as silver, lead, zinc, copper, molybdenum, tungsten, vanadium, coal and oil-rich shale. Its modern mining "rush," however, has been for uranium. On the desolate Colorado Plateau west of the Rockies, prospectors with Geiger counters roam sandstone draws and mesas searching for canary-yellow carnotite ore that is "gold" to the atomic energy program.

Boulder, home of the University of Colorado a dozen miles north of Rocky Flats, boasts that it is the only city in America with exclusive rights to a glacier. Tourists from many parts of the world join the townspeople once a year in climbing to the Arapaho ice sheet that serves Boulder as a frozen reservoir.

Between the plateau floor of Rocky Flats and jagged mountain crests more than 14,000 feet in the clouds, travelers can see five climatic "life zones." Ponderosa pine and Douglas fir give way to Engelmann spruce, lodgepole pine, Alpine fir and finally to treeless expanses where the winds carry the chill of Arctic wastes.

This is Colorado's High Country, the gigantic wall against which the newest of America's "secret cities of the atom" will be built.

Shade Your Tree Shade trees need "mothering" at times. Little plants get such attention. But a shade tree, which is merely a big plant, too often has to make its own way in the world, unaided by human care.

Houseplants get rather lavish care. They are fed and watered. They are transplanted when they become pot-bound. They are kept free of noxious gases and insect pests. Garden flowers get "mothering" care, too. They are small enough to command attention several times a week. And they need nursing very often. But when a shade tree grows tall, taller perhaps than the house, many owners begin to take them for granted, like a big husky boy suddenly become man and ready to shift for himself.

The tree becomes too big for the owner to "see" in the mothering-sense. He does see, however, a small plant in the window or a rose along the garden wall. "The shade and comfort and beauty the tree gives seem to have been there forever, and will go on that way. Then something happens. Dead wood begins to show up. Leaves are not so full and green. Disease and insects attack. Beauty fades. Then the tree owner wakes up to the need of "mothering" care."

Helicopter Transport

Until the Korean war began, less than 1,200 helicopters had been built in America. Yet they had already begun to do such diverse jobs as fighting fires, carrying mail, surveying Alaskan glaciers, dusting farm crops, exploring volcanoes, harpooning whales and lifting church steeples. Late in 1950, the Army announced it was organizing helicopter transport companies. Attached to combat elements, 23 machines to a unit, these groups are designed to take men, equipment and supplies across bridgeless rivers, over mountain peaks, across jungles or swamps where trucks could not go.

Campaign Dates Set For Gonzales Warm Springs Fund Drive

Gonzales, September 9—Dates for the state-wide drive to raise funds for Gonzales Warm Springs Foundation for Crippled Children, Texas' own treatment center for physically handicapped youngsters, have been set for September 16-30, according to announcement by Ross Boothe, Foundation President.

Governor Allan Shivers is serving as general chairman of the Gonzales Foundation committee, spearheading the appeal for funds to expand the facilities of the non-profit, non-sectarian hospital.

Gonzales Warm Springs Foundation operates a 115-bed hospital chartered by the state but built by contributions from generous Texans from every corner of the state and dependent upon them for support. It bears the stamp of approval of the American College of Surgeons, emblematic of the high calibre of the treatment program offered to any Texas child regardless of color, creed, or financial condition.

A building program is under way at the Foundation which will add approximately 30 beds to its capacity, providing space for the treatment of about 100 more children each year. Money raised by public subscription during this September campaign will be used to provide these and other facilities to enable the Gonzales Foundation to extend its medical program to many more physically handicapped little ones in Texas.

Office of Price Stabilization Lubbock District

Price Specialist Roy Kessie of the Lubbock district OPS office will be here next Thursday afternoon, September 20 to assist business men who handle toys, games and Christmas decorations in amending their pricing charts. The deadline for filing this addition to the charts is September 29. It should be filed with the district OPS office, 1202 Texas Avenue, Lubbock, Texas.

While here, he also will assist other types of merchants who may need help or information in complying with the federal pricing regulations.

Mr. Kessie will maintain offices in the County Court Room; but he will make personal calls on merchants if they will get the request to him.

Merchants of this area are invited to call on the OPS representative for the information they need. Present plans call for a clinic to be held here on the same day of each week throughout September.

Bill Gilkeyson, of Sundown, was a visitor in Silvertown Sunday with relatives.

PERSONALS

Mr. and Mrs. Johnnie Weaver spent Tuesday and Wednesday in Amarillo on business.

Mr. and Mrs. Matt Weaver left Wednesday afternoon for Dallas where they will visit relatives for two weeks.

H. E. Crow, of Ajo, Arizona, has been a recent visitor in the home of his brothers Carl and Stanton Crow.

Mrs. C. M. Strickland left Tuesday to spend a few days with her son and family, Mr. and Mrs. J. D. Strickland in Plainview.

Mrs. Geo. Jones and Mrs. Albert Rowland accompanied Joan Rowland to Tulia Monday for a re-check at the hospital.

Mr. and Mrs. Kronenburgh and daughter, of Indianapolis, Indiana, returned to their home Wednesday. Her mother, Mrs. Champ Blackwell, of Lubbock, accompanied them home.

Mrs. A. A. Dunagan had the misfortune recently of falling and breaking her left wrist. She is reported to be doing nicely.

Recently visiting in the home of Mr. and Mrs. Carl S. Crow were three of Mrs. Crow's brothers, H. E. Maddox of El Centro, California, V. L. Maddox and J. M. Maddox, of Alvarado, Texas.

Recent visitors in the J. K. Bean home were her brother, Mr. and Mrs. Buster Wade, of Fort Worth, Texas.

Herbert Davis, of Amarillo, came Monday night to be with his father, W. T. Davis who is critically ill.

Guests in the home of Mr. and Mrs. C. F. Tate Sunday were: Mr. and Mrs. A. E. Tate, Mr. and Mrs. Tommie Tate, Mr. B. A. Tate, Miss Bonita Tate and Bernice Lee Stoakes all of McLean, and Mr. and Mrs. Rogers Brown, of Shamrock.

AGRICULTURAL FILLERS

Approximately 85 percent of Texas produced wheat flour is used by commercial bakers; therefore, wheat growers should plant varieties that yield well and produce a high quality flour.

Texas farm and ranch land prices rose an average of 12 percent during 1950—from an average of \$44.44 to \$49.95 per acre.

Legume seed should be planted as soon as possible after inoculation because exposure to bright sunlight may kill the bacteria. A vegetative cover on the land forms a cushion to absorb the beating and washing from heavy, driving rains; this cushion also absorbs water very rapidly and permits deeper moisture penetration into the soil.

Pattern of the Week

#5737 YOUTHFUL HAIR-SIZED DRESS DESIGNED TO MEET THE NEEDS OF THE DIFFICULT. TO FIT IN BETWEEN-SIZE FIGURE. SOFT DRAPES AT THE NECKLINE, AND GRACEFULLY GORED SKIRT. Sizes 14 1/2 to 24 1/2 2c.
