THURSDAY, NOV. 15, 1961

MISS PATRICIA STEARNS
Home service advisor for Southwestern Public Service Company, with headquarters in Plainview.

All-Electric Cooking School Tuesday, Wednesday

Silverton's first all-electric cooking school will be unveiled at the Palace Theatre Tuesday, November 20, when the first of two afternoon sessions gets underway at 2 p. m. Scheduled for both Tuesday and Wednesday, the second day program will also start at 2 p. m.

Silverton's five electric appliance dealers, Seaney Hardware Company, Simpson Appliance Company, Stodghill Appliance Company, Willson and Son Lumber Company, and T. T. Crass, are cooperating with the Southwestern Public Service Company in presenting the all-electric school.

An electric roaster has been selected as the grand prize for those attending, and it will be awarded at the conclusion of the last session. A roasted turkey will also be given away at the final session, a fine gift with Thanksgiving just one day after the school. In addition, door prizes will be awarded each day and the food prepared at the demonstration and frozen pies will also be awarded.

Miss Patricia Stearns, home service advisor for the Public Service Company, with headquarters at Plainview, will conduct the school. She will be assisted by Miss Clydie Mae Little, home service advisor at Southwestern's Clovis New Mexico office. Miss Stearns is well known in the Silverton and Briscoe County area because of her many home service calls in this area. In cooperation with Miss Little, she has presented electric cooking schools at many Plains communities in recent months.

School Library Show-er and Tea Nov. 19

Everyone is invited to a book shower, tea and an evening of "42" at the high school Monday, November 19, at 7:00 p. m.

Take a look through your books and bring one or more and spend the evening with your friends.

The home homemaking class, under the supervision of Miss Gunn, will serve refreshments and game tables will be set up in the auditorium.

Come and go or come and set a spell, but do come and help the school library put on a new face.

The books will be placed in the high school library or in the grade school's libraries.

Reporter.

Mr. and Mrs. Elmo Seaney and Perry Don, of Morton, and Joy Seaney of Lubbock and Mr. and Mrs. Bud McMinn spent Sunday in Arnett, Oklahoma, with Rev. and Mrs. B. P. Harrison. Rev. Harrison is a former pastor of the Silverton Baptist Church.

News Will be Printed Early Next Week

The News will be mailed early next week in order to take Thursday, November 22, Thanksgiving Day.

The First State Bank, Postoffice, and most of the other business houses have indicated that they will observe Thursday, November 22, as a holiday.

The News office will be open for business as usual Friday morning.

Death Claims Quitaque Pioneer, Mrs. Norah Bolton, 84

Mrs. Norah Etta Bolton, 84 years old, Briscoe County resident since 1890, died at 4 o'clock Sunday morning in Stanley Hospital at Matador.

Mrs. Bolton was married to John Lewis Bolton at Henrietta, Clay County, in 1890 and came to Briscoe County as a bride. They were among the first settlers in the county.

Mr. Bolton had come here the previous year, filling on land in the northeast corner of the county. He died in 1935 and was buried in the old Turkey cemetery.

For years, the Boltons owned extensive holdings and at the time of her death, Mrs. Bolton still held title to several sections of land.

When the couple first arrived, their nearest neighbors lived on the old F Ranch, 15 miles distant. Their postoffice was located at Newlin, Hall County.

Mrs. Bolton was the oldest member of the First Baptist Church in Quitaque at the time of her death.

Mr. and Mrs. Bolton were the parents of nine children, seven of whom survive. At none of the births was a physician in attendance.

Among survivors are five sons, Scott and Buck Bolton, Quitaque, Fox and Park Bolton, Turkey, and Blake Bolton, Plainview, two daughters, Mrs. Ruby Reeder, Portland Oregon, and Mrs. Ivan Montgomery, Dallas; and two sisters, Mrs. Mattie McCracken, Quitaque, and Mrs. Beulah Wood, McLean.

Funeral services were held at 2 o'clock Monday afternoon in the Quitaque First Baptist Church. Officiating was Rev. Alvin F. Hamon, pastor, assisted by Rev. J. B. Baker, minister of the Quitaque Methodist Church. Burial was in the Turkey cemetery by the side of her husband. Arrangements were under direction of Daniel Funeral Home, Quitaque.

Mr. and Mrs. G. W. Seaney and Mr. and Mrs. Pascal Garrison attended the opening of the Leo Maxwell Wholesale Furniture Company in Lubbock Sunday.

Mr. and Mrs. Martin, of Lorraine, visited in the home of Mr. and Mrs. R. L. Brown over the week end.

Mr. and Mrs. Ollis Chitty visited his mother Sunday who is a patient in a Lubbock hospital.

Guests in the home of Mr. and Mrs. C. L. Wilson Sunday were: Mrs. J. H. Greene and children and Mrs. W. T. Haley, of Plainview.

Mr. and Mrs. W. L. Messimer and son, of Higgins, Texas, visited with friends in Silverton Sunday.

Mrs. E. Posey was called Saturday to the bedside of her sister, Mrs. Lyles, who is seriously ill in a Denver, Colorado, hospital. Mrs. R. A. Edwards accompanied Mrs. Posey.

"I can Make Him Pull More, and for Less Oats."

By Shadburne

Inspired by a speech by K. S. Adams, chairman, Phillips Petroleum Company, this cartoon by Scott Shadburne recently appeared in the Springfield (Mo.) Leader and Press. Adams' address, "Federal Control—the Sugar-Coated Route to Less Natural Gas at Higher Prices," was made before a group of 700 business and civic leaders in Kansas City. Adams' speech on how federal regulation of natural gas producers and gatherers would adversely affect the consuming public.

Union Thanksgiving Services Wed. Night At Methodist Church

Rev. H. M. Secord, local pastor of the Silverton Methodist Church has announced Union Thanksgiving service at his church Wednesday night, November 21, 1951, at 7 o'clock. Rev. G. A. Elrod, local pastor of the First Baptist Church, will do the preaching.

All churches are invited to attend this union service.

PROGRAM FLOYD COUNTY BAPTIST WORKERS CONFERENCE

The Floyd County Baptist Workers Conference will meet at the First Baptist Church, Aiken, Tuesday, November 20. Theme of the meeting will be "The Sure Foundation."

The program will begin at 10 o'clock a. m. and close at 2 o'clock p. m.

Pat Northcutt, Carol Davis, Wayne McMurtry and Larry Tunnell of Roswell, spent the week end with their parents. They returned to school Monday.

Mr. and Mrs. T. J. Word left Thursday for the coast where they plan to spend the winter.

Mrs. E. V. Riddlehuber returned Saturday from Itasca where she had been visiting relatives. She was accompanied home by Mrs. H. C. Riddlehuber and three sons.

Seattle visitors in the home of Mr. and Mrs. Clyde Wright last Wednesday and Thursday were Mr. and Mrs. M. D. Ford, parents of the Wrights' daughter-in-law, Mrs. Jack Wright. They were enroute to Wilmington, N. Carolina, to visit the Jack Wrights.

GET your CHRISTMAS cards at the News office.

Owls' Tunnell Top B Player

A good, tough lineman, so they say, measures a foot between the eyes, shaves with a blowtorch, and eats acorns instead of cereal for breakfast.

Although he doesn't measure up to those specifications, exactly, Silverton's Richard Tunnell is one of those big, bruising tackles that can make you think he does.

Richard is just a nice, normal boy, but what a wallop he packs with his 185 pounds on a six-foot frame. The three-year letterman is one of the solid stones in the Owl's forward wall that hasn't yet allowed a district opponent to score.

The senior right tackle is captain of Silverton's football forces, a 48-minute player in every game. Nobody runs over Tunnell. Not even Class AA Dimmitt or Class AA Ralls could go against him. Both took to the air to beat Silverton.

Richard burst the dam against Turkey last week. He opened the hole that allowed Joe Brooks to waltz through the line, then scamper 50 yards for the Owl's first touchdown. From there, Silverton went on to win, 39-0, and remain undefeated in district 2-B play.

A good downfield blocker, Tunnell is at his best on defense, however. Coach Hank Brown estimates that he has made 50 percent of the tackles that have come on his side of the line this year.

Silverton has been scored upon in just three games this year. Six other opponents have been held scoreless. Tunnell is one of those reasons.—Amarillo Daily News.

Mr. and Mrs. R. E. Stephens, of Plainview, attended church at the First Baptist Church Sunday, and visited with Mr. and Mrs. C. M. Chappell.

Clinic to be Held in Lubbock Monday, November 26th

A clinic for the examination of cerebral palsied children will be held Monday, November 26, at the Cerebral Palsy Treatment Center, 3502 Avenue N, Lubbock.

Orthopedic specialists from Midland, Plainview, and Lubbock, a neuropsychiatrist, pediatrician, eye specialist, and a dentist will be present to examine children.

Cerebral palsy is sometimes referred to as spastic paralysis or birth injury and may be evidenced by the child's inability to sit alone, stand alone, walk or hold objects at the age these things are accomplished by the average child. Research has shown that treatment is most effective if started within the first few months of the child's life although children respond to treatment begun at a much later age.

Parents planning to bring children to the clinic are requested to register the children at the Center prior to the date of the clinic. Information regarding the clinic may be obtained by writing Dr. Esther Snell, Director, or calling Lubbock 6541.

Mr. and Mrs. Elmo Seaney and Perry Don, of Morton and Miss Joy Seaney, of Lubbock, spent Saturday with Mr. and Mrs. Bud McMinn.

Mrs. Wade Welch and Mrs. Arthur Arnold were business visitors in Tulia Monday.

Mr. and Mrs. Leo White and daughter, Marsha Kay, spent several days last week with her parents, Mr. and Mrs. E. S. Nelson in Lubbock. Marsha Kay became ill while visiting her grandparents. They returned home Tuesday.

School Will Take Thanksgiving Holidays

M. G. Moreland, superintendent of the Silverton Public School announced that school will dismiss Wednesday afternoon and that they will take Thursday and Friday as holidays. School will take up as usual Monday morning.

Private First Class L. C. Jasper Keeps his Ship in Service

67th Tactical Reconnaissance Wing, Korea.—Poor aircraft maintenance conditions, ranging from Korean cold to Korean dust, have not been enough to prevent a Fifth Air Force RF-51 crew chief from establishing an enviable record.

Private First Class L. C. Jasper of Silverton, Texas, a member of the 67th Tactical Reconnaissance Wing in Korea, has maintained his Mustang for 177 grueling combat missions without a single mechanical malfunction.

The Mustang, "Tony and Jerry," just keeps rolling on. Its big Packard engine has had nearly three times as much flying time as the average before a change was necessary.

During more than a year of flying reconnaissance missions, often pointing its cameras right down the muzzles of the gun positions it was photographing, the plane was badly shot up twice, but always made it back to its home airbase.

"I had to patch up 'Tony and Jerry's' torn wings and fuselage in a hurry so that it could get back into action," said Jasper. "I have to do my work in the wide open spaces," he continued, "since there aren't any such modern conveniences as hangars here."

The bitter cold of last winter in Korea presented one of the biggest maintenance problems. "I saw it so cold you could only work five minutes at a time," he said.

"Tony and Jerry" has outlasted two pilots who have flown their combat tours and gone home. Now Jasper is about ready for rotation, but the plane is still going strong.

Private Jasper, the son of Mr. and Mrs. C. M. Jasper of Silverton, has been stationed in Korea since last December.

His wife, Juanell, and son live on Route 1, Siloam Springs, Ark.

Little Randy Hughes Honored on Third Birthday

Mr. and Mrs. Berton Hughes honored their little son, Randy, with a birthday party on his third birthday Wednesday, November 7.

The children put puzzles together and played games outside until time to be served ice cream and cake, with favors of little train whistles and cracker jacks. The following were served:

Cherial Cowart, Latresa Cox, Connie Dudley, Buster Brannon, Ruth Ann and Margaret Minyard, and the honoree, Randy Hughes. Mothers attending were Mesdames Brannon, Minyard, Dudley, Cox and Cowart.

They all sang Happy Birthday and Randy blew out all three candles.

Judge C. D. Wright attended the funeral of Mrs. Bolton at Quitaque Monday afternoon. Mrs. Bolton, 84, died in a Matador hospital Sunday and was buried in the Turkey cemetery beside her husband.

Arrangements Being Completed for All-Electric School

Silverton's electric appliance dealers and the Southwestern Public Service Company are rapidly completing arrangements for the first all-electric cooking school to be held in the Palace Theatre. This school is scheduled for 2 p. m. November 20 and 21. The electric appliance dealers at Silverton are giving as top door prize a fully automatic roaster oven. Other door prizes to be furnished by dealers here are an electric clock, a set of National Silverware, a waffle iron, a toaster and an electric iron.

Some of the prizes will be given each day of the two day school with the final big prize being given away on the 21st. Other prizes to be carried away by lucky women attending the school will be the food as prepared by Miss Patricia Stearns, Southwestern Public Service Company Home Service Advisor. A number of frozen pies will be added to the list of food.

The electric appliance dealers of Silverton are furnishing all of the appliances to be used on the stage. The Seany Hardware Company will display a Blackstone washer and an Admiral refrigerator, Stodghill Appliance Company will furnish a Philco range and General Electric ironer. Another range to be used in the cooking class will be a Frigidaire by Simpson Appliance Company. They will also display the Frigidaire dryer. The Willson & Son Lumber Company will display Hotpoint freezer and dishwasher. Cross Implement Company will also furnish a refrigerator.

All of these appliances will be demonstrated by the Southwestern Public Service Company's home service advisors, Miss Stearns and Miss Little. They promise to provide the audience with an abundance of time saving hints for the kitchen and they will make full use of their wide experience preparing the varied recipes for each day.

There will be door prizes for the children and prizes galore for everyone. So don't miss Silverton's all-electric cooking school on November 20 and 21. It's all free.

Silverton Owls in Tie For District Football Honors

The Silverton Owls are tied for first place in District 1-B with the Lakeview Eagles. That tie will be broken this week when the two teams meet to determine the winner of the district. The game will be played Friday night at 7:30 at Lakeview.

The Owls brushed by the Turkey Turks last week in a conference tilt 39-0. Joe Brooks led the scoring with three touchdowns and one extra point. Melvin Hamilton caught two long passes for touchdowns, one of them being thrown by Freddie Hamilton and the other one by Joe Monday. Joe Monday scored one touchdown on an eighty five yard kickoff return and Freddie Hamilton scored two extra points.

The Owls line continued to play their fine defensive game and Silverton remains unscored on in district play.

ONE AMENDMENT IN ELECTION TUESDAY APPROVED

Only one of the five proposed amendments to the Texas Constitution was approved in Briscoe County, according to unofficial returns. Four of the six boxes had reported Wednesday morning, and amendment No. 4, Veterans' Land Fund, was approved.

Silvertown Runs Over Estelline

Right at the first Silvertown pushed Estelline back for a safety. Joe Monday scored the first touchdown from the five yard line. Darrell O'Conner converted. Joe Brooks made the second touchdown from the two yard line to make the score 15 nothing at the half.

The Owls really began to move the second half. Joe Monday scored the third touchdown from the two yard line. Darrell O'Conner again made the extra point. Joe Brooks made the next touchdown from the five yard line to make the score 23 to nothing. Joe Monday intercepted a pass and ran thirty yards to pay dirt. He also is credited with a safety. Freddie Hamilton made the last two touchdowns from the thirty and the five. O'Conner converted once more.

Silvertown made 26 first downs to Estelline's 4, although Silvertown was penalized 190 yards. 11 of which were for clipping. The boys played a good game and looked in pretty good shape. The Estelline game was their last home game. Silvertown has a good chance to win district this year but they will have to play harder than they ever have before to do it. All the boys will do their best to win the game and they know that the town is behind them.

Joe Monday.

Mr. and Mrs. Norlan Dudley have purchased the Bill Long home and have recently moved into the house.

Silvertown Owls Slaughter Turkey

Turkey's Turks were overwhelmed, 0-39, at Turkey Friday night by the Silvertown Owls in a district 2-B conference game.

The Owls scored almost at will over the lighter Turk eleven. Joe Brooks, Owl back, scored the first two touchdowns, one in the first quarter and one in the second. Freddie Hamilton passed to Melvin Hamilton in the end zone for the third counter, also in the second period.

Matador Shades Quitaque, 26-20 Friday Night

Matador wound up its football season Friday night, edging by Quitaque's Panthers, 26-20, in a district 2-B contest.

Matador scored all its points in the first three periods before Quitaque got started. Kenneth Dunning scored three touchdowns and Harold Martin one for the winners. DeWayne Martin ran two extra points.

Quitaque did all its damage in the final quarter when Richard Eddleman, a 165-pound junior, ran 25 yards for a score and passed to Bob Morris and Jimmy Davis for two more. Monty Wise booted two of three extra point attempts.

Mrs. Shelby Haynes spent last week in Plainview with her parents, Mr. and Mrs. J. H. Burson.

Urge Restoration French 'Azilum' On Susquehanna

WASHINGTON, D. C.—Farm meadows now spread over the 2,400 acres in northeastern Pennsylvania where the French village of Azilum (Azilum) sprang up in 1793.

Yet the strange story of that short-lived wilderness retreat of French exiles still holds a deep interest in the region, as a current proposal of Pennsylvania State officials for its restoration shows.

The colony was founded by aristocratic refugees fleeing the blood-letting of the French Revolution. Its site was the land within a big horseshoe bend of the Susquehanna River, a few miles downstream from present-day Towanda and 40 air miles northwest of Scranton.

The Grands Maison, largest of Azilum's 30 log buildings, was built for ill-starred Marie Antoinette, tradition says. But the French Queen died in the Reign of Terror without seeing her American home.

Liberal Royalists

Descendants of the builders still live in the neighborhood. Most of the Frenchmen made Azilum their home for a scant ten years, however, and returned to France under an amnesty proclaimed in 1802 by Napoleon.

The refugees had been part of a brilliant French society, which, prior to the French Revolution, set the fashion and conversation for the world. Many were deputies to the tradition-smashing French National Assembly of 1789 which voted to surrender numerous feudal rights and sought to establish a Constitutional monarchy. Liberal, yet loyal to the Crown, they stayed in France after the fall of the Bastille and until the Revolution's excesses forced them to flee for their lives.

The colony's founders were Vi-comte Louis de Noailles, LaFayette's brother-in-law and brother-in-arms during the American Revolution; and Antoine Omer Talon, Parisian jurist. Robert Morris, American financier, acted as land agent.

Gay Despite Hardships

An American wilderness was a far cry from the highly cultivated estates many of the colonists left behind in France; yet the royalists faced their program of community building with vigor, even gaiety. In summer, French ladies planned picnics and boating parties along the scenic Susquehanna River, danced in outdoor pavilions and organized fetes under riverside trees. In winter the Grande Maison was the scene of concerts, chess and card parties, and amateur dramatics.

All was not play, however. Houses were built, papered, shingled, and fitted with glass windows, then a novelty in America. Gardens, orchards and vineyards were planted; blooded bulls and sheep imported. Roads were built into the forests, which were felled for building, tar, and potash industries.

But most of the colonists had left family, wealth, ancestral homes, and hearts in France. When Napoleon made it safe for them to return, they were content to bid farewell to their Penn's-woods Asylum.

Scientist Sees Peak Of Himalaya for Rhubarb

The Himalayan Expedition of the California Academy of Sciences has found rhubarb growing in the melting snow at an altitude of 17,500 feet in a previously unexplored area near the Nepal-Tibet border, according to Dr. Robert C. Miller, Director of the Academy.

F. A. Charlton-Thomas, leader of the expedition, describes the rhubarb in a recent report to the Academy. It is superior in flavor and free of tough fibers. He says it made a welcome addition to the camp fare. As this plant grows through a range of 900 feet at high altitude the expedition leader expressed the view that this rhubarb might be introduced into the high mountains of other continents and countries for the benefit of mountaineers, or perhaps crossed with domestic varieties to develop early, fast-growing strains. He proposes to collect seed, which he will send to the Academy.

Officials at the Academy are keeping an open mind on the subject, and any communications from mountaineers will be carefully considered before any action is taken.

Proud Father Gets Wish; Triple Mary-ment Occasion

KILDANGANAN, Ireland — Joseph Geraghty had told all his friends that he was wishing for it to be a daughter. In fact, he had already chosen a name to be used when the blessed event happened. Mrs. Geraghty surprised the proud father by presenting him with, not one daughter, but three female family additions. Proud Joseph still was granted his wish. The girls, he announced merrily, would be named Julia Mary, Norah Mary and Christina Mary.

Officer Tells Importance Of Tanks In Modern Warfare

Patton-like dashes by American tanks have been few and far between in Korea, but the past year of fighting over the rugged terrain has proved that tanks are essential to an Army wherever it fights.

Colonel Sidney G. Brown, Chief of the Armor Branch of the Army Field Forces' Combined Arms Section, says even an over-whelming superiority in infantry does not make up for a lack of tanks.

"Korea proves this beyond a doubt," said Colonel Brown. "The losses of the Communists in their attacks have been terrific, and one reason these losses have been so high is the fact that they no longer have tanks working with infantry."

He recalled that when the Communist forces were using tanks, their attacks carried more punch—first early in the fighting when United Nations forces had been driven all the way back into the Pusan beachhead and later when the Chinese Communists entered the conflict and struck south.

In recent years, the public has associated tanks with deep penetrations of enemy lines—such as the operations which characterized the battles in Continental Europe. In World War II in Europe, armored units slammed forward as much as 50 miles in a single day and infantry followed closely behind.

Addison's Disease

A new treatment for Addison's disease has been revealed by a University of Michigan doctor. Dr. Jerome W. Conn, professor of internal medicine, reported that first research results with a newly manufactured drug, Corticosterone (pronounced kor-tik-oh-se-ron), produced remarkable effects in the treatment of four patients suffering from the disease. The disease, which has been rapidly increasing in the United States, is caused by an abnormality of the adrenal glands situated on top of the kidneys, he explained. In Addison's disease, the gland fails to supply the body with hormonal substances necessary to maintain adequate balance of salt, potassium, water, sugar protein and other elements, Dr. Conn indicated. The disease was described by Dr. Conn as follows: (1) general muscular weakness; (2) a marked drop in blood pressure; (3) poor appetite, nausea and vomiting resulting in considerable loss of weight, and (4) a generalized darkening of the skin. Forty-eight hours after Corticosterone was given to the patients by injection, their body functions returned to normal.

You—and the SCRAP METAL EMERGENCY

ANSWERS every farmer should have to questions about scrap iron and steel

Q. Why is iron and steel scrap a matter of importance to farmers?

A. Steel for our Country's defense program and civilian economy is being produced at the highest annual rate ever... and this will be greatly increased in 1952. Farm machinery and equipment needs must come from this over-all supply. As steel production increases the need for scrap increases.

Q. How does scrap figure in the production of steel?

A. One pound of scrap is needed to make two pounds of steel.

Q. Is scrap getting scarce?

A. Yes, the supply of scrap at the steel mills and foundries is not increasing fast enough to meet the needs of expanding steel production. Yet, there are millions of tons of idle iron and steel scrap, in small amounts, on farms throughout the country.

Q. What if the needed scrap isn't obtained?

A. That will mean a serious loss of steel production... fewer products will be made of steel. It will mean more shortages of civilian products. Defense needs come first.

Q. Why not use pig iron instead of scrap?

A. Every ton of scrap conserves ap-

proximately 2 tons of iron ore, 1 ton of coal, nearly 1/2 ton of limestone and many other vital natural resources—to say nothing of transportation facilities. Besides, there are not enough blast furnaces to produce the iron needed to maintain production.

Q. How can more scrap be furnished?

A. By everybody pitching in—as we always do in every emergency—and searching out all possible sources of scrap. Manufacturers of all kinds of products are conducting scrap drives. Old ships are being salvaged... scrap is being obtained from countless sources including farms.

jects made of metal. It may be resting and rusting in fence corners, in the field, the barnyard or the tool shed.

Q. What should be done with farm scrap?

A. See that every bit of scrap gets to the scrap dealer located nearest to you. He will break it up into sizes used by the steel mills and foundries. He'll classify the metals then ship the scrap in carload lots. If you do not know the name of your local scrap dealer, consult your local implement dealer for this information.

Q. What else can I do about farm scrap?

A. Support the scrap drive organized in your locality. Work with your local Scrap Mobilization Committee in getting the scrap started back to the steel mills and foundries through the local scrap dealer.

You'll be helping your country—and yourself!

What is Scrap?

Copper, Brass, Bronze and Lead Scrap are needed too! This advertisement is a contribution, in the national interest, by

Meet the Teachers

By Richard Tunnell

Mr. James Guy Daniels, a Silverton high school teacher, was born at Itasca, Texas. Mr. Daniels started and finished grade school at Itasca. After finishing high school, Mr. Daniels was called to service by Uncle Sam. He spent about three and one-half years in the South West Pacific during World War II. After returning home from service Mr. Daniels started on his

college education. He finished at East Texas State Teachers College at Commerce, Texas. Mr. Daniels major was in business administration. In 1951 he started teaching at Silverton high school. Mr. Daniels says his favorite cake is Angel food cake. The students of Silverton school enjoys having Mr. Daniels as a teacher.

Did all of you notice that Joe Monday made honorable mention in football last week. Nice going Joe, we're all proud of you. Keep up the good work.

Second Grade

Delores Hubbard and Marqueta Cook have enrolled in the second grade this week. This brings our enrollment to thirty-nine. We are glad to have them. Teacher, Miss Anna Lee Anderson.

Third Grade

The third grade welcomes a new pupil. She is Rowena Gandy who comes to us from Clarendon. We lost Michael Youngs who has moved to California. We are glad to have Champ McGavock and Harry Thompson, who have been sick, back in school again. We are putting up room decorations for Thanksgiving. Teacher, Mrs. Gill.

Second and Third

Our specifications at the present are speed and independence in reading. In order to reach these goals we are working on phonics every day in every class. We already realize we cannot do this in a day, or a week or a month, but we do expect to master it within the school year. We are losing a member of our third grade this week. Peggy Weldon is moving to Borger. Teacher, Mrs. Wilmoth.

Seventh Grade

The 6th and 7th grade gave a play Thursday night at the P. T. A. Teacher, Mr. Ellis.

Fifth Grade

James Albert Jacobs has been sick and has been out about two weeks. The fifth grade are very sorry to have him out of school. The fifth grade has a new boy. His name is Elbert Cook. The fifth grade is very glad to have him in the class. Teacher, Mrs. Brown.

Sixth Grade

We have some new pupils. They are Robert Hubbard and Duane Gandy. The girls in our room are learning to knit and the boys are doing some weaving. Teacher, Mrs. Evans. TRY A NEWS WANT AD.

Eighth Grade

The Jr. High football boys played Kress last Tuesday to end the season. The boys and girls both will be getting ready for basketball. The seventh and eighth grade will be giving the football boys a banquet the 15th of this month. Teacher, Mr. Wilmoth.

Freshman News

Sid Marshall had a misfortune while practicing football and broke his ankle. Sid was out several days last week but he is back in school now. We are all proud that he recovered so quickly. Teacher, Miss Frost.

Sophomore News

The sophomores elected their class officers and they are as follows: President, Ruby Underwood; vice president, Mildred Bean; treasurer, Faith Smithee; secretary, Patsy Crass; reporter, Donna Mayfield. Reporter, Donna Mayfield.

Junior News

The junior class met Monday night to choose their play and to pick their cast for their play. They plan to go to work right away and have a swell play for the people. Reporter, Zephyr Bingham. Continued on page four

Mrs. W. V. Bomar and Mrs. Leo Comer were business visitors in Tullia Thursday. Mrs. T. D. Wallace and Mrs. Geo. Jones were business visitors in Plainview Thursday. Mr. and Mrs. R. E. Douglas, of Lubbock, spent the week end with Mr. and Mrs. Edd Thomas. Mrs. Barney Stephens and Mr. and Mrs. Rance Stephens visited friends in Lubbock Sunday. Mr. and Mrs. H. B. Heath and girls, of Crosbyton, Mr. and Mrs. J. E. Estes, of Amarillo, Mr. and Mrs. H. L. Dobbs and girls, of Plainview, visited Sunday with their parents, Mr. and Mrs. M. K. Summers.

Mr. and Mrs. R. C. Tiner have moved to Tullia to make their home. Mr. and Mrs. Tye, of Paducah, visited their daughter and family, Mr. and Mrs. James Davis Sunday. Mr. and Mrs. J. E. Deavenport, of San Diego, California, have been visiting his parents, Mr. and Mrs. Lee Deavenport. Mrs. J. M. Perry returned Monday from Port Arthur where she has been visiting her son, Mr. and Mrs. W. L. Perry the past week. Visitors in the home of Mr. and Mrs. Bob Dickerson Sunday were: Dr. and Mrs. W. A. Sedgwick, of Tullia, and Mr. and Mrs. Scott Smithee.

Motorists Urged to Read Leaflet on New Safety Law

Texas motorists were urged today by Public Safety Director Homer Garrison, Jr., to apply to any gasoline service station for a copy of the state's official leaflet about the new Motor Vehicle Safety Responsibility Law, which becomes effective on January 1. "This leaflet was prepared," Director Garrison said, "to give automobile owners and operators the information they should have about this law before it goes into effect. It can be read in five minutes. I hope, of course, that all motorists will really study the facts that are set forth in the leaflet and will keep it in their car for future reference in case they have an accident and are confused about what to do. "It does not attempt to cover all of the provisions of the law and carefully avoids legal language, so that any layman may understand it easily. It was written to help the great majority of motorists—private passenger car owners and operators and small business firms operating one or two delivery cars. The larger owners of motor vehicles, of course, will want to study the entire law in greater detail. "The leaflet is free and provides important information about the following subjects: What the law is, who it affects, what to do after an accident, the circumstances that require suspension of both operating license and registration plates, and the several means the law provides for avoiding this penalty. "Any motorist can obtain one or several merely for the asking. It may save them a lot of trouble expense and inconvenience."

Manhattan Jams 2,000 Pounds Of Steel Per Block Skyward

Over 28 million tons of iron and steel in buildings, transportation facilities and utilities are in use in Manhattan. This enormous accumulation of metal through three centuries since erection of the first white man's habitation on the island, is equal to nearly 2,000 tons per acre. As an average, this would mean that a small city block, a little over 200 feet on each side, holds as much iron and steel in its skyscraper and buried in the ground, as are contained in over 1000 automobiles. The 28 million tons or more include water pipe, bridge cables, nails, railroad rails, and many other iron and steel products, but by far the greatest is steel structural beams. The total includes cars on the subway and automobiles registered in Manhattan. However, it does not include a vast amount of steel in furniture and in commercial and industrial equipment. This total of iron and steel now in use in New York's crowded island equals an accumulation of an average of 33,000 tons a year for 2 1/2 centuries. Of course, it was many generations after the purchase of Manhattan, until annual installation of iron and steel came anywhere near this average. In 1848 the first building with an iron frame was erected, opening the way to subsequent rapid increase in the use of steel with the advent of steel beams in buildings and the elevated, rapid transit. At the turn of the century, rapid transit and the railroads began to burrow under the streets and rivers. By the middle 'thirties the subways and elevated lines, including cars, contained about 675,000 tons of steel. Today this total may be slightly less, owing to removal of some elevated lines while little new construction has been added to Manhattan subways in the past 15 years.

Farm News From The PMA Committee Briscoe County

Farmers Urged to Test Soils Since the defense effort demands that every pound of phosphate and nitrogen be used to obtain maximum production, soil sampling and testing become all the more important, says Spencer Long, chairman of the Briscoe County PMA Committee. Considering only the value of fertilizers, a great saving can be made by first analyzing the soil. By doing this, the individual farmer will be taking a lot of the guess out of farming and will be carrying out more effective conservation of the soil and water resources on his farm. According to Spencer Long, soil sampling and testing are beyond the experimental stage. Laboratories have been established, ranging all the way from small portable outfits to large state laboratories. The Agricultural Extension Service has made wonderful progress in the field of soil testing. For further information check with the PMA committee, Soil Conservation Service or the County Agricultural Agent. Polling places will be open in the PMA office at Silverton and the City Hall at Quitaque between 8:00 a. m. to 5:00 p. m. on November 16, 1951. If you wish to vote by mail your ballot must be in by November 16.

They returned by way of Brownwood and visited their son Billy.

Kensington Stone Writings Subjected To Critical Study

Runic inscriptions on the much-discussed Kensington stone supposedly left in central Minnesota near the middle of the 14th century by a band of Norse adventurers, have been subjected to an intensive critical examination by Dr. William Thalbitzer, Danish ethnologist and one of the foremost living authorities on runes. Hitherto Dr. Thalbitzer, together with most other Scandinavian runic experts, had considered the stone as fraudulent. But after the present study, and in the light of later discoveries, he reports: "I cannot but waver in my doubt. . . . It seems to me that, after all, the inscription may be authentic." Dr. Thalbitzer's report on his more recent analysis of the runes which brought this change in his viewpoint has just been published by the Smithsonian Institution. The stone was found in 1898 near the village of Kensington, Minn., by a Swedish farmer named Olof Ohman while grubbing trees on a hill, formerly an island in a lake that has now disappeared. The stone was held by the roots of an aspen, and there was evidence that it had been there for many years. The runes engraved on it read in translation: "Eight Goths (Swedes) and 22 Norwegians on exploration journey from Vinland westward. We had camp by two skerries on day's journey north from this stone. We were and fish(ed) one day. After we came home (we) found 10 (of our) men red with blood and dead. A.V.M. (Ave Virgo, Maria) save (us) from evil. (We) have 10 men by the sea to look after our ship(s) 14 days' journey from this island. Year 1362."

Beryllium Study Detection of as little as a billionth of an ounce of the beryllium in the body has been made possible by means of a new chemical technique. Prior to 1949, beryllium was used in the manufacture of fluorescent tubes, and it is for this reason that warnings were issued against breaking old tubes in disposing of them. New compounds, which are not toxic, are now used. In an attempt to understand the nature of the action of beryllium, numerous studies are being conducted on animals, it was pointed out in a report by Dr. T. Y. Toribara and Dr. P. S. Chen, Jr., of the University of Rochester, who said: "Distribution and excretion studies using radioactive beryllium have shown where the element is deposited and its rate of elimination. These quantities of beryllium are very small, and accurate analyses are very important."

Closer Than You Think South America's Iguassu Falls, usually bracketed with Niagara and Africa's Victoria Falls as the world's cataract giants, is closer than you think. Air travel has brought Brazil and Argentina days closer to U.S. centers of population in recent years. The two Latin Republics, sharing opposite banks of Iguassu's wide, double-horseshoe brink, are slowly and steadily beating better paths for tourists from their own big coastal cities to this majestic natural wonder in their wilderness. So far, Argentina has had the better of the competition. For decades it has maintained a good, small hotel in the national park on its side, west of the falls.

Careless Users—Not Matches Real Cause of Unwanted Fires

If a common match could speak, it might well warn:—"I have a head, but no brains—so use your head when using mine!"

Considering that Americans light 500 billion matches a year—nearly a million every minute—it's advice worth keeping in mind; also, is the fact that matches don't cause unwanted fires—only careless users do.

To assure safety and quality of matches, American manufacturers subject them to a total of 37 research and control tests. Wood and paper are carefully selected so the splints have proper strength and stiffness; the splints are impregnated to prevent "afterglow" and the hazard of falling embers; match heads are watched for "over" and "under" sensitivity—so on striking they don't ignite too easily or require too much pressure; to ignite American matches, at least 300 degrees (F) is required—heat hot enough to bake cookies; no poisonous ingredients are used in U. S. matches; and, tests by independent laboratories prove that the chemicals in present day matches are distasteful to rats and mice—that even when starving these rodents will not gnaw matches and so start fires.

Most common violations of match safety by users, according to authorities, are the following: Discarding a match after lighting without making sure the flame is extinguished; permitting young children easy access to matches; storing matches on the kitchen range, or other "hot spot"; failure to heed the 40-year-old warning on book matches—"Close cover before striking match"; and the habit of some smokers who hold the top of the book close to the flame of a match when lighting a cigarette, cigar, or pipe, thus making a flue which might ignite the whole book.

So . . . "Play safe! Always respect fire!"

New Super-Carrier Forrestal Adds Punch to Navy's Power

"The new super-carrier, the James V. Forrestal, will be the Navy's contribution to the formula of striking power plus mobility which is the essence of American military strength today," says Major George Fielding Elliot.

The huge floating air base, which will take three years to build and will cost \$218 million, is the logical result of the development of the aircraft which it serves, according to Major Elliot. The flight decks of modern carriers have had to be increased in size to take care of the high landing speeds and larger size of jet propelled aircraft.

A carrier is concentrated power. The visitor who goes aboard such a ship for the first time gets an initial impression of utter confusion compounded by enormous size. There thousands of officers and men or thereabouts busily perform hundreds of highly specialized tasks involving almost every conceivable mechanical, electrical and technical specialty.

Up top, the flight deck is some 3 1/2 acres of plank-sheathed steel. According to Major Elliot, an airfield on land would require something like 140 acres to handle aircraft of the number, size, and characteristics which a big carrier must handle.

The vast, echoing gloom of the hangar deck below may remind one of Mammoth Cave—and compares with it in height and width. Down below are turbines which develop the more than a quarter of a million horsepower required to drive the great carrier through surging seas at express train speed.

Taming the Titan

Chemical and metallurgical engineers in laboratories all over the country are grappling with the intriguing and exasperating problems involved in the use of titanium as an engineering metal. This "new" material was actually discovered as a chemical element in the year that George Washington was inaugurated first president of the United States; but its peculiar characteristics—especially its reluctance to separate in pure form from its ores—have prevented it, until lately, from being exploited.

Now titanium's days as a laboratory curiosity are over. Military engineers see in its combination of strength-with-lightness an opportunity to improve substantially the mobility and transportability of combat equipment. Aeronautical engineers anticipate that, when all feasible application of titanium alloys are made, the weight of heavy planes can be reduced by from one to five tons.

Sink Stains

Most stains on the sink can be removed with a mild abrasive. Rust stains are best removed by treating with an acid. Vinegar or lemon juice may be used, but dilute hydrochloric acid is more effective. A bleaching solution, such as Javelle water, is also quite effective in removing general stains from porcelain. It is more difficult to remove stains from the tray, since the color tends to penetrate into the plastic. Soap and water, with a mild abrasive, and perhaps lemon juice, might be of some help. Unfortunately, active organic solvents would be likely to dissolve the celluloid itself, and hence they cannot be used.

has zest. Kay is the cheer leader and football queen to-boot. Janice, our quiet one has a personality so fair. And Beth and Gay are like the changing tides ever onward upward to something just beyond. Eudean is our western girl of riding she knows a lot. Lessie is the cheerful one, a smile she always wears. Lettie is our Longfellow, of her poetry we are proud. Will we reach our aims, our hopes. In years to come let's recall the days when we proud eighteen were juniors of all the fun we had.

Owlet Annual Staff Elected

The Owlet Annual Staff have had their organization meeting for 1951-52 and are off to a good start. Mrs. Alvin Redin, sponsor, has a very good staff consisting of: Joe Monday, Editor; Donna Jean Mayfield, Assistant Editor; Kay Steele, business manager. Richard Tunnell, assistant business manager; Glen Watters, art director; Helen Vaughan, assistant art director.

They plan such improvements as names on all pictures and adequate space and decorations. Also the business managers, Kay and Richard plan to be able to sell the annuals much cheaper this year by using an improved system of advertising. All interested in annuals or ad space please contact Kay and Richard. All of those not interested had better hide because Kay and Richard will be after them.

Joe Monday, Editor.

GOSSIP

It seems Lessie brings Albert bad luck. Every time they go some where his car breaks down. Could this be just an excuse to stay out late. If so isn't it a rather expensive one? Joe Monday says he has definitely signed off of women. He also says he tired of them. How long this will last we don't know, probably just until he sees another pretty one.

Why did Miss Gunn, Bonnie, Peggy, Joy Nell and Gloria June think the fire drill was so funny. Could their giggles have been because they were hysterical?

THE OWLET

Edited by students of the Silverton Public Schools.

Meet the Seniors

By Joe Brooks
Junis Mercer, born May 18, 1933. She is the daughter of Mr. and Mrs. Fred Mercer. Junis attended school in Silverton most of her life. She is 16 and a member of the senior class. She graduated from grade school in 1947 then she began her high school education. During her freshman year she was president of the business manager on the annual staff, basket ball manager, a member of the F. H. A. and a member of the choral club. In her sophomore year she was member of the basketball team. She was elected sophomore Who's Who, she was also elected most beautiful, F. F. A. sweetheart, cheer leader, and a member of the F. H. A. Association. During the summer of 1951 Junis Mercer took correspondence courses which consisted of English and American History. The reason for this was so she could graduate a year early. Therefore she is in the junior year. She is secretary and treasurer of the senior class; vice president of the F. H. A. club and school queen. Junis says she doesn't know what she wants to do when she completes her education. She likes sailors, basketball and strawberry short cake.

F. H. A. News

Last Thursday morning from 9:30 to 10:30 the first year girls entertained their mothers and teachers with coffee and cookies. The girls fixed and served the refreshments themselves. Every one reported a nice time. The girls are finished with their dresses and suits. They had a style show in assembly Wednesday morning. The girls modeled their clothes. The first and second year girls are going to study diseases and prevention of diseases. The second year girls are going to study the different kinds of bandages and how to make beds with sick people in them. The third year girls are going to take up chip carving. This promises to be very interesting. Millie Marshall, Reporter.

The Juniors

By Lettie O'Neal

Who are we? Just a group. Just a happy carefree bunch of kids. We number eighteen. No more there is no great heroes among us. We wouldn't know what to do if there were. But since the days of short pants and pigtailed we've been known one to another. Our class once big has dropped to a few. Our pleasures once few have flew to a plenty. Now let it be said in years that may come. Trouble we've had and not just a few. But pleasures have doubled what troubles we knew. So no complaints have we.

Eighteen in number and what a bunch. Ten boys we are proud of. Eight of the ten we give for football. That takes Brooks, Bingham and Baird. Strange and Stephens and Lusk and Jasper and Mathews too. And Turner has honors shown in FFA work. Garvin a mechanic will be and what a skill he has. And how about those eight girls. Helen is our talented one for music she

F. H. A. News

By Jack Graham
The regular F. F. A. meeting was held Tuesday, November 6. While whiting for the late comers. The entertainment was show on football and baseball. We wish to thank the Southern Public Service Company for the use of these films. The main business for the meeting was to appoint a committee on program of work. We hope that the committee will carry out the program of work.

Are some of *your* Series E Government Bonds maturing this month?

Now they can earn more money for you!

New law provides 10 more interest-earning years for your Series E Bonds . . . and you need not do a thing!

Are you one of those smart and patriotic Americans who began an automatic saving program with Series E Government Bonds in 1941? Then you're one of the lucky people who can profit by a *new law now!*

A bill recently passed by Congress now makes it possible for your United States Defense Bonds to continue earning interest ten years longer than was originally planned.

For example, a Series E Bond which cost you \$18.75 in 1941 will pay you \$25 in 1951. But if you hold that bond ten extra years, until 1961, it will pay you \$33.33, an average interest of 2.9% compounded annually. You get similar increases on Series E Bonds of every denomination.

And there is nothing for you, as a bond holder, to do. You need not exchange the bonds you have. You need not sign any paper, fill out any form. *You simply keep your bonds as you have been keeping them.*

You may still redeem any Series E Bond at any time after you've owned it for sixty days. But unless you really need the cash you're much better off to hold your bonds. For United States Defense Bonds are as safe as America itself.

When you buy your bonds regularly and hold them, they are steadily building a sum *big* enough to buy something really worth while—a home, a business, a retirement fund, an education for your children.

And bonds are *safer* than cash! If you lose or accidentally destroy cash it's gone for good. But when you have your cash in United States Defense Bonds, the U. S. Treasury will replace lost or destroyed bonds at no cost or loss to you.

So if some of your bonds are coming due, take advantage of this new offer of your government—just sit back and let them go on making money. Meanwhile keep adding to your savings by buying more U. S. Defense Bonds regularly—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

If you want to be paid your interest as current income—

The new law also allows you to exchange your Series E Bonds, in blocks of \$500 or more, for Special Series G Bonds which pay interest semiannually at the rate of 2 1/2% per year. For full details, ask at any Federal Reserve Bank.

Look how your maturing bonds go on earning under the new law!
(This table shows \$25, \$50, and \$100 bonds as examples of how All Series E Bonds grow.)

Original maturity (or face) value.....	\$25.00	\$50.00	\$100.00

Lord Mayor of London Holds Old Dick Whittington Post

Crimson, ermined robes, pearl sword, crystal mace, and a gilded coach drawn by six horses—such are the glamorous office accessories of London's Lord Mayor, whose visit to the United States marks the first ever made by one in his position.

An aura of mellow tradition and authority travels with the Lord Mayor of the City of London. For the official who rules the mile square City at the business heart of the British metropolis symbolizes the power and privilege which citizens won from the Crown nearly eight centuries ago.

Among other offices held by the Lord Mayor is that of Chief Magistrate, Admiral of the Port and Commanding General of London; Chairman in the Court of Aldermen and Common Council of the City; and member of the Privy Council.

Even the King traditionally must seek permission to enter the City on state visits, and is granted the courtesy in a solemn sword presentation at Temple Bar boundary.

How young Dick Whittington rose from poverty to the pinnacle of this august office is one of the world's great success stories. Much of it is legend, but the facts that remain are more impressive than the fiction.

In the familiar tale, Dick Whittington was the poor apprentice to a London merchant who was offered, through jest, a chance to ship something abroad for sale. Having nothing else, Dick sent his cat. The animal, put up for sale in a Barbary Kingdom then overrun by mice, brought an enormous sum.

Meanwhile, Dick had run away from home without learning of his riches. He returned to London when he heard the bells of St. Mary-le-Bow ringing out the prophetic promise that he would be Lord Mayor of London—a promise, the story goes, that was three times fulfilled.

Indoor Air Purifier
A new household air purifier which utilizes short wave ultraviolet rays to change oxygen into ozone, "nature's own air freshener," has been developed by Roy C. Stove and Company, Chicago. The aluminum unit plugs into any AC outlet and is said to destroy unpleasant odors with electronically produced ozone.

Powdered Peaches Produced By U.C. Food Technologists

BERKELEY — Canned peaches may soon be available in several new forms, says W. V. Cruess, professor of food technology, University of California College of Agriculture.

Crushed, pureed, thickened for pie fillings, and julienne style canned peaches have been produced. Cruess explained, in an attempt to eliminate waste from overproduction of clings for regular canning.

Cruess, working on this problem with Rolie O'Neal and William Rivera in the food technology department, has also produced dehydrated shoestring peaches, vacuum dried peach "nuggets," powdered peaches for baked products and puddings, and candied peaches.

These new products were reported at the annual meeting of the Institute of Food Technologists in New York.

Alcoholics Classed As Physically Sick After New Studies

One of the great socio-medical advances of the last decade and a half has been the general acceptance of the fact that alcoholism is a disease. While many physicians still regard it as a psychiatric disorder, recent studies indicate that physiological factors are also involved. Indeed, some leading authorities contend that physiological factors come first, and that chronic alcoholism is as much a physical disease as, for example, diabetes.

The new viewpoint is important because physical diseases are susceptible to control by drugs or other medical means. In fact, the concept that alcoholism is a physical disease has just led to the first true cures of alcoholism on record. Several chronic drinkers of a dozen to twenty years' standing have been cured by massive doses of vitamins administered according to a regimen worked out by Dr. Roger J. Williams, director of the University of Texas Biochemical Institute. The best that it has been possible to expect from other methods of treatment such as psychotherapy, "aversion cures" or Alcoholics Anonymous has been rehabilitation through total abstinence. None of these relieves the chronic alcoholic's irresistible craving for another drink, once he's had the first. Several of the patients treated by the Williams regimen, on the other hand, can take or leave their drinks like ordinary persons. A small number of cures don't prove a successful method of therapy, of course, but in the case of alcoholism they are worthy of note. A number of other alcoholic patients, moreover, though not cured, benefited greatly from the Williams treatment.

There are two main approaches to alcoholism as a physical disease. One is that of Dr. Williams who holds that the craving for alcohol is due to an individual metabolic peculiarity, which can be relieved in a good proportion of cases by vitamin therapy. The other approach stems from studies of hormonal deficiency, especially of adrenocortical hormones, in many alcoholics.

Rhubarb Had Nothing On These Foxy Fellows

CINCINNATI, Ohio — Sand traps and roughs should be enough hazards to pester golfers on the Sharon Woods links, but a new one has made itself known, says the County Park News.

It was reported that one local golfer made a beautiful drive up the fairway that borders the woods. Before he could get up to take a second shot, a reddish-brown animal darted from the woods, picked up the golf ball and disappeared back into the woods.

The golfer consoled himself with the thought that the little ball would probably be used to amuse a little litter of little foxes. An examination of one nearby fox nest by searchers uncovered a total of seven golf balls.

Scientists Predict Longer Youth Through New Diets

New discoveries in diet, dermatology and health preservations will keep people remarkably preserved in the future. In another fifty years the signs of aging will be so reduced that seventy- and eighty-year-olds will look like today's forty-fivers, according to a scientific survey of the future made by the Woman's Home Companion.

Other pleasant predictions for the future are that winters will be warmer. Some long-range forecasters says that one day Boston's climate will be the same as Miami's today.

You'll be able to zip from New York to the west coast during lunchtime. Dr. Irving Langmuir, General Electric physicist-chemist, envisions travel by vacuum tunnel or tube in an airtight vehicle which will travel five thousand miles an hour.

Houses will be lighted by paint or wallpaper, treated to absorb light energy during the day and emit it at night.

But maybe not so happy a prediction for husbands is that there will be no more weeks away from home to attend conventions. They will be telecast right to the office.

Baltimore Mother Gives Birth to Four in Hurry

BALTIMORE, Md. — Mrs. Susie Advance said only two words to doctors here recently when she delivered four new additions to her family in a matter of but six minutes. The 31-year-old Negro mother said simply, "I'm hungry."

The quads were about six weeks premature and the weight of each was just under three pounds.

Mrs. Advance told hospital officials that her husband was killed in a stabbing incident two months ago and that neighbors were caring for the rest of the family, ranging in age from nine months to 12 years.

You're looking at an average American boy—like your own, maybe, or the youngster down the block. Happy, unspoiled. Still young enough to hold a mongrel puppy dog in his arms and love it with all his heart.

Now look closer. At the pistol belt and the field jacket, the duffle bag and the faded fatigues. This boy, so like your own, is now a man as well—an American G.I. Hardly out of his teens but willing and ready to walk into the fire of combat, if need be, to defend your country. And you. When he's doing so much, won't you do something, too? Remember, defense is your job, as well as his. And one very important way to do your job is to buy United States Defense Bonds. For it's your financial solidity, built up by bond saving, that puts the strength of America's economy behind our fighting power.

Help your country and yourself! Sign up for bonds today—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

The U. S. Defense Bonds you buy give you personal financial independence

Remember that when you're buying Defense Bonds regularly you're building a personal reserve of cash savings. Money that will some day buy you a house or educate your children, or support you when you retire. So go to your company's pay office—now—and sign up to buy Defense Bonds through the Payroll Savings Plan.

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own automatically goes on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.23! A \$37.50 bond pays \$66.66. Buy U. S. Defense Bonds now!

***U. S. Savings Bonds are Defense Bonds Buy them regularly!**

PERSONALS

SAN JACINTO NEWS

Mr. and Mrs. L. H. Odom are moving this week to their new home in Missouri.

Mr. Warren Waldrip, agriculture teacher in the Tulia high school visited James Anderson and Edwin Bice the past week, and looked at the boys home projects.

Several families from here attended the Tulia and Floydada football game at Floydada Friday night.

Mr. and Mrs. E. W. Preston received word their son, Garland had been hurt, also their daughter-in-law, Mrs. Ted Preston had been ill in a San Antonio hospital.

Mr. and Mrs. Dale Culwell are the parents of a baby girl.

Mr. and Mrs. J. K. Milam, of Sudan, visited their son, J. K. Milam, Jr., and family Sunday. The school has a new movie projector.

PERSONALS

Mrs. Pete Howard visited with her sister, Mrs. Glenn McWilliams this week.

Mr. and Mrs. Bill Martin were business visitors in Amarillo Saturday.

Mr. and Mrs. Clyde Mercer and children visited Sunday in Anton with Mr. and Mrs. Troy Denson.

Mrs. N. C. McCain, of Tulia, is visiting her son, Mr. and Mrs. Clifton McCain.

Mrs. Ira Lee, of Lubbock, visited her son, G. W. Lee last Thursday.

Mr. and Mrs. Bob Dickerson, Dr. and Mrs. W. A. Sedgwick, of Tulia, visited Mr. and Mrs. Edd McMurtry at Vigo Park one day last week.

Mr. and Mrs. F. L. Perkins had as their guests Sunday the following: Sgt. and Mrs. William B. Guice and children, of El Paso, Clifton Guice and Miss Sue Campbell, of Claude, Mr. and Mrs. Glenn Jones and girls, Mr. and Mrs. Bill Rucker, of Quitaque, Mr. and Mrs. Cab Hall, Mr. and Mrs. Ben Dobbs, Mr. and Mrs. J. Draper, all of Boswell, Oklahoma.

Mesdames M. G. Moreland, Bob Hill, W. A. Dickerson, Joe Smith attended a nail day district meeting of the W. S. C. S. of the First Methodist Church in Plainview last Thursday.

Mrs. H. M. Secord took a carload of M. Y. F's. to Boys Ranch at Tascosa for a Sunday visit.

Mr. and Mrs. Charles Kelly, of Muskogee, Oklahoma, visited her parents, Mr. and Mrs. Lee Deavenport Sunday.

Agricultural Fillers

Combining of peanuts in the West Cross Timbers area was still in the experimental stage in 1945 but by 1950 an estimated 90 per cent of the acreage was combined. This change has resulted in an estimated saving of 69 per cent on labor needed for harvesting peanuts in the area.

Texas Agricultural Experiment Station research workers are working to develop strains of cotton that are resistant to bacterial blight. This disease is also known as "angular leaf spot", "boll blight" and "blackarm".

Venison may be processed similarly to beef and lamb and this includes curing and freezing.

Five Texas 4-H boys and one girl have participated in the International Farm Youth Exchange Program. Each upon returning home has told thousands of their experiences. They lived, worked and played with farm families in the countries which they visited.

Local county agents can supply information on taking and sending soil samples to the testing laboratory at College Station.

Research workers of the Texas Agricultural Experiment Station are developing from a selection of common Bermudagrass a new strain of Bermuda for use on golf course putting greens. Preliminary tests for the new strain, Texas 35A, are very promising.

Dry ice can be used to hold the temperature down in the home freezer in case of power failure or compressor trouble. A 50 pound cake, cut into pieces and placed in the various compartments, will hold the temperature to about 15 degrees for 48 hours.

Matador Shades Quitaque, 26-20 Friday Night

Matador wound up its football season Friday night, edging by Quitaque's Panthers, 26-20, in a district 2-B contest.

Matador scored all its points in the first three periods before Quitaque got started. Kenneth Dunning scored three touchdowns and Harold Martin one for the winners. DeWayne Martin ran two extra points.

Quitaque did all its damage in the final quarter when Richard Eddleman, a 165-pound junior, ran 25 yards for a score and passed to Bob Morris and Jimmy Davis for two more. Monty Wise booted two of three extra point attempts.

Effect of Grass Cover In Controlling Soil Splash in Heavy Rain

In order for land to erode we must have a moving agent and a transporting agent. This means that when rain strikes bare, unprotected land it bounces the soil particles into the air, thus breaking them loose and causing them to run off with the water.

In one test using grass as a cover the following results were observed. On range land in poor condition where little forage or litter were on the ground there was 11,273 pounds of soil splash on each acre. On a range site in good condition there was only 920 pounds on each acre, while on a site in excellent condition there was only 114 pounds of soil splash on each acre. Keeping in mind that we must have soil splash to have erosion we can see that the poor condition range was much more susceptible to erosion than the site in excellent condition.

This factor alone makes it important to keep a good cover of good grasses on our range land at all times.

Mrs. M. G. Moreland Entertained W. S. C. S. Monday

Mrs. M. G. Moreland entertained the W. S. C. S. with a buffet luncheon Monday, November 12. Fall flowers were arranged throughout the rooms.

Mrs. H. M. Secord conducted the forenoon quite hour, with Mrs. Marvin Montague at the piano, playing soft music.

Mrs. Warner Grabbe had charge of the afternoon program of prayer with Mrs. Hugh Nance at the piano.

Those attending were: Mesdames W. A. Dickerson, Gordon Montague, R. M. Hill, Jeff Simpson, Sam Turner, Bailey Hill, H. M. Secord, Marvin Montague, Edd Thomas, Arnold Turner, H. E. Curtis, T. R. Whiteside, Hugh Nance, Avis Cowart, Joe H. Smith, J. S. Fisher, Glenn McWilliams, Ralph Glover, Warner Grabbe, Rev. H. M. Secord and the hostess, Mrs. Moreland.

BIRTH

The Buford Nichols R. A. Chapter Met Monday

The Buford Nichols R. A. Chapter met Monday afternoon at the Baptist Church with good attendance for Mission Class study. Mrs. G. A. Elrod is teaching the book.

Meeting was called to order and regular order of service was led by Ambassador-in-chief Derron Thompson.

Jackie Baldwin lead the R. A's. in their Royal Ambassador hymn, "The Kings' Business", Sam Brown at the piano.

In the absence of chapter scribe James Tension, Mrs. Elrod led in sentence prayers for our missionaries closed by Mrs. A. A. Howard.

In a short business session our chapter was named. The name selected was Dr. Buford L. Nichols our missionary to China who is now on furlough.

The Royal Ambassador benediction and parting prayer was led by Derron Thompson.

Reporter.

Mrs. Susie Wallace, of Tucumcari, New Mexico, spent the week end with her father, T. D. Wallace. They spent Sunday in Turkey with Mr. Wallace's daughter, Mr. and Mrs. Alga Turner.

Mr. and Mrs. F. C. Mc... of Tulia, visited Mr. and Mrs. P. D. Wilmeth Sunday.
