## There Are Cures For all Television Interferences

Now comes word from New York that there are cures for all TV interferences unless you live 10 miles straight down.

If ignition makes the noise, use sparkplug suppressors and re-orient the antenna. Electric shavers need just a small filter, easy to buy and cheap.

If Dr. Nextdoor uses diathermy gadgets, tell your repairman you want a "high pass" filter on your set. Industrial heating equipment nearby? Just change the frequency, shield the equipment.

Automatic garage door-openers kick up a fuss sometimes—try raising the frequency.

Every type of interference has its own pattern and time cycle. Power company equipment, blamed for lots of the static, causes very little.

The new 21-MC amateur band, which alarmed so many alarm-viewers, affects the sound more than the picture.

In other words—it can be fixed, whatever the problem. But don't try it yourself unless you have scads of electronics savvy. Pick a good repairman. They're available. The TV scavengers are fast disappearing.

Mr. and Mrs. Prentice Richard, of Casche, Oklahoma, spent the weekend with his brother, Mr. and Mrs. Sid Richard.

Mr. and Mrs. Blanton Garrison, of Dallas, spent the weekend with his parents, Mr. and Mrs. C. C. Garrison.

Those enjoying a picnic supper at the home of Mr. and Mrs. Berton Hughes and boys the 4th of July were: Mrs. Hughes' parents, Mr. and Mrs. R. E. Renfro and brother, Gayle, and Mrs. Vern Walker, all of Woodbine, Texas. Mrs. Hughes' sister, Mr. and Mrs. Hubert Hall and girls, of Memphis, Texas, Mr. and Mrs. W. B. Hughes, and Mr. and Mrs. Troy Cox and daughter.

## SERVICES AT PRESBYTERIAN CHURCH SUNDAY

Rev. W. W. Alverson will conduct services at 11:00 Sunday morning, July 13, at the Presbyterian Church. Everyone is cordially invited. All Presbyterians are urged to be present.

## Silverton Boys Will Attend Meeting in Dallas July 16-18

A delegation of two representing the Silverton Future Farmer Chapter, will go to Dallas, July 16-18 to attend the 24th annual convention of the Texas Association of the Future Farmers of America.

The group will be headed by Kenneth B. Stephens and will be accompanied by G. H. Bunch, their teacher of Vocational Agriculture and Future Farmer Adviser.

Other Future Farmers who will make the trip from Silverton include Melvin E. Hamilton, both boys will receive their Lone Star Farmers Degrees.

They will be among some 7,500 other Future Farmers from well over the State of Texas who are expected to attend the convention. Scene off all meetings during the convention will be at the Baker and Adolphus Hotels.

Some of the activities planned for the Future Farmers include a gigantic parade up Elm Street and a Gold Key Banquet Thursday evening, where well over 600 Future Farmers will receive Lone Star Farmer Keys for rendering outstanding service to the Association.

More than \$2000.00 in awards will be presented to the outstanding Future Farmers during the three day meeting.

Local arrangements for the convention are being made by a committee of Dallas and Fort Worth businessmen headed by Cal T. Johnson, Southwestern Public Relations Director for Sears Roebuck and Company; C. G. Scruggs, Associate Editor of Progressive Farmer; and Murray Cox, Farm Director for Radio Station WFAA.

## Mrs. Albert Ramsey Honored With Bridal Shower

Saturday, June 28, Mrs. Albert Ramsey, of Quitaque, the former Miss Lessie Word of Silverton, was honored with a bridal shower at the home of Mrs. Fred Brannon.

Green and yellow were the chosen colors and they were followed throughout the entire house. A white linen table cloth with yellow and green ribbon bows and streamer covered the table. In the center of the table was a miniature bride and groom, surrounded with ivy and yellow mums, covering all this was a miniature parasol.

Green punch and yellow cake squares, nuts and pastel mints completed the table arrangement.

Greeting the guests at the door was Mrs. Fred Brannon, the bride, Mrs. Albert Ramsey, her mother, Mrs. W. O. Word and the grooms mother, Mrs. A. B. Ramsey, Sr., of Quitaque.

At the guest register was Miss Janet Turner, serving the cake squares and punch was Miss Millie Marshall and Miss Helen Vaughan. Showing the gifts was Miss Lavona Lewis of Quitaque and Miss Janice Turner. Approximately forty-five guests called and were registered.

Mr. and Mrs. Arlas Cavet of Fort Worth spent the weekend with her parents, Mr. and Mrs. Bill Hardin.

Mr. and Mrs. Melvin Yancy and Judy, of Lovington, New Mexico spent the weekend with relatives. Mrs. Rusty Arnold returned home with them.

Shellie Tomlin, of Byers, Texas, moved to Silverton last week to make his home, and will be manager of the Farmers Gin Company.

## Light Rain Monday Night—.37 Received in Silverton

Light showers fell Monday night, and most of the farmers reported from a trace of moisture to one-quarter of an inch. Silverton received .37 of an inch.

More moisture is needed on the row crops.

## Prizes Offered in Child Photograph Contest July 14th

The time is almost at hand for the opening of this newspaper's big Child Photograph Contest, and we're urging all of our readers to have their children ready for the big day. A photographer, Winston B. Lucas from Irving, Texas will be in Silverton on Monday, July 14 from 11:00 a. m. to 6:00 p. m. for the purpose of taking pictures in this vicinity. His studio will be located at the Palace Theatre building.

In addition to having their pictures printed in this newspaper the children will be competing for \$25.50 in prizes which are being offered for the four best photographs made during the day.

The photographs will be made absolutely free of charge, and there is no charge for their publication in The Briscoe County News. Proofs will be shown, and from these you may select the picture of your child which you would like to appear in this newspaper. If you wish extra photographs they may be purchased, but no purchase is necessary in order to have your picture printed in this newspaper, or in order to compete for the prizes. It is entirely up to you, whether you buy pictures or not.

There is no age limit on the contest, and every child's photograph in this section is wanted so that they may all appear in The Briscoe County News. However, it is necessary that all of the pictures must be of uniform size, so they must be made by Winston B. Lucas, photographer, on Monday, July 14.

Don't wait until little Mary gets married or baby brother is elected to some political office to get their pictures in the paper—make plans now to have those photographs made on Monday, July 14. Tell your friends and neighbors. The more, the merrier!

See our advertisement in this issue for additional information.

Mrs. Jake Saddler, of Dallas, and Mr. and Mrs. Garner Guest and family of Lubbock, spent last week with their mother, Mrs. J. R. Guest.

Mr. and Mrs. Keltz Garrison and boys, of Crosbyton, spent July 4 in the home of his parents, Mr. and Mrs. C. C. Garrison.

Mr. and Mrs. Jimmy Tidwell and family, of Hobbs, New Mexico, spent the holiday in the home of her parents, Mr. and Mrs. R. C. Hutsell.

Mr. and Mrs. R. C. Guest and son, Dick, of Levelland, spent July 4th with their daughter and sister, Mr. and Mrs. R. E. Hutsell and family.

Mr. and Mrs. Berton Hughes and boys had as their July 4th weekend guests Mr. and Mrs. Hubert Hall and girls of Memphis and Mrs. Hughes' parents, Mr. and Mrs. R. E. Renfro and brother, Gayle, of Woodbine, Texas. Mrs. Hughes and boys accompanied her parents home for a weeks visit.

## Game and Fish Commission Meet Here July 15th

For the third consecutive year, the Texas Game and Fish Commission will hold public meetings throughout the Texas Panhandle beginning Monday night July 7th. The purpose of these meetings is to afford landowners, hunters, and fishermen the opportunity to discuss hunting and fishing regulations with representatives of the Game Department.

Under a law which went into effect September 1, 1950, the Texas Game and Fish Commission is instructed and empowered to prescribe the open seasons, bag-limits, and the means and methods of taking game and fish surpluses in the twenty-eight county area of the Panhandle including Motley and Cottle Counties and all Counties to the north thereof. All interested persons are urged to attend the meeting for their county.

The schedule of the meetings is as follows, and unless otherwise stated, will be in the County Courthouse beginning at 8:00 p. m.

Tuesday, July 15th: Silverton for Swisher and Briscoe Counties. Meeting called for 8:00 p. m. Matador for Motley County.

## Many Briscoe People Spend July Fourth in Clarendon

Among those attending the 4th of July celebration at Clarendon were:

Gloria June Stevenson, Joy Chitty, Mr. and Mrs. Don Burson, Wayne Hamilton, Mary Lou Bellinger, Pat Northcutt, Wayne McMurtry, Mary Dudley, Carol Davis, Larry Tunnell, Mr. and Mrs. Billy Ellis, Edd and Ted Bomar.

Glen Watters, Mr. and Mrs. Winston Hamilton, Melvin and Freddie, Jim Baird, Sybil Watters, Mr. and Mrs. Gene Morris, Bonnie Watters, Walter Watters, E. W. Yancy, J. C. Fowler, Norman Jasper, Mr. and Mrs. Pete Chitty and La Quetta.

Mr. and Mrs. Bobby McWilliams, Mr. and Mrs. J. W. Brannon, Jr., Mr. and Mrs. Fred Brannon, Mr. and Mrs. Warner Reid, Mike and Sue; Mr. and Mrs. D. H. Davis, Mr. and Mrs. Bob Hill, Robert Haley and Sue, C. L. Dunn, Mr. and Mrs. Snooks Baird, Mr. and Mrs. Euster Wilson, Bradford and Jimmy Don; Mr. and Mrs. Johnnie Burson and family, Mr. and Mrs. Arthur Arnold and Walter, Mr. and Mrs. Wade Welch, Mr. and Mrs. Morris Stevens, Billy McWilliams, Carroll Welch, Lynn Welch, Roy McMurtry and others.

Mr. and Mrs. Mart Hyatt of Tulla, Linda Kay Rogers of Tulla, and Mrs. Lucile Simmons of Harlingen, Texas visited in the home of Mr. and Mrs. W. J. Hyatt Tuesday.

Guests in the home of Mr. and Mrs. Milton Dudley on the 4th of July were: Mr. and Mrs. W. H. Graham, Jr., of Farwell, Mr. and Mrs. Arnold Brown, James and Rita, and Mr. and Mrs. Norman Dudley.

Mr. and Mrs. Fred Mercer, Junis, Mike and Anne were in Ruidosa, New Mexico, over the weekend.

Mr. and Mrs. Ralph Dudley, Ray and Murna, of Texas City, were here Monday and Monday night visiting his brother and family, Mr. and Mrs. Milton Dudley. They went to visit relatives in Littlefield Tuesday.

Roy Hyatt of Levelland, Mr. and Mrs. Herb Binck and son of Plainview, and W. J. Hyatt attended a Turner Reunion in Quitman, Texas Sunday.

G. R. Dowdy took a group of boys to the Baptist Intermediate Camp July 7 through the 8th.

## Bever's Funeral Rites Saturday in Plainview

Funeral services for J. M. (Jim) Bevers, 67, resident of Plainview for more than a quarter of a century, were conducted at 4 p. m. Saturday in the First Baptist Church of Plainview.

Rev. J. C. McCarty, pastor of the Lubbock Calvary Baptist Church, officiated.

Beavers died about 3 p. m. Thursday of a heart attack. He was walking across the street in the 300 block of West Sixth when he collapsed. He was pronounced dead upon arrival at the Plainview Hospital and Clinic Foundation.

Survivors are his wife and four sisters. Mrs. W. P. Moore, Mrs. Annie Parker, Mrs. Fannie Jackson, and Miss Susie Bevers.

Bevers' death occurred three months to the day of that of his daughter, Mrs. Vera Pearl Allard. Interment will be beside her grave in the IOOF Cemetery.

Those attending the funeral services from here were: Mrs. W. Allard, Mrs. Perry Whittemore, Mrs. C. O. Allard, and Mr. and Mrs. Dean Allard.

Elmer Allard, of Fort Sumner, New Mexico, returned to Silverton with the family and stayed until Sunday afternoon. He returned to Plainview Sunday.

## Wanda Sue McDaniel Is Honored With Birthday Picnic

Wanda Sue McDaniel was honored Thursday, June 26, with a birthday picnic in the park.

Those helping celebrate were La Quetta Chitty, Norma Faye Rowland, Travis Gilkeyson, Jerry Bingham, Anita Stout, Nancy Brooks, Mike Simmons, Jo Lynn Womack, Lela Faye Sweek, Mona Kay Mayfield, Robert Hughes, Barbara Kay Fisch, Jimmy Neil and Diane Raynolds, Sandra and Peggy Mercer, Cathy and Sandy Norvell, Beckey and Sheryl Cowart, Reba Joe and Daryl Maples, and Jimmy and Monte Smith.

Those helping and mothers attending were: Jo Ann Rowland, Faye Ruth Bingham, Linda McDaniel, Mrs. Jim Stevenson, Mrs. G. Mayfield, Mrs. Vinson Smith, Mrs. Charles Cowart and Mrs. Bob McDaniel.

Mr. and Mrs. Mart Hyatt of Tulla, Linda Kay Rogers of Tulla, and Mrs. Lucile Simmons of Harlingen, Texas visited in the home of Mr. and Mrs. W. J. Hyatt Tuesday.

## Twenty-two Boys Attend F.F.A. Meeting July 7th

The regular July F. F. A. meeting was held Monday night, July 7. Twenty-two boys were present, but since twenty-three are necessary in order to have a quorum, no business could be transacted. It was recommended that Melvin Hamilton be chapter delegate to the State Convention.

There was considerable discussion on how to handle the soil conservation equipment furnished by the Caprock District so as to best benefit the local farmers. The chapter now has a new Handcock hydraulic controlled, land leveler which should be most helpful to irrigated farms. The lever and grass drill may be rented by contacting G. H. Bunch, chapter advisor, or Billy Ellis at the Silverton Farm Store.

Recreation activities included iced soda pop and comic films. The meeting broke up so that the armchair politicians could hear the Mac Arthur keynote speech.

A special meeting is to be called by President Red Stephens, soon to tend to vital business. If more boys don't show up, it is feared that Major must speak!

JACK GRAHAM, Reporter.

Mr. and Mrs. Ware Fogerson and family and Mrs. Florence Fogerson spent Friday in Matador with Mr. and Mrs. Riley Day.

Mickey Cornett, who is attending the State University at Austin, was home over the holidays.

Mr. and Mrs. G. W. Seaney had as their guests Sunday Mr. and Mrs. Cecil Seaney and family, Mr. and Mrs. Pascal Garrison and family, and Mr. and Mrs. W. A. Brown and family.

Mr. and Mrs. Kenneth Jones and family spent the holiday with Mr. and Mrs. Doc Wallace and family in Yates, Center, Kansas.

Mr. and Mrs. Wylie Bomar had as their Sunday dinner guests: Mr. and Mrs. Howard B. Stubblefield and boys, Mr. and Mrs. Noble Lyde and girls, of Lubbock and Mr. and Mrs. Brubs Bomar and children, of Tulla.

Guests in the home of Mr. and Mrs. J. S. Watson Sunday were: Mr. and Mrs. O'Neal Watson and family, of Amarillo, Mr. and Mrs. Carl Merritt, of Plainview, Mr. and Mrs. William Stapleton and Mrs. Una Burson. Donna Faye Watson remained here for a two weeks visit with relatives.

## SPICY SODA IS COOLING

ZEPHYR breezes, soft music and a delicious, refreshing drink—a perfect summer evening setting for enjoyment. Children and adults alike welcome such an evening after a strenuous day, and your guests will appreciate the hospitable atmosphere.

Two or three large bottles of pale dry ginger ale and a can or two of your favorite fruit juices cooling in your refrigerator make it possible to whip up excellent drinks quickly. Packaged ice cream stored in the freezing compartment is another item that makes the preparation of good drinks an easy matter. Ice cream

sodas, wonderful in flavor, and so cooling, can be made in a jiffy if the ingredients are on hand. Here is a refreshing drink, with milk as a base, that is splendid for children and will be well-liked by adults, too.

**Spicy Ginger Soda**  
1 cup homogenized milk  
Cinnamon and nutmeg  
1 pint chocolate ice cream  
Ice cold pale dry ginger ale

Combine milk and spices. Divide among 4 tall glasses. Place a large scoop of ice cream in each glass. Fill glasses with pale dry ginger ale. Stir gently to mix.

## PERSONALS

Mrs. Lee Perkins, who underwent surgery in Plainview was able to be brought home Thursday and is doing fine.

Mrs. Roy Bomar and daughter, of Lubbock, were here Tuesday on business.

Mr. and Mrs. Bobbie McDaniel, Jr., and children, from Amarillo, are here for a few days. Bobbie is receiving treatment for an infected eye.

Mr. and Mrs. Bud McMinn and Mr. and Mrs. Travis McMinn visited Mr. and Mrs. Elma Seane, of Morton, Sunday. The group attended church Sunday morning at Carsey, New Mexico where they heard Roy Dean Seane preach.

Mr. and Mrs. R. N. McDaniel, Faye Ruth Bingham and Linda Beth McDaniel, spent Sunday in Clarendon.

Mrs. Ada McDaniel returned with her daughter, Mrs. Ray W. Crouch, to Mena, Arkansas for a month's visit. They left this week.

Mr. and Mrs. Robert Head, of Fort Worth, came Saturday to visit his sister, Mrs. Francis Christopher. Saturday Mrs. Christopher accompanied her brother to Andrews, Texas where they visited his son and family. Mr. and Mrs. James Head. They also visited in Big Spring, Texas while on the trip.

Mr. and Mrs. Ware Fogerson made a business trip to Amarillo Thursday.

## First Submarine Wooden Barrel, Coopers Declare

LOUISVILLE, Ky.—A wooden barrel nearly changed the course of the American Revolution.

Researchers at a distillery company cooperage plant here, who have gathered one of the world's largest libraries on the subject of cooperage, tell of an incident on September 7, 1776. George Washington and his troops had just suffered a decisive defeat in the Battle of Long Island and had withdrawn from Brooklyn to Manhattan. New York harbor was jammed with British shipping.

### First Submarine

At this point David Bushnell, a cooper, came forward with an ingenious device. It was the world's first submarine, and it was fashioned from nothing more than a coopered wooden barrel. Aply named the "Turtle," it had rounded ends and oak staves bound together with iron hoops. Two water-ballast tanks were provided to allow the submarine to submerge and two detachable weights on the hull permitted surfacing. Three hand-cranked propellers were used for vertical and horizontal movement.

Bushnell was many years ahead of his time in inventive genius, and he had incorporated many important firsts in his submarine: first depth gauge, first screw propulsion, first luminous dial, first water-ballast tanks, first delayed-action bomb, and the first underwater firing device.

Attached to the outside of the barrel was a smaller keg containing 130 pounds of gunpowder and a flintlock worked by a timer. A crank inside the submarine operated a large screw projecting from the lid of this smaller barrel.

In theory the "Turtle" would work its way under a British warship and the screw on the powder keg would be thrust into the ship's bottom. Once the keg had been securely attached to the target, the submarine would cast off and make its escape. The timing device exploded the bomb 30 minutes later.

### Plan Failed

The "Turtle" made its combat debut on the night of September 7, 1776, with a one-man crew—Sgt. Ezra Lee. Guiding himself by compass and cranking away with patriotic fervor, Lee headed for the British fleet. He failed to reckon with the strong tides, however, and when he finally surfaced for a quick look around, he found himself many miles down New York bay.

Patiently Lee cranked his way back to the target. Then he made a second mistake. The British ship he chose to sink had a metal bottom! After several attempts to screw the magazine into the metal, he gave up and headed for home.

A month later, a second attempt was made. Not trusting Lee's navigation, the Americans loaded the "Turtle" aboard the sloop "Nancy" to carry it in close to the British ships. Disaster again struck. The tides carried the "Nancy" too close to the alert British guns and a lucky shot sank her. She carried the world's first submarine with her to the bottom of New York harbor.

## Bees Need Not Sing 'Show Me Way Home'

What is polarized light and how do bees use it to find their way home? Ordinary light consists of vibrations from side to side, up and down, and in other directions as well. By passing it through a polarizing screen (such as a polaroid filter) only the vibrations in one particular direction pass through. Such light is said to be polarized.

As sunlight passes through the atmosphere high overhead air molecules scatter some of its rays, particularly those of blue light, thus giving the sky its blue color. Such scattered light is partly polarized, principally in a line at right angles to the direction of the sun.

Experiments made by an Austrian scientist named von Frisch indicate that bees can detect polarized light. By observing patches of blue sky, they may thus be able to tell the sun's direction, and so orient themselves.

The national bureau of standards has developed a compass, for aircraft use, which determines the polarization of sky light, and so gives the direction of the sun, even though it may be below the horizon.

## Pup Eats Poisoned Rat, Glass; Bathed in Washer

HOUSTON, Texas—Tony, three-month-old bulldog rat terrier, leads a charmed life.

First he ate half of a poisoned rat before his owner, Mrs. Roy Willette, spotted him and took him to have his stomach pumped out.

The next day he ate some glass while licking milk out of a broken milk bottle. Back he went to the veterinary again.

The next day, when his three year-old master, Roy, Jr., decided to give Tony a bath, the family's automatic washer was the youngster's first thought.

By the time Mrs. Willette rescued him from the washer, Tony was clean but limp. It took artificial respiration to revive him.

## Rockies Were Once A Great Depression Full of Sea Water

CINCINNATI—How the Rocky mountains were formed by a great "squeezing" process was described by Dr. Charles F. Deiss, head of the Indiana university geology department, Bloomington, and state geologist of Indiana, here at the annual banquet of the University of Cincinnati chapter of Sigma Xi.

The site of the Rockies was originally a great trough, or depression, extending from Mexico northward into Canada, Dr. Deiss said. He is widely recognized as an authority on the stratigraphy, structure, and paleontology of this western mountain area.

This trough, which had been repeatedly filled with ocean water, contained vast beds of mud, lime, and sands which hardened into shales, limestones, and sandstones.

Dr. Deiss described how, first about 500 million years ago and again about 60 million years ago, by a process not yet fully understood, this trough was squeezed from east to west. The rocks in it were broken and thrown into great folds and elevated into mountains. Millions of years of erosion by water and geologically-recent glacial ice carved the peaks of the Rockies into their present sharp outlines, he explained.

The weathered debris from this erosion process has formed the great plains east of the Rockies, Dr. Deiss pointed out. He discussed in detail the mechanics of the formation of the Rockies and the rock structures that resulted.

## Och, Mon! GI's Form Yankee Bagpipe Band

LONDON—The United States army has formed a bagpipe band with Yankee kilts. "Och, mon, but it canna be true," was the reaction of Scots.

London newspapers printed the news in angry headlines.

Said the Sunday Chronicle: "The Pipers Are Coming—and How and How Yanks' Kilty Band Steals A Tartan."

"GI's Bag The Pipes and A Royal Tartan," growled the Sunday Graphic.

"The Pipers' Lament," mourned Reynolds News.

The Scots said it wasn't just that the Americans have formed a pipe band, although they shudder at the name, "The Kilty Band." In fact, the Scottish borderers loaned one of their pipers as an instructor to the U.S. army's second division band at Fort Lewis, Wash. The division is in Korea where, London papers say, the kilt band is being formed.

What pains the Scots is the Yanks' choice of the royal Stuart tartan as the cloth pattern for their kilts. This particular tartan is reserved to the pipers of five royal Scottish regiments—only some 200 men in the British Army. The British royal family has worn the tartan since the time of the Stuart Kings. And only the reigning monarch as a special honor can confer the right to wear the Stuart tartan on others.

## Thirsty States Study New Water De-Salting

BOSTON—A meeting of the American Development Corp. heard of a new way to de-salt sea water at one-third the cost of present ways.

Dr. Edwin R. Gilliland, president of Ionics, Inc. said the new process, based on the use of electrical energy with new synthetic membranes, would provide relief in sections of the country now short of fresh water supplies.

The new development, Gilliland said, also indicates hopes of making deserts in this country, Australia, the middle east and Africa available for cultivation.

Gilliland said the power cost alone of producing fresh water from sea water would amount to 6 cents a thousand gallons—and the total cost, including equipment, would be in the range of 10 to 20 cents a thousand gallons.

The process of de-salting the sea water was not divulged. As a picture of what happens, Gilliland said the synthetic membranes—which have been on the market for several years under the name of permionic—are involved in a chemical process called "ion exchange."

## Marriage Puts Parolee Back Behind Jail Bars

PORTLAND, Ore.—Matrimony landed Jewell Chester close in prison again, because he was on parole at the time; his parole officer had told him not to wed, and he got married—to the warden's secretary, Anne Carty, 38.

Close, 39, was a trusty at the state penitentiary in Salem when he first saw her. Love had him by the time he was paroled, and, despite his parole officer's warning, he married her.

The state parole board said it just could not condone this. He already had ignored orders not to drink or drive a car, the board said.

So it revoked his parole. He has two years remaining of a three year term for passing bad checks.

What's more, he won't be near his bride at the prison. She already has submitted her resignation.

## Legal Notices

### CONTRACTORS' NOTICE OF TEXAS HIGHWAY CONSTRUCTION

Sealed proposals for constructing 13.925 miles of Gr., Strs., Flex. Base & Two-Crs. Surf. Treat. from SH 86 east 13.9 mi. on Highway No. SH 256, covered by S 1562 (1), in Briscoe County, will be received at the Highway Department, Austin, until 9:00 A. M., July 16, 1952, and then publicly opened and read.

This is a "Public Works" project, as defined in House Bill No. 54 of the 43rd Legislature of the State of Texas and House Bill No. 115 of the 44th Legislature of the State of Texas, and as such is subject to the provisions of said House Bills. No provisions herein are intended to be in conflict with the provisions of said Acts.

In accordance with the provisions of said House Bills, the State Highway Commission has ascertained and set forth in the proposal the wage rates, for each craft or type of workman or mechanic needed to execute the work on above named project, now prevailing in the locality in which the work is to be performed, and the Contractor shall pay not less than these wage rates as shown in the proposal for each craft or type of labor, workman or mechanic employed on this project.

Legal holiday work shall be paid for at the regular governing rates.

Plans and specifications available at the office of James F. Potts, Resident Engineer Floydada, Texas, and Texas Highway Department, Austin. Usual rights reserved. 27-2tc

# SOUTHWESTERN PUBLIC SERVICE COMPANY

27 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

**Number of Vets in Nation Increases in Recent Years**

An increase of approximately 33 per cent in the number of veterinarians in the United States has occurred during the past 10 years, according to a nation-wide survey of the profession.

In 1942 there was approximately 12,500 veterinarians in this country. In 1952 there were approximately 16,000.

The substantial increase that is taking place is largely the results of two factors. One is the broadening demand for veterinary medical service, not only to meet the needs of the nation's expanded livestock population, but also in such fields as research, public health, quarantine work, and in education. The other factor is the substantial increase in the number of schools of veterinary medicine. In the past 10 years seven new veterinary schools have been established in the United States making a total of 17 approved colleges in this country, plus two in Canada.

Approximately 1,800 men graduated with degrees in veterinary medicine from these schools in the last two years.

The five states having the largest number of veterinarians are: California, 1,172; New York, 1,084; Iowa, 962; Illinois, 944; and Ohio, 903.

**Average State Government Spends \$100.35 Per Capita**

According to the Bureau of the Census, the average state government received slightly more money per capita than it spent in 1951. The average state received a total of \$103.52 per capita from all sources and spent \$100.35. Average state debt was \$41.36 per capita.

The highest per capita revenue was in Nevada, where the state received \$198.22 per person. Expenditures came to \$180.40 per capita. Other states with total revenues in excess of \$150 per person were Washington, Wyoming, New Mexico, Louisiana, Montana, Oregon and California.

The highest per capita expenditure was in Washington, where the state spent a total of \$207.63 per person. The highest per capita debt outstanding at the end of the state's fiscal year was in Delaware—\$260.83.

In 1951, the state government which was the most profitable on a per capita basis was New Mexico, where revenue exceeded expenditures by \$26.07.

**New Drug**

Members of the New York State Medical Society recently witnessed a demonstration of a new drug that deadens pain for 10 days after surgery. The drug, a local anesthetic, numbs the nerves. It is injected at the site of the operation, or into nerve trunks that lead to the site. By the time effects of the drug wears off the wound often no longer hurts. In some cases it has banished pain for two weeks, and some patients have never even known they had an operation. In chest and abdominal operations, the freedom from pain allows patients to get up and move much earlier than usual, and this early movement is good medicine itself. Also there is less chance of lung congestion or other complications, because patients avoid breathing deeply or coughing in order to escape pain. Patients need no narcotics to deaden pain after the drug is used.

**New Wood**

Yale scientists report the discovery of a new tropical wood that may be a boon to the stenographer. It is of extreme durability and almost immune to abrasions, scars or splinters. For that reason could be used for the manufacture of legs or posts of office furniture and keep the girls from snagging their stockings. It is commonly known as bulletwood and is one of 75 species of hardwoods being tested for the Navy. It is so durable, the scientists report, that buildings using bulletwood timbers erected in Puerto Rico around 1500 have stood up to tropical weather for over 400 years. It is said to be more than twice as strong as white oak, the most widely used North American hardwood. It is dark red but is plain, not highly figured like mahogany, and it can be machined to an extremely smooth finish.

**Veteran Like Oak**

The giant live oak, known as the Lover's Tree, at Brunswick, Georgia, was a veteran in 1838 when the British occupied that area. The tree is famous as one of the largest of its kind in the south, with a trunk diameter of 13 feet, three feet above the ground. At that point it branches into 10 limbs, each measuring from 12 to 30 inches in diameter. The Lover's Oak was so named because Indian braves and their maidens were said to have met beneath its branches long before the coming of the white man to Georgia.

**Paris Is Plastered**

The city of Paris, France, rests on beds of gypsum, the mineral which is converted into fire-proof plaster and wallboard the world over. Since the gypsum plaster can be set quickly, doctors for years have used it to make surgical casts for broken bones, hence "Plaster of Paris."

**Bamboo, Herole-Size Grass, Finds New Use in Industry**

Modern industry is beginning to experiment with the commercial possibilities of bamboo.

Several pulp and paper companies in the United States have started plantations. A new method of fastening sections of bamboo together may lead to more and better bamboo furniture, trellises, toys, sporting equipment, and innumerable other practical items.

America has 70 species and is second only to southern Asia as a home of bamboo. The giant grass grows mostly in California and along the Atlantic Coast as far north as New England.

In the tropics bamboo growth has been measured at 16 inches in 24 hours. In the temperate zones the hardy species thrive almost as well. Taken with its beauty, people have planted a bamboo hedge or clump and have soon had to use jungle tactics to keep it in bounds.

Bamboo grows quickly, densely, and gracefully. The tough but pliable stems resist even hurricanes. The roots are like underground stems. Unless cut back continually, they spread in all directions, sending up new growth. Every spring long lines of bamboo shoots march in Indian file across lawns and flower beds.

**200-Year-Old Globe Is Found in Northern Canada**

A globe, its names faded and most of the mapped outlines indistinct, has turned up in northern Canada. It is estimated to be 200 years old.

The globe was made during the reign of George III, and considering its age, is in good condition. Continental outlines are much the same as on modern maps, but the interior and western section of North America is almost a blank. The title piece on the globe reads: "To His Most Sacred Majesty George III, King of Great Britain," etc.

"This new globe of the earth correctly laid down according to best observations and latest discoveries is most humbly inscribed by His Majesty's dutiful and obliged subject and servant D. Adams."

On the old globe the Northwestern United States is called New Albion; Northern Quebec and Labrador are included in New Britain; Australia is called New Holland; the Indian Ocean is known as the Eastern Ocean; New England is marked as well as Virginia, North and South Carolina, Maryland, Florida and Georgia.

**Lemmings Studied**

A systematic study of the varying lemmings, among the world's most curious rodents, now is under way at the Smithsonian Institution. The nucleus of this study is a collection, probably the most complete in the world, of several hundred specimens obtained in northern Canada and Greenland. Lemmings are short-tailed mouse-like rodents that inhabit the Arctic tundras. The "varying" lemming is brown or gray in summer and pure white in winter—the only rodent known that makes such a change. The American lemmings undergo great variations in numbers. Over a period of about four seasons they increase until there are literally billions of them that overrun the northern tundra. Then, for some unknown reason, in a single season, the majority of them die. Their bodies litter the ground and the banks of streams and ponds.

**Peary Cache Found**

supply cache left by Rear Adm. Robert E. Peary during his polar expedition in the early 1900s has been found by an Air Force crew. It was found on the northern tip of Ellesmere island where the Peary expeditions left the last land to start a 500-mile trek over ice to the North Pole. The 1909 expedition reached it. The cache contained names and dates between 1900 and 1909. There were four metal and wood boxes, their position marked by broken sled runners. The fliers who made the discovery were on one of the Air Force's flights to the ice islands in the Arctic Sea.

**Stamp Collector**

The world's most fabulous stamp collection was that of Count Philipp Renotierre von Ferrary, a rich Austro-Italian who was born in 1848. For 40 years he kept two secretaries busy buying and taking care of his huge collection. He almost never sold any of his stamps. He lived in Paris and upon his death in 1916 it was found that he had left his stamps to the Imperial Postal Museum in Berlin. The French government, however, refused to allow this bequest, and instead appropriated the stamps for war reparations. The great collection was broken up and sold for \$1,632,524 at a series of public auctions.

**Visual Problems**

A recent survey reports about four out of 10 children are handicapped in school performance by visual problems. When they enter the first grade about 25 per cent have visual handicaps. The proportion rises almost steadily and at the end of the eighth grade it is up to 53 per cent. These figures are based on a study of all school children in Peoria, Illinois, and they parallel results found in a number of other visual surveys.

**PICNIC ENJOYED BY  
CLASSES OF FIRST  
BAPTIST CHURCH**

The Young Peoples Class and the Young Married Peoples Class of the First Baptist Church enjoyed a picnic supper and skating party in Plainview Thursday night.

Those attending were: Rev. and Mrs. G. A. Elrod, Mr. and Mrs. Lee D. Bomar, Gloria June Stevenson, Peggy Holt, Peggy Lanham, Billy Tension, Joe Bomar, Wayma Calloway, Mr. and Mrs. Billy Ellis, Mr. and Mrs. George Wayne Rampley, and Mr. and Mrs. Loyd Stephens.

**PERSONALS**

Jack Wright, who was transacting business, last week, for the Governments Defense Electrical Power in the Southwest, spent Saturday with his parents, Judge and Mrs. Clyde Wright. They took him to the Lubbock airport Sunday night to catch his plane back to Washington, D. C.

Visitors in the Clyde Wright home Thursday and Friday were: Mrs. Wright's brother and his wife, Mr. and Mrs. Clyde V. Gregg of Borger, Texas, and Mrs. Stella Dunlap, of Portland, Oregon. Mr. Harry Seed, brother-in-law of the Wrights and the Greggs, came from Hereford to spend July 4 with them.

Mr. and Mrs. Clyde Wright were in Hobbs, New Mexico on business Saturday.

Mr. and Mrs. A. P. Dickerson left Tuesday morning for Dallas where they will visit their son and daughter.

Mr. and Mrs. J. H. Honsucker and children, of Amarillo, were guests in the home of Mr. and Mrs. Leo Comer Sunday.

Mr. and Mrs. Clyde Mercer, Mr. and Mrs. Charles Francis, and Mr. and Mrs. Irvin Francis spent the past week in Red River, New Mexico.

Mrs. J. N. Smithee, of Ropesville, and Mrs. Ross Dickerson, of Washington, D. C., visited with Mr. and Mrs. Bob Dickerson and Mrs. W. A. Dickerson Monday.

Mrs. Clyde Mercer and Mrs. Charles Francis made a business trip to Amarillo Tuesday.

Rev. and Mrs. G. A. Elrod visited the General Camp at Plains Baptist Assembly Tuesday. In the afternoon they made a business trip to Lubbock.

Mr. and Mrs. Grady Wimberly made a business trip to Amarillo Monday.

**Cotton is Now Money  
Crop in California**

Cotton, a comparative newcomer to west coast agriculture, has become California's biggest money crop, surpassing even grapes and citrus fruits.

A recent survey, says the National Geographic Society, estimates the value of California's 1951 yield of 1,770,000 bales of cotton at \$425,000,000.

The California crop was second only to Texas production of some 4,100,000 bales last year. But it was produced on 1,290,000 acres, as compared to 11,800,000 acres devoted to cotton in the Lone Star state. Even with this high yield, averaging 657 pounds per acre, California was second to Arizona in production per acre, Arizona averaging 740 pounds.

The large crops per acre in Arizona and California are achieved by irrigation, which supplies the right amount of water to rich cotton lands at just the right time, plus careful cultivation and scientific farming generally.

Mississippi, a traditional cotton state, produced 1,620,000 bales last year, ranking third, behind Texas and California. Close behind was Arkansas, with 1,255,000 bales.

**'Watermelon Bank' Set Up  
To Aid Leukemia Victims**

Two Little Rock business executives operate a "Watermelon Bank" for sufferers of two rare diseases. Watermelon juice is supplied free of charge for victims of leukemia (cancer of the blood) and nephritis (a kidney ailment).

It is not for sale. The bank keeps a stock of frozen watermelon juice on hand—just like a blood bank stores away blood plasma for emergencies.

The Watermelon Bank was conceived in 1949. Watermelon was sought for a Knoxville, Tenn., girl who had nephritis.

American Airlines at Knoxville messaged its offices at San Antonio in hopes of finding a melon. The airline office in Little Rock intercepted the message and found some frozen watermelon balls in the home freezer of one of its employees. They were flown to Knoxville.

From that experience the two business executives got the idea of the Watermelon Bank. The first year 150 quarts were gone before they got started good. Last year they put up 400 quarts.

**Atomic Skeleton Keys**

Skeleton keys of science made to order by America's atomic locksmiths are opening doors to new knowledge in many parts of the free world. These new keys are so-called isotopes, eccentric cousins of the ordinary elements of the earth. Some are radioactive, spitting energy as powerful radiation. Others are stable variants of the natural elements, important tools in nuclear research. Isotopes constitute the first major peacetime payoff of the ten-year-old atomic energy program. From Oak Ridge National Laboratory in Tennessee, center of U. S. isotope preparation and distribution, lead-lined containers and cotton-padded bottles carry these magic research tools to steaming jungles in Africa, to roaring mills in Pittsburgh and Detroit, and to quiet laboratories in scores of universities here and abroad. Since August, 1946, more than 22,000 shipments have been made.

**Flatiron Still Popular**

One of the oldest ironworks in the country still is turning out flatirons for faraway places. A Pennsylvania firm, it was founded in the early 1700s and the blacksmith shop that is still used as one of the original buildings. Until 1929 its principal product was the old-fashioned iron that is heated on top of the stove. But orders still abound for irons from women who live in parts of the country where there is no electrical supply, and from many foreign countries. A boon to the flat-iron business has been a recent fad to use the irons for doorstops, bookends, and desk ornaments. One warehouse was emptied recently to fill orders from gift shops in New York and other cities. There the irons are painted black and decorated with Pennsylvania-Dutch symbols.

**Pipes Betray 'Em**

A Canadian chaplain asserts that he can tell a man's character by the kind of pipe he chooses. He said he made these observations while distributing 200 pipes to a battalion of Canadian troops: The aggressive and the quiet soldier prefer the "bulldog" or short and stubby pipe. The humorous character seems to favor the curly-stemmed pipe. The serious, bookish type picks the long, thin stem with small bowl. The shrewd infantryman chooses a large-bowl pipe because it will make a fine borrowing pipe.

**Conventions**

Chicago is far ahead as host to political conventions. Of the 50 whoop-it-up gatherings, 21 have convened in centrally situated Chicago. That is as many as were welcomed by the next six cities combined. Philadelphia had seven, St. Louis five, Cincinnati three, Baltimore, Cleveland, New York, and Kansas City have each staged two. Six other cities have had a single burn with a convention.

**PERSONALS**

Mr. and Mrs. J. F. Cowars returned Saturday afternoon from Texline where they spent nine days in the home of Mr. and Mrs. L. H. McMurtry and family.

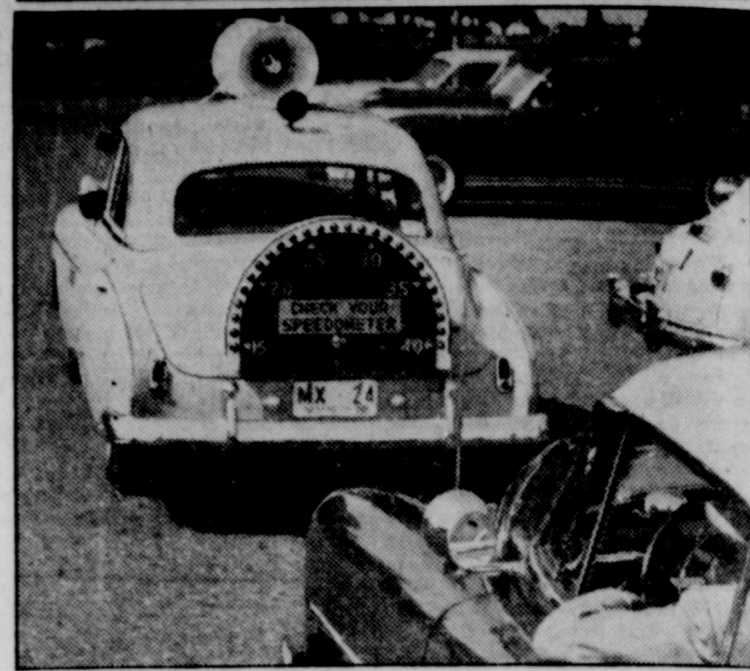

Mrs. Emma Waller and daughters, Mesdames Hugh Trussell and Robert Morton, of Kress, spent last Thursday with Mrs. Waller's sister, Mrs. T. L. Anderson.

Mrs. R. L. Campbell returned Monday from Hereford and Amarillo, where she visited her daughters, Mrs. Glen Burnett and Miss Roberta Campbell and Billy Bob. Miss Roberta Campbell brought her home and spent Monday night.

Guests in the home of Mrs. W. A. Dickerson Friday, July 4, were: Mr. and Mrs. Alan Dickerson, and Mr. and Mrs. John Tucker and girls of Lubbock.

Mr. and Mrs. John Henry Crow and baby, of Dallas, spent the holidays with his parents, Mr. and Mrs. Carl Crow. They went by Amarillo to visit her mother.

**Giant Speedometer Cuts Accidents**

To make motorists conscious of speed limits, the Seattle, Wash. police department has put into operation a Powerglide Chevrolet with a precise speed clock mounted at the rear. Flashing red and amber lights on the giant exterior dial reflect the speed recorded by the car's speedometer. Police drive the car around the city an average of 90 miles a day and report it has reduced accidents appreciably. Two-way radio and a loud-speaker system to caution drivers are included.

**IN BITING WIND AND COLD AND SNOW...** his numb fingers bent around an M-1 rifle...this soldier is living with the same hardships suffered by General Washington's troops at Valley Forge 174 years ago.

His equipment is immeasurably better than any those first Yankees could have dreamed of. His chances of survival are equally improved. But, like them, he is doing a grim, hard job for the defense of his country.

Defense is your job, too. It is your job to maintain and support America's economic strength as this soldier is supporting her military strength.

It's an easy job...and one of the best ways to do it is by buying United States Defense Bonds regularly. For with bonds and other forms of savings you are making yourself and your country stable and strong. And America must be kept strong—economically as well as militarily. For we must always remember... in this cold-warring world, *peace is only for the strong!*

**The U. S. Defense Bonds you buy  
give you personal financial independence**

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own can automatically go on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.31! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's too, buy U. S. Defense Bonds now! Bankers recommend them as one of the safest forms of investment.

**Peace is for the strong...  
Buy U.S. Defense Bonds now!**

To Buy, Sell, Trade or Rent - Try Want Ads

There was a young salesman named Ted, whose car ran him into the red.

Keeping it in condition Took half his commission.

His budget was worn to a thread!

Then I got Conoco's NEW 1-2-3  
**"50,000 Miles  
No Wear"  
Service!**

**HERE'S CONOCO'S "50,000 MILES—NO WEAR" SERVICE**

At proper intervals, Your Conoco Mileage Merchant will:

- 1 Drain out grit and sludge, preferably while the engine is hot!
- 2 Recondition all air and oil filters!
- 3 Fill the crankcase with great Conoco Super Motor Oil!

Now Ted is ahead... thanks to one of the greatest services ever offered the motoring public—a service that helps engines last longer, perform better, use less gasoline and oil!  
It's exactly the same service that kept test cars new in Conoco's spectacular "50,000 Miles—No Wear" road test!  
In that famous 50,000-mile test, with 1,000-mile drains and proper filter service, test car engines showed no wear of any consequence: in fact, an average of less than one one-thousandth inch on cylinders and crankshafts. Gasoline mileage for the last 5,000 miles was actually 99.77% as good as for the first 5,000. Now you can get this same 1-2-3 "50,000 Miles—No Wear" Service, at your Conoco Mileage Merchant's today!

**HELPS YOUR ENGINE LAST LONGER,  
PERFORM BETTER, USE LESS  
GASOLINE AND OIL!**

### SURPRISE PARTY HONORS MR. AND MRS. L. E. PAIGE

Mr. and Mrs. L. E. Paige were surprised Tuesday night with a party in honor of their 34th wedding anniversary given by their children, Mr. and Mrs. Donald Paige and Gwenlyn.

Mr. and Mrs. Paige were presented with a set of Franciscan pottery and other gifts.

The evening was spent playing forty-two and canasta. About twenty guests were present.

Refreshments of cake, punch, meats, and nuts were served.

Rev. G. A. Elrod and Buster Wilson accompanied sixteen boys to the Baptist Intermediate Camp Monday. S. P. Brown and G. R. Dowdy helped furnish transportation. Rev. Elrod and Mr. Wilson remained until Wednesday.

Mrs. Una Burson had as her weekend guests, Mr. and Mrs. Dock Jones of South Plains, Mr. and Mrs. William Stapleton of Denver City, and Mr. and Mrs. Carl Merritt, of Plainview.

Mr. and Mrs. E. E. Minter went to White Deer Sunday for their son, Gene, who had been visiting relatives. They also visited her mother, Mrs. J. L. Nelson.

Mrs. Cora Donnell returned recently from Amarillo, where she had been visiting her son, Mr. and Mrs. Deene Donnell, who have a new baby boy. She also visited relatives in Canyon.

Mrs. A. D. Arnold and sister, Mrs. J. M. Seago visited another sister, Mrs. W. P. Seago, in Dimmitt last Thursday.

Mr. and Mrs. Ray C. Bomar visited in Floydada Monday evening.

### Smithsonian Has Fantastic Collection of Serpents

Fantastic and deadly serpents of the Egyptian desert form a considerable part of a collection of 1,100 museum specimens of reptiles and amphibians at the Smithsonian Institution.

Many of the creatures included in the collection not only are weird and curious in themselves but have a place in classical folklore. This is particularly true of the snakes. The poisonous ones belong to two major groups—the cobras and the sand vipers.

Of the cobras perhaps the best known is the so-called spitting serpent, or "Libyan asp". It supposedly has the ability to spit in the eyes of its enemies, such as dogs, and its saliva temporarily blinds the victim.

The term "asp" was generally applied to the cobra, a sacred snake in ancient Egypt. There were said to be 16 varieties known to the ancients. Its form was included in the crowns of kings and queens. There is a fair possibility that one of the cobras found embalmed at Thebes was the snake that bit Cleopatra, although this may have been an even weirder and nearly as deadly creature, the horned viper.

### New Insecticide Kills Mites That Are Harmful to Fruit

Might against mite has brought one of the major rubber companies into the fight. It's a special biological warfare with a red enemy. The enemy is a tiny red mite, about the size of a pinhead.

Fruit farmers report that the red mites have multiplied tremendously since the introduction of organic insecticides. Until now agricultural interests never realized the importance of our insect allies that prey on and devour our insect enemies. It was discovered that the predatory insects were destroyed by insecticides.

Out of the research laboratories has come a new insecticide that is distinctly a mite killer. During the past year agricultural experiment stations from the Pacific coast to the Atlantic have given this new mite destroyer thorough tests. The red mite disappeared from the tested citrus groves in the West, and the apple orchards in the East. The insecticide is declared harmless to honeybees and other useful insects, as well as animals.

### Mimosa Is Aptly Named

The mimosa is a sensitive plant. If the pot is gently shaken, or if the leaves are lightly touched, the leaflets fold up and the leaves immediately bend downwards as if the plant were dying. The fumes of many chemicals, or even sudden changes in temperature or illumination, produce a similar effect. If the disturbance is brief, the plant returns to its normal condition in a few minutes, while if it continues, the plant may recover in spite of it. Then, however, the plant may collapse again when the disturbance is removed so the effect seems due to sudden changes in the condition rather than to the condition itself. The response of the plant is caused by the temporary removal of sap from certain cells at the base of the leaf stalk, where the presence of the sap normally keeps the stalk stretched out and rigid.

### Preparing Paint Brush

To get the best service from a new paint brush, treat it with oil before using it. If you put it directly into paint or enamel the paint pigment adheres to the bristles and is difficult to remove. Before putting the brush into oil, however, remove any loose bristles by rolling the handle of the brush between the palms of your hands. Then beat the bristles lightly across your fingers. Before using, suspend the brush in linseed oil. Be sure that the ends of the bristles do not rest on the bottom of the container. When you're ready to use it, remove the surplus oil by laying the brush on its side, then pressing a wooden strip heavily across the bristles, starting with the ferrule and working downward toward the tip of the brush until most of the oil has been removed.

### New Locomotive

A British railroad has put a new gas turbine locomotive into operation. It is the most powerful of the British railways system. The engine, 66 feet long, operates on the same principle as a turbo-jet plane engine. The gas turbine is made of three components—a rotary compressor which compresses air to 60 pounds pressure a square inch, a combustion chamber which burns regular diesel fuel oil and a turbine which the heated air expands to develop the necessary power. The locomotive requires half the weight and length of an ordinary diesel unit of the same power. Its maximum speed is 90 miles an hour.

**Most Durable Metal**  
Contrary to popular belief, there is no one metal which can be said to be the most durable. Steel, an alloy of iron with small amounts of carbon, is one of the most prominent of structural metals, used to support heavy loads. From the standpoint of resistance to corrosion, copper is a durable metal. So is lead, as well as the noble metals, gold, silver and platinum. Tungsten is very strong when made into wire.

### TEXACO TIPS

### PERSONALS

Mr. and Mrs. L. C. Yates received a message that their grand son, Richard Yates, was drowned Sunday afternoon when he was attempting to save the life of a friend. Mr. and Mrs. L. C. Yates, Mr. and Mrs. Riley Yates, and Mrs. Doyle Stephens attended the funeral services at Riverside, California, Wednesday.

Mrs. Lila Liles left Thursday for Las Vegas, New Mexico, to visit her son, Mr. and Mrs. Pete Liles.

Mr. and Mrs. Olen Cribbs, of Arlington, Texas visited her mother, Mrs. Mattie Perry, Friday night.

Mrs. Ed McDaniel and Mrs. C. R. Cowart took Mrs. C. L. Cowart to Plainview to an eye special 1st Thursday.

Mrs. H. A. Cagle and Mrs. C. R. Cowart were in Amarillo Monday on business and visiting friends.

Guests in the home of Mr. and Mrs. T. C. Bomar Sunday were Mrs. Emmett Bomar and Mrs. Pearl Simpson.

R. E. Brookshier made a business trip to Amarillo Thursday.

Mr. and Mrs. Edwin Dickerson, Mr. and Mrs. Roy Montague and Mr. and Mrs. George Long were vacationing in the mountains of New Mexico over the weekend.

Wallace Word, who has been visiting his father, T. J. Word and other relatives returned to his home in Austin Thursday.

Mr. and Mrs. F. C. Gatewood and Joy, spent the 4th in Amarillo visiting with Mrs. Annie Seymour.

### NOTICE !

There will be an annual Red Cross meeting at the court house Monday, July 14, 1952 at 8:00 p. m. The public is urged to attend this meeting.

MRS. LILY WOFFORD,  
Vice Chairman American Red Cross.

Gene Arnold from Union, South Carolina, and Mrs. J. M. Seago, of Shamrock, were guests in the home of Mr. and Mrs. A. D. Arnold last week.

Mr. and Mrs. Grady Wimberly and Mr. and Mrs. Harold Seefeldt and children visited Mrs. Curtis Wimberly and boys in Plainview Friday.

### RE-ELECT

**John B. Stapleton**

### DISTRICT ATTORNEY

An Experienced, Capable and Sincere Officer

JOHN B. STAPLETON

Your District Attorney is your highest prosecuting officer. It is his duty to prosecute all felony crimes such as murder, robbery, rape, kidnapping and burglary. You have no more important law enforcement officer.

Elect a man with 14 years experience as a lawyer and with a record of proven ability, integrity and accomplishment as a prosecutor and District Attorney.

### Re-Elect

# EVER BEEN COLD?

**E**VER BEEN COLD? Then imagine what it feels like to work out of doors in temperatures ranging to 40° below zero. For that's how cold it gets up in Alaska, at our advanced fighter bases guarding the northern air approach to America.

Here hundreds of men like this one keep a constant vigil, making certain that our planes are ready to repel any and all enemy invaders. For their job is to keep the peace.

But you and eighty-three million intelligent, thrifty Americans like you are helping keep the peace, too. For your regular purchase of U. S. Defense Bonds is building the great economic strength that backs up these men on the fighting fronts. Keeping America strong for peace—in a hostile world where *peace* is only for the *strong!*

And at the same time you make the safest investment in the world today. For Defense Bonds are as safe as America!

### The U. S. Defense Bonds you buy give you personal financial independence

Don't forget that bonds are now a better buy than ever. Because now every *Series E Bond* you own can automatically go on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.33! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's too, buy U. S. Defense Bonds now! Bankers recommend them as one of the safest investments.

**PEACE IS FOR THE STRONG...  
BUY U.S. DEFENSE BONDS NOW**

Species of Birds Have Sitters Care for Young

Humans are not the only ones that baby-sitters do for young...

Some of the most elaborate systems for caring for the young have evolved by the Adelle penguins...

These birds make their nests in the soil, lining them with moss...

When the young are partly grown the family unit breaks up...

Periodically they return with food for the young...

At the end of the season the young are left under the care of a mother bird...

Periodically they return with food for the young...

Water Forces Raise Lakes Water Level

America's five inland seas are rising over...

Remnants of the melting Ice Age, the Great Lakes contain half the fresh water on earth...

Levels of the Great Lakes fluctuate from year to year...

Experts say that all the works on the Great Lakes—dams, canals, dikes and dredging—affected water levels only a few inches over the last century...

One of the strange things of the Great Lakes area is that around deep-cratered water the earth's surface is gradually tilting...

On top of all this, the shark, unlike the fishes, is able to bear living young...

New Heat Pump

A heat pump has been designed that will keep homes comfortable throughout the year...

The refrigerant is run through a compressor that raises its temperature until it is hot to touch...

When the hot refrigerant is run through coils over which a stream of air is circulated...

The system will be perfected to the point where it can be applied on a large production scale.

Diamine Penicillin

Diamine penicillin, the new penicillin developed specifically for poultry...

Tests conducted at Washington State College. Scientists reported that broad-breasted turkey poultlets...

Second to diamine penicillin came procaine penicillin, which produced increases of from 37 per cent...

Pension Plans

More than 3,250,000 workers are covered by the 12,260 insured pension plans in force in the United States...

Annual income to be provided by these plans is at least \$1,125,000,000 annually...

Of those plans covered 695,000 workers. The number of plans had grown to 6,700 by 1945...

New Hormone

A new sex hormone which makes possible doubling the annual lamb crop in the United States...

Proven highly successful in treating sterility in cattle, swine and other domestic animals...

Smaller Trees Seen More Desirable for City Streets

Modern home architecture, featuring one-story ranch types and bungalows...

Modern roads, buildings and overhead wires have made living conditions extremely difficult for the tree giant...

The major stumbling block in the smaller tree program is the public concept that shade trees must be large enough to dominate street, yards and homes...

The expert says it will be far cheaper to maintain these new smaller types...

The expert says it will be far cheaper to maintain these new smaller types...

The expert says it will be far cheaper to maintain these new smaller types...

The expert says it will be far cheaper to maintain these new smaller types...

Nature's Greatest Enigma Is Shark, Scientist Says

Dr. Henry B. Bigelow of Harvard, the world's greatest authority on sharks...

The shark's first blessing, he says, probably is that it has no intelligence...

Second, the sharks have unexcelled senses of sight and smell to follow prey...

On top of all this, the shark, unlike the fishes, is able to bear living young...

The shark probably is about as evil as it looks...

False Barn Floor

A false barn floor made of wooden slats solved a tough calf raising problem for one Ohio dairyman...

Two years ago this farmer was plagued with pneumonia that was taking a heavy toll of his purebred Jerseys...

To reduce drafts and improve sanitation, he and his partner nailed one by three inch slats...

He cleaned the pens once every three weeks and the space between the false floor and the concrete barn floor three times a year.

Livestock Bruises

American livestock producers are being penalized a fortune every year because of careless handling in shipping livestock to market...

According to figures compiled at 51 key packing plants, the toll of shipping bruises sustained by hogs and mature cattle alone is nearly 20 million dollars annually...

Even this heavy loss does not include bruise losses to calves and sheep. Packers point out that these losses can be reduced by exercising greater care in handling and shipping animals...

New Type Mastodon

A University of California scientist has identified a new species of mastodon that roamed the North American continent some 15 million years ago...

The mastodon, represented by a pair of jawbones and tusks, was found in a stream near Baker, Oregon, about 25 years ago...

The species looked something like an elephant, but had tusks pointing up as well as down. It had a trunk and was a plant eater...

Coffee Used as Fuel

With the present-day cost of coffee, it is hard to imagine locomotives being fired with coffee bricks...

That was exactly what happened in Brazil several years ago when the bottom dropped out of the low-grade coffee market...

Thousands of tons of inferior coffee were on hand and no one wanted it at any price...

Giant Speedometer Cuts Accidents

To make motorists conscious of speed limits, the Seattle, Wash. police department has put into operation a Powerguide Chevrolet with a precise speed clock mounted at the rear...

DRINKS AND SNACKS FOR THE FOURTH

A HAPPY, care-free Fourth of July weekend can be yours. Of course you will have food on hand to feed your family regular meals, but see to it that there is an abundance of food and cold drink ingredients to take care of the off-schedule meals and snacks that will be required when the younger set pops in with the gang after their various activities...

PERSONALS

Guests in the home of Mr. and Mrs. Oner Cornett during the holidays were: Mr. and Mrs. J. Custer, of Petersburg; Mr. and Mrs. Bernice Welch and son, John Charles, of Wellington; Mr. and Mrs. Mack McDonald, of Liberty, Texas and Mickey Corbett, of Austin.

## PRICE DANIEL

OF LIBERTY COUNTY  
THE TEXAS CANDIDATE  
FOR U.S. SENATOR

He will fight for:

- ✓ House-cleaning of dishonesty and disloyalty
- ✓ Ending high taxes and wasteful spending
- ✓ Strong and stable preparedness program
- ✓ Positive and understandable foreign policy
- ✓ Restoration of our tidelands
- ✓ Prosperity without regimentation.

#### The Price Daniel Record

Attorney General of Texas, 1946-1952; crime-buster and leader of fight to save tidelands; Speaker, Texas House of Representatives before waiting exemption to enlist as private in World War II; only veteran in the race; married; 4 children; active in church and civic affairs; farmer and member of REA.

"We must get our country back to God, and our government back to the people."
