MILTON G. MORRIS

## Milton G. Morris Will Be Guest Speaker

The Silvertown Lions Club will meet Thursday night, and hold ladies night with a banquet. District Governor Milton G. Morris, of Canyon, will pay the club an official visit, and will be guest speaker for the evening. Other out of town visitors are expected to attend the banquet.

The club will be entertained forty minutes with a film showing the International Convention held at Mexico City last June.

At this meeting Governor Morris will present to Lion Tension a master key in Lionism; also he will present to Lion Alvin Redin the first key in Lionism. For perfect attendance he will award six buttons to the following: Lions Geo. Seaney, Fred Mercer, Leo White, Gordon Montague, W. H. Tension and Alvin H. Jackson.

Tickets for the banquet can be secured at the following stores: Seaney Hardware, Chapman-Minter Dry Goods, Nance Food Store, and W. H. Tension, secretary.

## Funeral Held for C. D. Hutsell Friday, Oct. 24 in Dallas

Funeral services were held at 2 p. m. Friday at Marrs-Mundy-Quill Chapel, Dallas, for Clifford D. Hutsell, brother of R. C. Hutsell, of Silvertown. Mr. Hutsell died of heart attack at his home Wednesday. He was buried at Restland Memorial Park.

A residential architect and builder, Hutsell was born in Grapevine, Texas. He lived in Carrollton before moving to Dallas thirty-five years ago. He originated much of Dallas' Spanish architecture, especially in the Lakewood Country Club district. The Rev. Harlin J. Roper, pastor of Schofield Memorial Church officiated at the services.

Surviving are his wife, Mrs. Florence Hutsell; son, Arlie E. Hutsell, both of Dallas; two daughters, Mrs. E. N. Rea of Le Mars, Iowa; and Mrs. William Boedecker, of Dallas; four sisters, Mrs. L. C. Trotti and Mrs. Minnie Howell, both of Dallas; Mrs. George Babb, of Amarillo and Mrs. Lula Smith, of Byers, Colorado; one brother, Clyde Hutsell, of Silvertown, Texas, and six grandchildren.

Mr. and Mrs. Hutsell made the trip by plane from Amarillo to Dallas where they attended the funeral, returning Monday night.

Rev. and Mrs. H. M. Secord attended a all day meeting of children workers of Northwest Conference at St. Johns Methodist Church in Lubbock last Thursday. Mary Alice Jones, of Nashville, Tennessee, head of childrens division was speaker. Mrs. Secord had charge of the round table.

Mr. and Mrs. W. W. Williamson, of Morton, visited his sister, Mrs. Lem Weaver last Thursday.

## American Legion Auxiliary Met With Mrs. Dena Wood

Mrs. of the American Legion Auxiliary met in the home of their president, Deana Wood, Tuesday evening, October 21. A brief business meeting was held. Delegates were appointed for the 18th District Convention to be held in Hereford.

A poppy committee was appointed and poppies are to be sold Saturday, November 8.

Plans were made for Christmas gift box to be sent to the Veterans Hospital. Mrs. George Seaney was appointed chairman of gift box. Anyone wishing to leave a gift, please leave it at Seaney Hardware before November 25, as this box must be in the Veterans Hospital not later than November 30. The box will be made up of toys of all kinds, dolls, baby clothes, pillow cases, scarfs, tea towels, hose, blouses, hand towels, luncheon sets, aprons and any other similar articles. The hospital chairman tells us that hand made articles always go first. Please keep this in mind and leave a gift.

Reporter.

## P. T. A. Will Hold Auction Sale November 1

If you are interested in helping the P. T. A. pay for the deep freeze for the school lunch room, you will have the opportunity by donating an article or articles to the P. T. A. auction sale to be held Saturday night, November 1, at the school carnival.

If you care to bring your article before that date you may leave it at the home of Mrs. Fred Mercer, president.

The following items are suggestive of the thing you might donate: Household items such as dishes, vases, notions, what-nots, food, canned, frozen or fresh, feed, bale of hay, peanuts, popcorn, linens, pillow cases, feed sacks, pot holders, aprons, etc. Also furniture, hardware and books.

We will appreciate any donation of any value. So won't you look through your white elephants and surplus products and help the P. T. A. pay for the lunch room deep freeze?

P. T. A. Publicity Chairman.

Luke Thompson and Buster Wilson were business visitors in Lubbock Monday.

Milt Jasper was a business visitor in Tulia Monday.

Mrs. V. R. Gardner, of Tulia, was an overnight guest of Mrs. Pearl Simpson Monday night.

## An Editorial for the Vote 'er Straight Individuals

Would it not be just as insane to continue voting like your sire and chain of grand sires, as to farm today as they did when they had nothing but a hoe to work with? Think well before you vote. Paid Advertisement.

## American Legion Fall Convention is Postponed

Mike M. McCully, 18th District Commander of the American Legion, Department of Texas, announced today that the Annual Fall Convention originally scheduled for November 8th and 9th in Hereford has been postponed until November 29th and 30th. The change in dates was necessitated by the over crowded conditions in hotels and tourist courts of Hereford during the gathering of their largest bumper crop of lettuce in Deaf Smith County history. Hereford officials indicate that the lettuce harvest will be completed before these dates.

Rev. Bill Arms, immediate past department chaplain of the American Legion, and pastor of the Gateway Baptist Church in Ft. Worth, will deliver the key note address of the convention on Sunday morning, November 30th. Rev. Arms is nationally known for his fight against the encroaching threat of communism in America. Recently, he and veteran members of his Ft. Worth congregation picketed a communist meeting in Ft. Worth, handing out brochures of the communist speakers background and playing the National Anthem and other patriotic songs from a sound truck.

American Legion membership is at an all time high for this date in the 18th District with the results of the Legion's "L" Day, which was proclaimed by Governor Shivers and the local mayors of hundreds of towns, not yet tabulated.

## ATTEND TEA HONORING MRS. RICHARD B. BOYD

Mrs. Joe H. Smith accompanied Mrs. Will S. Pool, Mrs. Ned Bradley, Mrs. C. A. Caffee, of Dougherty and Mrs. Brooks Bradley, of Dallas, to Amarillo where they attended a tea in the home of Mrs. Thomas J. Bood on October 25, honoring Mrs. Richard B. Boyd. Four hundred guests called during hours from 2 to 5:30 o'clock p. m.

## NEW GLASS DOORS ADD TO APPEARANCE OF COURTHOUSE

At a recent meeting of the County Commissioners Court a contract was awarded to install new double outside doors in the courthouse. Workers have been busy the past week installing glass doors, which add greatly to the appearance of the building.

## ATTEND FALL PRESBYTERIAL IN PLAINVIEW TUESDAY

Attending the fall Presbyterial meeting in Plainview last Tuesday were: Mrs. D. T. Northcutt, Mrs. R. G. Alexander, Mrs. True Burson, Mrs. Kemp Thompson and Mrs. Clyde Wright.

## SERVICES AT PRESBYTERIAN CHURCH SUNDAY

At the Presbyterian Church next Sunday, November 2, Rev. John Westhof, of Tulia, will conduct services at 3 p. m. Everyone welcome to come worship.

Mrs. Albert P. Dickenson, who has been in a Dallas hospital and in the home of her daughter, Mrs. George Terry, following major surgery, returned home Saturday with her son, Gene Dickenson, of Dallas.

Mrs. Minnie Duckett, of Tulia, spent the weekend with Mrs. Ann Alexander.

Mrs. V. R. Gardner, of Tulia, is visiting her sister, Mrs. R. E. Brookshier.

R. E. Brookshier and Dan Thompson made a business trip to Amarillo Monday.

## Silvertown Owls Rip Quitaque Panthers in Game Friday Night

The Silvertown Owls swooped down here Friday night to win a lopsided 34-13 victory over the Quitaque Panthers.

High point of the game came when Red Stephens, Owl half-back, took the ball in the third period and scooted 60 yards around the Panthers' left tackle to score.

The first Owl score came in the first quarter when Joe Brooks plunged through from the one-foot line and then ran the extra point. The Owls scored again when Freddie Hamilton ran around end from the one-yard line and converted with a quarterback sneak.

The Owls failed to score in the second period, but the Panthers' Joe David Payne dashed 10 yards around right end. Payne failed to convert.

In the third period, the Owls' Jack Williamson ran 20 yards around left end and Brooks ran the ball for the extra point.

The Panthers also scored in this period, with Randall Edelman going around left end for eight yards and then kicking the extra point.

In the final chapter, the Owls' Zephyr Bingham went 20 yards over left tackle to score, while Doyle Tiffin ran the extra point.

Mrs. Wayne McCutchen left (today) Thursday for Sanger, Texas, where she was born and reared to attend the home-coming there Friday. She will return home Sunday.

Mrs. Eunice Elkin and children and Mrs. D. F. Wulfman moved to their new homes in north Silvertown last week.

Mrs. J. W. McCracken and Mrs. Wayne McCutchen were visitors in Amarillo Monday.

Mr. and Mrs. Edgar Vickers, of San Angelo, spent the week end with his cousin, Mr. and Mrs. W. G. Byrd.

Among those attending the Eastern Star Convention in Amarillo this week were Mesdames R. C. Bomar, Dee McWilliams, Arnold Brown, James Davis, E. E. Minter, Carl Dean Bomar, L. D. Griffin and J. S. Fisher.

## Silvertown Owls Will Play Estelline Friday Night

The Silvertown Owls will play Estelline Fri. night at 7:45. Coach Brown said that Estelline's team is capable of beating anybody in the district. This game will be their third district game.

The Owls have won two district games, and since Estelline is the strongest team in the district this season, and from all indications there will be a huge crowd from Silvertown to see the game.

Visitors in the home of Mrs. R. L. Campbell Monday were: Mrs. Emma Waller and Mrs. Hugh Tussell and Mrs. Mary Morton and children, of Kress.

Mrs. Wylie Bomar and granddaughter, Camellia Comer, left Thursday for several days visit in Lubbock with relatives.

## MRS. A. H. CHAPPELL APPEARED ON LISTEN LADIES PROGRAM FLOYDADA STATION

Mrs. A. H. Chappell appeared on the "Listen Ladies" program over Floydada radio station Tuesday of this week. Mrs. Chappell read several of her favorite poems, one was "Tommy's Prayer," and she also read some recipes and thoughts for the day. We are looking forward to having Mrs. Chappell on our program again in the near future. She is one of our outstanding listeners the station manager said.

Sunday dinner guests in the Frank Fisch home were Mr. and Mrs. Edwin Mason, of Tiago, Texas; Mrs. Breland, of Plainview, Texas; Mr. and Mrs. Dock McGavock, Mr. H. T. Myers and daughters; Mr. and Mrs. Berle Fisch, Barbara and Linda; Mr. and Mrs. Bood Myers, Jimmie and Shirley.

Mr. and Mrs. J. F. Cowser and Mr. and Mrs. T. J. Hodges left Friday morning to visit relatives in Lamesa and Big Spring.

## Play at San Jacinto October 31st by School Children

The San Jacinto School children will present a play Friday night, October 31, at 7:30 p. m. title of play "Fun in a Chinese Laundry" promises to furnish plenty of entertainment during the evening. There will be no admittance charge.

This will be regular community party night and the club will elect officers for San Jacinto Community Club for the new year. Everyone is extended an invitation to attend.

Mrs. J. D. McIlroy, of Canyon, visited her sister, Mrs. Florence Fogerson and other relatives here from Monday until Wednesday.

Mr. and Mrs. Luke Thompson attended the funeral of Doyle Hawthorne at Memphis last Tuesday. Mr. Hawthorne and Mr. Thompson were cousins.

## Farmers Become Apartment-Dwellers

The city-dweller who succumbs to the back-to-the-farm urge today may find that he's living in an apartment just as if he had stayed in town.

Many modern farmers are taking to apartment living. There is plenty of space for separate houses, of course, but there are also plenty of big, old farmhouses. Farmers are finding it more economical to remodel them into apartments than to build brand-new dwellings.

### 60-Year-Old House Altered

The Dargel Farm in Sank County, Wis., is typical. Mrs. Clara Dargel Harrison, the owner, has remodeled her 60-year-old home to make a five-room apartment for another family with two children. Nine rooms are left in the rest of the house.

Cost of the new apartment was about \$1,200. It has a living room, two bedrooms, a kitchen, bath, and a large entrance hall. To accomplish the work, a section of the roof was raised. All rooms are on the second floor and are reached by outside stairs.

### Exterior Reconditioned

Mrs. Harrison accompanied the apartment-building with extensive reconditioning of the whole house. It was reroofed with fire-resistant asphalt shingles, a favorite material for this purpose because it can be applied directly on top of most old materials, eliminating the expense of tearing off the old roof. Plumbing was installed in both the house and the barn, and the house was repainted.

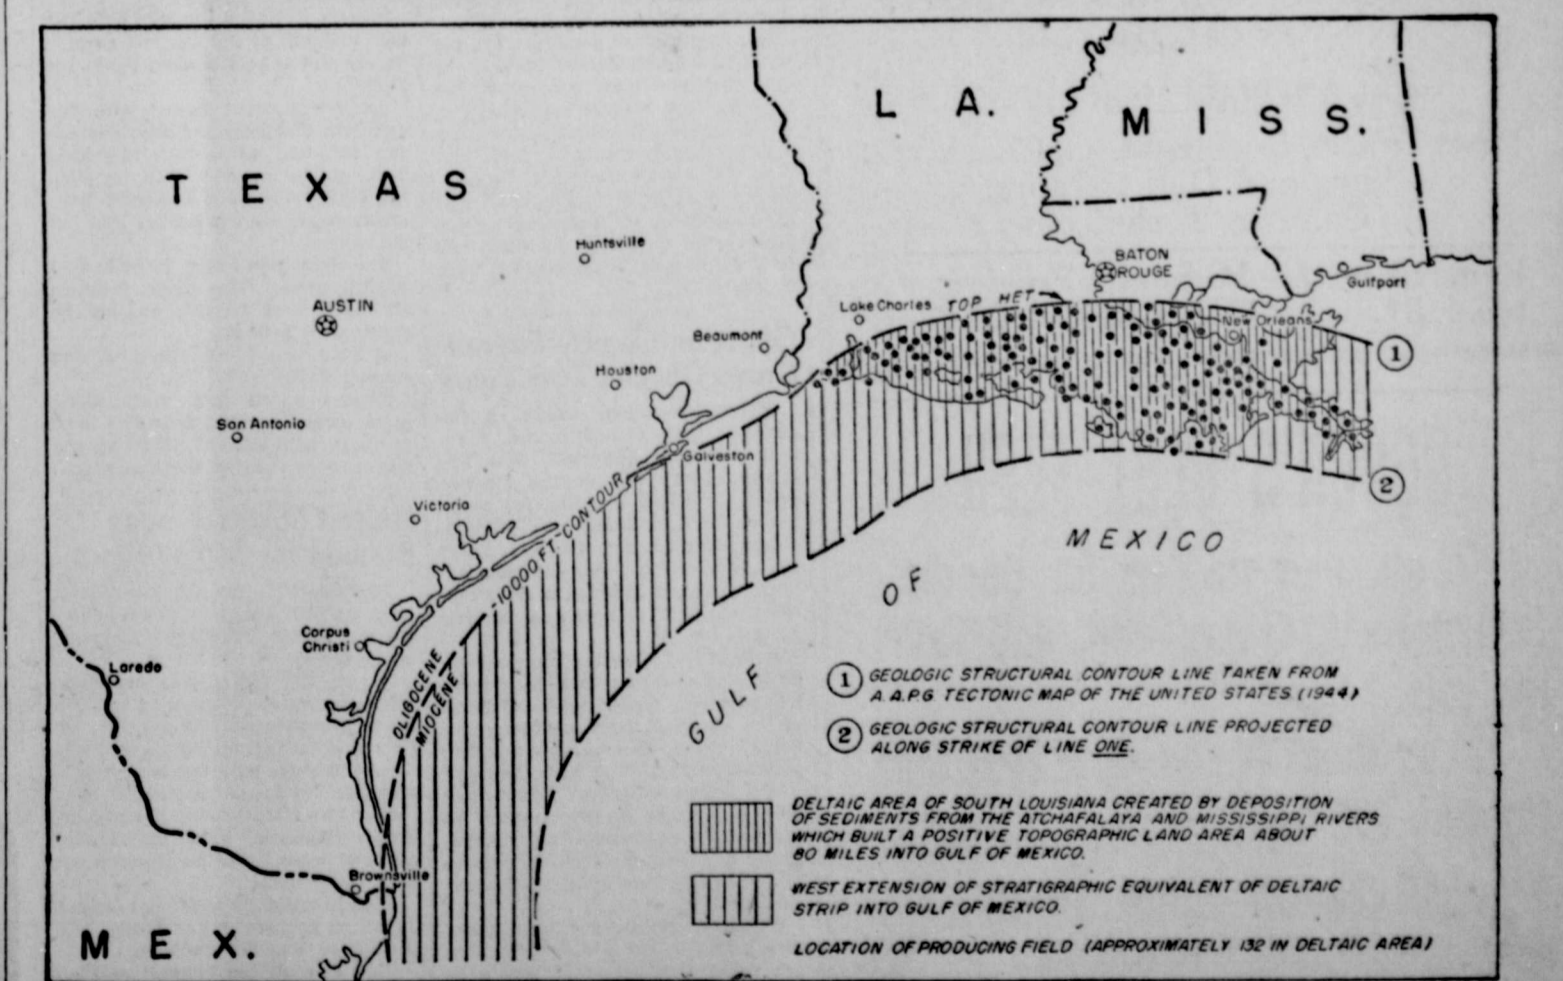

The exterior color scheme chosen by Mrs. Harrison shows an awareness of the ways in which color can be used to personalize a home. Befitting a house in the

This 60-year-old farmhouse has been remodeled into two apartments. Outside stairs to the second-floor apartment can be seen at the left in the close-up view above. The overall view, right, shows the house as it stands in the Wisconsin countryside. Sidewalls are painted white, and heather-colored asphalt shingles cover the roof.

country, the colors relate to nature. Because the roof color is the main color, asphalt shingles in a soft heather-colored blend were selected. To give dignity to the large house on a hill, sidewalls

were painted white. For simplicity, the trim is white, too. Chimneys are of red brick, and if Mr. Harrison decides to replace the shutters that were taken off they will be harmoniously painted maroon.

The submerged lands of Texas, mis-called the "tidelands," are pictured in this map prepared by a group of Texas leading petroleum geologists. The oligocene-miocene 10,000 foot contour, shown off the coast, is the point at which the oligocene and miocene formations—both important oil-bearing formations—can be reached by drilling a 10,000-foot well. The contour lines were taken from an American Association of Petroleum Geologists map showing the inclination of the formations. The Atchafalaya River, referred to on the map, existed in prehistoric times.

## Get Out the Vote Campaign

The Get Out the Vote Campaign launched by the General Federation of Women's Clubs is a division of Americanism Department. The objective is to revive a greater interest in our way of life in our representative government and to emphasize full citizenship responsibility. This is a bi-partisan project.

In the United States, the land of plenty, only 51 per cent of those eligible to vote did so in 1948. Citizens of other countries obviously take their representatives more serious.

U. S. A. 1948 51 per cent.  
Japan 1950 1 per cent.  
Israel 1951 72 per cent.  
France 1945 75 per cent.

Sweden 1951 80 per cent.  
England 1951 83 per cent.  
Italy 1948 89 per cent.  
Belgium 1950 90 per cent.  
Contributed.

Mr. and Mrs. Paul Standfurd of Lubbock, visited Sunday with relatives here.

R. E. Brookshier went to Big Spring for Mr. and Mrs. Dan Thompson and family.

Mrs. O. T. Bundy returned Thursday from Midland where she had visited her daughter and family, Dr. and Mrs. Clarence Mast, the past two weeks.

Mr. and Mrs. P. L. Mills attended the funeral of a friend, M. Don Whitten, at Roswell, New Mexico, last Friday. They also visited at Dexter and Portales on their way home Saturday.

## Recent Midwest Earthquake Was Not Area's First

WASHINGTON, D.C.—The recent earthquake that centered near Oklahoma City and shook seven states is the latest in a series of tremors that have disturbed the basin of the Mississippi river over the past 150 years.

Even though the region is not in one of the world's "earthquake belts," such as that ringing the Pacific ocean, the central part of the United States has felt frequent minor tremors and at least one major quake.

Indians had traditions of earthquakes in the Mississippi basin long before the appearance of the white man, and several violent tremors, known as the New Madrid earthquake, altered the face of the river valley in the winter of 1811-12.

### Created Lake

This quake wrecked the town of New Madrid, Missouri, dumping much of it into the Mississippi river, whose waters alternately receded and overflowed the banks. Other riverside towns suffered severely, and the water tumbled into depressions formed by the temblor.

Greatest visible change was the creation of Reelfoot Lake, Tennessee, where only forest had stood before. The lake is about 14 miles long and four miles wide. Other lakes and swamps were formed on both sides of the Mississippi.

About 30 persons died in the New Madrid quake, the area being sparsely settled at the time. Such a tremor in modern times would be a major disaster, affecting great industrial cities, numerous small towns and thickly settled farmland.

### Other Tremors Noted

Other tremors have been felt in the south-central United States since the New Madrid shock, notably the Memphis earthquake of January 4, 1843, which lasted two minutes and caused people from St. Louis to the Gulf to flee their homes.

The Charleston, South Carolina, earthquake of 1888, which claimed some 100 deaths, was felt in the Mississippi valley region, and distinct tremors have been noted a dozen other times in the past century.

Earthquakes in the Mississippi river area are generally attributed to the settling of rock far beneath the earth's surface. Some have followed heavy floods.

## Woman Has A Place In Medicine, Doctors Say

CHICAGO—Some people may think the woman's place is in the home. But, two San Francisco doctors—of the fair sex, of course—think she also has a definite place in medicine.

And, to prove their theory, Drs. Hulda E. Thelander and Helen B. Weyrauch have conducted a study of 299 women physicians, 74 of whom are single and 156 married.

Although the woman doctor has more problems to face than her male counterpart, she "works hard at being a good physician, and, by the selected standards, has succeeded," according to the doctors. The married professional woman, especially, has to deal with problems outside the sphere of either the male or the unmarried professional woman, they pointed out.

"The married woman has two jobs, but the primary one should be the maintenance of a family unit and the rearing of the young," the doctors said. "The woman is the integral part in homemaking. No matter how great recognition a professional married woman attains, she will not be considered a success if she has failed in her home."

The problems peculiar to the married woman doctor include the fact that she does not select her location, but follows her husband, creating her opportunities from the environment in which she finds herself, the bearing of the child and the nurturing of it through early infancy takes energy, devotion, and time which must be subtracted from a career.

## Ghost on County Payroll Draws Checks Two Years

CHICAGO—Police check of fingerprint files identified the phantom "Joseph Addison" who has drawn county pay checks for two years but never reported for work. He was identified as Joseph Adduci.

Adduci's checks totaling \$6,400 were mailed to the west side address of James Adduci, a state representative. James has a brother named Joseph.

A thumbprint on the physical examination Addison took to get his job with the county matched those of the Joseph Adduci carried in police files. Joseph Adduci has a long police record dating back to 1927.

The names of James Adduci and several of his family appear on some of the cashed Addison checks. However, James Adduci refuses to admit any knowledge of "James Addison."

He told reporters outside a grand jury investigation into the phantom pay roller that he would take a lie test in connection with the case only after the Cook county board president, William N. Erickson, took one.

## Nobel Prize Winner Says the Moon Is Just a Lump of Dust

NEW HAVEN, Conn.—That moon that means so much to lovers and poets is nothing but a large lump of dust.

At least that's the opinion of Nobel Prize-winning chemist Harold C. Urey who theorizes that the moon was formed from accumulated dust particles.

Urey's new book upsets the idea held by most scientists that the moon is a torn-off fragment of the earth, just ages ago when the earth was molten. His theory is that the moon was independently born from a cosmic dust cloud.

Putting first things first, he adds that the surface of the moon was formed over three billion years ago or at the end of the formation of the moon's core.

Urey is one of the few men who knows both the chemistry and the astronomy on which this knotty problem hinges. It seems that in the past, few astronomers have known enough chemistry and few chemists have bothered to look up from their test tubes.

Urey also has something to say about the origins of the entire solar system.

In the very beginning, he says there was a cloud of cosmic dust from which the sun and a churning disk of gas and dust was formed. The dust particles, called planetesimals, contained enough water to allow crystallization.

All this, Urey says, took place at extremely cold temperatures. His view differs sharply from the popular notion that the solar system began under conditions of extreme heat.

Condensations of the dust formed embryonic planets. This was followed by a period of very high temperature during which chemical changes formed the cores of the planets.

Urey concludes that things were wrapped up nicely when the temperature took a sharp drop and left the earth and the moon in their present form.

## Kills Self Because He Loves Brother's Wife

SAN PEDRO, Calif.—Dean Dickey, 18, had been in love with his brother's wife for a year.

Dean made the headlines last year when, twice in a week, he tried to kill himself—once by swallowing liniment, again by inhaling gas.

He told police the reason was a secret love for Laurita Dean, wife of his brother, Alvin, 23.

"I didn't know," Alvin said at the time. "Dean didn't say a word. He hardly came near me."

The youth recovered, and joined the navy. His family thought his young-love crush was over.

Back in port, he visited the home of a sister, Mrs. Blythe McKee, and her husband, Wesley. They chatted late and then retired.

The McKees were awakened by a shotgun blast. They found Dean dead. Police Detective W. A. Halloway quoted McKee: "I think Dean killed himself in despondency over thinking he still loved his brother's wife."

## Plane Bounces and Flies After Slipping Into Sea

TOKYO—The story of a plane sliding off the icy deck of a carrier, bouncing on the water and then flying was reported recently by the navy.

The pilot was Lt. Com. William H. "Buck" Rogers, Austin, Tex. The plane was a Skyraider Guppy with a total crew of three.

Rogers jockeyed his ship onto the port catapult of the aircraft carrier Valley Forge and blinked lights for launch.

Something went wrong with the catapult. Suddenly the Skyraider began skidding down the ice-coated deck of the carrier with no help from the still-cocked catapult. Rogers tramped on the brakes and cut the power.

The plane didn't stop, so he turned on full power. The plane dropped off the bow of the ship and hit the water with a thud.

It bounced into the air, and started flying.

Rogers eased the craft along eight inches above the waves until he could gain altitude. Then he and his crew completed their mission.

## United States Troops Blamed for Jap Waifs

TOKYO—U.S. troops have fathered 200,000 waifs in Japan since the war ended. That's the assertion of the newspaper Yomiuri.

It said the figure was based on off-the-record data supplied by Japanese government officials. The officials, it said, declined use of their names because they feared the "displeasure" of the occupation.

Another Japanese newspaper, Tokyo Shimbun, said the 200,000 children were listed on government food ration rolls.

A U.S. occupation official and a Japanese government authority said the figure was far too high.

"It's way off the beam," said an American officer in the public health and welfare division of occupation headquarters. He said the situation was "no worse here than in any section in our own country."

Mr. T. D. Wallace and Mr. Mrs. Geo. Jones spent Sunday in Dimmitt with Mr. and Mrs. E. L. Teague.

Visitors in the home of Mr. and Mrs. Geo. Seaney Sunday were: Mr. and Mrs. Elmo Seaney, of Morton, Mr. and Mrs. Bud McMinn, Mr. and Mrs. Pascal Garrison and children.

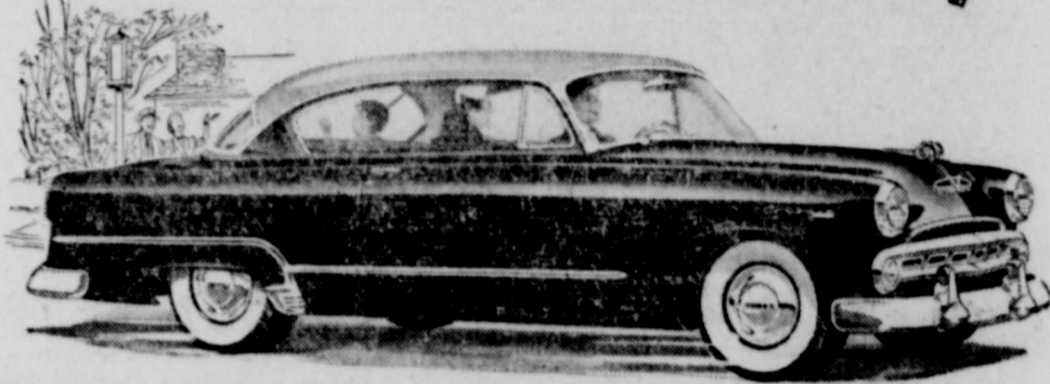

Mr. and Mrs. P. S. Visage, of Lubbock, spent the week end with her parents, Mr. and Mrs. W. L. McMinn.

Mrs. Mary Watson Jones, of Perryton, spent the week end with her parents, Mr. and Mrs. J. S. Watson. She was enroute to Lubbock to attend a convention.

Mr. and Mrs. Doyle Pool, of Quitaque, visited with his sister, Mrs. P. D. Jasper and Dawn Sunday.

Mr. and Mrs. Milton Dudley and Mrs. H. Roy Brown attended the funeral of Mrs. Brown's brother in law, Rev. H. C. Bristow, Sunday at Ackerly. Rev. Bristow died Friday.

**Arctic Cannibal Cod Is Mystery to Science**

Fishery scientists hope soon to unravel the mystery of cannibalistic fresh-water codfish that have lived in an Arctic lake for centuries, possibly for 4,000 years.

Untouched by white men, the small lake in Baffin Island and its unusual fish were discovered in 1951 by scientists aboard the fisheries research vessel Calanus.

The lake, known as Ogac Lake, is about half-way up Frobisher Bay, a deep inlet that cuts into the south-east corner of Baffin Island. The lake lies at the head of Ney Harbor and empties into it across a shallow sill. Little salt water ever enters the lake, which is less than two miles long.

A brief survey five years ago was believed to have been the first occasion on which white men had visited the lake. Scientists from the Calanus said they believed there was no movement of fish between the lake and the harbor.

In 1951 they took thirty cod from the lake. The specimens were larger than the Labrador cod and were golden brown, perhaps from eating seaweed and sea urchins. Remnants of cod were found in their stomachs, showing them to be cannibalistic.

The Baffin Island cod may be a cousin of the Atlantic cod, which is identical with the cod found in European Atlantic waters, but different from the Pacific cod.

**Complete Underground Cities Discovered in South America**

A little known valley 10,000 feet up in the Andes mountains was discovered recently. It is dotted with pre-Incan cities which for unknown reasons have been built entirely underground.

The cities are thought to have flourished at the same time as ancient Babylon and Egypt.

They are believed to have had as many as 15,000 residents, and there are traces of a high development in the arts and sciences, including surgery.

The valley is 65 miles long and five miles wide, a fertile mountain bowl. About 400 miles from Lima, it was accessible only by a twisting road through a 15,000 foot mountain pass.

The present residents eke out an existence by farming and live in adobe and stone huts. They show no curiosity about the remnants of their ancient forebears, which include 3,000 monoliths.

The cities are thought to have flourished at the same time as ancient Babylon and Egypt.

They are believed to have had as many as 15,000 residents, and there are traces of a high development in the arts and sciences, including surgery.

The valley is 65 miles long and five miles wide, a fertile mountain bowl. About 400 miles from Lima, it was accessible only by a twisting road through a 15,000 foot mountain pass.

The present residents eke out an existence by farming and live in adobe and stone huts. They show no curiosity about the remnants of their ancient forebears, which include 3,000 monoliths.

A little known valley 10,000 feet up in the Andes mountains was discovered recently. It is dotted with pre-Incan cities which for unknown reasons have been built entirely underground.

**Covering the Waterfront**

A new radio-telephone network, installed as a civil defense measure, is guarding New York City's vast water supply system. By means of this new network, a 151-man patrol force with 24 jeeps, equipped with radios, keeps a continuous watch over the city's 1000-square-mile watershed area 24 hours a day. The jeeps can now communicate with each other over limited distances ranging from a few miles to 30 or 40 miles, depending on the terrain separating them. Ultimately, however, they'll be able to talk with any of the nine radio headquarters stations and some 46 radio-equipped vehicles. Also included in the civil defense program are two radio-equipped laboratory vehicles which can make on-the-spot analyses in case of suspected or actual radiological or bacteriological attack by an enemy.

**Treasure Hunt**

One of the most unusual treasure hunts in history is underway in Denmark. Two archaeologists, after five years' study and preparation, have started to dig up a large area in which, 95 years apart—in 1639 and 1734—two remarkable golden drinking horns were found. Each bore the inscription, "I, Laegast of Holt, make this horn." Of Nordic origin, they apparently were made about 500 A.D. and were worth a fortune. In 1802 a goldsmith stole them from an art gallery and melted them down. Using mine detectors, the archaeologists hope to find, if not another golden horn, other treasures Laegast may have left.

**Little Known Game Bird**

The Wilson's snipe, or Jack snipe, as it is often called, is a widely distributed game bird. Unlike the woodcock, which frequents the woodland bog and alder swamp, the Wilson's snipe is a bird of the open meadow and marsh, where the ground is wet and soft. Field marks are the extremely long, slender bill, dark striped back and breast, white belly, and chestnut tail. In comparison to the plump woodcock, which rises on rounded, whistling wings, just clearing the bush tops, only to drop down again after a short flight, the slender Wilson's snipe has pointed wings and makes off, usually up wind, in a rapid zig-zag flight, uttering a weak but harsh, rasping scaple.

**Cool to Macaroni**

Canadians are about the "world's worst" macaroni eaters, according to an expert. Frederick C. Mueller, president of the National Macaroni Manufacturers Association, told a trade convention that in 1951 Italians ate forty-five pounds each, Frenchmen ate between fifteen and seventeen pounds and United States citizens seven pounds. Canadians lagged where macaroni-eating was concerned, he said. They ate only six pounds of macaroni per capita.

**Strange Species of Fish Live in Nevada Desert**

A Nevada desert pool which since the end of the Ice Age has been the home of a strange species of fish has been set aside by Presidential proclamation as a detached unit of the Death Valley National Monument.

The pool is Devil's Hole, in southwestern Nevada. It is forty feet long and fifteen feet wide. Its surface is thirty feet below the surrounding desert. It ranges in depth from a few inches at one end to fifteen feet at the other end. The pool is a remnant of a pre-historic chain of lakes that formed the Death Valley Lake System in the late glacial, or Pleistocene epoch.

The little fish that inhabits Devil's Hole has the smallest range of any species of vertebrate animals. It is one of the least numerous of any species, the total number ranging between fifty and 150. The population has presumably not changed materially in size in the years since the end of the Ice Age.

The fish evolved after a gradual drying up of Death Valley lake system isolated the population from the original ancestral stock that was common in the entire region. In its long stay in restricted Devil's Hole, which is fed by springs, the pupfish, or Cyprinodon diabolis, has become distinct from fishes found in the other desert water holes of the Ash Meadows region.

**All of Earth's Animals Have Some Kind of Hair**

All animals have their hair or fur. There are no exceptions. Animals' hair may be thick and cohesive, so that we call it "wool", as in the case of sheep; or it may be composed of stiff outer hairs and soft, dense underhair, so that the outer hair has to be removed in preparation of the commercial "fur", as in the case of sealskin, which is in fact the seal's underhair only; or it may be so fine that we scarcely realize it exists at all.

Even a hippopotamus has hair. It covers almost its entire body, but it is so short and scanty we may not notice it.

Dense fur is very important to some animals. It affords protection from injury and keeps body heat from escaping. Often it is erectile, under the control of muscles, so that animals can "bristle" or signal with what among deer we call their "flags".

**Names for Ships**

Owners of the old-time clipper ships that made America famous selected strange names for their vessels. They favored names associated with the sea such as Ocean Eage, Sea Nymph, Flying Scud, Sea Witch and Dashing Wave. Others picked fictional or mythological characters such as Hamlet, Orpheus and Galatea. Still others favored American heroes, including David Crockett, Andrew Jackson, General Grant, and Winfield Scott. Also honored were Harvey Birch, a Revolutionary War spy made famous in the novel of James Fenimore Cooper; Pocahontas, Garibaldi, Solomon and King Philip, the Indian chief. Daniel Webster, described as "The Defender of the Constitution and expounder of the same," was honored by a vessel named the Expounder. Animals were represented by the Flora Temple, a vessel named for the trotting mare that won ninety-two out of 108 races.

**First Airline**

The world's earliest airline started—and stopped—in 1914. It had one plane, a single-engine "flying boat," which made two flights a day between Tampa and St. Petersburg, Florida. The service lasted four months. At least three airlines still in operation were organized before 1920. They are Denmark's DDL, the Netherlands' KLM, and a predecessor company of Air France. Scheduled air service in Italy and England also began before 1920. The airways, the highways of the sky, are ten miles wide, one atop the other every thousand feet, up to 20,000. In America there are 70,000 miles of these lanes, delineated by radio signals.

**World's Smallest Book**

A Munich publishing company is producing what it believes to be the world's smallest printed book. The book, measuring 4.1 millimeters (about a quarter of an inch) square, contains twenty pages, the first of which is covered with 320 letters of the Lord's Prayer in German. The remaining nineteen pages are blank, possibly for notes. Hans Waldmann, of the Munich publishing firm of Waldmann & Pfister, said 252 of the books fit into a match box and that each copy weighs less than half a match. The letters are so small they can be read only with the aid of a strong magnifying glass.

**It's Transistorized**

The answer to a cheerleader's prayer is a new "transistorized" megaphone which can amplify the normal speaking voice to a raucous yell. The megaphone is complete in itself, requiring no external connections of any kind. Key to the unit's workability are two tiny transistors, made of metallic element germanium, which do the amplification work of vacuum tubes and operate on power supplied by small batteries enclosed in the amplification unit. The new units has a volume control which permits tuning the normal speaking voice from a shout to a barely audible whisper.

**Mrs. John Lee Francis Entertained Club Ladies**

Mrs. John Lee Francis entertained the Helping Hand Club Thursday, October 16. The refreshment carried a Halloween theme. Thirteen members and four guests were present. Mrs. Brummett and Mrs. Patrick from Quitaque were guests. Also Mrs. Jack Sutton and Mrs. John R. Gill.

Members present were Mrs. Charles Francis, Mrs. Thade Steele, Mrs. Hollie Francis, Mrs. Virgil Baldwin, Mrs. Alva Jasper, Mrs. Edwin Crass, Mrs. Scott Smithee, Mrs. Frank Fisch, Mrs. Hagen Fronterhouse, Mrs. J. E. Jowell, Mrs. Frank Mercer, Mrs. Clyde Mercer, and the hostess, Mrs. Francis.

Wayne McMurtry, Misses Mary Lou Bellingier, and Bonnie Waters, who are attending W. T. S. C., spent the weekend with home folks.

**1952 Study Club Met October 23**

The 1952 Study Club met October 23 in the club room. A very interesting program was given by Mesdames Truman Stephens, Rance Stephens and Don Brown.

Those present were: Mesdames Rance Stephens, Robert Isbell, Truman Stephens, Rex Holt, Wilton Whitehead, Kenneth Bean, George Rampley, Billy Ellis, Fred Arnold, Donald Paige, Don Brown, Wayne Hamilton, Tay Teeple, Don Burson, J. L. Self, Clifton Stodghill.

The club is proud to welcome two new members, Mrs. Jack Sutton and Mrs. Raymond McJimsey.

Mr. and Mrs. Jack Tomlin and daughter, of Friona, visited last Sunday with his brother, Mr. and Mrs. Shellie Tomlin.

Mr. and Mrs. H. Roy Brown visited with Mr. and Mrs. Syd Brown Wednesday night in Cedar Hill community.

Mrs. Conrad Dyer and son, of Berkley, California, Mrs. Bob Maples and son, of Dimmitt, visited their grandmother, Mrs. T. D. Wallace Tuesday of last week.

**STRANGE RESCUE AT SEA** . . . The submarine USS Sea Poacher rescues a blimp off Key West, Fla. The submarine is towing the blimp after evacuating the blimp's crew. The blimp pilot and observer rode out the strange rescue. The blimp's power was knocked out when it hit the water during a mock attack on the submarine off the Florida city. As the blimp dried off it rose into the air again. Heavy rains had forced the blimp so close to the water that the cabin had gone under.

**Your VOTE is your voice in your government**

It speaks for you, for your family, for your job... and for your country's future.

It can advance equal opportunity to all men... and it can wipe out prejudice.

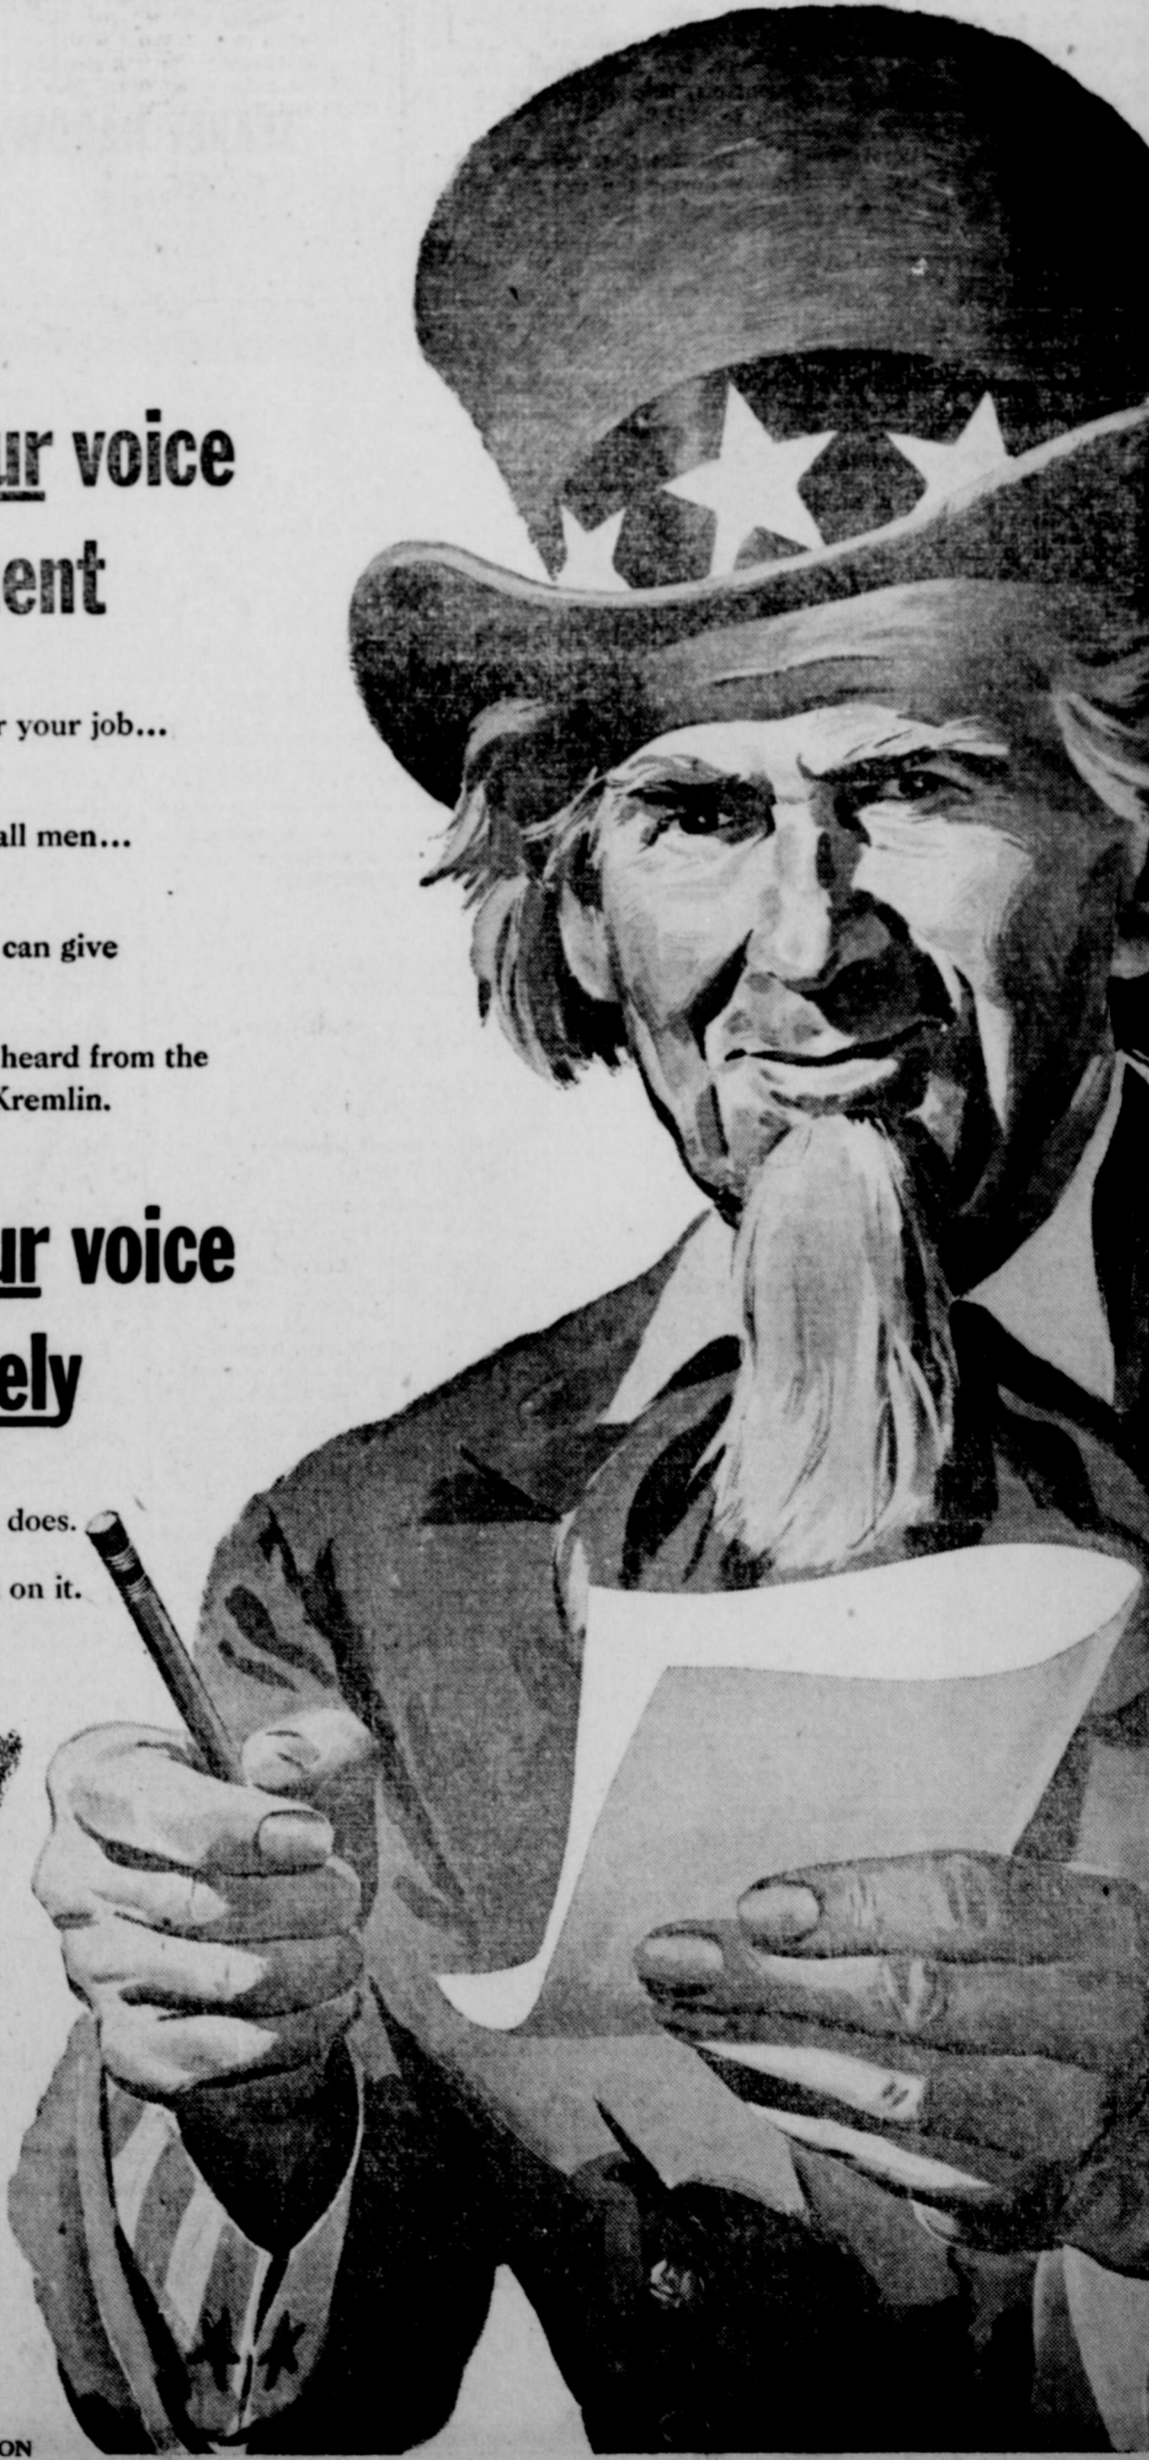

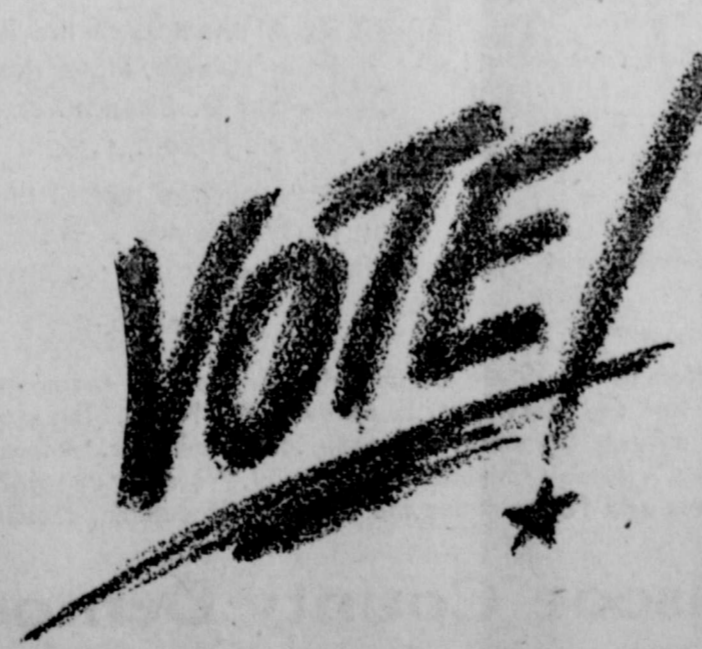

It can make tyrants tremble...and it can give a troubled world new hope.

It is a powerful voice. Its echo can be heard from the halls of Congress to the walls of the Kremlin.

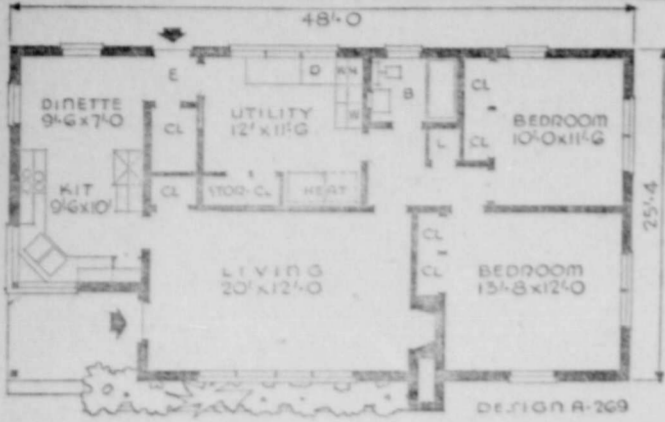

**Your VOTE is your voice Let it speak wisely**

Vote as if your life depended on it. It does.

Vote as if America's future depended on it. It does.

# A HOME TO LIVE IN

## Small House Planning Bureau St. Cloud Minnesota

Design A 269. Exterior walls are 8" concrete block, stripped for lath and plaster with stucco finish. An insulated floor slab is laid on a bed of gravel and the utility room replaces the basement. Cubage is further reduced by the flat roof which uses one set of joists for ceiling and roof and is covered with asphalt roofing.

The utility room contains heating and laundry equipment, work space and cabinets. Closets include storage in the entry and utility, wardrobes, linen and coat closet.

Kitchen cabinets are well arranged around a corner sink,

leaving a well lighted dining space in the rear. Other features include covered stoop, fireplace, recessed tub, small hall and planting space. Floor area is 1144 square feet, cubage is 11,100 cubic feet.

### INCREASE FALL EGG PRODUCTION WITH LIGHTS

Egg prices have steadily climbed since the summer slump in egg production started weeks ago. It is a situation that happens just about every year, says W. J. Moore, poultry husbandman for the Texas Agricultural Extension Service, but good flock management can help overcome some of the trouble.

A practice that will pay dividends during the fall and winter is the use of lights in the laying house. For maximum production, a hen needs 12 to 14 hours of light each day, says Moore.

He recommends that lights be used from about the middle of September until spring. The light he adds, must fall on the birds, feeders and waterers for best results. It makes no difference whether morning or evening lights are used; however, the more common practice is to use morning lights because of convenience.

In using morning lights, the recommended procedure is to turn the lights on about 30 minutes before daylight in the fall of the year as the days begin to get short, and to turn them on a little earlier each morning as the days get shorter.

When evening lights are used, the lights are turned on in the late afternoon before dark and are allowed to burn until the

birds receive their 12 to 14 hours of light per day. More cautions poultrymen to dim the evening lights for a few minutes before turning them off so the hens will have time to get on the roosts. Large light bulbs are not necessary. Moore recommends the use of two 25 to 40 watt bulbs for each 400 feet of floor space.

The drouth is responsible for conditions that can cause trouble for livestock producers unless corrective measures are taken. Rations of pastured animals should be supplemented with vitamin A rich feeds to prevent respiratory troubles and vitamins A, E and C to prevent the condition known as "white-muscle disease."

With the coming of cooler weather, the chances for fires will increase unless the farmstead is checked for fire hazards and corrective measures taken.

Sweet potatoes are a rich source of vitamin A; a worthwhile source of vitamin C and contain small amounts of the B vitamins and minerals.

To those of you who have helped make our past 6 months stay in Silverton a pleasant one, we wish to extend our sincere thanks.

Had conditions been more ideal and encouraged permanent residence, we would like to have lived here indefinitely.

Sincerely,  
Dr. and Mrs. R. Mueller.

During Our Fourth Annual!

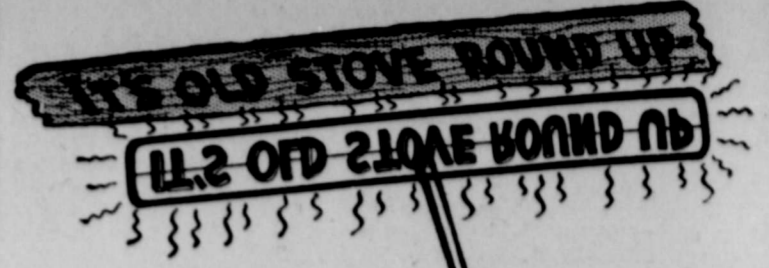

## Old Stove Roundup

We will give a liberal trade-in on your old stove on the purchase of a New Gas Range.

ONE SET OF DISHES GIVEN WITHOUT EXTRA COST.

**SEANEY HARDWARE & APPLIANCE COMPANY, INC.**  
GEORGE Silverton, Texas AGNES

## Trade Your Old Stove in on a Modern Gas Range

A Round-Up star that's tops in performance, convenience and styling—the modern automatic gas range built to "CP" standards. Everything about it lights automatically. Top burners instantly give you any heat you need—from a perfect simmer to a full speed flame. See the modern automatic gas ranges built to "CP" standards. Trade your old stove in on a modern automatic gas range during the Round-Up. Your gas appliance dealer is ready to trade now. See him today!

# No. 0000 (Specimen) OFFICIAL BALLOT

You may vote for the candidates of your choice by placing an X in the square beside the name or you may vote for the candidate of your choice in each race by scratching or marking out all other names in that race.

### WHAT TO DO:

1. At the top of the Democratic Party column, strike out the names of Adlai E. Stevenson and John J. Sparkman.
2. Leave the rest of the Democratic Party column as it is.
3. At the top of the Republican Party column, leave the names of Dwight D. Eisenhower and Richard M. Nixon.
4. Strike out the rest of the Republican Party column.
5. Strike out all other columns on the ballot.

DEMOS FOR IKE BALLOT—A resolution of the State Democratic Convention recommended that "every Democrat in Texas vote and work for" the election of Eisenhower and Nixon. The sample ballot reproduced above shows the easiest way a Texas Democrat can vote for Eisenhower. Another method is the write-in plan recently approved by Attorney General Price Daniel. Voters may scratch Stevenson and Sparkman and write in Eisenhower and Nixon under the Democratic column, crossing out the Republican and other slates.

**Paid for by Briscoe County Democrats For Eisenhower.**

## PERSONALS

Mrs. J. T. Fuller and Miss Sue Smith, were business visitors in Plainview Saturday.

Mr. and Mrs. Bailey Hill and children were shopping in Amarillo Saturday.

Mr. and Mrs. Warner Grabbe and family were business visitors in Amarillo Saturday.

Mrs. O. T. Bundy and sister, Mrs. L. W. Kiker, of Plainview, left Tuesday for Henderson, Texas, where they will visit their brothers for a week or ten days.

Dinner guests in the Ware Ferguson home Sunday were Mr. and Mrs. R. A. Day and Mr. and Mrs. George Birchfield, of Matador.

Mrs. Lena Northcutt, of Canyon and Mr. and Mrs. Bucky Jefferies, of Lockney, spent the week end in the home of Mr. and Mrs. Johnnie Weaver.

Miss Anna Lee Anderson and Mr. and Mrs. Wilmoth, of Providence, were shopping in Amarillo Saturday.

Mr. and Mrs. Bill Cox, of Plainview, and Mr. and Mrs. Morris Moreland, of Amarillo, spent the week end with their parents, Mr. and Mrs. M. G. Moreland.

Mrs. A. A. Redwine and Mrs. Pat Pavlicek were business visitors Tuesday in Plainview.

Albert Reid, of Oklahoma City, spent the weekend with his mother, Mrs. W. W. Reid, and other relatives

Mr. and Mrs. Hub Hodges and Mr. and Mrs. Dock Brown, of Tulla, visited in the home of Mr. and Mrs. Grady Wimberly Sunday.

Mr. and Mrs. Roy Boyd and son, Weaver, who have just returned from a trip to New York, where he attended the National School Convention, visited Sunday in the home of Mr. and Mrs. Lem Weaver.

Mrs. Lem Weaver and children were shopping in Amarillo Saturday.

Scientific Device Curves Light To Test Burning

To search the tailcones of jet engines for flaming gases which might be burning there instead of in the combustion chamber, engineers have developed a new device which "curves" light from engine to indicator.

Known as the flame detector, the instrument was designed to reach inaccessible sections of the jet's tailcone while the engine is in operation. This is accomplished with a four-foot pliable quartz probe filament which, although bent and twisted, transmits light through its entire length.

Prior to starting the engine, the end of the filament is placed in the specific tailcone area to be checked for flame presence. When the engine is running, the probe transmits the visible light wave from flames to a phototube where it is changed to an electric current. It is then converted to a light-wave signal and amplified for study.

At present, the flame detector is being used by aircraft gas turbine engineers, locating possible faulty combustion areas and unnecessary flame leakage, part of a continuing search to discover the most efficient design for aircraft combustion chambers.

Bird Social Parasites Are Not Stigmatized

There is no stigma to being called a "social parasite." This ethical pronouncement, however, is strictly for the birds, not for human beings.

It is made, with its ornithological restriction, by Dr. Austin L. Rand, curator of birds at Chicago Natural History museum.

Among certain species of birds social parasitism is the normal, natural and usual thing, Dr. Rand indicates.

"The mother who would leave her infant on a stranger's doorstep to be brought up as an orphan, never to know its own parents, is a despicable character in human society," writes Dr. Rand. "But crows are human. The rest of the animal world is not immoral; it is amoral. It cannot afford criteria beyond survival and reproduction."

"Social parasites among birds include cowbirds, weavers, cuckoos, honey guides and ducks. Ducks usually make their own nests, but many species occasionally lay eggs in the nests of other species."

The Eel

They scales make grasping an eel a difficult task and give credence to the phrase "as slippery as an eel." The majority of eels taken are usually between two and three feet long, although individuals up to six feet long have been reported.

The breeding habits of the eel, unknown until recently, are unusual and interesting. This fish lives in fresh water and goes to sea to spawn. Some of the earlier beliefs on eel reproduction had them coming from the gills of other fishes, from dew of May mornings, from horse hairs that had fallen into water, from a small beetle, and from spontaneous generation. The situation was clarified and the above beliefs proven incorrect by the findings of European workers, particularly the Danish biologist, Johannes Schmidt. During the early 1920's, this hard-working scientist found the breeding place and worked out the migration route of the European eel larva from the breeding ground to the coast of Europe. According to these findings, the spawning grounds comprise a restricted area in the western Atlantic, north and east of the West Indies between 48 degrees and 65 degrees longitude.

Aphids

Aphids vary in color—black, red, gray, green or white. A gray-blue aphid on birch trees causes the leaves to wrinkle. Rosy apple aphids do the same thing to apple leaves. Pine woolly aphids are white. Maple aphids are green. To control mites, spray with a miticide, such as dimite or amite. To curb aphids, spray with a contact poison, such as nicotine sulfate, pyrethrum rotenone resin emulsion or an insecticide containing lindane. A second or third spray may be necessary during the summer because a new group of mites and aphids will likely hitch-hike into your trees on birds and other insects or will be carried by winds.

Sunspots and Growth

From the Four Corners country of the Southwest, from northern Alaska, from England, the Scandinavian countries and Europe, tree-ring sequences have shown rhythms or cycles of growth corresponding closely with the 11-year sunspot cycle. Sunspots have long been linked with the great magnetic storms which sweep the earth, interrupting radio communication and garbling telephone and telegraph transmission. They may be related in some way to the eerie aurora polaris—flickering light in the night skies over far northern and southern latitudes.

Hankies Around Neck

Cheap handkerchiefs are good substitutes for floppy neck bows. Wipe them casually around a necktie shaped pin or loop them in and out of a jeweled choker.

John Trumbull Defined Liberty With Paints

A man named John Trumbull, a talented painter of the Revolutionary Period, really knew the meaning of liberty, justice, and freedom in America. Trumbull, who had been suspected of being a spy and imprisoned for eight months, was later commissioned by Congress to paint four pictures for the rotunda of the Capitol.

They were "The Declaration of Independence," "The Surrender of Burgoyne," "The Surrender of Cornwallis," and "The Resignation of Washington at Annapolis." Trumbull won an indestructible place in American history for his fine paintings depicting outstanding events and personalities of the Revolutionary Period, including Washington, John Adams, and Alexander Hamilton. His portraits and historical paintings have hung in The Metropolitan Museum, Yale University Art Gallery, and The National Museum at Washington.

He was the founder and first president of the Academy of Fine Arts in New York City. Most of the high honors and important commissions he received were accorded him after he had been cleared of the charges made against him and released from prison.

Peary's Signboards Still Point Way to North Pole

Robert E. Peary, discoverer of the North Pole, left long-standing guideposts for the men who today follow his track across the top of the world.

Peary's records and supply boxes, found recently by Air Force fliers on Cape Columbia, are not the first of such caches to come to light. But the newest discovery may prove to be the most historic.

It was on Cape Columbia, northernmost land tip of Canada that the explorer in June of 1909 built a final marker before turning homeward from his hard-won conquest of the Pole.

A stone cairn was erected, holding a signpost of sledge planks pointing due north, east, south and west. This was supported by heavy guy wires; it carried directions and distances punched into copper plates.

About Sleep

What is sleep? Can a person do without it for a great length of time? Scientists have found that when we go to sleep, breathing and the beating of the heart become slower, the body's resistance to an electric current goes up and the supply of blood to the brain becomes less as compared with the rest of the body. However, aside from these superficial matters, very little is known as to what happens fundamentally in the body with the arrival of slumber. It is impossible to do without sleep indefinitely. The Chinese are said to have had a very painful method of torturing prisoners by preventing them from sleeping. At the end of about six days they would die.

Dangers of Writing

Early science writers didn't have it any too easy. In 1278, a man named Roger Bacon, exploring the possibilities of the natural sciences, was accused of witchcraft. Thrown into prison, he finally died in 1292. Sometimes it didn't take a whole book for an author to wind up on the very short end of an argument. In 1676 a Swedish writer named Caspar Weiser greeted the Danish conqueror of his native city of Lund by reciting a glowing couplet. When the Swedish king returned to power, Weiser ran—but not fast enough. A swipe of a broadsword and poor Weiser was no more.

Poison Ivy

Poison ivy can often be prevented with a simple home-made remedy consisting of a five percent solution of ferrous sulfate in a mixture of glycerine, alcohol, and water. When used to bathe exposed areas of the skin and allowed to dry, this solution is said to offer protection against subsequent contact with the ivy plant. If you do succeed in picking up a case of ivy poisoning, there are a number of new and effective remedies on the market, many of which rely on glycerine's soothing properties to help them do their job.

Budget Stretcher

Double purpose clothes are a budget stretcher. Take those terry cloth dusters, for example. You can wear them after a bath or shower, and they serve equally well at the beach when you want to dry easily after swimming or protect yourself from tanning or sunburning. White is the favored color, and the binding along sleeves, front opening and hem can be a gay plaid.

Keeping Track in Garden

If working in the garden is your hobby, keep track of what you planted and where it is. Paste the empty seed package to a clean wooden stake with a coat of shellac. Added protection is gained with a shellac coat over the outer surface.

Candy Stripes

There's nothing cooler and neater looking than candy stripes! Simple styling is indicated, with possibly a big collar and a big skirt and of course enough to hold the two together.

Free India Extends Rights Regardless of Caste, Race

One of the first tasks of the government of free India was to extend full democratic rights and privileges to every citizen, irrespective of caste, religion, or race.

Harijans or "children of God" (a name given to the so-called "untouchables" by Mahatma Gandhi) had long suffered social discrimination and economic degradation. The Nehru government on assuming power, nearly five years ago, declared the practice of untouchability a criminal offense. Later, India's constitution, inaugurated January 26, 1950, confirmed the Harijans' equality before law.

Now, the government is making special efforts to raise the economic and educational level of the Harijans. All government jobs are made available to them, and a certain percentage is reserved for them (12 1/2 percent in the federal services and 16 2/3 percent in other services).

Harijans or "untouchables" are being provided with economic opportunities. They are given facilities to organize cooperative societies; land is allotted to them for cultivation, and they are encouraged to learn gainful arts and crafts.

Scholarships and stipends are given to Harijan students who are unable to afford the cost of higher education. The central government's expenditure on Harijan education in 1950-51 was more than 2 1/2 times that spent before independence.

Worst Golfer in World Can Make Hole-in-One Here

The louisiest golfer in the world can make a hole in one at the Kilauea course in Hawaii national park.

No matter how frustrating play on the first nine holes may have been, he can tee off confidently for Halemaumau, which is a hole 1000 yards wide.

Halemaumau is a volcanic fire-pit, no golfer gets his ball back. But thousands of vacationers have walloped away for a good tale to take back home.

Some oldtime Hawaiians aren't so sure it's a wise idea, though, for Halemaumau is sacred to hot-tempered Pele, the Hawaiian volcano goddess. When aroused, she's a regular hellion.

Throughout the park, which stretches over sections of two islands, are weird lava formations and craters where Pele has rampaged by. Native guides spin hair-raising stories of her fiery life and deeds.

Largest portion of the tropic park is on Hawaii island in the land of Mauna Loa and Kilauea, active volcanoes fed by the same lava source.

Tree-Ring Studies

In the 1920's, the National Geographic Society sponsored a series of expeditions in the southwest, searching for clues to the history of pre-Columbian Indians in the ruins of such settlements as Pueblo Bonito in Chaco Canyon, New Mexico. In 1929, Pueblo Bonito was dated exactly by the tree-ring studies of Prof. Douglass—it's earliest timber was cut in 919 A.D.; it had reached its golden age in 1067, one year after the Norman invasion of England, and was still occupied in 1127. More than 40 other Indian ruins were fitted into the chronology, world archeology's most precise calendar of pre-history. Today, in the University of Arizona's Laboratory of Tree-Ring Research, a tree calendar written by desert conifers goes back to the year 11 A.D. Another has been traced in the giant sequoias of California to earlier than 1,000 B.C.

Favorite Colors

Checking up on color trends by seeking to discover what color paints America's homemakers were buying in the largest quantities, noted colorist Faber Birren made these discoveries. In one paint line that offered a selection of more than one hundred attractive colors, the most popular twelve were tones of gray, green, pink, yellow and blue. A company that has more than one thousand colors available reported that their twenty best sellers also included grays, greens, pinks, and yellows—as well as one deep green and one brilliant red. Such high style colors as charcoal, brown, copper, mustard and olive green, lilac and purple did not make the "best seller" list.

Tenderness in Steak

A good indication of tenderness is the presence of tiny streaks of fat throughout the lean part of the steak, a condition known as "marbling." This fat lubricates the meat, making it rich and juicy. The lean should also be firm, velvety and fine-grained. Any bones should be red and porous, a sign that the steak is not from an older animal, whose bones would be whitened in appearance. Fat on the edges of the steak should be white—not yellowish!

May Marriages

Rome considered May bad for marriage, but the prejudice against that month has been overcome in Christian countries. In fact, May is considered the ideal marriage period in some European nations.

GOOD CITIZENSHIP PROGRAM

The time has come when we can no longer sit down if we are to preserve our Republic. There will be a brief patriotic meeting at 10 a. m. on Election Day, November 4, at the Methodist Church. There will be a short program. Let's pray and think.

This is not politics—it is Good Citizenship. Sponsored by the General Federation of Women's Clubs.

Mrs. Leo Comer and Mrs. W. V. Bomar, Jr., spent Thursday in Amarillo shopping.

RED PREMIER... It was announced that the talks in Moscow between Chinese Prime Minister Chou En-lai (above) and high Russian officials were designed to implement and broaden Soviet-Chinese relations.

OFF TO EUROPE... Senator Estes Kefauver and wife Nancy rest in their stateroom aboard the S.S. United States just before the big ship sailed from New York to Europe.

PERFECT PRISONER... Nathan Leopold, who has spent 28 years at Stateville, Ill., prison for murder of Bobby Franks in 1924, teaches mathematics and has qualified himself in the field of medicine as an expert in X-Ray work.

PERILS OF POLITICS... Stanley Tretick, Washington photographer, has filed suit in district court for a quarter of a million dollars in damages against the GOP national committee for beating he allegedly received while covering Republican convention.

Advertisement for THE BAKER HOTEL and Baths. Includes text: 'feel like this? What you need is a REST... RELAXATION... CAREFREE ABANDON... For a REAL LIFT... amid beautiful surroundings.' and 'MINERAL WELLS, Texas'.

ON BITING WIND AND COLD AND SNOW... his numb fingers bent around an M-1 rifle... this soldier is living with the same hardships suffered by General Washington's troops at Valley Forge 174 years ago.

His equipment is immeasurably better than any those first Yankees could have dreamed of. His chances of survival are equally improved. But, like them, he is doing a grim, hard job for the defense of his country.

Defense is your job, too. It is your job to maintain and support America's economic strength as this soldier is supporting her military strength.

It's an easy job... and one of the best ways to do it is by buying United States Defense Bonds regularly. For with bonds and other forms of savings you are making yourself and your country stable and strong. And America must be kept strong—economically as well as militarily. For we must always remember... in this cold-warring world, peace is only for the strong!

Advertisement for U.S. Defense Bonds. Text: 'The U. S. Defense Bonds you buy give you personal financial independence. Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own can automatically go on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.33! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's too, buy U. S. Defense Bonds now! Bankers recommend them as one of the safest forms of investment.'

Peace is for the strong... Buy U.S. Defense Bonds now!

### Executive Says Back-Seat Driver Has Good Points

Back-seat drivers got a pat on the back recently from a leading motor vehicle executive. L. S. Harris, executive secretary of the American Association of Motor Vehicle Administrators, said a great safety service by asking that car passengers could "perform questions requiring an answer."

Pointing out that his statement also included drivers' mates, Harris said: "This doesn't mean I'm in favor of nagging wives, but simply that an occasional query from the back seat frequently helps to keep a day-dreaming driver alert and avoid accidents. If the driver fails to answer, he either needs to stop and take a breather or let someone else take his place behind the wheel."

**Recommends Coffee Stops**  
The motor vehicle official recommended that motorists make frequent coffee stops in the interests of highway safety.

"Pulling off the road every couple of hours for a wake-up cup of hot coffee has saved more than one life," he said. "Uninterrupted driving, like prolonged work of any kind, builds fatigue or drowsiness to a point that can be fatal. The tired driver is less vigilant, loses the ability to judge speed and distances, reacts more slowly to emergencies, and is less able to resist the glare of headlights."

He cited recently compiled figures of New York University's safety center to point up the importance of coffee stops to alert driving, particularly on long trips. The center survey revealed that the average driver makes from 20 to 30 decisions an hour—many of them of the split-second variety.

**Five Safety Rules**  
In extremely congested areas like New York City, "a driver is always less than a second away from an accident," according to the Center report.

Harris listed the following five safety rules as important to safer summer motoring:  
1. Start your trip when rested, not after a hard day's work when fatigue has already set in.  
2. Keep plenty of fresh air in the car as an anti-drowsiness precaution.  
3. Make a coffee stop at least once every two hours; walk around; stretch your limbs.  
4. Engage in light conversation with the passengers.  
5. In case of doubt as to your physical condition, pull off the road or go to a hotel and sleep.

### Year-Round Tomatoes Grown, Botanist Claims

An Australian botanist believes he has developed a method of growing tomatoes that bear all the year round. At the same time, the new tomatoes are claimed to be more resistant to frost and wind than ordinary tomatoes.

Three years ago Gilbert Pritchard, curator of the Botanic Gardens at Portland, in south-western Victoria, began experimenting by grafting tomatoes on a native shrub known as the kangaroo-apple.

For the past nine months, Pritchard has been plucking tomatoes from these grafted plants. Although he keeps the plants in a glasshouse, Pritchard says that they will withstand frost and wind more readily than the normal tomato plant.

The grafted tomato plants grow bigger than the ordinary plant and the grafting does not affect the tomato fruit in any way.

Pritchard expects that the grafted tomato will live for about three years in a glasshouse but considerably longer in a sheltered spot outdoors where the roots would have more room to spread.

### Helicopter 'Buses' Are Predicted for Australia

The possibility of helicopters, carrying eight to twenty passengers, replacing buses on outlying routes in Melbourne and Sydney, was referred to recently, by Ian Holyman, son of the managing director of Australian National Airways, who has recently returned from an extensive world tour.

Holyman, who was trained under A.N.A.'s cadetship scheme, studied airline operation in Malaya, Siam, Indo-China, most of the countries of Europe, Britain and the United States.

Cadet executives join A.N.A. at 18 and after a six-year course they spend a year learning procedure in various departments of the company and conclude their training with a tour of overseas airlines.

### Community Holds Dance To Raise Marriage Rate

BUCKSPORT, Me. — Bucksport's "Bachelor Ball" was a success, but how many couples it will speed to the altar nobody could tell yet.

More than 200 bachelors, bachelor girls, and married couples, too, attended the ball recently in the high-school gymnasium, decorated with hearts and arrows and cut-out cupids.

The civic groups that sponsored the affair had announced its purpose was to help young men and women get together to help push up the marriage rate.

### Fabulous Electronic Brain Is Success at Los Alamos

Atomic scientists at Los Alamos have developed a fabulous electric brain which they call the "Maniac." It can feed a number into its memory in as little as eight-millionths of a second.

Its designers say Maniac can work about 100,000 times as fast as a trained computer using a desk calculating machine. Even so, some of the problems to be solved at this birthplace of the atom bomb are so complex that Maniac is expected to require 20 hours or more to solve one.

The machine was designed and built by staff members of the University of California Los Alamos scientific laboratory.

"Maniac" stands for "mathematical analyzer, numerical integration and computer."

Lack of such a computer formerly has meant that many complex problems required in the laboratory's atomic weapons development work have had to be worked out by computing machines in other parts of the country.

### Tomb-Dwelling Bats Added To Smithsonian Collection

Tomb-dwelling bats found inside the pyramids in the sepulchral chambers of kings and queens of ancient Egypt have just been added to the mammal collections of the Smithsonian Institution.

Noteworthy among the bats is a species of *Rhinopoma*, or rat-tailed bat. Few bats have visible tails extending beyond the membrane between the rear legs. The particular species of *Rhinopoma* appears to be exclusively an inhabitant of Egyptian tombs. Very similar creatures, but specifically different, are found as far south in Africa as Lake Rudolph and east to Siam. These, however, are cave dwellers.

These tomb-inhabiting animals were obtained from the Great Pyramids of Gizeh, near Cairo and near the site of ancient Memphis. They are about the size of the ordinary American brown bat. Throughout the day they remain in the darkness of the pyramids, clinging to niches in the roof and walls. After dark they fly abroad seeking insects.

### Shuttle Scuttle

A vehicle which operates like an Army tank and looks like a yawning hippopotamus has been developed to shuttle coal from veins to cars far beneath the earth's surface. The shuttle car—as it is called—is powered electrically, its 600 feet of extension cable plugged into an outlet in much the same way as a household appliance. The cable is automatically reeled in or out as the car travels. The tank-like car is loaded by miners or by automatic mining machines. It in turn transfers the load to conveyances which will bring the coal to the surface. A distinctive feature of the car is its snout, which can be raised or lowered, enabling the machine to discharge its load by means of a continuous conveyor belt. The vehicle can turn on a dime, carry larger loads than conventional type shuttle cars, unload faster, and is built for either left- or right-hand drive.

### Book for Our Time

As long ago as the turn of the century, Bible scholars knew that the King James Version needed further revision. Recent manuscripts and archaeological discoveries showed that earlier versions contained thousands of errors. More than 300 words which meant one thing in 1611 meant something entirely different now. A committee of 32 scholars, authorized by 40 denominations, began work in 1937. After 15 years of research, study and debate, they have finished the Bible for our time. It is the Revised Standard Version, authorized by the National Council of the Churches of Christ in the U.S.A. The first printing is nearly 1,000,000 volumes—the biggest first printing in history.

### The Pyramids

The Pyramids of Egypt are ranked among the oldest monuments in the world. These triangular-shaped crypts, constructed of huge stone blocks, were burial places for the pharaohs. They were built in the epoch of the Ancient Empire (5,000 to 3,000 B.C.) near Gizeh, Egypt. The three most famous pyramids are Khufu (also known as Cheops) which is more than 480 feet in height and 780 feet at the base, with a 50 degree slope; the other two are Khafra (Cephren) and Menkaura (Mycerinus). Khafra is 471 feet high and Menkaura, the smallest, has an altitude of 215 feet. In construction of the largest pyramid, King Khufu employed 7,000,000 men at forced labor for 30 years.

### Miniature Trees

The Japanese produce miniature trees, called "bonsai," by an art that was developed in China and Japan many centuries ago. In some cases, naturally dwarf trees that grow in the mountains near the timber line are dug up and planted in pots or tubs. However, almost any tree, when it is young, may be placed in a small pot so that the root system is restricted and this checks the growth of the upper parts. As the tree grows, it is transplanted into slightly larger pots. Both the roots and the top are occasionally trimmed to keep the growth under control.

### 1952 Football Schedule

October 31, Estelline, there x  
November 7, Matador, there x  
November 14, Wheeler, there x  
November 21, Turkey, there x  
x Denotes district games.  
All night games.  
Kickoff 8:00 p. m.

Mr. and Mrs. Clayton Wood and daughter, of Amarillo, visited relatives here Sunday.

Mr. and Mrs. Elmo Seaney, of Morton, visited here last Sunday with relatives.

Mr. and Mrs. Floyd Dudley, of Sudan, visited Sunday in the home of Mr. and Mrs. Norlan Dudley.

Mr. and Mrs. Herman Roberston and family, of Cactus, spent the weekend here with relatives and friends.

Mr. and Mrs. R. E. Douglas, of Lubbock, spent Thursday and Thursday night here visiting relatives and friends.

Mr. and Mrs. W. A. Holt visited her sister, Mr. and Mrs. G. H. Boyce in Center, Colorado, from Friday until Tuesday of last week.

Mrs. J. W. Haynes, who has been visiting her daughter, Mr. and Mrs. Fred Porter, in Amarillo, for the past two weeks returned Thursday.

*There's nothing like a woman's touch!*

Even the hard-bitten U. S. Army recognizes that. And so some lucky soldiers—patients at Brooks General Hospital—will soon enjoy golden-crusty, apple-rich turnovers. Prepared with a woman's touch and a scientist's skill by these dietetic interns. They're lieutenants in the United States Army—doing a woman's work in a man's world—doing their part to protect your world.

You're on the "defense team," too—when you save your money, and protect your family, with United States Defense Bonds.

So why not start investing in Defense Bonds today . . . and get them regularly through the Payroll Savings Plan where you work. Thousands say it's the only sure way to save—because it saves something out of every check before you have a chance to spend it. And you know, no matter how small your income you can't afford not to save something for yourself!

**HERE'S HOW E BONDS NOW EARN MORE MONEY FOR YOU!**  
Now safe, sure U.S. Series E Defense Bonds pay an even better return than ever before . . . thanks to 3 brand-new money-earning features announced by the U. S. Treasury.

1. Now every Series E Bond you get begins earning interest after only 6 months. It earns 3%, compounded semiannually, when held to maturity. It reaches full maturity value earlier (9 years 8 months) and the interest it pays is now bigger at the start!
2. Every Series E Bond you own can now go on earning interest for 10 more years after it reaches the original maturity date—without your lifting a finger!
3. During the 10-year extension period, every un-matured bond earns at the new, higher interest (average 3% compounded semiannually). Your original \$18.75 can now repay you \$33.67. \$37.50 pays back \$67.34. And so on.

Start now! Invest more savings in better-paying Series E Bonds—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank!

*Peace is for the strong... for peace and prosperity, save with U.S. Defense Bonds!*

### HERE'S HOW

1. At the top of the Democratic Party column, strike out the names of Adlai E. Stevenson and John J. Sparkman
2. Leave the rest of the Democratic Party column as it is.
3. At the top of the Republican Party column, leave the names of Dwight D. Eisenhower and Richard M. Nixon.
4. Strike out the rest of the Republican Party column.
5. Strike out all other columns on the ballot.

## TEXAS DEMOCRATS FOR EISENHOWER

CLAUD H. GILMER, CHAIRMAN

### HOME OWNERS QUESTION BOX

Q—How can cracks be caulked to keep the caulking material from falling out after it hardens?  
A—Use the prepared caulking compound made for that purpose. It never hardens completely but stays plastic enough to move with the wood or other surrounding material as it expands and contracts. Caulking compound can be applied with a putty knife or a caulking gun. It can be painted.

Q—What are the new pastel roofing colors, and are pastel shingles suitable for all kinds of houses?  
A—Pastel shingles are new members of an already wide and accepted family of roof colors. They are soft, neutral blends that are slightly grayed. Red, green, and blue are popular. Aside from the color, pastel asphalt shingles are not different from others and can be used anywhere that other shingles can. Personal preference should decide.

Q—What causes fireplaces to smoke?  
A—Poor construction is one reason, of course. Another reason is that the flue is clogged, perhaps because the throat damper is closed. Like any other chimney, the chimney to a fireplace should be kept clean.

Q—Can lacquer be applied on top of varnish?  
A—No. The lacquer will act as a varnish remover and the finish of the wood will be smeared. Before lacquer is used, the old finish must be taken off completely.

**JUNIOR CLASS WILL SERVE FOOD SATURDAY NIGHT**  
The Junior Class will serve all kinds of food Saturday night, including hot dogs to chicken dinners from 6 to 9 p. m. on the football field and in the lunch room.

Rev. G. A. Elrod went to Childress Tuesday to meet Mrs. Elrod who has been visiting their son and family, Mr. and Mrs. Festus Elrod, in Texarkana.

Mr. and Mrs. D. F. Williamson, of Amarillo, visited his sister, Mr. and Mrs. Lem Weaver last week.

### Lions Clubs of America Would Have Large Vote

To the Citizens of Silverton and Briscoe County:

Are you slack concerning your duties, responsibilities and obligations? If not, you will vote November 4th, 1952.

The Lions Clubs of America with all other civic and patriotic groups have and continue constantly to advise and urge our citizens to study the issues before the people, and the respective candidates and then vote your sentiments. The good old U. S. A. is in this modern day one of the few countries where the citizen has the right and privilege to vote as he chooses and not have one party and one candidate thrust upon him the powers that be, but sadly enough, it is the country that has the least percentage of its citizens that exercise this great privilege; did you know that this neglect is a good way to lose this God given privilege. Another duty and obligation that we American citizens dodge is Jury Service.

The great lawyer, Edmund Burke, said: "The only thing necessary for the triumph of evil is that good men do nothing." Think about that great truth.

We are prone to say: 'Oh what does my one vote amount to anyway?' It amounts to a great deal; Let me give you briefly what just one vote has done in the past! The head of King Charles the First was chopped off by the vote of one judge, Rutherford B. Hayes was elected President of the U. S. A. by one senatorial vote; One farmer in Indiana by his vote elected Sen. Hannegan who in turn cast the deciding vote that made Texas a state of the union. (Some may wish now it had not been cast.) The states of Texas, Idaho, California, Oregon, and Washington entered the Union by one vote. The impeachment of President Johnson after the Civil War failed by one vote. One vote kept our selective draft law before Pearl Harbor. Lyndon Johnson went to the U. S. Senate from Texas by a scant 76 votes.

Adolph Hitler was first elected by a peoples majority; later they quit voting against him and the World War II resulted. Don't say 'It Can't happen here', for it is negligence of Civil duty that make such happen anywhere.

There are two places where men are equal in a democracy, in a cemetery plot and at the polling booth. So, study the issues and exercise this great duty and privilege. Vote as you please but vote on November 4th, 1952.

Fruit trees infested now with San Jose Scale should be given a temporary treatment and in the winter be thoroughly sprayed with a 3 per cent dormant oil spray.

**BEAUTY AND TALENT . . .**  
Marcia Crane, who is Miss Florida of 1952, is a talented water ski expert. She did not show her talent on the skis at Atlantic City.
