## Report On State F. H. A. Meeting In Fort Worth

Reports of the State F. H. A. Meeting, which was held in Fort Worth, April 22, 23, 24, were given by the delegates, Virginia Garrison and Betty Fitzgerald, at the home of Mary Watson Jones and Mrs. Una Burson Monday evening at 7:30.

Betty reported that the theme of the meeting was "A Happy Home Life For All." She said that at one of the meetings ways to have a happier home life was discussed in the form of a round table discussion by the delegates. They reached the conclusion that homes could be made much happier if all the members would discuss their problems with each other, and that a satisfactory plan can usually be found to solve the problems. Family singing, family story telling, and family prayer were also given means of promoting better family relationships.

Virginia reported that the F. H. A. Constitution and By-Laws were revised and that 245 state degrees were conferred.

Janet Turner, Vice President of the Silvertown Future Homemakers Chapter, presided at the meeting.

Mr. Robert Ledbetter led the group in a sing-song and taught them two new songs. All of these songs were sung with much enthusiasm.

Shirley Elms presided at the punch box, which was filled with a yellow fruit punch. Cookies and nuts completed the refreshments. A center-piece of lilacs decked the center of the table. FOR YOUR CAR

Only in Phillips 66 Flite-Fuel do you get the added super aviation fuel component, Di-isopropyl (pronounced di-iso-pro-pull). This special clean burning power component is a Phillips exclusive—developed originally for highest powered military aircraft.

Phillips Petroleum Company was the first to make Di-isopropyl and HF Alkylate, so valuable to smooth motor performance that, until recently, their use was restricted by the U. S. Government to high performance aviation gasoline. Now authorities have removed restrictions and these powerful components can be blended into Phillips 66 Flite-Fuel.

New Phillips 66 Flite-Fuel provides increased power, higher anti-knock, greater fuel economy, and freedom from cold stalling.

In addition, Phillips 66 Flite-Fuel gives you the clean burning qualities that result from use of natural and aviation gas components. No anti-fouling additives are needed to insure maximum power and efficiency when you drive with Flite-Fuel.

Only Phillips 66 Flite-Fuel contains added Di-isopropyl. Get it at stations where you see the orange and black Phillips 66 Shield.

## The World As I See It

Doris Amburn

My mother used to call our 1/4 acre plot a farm, so I guess I grew up on a farm. That remark was due to the fact that there was constant work keeping flowers, the garden and orchard hoed, and everything in general. But living at the edge of a small town, my growing-up years found me doing the jobs that were available. So I covered quite a bit of territory on my knees pulling a cotton sack, chopping cotton, or gathering the fruit for a fruit farmer. Now I can think of things I can and had rather do than do those jobs, but then as now most of the time I enjoyed to work out

in the open (when it is not too hot of course), and feel the cool winds about my face, and at the end of a day enjoy the wonderful feeling of how good it is just to get to take a warm bath and relax in the comfort of a bed. I guess that is a pretty good way to rear children, as it stood just plain rest was a luxury at times.

To me now there is nothing more relaxing than to come in from my day's work and don my old, and most of the time rumpled clothes, and go out for a while to work and dig and plant in the yard. I find that other people share this same feeling—able to leave the cares of the day behind, and find peace and comfort in the quietness of the out doors.

Despite my efforts through the years I can't really say that my results are very good. I do fairly well at growing onions and gladiolas. I'm gabbing again this year—a row of onions and a row of gladiolas. I'm glad that I am able to receive inward strength and outward pleasure from growing things

# KEEPING UP!

In line with latest methods of telephone billings procedures, the cooperation has just installed a micro film process for billing its long distance calls to the cooperate's subscribers.

Beginning with the April 1st bills, the original toll ticket made by the operators will be sent to the subscriber and a tiny photograph of the ticket will be kept on file for reference.

This will result in more information to the subscribers, fewer error and less cost of billing.

Yours for better and more progressive telephone service.

## NO MONTHLY CRAMPS... not even on the VERY FIRST DAY!

Doctors' tests show amazing preventive effect of pain, backache, nervous feelings

Women and girls who suffer from the functionally-caused cramps, backaches and headaches due to menstruation—who feel upset and irritable on certain "particular days" every month—may be suffering quite needlessly! Such is the conclusion from tests by doctors in which Lydia E. Pinkham's Vegetable Compound stopped or gave amazing relief of such distress in 3 out of 4 of the cases—even on the very first and worst day of the period! Testimonial evidence given by Lydia Pinkham's

men is given. It starts a remarkably relieving effect on the uterus—without the use of pain-killing drugs! The effectiveness of Lydia Pinkham's needs no proof to the millions of women and girls whom it has benefited. But how about you? Do you know what it may do for you? Take Lydia Pinkham's! See if you don't get the same relief from cramps and weakness... feel better both before and during your period! Get either Lydia Pinkham's Compound, or new, improved formula, with added iron! Lydia Pinkham's is wonderful for "hot flashes" and other functional distresses of the "change of life," too!

Lydia Pinkham's has a quieting effect on the uterine contractions (see chart) which may often cause menstrual pain.

# NO BREADLINES WANTED

The question of employment is a vital one for it concerns your job, your chances for advancement and your security. Of course, the answer to the question of employment here depends upon how good business is in Silverton and how much better we can make it by patronizing local business firms.

People who consistently trade out of town or with mail-order houses may

soon trade some local person out of a job because a local business can no longer afford to use his services. Let us all determine right now that we'll never let Silverton have a bread line or become a ghost city because we foolishly traded out of town rather than with our local business establishments. The prosperity of our town depends upon all of us, let none shirk his duty.

SAVE ALL THE MILK ONCE FED CALVES

Purina's new research discovery - Nursing Chow - allows you to take calves off milk when only 3 days old. Calves get Nursing Chow for only 30 days. Dry Calf milk is kept before them the 3rd day to 4 months of life. Milk is withheld for the 2 months. The plan has 4 advantages:

- 1. Saves about 1/2 as much as milk-feeding.
- 2. Makes heavier, growthier calves.
- 3. Saves labor than milk-feeding.
- 4. No trouble from scours.

Incidentally, after this example several agreed that it is feeding rather than breeding that's losing farmers money every year.
