What could be nicer than riding with a ton and a half of ice in your car these hot days? Real cool thought, say you, but impractical. Yet that's exactly the effect with Chevrolet's new air conditioner. Vital part of the apparatus is a comparatively small compressor, scarcely larger than a football, which is shown above on one of the ice cakes that total 3,000 pounds. Mankind today is still living in a troubled world! The struggle for freedom still goes on just as it has down through the ages.

Habakkuh, in the book of Habakkuh, inquired, "How can a loving and just God permit a foreign government to treat human beings so cruelly as the Chaldeans did the Israelites?" Today men ask similar questions about the inhumanity of some foreign powers and perplexing problems and situations in our own country that threaten our very freedom.

The Book of Habakkuh conveys a message that we all need today -- "The just shall live by His faith".

The Church is a symol of that faith, and so long as men may look to their Church for help and guidance, so long will the fires of freedom burn.

Today we need our Churches as never before, and our Churches need us, So for the sake of freedom, God and country, let's support our Churches to the utmost. Let God, through our Churches, solve our perplexing problems.
