**INSIDE—THE FUTURE OUTSIDE**—That might well describe the architects design of the new National Cowboy Hall of Fame and Museum at Oklahoma City, for which the first \$1 1/2 million will start construction this autumn. Somewhat unusual in design, the open spaces of the west, cool pools and the shape of a trail camp cook fly are all caught here. Among national trustees for the fine are Gov. Daniel, J. Everts Haley, Canyon and A. M. G. Swenson, Stamford.

## Disabled Persons Under Age 50 Should File Application

June 30, 1958 is an important date for disabled persons under age 50 who have not filed an application for a disability freeze according to John R. Sanderson, manager of the Amarillo Social Security Office.

Failure to file by June 30, 1958, may cause a loss of rights to disability insurance benefits payable at age 50 and to benefits payable at retirement age. Failure to file could also cause survivors of the disabled person to lose survivor's benefits in case of the death of the worker.

All social security payments are based on your average earnings over a certain period of time. If you are disabled over a long period of time and had no wages or self-employment income this could cause you to lose your insured status. Filing for a disability freeze could have the effect of freezing your record during the time you are disabled. This period would not be counted when your average earnings figured, John R. Sanderson said.

If you have been disabled for 6 months or more and have been unable to work because of your disability you should contact your nearest social security office, if you have not already done so. If you know of someone who is disabled and has not contacted the social security office you would be doing him a favor if you told him of this important date John R. Sanderson added.

## The Lady was Willing

Recently a service station attendant changed the oil in a car with 23,000 miles on the speedometer. He noticed that a lubrication job was also badly needed, so he politely suggested it to the driver. She replied, willingly enough, "Go ahead if you want to... but I thought all that was done at the factory!"

Of course, this couldn't happen to you, but with cars getting more and more complicated every year, proper and frequent lubrication is more important than ever.

Phillips 66 Dealers specialize in lubrication. They have complete charts and specifications for all makes of cars, and what's more, they use them! Stop in next chance you get and watch how thorough Phillips 66 attendants are when they lubricate a car... it's a pleasant surprise for most motorists!

### Jehovah's Witnesses To Meet in Borger April 18th and 20th

Nineteen Kingdom Halls in the Texas-Oklahoma area of Jehovah's Witnesses Texas Circuit No. 9 will be closed and all local meetings suspended over the weekend of April 18-20 when the congregations will meet together in their spring circuit assembly at the Central Elementary School in Borger, Texas.

All phases of the regular local activity schedule will be incorporated in the assembly program, which will also contain many other instructive features revolving around the theme, "Fulfilling Our Ministry."

V. D. Tiffin of the Quitaque congregation who released this information said, "Extensive preparations are being made to accommodate visiting witness delegates and others who wish to attend the Borger meet. If they desire, they may obtain lodging through the assembly rooming department at the convention site. A witness-operated cafeteria will also function for the benefit of the delegates. Many other needs of the conventioners have been anticipated and cared for to make them comfortable while in Borger."

"The circuit's last semi-annual assembly was held in Amarillo, with a peak attendance of 682 persons. Preparations are being made to accommodate at least this many in Borger."

"Throughout the assembly a special effort will be made to invite all interested persons to hear the timely free public lecture, 'Facing the Future Without Fear', by Kenneth R. Savoy of Brooklyn, N. Y. Sunday at 3 p. m."

"By explaining the scriptural prophecies concerning God's purposes for our day the speaker will show how true fearlessness can be attained."

All assembly sessions are free and open to the public.

Mr. and Mrs. C. T. Wallace returned home from Strathmore, California, on Wednesday of last week where they have been for some time on account of the critical illness of their son-in-law, Loys Rowell; there has been little if any change in Mr. Rowell's condition for some time and he is critically ill.

Mr. and Mrs. W. N. West spent the weekend in Slaton guests of their daughter and family, Mr. and Mrs. Kenneth Jones and children.

Mr. and Mrs. Ben Bingham went to Amarillo early Sunday to meet Mrs. Claude Loudermilk, of Bentonville, Arkansas, who has come for an extended visit with local relatives. Mr. and Mrs. Gerald Smith and Dale, of Quitaque, came up Sunday morning to spend the day with Mr. and Mrs. Bingham, Benny and Judy and Mrs. Loudermilk. Mrs. Loudermilk is the mother of Mesdames Smith and Bingham.

Benny Bingham has recently had an unusual experience; a parakeet bit him on the lip several weeks ago and proud flesh set up in the wound and had to be burned out. A doctor in Lockney gave him his final treatment on Thursday of last week.

### Improved Cotton and Sorghum Yields With Phillips 66 Ammonia

Martin Schur, Plainview, Tex., says: "I farm 420 acres, and last year I ran 30,000 pounds of Phillips 66 Agricultural Ammonia through my rig. That shows how I depend on this fertilizer to give me high yields of cotton and maize. I put all my Phillips 66 ammonia down pre-plant, in order to get the job out of the way before the busy spring season."

Other Southwestern farmers have discovered that 82% nitrogen from top quality Phillips 66 Agricultural Ammonia helps them get more profit per acre through higher yields. They get more cotton that classes higher at the gin... yields of sorghum grain and ensilage are increased... more marketable vegetables are harvested... and profits on wheat are increased through higher yields of grain and extended grazing periods.

Phillips 66 Agricultural Ammonia contains 82% nitrogen and gives you more nitrogen per dollar than any other form of commercial fertilizer available.
