## OWLS WORKING OUT UNDER NEW COACHING STAFF

Silverton High School Coaches, Robert Whelchel and Willie McAlpine have been busy with two Owl workouts each day. They are hopeful of the team's chances, but remind that it is too early yet to make a statement along that line. The Owls showed up well in scrimmage last Tuesday night.

Silverton High School has acquired a new assistant coach for the 1960 football season. His name is Willie McAlpine and he is a graduate of West Texas State College. His wife's name is Jackie and they are parents of a little three-week-old baby girl. Coach McAlpine is originally from Spur, Texas.

Robert Whelchel, who was assistant coach last year, has taken over as head coach for the coming season.

Tri-captains, Joe Anderson, Mike Mercer, and Guy Breedlove, will all be seniors at Silverton High this year. Both Mike and Joe have played football three years whereas Guy has played two years.

At present both coaches feel it is too early to say what the team is going to do in actual play, because about six boys who will be playing on the team are still holding summer jobs. When all boys have reported for practice the coaches will be better able to judge the team's potential.

Every boys on the team is showing true spirit and is working strenuously. We hope that Bobby Kitchens and Eldon Oneal, who were injured in the first practice session of the season, will soon be out on the football field working out with the team. We know that, although they can't join the team in practice and scrimmage, they are cheering and boasting their teammates onward.

We want to wish Coaches Whelchel and McAlpine and all the players on the team the best of luck in the coming football season, and we want to encourage everyone to support the team 100 percent and be for them either in the face of victory or defeat.

last week. On Wednesday Mrs. C. O. Allard brought me a bouquet of the largest and most perfect purple asters I have ever seen. She picked them in the shower, and they were just exquisite with the dampness on them — beautiful flowers from a lovely lady.

NEWS from the High Plains  
Research Foundation

Seventy-nine acre feet of water was drained by gravity flow into the underground water sand from the Playa lake on the High Plains Research Foundation at Halfway between July 4 and August 4, 1960. Since June 19, 1959, one hundred and eighty-five acre feet of lake water has been stored in the underground sand from the lake.

The value of one acre foot of water applied to cotton has been estimated at \$65.00 an acre foot. If this 185 acre feet of water had been used to irrigate cotton the value of the water thus applied would be \$12,025.00.

This water thus stored was saved from evaporation and added to the underground water supply for future irrigation. This added water supply will be the first used in subsequent irrigations.

The recharge process, bench leveling and other water conservation research will be displayed at the Foundation's Fourth Annual Field Day on Wednesday afternoon, September 14th.

Of special interest to the members was the addition of new EAS and toll trunks and more lines of equipment, which means quicker and more adequate service to the various exchanges throughout the entire area served.

Another goal that has been realized is the establishing of an insurance and retirement plan for the employees. Telephone cooperatives are competing with major telephone companies for labor, and this realization will encourage and attract qualified employees.

The members enjoyed as entertainment the featured film of the evening "Unchained Goddess." Also a Frito Pie supper was served to approximately 180 persons preceding the program.

Those who received door prizes were B. L. Graham, Henry Hamlin, W. R. Stockett, H. G. Persons, Mrs. Wade Steele, Eddie Mahler, Edwin Crass, Arthur Sammann,

### THOUGHTS FOR THURSDAY

(from The TULIA HERALD)

by H. M. Baggary

Middle age is a time when we humans begin to show our mileage. Our breath shortens. We trade our reading glasses for bi-focals. Our stomachs grow sensitive.

We begin to note the rugged endurance of high school youngsters with whom we can no longer compete. They seem almost impertinent at night when they take one look at our glass of milk and order a hotdog bathed in chili and wash it down with something they call a "suicide."

We envy their physical make-up which has not yet succumbed to the rigors of age, their unwrinkled brows, their youthful gait—and most of them have hair!

Youth has traditionally been a treasure. Ancient explorers looked for its fountain. Heaven is pictured as a place where "we'll never grow old."

But with all its virtues, we must all admit — and recall — that youth is not a bed of roses.

One disadvantage of youth is its lack of maturity.

Youth is a time when people do queer things, make unwise decisions, exercise faulty judgment. Youth is impulsive, often acts — and later thinks.

We've all watched infants in trouble. They turn over their glasses of milk, miss their mouths when they try to eat, stumble and fall. They are clumsy and their equilibrium is easily upset.

Fifteen years later they have mastered most of these infantile characteristics — but they are far from maturity. Instead of being infantile now they are juvenile. One stage is as treacherous and hazardous as the other.

Juveniles often make illadvised remarks, they speak at the wrong time, they make the wrong decision. They require patience and understanding.

Whenever an adult becomes overly sensitive to the strange behavior of teenagers, he needs only to review his own history.

Life is largely mental. Few things enrich life more than the acquisition of wisdom, experience, and training. And these attributes come only with age. Some learn sooner than others, but in any event, years are required.

While we may envy a youth and his agility and health, we do not envy him the wisdom, training and experience he has not yet acquired.

All of us should be proud of our years just as the Chinese who consider youthfulness something of which to be ashamed.

We would say that the advantages of age outweigh the disadvantages.

A comfortable old age is the reward of a well-spent youth. Instead of its bringing sad and melancholy prospects of decay, it should give us hope of eternal youth.

Life has its compensations. What the normal person loses physically, as the years race by, he gains mentally and spiritually as he leaves behind the woes of immaturity and

### Small Girl Is Attacked By Dog

Della Rodriguez, 6, daughter of Mr. and Mrs. Raymond Rodriguez of Silverton, suffered serious injuries about the face at about 2:00 p.m. Wednesday, August 17, when she was attacked by a dog.

The youngster had been playing in the yard at the Rodriguez home for sometime when members of the family heard her scream. Her face was bleeding and one eye was badly injured before they could rescue her.

They chased the dog away from the youngster who was lying on the ground, and a short time later a

small boy in the neighborhood tied a rope around the dog's neck and tied him.

Neighbors explained that the animal belonged to a family who had been working in Hereford. It was said that the animal had shown signs of viciousness and had been made to destroy him.

Briscoe County Sheriff John Lanham took the injured child to Swisher County Hospital in Tullahoma, Tenn. She was transferred to St. Anthony's Hospital in Amarillo. Her condition has been reported as much improved, and it is now thought that the doctors were able to save her eye.

Rodriguez is an employee of Fogerson Lumber and Supply in Silverton.

### HOW CHOSEN!

The Bible teaches that the great plan for the salvation of mankind was in the mind of God even before the creation of the world (2 Thess. 2:13). Thus the Lamb was slain from the foundation of the world (Rev. 13:8) and the saved were chosen from the foundation of the world (Eph. 1:4).

This latter point has been confusing to many since they cannot understand how Christians can be chosen from the foundation of the world yet why everybody is encouraged to accept Christ's invitation to be saved. They think that if certain ones were chosen to be saved then all others must be lost and cannot change it. Then how to harmonize this with the world-wide invitation becomes impossible. The trouble is that this reasoning is fallacious.

If we think of a certain KIND of men chosen rather than certain ones chosen the matter will be clear. A certain kind of men were chosen. Before the foundation of the world God chose the kind of men that would be saved during our age. What kind of men did He choose?

God chose all whom obey the gospel (Matt. 28:18-20; Acts 2:38). To obey the gospel one must hear the Word (Rom. 10:17), believe in God (Hebrew 11:6), repent of sins (Acts 2:38), confess faith (Rom. 10:10; Acts 8:37) and be baptized to wash away sins (Acts 22:16). Those who do these things are the "chosen." God chose a KIND of men rather than certain individuals.

Therefore all men are encouraged to obey the gospel (2 Peter 3:9; Rev. 22:17). Those who obey are "chosen." Those who do not obey are not "chosen." God decided before the foundation of the world that all who obey the gospel in our age would be saved. Have you obeyed the gospel? encourage you to seek the truth in God's Word and to obey it. The Bible is the FINAL AUTHORITY in religious matters.

The Silverton church of Christ extends to you a hearty welcome to worship with us.

Wheat yields increase 12 to 20 bu. per acre with ammonia application

Well-known West Texas farmers like WADE MILLS apply 100-120 lbs. ammonia per acre on wheat

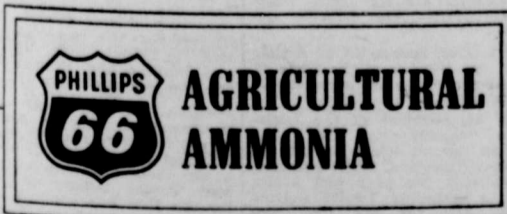

Wade Mills, who farms approximately 765 acres in Castro County, reports: "The first time I used ammonia on wheat land I got increases from 12 to 20 bushels per acre. We applied 100 to 120 pounds of Phillips 66 Ammonia per acre.

"Applications of 120 pounds of Phillips 66 Ammonia on maize land has produced an average increase of 2000 pounds per acre. On maize following maize, Phillips 66 Agricultural Ammonia

is a must," he explains.

Thousands of Texas farmers are using Phillips 66 Ammonia to help assure top net profits per acre. Actual field reports prove that Phillips 66 Ammonia (1) boosts wheat and small grain yields (2) increases maize yields (3) produces more high grade cotton (4) improves forage production.

See your local Phillips 66 Ammonia Distributor now. You can depend on better ammonia service.

Ranch Scene To Be Catalog Cover

This scene, taken at the Mary Fain ranch, just beyond the Cana- dian River north of Amarillo, will appear in full color as a catalog cover. Cecil Seaney, ranch foreman, is taking a count in one of the pastures. O. M. Franklin Serum Company will distribute 400,000 cop- ies of the catalog about January 1. "This will be the largest distribu- tion of one of my pictures," said artist George Williams, whose large tinted murals hang in lobbies of many banks on the Golden Spread. Seaney, who has worked for a number of years on the Fain ranch, is the son of Mr. and Mrs. George Seaney of Silverton, and his wife is the daughter of Mr. and Mrs. A. C. Barrett of Quitaque.

Time To Sample Soil For Fall Crops

College Station — Fall planting time is not too far away, and plans should be made now. Fertilizers and lime cost money, and guess- work on how much to apply is not efficient farming. Dr. W. F. Bennet, extension soil chemist, says the only way to eliminate this guessing is to have the soil tested.

The farmer must remember that soil samples are of very little value unless they truly represent the actual soil conditions of the field. Soil samples may be taken in several different ways, but Dr. Bennett says that anyone tak- ing a sample must remember a few basic requirements. These in- clude:

Take one sample from each uni- form area in the field. A representative sample may be obtained by taking a slice of soil 4 to 5 inches deep, and re- peating this at 15 or 20 differ- ent places over the field. Spade, soil augur, soil probe or garden trowel may be used to take a sample.

All of the small portions from a single field should be mixed and a composite sample taken and placed in a soil carton. All blanks on the soil carton and information sheet should be filled out completely. Samples should be taken early

FARM HOUSING REGULATIONS ARE CHANGED

Under a recent change in the elig- ibility requirements for Farm Housing loans, a farmer who owns a farm that will annually produce for sale or home use at least \$400 worth of commodities may, if he meets other eligibility require- ments, be able to obtain a Farm Housing loan.

Previously, according to Ralph E. Griffiths, Farmers Home Admin- istration County Supervisor for Swisher and Briscoe Counties, an applicant had to own a farm that would produce a substantial amount of the operator's income.

Farm Housing loans are made by the Farmers Home Administra- tion and are used to construct and repair needed farm houses and farm service buildings.

Other eligibility requirements for Farm Housing loans remain unchanged. These requirements are that the applicant lacks the resources needed to obtain credit

enough to insure plenty of time for testing. Soil cartons, informa- tion sheets, mailing instructions and additional information may be obtained from the local county agent, Dr. Bennett concludes.

SOIL CONSERVATION DISTRICT NEWS

This is a good time to seed a rye cover crop especially on cotton or fallow land. With the good moisture we have, rye should make good growth for grazing, soil improvement and protection against wind erosion. Rye, as well as other small grains, are good soil improving crops as they add organic matter to the soil and improve the condition.

R. L. Brunson of Quitaque has just finished seeding a large acreage of rye in his cotton land. He seeded his rye with a new Cyclone seeder owned by the Caprock Soil Conservation District. This seeder fits on the front or rear of a tractor and is operated by an electric motor.

Others who plan to seed rye in their cotton soon include Jack Edens and Robert Salmon at Antelope Flat and Freeman Tate near Quitaque.

Using the new District seeder appears to be an excellent way of getting a cover crop established on cotton land that would otherwise be very subject to wind erosion. Now is the time to get cover crops established for maximum results.

Others interested in obtaining the District seeder for use can contact one of the Supervisors or the S.C.S. office about it. It can be rented at a very nominal fee.

The Master of Life

Rev. Norman S. Ream

Can you imagine Jesus being called the Master of Life if his prescription for men's physical, spiritual, and mental ills was always, "Go to Rome and get Caesar to pass a law?" It is ridiculous on the face of it. Jesus was called Master because he knew and understood the power of God and what it alone could do to enlighten the minds of men groping in a world of darkness. Men in His day as men in our day, needed a new mind and a new spirit if evil were to lose its attractiveness, and goodness, virtue, and morality to become men's highest goals.

One of the great tragedies in modern man's life is that he no longer thinks religion to be very relevant to his problems. This has been the blasphemy of much of the so-called Social Gospel. It tends to substitute the powers of this world for the power of God. More laws, more social welfare legislation, complete cradle-to-the-grave security, will solve all of man's problems, for his problems, according to this philosophy, all stem

most everyday someone suffers a  
painful snakebite through negli-  
gence.

# AN ANNOUNCEMENT

OF  
**A Reduction In Interest Rate**  
TO  
**6 1/2%**

**Effective August 15, 1960**

The Association borrows all the money it lends from the investing public  
(corporations, individuals, banks, etc.) through the Intermediate Credit Bank at  
Houston. Interest on this money largely determines the interest rate the Assoc-  
iation charges.

Cost of money on the Nation's money markets has declined in recent months.  
This reduction is therefore passed on to those who borrow from the Association.
