### Silverton Talent To Appear in Rodeo

Officials are expecting Snooks Baird and other Silverton rodeo talent to be among contestants in the Crosbyton Rodeo, June 20, 21 and 22. Crosbyton Lions Club is sponsoring the event.

"It will be a good fast rodeo," said Harry Jung, Crosbyton Lions president. "We plan to run it off in two hours sharp."

The organization has been working hard on its first revival of the traditional Crosbyton event in two years. Although an independent group staged one last year, local rodeo association was already defunct.

Jung says plans call for a different specialty act every night to enliven proceedings. There will also be several children's events.

Jack Aufill of Lubbock will produce the show. Whatever the added attractions, staple entertainment will continue to be roping, bronc riding and bull rassing.

Mr. and Mrs. Haun Kite and Dana returned home early last week after having spent ten days at Elsie, Nebraska, where Brother Kite, minister of the Silverton Church of Christ, held a revival and assisted in a Bible school.

Mrs. Raymond Cantwell, Randy, Doris and Norma and Ninette Martin have recently spent a week in Kerrville. They will also visit in Houston and Fort Worth before their return this week. Norma will remain in Houston for a longer visit with her sister, Mrs. Jean Dement.

**NEW CHEMICAL INSECT CONTROL DEVELOPED**

Olin Mathieson announced the marketing of a new early season insect control on cotton. The new chemical, called BIDRIN (R) insecticide label, was approved by the United States Department of Agriculture for use on cotton April 1, 1963.

Bidrin is a systemic insecticide. It kills some insects by contact, but its greatest asset is that it kills most sucking and chewing insects by systemic action. When Bidrin is applied to growing cotton, it is almost immediately absorbed into the plant. Its killing action to insects in the plant may last from one to two weeks. Since most of Bidrin applied to cotton plants is absorbed it is not available on the plant surface. Hence, beneficial insects develop in a normal way. In a 1962 cotton season, Bidrin was used with good results for thrip control on 1500 acres of cotton of lands of the Texas Prison Farm System.

The new chemical (dimethyl Phosphate of 3-hydroxy N, N-dimethylcrotonamide) is a water-miscible product. For foliage applications, the correct amount of technical Bidrin is mixed with sufficient water to provide uniform coverage.

For control of thrip, fleahoppers, aphid, spider mite and overwintering bollweevil, Bidrin is applied at the rate of 0.1 pound to 0.2 pound per acre of cotton. For control of lygus bugs on cotton, Bidrin is applied at 0.5 pound per acre.

Bidrin comes packed in one quart containers, six per case. Each quart contains 1.8 lbs. of actual Bidrin and will treat 18 acres at .1 lb. per acre or 9 acres at 2 lb. per acre.

COST OF CHEMICAL 70c PER ACRE.

**WITH THE FULL MIGHT OF NITROGEN**

It's now or never for this year's cotton and grain crops. The nitrogen needed for an abundant, high quality harvest should be applied before the 12th week of growth or before the plant begins to boot or bloom. Anhydrous ammonia supplies this nitrogen in the largest quantity by volume and in the most usable form. We recommend and sell Shamrock Nitromite because we know it to be a fine brand of anhydrous ammonia, 82.2% nitrogen.

### GUIDE FOR BUYING A NEW POLAROID ELECTRIC EYE CAMERA

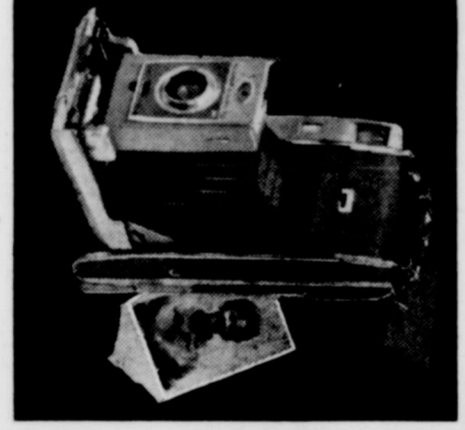

The J66 KIT **89.95**

Fully automatic, no focusing, nothing to set - the J66 is the simplest Land Camera ever, and it costs about the same as the first Land Camera model on the market! All you do is aim the camera and snap and, of course, your picture is ready in just 10 seconds. No extra light meter, either. You don't need an expensive light meter. Even the flashgun is built right into the camera.

The J33 KIT **69.95**

The brand new J33 Polaroid Land Camera has all the exciting automatic features of the J66 but makes a smaller sized picture - just the size to fit conveniently in your wallet. The price, lowest of all the Polaroid Land Electric Eye Cameras, puts 10-second automatic pictures well within the reach of every budget.

The 850 KIT **139.95**

This is the most sensitive electric eye camera in the world - of any kind! Its tiny micro-eye is capable of adjusting both lens and shutter speed even in a dimly lit living room. And with the Polaroid milk-light you can forget about the expense and bother of flashbulbs for all your indoor pictures. This is the deluxe Polaroid Electric Eye Camera.
