Vote YES on Constitutional Amendment No. 1.

For the agricultural community in Texas to survive, the successful passage of Constitutional Amendment No. 1 is essential. It allows land used for raising crops or stock to be valued for what it produces in agricultural pursuits—not for what it could be sold in the speculative land market.

On the average across the nation, farmers and ranchers are realizing only a 1.5 per cent return on their investment. Taxes continue to rise; income continues to dwindle. These producers of food and fiber for a growing and expanding economy are being penalized because land values have skyrocketed far past the point where the land can produce in agricultural pursuits—a satisfactory return.

And, since taxes are based on the "reasonable cash market value" of a piece of property, this means land currently is being considered for its "selling price" instead of its "producing ability." Constitutional Amendment No. 1 would remedy this situation by allowing land designated for agricultural use to be assessed on the consideration of only those factors relative to such agricultural use.

There are adequate safeguards in the Amendment to prevent its misuse.

For one thing, land must have been used for agricultural purposes for the past three years before it can qualify for the lower rate. Another safeguard is that the county tax assessor-collector keeps a ledger on what the regular taxes would have been. If the land is taken out of the agricultural category, the difference between the two tax rates becomes payable. The use of the benefits from this Amendment is limited, also, to those who receive a majority of their income from agricultural pursuits. The valuation of mineral rights is not affected by the special assessment provisions.

The purpose of this Amendment is to protect farmers and ranchers from the soaring costs of speculative land sales—sales over which they have no control. It will help preserve the family farms.

Christmas Mailing Underway Now

The period of October 21 to November 10 has been designated for mailing Christmas parcels and greeting cards by surface transportation to members of the Armed Forces overseas. For airmail parcels, the period is December 1 to December 10.

All articles should be packed in boxes of wood or a good strong fiberboard box and be securely wrapped in heavy paper and be well tied with a strong cord. Also the address should be on the package in ink, and sufficient cushioning material should be used to prevent any rattling or loosening of articles within the package. You must mail early to be sure of getting the package there by Christmas.

Greeting cards prepaid at the first class rate may be sealed and contain written messages and will be given priority of dispatch, delivery and forwarding. Undeliverable first class mail is returned to sender at no additional cost, provided the return address is shown on the envelope.

It would also help the local Post Office if everyone who mailed Christmas cards would separate the local Christmas cards from the out-of-town Christmas cards before mailing them.

If you know the ZIP Code, be sure to put it on all cards, letters and packages.

"We would like to thank everyone in advance for their cooperation," said Fred A. Strange, Postmaster.

Farmers who diverted acreage under the 1966 feed grain, wheat and cotton programs will soon be able to graze this acreage without losing program benefits, Louie Kitchens, chairman of the Agricultural Stabilization and Conservation committee of Briscoe County, has announced.

The Chairman stressed, however, that this program relaxation regarding use of the acreage applies only to grazing the acres diverted from commodity production. Hay on such acreages still may not be harvested.

Land diverted under the Conservation Reserve Program may not be grazed or harvested through the whole year.

Short Guide to Mattress Buying
Shop at a reputable store. Buy the best you can—it will cost less in the long run. A "bargain" mattress can cost you rest as well as the price of an early replacement.

Test several mattresses by stretching out on them. Make sure the ticking is closely woven, the borders and edges are reinforced against sagging. Read the label to see what's inside the mattress. The best in bedding is a quality mattress constructed with steel innerspring coils and a box spring to match.

King Louis the Fourteenth of France had 413 beds. Today most of us have just one and we don't always buy that one with as much care and attention as we should. Since the average person spends close to one-third of his life sleeping, a good bed is as important as a good chair. Steel innerspring coils plus a quality box spring mean good sleeping.

Plan now to Farm for Profit

My job is to make your fertilizer program work harder to build big crop yields and extra profits for you. Everybody knows that fertilizer makes crops grow. But my business is to help you make every ton of fertilizer produce a bigger return for you.

My experience and background in fertilizers and crop production are good. But my knowledge is valuable only if I put it to work for you. I know the plant food needs of the soils and crops in this area. I know what successful farmers are doing to make their crops make more money.

I am ready to work for you in planning as well as in applying ARCADIAN® liquid plant foods for your fields. I can save you time, labor and money in even, accurate distribution of liquid plant foods. I can add minor elements, herbicides and insecticides to your liquid fertilizers as needed.

I am prepared with the modern, efficient, labor-saving liquid fertilizer program that can help you farm for greater profit. My job is to help you make money.

**I bought my
first Savings Bond
25 years ago**

I was 14 years old

**NOW
PAYING
4.15%
WHEN HELD TO
MATURITY**

Mr. Jack Benny, distinguished star of the entertainment world, may not have a computer's memory when it comes to his age, but his dates are accurate about Savings Bonds.

The first Series E U.S. Savings Bond was issued 25 years ago on May 1, 1941, by Secretary of the Treasury Henry Morgenthau to President Franklin D. Roosevelt.

Mr. Benny was already famous as a radio comedian (the youngest in the business, by his own admission). And in the years which followed, he proved himself to be a good friend of the Bond Program, not only buying Bonds, but helping to sell them to the American people.

Through his efforts and those of countless other volunteers in radio and TV, stage and screen, and in all walks of life, the American people have bought more than \$150 billion in Bonds.

Of these, about \$100 billion have been cashed in for emergencies, homes, retirement, etc. The balance is being held by tens of millions of American families—a star-spangled nest egg for the future.

Why not start building your nest egg with Savings Bonds—for yourself, and to back up our men in Vietnam. But give it a chance to build up by starting young. Like Jack Benny.

NOW—Savings Bonds Pay 4.15%!

Interest on new E and H Bonds you purchase has been raised to 4.15% when held to maturity. E Bonds mature faster—now in just 7 years. Your old Bonds will earn more, too. Savings Bonds are better to buy, and hold, than ever.

Official publication of the students of Silverton High School, prepared by members of the Future Business Leaders of America.

Guest Editorial

by Mrs. O. C. Rampley

In the coming weeks, the OWL'S HOOT will feature guest editorials written by members of the Silverton School faculty.

There has been quite a bit of discussion around the faculty lunch table concerning the strikingly short dresses that are being worn to school in increasing numbers.

Neither the men or women teachers feel qualified to say "how long a dress should be," but there are some very definite opinions as to "how short is too short."

The constant tugging and pulling of skirts by some of the more modest maidens suggests that even the wearers might think their skirts are a little too short for comfort—especially while sitting in the classroom, walking up the stairs, or bending over the water fountain.

It is quite reassuring, though, to see that many of the girls are still maintaining at-the-knee, or slightly above-the-knee hemlines regardless of what fashion dictates.

Perhaps the proper credit goes to parents who refuse to let their daughters sacrifice modesty for fashion.

When the Apostle Paul said that a young woman should be chaste, he didn't spell it CHASED!

Words of Wisdom

by Gary Crow

"How lucky we are to be Americans!" How many times have we seen a story or an article pertaining to this subject? It is seen in editorials, magazines, newspaper articles, and is often the topic of lectures. But as often as we see this subject, how much do we think about it?

Did you ever try to imagine one day it would be without the government?

When we awoke in the morning many of us would not have a roof over our heads. The bacon and eggs we have for breakfast might be diseased because they would not have been inspected by the government branches. Perhaps coffee would not be imported.

Many people would have no job to go to, and could not even receive unemployment checks. Few people would have cars. There would be no roads. There would be no postal system. Our private property would not be protected. Perhaps there would not be enough organization for you to get gas, electricity, or water. There would probably be no newspapers or magazines, and if there were, they would probably be limited. Crime would run high.

A life without the United States Government is a pretty ugly prospect. This government we so often take for granted is the most wonderful institution ever set up in the history of the world. There are weak spots of course, but our government is closer to perfection than any system ever devised by man.

Only we, the people, can keep our government strong. Let's stand behind our government.

It has been said that Mitchell McDaniel didn't speak for the first four long years of his life. However, he finally complained at breakfast, "Mom, the toast is burned!"

His amazed mother shrieked joyfully, "Mitchell! you talked! How come you've never talked before?" "Well," he replied evenly, "Up to now everything's been okay."

Results Given On Air Force Tests

The results of the Air Force Aptitude Test that was administered to the 25 Silverton Seniors on October 3, 1966, have been received by Principal O. C. Rampley. He received seven certificates to present to the highest-ranking students.

He reports that Jimmy Burson and Randy Hughes tied for high scores from our school, with John Cole third, and Margaret Minyard the highest-ranking girl.

The test covered four areas, Mechanical, administrative, general and electronic. The highest possible score is 95 in each area. Jimmy Burson scored 95, 90, 90, 95; Randy Hughes, 90, 90, 95, 95; John Cole, 89, 90, 90, 90; John Montague, 95, 85, 85, 95; Margaret Minyard, 75, 80, 80, 85.

Connie Dudley, Joni Faye Self and Tina Weaver also scored high enough to receive certificates from the United States Air Force.

New Volumes Given To S.H.S. Library

The Silverton High School library recently received two new history books, gifts of the American Heritage Program sponsored by Wayland Baptist College. One is "The History of the Second World War" by Katherine Savage and the other is "13 Days to Glory" by Lon Tinkle.

Last school year, 1965-66, Silverton High School entered the American Heritage Program for the first time. Two contests were held in the Silverton school—an essay contest and a poster contest. Prizes of \$5, \$3 and \$2 were awarded to the top three in each contest. Additional money was given to the school's American Heritage director to use as she saw fit. Zobia Self, Silverton High School director, decided that the money should be used to supplement the supply of history books now in the school library.

The books were chosen by Miss Self and submitted to Wayland Baptist College. The order was made and the books mentioned above have been received. Approximately six more books are expected. The books can be used by any student in Silverton High School, but they will be of special interest to those students enrolled in history classes.

Silverton High School is again participating in the American Heritage program for the current school year, 1966-67. The particulars of the contest have not been decided, but as it was last year, each and every student in the high school will be eligible to enter.

Three men were sitting on a park bench. The man in the middle was sitting quietly, as though asleep. The other two men were going through the motions of fishing. With deadly seriousness they would cast, jerk the lines gently, and then swiftly wind their imaginary reels. This went on for some time, until a policeman sauntered over, shook the man in the middle, and demanded: "Are these two fools friends of yours?" "Yes, officer," replied the man. "Well, get them out of here then." "Right away, officer," said the man and began to row vigorously.

DON'T SEND THEM AWAY

... let 'em work for us
a while longer

IT doesn't take a great **MANY** dollars to keep the wheels turning in a community like ours ... but it does take dollars that are **CIRCULATING** in the local trade channels.

A GONE DOLLAR ... gone to some other trade area ... does not merely cost us \$1 of lost trade volume ... instead, we lose the **UNTOLD** value of that

dollar's continued activity in our midst.

FOR every time a dollar turns over again in this community, it gives us another lift toward better job and business opportunities for all of us ... better school, church, and other civic facilities ... and more fine people as friends and neighbors and co-workers.

WE can get far more from every one of our dollars ... in material and social benefits ... if we keep them at home where they can work for us ... instead of sending them away to start working for somebody else.

if we'll let them stick around longer, we can get a lot more work out of our dollars.

How to save for a rainy day and help your country now
Sometimes, you may have an emergency which will affect the future of your family. It's kind of comforting to have a fund standing by to help you meet that emergency.
Your country also has emergencies to meet in the day to day job of keeping peace and standing up for freedom.
You can help meet both needs with U. S. Savings Bonds.
Your fellow Americans are already holding \$47 billion in Savings Bonds—for rainy days, and sunny days, too. Why not join them? And see if you don't feel pretty good about it.
Buy Bonds on the Payroll Savings Plan where you work. Or at any bank. No charge for the service.
Keep freedom in your future with **U.S. SAVINGS BONDS**
