# Dreams for sale.

Everybody's got a dream lurking around in the back of his mind. A dream vacation. A dream cottage. A dream car.

Dreams can be a lot more fun if you know you're doing something to make them come true.

And that's what the Payroll Savings Plan is all about. When you sign up an amount you specify is set aside from each paycheck and used to buy U.S. Savings Bonds.

Now Bonds mature in less than six years. That's the shortest maturity period ever, and makes Bonds a practical way to save for dreams you want to come true while you're still young enough to enjoy them.

See the folks in the payroll office where you work. They've got dreams for sale.

Now E Bonds pay 5 1/4% interest when held to maturity of 5 years, 10 months. (4% the first year). Bonds are replaced if lost, stolen, or destroyed. When needed they can be cashed at your bank. Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.

**PROGRAM—**  
**NUED FROM PAGE ONE**  
 plus the 1972 voluntary set-aside program. Program acreages reported and accepted in 1972.  
 Substitution provisions of the wheat program are identical to those in 1972 with corn, grain

sorghum, barley or soybeans allowed for preservation of allotment history. The USDA also announced that the 1973 feed grain program will have a mandatory set-aside for barley of not less than 25% of the farm's barley base, with other details of the feed grain program to be announced later.  
 Loan discounts for undesirable varieties of wheat have been dis-

continued. Undesirable varieties listed in the past were those deemed not suitable for milling purposes. The USDA said that less than one half of 1% of the total acreage planted to wheat in recent years has been devoted to varieties and classes of wheat previously on the undesirable variety list.  
 Producers will again receive preliminary payments after July 1,

1973, equal to 75% of the estimated face value of the wheat certificate. Any remainder will be paid after December 1, 1973. Face value of the wheat certificate will again be the difference between 100% of the July 1, 1973 parity and the national average market price received by farmers during the first five months of the marketing year. As in the past two years, a producer will earn certificate payments based on his domestic allotment times the farm's established yield, and producers are not required to plant wheat to earn certificate payments. However, failure to plant at least 90% of the farm's 1973 domestic wheat allotment to either wheat, corn, grain sorghum, barley or soybeans can result in reduction of allotment by as much as 20%. Under the Agricultural Act of 1970, if no wheat or substitute crops are planted for three consecutive years, the entire allotment may be lost. All allotments removed from farms will be reallocated to other wheat farms.

Substitution provisions allow a acreage devoted to feed grain or soybeans to be considered planted to wheat to prevent loss of history and to qualify for payments. Acreage devoted to wheat or soybeans will be considered planted to feed grains to prevent loss of that base. This enables a producer to plant the combination of wheat, feed grain or soybeans that best fits his operation and preserve his planting history and program benefits.

The 1973 national wheat allotment is 18.7 million acres, as announced on April 17. The allotment represents the acreage required to produce the 535 million bushels for which certificates will be issued to participating producers. The national allotment is based on a national average yield of 31.0 bushels per acre. In 1972 it was 19.7 million acres and the national average yield was 29.8 bushels per acre which also resulted in 535 million bushels on which certificates were issued to producers. The 86% set aside applied to the new allotment will give a producer about the same set aside this year as last.

Acreage which is not planted due to drought, flood or other natural disasters or a condition beyond the control of the producer will be considered planted to

wheat. Also, any producer who makes a required acreage set aside but elects to receive no payment will not lose allotment.

Under the current program, the farmer may plant as much wheat or any other non-quota crop as he wishes after he has met his acreage set-aside and conserving base requirements. Or, he can choose not to plant any wheat. Crops subject to quotas in 1973 will be peanuts, rice, tobacco, extra long staple cotton and sugarcane.

Other provisions of the 1973 wheat program, unchanged from 1971 and 1972, include the requirement that farmers maintain their conserving base requirements as well as set-aside acreage.

Processors of wheat for domestic food use will continue to pay 75 cents per bushel toward the domestic wheat certificates' value. Again in the 1972-73 marketing year, no export marketing certificates will be issued.

Established summer-fallow farms which devote at least 55% of their cropland to that use will not be required to set aside any additional acreage in order to qualify for program benefits.

As in 1972, land offered for set-aside must be equally productive and similar to that on which the program crop is to be grown. Producers may graze set-aside acres except during the five principal months of the normal growing season, but set-aside acreage must be protected against erosion, weeds, insect damage and rodents. In 1973 sweet sorghum again may be planted on the set-aside acreage and grazed, except during the five months of the growing season.

Producers who wish to qualify for program benefits need to sign up to participate. Sign-up dates will be announced later for the 1973 program. A producer may participate in the wheat program on any or all farms in which he has an interest, as he wishes.

ASCS county offices will notify wheat producers of their domestic allotment and the applicable set-aside for their farms.

Working, learning to sew... Now, something simple is being prepared and soon her own dresses, and in the future, clothing for her own family. Training is important in the lives of our children.

Spiritual training is a must in the lives of our young ones.

*"Train up a child in the way he should go: and when he is old, he will not depart from it."*

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Proposed  
CONSTITUTIONAL AMENDMENT

NUMBER 6 ON THE BALLOT (SJR 7)  
General Election November 7, 1972

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS: Section 1. That Article VIII, Section 1-b, of the Texas Constitution, be amended to read as follows: "Section 1-b. (a) Three Thousand Dollars (\$3,000) of the assessed taxable value of all residence homesteads as now defined by law shall be exempt from all taxation for all State purposes. (b) From and after January 1, 1973, the governing body of any county, city, town, school district, or other political subdivision of the State may exempt by its own action not less than Three Thousand Dollars (\$3,000) of the assessed value of residence homesteads of persons sixty-five (65) years of age or over from all ad valorem taxes thereafter levied by the political subdivision. Where any ad valorem tax has theretofore been pledged for the payment of any debt, the taxing officers of the political subdivision shall have authority to continue to levy and collect the tax against the homestead property at the same rate as the tax so pledged until the debt is discharged, if the cessation of the levy would impair the obligation of the contract by which the debt was created." Sec. 2. The foregoing constitutional amendment shall be submitted to a vote of the qualified electors of this State at an election to be held on the first Tuesday after the first Monday in November, 1972, at which election the ballots shall be printed to provide for voting for or against the proposition: "The constitutional amendment providing that the various political subdivisions of the State may exempt not less than Three Thousand Dollars (\$3,000) of the value of residence homesteads of all persons sixty-five (65) years of age or older from ad valorem taxes under certain conditions."

FIRE-RETARDANT COTTONS  
At last action to curb fire accidents has hit the market. After July 29, all children's sleepwear, sold through 6x, must either be flame resistant or labeled as non-flame resistant. This sleepwear must also meet federal standards for flame resistance or stores cannot sell it. Therefore, you should be sure to buy flame-resistant sleepwear for safety.

These are the first provisions of the new Flammable Fabrics Act for clothing to go into effect. Last April, flame retardancy standards for carpeting began.

The U. S. Department of Agriculture has developed fire-retardant treatments for cotton to lessen the toll of about 4,000 killed plus another quarter million injured each year from burning fabrics.

I think you will find the above information useful when you are buying children's sleepwear.

CONGRATULATIONS

Congratulations are in order to Miss Mary Chris Cantwell and Miss Becky Francis for their participation in the District 2-4-H Dress Revue. Briscoe County citizens should be proud to be represented by outstanding 4-H members such as these.

Fondue is the newest food craze. It's fun and nourishing. Cheese fondue means easy, casual entertaining. Serve unusual "dippers" such as raw fruits—apples, pears and pineapple—and favorite raw vegetables—carrots, green peppers, and cauliflower flowerettes.

For best flavor use fluid milk and cream within three to five days and cultured products within two or three days, says the Agricultural Marketing Service. Unopened jars of sterilized cream can be kept for several months in the refrigerator. After opening, use within 10 days. Pressurized cans of whipped cream may be kept for several weeks.

On a diet? Dairy foods are a dieter's most valuable helpers. Milk is a leading source of body-building calcium and protein, riboflavin and vitamin A. Low-calorie dairy food dishes stick to your ribs and let you stick to your diet. Milk and other dairy products are especially in the spotlight now, since June was National Dairy Month.

FOOD POISONING

Summer blazes with outings, picnics, barbecues, and FOOD POISONING.

Foods can look appetizing, smell good and even taste delicious yet still cause illness. Poor or improper handling of food in the home is the major cause of food poisoning outbreaks. Most types of food poisoning aren't fatal and normally result from two bacterial organisms: staphylococcus and salmonella.

Thorough hand washing before handling any food is one of the best and simplest precautions against contamination. Individuals who are once infected with the salmonella bacteria may become carriers of the infection for many months, even though they look and feel healthy.

You can easily pick up the bacteria while handling raw vegetables, meats and poultry and then introduce it into sandwiches, salads, custards and other prepared foods. The salmonella feed on protein foods and to a lesser degree

on starch. The temperature for optimum growth is around 95°, but the bacteria can grow at room temperature and can even survive temperatures as high as 140° for short periods of time. Freezing doesn't kill salmonella but simply transforms it into a dormant state. So don't thaw frozen meats and poultry at room temperature. Instead, thaw them in the refrigerator, under cool running water (in freezer wrappings), or by cooking them frozen.

Cooking temperatures of 165° destroy salmonella organisms, so any food cooked at this temperature is free of the bacteria, unless recontaminated by the food handler.

To prevent outbreaks of salmonella, it is advisable to wash hands thoroughly before handling any food. Keep drainboards and utensils clean. Even small spots of food left on drainboards may harbor salmonella that will start to multiply at room temperature. Refrigerate food promptly to prevent bacteria from growing. Cook poultry and ground meat until well done; 165° F. kills the bacteria. Meats that aren't ground will have no more than surface contamination so you can safely serve them rare.

To avoid recontaminating cooked foods for storing, cool quickly and keep cold. Thoroughly wash all foods which are eaten raw.

Planning on having sweet corn for your next barbecue? Buy ears that are well-covered with bright, plump kernels and husks that are fresh and green. If you buy corn ahead of time for your cook-out, store it unhusked and uncovered in your refrigerator. Try not to buy it more than two days before planning to use it. Or maybe you are lucky enough to have fresh corn in your own garden; if so, use the same care in choosing it, and

**for the Days AHEAD**

Even now trees are being felled, cords of wood cut, in preparation for cold winter days which are sure to come. Woodcutters are preparing for the days ahead, to bring comfort against the cold.

To prepare for our future "cold days," periods of sadness, times of bereavement, and times when we are tempest tossed, begin now to attend church regularly and let God, His Church, and His people help you to meet any situation in life.

*"Blessed be God, even the Father of our Lord Jesus Christ, the father of mercies, and the God of all comfort; who comforteth us in all our tribulation, that we may be able to comfort them which are in any trouble, by the comfort wherewith we ourselves are comforted of God." 2 Cor. 1:3, 4.*
