More than \$266,000,000 will be ested in new equipment and imements during the next five ars by Southwestern Public Serce Company, Roy Tolk, chairman nd president of the electric comny, announced today.

New generating facilities to be talled during the 5-year period vill increase the capability of the stem by almost 1-million kiloratts, bringing the total capability approximately 3-million kilo-

One of the new generating staincluded in this 5-year program is the addition to the Nichols lant, northeast of Amarillo. Conuction has just recently started and completion is scheduled for me of 1976. It will have a capability of 350,000 kilowatts and will e coal as its primary fuel. Longadequate supply of this fuel.

Scheduled for completion in midrestern's 10 interconnected gener- games.

"In the latter part of this 5-year coal-fired generating unit to be ch and Groom. built, probably in the north part kilowatt range, depending on the pad requirements at that time,"

"In order to assure a clean enronment when using coal as the primary fuel, it is necessary to spend an additional 30-percent of ne cost of the unit for equipment to prevent objectionable products of combustion from reaching the tmosphere. The installation of both electrostatic precipitators and stack gas scrubbers will insure that we equal or exceed applicable stack gas emmision standards," Tolk said.

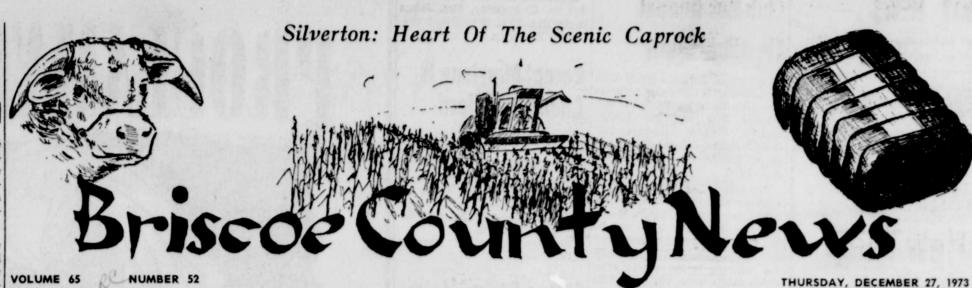

"Southwestern's peak load for 1973 was 1,758,000 kilowatts and ities will more than take care of players. that increase," Tolk said.

Conservation of the area's wat er supply will continue to be a Frank W. Gamble prime consideration at Southwestern Public Service Company's electric generating stations. When the two units now under construction are completed, they will save, on the average day, 14,000,000 galequivalent of the daily water needs of a city of 100,000 people.

project that is a part of the 5-year from the Tuco interchange, north of Abernathy, to Nichols Station, line will provide a second 230,000 volt line for the interconnected transmission system and make the movement of power between major generating stations and the cient, reliable and economical. This project is also scheduled for sons, Dan and Tim, both of the completion in mid-1974.
