### All Around the Town

by Mary Ann Sarchet

If anyone needs yard work done, call Mildred Brooks. She guarantees her work if the dirt is dumped in yards accidentally, not by asking for it.

She has been working hard at ridding molehills out of the mountains of dirt that got piled on her grass by mistake.

#### THE GASOLINE STAMPS

Wendell Tooley had this to say about the gasoline rationing coupons in his column in the Floyd County Hesperian:

"In spite of the fact that we'll probably not have to have gasoline rationing through gasoline stamps, the government printing office is completing work on the entire order of gas stamps which were ordered by the President around the end of the year.

"A newscast the other day quoted the head of the printing office saying it would be 'too expensive' to terminate the printing at this stage, so the entire order could be completed. The gasoline stamps were being printed at a cost of some \$12 million.

"IT TOOK A LOT OF ENERGY, as well as paper (another scarce product) to produce the millions of stamps which were ordered printed on a 'standby' basis, in case they were needed.

"The newscast we referred to above pointed out that it would cost the government roughly \$100,000 per year just to store the gasoline stamps which were being printed.

"Since production started on the gas stamps, the government printing office has dispensed with its usual task of printing money, and has gotten behind in this department, it has been stated.

"Someone said that since the stamps bear a resemblance to money, the government might want to sell them to Parker Bros., who perhaps could use them in their monopoly sets.

However, the government would never do anything sensible like that. After all, it didn't cost them anything to print the gas stamps.

But it sure did cost Mr. and Mrs. Taxpayer a cool \$12 million plus storage.

## "Eat Good To Feel Good" Is Topic Of Special Programs

Would you like to know more about the "Basic Four Food Groups"? If so, you are invited to attend two "Eat Good to Feel Good" programs which will be held at the First United Methodist Church Monday, April 22 and Thursday, April 25. The programs begin at 1:30 p.m. and end at 3:30 p.m. The programs are free and a nursery will be provided for children.

The program topics are: "Let's Buy Meat," by Mrs. Virginia Hardin; "Let's Buy Breads and Cereals," by Mrs. Sandy Perkins; "Let's Buy Milk and Milk Products," by Mrs. Jim Clemmer; "Let's Buy Fruits and Vegetables," by Mrs. Dorothy Powell, Briscoe County Extension Agent.

Do you know that the food you eat can make a difference in the way you feel? It is important to eat a variety of foods each day so that you will feel and look your best.

Smart homemakers use a guide called the "Basic Four Food Guide" in planning meals for their families. This guide was developed by scientists to help us choose foods that will supply our bodies with the materials they need each day. By choosing foods from the Basic Four we can be healthy without having to understand the complicated chemical reactions that go on in the body. Since there are many foods in each group, it is possible to follow the guide and save money by choosing lower cost items in each group.

The "Eat Good to Feel Good" programs are being sponsored by the Briscoe County Nutrition Education Committee and the Texas Agricultural Extension Service. Everyone who is interested is invited to attend.

### Privacy Invasion Concern Of President of TOMA

Dr. John H. Boyd (D. O.) of Silvertown, outgoing president of the Texas Osteopathic Medical Association, warned of the wholesale invasion of confidential medical records by the Professional Stan-

dards Review Organizations (PSRO). PSRO, established nationally by Health, Education and Welfare (HEW), became law January 1, 1974.

Dr. Boyd will review progress made by the Texas medical profession in regard to PSRO at the 75th annual convention of the Texas Osteopathic Medical Association in McAllen April 25-27. TOMA has joined with the Texas Medical Association, Texas Hospital Associa-

tion, Texas Osteopathic Hospital Association, Texas Nursing Homes Association, Texas Nurses Association, Texas Podiatry Association and other allied health groups in a unified effort to represent the health care industry in the state.

Boyd stated that scant attention has been given to the legalized burglary of confidential records by PSRO. He said, "We are told that this wholesale invasion of confidential records by HEW's unelected army of bureaucrats is necessary for HEW to establish and computerize 'norms of health care' based on typical patterns of health care."

Medical societies in Texas as well as in California, Illinois, Indiana, Kentucky, Louisiana, Michigan, Nebraska Oklahoma and Virginia have approved resolutions opposing any participation in the program or seeking repeal of PSRO.

Boyd stated the government will spend millions of dollars "not for health care but for establishing this program. This law will have a severe impact on the practice of high quality medicine."

Boyd said the Texas health care industry has outlined a plan to the Washington agency which will provide economies in administration of peer review while avoiding wasteful duplication and get cooperation and participation in the medical profession.

### Compost Boosts Lawns, Gardens

Put leaves, grass clippings, table scraps and other waste material to work for you by building a compost pile, suggests Jimmy Vanstory, county agent for the Texas Agricultural Extension Service.

"A compost pile is an excellent source of plant nutrients and is relatively easy to keep weed-free and odorless," says Vanstory. "It can provide valuable organic matter for use in vegetable gardens and flower beds for topdressing lawns."

To start a compost pit or pile lay down two inches of soil in an area receiving sunlight and sufficient air. Follow with two to six inches of waste material topped by one to two inches of manure or one to two cups of commercial fertilizer per square yard. Repeat this process to present a layered effect. Use a wire fence or lumber or other material to contain the compost pile.

Shape the top of the pile like a dish to facilitate wetting. Keep the material moist but not soggy. Turn the pile every five to six weeks to hasten decomposition of the material, adds Vanstory.

He suggests keeping two compost piles, one for present use and the other to allow for decomposition, which requires four to eight months.

### Sod House Survey: Have You A Sod House Heritage?

Did you ever live in a sod house, a dugout, or an adobe building, or were you born in one? Did you ever teach school, attend school, or church services in such a building, or help build one? Or are you a child or perhaps a grandchild of a former pioneer sod house dweller or builder?

If you can answer "yes" to any of these questions, the Sod House Society of America, with headquarters at Colby, Kansas, would like to hear from you. The unique society is making a survey and census of people who have had any kind of personal experience with

sod structures, including descendants of such persons. Sod houses, dugouts, part sod, and adobe buildings were once common in the United States, Canada and Mexico.

All former sod dwellers and descendants of a family that can claim a part of the sod house heritage during the pioneer settlement era of North America, or in more recent times, will be listed by the society in a permanent historical record of sod, dugout, and adobe dwellers and their families. Sod buildings in some form were used in well over half the North American continent.

To make this survey a success, information is needed from people in all parts of North America. If you have any information concerning present or former sod dwellers, a report of this will be most welcome. Please tell where the buildings were located, and give family names, as well as your own. ## HEALTH and FOOD

In our nation today, the majority of us have so much to be thankful for. Sure we lose a tooth or two in growing up, as the one pictured here, but these will soon be replaced. Health and Happiness are generally ours, and through our abundance we should share with others who are less fortunate. God's word and the church encourage sharing with others. There are many areas of service to others within the churches, and these we should not neglect, but God has said that we should take advantage, as we are able, of all opportunities to give aid.

"As we have therefore opportunity, let us do good unto all men."

GALATIANS 6:10

THE CHURCH ENCOURAGES LOVE AND COMPASSION FOR OTHERS

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

# Storie - Strange Vows Exchanged In Home Ceremony Friday Evening

The home of the bride's parents near Silverton was the scene of the ceremony in which Miss Sharon Rhea Storie and William Bryan Strange exchanged marriage vows Friday evening, April 12, 1974 at seven o'clock.

Parents of the couple are Mr. and Mrs. Harold Storie and Mr. and Mrs. Norman Strange, all of Silverton.

Rev. James Futch, minister of the First United Methodist Church in Silverton, performed the double-ring ceremony.

Mrs. Bob Rauch of Silverton was soloist, and Mrs. C. L. Record of Lockney presented selected piano music.

Given in marriage by her parents, the bride wore a formal gown of white silk organza and chantilly lace designed with a fitted bodice and sheer Victorian yoke enforced by lace applique and a sheer ruffle. Her neckline was closely fitted and her sleeves were sheer organza tapering over her wrists to deep lace cuffs. Her A-line skirt fell to a ruffled hemline accented by a band of lace. She wore a matching cathedral veil edged entirely in scalloped chantilly lace and held in place by a miniature coil. Seed pearls were scattered over her bodice.

For something old, the bride carried a lace handkerchief belonging to her great-grandmother.

Something borrowed was pearl earrings belonging to her mother. The traditional blue garter was worn and a penny placed in her shoe. Her something new was her bridal gown.

The Storie home was decorated with large spring bouquets of pink gladiolas, Ballet rosebuds, pink carnations, pink daisies and baby's breath with leather leaf greenery.

Best man was Lane Garvin of Silverton. Groomsman was Terry Bomar, also of Silverton.

Miss Lori Francis of Silverton served as maid of honor. Miss Debbie Storie, sister of the bride, was junior bridesmaid. The attendants wore floor-length gowns of candy chiffon frosted with white cluny lace. The dresses were designed with puffed sleeves, a sheer lace yoke, a closely-fitted neckline and a chiffon sash. They wore matching wide-brimmed picture hats tied with double pink satin ribbon bows with long streamers.

The bride's mother selected a light blue double knit floor-length dress. The groom's mother wore a mauve tailored floor-length dress.

A reception followed the ceremony. The bride's table was covered with a white lace cloth. The three-tiered white wedding cake was covered with pink and white roses. Cool on the outside... that's an electric water heater! And what that means to you is more storage space. There's no flue or vent to keep you from storing things on top of an electric water heater and since it's cool on the outside, you can store things all around one, too. And, should service ever be needed, we have over 100 people trained for just that purpose.

If you can't get PIONEER Brand 8311

here are some excellent alternative hybrids for High Plains farmers.

Pioneer Brand 8311, the "Golden Bronze Yield Leader," has been our most popular hybrid this year — so popular, in fact, that it may be in short supply in some areas. One reason is that the demand has been so great downstate where 8311's disease tolerance is so important. Fortunately, there are several other Pioneer Brand hybrids that are proven top performers on the High Plains. If you can't get 8311, ask your dealer about these.

PIONEER Brand 8417 This versatile yellow endosperm sorghum is a champion yielder in the medium-late maturity class, for irrigated or non-irrigated land. It has large open heads, uniform head height, strong stalks for easy threshing, good tolerance to smut and anthracnose.  
PIONEER Brand 820 This top-notch full-season hybrid, is a consistently high yielder. Excellent drought resistance and standability plus good roots and stalks make it a good choice for irrigated or non-irrigated farming on the plains.  
PIONEER Brand 828 One of the highest yielding sorghums you can plant, this full-season hybrid responds well to good management on good land with plenty of water. Plains growers like it because it holds its quality and threshes well even after an early freeze. It produces sturdy stalks with semi-compact heads of dark red grain.  
PIONEER Brand 846 Famous for its versatility and adaptability, this medium maturity hybrid yields along with the full-season varieties. Resistant to smut, rust and MDM, its outstanding hybrid vigor and excellent drought resistance help it turn in consistently high yields even under stress.
