COMMUNITY LIFE AND SERVICE

Y. M. C. A. One of the Great Influences Permeating American Social and Moral Life

By Associated Press.

Boston, June 12—(Special to Signal)—The idea of community life is permeating many and varied American activities was shown in the address of Albert E. Roberts, Secretary of the International Committee of Young Men's Christian Associations, before a joint session of the National Conference of Charities and Correction and the National Probation Officers' Association here this morning. Mr. Roberts spoke of the county work being done by the Young Men's Christian Associations and said that by introducing corn growing contests, poultry raising contests, county-wide relay races, week-end hikes, camps, play festivals, mock trials, visits to points of interest, and all similar activities, the association has in hundreds of cases changed the tendency of the boys and the young men with a natural bent toward a criminal life to a real desire to be not only good citizens but to join with the other boys in the motto of the organization, "Help the other fellow."

"The idea of community service," he said, "which has been so wanting in the country communities is rapidly displacing the spirit of individualism which is the curse of country life."

No Duty on Horses

Brownsville, Texas, June 12—According to advices received at this place by collector of customs R. B. Creager, the recent ruling of the customs court, which a Washington dispatch said compelled anyone driving across the border, either into Canada or into Mexico, to pay duty on their animals on the return trip, is intended to effect only such exportations as are made through the regular channels of trade and are not effective where a person drives across the border and returns within a reasonable time.

OPENING DATE POSTPONED

Airdome Will Not Open Tonight On Account of Meeting.

The opening of the Airdome which was scheduled for tonight has been postponed on account of the meeting.

Everything is in readiness and the public are assured of the very best productions now before the people.

Manager Belt announces that during the second week he will present the "Life of Moses" consisting of 5000 feet of film from the celebrated Pathe Brothers, and invites all the ministers of town to be the guests of his house during one week and witness this wonderful production.

Watch for further announcements in the Daily Signal.

Wells-Fargo Extends Service

By Associated Press.
Austin, Texas, June 12—(Special to Signal)—It is reported in railroad circles here that about July 1, the Wells-Fargo Express Company will extend its service to all Texas Gould railroads and their connections and will go into all districts in Mexico as far as lines now served by the Pacific.

SUGAR TRUST PROBE

Federal Attorney Declares Havemeyer Could Have Been Prosecuted.

Washington, June 12—Henry A. Wise, United States district attorney of New York, admitted to the house committee on expenditures in the department of justice today, he could not say why the government had been content merely to collect duties in the sugar fraud cases and had not seized the subard involved in the frauds.

When Mr. Wise was asked why the sugar itself had not been declared forfeited to the government, he said:

"I am unable to answer that question, because the policy of the government had been determined before I became district attorney."

Mr. Wise said every man "higher up" who could be reached had been proceeded against.

"I think President Havemeyer of the American Sugar Refining Company could have been prosecuted and convicted," said Mr. Wise. Mr. Havemeyer died shortly after the frauds were discovered. Other officers of the sugar corporation in Mr. Havemeyer's day were alluded to by Mr. Wise as "mere manikens."

Chairman Beall questioned Mr. Wise as to the recent indictment of cotton brokers on charges of having cornered cotton.

"Here was an agreement between cotton buyers and cotton spinners," explained Chairman Beall. "Will you tell us why you indicted the buyers and not the spinners?"

Mr. Wise declined, saying that experience had taught him it was wisest to keep his mouth closed, in regard to prosecutions until he appeared in court. He said the illegal agreement did not originate with the spinners, but with the men who were manipulating the market.

Mr. Wise said the second indictment against the cotton buyers was withheld from July to December because one of the men under indictment was out of the country. He testified the indicted men were charged with dealing of the entire supply.

Mr. Beall wanted to know why so much activity had been manifested against the men who had dealt in small quantities of the commodity, while no steps had been taken against those officials of the Standard Oil, Tobacco or Steel Corporations. Mr. Wise explained until very recently interpretations of the Sherman anti-trust law were conflicting.

Liquor Bill Lost

Trenton, N. J., June 12—The James liquor bill is missing and all efforts to locate it have been futile. This bill cannot be acted upon by Governor Wilson or become effective until it is found, and for that reason the State capital is being turned upside down in the search.

The James bill provides that New Jersey dealers may sell liquor in municipalities other than their own without procuring another license. The bill was delivered to the governor's office, it is said, at the close of the legislature. The governor sidetracked it before he went away and now that he has returned, he wants to act upon it.

REGENERATION OF SOUTHERN NEGRO

Industrial Education the Means of Adjusting the Race Problem in the South.

By Associated Press.

Boston, June 12—The Regeneration of the colored population in the Rural South was the subject of an address by Miss Rosa B. Cooley, Superintendent of the Penn Normal, Industrial and Agricultural School of St. Helena Island, S. C. before the National Conference of Charities and Correction here this evening.

Miss Cooley's address was in the nature of a report on an experiment she has been making for several years, with a population of six thousand negroes and fifty whites included in the community of St. Helena Island which lies off the coast of South Carolina. She has employed negro farm demonstrators, has provided educational facilities for the children and has made the school a social settlement. She concluded that negroes are needed in the rural South and that if conditions are made attractive for them there they will remain. Due to its isolation, this community has been enabled to develop naturally and has made great progress toward industrial efficiency.

Miss Cooley concluded that similar treatment for the negro throughout all the Southern States would give similar results.

Masons Elect Officers

Scurry Lodge No. 706, A. F. & A. M. met in regular session Saturday night with a large number of the membership present.

The principal work of the evening was in balloting for the officers for the ensuing Masonic year, which resulted in the following being chosen for the various named stations and places.

Worshipful Master, T. J. Faughl, Senior Warden, D. Nation, Junior Warden, W. S. Adamson, Treasurer, J. Z. Noble, Secretary, C. L. E. Oll, Tiler, E. B. Baugh.

The newly elected officers will be duly installed in their respective offices June 24, known as St. John's day in the Masonic calendar at 3:30 p. m. at which hour, the regular installation of the recently elected officers of the Royal Arch Chapter and Council will take place.

Called meetings have been announced for the Blue Lodge, for tonight, June 12, and tomorrow night June 13th, for work. Visitors in the city are invited to attend these meetings, where they are assured of a fraternal greeting.

A New California Route

The Santa Fe will open up the cut-off between Coleman and Lubbock for traffic this week. The completion of this line will give Texas, and all the South, a new California route, as well as open up an empire of virgin territory to the plow.

The opening up of three hundred miles of new railroad is not an unusual occurrence in Texas, but no construction of recent years will have as important bearing on the commerce of the country and the development of Texas as this new line.

The Santa Fe has over 2200 miles of railroad in Texas and they are developers as well as builders.

WILL ADOPT TEXAS PLAN

Illinois Agriculturists Will Encourage Scientific Farming

By Associated Press.

Dallas, Texas, June 12—(Special to Signal)—The example set by the Texas Industrial Congress in working for the better cultural methods is to be followed in Illinois.

In a letter to the Congress asking for details of its plan to encourage scientific cultivation W. G. Edens, of Chicago, secretary of the committee on agriculture writes: "We will organize our state along lines similar to yours for a campaign next year."

At its last annual convention the Illinois Bankers' Association adopted resolutions pledging the influence of its officers and members in securing more general recognition of the necessity of returning to the soil the essential fertilizing elements removed by repeated cropping and a committee was appointed to help in advancing agricultural development and the improvement of the soil.

NEW GOLD FIELD FOUND

Alaska is Alive Today With Prospectors—Great Rush Starts.

By Associated Press.

Nome, Alaska, June 12—(Special to Signal)—A fresh excitement has taken hold of the people here because a party of gold hunters have reported a strike of fabulous wealth in the Ruby Creek Molasso and Kus Kowin river districts.

The leads and deposits show a clean shining system up into the Nome district. A rush was started today for that region.

There ore is said to be worth \$400,000.

The Meeting.

Large crowds attended the religious services here Sunday. The men's meeting in the afternoon drew a big crowd and the congregation at the tabernacle on last night was the biggest yet.

The preacher read the story of the trial of Jesus, when men hesitated as to what to do with him.

The point was applied to the unsaved of the congregation and they were appealed to to decide what they would do with Jesus. The interest was very good.

There have been about forty conversions. It is understood now that the meeting will close Tuesday. It has been a good revival season. Dr. Scarborough has preached in his earnest persuasive way and has presented the gospel fearfully and in love. Mr. Williams has been a faithful helper and the Snyder people will be glad for these two good men to come here again.

Mrs. Henderson Hurt

Last Saturday a team, hitched to a hack in which Mr. and Mrs. J. M. Henderson Sr., were riding ran away, and Mrs. Henderson was thrown out and her left limb was broken and ankle was badly wrenched. Her suffering for about twelve hours was very severe, but she is now resting well and improving slowly—Post City Post.

Mr. and Mrs. Henderson have many friends in Snyder who will regret to learn of the unfortunate accident.

LURE OF CITY LIFE

Falst Ideas of Country Youth Concerning City Life Should be Overcome

By Associated Press.

Boston, June 12—(Special to Signal)—If we give properly protected and sufficiently numerous amusement resorts for rural districts we may succeed in overcoming the wild desire of thousands of country boys and girls to rush to the large cities," said Mrs. Bell Limited Israels, chairman of the Vacation Resources for Working Girls in New York City, in an address before the National Conference of Charities and Correction here this evening.

Mrs. Israels announced the conclusions of numerous investigators to be that it is the desire to give expression to the spirit of youth and joy that furnishes the lure of the city to the unsophisticated country youth. She proposed that the school houses of the country be made natural centers for dancing, dramatic clubs, presentations of historical pageants and such other forms of recreation as would provide a natural outlet for the spirit of youth.

Cone Johnson Issues Challenge

Cone Johnson has challenged any member of the Texas delegation, in Congress, opposed to state-wide prohibition to a joint discussion of that issue.

It is understood that Johnson is principally after a joint discussion with Culberson or Bailey, or both as these two gentlemen now stand committed to the anti side of the question, Johnson says:

"I see that the crowd at Fort Worth, had attached to their resolutions and platform, as the friends or patrons of their movement, the names of both the United Senators from Texas and the names of ten Texas congressmen. The people of Texas would like to know, doubtless, whether these gentlemen to whom the liquor traffic of Texas give reference, in dorse the movement, which culminated at Fort Worth and whether they indorse the resolutions adopted there, and the expressions in League workers and members of Texas are denounced as vile hirelings working in the interest and with the money of John D. Rockefeller. If these gentlemen, the representatives of the people of Texas are in fact the patrons of that crowd that met at Fort Worth, then I, for one, would like to take either of our United States Senators or any of the ten congressmen, and carry him before the people of Texas in joint discussion and require him to lay bare before the people, his relation and attitude toward the liquor traffic with whatever reasons he may have for their position.

First Bale in Houston

By Associated Press.

Houston, Texas, June 12—(Special to Signal)—The first bale of the 1911 crop was taken to the cotton exchange here this morning. It is claimed that this beats the world's record by eleven days. This bale came from Ernest Watz farm.

A Sad Message

Mr. R. L. Smith received a message Sunday evening informing him that his aunt had just died at her home at Pittsburg, Texas.

ANOTHER FINE WELL

Snyder Gets Strong Well on Water Station Block

The City Council decided some time ago to bore a deep well at the water station to get water for city use.

They engaged a rig and the work was begun about ten days ago. Today it is announced that the drill has reached a depth of 111 feet and a magnificent fountain of water has been found.

The pump was kept working for a half day, bringing out one hundred gallons of water a minute and there is no weakening of the stream.

This one well will produce 144,000 gallons of water every twenty-four hours.

It is a fact, now clearly demonstrated that Snyder is located over an underground lake and when a man wants a well of water he goes out and bores it at whatever place suits him.

The bringing of this new well insures us that we have an abundance of water here.

The well is being cased with 8 inch pipe and soon will be supplying the water for the water works.

GABE LUCAS TO LECTURE

Noted Bumble Bee Fighter—and Country Side Philosopher Lectures in Snyder

Hon. Gabe Lucas of McKinney who has entertained hundreds of audiences with his experiences in country life and of romance, with a tale of his famous bumble bee fight and many other interesting incidents will deliver one of his characteristic lectures at the Court House at 8:30 Tuesday night under the auspices of the Baraca Class of the Baptist Sunday School.

Mr. Lucas just happens to be here this week on a commercial trip and old friends who have known him in Collin and other counties have prevailed upon him to give his famous lecture.

He is endorsed by ministers, scholars, newspapermen and others everywhere.

It has been our pleasure to hear Mr. Lucas on two occasions and we saw large audiences moved to tears, and excited to laughter by his splendid portrayal of some touching event or his plain and home spun way of presenting a ludicrous event. He tells of his experiences as a country lad and does so in such a simple way that the children are delighted.

His lecture is entertaining from beginning to end and you will be glad to have heard him. He is one of those jolly fellows that you like to meet.

Remember the date, Tuesday night, 8:30 at the Court House.

Shipping Melons to Market

By Associated Press.
Houston, Texas, June 12—(Special to Signal)—The truck movement for this week will be devoted mostly to melons. It is announced that the railroads have provided 1200 cars to handle this melon crop in the coast country. The blistering weather threatens to cut the truck crop short in all lines.

Do you know what is going on in your home town? The Daily Signal gives all the news and the paper is delivered at your door. The cost is a mere trifle. Phone 88

There is a sense in which a newspaper belongs to the people of a community in which it is published.

The people of Mexico are lining into Reyes and Madero parties and Mexican politics will continue to keep alive.

Carrie Nation, who gained National notoriety a few years ago in a crusade against the saloons in Kansas, died in Leavenworth, Kansas, June 9. Death was caused from Paresis.

Morris Sheppard has announced that he will be a candidate to succeed himself in the house of Representatives. Sheppard had been spoken of as a possible opponent to J. W. Bailey.

Senator Moses E. Clapp of Minnesota said in a discussion before the Republican league of Patterson, New Jersey:

"I know that many hesitate at the idea of the recall, but it is irresistible in free government, as free government is inevitable in the progress of humanity."

Ex-Senator Wm. A. Clark of Montana has recently installed a \$125,000 pipe organ in his ten million dollar mansion in New York City. The chances are that music may charm him last on earth, but with his heart gone out after such worldly show here, the chances are that the sounds that will greet him first in the next world will not be the dulcet tones of a costly pipe organ.

EVERYTHING

at this grocery store keeps turning over and over with the daily whirligig of aime, That's how

GROCERIES HERE ARE FRESH

and sweet as a rose. Stock changes too rapidly for any thing to get stale. Get your **CEREALS, CRACKERS, MUSTARD, OLIVES** and everything else in the grocery line o' fus, and have them O. K. at right price.

William Goethes, the engineer in charge of the construction of the Panama Canal is succeeding where others of the world's greatest builders have failed. He is building for himself a fame that will last as long as the huge waterway that links two great oceans lasts.

A New York Millionaire named Stokes was shot by two young women. We hope that the girls may not fall out over Eddie Green of the Texas Midland and try to kill him. He likes all of them alike and there should be no jealousy in their hearts over him.

R. S. Jackson has severed his connection with the Fluvanna Tribune, because, as he says, the volume of business will not support a paper. Mr. Jackson is a splendid newspaper man and has given Fluvanna a good paper. It goes without saying that the town without a paper cannot do much.

Foster says there will be a general breaking up of the drouth by the sixteenth of June. If he is correct, and he hits it more times than he misses, then the country will make a bumper crop.—Abilene Reporter.

If he is correct, the country will hold him as the greatest seer of the century.

Hon. Cone Johnson has challenged Culberson and Bailey on the prohibition issue. Neither has been heard from myet, but it is safe to say they will not accept the challenge. Bailey got enough of Johnson in a recent campaign and Culberson would not stand a ghost of a show with the Tyler statesman.

The commercial interests of the United States are so immense and so varied that it is impossible to frame a tariff measure to suit every one. The cattle men and the lumber trust think Canadian reciprocity will injure these lines while the cotton seed crushers and oil mill men believe it will enable them to sell their products cheaper in Canada and thereby create a greater demand and be of benefit to the crushers and to the cotton seed growers in this country.

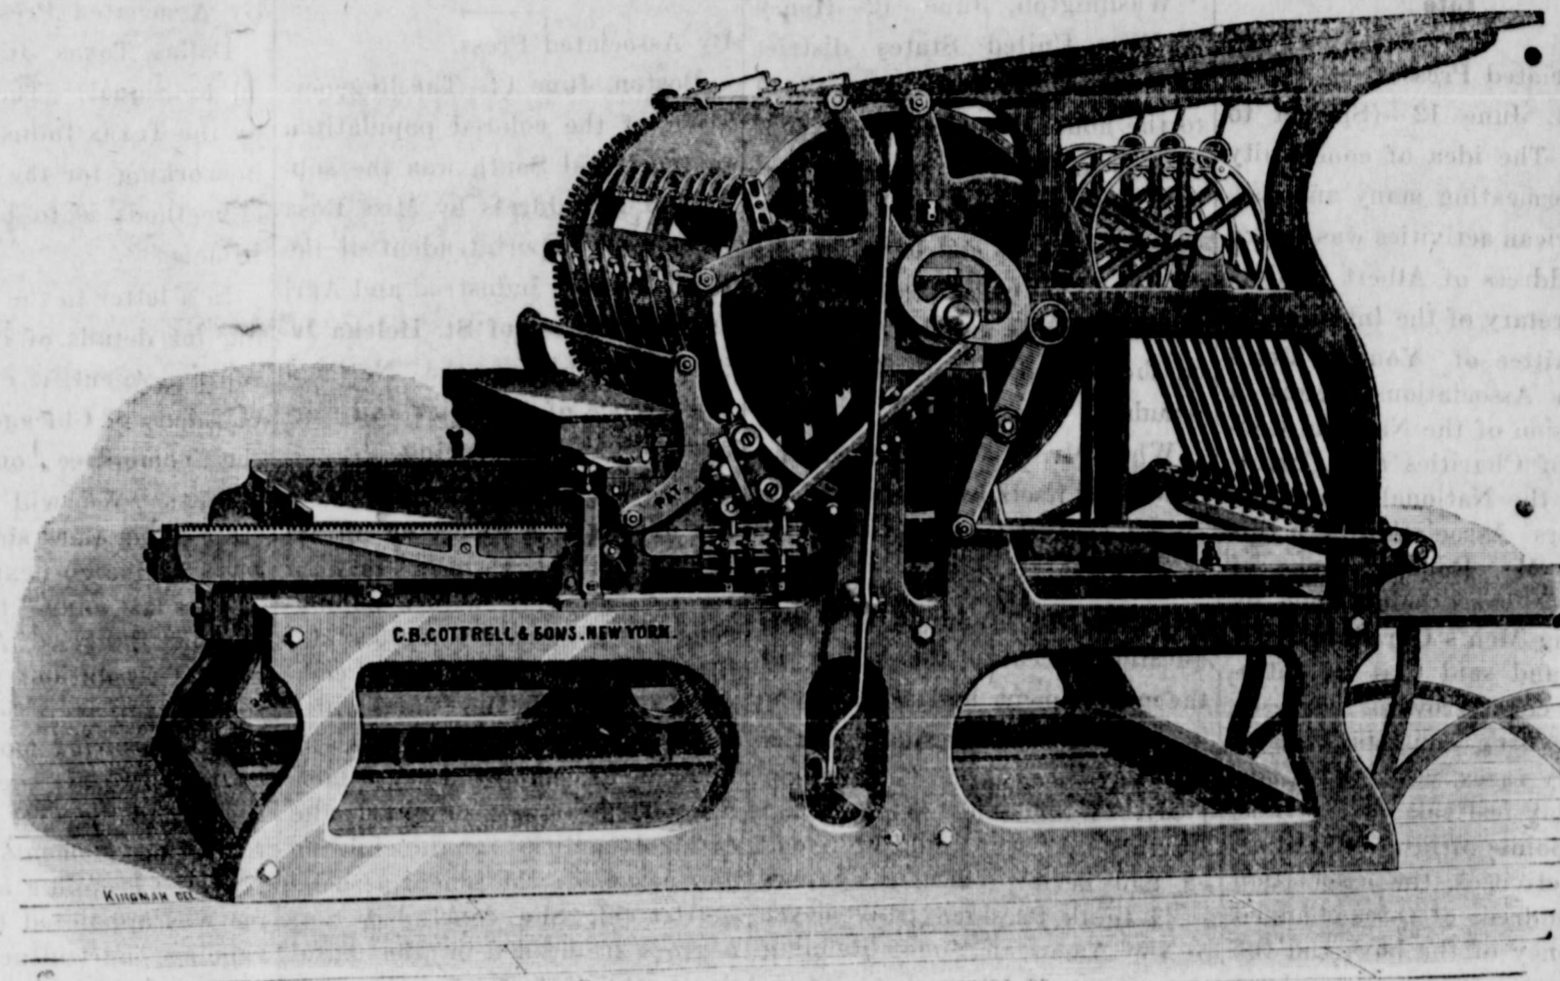

Bishop Candler in his discussion of the Sunday School lesson of last Sunday says that Hoshea's efforts to bring Israel back to the true worship of God came too late. The nation had gone too far away. "A thorough reformation was impossible and a partial reformation was ineffectual. Remedies are futile where gangrene has already set up." and the Bishop fears that our own people are drifting far toward the gangrene stage.

Sweetwater seems determined to "Lay on McDuff" and contend for the Orient shops to the length breadth and depth of the courts of the land. As has been said in these columns before, the Reporter is inclined to believe that Sweetwater is justly entitled to these disputed railroad equipments, but Abilene has had an experience bearing some resemblance to this contest a few years ago and the result was such to cause her to doubt Sweetwater's ultimate success. It's best not to open old sores, so the Reporter will not here go in the particulars.—Abilene Reporter.

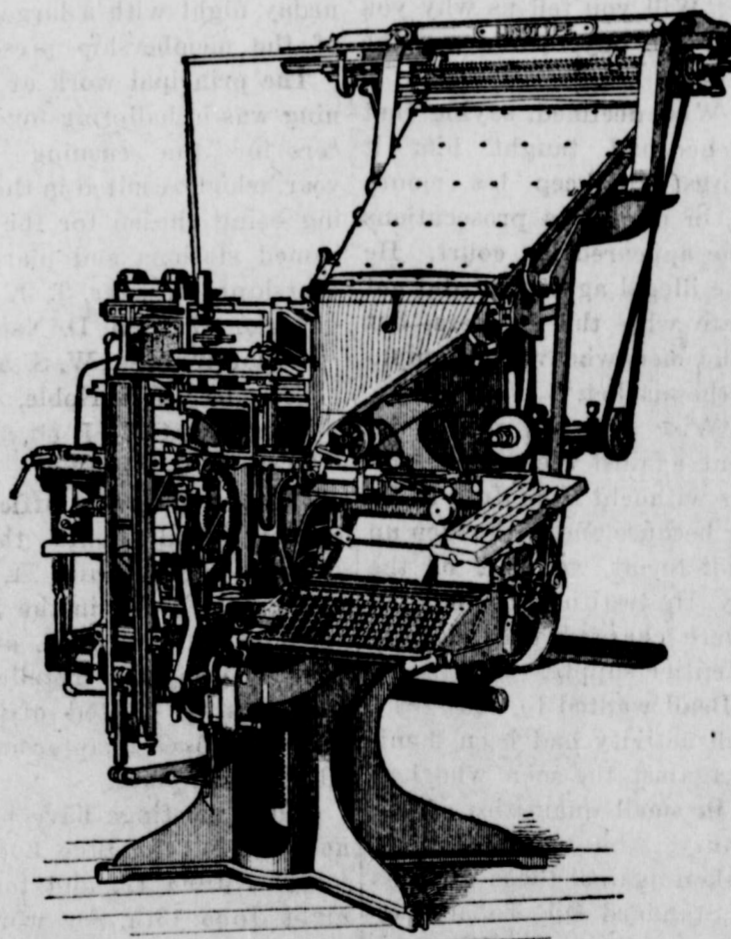

The Snyder band are arranging to go to Slaton next Thursday and play for the town opening event. There will be quite a number of Snyder people going up on the excursion.

The Signal office carries a good line of fancy stationery—visiting cards, score cards, letter paper envelopes. The ladies of Snyder will find just what they want in that line.

Carrie Nation Dead

The passing of Mrs. Carrie Nation at Leavenworth, Kansas, a few days ago removes one of the most noted women of recent years. She undertook with her hatchet to make the saloon business, as conducted in Kansas unpopular and she did it. She carried on a campaign of bar smashing that probably no sane man and no other woman in the State would have done.

She was the subject of jeers, taunts, praise, condemnation, exaltation abuse, encouragement, according to the ideas of different people. She was several times arrested and was seriously threatened and her name became a by-word. Her methods were rough, and her expressions were often radical. She surely believed she was doing the right thing. The reforms she wrought, if any, were probably all she had hoped for and she probably died with a clear conscience.

Excursion to Slaton

There will be an excursion over the Santa Fe from Snyder to Slaton and return on the morning of June 15th and good to return June 20th, for \$2.70 round trip. The train leaves Snyder at 9:10 a. m. the morning and returns at 9:15 p. m. the same day.

Letter From a Friend

Mineral Wells, Texas, June 10th.
Mr. I. D. Seoggin,
Snyder, Texas,

Friend Pete—

I was very much shocked and grieved today when I received a letter from Colorado stating that Boley was dead.

By his death, I have lost one of my best friends and the country one of its truest, and best citizens.

Only a few days ago George Calvin was here and we were speaking of you and Boley. I thought of him then as in the best of health and in the prime of life. I cannot realize that he is dead. Write me the particulars of his death.

Assure Mrs. Brown and the family of my deep sympathy in this their great sorrow.

Would be glad if you would show them this letter.

With kindest regards,
Your friend,
BROOKS BELL.

Just received another shipment of the celebrated Maitland coal for cooking purposes.

See the Signal office for deeds, mortgages, notes and other legal blanks.

SWAT THE FLY

"Swat the fly!" has been repeated so often that people have come to look on the advice as a joke. In all seriousness it is a matter of life and death.

Typhoid fever, cholera infantum, all sorts of diseases come from the housefly.

The Columbus, Ohio, News says forcefully:

"Don't mind a rattle snake or two about the house, but kill every house fly as you value your life and the lives of your children. The same paper continues:

"The house fly is born in offal—nowhere else. And his life is in keeping with his birth. He lives to the day of his death in filth. The manure pile, the cuspidor, and the cess pool are his homes. It is from these haunts that he comes to visit the kitchen, the dining room and the nursery. He drags his filthy feet across the bread, dips them in the butter, wipes them on the meat and bathes them in the milk. He seeks out the sick room and sips the excretions of the consumptive, the child with the summer complaint. Then he flies to the kitchen and deposits the poison on the rim of the milk bottle and to the nursery where he lights on the baby's lips.

It is well to watch out for your milk man, butcher, grocer, fruiterer, and tradespeople. If they are not as particular as you are deal elsewhere. A writer in the World's Work says: "Beasts of the jungle have slain thousands, but this prowler in the household has slain his tens of thousands. Of all vermin, he is the most filthy; of all purveyors of disease, the most deadly."

In self defense every citizen ought to wage a war against the house fly as the United States government waged it against the mosquito at Panama.

The way to get rid of the fly, is to first get rid of the filth. Kitchens and yards must be kept clean. The back yard must be as clean as the front yard. See that the cook puts all refuse in the garbage can and keep the lid on. Keep the stable clean. Put lime about the stable. All filth, slops, etc breed flies. Buy fly traps, fly paper, fly paddles and burn insecticides. Fight the fly! Get rid of the fly and live. Swat the fly!

—Houston Chronicle.

Women wanted to work in Laundry 3 days in the week. Call at Steam Laundry. 43-3t

The Magnolia Petroleum Company, recently organized have opened headquarters in the Andrews building at Dallas, Texas. It is understood that they will enter into active competition for the oil trade of Texas. They are now putting in their first station at Bonham, Texas.

Say, I find meal and hulls mixed is the cheapest cow feed on the market for the money. Sold by C. Nation and Son.

Problems of the Fireside

The American home is the throne and fountain head of greatness and the destinies of the human race must depend upon the wisdom of the fireside. Politicians may make party platforms; legislatures may pass laws, but the fundamental questions of public importance must be finally settled by the man of toll as he quietly sits by the fireside after the day's work is over.

The Struggle for Power.

The outstanding ambition of the human race today is power. Financiers, with the inventive genius of an Edison, are seeking to associate capital in such a way as to multiply power. Labor, with the mighty trend of a nation marshaling its army, is seeking to arrange its forces so as to increase power. The farmer, with the patient and honest endeavor typical of his occupation, is seeking by organized methods to gain power. Each is endeavoring to combine two or more economic units of their class in such a way as to increase the power of both. The purposes are laudable, but the methods each must employ present problems in which all humanity is involved and they must be finally settled at the fireside.

The Problems Upon Us.

We are well into these problems with capital in the foreground. Numerous solutions have been suggested, but the most primitive one is that of prohibiting by law the extension and multiplication of power through organized effort. This solution is manifestly impracticable. No one would for a moment tolerate a law that would prevent the invention or use of an appliance which would multiply the power of steam or any other potential energy, because perchance it might also increase the danger—in growth the element of danger always increases at the same ratio as other component parts. To destroy or limit power is to strike down progress and return to the dark ages, and is an acknowledgment of our incapacity to cope with human affairs. We must quickly recede from this position or pass rapidly on to government ownership.

To acquire the highest degree of efficiency in civilization, we must develop every pound of energy and power for usefulness there is in all things and multiply this power as many times as human ingenuity can devise, minimizing, as far as possible, the element of danger without weakening the source of power.

The problems in the industrial horizon today are gigantic and their solution awaits the patriotic and careful consideration of men of noble minds and big hearts as they sit by the fireside.

The Family Paper

The printing press is the industrial educator of the age. The citizens of Texas lead those of all other states in the Union in the number of newspapers read per capita. The improvement of public highways and the establishment of rural free delivery routes has extended the zone of circulation and reading the newspapers has become as much a part of the work on the farm as caring for the stock, and it has proven about as profitable. The ability of a farmer can be as easily judged by the literature he reads as by the crop he harvests.

Pipe Lines.

Pipe lines are primarily city builders. The pipe line brings the oil field to the refinery and the gas well to the city and to the factory, reducing the cost of transportation, as well as providing a feasible method of distributing the products of the oil and gas wells throughout the state. All enterprising cities should be connected with a pipe line.

Farm and Factory.

The farm and factory go hand in hand and the prosperity of either is dependent upon the other. By helping the factory to the farm we adjust economic conditions and the increase in value of the stock goes to the producer without increasing the price of meat to the consumer. By building factories in Texas we can greatly decrease the high cost of living.

Rural Telephones.

The scientist in science the farmer improved varieties of products and the inventor in giving us machinery that reduces the cost of production, has performed a great service to the farmer. But the telephone, born from the creative mind of the inventive genius is destined to companion in utility and convenience all human accomplishments for the intelligent promotion of agriculture. The telephone is the improved public highway of information and is as valuable to the farmer in selling his products as good roads are in hauling his goods to the market.

See the Signal office for deeds, mortgages, notes and other legal blanks.

SWAT THE FLY

"Swat the fly!" has been repeated so often that people have come to look on the advice as a joke. In all seriousness it is a matter of life and death.

Typhoid fever, cholera infantum, all sorts of diseases come from the housefly.

The Columbus, Ohio, News says forcefully:

"Don't mind a rattle snake or two about the house, but kill every house fly as you value your life and the lives of your children. The same paper continues:

"The house fly is born in offal—nowhere else. And his life is in keeping with his birth. He lives to the day of his death in filth. The manure pile, the cuspidor, and the cess pool are his homes. It is from these haunts that he comes to visit the kitchen, the dining room and the nursery. He drags his filthy feet across the bread, dips them in the butter, wipes them on the meat and bathes them in the milk. He seeks out the sick room and sips the excretions of the consumptive, the child with the summer complaint. Then he flies to the kitchen and deposits the poison on the rim of the milk bottle and to the nursery where he lights on the baby's lips.

It is well to watch out for your milk man, butcher, grocer, fruiterer, and tradespeople. If they are not as particular as you are deal elsewhere.

A writer in the World's Work says: "Beasts of the jungle have slain thousands, but this prowler in the household has slain his tens of thousands. Of all vermin, he is the most filthy; of all purveyors of disease, the most deadly."

In self defense every citizen ought to wage a war against the house fly as the United States government waged it against the mosquito at Panama.

The way to get rid of the fly, is to first get rid of the filth. Kitchens and yards must be kept clean. The back yard must be as clean as the front yard. See that the cook puts all refuse in the garbage can and keep the lid on. Keep the stable clean. Put lime about the stable. All filth, slops, etc breed flies. Buy fly traps, fly paper, fly paddles and burn insecticides. Fight the fly! Get rid of the fly and live. Swat the fly! —Houston Chronicle.

Carrie Nation Dead

The passing of Mrs. Carrie Nation at Leavenworth, Kansas, a few days ago removes one of the most noted women of recent years. She undertook with her hatchet to make the saloon business, as conducted in Kansas unpopular and she did it. She carried on a campaign of bar smashing that probably no sane man and no other woman in the State would have done.

She was the subject of jeers, taunts, praise, condemnation, exaltation abuse, encouragement, according to the ideas of different people. She was several times arrested and was seriously threatened and her name became a by-word. Her methods were rough, and her expressions were often radical. She surely believed she was doing the right thing. The reforms she wrought, if any, were probably all she had hoped for and she probably died with a clear conscience.

Excursion to Slaton

There will be an excursion over the Santa Fe from Snyder to Slaton and return on the morning of June 15th and good to return June 20th, for \$2.70 round trip. The train leaves Snyder at 9:10 a. m. and returns at 9:15 p. m. the same day.

Subscribe for the Signal.

Letter From a Friend

Mineral Wells, Texas, June 10th.

Mr. I. D. Seoggin,
 Snyder, Texas,

Friend Pete—

I was very much shocked and grieved today when I received a letter from Colorado stating that Boley was dead.

By his death, I have lost one of my best friends and the country one of its truest, and best citizens.

Only a few days ago George Calvin was here and we were speaking of you and Boley. I thought of him then as in the best of health and in the prime of life. I cannot realize that he is dead.

Write me the particulars of his death.

Assure Mrs. Brown and the family of my deep sympathy in this their great sorrow.

Would be glad if you would show them this letter.

With kindest regards,
 Your friend,

BROOKS BELL.

Just received another shipment of the celebrated Maitland coal for cooking purposes.
