NUMBER 52

Prospects Good for Oil In Large Quantities in Scurry

Possibilities of Finding Big Oil Pool Is Indicated by Presence of Noted Consulting Geologist and Engineer of Mines, A. A. Hassan.

On several occasions we tried to interview Dr. Hassan, but we were not lucky enough to find him at leisure to give sufficient time for a thorough explanation of the geological conditions in Scurry county, but this time we think we have at last obtained a valuable information for our readers.

It will be of interest to note that Dr. Hassan was educated in three European universities for geology and mining engineering and after completion of his studies he made explorations in most parts of the world. He is a scientific expert upon geology, mining engineering, petroleum engineering, mineralogy, geography, atomic and electronic theory, geological, paleontological and archaeological explorations.

His explorations were conducted in the United States (Texas, Oklahoma, Louisiana, Arkansas, Arizona, Nevada, California); in Canada (in Cobalt and Porcupine); in Poland, in oil fields of Galicia, Rumania, Balkan States, Russia, Asia Minor, Mesopotamia, Palestine, Egypt and other parts of Africa and South America.

In Texas Dr. Hassan is most favorably known on account of his study of the Balcones Fault and East Texas, about which he wrote many articles in oil magazines and constructed a map of East Texas geology.

He spent two years to study the Balcones Fault alone, with headquarters in Waco.

His article upon the geological importance of the Balcones Fault, published in Oil Trade Journal of New York, with a geological cross-section, gave him the distinction of being the first geologist calling the attention of the oil fraternity to the possibilities of the Balcones Fault.

His lectures held in Waco before the Oil Producers Association upon scientific subjects have been reported in several newspapers, and highly commended.

Dr. Hassan made the geology of McLennan County, Texas, and gave it free to the general public.

In 1920, 1921 and partly in 1922 Dr. Hassan studied the so-called Marathon Uplift and his conclusions obtained at the interview are as follows: "In 1918 two geologists have outlined the so-called 'Marathon Fold' named after the Marathon mountains, located in Brewster and Pecos Counties, Texas. It is apparent that this fold was produced during the volcanic disturbances in these mountains, and along the time of weakness the fold or uplift was produced. Originally the two geologists traced the Marathon Fold through Pecos, Terrell, Crockett, southeastern part of Reagan, Irion, southeastern part of Sterling and northwestern part of Tom Green, Coke, Nolan, Fisher, Jones, Stonewall, Haskell, Knox and in Foard counties and they published their findings with the Bureau of Economic Geology of Texas in a pamphlet form.

The oil operators encouraged by this find drilled many deep wells upon this fold with an expenditure of over \$1,000,000, but no oil was found in any quantity.

This induced me to examine and study this uplift and define more accurately the trend of the same.

According to my explorations the Marathon Fold starts in the Mar-

athon Mountains and strikes Pecos and Terrell, Crockett, Reagan, Glasscock, Sterling, Mitchell, Scurry and Kent Counties; thus striking considerably west from the original location.

The best proof that the fold is found to be in the correct place are the now producing wells of Reagan, Glasscock, Sterling, Mitchell and Scurry Counties.

The potentialities and great possibilities of developing several commercial oil pools along the line of the Marathon Uplift are without doubt—but it remains to be discovered yet the "Geological High"—that means the location or locations where the older formations came up closer to the surface, so that drilling of the wells can be accomplished with least expense and with greatest possible results, that means largest oil production. Not to excite anybody in advance, my opinion is that this Geological High should be found somewhere in Scurry or in Kent County.

The initial oil production of the Lou-Tex and Humphreys wells, bids well to define an oil pool in the southern portion of Scurry County.

The Humphreys well proves conclusively that the Wichita-Albany Formation of the Permian Age is oil producing. The oil is beautifully green and is of 37.38 gravity, which is by far the best grade of oil obtained on the Marathon Fold.

The well will most likely produce from 75-100 barrels per day on the pump, from a depth of 3402-3442 feet. The Lou-Tex well produces 25-30 barrels of lower grade of oil from a depth of about 1800 feet, from an upper Permian bed.

These two wells are establishing so far two oil levels in Scurry County. What the next oil level will be in the Pennsylvanian Formation we can only guess at present—however I am of the opinion that on the Geological High we can confidently expect much larger production with flowing wells. The third well drilled in the northern part of Scurry County is the Riley No. 1 of the Stanton Oil Company. This well is down to 3509 feet and is standing in the Wichita-Albany Formation of the Permian.

The oil may be encountered any time before reaching the Pennsylvanian Formation. The difference in elevation between the Humphreys and Riley wells makes now the last named a good prospect—however a detail geological survey must ascertain such a possibility."

Dr. Hassan studied partly the Scurry County in 1922, and ordered to drill the Riley well to 3500 feet, so as to comply with the contract of the landowner—and he advised the receivers of the Stanton Oil Company not to drill deeper until a detail geological survey is made.

He is ready now to make the geological survey of Scurry, Garza and Kent Counties—providing the landowners will assure him of sufficient acreage under lease to drill an additional well or deepen the Riley well or both.

Dr. Hassan's financial connections are such that he is able to carry out any agreement that he makes, in fact, certain wealthy stockholders of Stanton Oil Company will back him up financially when it will be necessary.

Grandma Bibbee Dies at Home of Daughter

Grandma Bibbee passed away at the home of her daughter, Mrs. Susie B. Crump of Uvalde, Saturday, May 24, and her remains reached here Tuesday morning. The funeral took place at the home of her granddaughter, Mrs. G. H. Leath, conducted by Rev. J. T. Bryant, pastor of the Presbyterian church, assisted by Revs. Rouse and Jameson. Interment followed in Snyder cemetery, the body being laid by the side of that of her husband, David Bibbee who died in 1900.

Grandma Bibbee was 85 years of age, and a member of the Presbyterian Church. She will be remembered by many of our old timers as having lived here with her husband in the early days of this section. She was a noble Christian woman, and died as she had lived, strong in the Christian's faith, in the hope of the resurrection, and a home beyond this life.

She leaves two daughters, Mrs. Crump of Uvalde, Texas, and Mrs. C. T. Gurrard of Dallas, and an adopted son, Oliver Maggart, of Clyde, Texas, besides a number of grandchildren, great-grandchildren to mourn her death.

The Times-Signal extends its sympathy to the bereaved relatives in this hour of their deep sorrow.

The relatives attending the funeral were Mrs. Susie Crump of Uvalde, Texas, Mrs. C. T. Gurrard of Dallas, Mr. and Mrs. Oliver Maggart and two sons, J. W. and Woodrow, of Clyde, Mr. and Mrs. Knox Kearsae of Sweetwater.

Chautauqua Gives Good Programs

The first two days of Snyder's seventh annual chautauqua have gone and judging from the remarks heard on the street and in the business places of Snyder every one is thoroughly enjoying the program.

It would be hard indeed to imagine a better opening program for any Chautauqua than that given by the Merry Old Chief and his Radio Entertainers in the afternoon and evening, followed by Wm. T. Bailey in his wonderful lecture, "All Aboard." The musical program was full of pep, of the variety folks like to hear. The Merry Old Chief was jovial, informal and the entire company made themselves and the crowd feel perfectly at home. In the evening Mr. Bailey, a banker of San Diego, Calif., challenged the thoughts of every one in the large crowd with his convincing, humorous lecture. It was one of the most enjoyed lectures heard in Snyder in recent years.

Wednesday Miss Riner and Mr. Harry Wilson presented a program of real fun in the afternoon, and again at evening, followed by Chancellor Bradford in his powerful lecture, "This Way Up." Dr. Bradford has a fine appearance, a splendid voice and held his listeners' deep attention throughout, and when he closed many were heard to say that it was too short.

These two days have been thoroughly enjoyed and the remainder of the program promises to be just as entertaining and grow stronger as the week progresses. The Mendelsson Quartet and Dr. Rawei will give the program this afternoon and evening and be through with their program at 8:30 so that those desiring to may attend the high school commencement exercises. Friday morning the big play, "Six Cylinder Love" will raise the curtain at 10:30 in the morning. Dr. McMurtrey will interpret the twenty-third psalm at 3 P. M. and Chancellor Bradford will speak again at 8 P. M. This will be a full day. Saturday the Harper-Terwilliger Co., and Dr. Amsbury, then Sunday perhaps the biggest program of the entire week when Gilbert and his American band will fill the entire day. The evening program will be strengthened by the use of colored lights and local talent and promises to be very spectacular. Monday will end the program, with the Clemmens Marionettes with their puppet show, and at evening Dr. Ellis will close the program. Dr. Ellis's writing is well known to many of the Snyder people, he having written the International Sunday School lessons for many years, and he also writes for such papers as the Review of Reviews, New York papers, London Daily Mail, and many other large papers of the country.

Judging from the performance of the past two days, and the appearance of the program for the rest of the week this promises to be one of the most enjoyable Chautauquas ever held in Snyder.

Mrs. J. D. McClannahan of Blooming Grove is here this week visiting with friends.

Methodist Revival Starts Next Sunday

Sunday morning at 11 o'clock we will begin a ten day's or two weeks' meeting. We earnestly solicit the co-operation of every one, of every denomination, saint or sinner. Rev. J. C. Mann, our pastor at Vera, Texas, will arrive Monday evening and will take charge of the choir. Rev. Mann is an able choir director and is a splendid singer, is a B. A. degree man from Southern Methodist University and a most consecrated Christian.

The pastor will do the preaching and wants your sympathy and prayers. Services Sunday night will begin at 8:15. No services Monday nor Tuesday night on account of the lecture by W. T. Ellis, a great Christian man. Go hear him and then Tuesday morning at 10 o'clock come to the Methodist church with a determination to not have any more hindrances to the close of the revival. Come praying, and everybody pull together for a great harvest.

C. E. Jameson, Pastor.

DR. SCARBROUGH HURT IN CALIFORNIA

Mr. Ike Boren received a letter from his brother, Lee, in California, stating that Dr. Scarbrough had been run over by a car and seriously injured at Long Beach. The Doctor was at Virginia City when he was injured.

PRESBYTERIAN AID

The Ladies of the Presbyterian Aid will meet at the church Monday at 1:00 o'clock for the purpose of quilting. All are urged to be present.

District Court Is In Session This Week

District Court for the Spring term convened Monday. The following grand jury was empanelled:

Civil Docket.
J. D. Isaacs, J. G. Lockhart, J. A. J. Jones, J. G. Landrum, Emmett Orr, J. W. Honey, Lee Grant, E. D. Holdren, W. A. Johnson, J. F. Crowder, H. M. Murphy, W. A. Louder, foreman.

Disposition was made of the docket as follows:

F. F. Dubose vs. J. J. Holiday et al, judgment for plaintiff.

Mrs. Flossie Snodgrass vs. O. L. Snodgrass, suit for divorce, judgment for plaintiff.

Maude Dennis vs. Floyd Dennis, suit for divorce, judgment for plaintiff.

Rhoda Pyle vs. Cullen Pyle, suit for divorce, judgment.

Ivan Teters vs. Garland Teters, suit for divorce, judgment for plaintiff.

Ex parte case J. W. Taylor, removing disabilities, judgment for plaintiff.

Criminal Docket.
The State of Texas vs. J. E. Evans, charged with murder, continued until next term.

Sitting Docket.
The following cases has been set for trial:

The State vs. D. S. Kirk, charged with swindling, set for Thursday, the 5th.

First State Bank vs. Ed J. Homer, continued to next term.

W. D. Hooper vs. J. W. Burrus, suit for damage, set for June 5th.

John B. Slaughter vs. M. W. Height, suit for establishing boundary, set for June 19th.

Next week will be jury docket week.

TO THE VOTERS OF PRECINCT NO. 4:

In announcing my candidacy for Commissioner of Precinct No. 4, I will say I have lived in the State of Texas 28 years, in Eastland county 19 years, in Scurry county 9 years, in the town of Snyder for the past 4 years, living in the southeast part which is now Precinct No. 4. Prior to coming to Scurry county, I had considerable experience in building roads and feel that I am qualified to fill the office to which I aspire. To those who I am not acquainted with, will cite them to the business men of Snyder as to my business ability and upright character as a citizen of this county. If you see fit to elect me to the office of commissioner I will give in return the very best service that is in me. I will show no partiality to anyone, looking to the very best interests of the taxpayers of Scurry county.

I am for good churches, schools and roads, first, last and always. Itc
W. W. EARLY.

Miss Ethel Isaacs who has been teaching in the Clovis, New Mexico, schools the past term, returned home Saturday and will spend the summer here with her parents.

Ira Gas Pressure A Power Proposition of Real Merit

In developing the Ira field there has developed a resource altogether new in way of power. In both wells drilled there has been developed along with the oil a strong gas pressure of the non-inflammable type. Both wells have been drilled on its own gas pressure. Not a spark of fire is used. Engines are converted quickly into gas pressure engines and run on the gas from the wells. Drilling cost has been reduced to the minimum, and the water expense done away with for boiler purposes. The Humphreys well was finished with the consumption of only 500 gallons of water.

The gas from the first or Moore well, was first conveyed through pipe line more than two miles to the new well and drilling started and continued under the Moore gas pressure until the Humphreys well brought in its own gas. Since then all the drilling was done on gas pressure coming from the well. The Moore well No. 1, which has been under pump for several months is operated on gas pressure from its own well.

This is the cheapest power ever discovered in America. It is cheaper than water power. If these engines used in drilling the oil wells can be

pulled by natural gas pressure then every gin in Snyder can be operated on this pressure. The pressure does not lose its force by being conveyed through pipes. The pressure at the Humphreys was stronger after being conveyed two miles through a pipe line than it was at the Moore direct from the well. The same oil pipe line that brings oil from the Snyder field will bring the gas also and can be used for manufacturing purposes.

There is unlimited possibilities in this newly discovered gas in the Ira field. If conveyed to Snyder in the contemplated pipe line we will see manufacturing enterprises come to Snyder of every description. It is reasonable to suggest that within two years we will see the largest cotton mills in the South in operation in Snyder. We have the water and with a fuel at a nominal cost it will make Snyder an ideal manufacturing point.

The Loutex has sent a test of this gas to Washington for investigation and a decision as to its possibilities. If it proves from government test the beneficial results proven here under local test then the biggest thing ever discovered in way of cheap fuel has been discovered in Scurry county.

The Humphrey-Loutex Pipe Line

Referring to the above caption, the Times wishes to say that in its opinion the question of constructing a pipe line from the Ira field to Snyder or Colorado will come up for consideration at an early date. The necessity of a pipe line is not dependent on local consumption of fuel oil, but pipe lines are built to get oil to the general markets. It would be wise for our gins in the county to convert their engines into oil burners and arrange to use the Loutex product. It would certainly be cheaper and more satisfactory than coal, and would at the same time lend encouragement to the promoters in the Ira field.

The Ira field is no longer an experiment, as sufficient production has been developed to prove the proposition beyond the reasonableness of a doubt. The Loutex people have two wells under pump and the combined storage capacity so far at the wells is 2500 barrels. This storage will soon be filled and unless there is a pipe line outlet for the oil pumping would have to cease in a few months. Therefore for the Loutex Corporation to make these wells profitable their production capacity must be gotten to the markets. Other wells will be drilled at once, and thereby increasing the necessity for the pipe line. As before stated the necessity of the pipe line does not and will not hinge on local consumption. Scurry county normally could not use the production of one good well, and the combined production of several wells would preclude the possibility of using even a fractional part of the production that will be had in the Ira field within the next few months.

The matter of building the pipe line is up to us. If Snyder does not get the line then Colorado will get same. Snyder must have the line at any cost. For this oil to go to Colorado through pipe lines would rob Snyder of the accruing benefits from this field. We might as well not have a field in Scurry county if

the pipe line and the enterprises that follow should go elsewhere. Therefore, it is urgent that Snyder people think this matter over and get ready to assist in bringing this pipe line to Snyder. There is no question in our minds but that the pipe line will be built in the next few months or at least construction started. We are informed that a number of wells will be started by the Humphreys-Loutex interests, and that the pipe line will of necessity have to be under construction and completed before these wells are finished.

We must be up and doing and see that we get the rebound from Scurry county's oil production which promises to be by far better than the Westbrook field and next to the Ranger field. Last spring the Times stated that the next largest and most important oil field to be developed in Texas would be in Scurry county. We have no reason to doubt the correctness of our conclusions. In fact, we see the literal verification of our predictions. It is our opinion that within the next twelve months we will see fifty wells in the Ira field under pump and producing high grade oil. Oil production in Scurry county, provided we get pipe lines, refineries, general headquarters and pipe storages, etc., will put a growth on Snyder and Scurry county second only to Ranger. Its coming just as sure as fate and the man that belittles the opportunities of oil production in Scurry county is short of vision. To undertake to make it appear that the production in the Ira field is a local proposition and for local consumption is to belittle the big possibilities of oil production in Scurry county generally. Let us get busy and get what's coming to us. We must have this pipe line, and there is no question but that it will be built during 1924. Let us make plans to put over the pipe line just as soon as the Humphreys-Loutex interests are ready to make us a proposition.

Let us get busy and get what's coming to us. We must have this pipe line, and there is no question but that it will be built during 1924. Let us make plans to put over the pipe line just as soon as the Humphreys-Loutex interests are ready to make us a proposition.

A CORRECTION IN LAST WEEK'S C. OF CO. WRITE-UP

Last week in writing up the banquet of the Chamber of Commerce and in mentioning the money raised and the speeches made in behalf of the Home Economics Department, we overlooked the mentioning of the first speaker on this subject and first contributor to this fund. It was Mr. A. A. Hassan, consulting geologist and engineer of mines, of New York, who is making a survey of Scurry county and was present as an invited guest. He spoke first on the question of helping raise the indebtedness in this department and emphasized his remarks by a cash donation. Mr. Hassan was an appreciated and honored guest on this occasion, and his remarks and liberal cash donation were heartily applauded.

and Mrs. Joe Wicker, Mr. and Mrs. E. F. Wicker, Mr. and Mrs. Will Smith, Alex Murphy and mother, Mrs. Jim York, and Charlie Ainsworth.

ESRUDOMA CLASS REPORT

The Esrudoma Class of the Baptist church met last Monday in regular business session at the church.

Reports of committees were very encouraging. Further business was planning a chicken fry. This was planned for Thursday night. After the business ice cream and cake were served.

At 6 o'clock Thursday night the wives, husbands, young ladies and their boy friends met at the church.

There were about eight or ten cars and we motored out to Sears farm, where the men got busy and made the fire and went to frying chicken.

Just at dark the men announced supper. Every one we hope had all they could eat, for there was chicken, bread, salads, olives, pickles and ice lemonade.

We were indeed glad to have the guests with us.

We left after several hours of enjoyment, hoping that we might have many more chicken fries this summer. —Reporter.

Prof I. C. Bagwell Appointed Delegate to Demo. Convention

A wire was received in Snyder yesterday from Mr. W. M. Morrow, who is attending the State Democratic Convention at Waco in company with Messrs. H. G. Towle and J. J. Taylor, to the effect that Prof. I. C. Bagwell has been selected as alternate delegate to the National Democratic Convention which convenes in New York in June. Prof. Bagwell plans to visit Washington, D. C., early in June and also attend the National Democratic Convention in New York while gone. The Snyder people will certainly be pleased to know that Prof. Bagwell has thus been honored.

George P. Bird, brother-in-law of Judge Z. T. Noble, died at Dallas last Sunday at 4 P. M. Interment took place at Waco. He was 67 years of age and a pioneer of McLellan county.

THE LACK OF FAITH

Back of every case of discouragement is lack of confidence or faith in God, in humanity, in one's self, or in all these. The avenue of the Devil's attack is the faults and frailties of mankind. Back of every evil deed, back of every thought that is calculated to bring unhappiness, misery and woe is the Devil himself, the father of lies, the arch-deceiver, destroyer of man's faith in God. The lack of faith in God and His word is the destructive agencies of the Devil.

The Devil uses many devices to destroy mankind and his Faith in God. He uses egotism, saying, "Ye shall be Gods," that is to say, that men shall have such knowledge as shall make Divine instruction unnecessary. Egotism begets infidelity, it turns the word of God into fables.

The Devil uses vanity, appealing to his victims with flattery. Vanity begets egotism, vanity makes men vain, arrogant, intolerant and ultimately destroys faith in the simple trusting life of the Christian. He uses selfishness, which in reality includes all the other weaknesses, telling the unwary and weak in faith in God that he is about to starve to death, or that he or some loved one is in danger, or that some misfortune is about to engulf him, or that evil in some form stands ready to overwhelm him.

Faith is the protecting Providence of God, and which enables one to disregard the promptings of the Devil. It begets courage and strength comes in emergencies when we give ear to the "Still Small Voice." It enables us to say, "Command, Oh, Lord, and thy servant will obey." Since Truth is unchangeable, and is lasting to everlasting, the only thing for its enemies to do is to get men to disbelieve it. At the beginning of Creation the Devil insisted "Thou Shalt Not—" the boldness of this lie crowns all other deceptions. God's truth is meant for men to accept and obey. A man can not accept a part of His Truth and disregard another part. If we refuse to accept a part we are guilty of rejecting all.

The man that denies the history of Creation might as well reject the entire volume containing God's revelation to man. God has given us a perfect plan and we are not allowed to add to or take from His Eternal word. The religious division in the world today is attributed to man's unwillingness to accept all of God's Truth. If all His Truth were accepted there would be one faith and one common ground upon which all religious bodies would stand. The world will never be brought to Christ until His followers accept all of His Truth, speak the same thing and do the same thing. Faith must be built upon the rock of God's Eternal Truth and not upon self-interpretation of same. Men are not allowed to place their own interpretation upon God's Eternal word. God intended that it be believed and obeyed just like He gave it to us—without subtraction or addition. It thoroughly furnished the man of God unto every good work. If the works we do are not found in His holy word then we should not do them, and we stand in danger of the judgment for our presumption if we go beyond His instructions.

God's presence and purposes are not to be doubted. They are everywhere evident. His handiwork is seen in the Heavens and in the towering mountains. Upon the bosom of the mighty deep are the evidences of Him and His wonderful handiwork. The Power of God which created the sun and hung it in the Heavens keeps it there. He who hung the moon upon the darkness of night holds it there through his power. He who piles up the mountains keeps them in place as a perpetual reminder of His greatness. He who scooped out the ocean beds and filled them with waters—whose billows roll within their prodigious depths, is able to quiet them by the command, "Peace, Be Still." And he Who created man is the same today, yesterday and forever. He it is that leads him by still waters and causes him to lie down in green pastures." It is He who holds him in the hollow of His hand, and though he walk through the valley and shadow of death he is nigh. When one becomes discouraged and fearful, whether he realizes it or not, it is a manifestation of a lack of faith. It is by reason of giving heed more to error than to Truth. God's laws cannot be violated with impunity nor their penalties sidestepped. The soul that violates God's inexorable laws, wheth-

Commencement exercises of Simmons College will be observed June 5, and Dr. Harold Majors, pastor of the Gaston Avenue Baptist Church of Dallas, will deliver the thirty-third annual commencement address of that institution. Exactly one hundred students are enrolled in the senior class of Simmons and will receive the A. B. degree this year. The number of graduates was announced some weeks ago as 94; but since the announcement six more have qualified in the matter of credits, and one hundred men and women will be graduated from Simmons for 1924 by far the largest graduating class the college has ever had. About three-fourths of the number will complete their work and receive their diplomas at the June commencement, and the other fourth will take their degrees at the end of the summer session.

Poetry is coming back and the center of the revival is at Southern Methodist University, this year's national poetry contest indicates. With one hundred and fifty college students representing seventy colleges and universities competing, students at Southern Methodist University got away with two of the three awards, including the first and third. The lone prize captured outside the ranks of the Methodist students went to Mount Holyoke College, Mount Holyoke, Mass. Students of many large institutions, including Cornell, Harvard, Illinois and California Universities, participated.

About the year 1865 there was enacted a law in the state of Mississippi making it an offense punishable by a fine of \$100.00 to throw cottonseed in any running stream in that state. Cottonseed wasn't considered of much value in those days. The cottonseed produced in all the Southern States this year will probably sell for right around \$250,000,000.00. Quite a difference between this year and the year 1865.

er in nature or Spiritual, pays the penalty. There is no escaping the consequences of our conduct in this life. If we violate the laws of nature we must pay the price of our folly. If we violate the Spiritual law we will pay the penalty in the day of judgment. The penalty exists with the law and there is no escaping it—it is as sure as its violation. If man violates God's laws he will pay. The day of reckoning may be temporarily delayed, but it is sure to come, whether in Time or Eternity.

Then how are we to escape the penalties of God's laws? Only by a strict observance of his laws, a respect for His Truth, a faithful following of His Divine injunctions. The assurance implied by the Apostle Paul should be our guide, "If God be with us who can be against us." All who will may have this assurance. The best of it all is that all who will may be under His protecting care. "Let us hear the conclusion of the whole matter," says Solomon, "The whole duty of man is to fear God and keep His commandments."

Mrs. Edmundson, who lives on an Alabama farm, temporarily upset the decorum of the Senate Agriculture Committee's Muscle Shoals hearing last Saturday by jokingly accusing Chairman Norris of breaking a promise he made months ago to an Alabama school girl. She told the committee that the chairman, attending a picnic in that State, while on an inspection trip, promised to support the Ford bid in return for a kiss, but did not make good on his part of the bargain. Senator Norris did not accept the story as a joke, and the hearing was interrupted while he demanded an explanation and questioned whether a deliberate attempt was made to discredit him. Mrs. Edmundson assured him she meant no harm, and the proceedings got back to a more serious basis. What was the Senator doing to allow this kissing affair to take place. It must have been a brazen little hussy that pulled this kissing stunt. But society does many funny things these days. Women are being used as decoys and as methods of bribing public men and officials. A man that would be bribed by a kiss from such forward women is certainly selling himself cheaply. The habit for a long time has prevailed in America for young women to pull kissing stunts in entertainment men of prominence. It certainly looks bad and there are few men of character that are seeking this kind of honor, and the women that engage in such customs are degrading their sex.

The speculative age has passed in reference to Scurry county's oil field. The second well brought in last week, Humphreys-Wellborn No. 1, demonstrated the fact that we have an oil field that will surpass the Westbrook field. We will soon be confronted with the proposition of pipe line from this field. The Humphreys interests will build a pipe line at an early date in order to market their oil. There are two points for this pipe line, at Westbrook and at Snyder. We must have this line to come to Snyder. It means more to Snyder than the extension of the Katy railroad to our town. When the pipe line proposition is put up to us we must go after it in good shape. With the pipe line comes refineries, supply houses and general offices. To let this pipe line go to Westbrook, Snyder will derive no benefit from the oil field in Scurry county. Get ready to get behind this pipe line proposition. We just must have it.

A proposal that a world conference of religious forces be called to consider plans and methods against war was introduced before the Methodist Episcopal general conference held at Springfield, Mass., last week. A united movement of all churches looking to a discontinuance of war may result beneficially to the cause of righteousness, but it is our opinion that no immediate stopping of wars and rumors of wars can be brought about by any agency. The world of mankind must be taught the doctrine of love and forgiveness. The great Eternal principles of Truth and Justice, of righteousness and the brotherhood of man as taught and lived out in the life of

the Master Christian is the only salvation of the nations of the world. Until the world learns universally the doctrine of Christ wars will continue. Government conferences will avail nothing until men learn to love their neighbor as themselves, until they learn thoroughly the great lesson of love and forgiveness. "Forgive our trespasses as we forgive those who trespass against us," is the foundation for future world peace. If this principle could be instilled in the lives and hearts of all men everywhere there would be no wars nor rumors of wars. There would be no misunderstanding among men; there would be no necessity for courts and jails. Killings would cease and penitentiaries would no longer be a necessity in the affairs of men.

The highways throughout this country will be immediately improved by removal of unsightly billboards. Legislation is bringing this about in some states and in others the removal is voluntarily made by advertisers who wisely prefer to gain publicity through proper channels.

Dr. T. F. Wall, lecturer in electrical research in Sheffield University, claims to have discovered a "death ray." He has applied for a patent covering "means for transmitting electrical energy in any direction without the use of any intermediate transmission wires." Dr. Wall says that his invention is capable of destroying life, stopping airplanes in flight and motor cars to a standstill. He claims no limit to its possibility. Thus is man bent on invention for the destruction of human life. While scientists are inventing instruments of death religious organizations and men of religious inclination are endeavoring to find a solution to end wars and rumors of wars. The only

solution that will ever be found is the teachings of the Lord Jesus Christ. Christianity must do the work if wars are to cease. Men must be taught that wars are wrong—that killing is wrong and that brotherly love does not contemplate taking human life.

Items of Personal Mention

Clyde Shull and Woodson Stinson motored to Sweetwater Tuesday for the day.

Harry Moore, who has been here for the past two weeks assisting the Kelley Cash Store to get their stock of goods arranged which they moved here from Slaton, left Sunday for his home at Slaton.

Mr. and Mrs. Bell and son, Franklin of Greenville, after a few days' visit here with their relatives, Clyde Shull and John Davis and family, left Monday for the Plains where they will visit before returning to their home.

Jim Pagan of the Lone Wolf community was in town Tuesday doing some trading.

A. J. Horton of the Camp Springs community was in town Tuesday looking after business matters.

C. E. North and family who have made Snyder their home for the past two years, left Wednesday for Corsicana, where they will be located for the present. Mr. North has been associated with the Snyder Laundry ever since he has been here.

Mrs. Cooley, Misses Mary and Ruby Kate and Mr. and Mrs. Iyle and daughter, son Robert George of Kaufman, are here this week visiting with their relatives, Dr. and Mrs. Johnson, and attending the graduating exercises of their daughter, Miss Ellen Buice.

Mr. J. W. Massey and wife of Abilene, spent Tuesday here visiting among friends. Mr. Massey was married last Wednesday at Haskell to Mrs. Bettie Patterson of Seymour. Mr. Massey has many friends in Snyder who join the Times-Signal in extending Mr. and Mrs. Massey their hearty congratulations.

L. D. Green and family of Jayton spent Monday here visiting with their brother, O. S. Green and family. Mr. Green is thinking of moving here and was down looking over our town with a view of moving here.

Miss Vela Bell of Ennis is here this week visiting with her brother, W. R. Bell and family. Miss Bell will go from here to San Marcos where she will spend the summer.

Mr. and Mrs. McCollum who have been here visiting with Mrs. McCollum's parents, Dr. and Mrs. Sparks, left Tuesday for their home in Dallas. They were accompanied home by their sister, Miss Ruby.

Mrs. W. T. Baze left Tuesday for Slaton where she will spend a couple of weeks visiting with her daughter, Mrs. J. L. Suits.

Miss Tress Stone was here several days this week visiting with her relatives. Miss Stone has been in charge of the operating room at the City Hospital in Houston for the past six months and is going to her home in Lockney to spend a few weeks before going to Lamesa where she will accept a position as head nurse in one of the hospitals of that city.

Albert Pennington, wife and daughter, Miss Esther, of Lubbock, spent Saturday night and Sunday here with their relatives, the Times family.

Scott Stanfield and wife of Borden county were in town Monday doing some shopping and visiting with their parents, Mr. and Mrs. W. B. Stanfield.

Mr. A. C. Odom of Cameron is here this week visiting with his friends, Dr. and Mrs. Sparks.

Mr. Jones of Blooming Grove, brother-in-law of Mrs. J. H. Sears, died at his home in that city Monday. Mr. and Mrs. Sears have been in Marlin for the past two weeks and went from that point to Blooming Grove on the receipt of the message to attend the funeral.

J. J. Taylor, W. M. Morrow and H. G. Towle left Monday for Waco to attend the State Democratic meeting which is in session in that city this week.

Mr. and Mrs. W. B. Stanfield spent this week on their ranch in Kent

FIRST LETTER SENT STAR-TELEGRAM ON BONUS BILL PROMPTLY ANSWERED

The first letter inquiring about the bonus for veterans of the World War came since The Star-Telegram announced Thursday that it would publish bonus information came from Arthur R. Elkins, Holliday. Below are questions he asked with answers by R. H. Pearson, commander of Bothwell Kane Post, American Legion.

Q. How much will the insurance amount to?
A. Amount varies according to length of service and age.

Q. Is it \$10,000, the sum it was while in the service, or less?
A. Less.

Q. Do we have the privilege of

county looking after business interests.

Mrs. Pat Jones of Fluvanna was in our city Saturday doing some shopping.

Mr. and Mrs. E. A. Watson of Hämleigh were in town Monday visiting among their many friends.

Mr. and Mrs. Boling of the Fluvanna country were in town Monday doing some shopping.

Mr. and Mrs. W. F. Fenton of Polar were in our city Saturday doing some trading.

Miss May McClinton is in Commerce visiting with relatives and friends. Miss May will also visit with relatives in Abilene and Wichita Falls before returning home.

Mr. and Mrs. Sidney Johnson left Friday for Lubbock, where Mr. Johnson will spend several days for medical treatment.

cash payment?
A. No.

Q. I was in training on this side from Sept. 5, 1918, until Jan. 14, 1919, both dates, inclusive, so please let me know just what I am entitled to in cash.

A. No cash except where total amount of insurance comes to less than \$50. Amount of insurance depends on length of service, and must be figured with a factor of your age. Your age is not given. There is no preference allowed between cash payment and insurance.

Q. How long before this bill will become a law?
A. It is now a law.

Q. And how long before I can get the benefit of the bill?
A. In the Fall.

Letters from former service men may be sent The Star-Telegram asking about provisions of the bill. The questions will be answered by Pearson through The Star-Telegram.

The Last Week of School

THE HISTORY OF THE CLASS OF '24

On September 9, 1920, just four years ago, the ship Snyder High was anchored at the wharf of a new school year. The passengers were coming from all directions, gathering in the halls of the Central Building, to begin their voyage.

As soon as the ship embarked these same passengers, who were a little while before eager for this journey of knowledge began to show signs of excitement and bewilderment, and as all "fish" will do we began to look this way and that for something to do. It was then that our good captain, Mr. Hall, explained the voyage to us, telling us that upon this voyage we must stop at four ports, Freshman, Sophomore, Junior and Senior. Before these ports could be reached we must conquer such sea monsters as Latin, English, History and Mathematics. With the ever-ready advice of our captain, and the guidance of our pilot, Mrs. Jackson, we were able to overcome these monsters.

When we had reached the Sophomore port, called West Ward, we had learned to walk the deck. Our beloved captain, Mr. Hall had given his place to an equally efficient one, Mr. Burnett, who guided us safely through two ports. Some of our passengers had become seasick, and had fallen overboard, but we picked up new ones who have proved a credit to our class. It was during this year of our voyage that the brilliance of the class began to illumine the school, and with the help of our new pilot, Miss Lois Carrell, we gained a place for ourselves in the annual.

Upon entering Junior, the third port, we had become more efficient, but new difficulties confronted us. For while in this port we had to use the temple of Justice as a temple of learning, but eager for knowledge we kept on. With the help of our captain and his crew, we were able to overcome these unfavorable conditions. We were adding new passengers to our list, and were hoping to make it the largest class to reach the Senior port. The second half of our third year voyage we were blessed with a new building in which we were to prepare for our fourth port. We were gradually being guided to our final port Senior and Graduation when we would take our places in the City of Life.

The Senior port for which we had worked three long years was reached at last. Mr. Bagwell had taken his place as captain of the ship, bringing with him the best helpers we have ever known. The year has been one of hard work, but our faithful teacher, Miss Hord, with the help of the others, has made it one of the happiest years in the voyage on the ship Snyder High. The class is the largest that has ever entered the Senior port on the Snyder High. We not only wanted to be greatest in number but also in achievements. We set ourselves to the task of accomplishing something that would be a help to the classes that follow us. The electric bell system was put in with the help of the Juniors. The class has been honored by winning two loving cups.

And now as we, the graduates of '24, go forth into the City of Life, may each of us be as happy, as successful as we have been during the four years of our voyage.

LEORA HUGGINS.

CLASS PROPHECY OF '24

It was May 30, 1924. Yes, just twenty years had passed since the members of the class of '24 had bid farewell to each other and gone out into the world to make their fortune. How I would like to know the fate of each!

"Then come with me, and you shall know the fate of each." I looked up suddenly and beheld a queer little man, addressing me. His hair was white and curly, and on his nose rested a pair of shell-rimmed glasses. How familiar his face looked. Yes, I had heard that voice somewhere, but where? Without knowing where he led me, I followed pondering in my mind where I had known him. Suddenly we stopped before a queer little shop. We descended down a flight of long stairs. At the foot there was a small door. The old man opened this and we entered a tiny, musty, dimly lighted room. Two small burning tapers cast flickering shadows about the room.

Without a word he sat down beside a table on which a large silver tray, filled with sand was setting. Taking a silver stick in his hand he turned to me and in a commanding voice said, "Sit down and keep quiet!" Instantly it flashed through my mind where it was that I had heard that same phrase and voice so often. This queer little old man was no other than Mr. Carr. Before I had time to renew our acquaintance there appeared on the sand a picture of the school building of Snyder. There in the old English room, seated at the desk was Miss Merle Hord, the dear old Senior sponsor of '24. She had called a meeting of the old Senior Class of '24, and now she was awaiting the arrival of them. The class of '24 had been the last of her

teaching, as she had married the Spanish Ambassador, and gone to Spain to make her home. This was her first visit back to Texas since her marriage. Her married life has been one long sweet dream of happiness.

The door was opened to admit a small man who I remembered as Noel Banks. He had gone away to school and became a great civil engineer.

Before the door was closed a tall man whose hair was turning white, entered. He smiled in a way that showed to me that he was the same carefree John Carrell as of old. He is now owner of one of the greatest and most magnificent theatres of New York City.

Quietly through the door came a modest and neatly dressed woman. She was rather tall and about her was an air of contentment. She was easily recognized as Vera Nell Grantham. She was bookkeeper in the Federal Reserve Bank at Dallas, Texas.

Chattering to each other entered two ladies upon the arms of a large, robust gentleman whom I instantly recognized as Ward Golden, editor of the "American Review." Naturally one of these ladies was Elizabeth Hays, and by the way, she looked at him I could tell that she had been successful in achieving her ambitions of becoming Mrs. Ward Golden, and the other lady was no other than Jewell McGaha. She was explaining to Ward the conditions of the last prison she had examined. Jewell's mission in life was a worthy one.

For a few moments no one entered. Then the door was flung open and in came a group of laughing women. At first I could not recognize them, but as their faces grew plainer I recognized Pinki Yoder, Pat Jenkins, Janie Davis and Polly Merrill. From their conversation I learned that Pinki had just returned from Italy where she had been playing the piano for a national convention held there. Her fame as a pianist was world-wide. Upon seeing Pat I remembered having read in the paper of her cancelling a previous engagement with the great London Alhambra Theatre in order to join her classmates in Snyder. From the uniform worn by Janie I understood that she was the greatest trained nurse in America. Polly was telling Pinki of her contract for her next picture with Paramount Film Co., in which she was to appear with Wesley Barry.

These were laughing and talking when in came four prosperous looking gentlemen. I immediately recognized three of these gentlemen as Carl Periman, Tracy Smith and Virgil Jones. But I had to look twice before I recognized the fourth. Then I discovered that he was Hollis Loyd. Twenty years had brought such a change in him that he did not look natural. It seemed that the members of our old quartette had turned out to be gentlemen of some note. Carl was a singer that the world loved and praised as Caruso has been. Tracy has attained the position of Secretary-Treasurer of the U. S. Virgil has traveled the European countries as well as America. Hollis had become nothing less than another Paderwiski.

The bark of a dog interrupted the conversations, as through the door came a tall woman of stately bearing. She was gorgeously attired, and under one arm she carried a small poodle dog. On her face was a look of disappointment. I knew that this woman was Buice Johnson. She had fallen in love with a millionaire while away at school and against the wishes of her parents had married him. Later her love proved to be only a passing fancy and she had obtained a divorce and returned home where she was one of the leading society ladies of the town.

Entering almost at the same time that she did came a troop of laughing people. They were Raymond Greer, Ruth Clements, Derrell Hosea and Marie Turner. Raymond was now proprietor of the largest hotel in Denver, Colorado. Ruth was manager of the public relief association, and she was known and loved the world over. Derrell was one of the most prosperous farmers in Texas. This was due to the fact that he used only the modern farm implements. Marie has a position as stenographer for the Southland Life Insurance Co.

Presently a group of very interested and business-like men entered. Time had changed Hollie Lewis, Alph Page, Leverett Lewis and Judson McGaha very little. They all seemed satisfied. Hollie was president of a bank in Chicago. Leverett was the most successful inventor of the day. Alph was president of the Santa Fe and Judson was the greatest hunter of the world. He had found several specimen of animals that heretofore were unknown.

Noislessly in came a portly, serious looking gentleman with a tiny black eyed lady at his heels. I was astonished when I heard them announce Mr. and Mrs. Robert Orr. I then knew that in spite of Robert's efforts some one had vamped him after all. He had become a very successful actor as a pessimistic char-

acter. Following closely after Robert and wife came a trio of ladies. The first of these was Frankie Goodwin. She was teaching physical training in Colorado. Another of these ladies I recognized as one of our former basketball girls. Mabel Huston was now coaching basketball at Berkeley University in California. The other member of the trio was Leora Huggins. She was a designer of fashions in Paris.

Fannie Bentley came in next. She had married a wealthy rancher of Utah and reigned there as queen of his home in peace and happiness. I could hardly believe my eyes when in came two ladies, one of which I quickly recognized as Nell Wilson, the world-famed reader. The other had the features of Lois Berry but she did not look to be more than 17 years old. But yes, it was Lois because she had invented the new youth cream, which kept age away.

I heard the train whistle low in the distance, and as the Santa Fe pulled in from Sweetwater a host of people got off and rushed to the school building. They were in such a hurry I could not tell who they were until they had entered the room. Then I recognized Willie Fern Curry. She and her husband were missionaries to China and she was in this country for only a short time. Beside her was Janie Martin who had charge of the H. E. department at Austin. Obert Littlepage was president of the Littlepage Automobile Co. in Detroit, Michigan. Mary Ellen McMatt was Dean of History at C. I. A. Evelyn Irvine was manager of a large department store in Oklahoma City. There were two others who had arrived on the train. They were Wayne Wilson, who had just returned from Europe where he had been to get facts for his latest history of the world, and Gertrude Isaacs, who was matron of the Buckner Orphanage at Dallas.

I was wondering what would happen next when in came Ruth Rosser, Zona, Agnes, May and Ruby Joyce. Ruth was carrying some books. One of which was her masterpiece which she had just completed. Zona May had decided that she did not care for women's work and had become a great surgeon. She now held a position in Mayo Brothers at Rochester, Minn. Agnes owned one of the most exclusive floral shops in Houston. Ruby has made a perfect success in running a beauty parlor in Los Angeles, California. Everyone patronized her.

The door opened again. Were there still others? Yes, in came Mary Robinson, Inez Sutherland and Faye Morgan. Mary has become famous through the publication of the most complete dictionary of this century. Inez Sutherland, our old class poet, is now poet laureate of Texas and Faye Morgan was a latin teacher in Mississippi University.

Following these came a very sedate little lady. She was easily recognized by her smiling face as Ernestine Rosser. She was a model in a New York department store.

Just as Miss Hord called the room to order the door was opened again and in came Lucille Webb, Marguerite Riley and Elvin Thompson. Lucille had married an oil king and was living in California. By Marguerite's apparel I knew that it was she who was known as the greatest woman rider in the U. S.

Elvin was the famous naturalist of Texas. He has spent all his life in search of the origin of grains.

Just then I heard some one calling, "Florine, Florine," wake up or you'll miss your train." With a start I awoke. What a perfectly wonderful dream I had had.

W. E. POPE, CANDIDATE FOR GOVERNOR, SPEAKS HERE

Hon. W. E. Pope of Corpus Christi, spoke in Snyder last week in the interest of his candidacy for governor. He spoke to a fair sized audience and was liberally applauded in his remarks on the issues involved in the campaign.

Mr. Pope is at present a member of the Legislature from the Corpus Christi district.

He made absolutely clear and forcible his position in the able fight he has for several years made against graft, waste and useless plundering of the tax moneys of the people, and laid bare many most amazing facts, drew parallels which threw the light on the wanton waste and mismanagement of the state's affairs, and at times fairly startled the audience with the revelations made.

With the school text book matter being a paramount issue, though but slightly overshadowing many other departmental blunders and miserably poor management and extravagances, the speaker showed that the notorious Teapot Dome scandal at Washington was nothing compared to what was being and had already been done in Texas with her public affairs.

There were no generalities; there were no innuendoes nor speculative diatribes; the speech was a plain, interesting—highly interesting—presentation of a most startling condition which has existed for years through being "hooked up wrong" with a system and false ideas of government and the handling of its problems.

Mr. Pope's speech was a master-

PLAN AGAINST FLOW OF BONUS LETTERS

WASHINGTON, May 24.—Officials are taking steps to avert a flood of useless correspondence with war veterans in connection with the bonus. Plans for issuance of insurance certificates have been so devised as to make it unnecessary for any veteran to do more than fill out the application blanks soon to be made available all over the country. The circular of instructions which accompanies the blank will instruct applicants to fill in their answers to the questions to the best of their knowledge or recollection and let it go at that. There will be no necessity for obtaining records of service.

The questions to be included in

piece in that it was different—different from the stereotyped demagoguery and blantant big "I" and little "u" methods resorted to by the general run of politician—it was a plain, cold, understandable presentation of facts which only could go home to the listener and give him an insight into matters of the most vital importance to himself.

OTELLO HERM PRESENTED WITH GOLD BASKETBALL

CANYON, Texas, May 22.—Otello

the application blanks will not be made public until the blanks themselves are in process of distribution, since officials feel certain that advance information would impel many veterans to write to the War or Navy Department, trying to obtain exact information as to their military records.

All such inquiries as do come in will be answered merely with a circular letter which will state among other things that "claimants will aid materially if they fill out the blank forms of applications to the best of their ability in accordance with their own knowledge or recollection of the facts and refrain from writing to the War Department, Navy Department or the United States Veterans' Bureau concerning adjustment of compensation."

It will be emphasized that there is no occasion for haste, since under the law there can be no cash payments prior to March 1, 1925, while the insurance certificates will bear date of Jan. 1, 1925, or later.

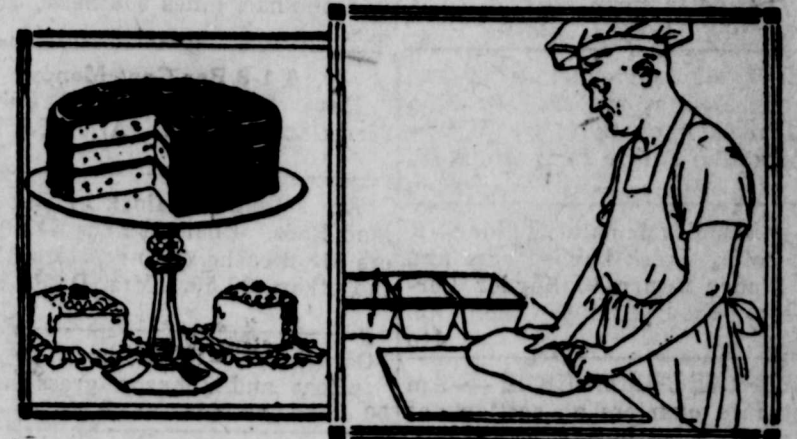

Herm of Snyder, was one of the eight members of the Buffalo Basketball team who were presented a gold basketball by the West Texas State Teachers College this morning. Besides being Student Assistant in the Commercial Department, Herm is an all-round athlete having placed on the college football team, college basketball team, and helped to win tennis honors this spring. It is expected that he will star in basketball next season.

More and more the wealth of the nation is being divided up and owned by the people. It is an impressive fact that hundreds of thousands of laborers, tradesmen, farmers and savings bank depositors are becoming stockholders in railroads and public utilities.

Do You Cough?

San Antonio, Texas—"We have used Dr. Pierce's Golden Medical Discovery in our family for coughs and bronchial trouble and it gave entire satisfaction. I am a practical nurse and have found the 'Golden Medical Discovery' to be of great benefit to those recovering from sickness which had left them in a weakened condition. It enriches the blood, improves the appetite and aids digestion. I can conscientiously recommend this medicine."—Mrs. C. E. Smith, 230 E. Dittmar Ave.

Go at once to your neighborhood store and get the "Golden Medical Discovery" in tablets or liquid.

Phone for Baked Goods

Then you can serve your family freshly baked Pastries and Bread every day without the time and work necessary to do this work in your own kitchen.

Remember we can furnish picnic orders large or small.

Come next Sunday afternoon and we believe you will want to come again. Seven P. M. is the hour. —Reporter.

the watering. Roll call was given with the response, "How to Improve Our Next Year's Club Work," with the splendid suggestions. We are sure our next year will be the best yet. Review of Reviews by Mrs. Thrane was quite interesting. A piano duet was supplemented by a vocal solo from Lillie La Francis Hamilton. was such a splendid treat that she was called back with encore. Mrs. C. R. Buchanan, our parliamentarian, gave a splendid drill. At the social hour hostess served a plate luncheon, consisting of fried chicken, potatoes, gelatin, cherry salad, hot biscuits and iced tea to members and Mesdames Chinn, L. T. Stinson, Herbert Waterman, Tom Boren and Miss Bell as guests. When the parting hour came we were all loathe to leave each other for our short vacation and with lingering farewells we all expressed ourselves to our hostess as being one of our most delightful meetings.

IRA PRESBYTERIAN MEETING POSTPONED

The meeting at Ira was called off Monday night on account of the farmers being so busy, having to plant over their crops. Rev. A. G. Fitzgerald, Presbyterian pastor of Anson, came to assist in the meeting. He delivered a very interesting sermon Monday night. The date of the meeting will be published later.

PERSONALS

Miss Mildred Gehraet of Cincinnati, left Wednesday for her home, after a few days' visit here with her friend, Miss Opal Eppley. Mrs. J. L. Birdwell of Ralls came in Wednesday on a visit to her relatives and attending the graduating exercises of her brother, Roy Golden. Miss Merle McMullen, after a visit here with her relatives, R. L. McMullen and family, left Wednesday for her home at San Angelo. Abe Rogers and family are visiting with relatives in Stephenville and other points in the central part of the State. Mrs. B. L. Patterson and little son returned Wednesday from Kansas City, where they were called to attend the funeral of her father. Mrs. E. J. Hamlett spent Friday in Colorado attending a reception tendered by Mrs. Majors to the young lady sponsors of that city to the West Texas Chamber of Commerce meeting. Sponsors from several of the neighboring cities were present to enjoy the delightful occasion. Ben Davis, Jr., Mitchell McMath and Hugh Wells and their families left Tuesday for a several weeks trip through New Mexico and Arizona. Thad Risinger came in Wednesday from Stephenville where he has been attending school for the past term. Uncle Ben Davis and wife have been spending the week in the Ennis community visiting with their children and many friends in that section. Mr. and Mrs. Matthews of Lamesa spent Tuesday night and Wednesday in our city visiting with friends and looking after business interests. Miss Lola Lewis of Tahoka was here Tuesday doing some shopping. Miss Hattie Herm returned Saturday from Weatherford where she has been teaching in the school of that city for the past school term. Mr. and Mrs. John Brown of the Dunn community were in town Tuesday evening attending the Chautauqua.

Dr. Rosser and daughters, Misses Mary Lou and Marian, spent Sunday in Lubbock visiting with Mrs. Rosser, who has been in the Lubbock Sanitarium for the past three weeks suffering from blood poison in her hand and arm. We are glad to report Mrs. Rosser improving some and her many friends hope that she will be able to come home within a week. Miss Allene Warren of Post is here this week visiting with relatives and attending the Chautauqua. Mr. H. R. Minor and family of Tahoka, visited with Mr. and Mrs. W. R. Minor at Snyder last week. Mrs. Q. F. Frix left Tuesday for Brownwood where she will visit with relatives. Mrs. P. D. McKinnon and little daughter, Gwendolyn of Hermleigh, left Tuesday for Arlington, Texas, to be at the commencement exercises of the North Texas Agricultural College May 27th, where her son, Garrett McKinnon, graduates, and will leave there for Huntsville, Texas, to be at the commencement exercises.

at Sam Houston Normal May 31, where her daughter, Mrs. Iris McKinnon Bergholm, graduates. Taylor Cotton, wife and daughter, Nellie, will leave Friday for Clyde, for a visit. They will return to Abilene next Tuesday and attend the graduating exercises of Abilene Christian College. Their son, Charles Loran, will graduate from the A. C. C. this year, taking his B. A. degree. Mrs. J. A. Hightower of Amarillo, is visiting Mr. and Mrs. R. Lee Sanders, eight miles west of Snyder, having spent the winter in Jacksonville, Florida, and Atlanta, Georgia, making the trip overland. Miss Lela Isaacs, who has been teaching expression in Fluvanna for the past school term, came home Saturday to spend the summer vacation with her parents. C. Scott Thomas, traveling representative for the Oldsmobile Company, was in town Wednesday visiting with their representative here, E. F. Sears.

Mr. and Mrs. Taylor of Ira, parents of Ernest Taylor, left Tuesday for Denton and other points in North Texas, where they will visit with relatives and friends.

CARD OF THANKS

We wish to take this opportunity of expressing our sincere appreciation to each one who sent such beautiful floral offerings, spoke words of sympathy and so faithfully assisted us at the death of our dear mother, sister and aunt, Mrs. W. B. Merrill. Such offerings, words and assistance coming from friends means much more to one in their hour of bereavement, than words can express. May the Lord's richest blessings rest upon each of you for your many acts of kindness.

O. L. Merrill and family.
S. V. Boothe and family.
W. R. Merrill and family.

Miss Estelle Dansby of Waco returned to her home Wednesday after a few days' visit here with her friend, Miss Myriam Steward.

R. B. Bryant of Stamford, Guy Speck of Post and Mr. Shapley of the First National Bank of St. Louis were in town Tuesday evening visiting with the Bryant-Link employees in our city.

CHRISTIAN ENDEAVOR PROGRAM

To be rendered at First Christian Church next Sunday, June 1st, at 6:45 P. M.

Subject—How Jesus faced duty.
Scripture Lesson — Mass. 3:15, John 9:4, Luke 22:42.
Leader—Miss Inez Baze.
Prayer.

Cornet Solo—Boynton Martin.
Why is the word "duty" unpleasant to so many people?—Miss Bess Johnston.

Did Jesus find it difficult to do His full duty in life and in death?—Tracy Smith.

In what ways can young folks best prepare themselves for a life of consecrated service?—Alvin Sparks.

How does the Christian Endeavor Society help us to prepare ourselves

for doing our duty?—James Martin.
Should Christian duties ever be burdensome to us?—Almon Martin.
Does the doing of our duty ever become a privilege to us?—Miss Merle Johnston.
Vocal Solo—Maurine Martin.
Business session to be conducted by Tracy Smith, President.
Benediction.

ATTENTION ROYAL ARCH MASONS

CO-OPERATIVE GROCERY CO.

The Grasshoppers Are Here

Grasshoppers have already appeared in some sections of our county, and unless we make preparations before they become too numerous, our crops are likely to be very much damaged.

In order to be fully prepared to combat this nuisance, we again suggest that every farmer secure the proper ingredients for spreading poison to kill them. The most efficient means to guard against the destruction of our crops has been found by experiments to be the following formula:

- Wheat Bran 25 lbs.
- White Arsenic 1 lb.
- Six Lemons
- Low Grade Molasses 2 qts.
- Water 2 gallons

Mix the bran and poison dry. Dilute the molasses with the amount of water named and squeeze in the lemons. Now mix the liquid thoroughly with the poison bran mixture. After an even mixture has been obtained add more water and mix until a mash is obtained so that after being squeezed in the hand it readily falls apart. Poison should be put out early in the morning or late in the evening. Splendid results have been obtained by plowing a deep furrow around the field next to the pasture fence. The poison can be scattered effectively along this furrow.

If any other information or assistance is desired please feel free to call on us.

PERSONALS

Ira Lee Duckworth of Post was here Sunday spending the day with relatives. He was accompanied home by his wife and little daughter who have been here for the past week visiting with her mother, Mrs. J. W. Warren and other relatives.

Emmett Wilson returned Friday from the Lubbock Sanitarium where he has been for the past two weeks under medical treatment.

Mrs. F. D. Howe of Sycamore, after a few days visit here with friends and looking after business interests, left Monday morning for Post.

Will Hamlett of Milford spent a few days here visiting with his brother, J. H. Hamlett. He left Monday for Lubbock.

Mr. and Mrs. Lon Adams spent Sunday in Stamford visiting with relatives and attending a family reunion and enjoyed a bountiful and delicious dinner.

IN MEMORY

Died in Snyder May 13, 1924, after a few days illness, little Welton Ross Pate, age 7 months and 8 days, infant son of Ross and Ethel Pate. With all the aid of a good physician, and tender care of devoted parents, loving relatives and kind friends, the little one obeyed the summons that must come to one and all and quietly and peacefully passed over the river to dwell with Jesus. He was the light of the home and pride of loving parents, but, alas, death loves a shining mark.

There is no death; an angel form walks o'er the earth with silent tread. He bears our best loved ones away. And then we call them dead. Sleep, my little one, sleep.

And where He sees a smile too bright, Or heart too pure for taint and vice; He bears it to that world of light. To dwell in paradise. Sleep, my little one, sleep.

'Tis hard to break the tender cord, When love has bound the heart. 'Tis hard, so hard to speak the words, Must we forever part? Sleep, my little one, sleep.

Dearest loved one, we have laid thee; In the peaceful grave's embrace; But thy memory will be cherished Till we see thy heavenly face. Sleep, my little one, sleep. —Grandmother.

Mrs. W. W. Eiland returned to her home at Stamford Sunday after a ten days visit at Ira with her daughter, Mrs. Edwin Falls.

Miss Mary Lou Rosser returned Friday from Belton where she has been attending college this past term.

Fred Grayum came in Saturday and visited here with relatives and friends until Monday, going from here to Rotan.

Mrs. Raymond Cole of Fort Worth is here this week visiting with relatives.

J. W. Hill and Miss Mayo-Johnston of Colorado were here Sunday spending the day with their friends, Mr. and Mrs. F. T. Wilhelm.

GAINES COUNTY FARM LANDS AT REASONABLE PRICES AND ATTRACTIVE TERMS

Very little ready money is required to own a good farm in the South Plains of the Texas Panhandle. Payments for your farm are on about the same basis as paying rent.

At Seagraves, Gaines County, Texas, we offer you farm land at prices from \$12.00 to \$20.00 per acre, cash payment down only one dollar per acre, four yearly payments of one dollar per acre and the balance in yearly payments of two dollars per acre with interest at six per cent.

This is strictly a general farming country. Abundance of pure water, no boll weevil; and cotton a sure crop. At present prices of cotton it will not take a great many bales to pay for a 160 acre farm in one season.

This is your big opportunity. If interested in securing a farm and home for yourself and family on very unusual terms, now is the time to act.

Address W. A. SoRelle, General Agent, 17 Santa Fe Building, Seagraves, Gaines County, Texas, for terms of sale and descriptive folder. 50-tf

MRS. HANSON GAINED 20 LBS. TAKING TANLAC

Well Known Dallas Lady Was Weak and Nervous Until She Started Tanlac Treatment.

"Tanlac has taken me from an egg and milk diet and built up my weight from 97 to 117 pounds," is the striking statement of Mrs. V. Hanson, wife of the well-known manager of the Acme Grocery Co., 3647 Hemphill St., South Fort Worth, Tex.

"Indigestion caused me agony of suffering and I had no appetite for anything. My nerves were so terribly unstrung that often I would just sit down and cry and I finally became so weak and nervous that I had to quit assisting my husband in the store.

"But Tanlac has given me such a splendid appetite and wonderful digestion that I eat everything and I

George Wilhelm spent the weekend in Slaton visiting with friends.

Mr. and Mrs. Jim Kelley and Mr. and Mrs. W. W. Early motored to the Plains Sunday, accompanying their uncle and brother, J. H. Early, back to his home after a visit here with his relatives.

Mesdames Eugene and A. H. Kruse of Hermleigh were in our city Saturday doing some shopping.

Mr. and Mrs. B. A. Rodman of Spur were here several days the first of the week visiting with friends and attending district court.

Am selling my flock of Rhode Island Reds. Choicest hens \$1.50, others \$1.00 each. Two roosters \$15.00, the others \$2.50. Mrs. D. P. Yoder. 49-tf

have gone back to my work in the store feeling fine. Now the heaviest rush of customers does not tire or make me nervous and many customers comment on my strong, healthy appearance. I still take Tanlac when I need it for it is the ideal medicine."

Tanlac is for sale by all good druggists. Accept no substitute. Over 40 Million bottles sold.

Tanlac Vegetable Pills for constipation, made and recommended by the manufacturers of TANLAC.

The Cotton Mill Mens' Association of Texas will appoint a committee from among the practical operators to study the curriculum of the textile engineering department of the A. & M. College and make suggestions for incorporating any new methods of instruction and practice which will

make the training at A. & M. of the most practical nature. The appointment of this advisory committee was requested by Professor J. B. Bagley, head of the Textile Engineering Department of the College.

Notice of Business Change

Realizing the tremendous responsibility attached to one man in the tailoring business, I have sold half interest in my business to Mr. Joe Taylor.

Mr. Taylor has been in business in Snyder for 15 years. All of you who have had business dealings with him know what a reliable man he is.

The firm will be known in the future as Bantau & Taylor, and will be continued at the same location.

With the partnership we will be able to give the splendid people of Snyder that which we are always striving to give—better work and better service.

You, the good people of Snyder, are the judge, jury and prosecuting attorney. All that we ask for is a fair trial and then the verdict.

Thanking each and every one of you for the liberal patronage and consideration that you have shown the firm of Bantau & Rogers in the past, and trusting to receive your future valued patronage, we are yours for service.

Bantau & Taylor

"BEST IN THE LONG RUN"

A TRIP TO ATLANTA

By W. T. Rouse.

Complying with the request of the editor of The Times, I here give a short account of my visit to Atlanta, Georgia, to attend a session of the Southern Baptist Convention. I will speak of the things in which I think all readers will be interested.

The Route Traveled.

Leaving Snyder on the afternoon of Sunday, May 12, I had the privilege of attending the services of the co-operative meeting in progress in Sweetwater in which Evangelist Raborn was leading. Arriving in Dallas Monday morning I had some hours to look over the city and get my ticket and get ready to leave on the special train leaving Dallas at 4:35 that afternoon. We went over the Texas and Pacific to New Orleans, then over the L. & N. to Montgomery and then over the West Point & Georgia to Atlanta, arriving Tuesday night about 11 o'clock.

The Convention.

As many of the readers of The Times are not Baptists, I will not discuss the convention further than to say there were more than 6,000 messengers and visitors present. The Convention adjourned Saturday night, but a mass meeting was held Sunday afternoon and also at the night services the Home and Foreign missionaries spoke to a large congregation.

Atlanta as a City.

Perhaps very few cities in the South are better prepared to entertain a convention than Atlanta. The hotel accommodations are adequate and close in to the auditorium. The city itself has grown marvellously in recent years and is still growing at a rapid rate. The country round about is rolling and the little hills add to the picturesque scene. Large trees lapping in many places make beautiful shady streets.

Places to Visit.

There are several places of interest one should visit in and near Atlanta. The first of which is Stone Mountain. The mountain is about 18 miles out from the city and on one side rises almost perpendicularly 1,000 feet. The mountain on this side is a solid stone. There is a street car line running out to the mountain, or near it, so one can choose between the street car and the jitney as to how he will go.

Doubtless most of the readers of The Times are aware of the fact that the thing that makes Stone Mountain a place of interest is the work being done by the famed sculptor Gutlam Borglum carving out in the solid rock of the mountainside, the leading generals of the Confederacy. It would take too much space for me to describe in detail the work. Suffice it to say that although the work has been carried on now nearly two years, the first man's head is not yet completed. The face is almost finished and the hat is being cut out. The hat alone will be 30

feet across. The outline of another man on horseback has been painted and it is 90 feet from the bottom of the foot of the horse to the top of the hat of the general. It is estimated that it will take ten years to finish the work and it will cost \$3,000,000. It will be indeed a splendid piece of art when finished.

No less interesting than Stone Mountain is the Cyclorama of the battle of Atlanta fought during the civil war. The painting is 50 feet high and 400 feet long and hangs in an amphitheater or a circular building constructed especially to house the picture and the building is located in Grant's Park. This picture was painted by three German artists and it took them three years to do the work and the cost was \$37,000. It is indeed a realistic scene and if you are permitted to visit Atlanta do not fail to see this picture.

The Federal Penitentiary.

One of the Federal penitentiaries is located in Atlanta. It is a well kept, neat, up to date prison, and one sees here many things to make him sad. A large number of men of the financial world, such as bankers, oil operators, are to be found here. There are at least 2800 men in this prison and at least 75 per cent of them are young men between the ages of 18 and 26 years.

A City of Schools.

Atlanta is noted for its schools. There are three colleges for negroes and a number for whites. I am always interested in schools and took some time to visit Emory University the leading Methodist school east of the Mississippi river. The school was moved from Oxford, Georgia, a few years ago, and the buildings have not all been constructed yet. The campus is one of the most lovely that I have ever seen. The tall pines and thick forests of other kinds of trees, the undulating hills make it a place of rare beauty. There is on the campus a splendid hospital, several dormitories, a school of medicine, a school of law, and school of theology, and in fact a plant which when complete, will be a great factor in the educational world. All the buildings are constructed of scrap marble given by a wealthy man of Rome, Ga. When all the buildings are completed, I would like to see again this great institution.

Perhaps the next best known institution in the city is the Presbyterian school, Oglethorpe University. It is not so large either in buildings or student body, but is well worth the trip on the street car to see it. There are other schools which are worth mentioning but this is enough to show that Atlanta is a city of schools.

There are many other things worth seeing in Atlanta, but as I was there to attend the convention and not to see the sights, I did not have time to visit other places. The State Capitol is near the auditorium. I passed by but did not go through the building. One sees at one of the principal street crossings the bronze statue of Henry W. Grady, one of the great men of Georgia of the last half a century.

Crops and the Weather.

The spring has been cold and the crops are late and not very much ahead of what they are in East Texas. In making the trip I passed through, Louisiana, Mississippi, Alabama, before coming to Georgia. Everywhere the crops are late, cane and rice, corn, cotton, everything is waiting for warmer weather. It has been cool there as here, and it did not warm up much until Monday. a

week ago, the day after we started home. It came only one gentle rain while we were in Atlanta.

Homeward Bound.

Most of the messengers departed for home Sunday night. I had traveled through Memphis, Little Rock, Texarkana several times, so I chose the route by Birmingham and thence over the Queen and Crescent route to Shreveport on my return home. I wanted to see the country and so had a daylight ride from Birmingham across the country to Shreveport. Arriving at Dallas Tuesday night I learned for the first time of the death of our young friend Rex Awalt. Much of the joy of the trip was marred by the sad news.

Visiting Institutions.

Having met wife and the children at Dallas, we visited Buckner Orphan Home Wednesday, and also Baylor Hospital and School of Medicine and School of Nurses. Thursday morning we came over to Fort Worth to attend the commencement exercises of the Southwestern Baptist Theological Seminary and Training School from which our daughter graduated Friday morning. As soon as we could, we set our faces toward the west and came as far as Ranger, where we spent the night. Getting a good start Saturday morning we arrived safe and happy at 3:30 Saturday afternoon.

What I Think of the West.

It is true they have beautiful trees and more educational institu-

tions in the east than we have in the west. It is true they may not have sandstorms; but as for me, I will take the west with its optimistic, progressive spirit, its sandstorms and occasional drouths. Here live the finest specimens of the Anglo-Saxon

race that I know anything about. Snyder and Scurry County is good enough for me.

Mrs. Frank Eoff and children of Lockney are here visiting Mr. and Mrs. W. P. Smith.

Mrs. Emmett Johnson left Monday for Temple to be with her husband who will undergo an operation there this week. Mr. Johnson expects to return home within a short time and will return at a later date for another operation.

SWEETWATER, TEXAS

**A Six
Oldsmobile Coupe**

\$1135.00 DELIVERED

A satisfied Olds owner testifies to the merit of this wonderful car.

Lubbock, Texas, May 23, 1924.

Mr. E. F. Sears,
Snyder, Texas.

Dear Sir:

I thought possibly you might be interested in knowing how I like the Oldsmobile Six Business Man's Cab I bought from you just one month ago. The speedometer shows 2709 miles and it is impossible for me to express in words how I am delighted with my real automobile, and I don't believe you realize the value in your agency of the Oldsmobile. It takes all the hills in high and to my surprise I went up the caprock hill at Post this A. M. in high against a stiff wind. I do not use any more gas than I did in the old Ford coupe which is about 20 miles to the gallon. It is simply in a class by itself, and wherever I go the people flock around it to see it, and all seem carried away with the engine. By the way, two men have ridden with me since I got my car and both say they are going to have one. I would give you their names, but one is in Dallas and the other one is in East Texas.

Thanking you for getting me to buy this car, and with very best regards, I beg to remain

Respectfully,
J. R. CARD.

E. F. SEARS, Agent
Snyder, Texas

PERSONALS

Mrs. A. B. Roberts and daughter, Mrs. Bertie Jordan, came in Monday on a visit to their daughters and sisters, Mesdames Waskom and Maxwell.

Mr. and Mrs. N. S. Crenshaw and sister, Mrs. Sisemore, motored to Rotan Sunday for a day's visit and outing.

Misses Zada and Veda Maxwell who have been teaching school for the past year in Clovis, New Mexico, came in Saturday to spend their summer vacation with their parents, Mr. and Mrs. J. C. Maxwell.

A. N. Epps returned Monday morning from Abilene where he spent Sunday visiting with his family.

Mr. and Mrs. W. H. Askin of Borden county were in our city Saturday doing some shopping and visiting with our large crowd of Saturday shoppers.

Mr. and Mrs. J. A. Kegans of Santa Anna came in Tuesday on a few weeks visit to their daughter, Mrs. Sutherland.

Chas. Rosenberg, proprietor of the Leader Store, who has been here for the past week visiting with his son Henry and looking after his store, left the first of the week for his home at Brownwood.

Mr. and Mrs. Fred Garner left Monday morning for Lubbock where Mrs. Garner will enter the Lubbock Sanitarium where she will undergo an operation. Mrs. Garner has been in very bad health for the past several months and her many friends hope that she will be much benefited from the operation.

David Davis left Monday for Southland where he will spend several days visiting with relatives.

Mrs. Dunn and children returned to their home at Southland last Thursday after several days visit here with their relatives, Mr. and Mrs. J. S. Davis.

E. J. Jennings of Ralls left Monday for his home after a few days visit here with his daughter, Mrs. R. L. Davis. Mr. Jennings has just returned from a visit to San Antonio and Austin and reports crops in that section much later than usual at this time of the year for that part of the state.

Little Miss Mary Clark Sturdivant of Blackwell came in Monday on a visit to her aunt, Mrs. Nellie Sturdivant.

J. H. Early of Dodge City, Kans., is here this week visiting his brother, W. W. Early. They had not seen each other in 28 years.

Mrs. J. N. Hawkins and little daughter, Jimmie Ruth, and Mrs. N. T. Curry of Clovis, New Mexico, came in Tuesday on a visit to W. M. Curry and family and to attend the graduating exercises of Miss Willie Fern.

LADIES AID OF THE FIRST CHRISTIAN CHURCH

The Ladies Aid of the First Christian church met Monday afternoon at three o'clock at the church with some twelve members present and carried out the following program which was very interesting and very instructive and highly appreciated by those fortunate enough to be present for the evening's program: Hymn—Onward Christian Soldiers.

Prayer—Mrs. Hamlett.

Short business session.

Devotional—Miss Elizabeth Smith.

Hymn—There's a Call Come Ringing Over the Restless Waves.

A Beautiful Story read by Mrs. Fritz R. Smith—Official Mother.

Reading—Charlsie Hamlett.

A Brief History of Six Missionaries Among Our Men in Foreign Fields—Mrs. A. J. Cody.

Current Events—Mrs. Monroe.

Jarvis Christian Institute for Negroes—Mrs. Armstrong.

Many prayerful thoughts through year from members, brought forth many useful and helpful thoughts which if carried out will be a wonderful help to the church in many ways.

The following splendid paper was read by our president: I'm dreaming of a wondrous church in the days of the future to be—That ten years of praying and living Ten years of working and giving, Would build for you and me.

I'm dreaming of a prosperous city, for Snyder is destined to be a city fair, and in the most prominent location stands a modern building, the structure one of beauty. Its well kept surroundings tell of a love of the people for their church. There are wide entrances and the inscription, "The First Christian Church," speaks welcome to the world. The auditorium filled with the most comfortable of seats, the big rostrum for the choir, the pastor's stand, the pipe organ, all so nicely arranged as to invite peace and such a restfulness that inspires reverence. Oh, I'm dreaming of a wondrous day when from the numerous Sunday School rooms our boys and girls come flocking to hear the pastor present the plea for which we as a people stand, the Christ. I'm dreaming of the new faces that shall be among us. Faces that we shall learn to love; the scores and scores of new people who shall make their church home with us; the many, many talents they bring to help build up this glorious church; the inspiration of members; the new enthusiasm that shall be contagious; to set us all working, praying, living, giving as never before. I'm dreaming of such consecration among our people, such love for Christ that malice, envy, covetousness, bitterness, may be wiped from our hearts; that we may be able to place Christ and the church

FIFTH SUNDAY MEETING

Fifth Sunday Meeting of the North Colorado Association, to be held with Moore's Creek Church, ten miles west of Snyder, on Friday night.

Friday night, Sermon—L. H. Been.

Saturday, 9:00 A. M., Devotional—Nick Norrel.

9:30 A. M., A Report from All the Churches.

10:00, A Soul-Winning Campaign—Brothers Clardy and Kimble.

11:00, Sermon by Elder Watson.

1:00 P. M., Acts 2:38—Elder Leslie and Others.

2:00 P. M., Shall We Co-Operate With the Missionary Association of the U. S. A. in Foreign Missions?—J. W. McGaha and L. J. Crawford.

Saturday night 7:30, What Is Protestantism and When Did It Begin?

Sunday 10:00 A. M., Talks On Sunday School—Bro. Clardy and Eld. Griffen and Wade.

11:00 A. M., Sermon to be supplied.

3:00 P. M., Our Young People—Nick Norrel.

—Committee.

Lorraine Cotton, student of A. C. C., spent the week-end here visiting with his parents, Mr. and Mrs. Taylor Cotton. Lorraine is in the graduating class this year and returned to be present at the exercises which will be held this week.

first in our lives. Such a love would in ten years bring a wonderful change in the upbuilding of our cause.

Oh, I'm dreaming of a wonderful church in the future for me and you. And ten years of praying and living, Ten years of loving and giving, Would make that dream come true.

Dismissed—Mrs. Ben F. Smith.

PLEASANT HILL

I will write a bit of news for the paper as I never see anything in it from here.

The health of our community is pretty good now.

Our school closes June 5th.

The farmers were sure rushing things last week, trying to get their cotton planted and some had to plant their feed over on account of the hailstorm we had.

You can't tell me it don't hail or rain in West Texas, for it does some times, and then it can get awfully dry. We had a fine rain yesterday evening and last night. It will be fine on feed that is up and also the cotton and feed that has been plant-

ed. Every one seems to be in good spirits about a good crop this year.

Mr. and Mrs. W. M. Stiner and children of Childress visited their parents, Mr. and Mrs. T. W. Derden, last week. Mr. Stiner was in Snyder and he was very much pleased with the city. Said the people were the friendliest he ever met and it was a pretty town.

If this escapes the waste basket will try and write again.

—Spring Flower.

DELIVERS BACCALAUREATE SERMON

Rev. Whaley and wife of Memphis returned to their home Monday. Rev. Whaley delivered the baccalaureate sermon Sunday night at the Methodist church, which was highly appreciated by those brave enough to face the rain to get to the church. The attendance was much smaller than it would have been on account of the unfavorable weather.

FLY-TOX

Killed them!

Fleas, Moths, Roaches, Etc.

—So quickly if sprayed with FLY-TOX. Easy to use. Has pleasant odor. Will not stain. Harmless to humans and animals. Keep your home free from insects.

The Grasshoppers Are Here

By R. R. Reppert, Entomologist.
We much expected them. Now they are here. Reports of their presence and in some cases actual damage have been flooding our mail for the past week. Last week the Entomologist began a tour of inspection of the western counties. In the Brownwood section, the hoppers are more numerous at this time than last year, and are still hatching. The farmers of Brown and Mills counties have prepared for a fight and other counties will be lined up this week.

By the end of this week, we expect damage from the insects to begin to be serious. All counties in the infested section should prepare at once for a fight. If a fight is begun at once and continued with persistence as long as damage impends, there is no reason why a single acre of crops should be lost in the entire state. It is up to the farmers of each county. Considering fields are large and small, the crops should be saved at a cost of less than 50 cents per acre.

Counties having an agricultural agent will be in best position to make a successful fight. Counties having no agent, should inaugurate a campaign at once by calling in representative farmers from each section to a central meeting. A general meeting is not necessary. Instruct these representatives fully in preparing and distributing the mash. Determine where the materials can be obtained. Outline a plan for financing a campaign so as to enable every person to save his crops. Let each representative in the meeting then return to his community to direct the campaign among his neighbors. Having been instructed himself at the county meeting he should personally direct the mixing of the mash in his own community.

No time should be lost. Act at once. The entomological forces will give such aid and advice as is physically possible, but are not sufficient to cover the entire state in the short time before heavy damage results.

The following formula will control the grasshoppers if mixed and applied exactly as directed: (Cut out and save this for reference when needed.)

- Wheat bran, 25 pounds.
- Lemons or oranges, 6 fruits.
- Water, 2 gallons.
- White arsenic or Paris green, 1 pound.
- Low grade cane or sorghum molasses, 2 quarts.

Mix the bran and poison thoroughly while dry. Dilute the molasses with the amount of water as named. Squeeze the lemon juice into this diluted molasses, then grind the rind of the lemons with a meat chopper and add this also to the liquid. Now mix the liquid thoroughly with the poison bran mixture. After an even mixture has been obtained, add more water and mix, until a mash is obtained so that after being squeezed in the hand, it readily falls apart.

Grasshoppers feed in the morning, and as the bait loses its attractiveness when dry, it should be applied so as to be as moist as possible at this time. It will therefore be best to put it out about sunrise. Provided the ground is not so hot and dry as to remove the moisture during the night, it may be put out late in the evening in case the area to be treated is too extensive to be quickly covered in early morning. The mixture should be scattered, as if sowing seed, by hand, or any type of seeder capable of distributing it. The amount given in the formula should cover about five acres.

Where the hoppers have become distributed over the cultivated field, the entire area should be sown, and the application repeated in a few days if necessary. If the hoppers are found to be advancing from pasture lands, distribute the mash in front of their line of march for a distance of a couple of hundred yards, keeping also the margin of the pasture land

F. J. Cheney & Co., Toledo, O.

THE POLITICAL SITUATION

DALLAS, May 21.—Students of the political situation in Texas with reference to the governor's race are expecting within the next week to have new grounds for basing their prognostications.

Several new twists have been injected in the past week. From the Robertson forces has come a denial of the report that Felix's name would be placed for endorsement before the Waco meeting.

Prediction has been made from Ft. Worth that the Tarrant County Klan would support Adjutant General Barton, and with the delay imposed

treated daily until the danger of damage has passed.

A Substitute for the Formula Above.
Experiments in Montana have shown that amyl acetate, substitute for lemon, has increased the effectiveness of the poison bait. The most effective formula there appeared to be as follows:

- Wheat bran, 25 pounds.
- White arsenic or Paris green, 1 pound.
- Amyl acetate, 1 ounce.
- Water, 10 quarts.
- Salt, 1 pound.
- Low grade cane or sorghum molasses, 2 quarts.

Apply in the same way as the other formula.

Amyl acetate as a substitute for the fruit has been tested in Texas by the Federal entomologists, and while the results were successful, we hardly think the work has been sufficiently extensive as to justify us in giving this latter formula our unqualified endorsement. We suggest that farmers stick to the first formula, and experiment on a small scale with this latter formula. Amyl acetate has the advantage of being much cheaper. Use only high grades of amyl acetate denoted as "C. P.," "U. S. P.," or "technical," and avoid compounds presented as "banana oil," "bronzing liquids," or "amyl acetate derivatives," which contain so little of the active material and so many impurities as to make them unadapted to grasshopper work.

by Ferguson as to what his next step will be with reference to placing his name on the ticket; meat a plenty is furnished for argument.

Lynch Davidson is sawing wood with his reforestation plan claiming that he had "left a great constructive measure for the state in status quo, knowing that his opponents, placing political ambition before general benefits for the state, would sooner or later take the bait." He challenges them to offer a better solution to save Texas' disappearing forests.

Joe Burkett's name has been placed on the ticket and he has been calling for fair play on long-time rural credits, soldiers compensation and the abolition of useless offices.

Pope has continued his attack against the adoption of the next text books. Collins has turned his Ku Klux venom into denouncing the sending of rangers to counties when not asked by county authorities and to explaining why taxes cannot be cut. T. W. Davidson's fire still is leveled at Lynch, his late declarations being to the effect that if the latter saves the state \$10,000,000.00 biennially, except at the expense of the educational institutions, it cannot be done, which Lynch in turn denies.

The other horse in the gubernatorial

SCURRY COUNTY WELL MAKING HIGH GRADE OIL

Wellborn No. 1, drilled by Col. Albert E. Humphreys about sixteen miles southwest of Snyder, is a producer of very high-grade light green oil in fifty feet of formation encountered at 3,380 feet. Experienced oil men claim this oil and the Moran production are very similar. The

oil horizon lies between 3,380 and 3,340 feet, but with a view of possibly picking up another sand at a lower depth a water formation was penetrated which has now been plugged off. The well is now gauging with oil rapidly rising in the hole. A three-inch pipe line is being laid to

storage tanks hastily erected, and officials of the company who are here from Denver feel confident from the amount of gas and quality of oil that an entirely new pool has been opened with the possibility of the best production so far encountered in West Texas.

torial race—H. L. Darwin—still remains stabled, presumably being groomed to take after all of the other eight.

With this the eve of the State Democratic Convention; experts, would-be critics, and chroniclers are awaiting that event to see which track the ponies take. What wagers, known to have been made to date, have been on the Houston candidate against the field.

Old Folks' Ailments

"I began taking Black-Draught over fifty years ago and my experience with it stretches over a good long time," says Mr. Joe A. Blake, a Civil War veteran and former Virginian, who is now a prominent citizen of Floyd, Texas. "It is the best laxative I know of for old people. . . A good many years ago, in Virginia, I used to get bilious and I found that

Thedford's BLACK-DRAUGHT

was the best and quickest relief I could get. Since I came to Texas I have these bilious attacks every now and then—a man will get bilious anywhere, you know—and I find that a little Black-Draught soon straightens me out. After a few doses, in little or no time I'm all right again." Thedford's Black-Draught is a purely vegetable liver medicine, used in America for over eighty years. It acts on the stomach, liver and bowels in a gentle, natural way, assisting digestion and relieving constipation. Sold everywhere. E-102

Superior DAIRY RATION

Increased production at least cost is the one big thought uppermost in the minds of all cow owners, and Superior Dairy Ration has the following fourfold superiority:

- 1st. Increased milk production.
- 2nd. Longer lactation period.
- 3rd. Stronger calves and healthy cows.
- 4th. Convenience and dependability.

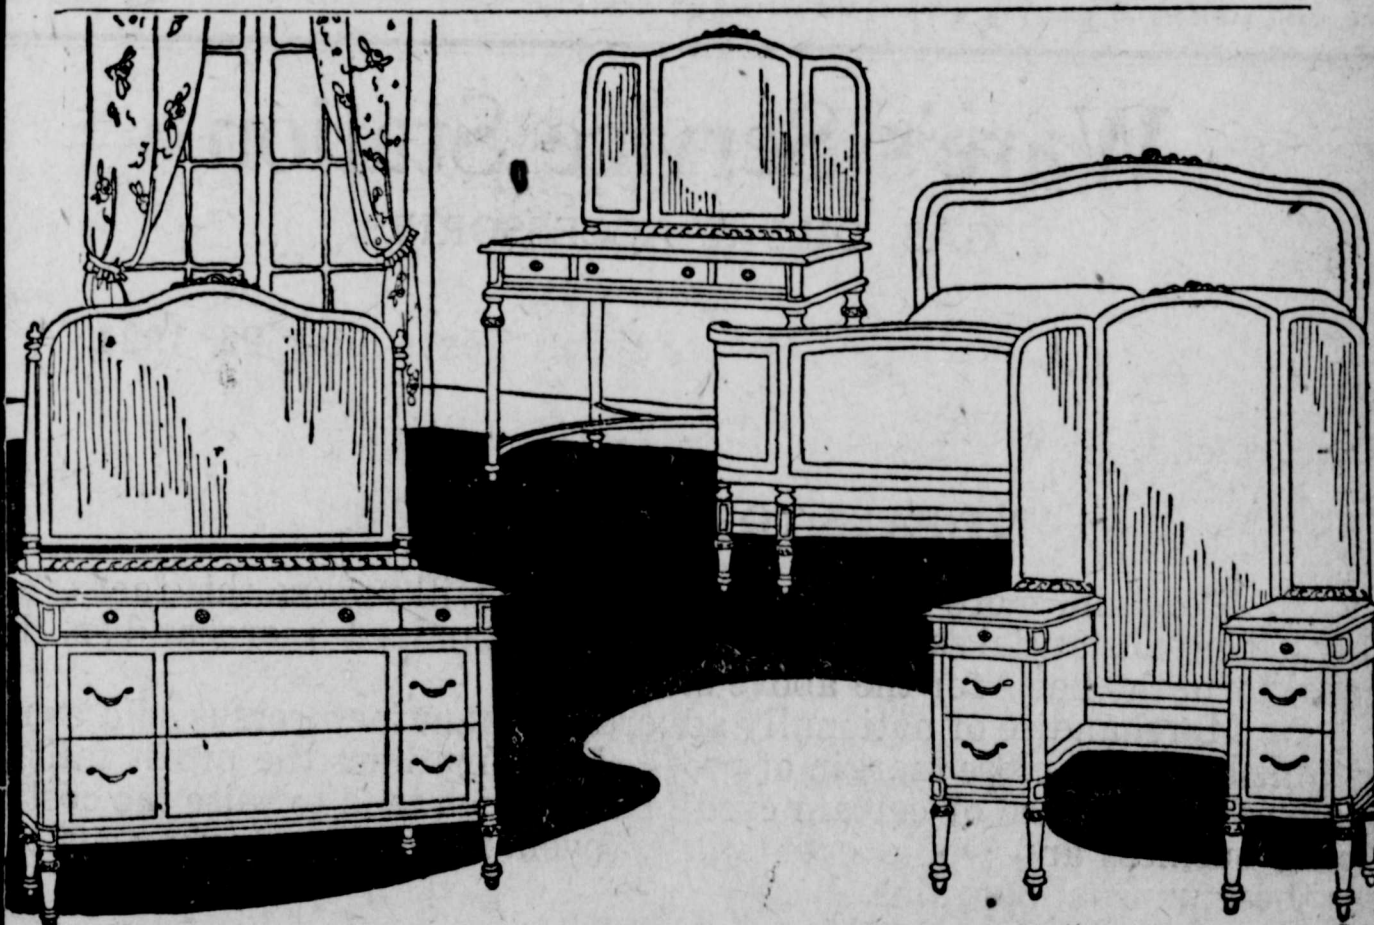

There is a great deal more to a dairy feed than the essential analysis. Superior Dairy Ration is not only accurately balanced, but also contains the very essential vitamins and mineral matter necessary for a long and maximum milk production and the development of strong, vigorous calves and healthy cows. It is made from selected, inspected and analyzed high grade milk-producing feed elements that are proven before mixing. It is honest, dependable and absolutely uniform in its perfect ratio; although it may vary slightly in color, due to its protein base (Corn Gluten Feed) being a product that varies from a brown to a light yellow, but by having this feed analyzed we are able to maintain at all times the standard set for this remarkable milk producer.

In order to mix a ration properly one must know a great many things that can only be learned by practical experience. Some of these are the physical condition and palatability of feeds and the chemical elements that go to make milk, bone and flesh in scientifically accurate proportion. Experienced breeders are almost unanimous in their convictions that to get maximum production one must follow very closely a certain standard which is embodied in SUPERIOR DAIRY RATION.

Superior Dairy Ration is composed of the following: Corn Gluten Feed, Old Process Linsed Oil Meal, Prime Cotton Seed Meal, Finely Ground Maize Heads, Wheat Bran, 8 1-5 per cent Alfalfa Meal, Cane Molasses and 1 per cent Salt.

The Last Week of School

(Continued from page four)

CLASS POEM

Four long years we have been climbing
Up the steep incline of life;
We've been looking to the future,
When our "dips" might end the strife.

Yet we pause to look behind us,
And to leave dear memories
Of a life which then so dreary,
Now would so much dearer be.

You, teacher, stirred the deep ambi-
tions;
You have made us what we are;
It was you who gave us courage,
You who called us from afar.

We've sailed the roughest sort of
weather,
We've floated on the balmy days;
We've heard ambition's lofty call,
Yet wandered off in error's ways.

Yet now we find us farther on
And one more goal we'll have to pay
And our next victory we shall score
Will come on our commencement day.

Off in dismal far off places
We may often think and wish
We might from the world play
hooky,
And again for knowledge fish.

Yet we cannot, dare not linger
On such memories as these,
To our heart an "Eldorado"
You will always ever be.

INEZ SUTHERLAND.

CLASS WILL

The last Will and Testament of the Senior Class of '24.

That we, the Senior Class of the Snyder High School, in the County of Scurry, State of Texas, being in good health, of a sound and disposing mind and memory, do make and publish this our last will and testament hereby revoking all former wills by us at any time heretofore made.

After the payment of our electric bill debt and graduation expense it is our will that our property, real and personal, and mixed shall be disposed of as follows:

1. To Mr. Bagwell we leave a list of demerits for the coming Low Freshman Class.

2. To Mr. Sentell we leave this lemon as a token of our love and affection.

3. To Mr. Falls we leave this ball of yarn to see that next year the football boys get sweaters.

4. To the Juniors we leave this key of knowledge in order that our places may be filled as well as it is possible for you to do so.

5. To the Sophomores we leave our good manners so that you will

know how to respect the Seniors of '25.

6. To the Freshmen we leave these kindergarten beads to amuse themselves.

7. To W. H. McMullan we leave this powder puff and comb so that he may better increase his beauty to be a Senior.

8. To Mr. Carr we leave this horn to entertain his General Science classes.

9. To Etta Mae Ware we leave this box of dates to make sure that she will always have a date in her senior year.

10. To Miss Runkles, with our most sincere wishes, we present this loving cup to make sure that the Juniors receive one while in high school.

In testimony whereof, we hereunto set our hands and seal and publish this to be our last will and testament in the presence of the witnesses named below, this the 22nd day of May, 1924.

Pat Jenkins, Pres.
Willie Fern Curry, Vice-Pres.
Ward Golden, Secretary.
Noel Banks, Treasurer.

HAPPENINGS AT FLUVANNA

The people around Fluvanna have been splendidly entertained the past week, as the school put on a three nights' program. On Thursday night the music teacher and the art teacher gave their program, and the pupils displayed much skill with their pencils, songs, and musical ability. It was indeed interesting throughout.

Friday night was graduation exercises, and the curtain went up to a full house. Never in the history of this school has a more important class passed from its doors, and no one realized it any more than they who faced the audience. They showed it in every word and action until he crowd was convinced that they might say with Caesar, "Veni, vidi, vici!" For indeed had they conquered all they saw. A moment after the curtain was raised, Clifford Haynes, as salutatorian, addressed the crowd in such commanding tones that they settled down in their seats and regretted to hear the end, for he had made them feel doubly welcome.

Pearl Forrester then gave a piano solo which was followed by the class prophecy given by Lela Hunnicutt, and brought forth many applauses.

The class history was read by Pearl Forrester, and it was startling how many great and noble things the class of 1924 had done during their sojourn in the Fluvanna high school.

Now I do not insinuate that the class has not done all that they claim, for they have done that and probably more—but, well it did seem like an awful lot for just four people to do in three years. But all this was forgotten on the commencement song that almost brought the roof down, and the valedictory given by Vera

PETIT JURY LIST FOR SECOND WEEK

List of persons drawn by the jury commissioners District Court of Scurry county, Texas, at the May term of court to serve as petit jurors during the second week of the term of said court:

Joe Caton, H. P. Winters, W. R. McFarland, C. F. Landrum, D. S. Leverett, W. C. Wood, Joe Adams, Lee Stinson, Neil Gross, L. L. Eubanks, R. B. Caldwell, J. A. Howell, Giles Bowers, W. A. Morton, T. J. Weaver, W. E. Doak, J. A. Howell, J. O. Guinn, A. N. Epps, J. O. Leach, J. N. Merket, W. C. Davidson, W. J. Beaver, Joe Eicke, S. T. Minor, S. D. Hays, J. A. Dunn, M. A. Adams, W. A. Bowen, J. M. Hunnicutt, J. B. Adams, J. P. Avery, W. E. Clarkson, A. P. Smith, J. A. Shoemaker, and J. N. Watson.

DIED

Ray, the little three-year-old son of Mr. and Mrs. Booth died at the home of his grandparents, Mr. and Mrs. J. L. Pate, Sunday night. Funeral services were conducted at the cemetery Monday morning by Brother Jameson. The little fellow had been seriously ill for some time, and all that loving parents and willing hands could do was done. Our Lord needs these bright little jewels and He was called to take his place among the angel band. Father, mother, he is waiting and beckoning for you.

The Times joins the many friends in their sympathy in the loss of this darling loved one from their home.

MISSIONARY SOCIETY

The Young Woman's Missionary Auxiliary met Monday, May 26.

Prayer—Mrs. Towle.
Business.
Scripture Reading—Mrs. Darby.
Lesson on Japan.
Leader—Mrs. Hamlett.
Closing Prayer.

Next meeting will be postponed on account of Chautauqua. Will meet June 9 with Mrs. Randals.

Stavely in which the ideals of the class were given in a most convincing manner.

Then the purple and gold streamers parted and little Miss Frances Maples passed the pink carnations.

The diplomas were given by Mae Frances Beaver with a pretty presentation speech. Indeed had the class gained their reward.

On Sunday following Rev. E. Christian preached the baccalaureate sermon which was indeed beautiful. After the sermon the class, in company with Mr. Maples, visited the home of Rev. Jas. H. Tate and presented to him some bouquets.

Here the class separated to go each a separate way, out into the world, to do, they know not what.

On Saturday night the high school played, "Home Ties" to an overcrowded house. So now you will agree that there has been doings at Fluvanna.

—A Witness.

Ware's Service Station

GAS, OILS & ACCESSORIES

Snyder, Texas, May 26, 1924.

Dear Friend:

"IT PAYS TO PAY AT WARE'S"

More and more of the motoring public will realize this fact every day. The substantial savings that I offer on standard merchandise, for cash, form the basis for the above statement.

Merchandise of nationally advertised manufacturers is sold at my establishment on close margin of profit, but sometimes the profit fails to materialize because of certain credit sales which tend to raise the cost of doing business and would eventually prevent me from giving my customers these unusual bargains.

Rather than raise the price of my goods because of credit business, I have chosen another method that will not only keep my prices low but will, in addition, give an added discount to my customers.

Starting June 1st, 1924, I will conduct my business on a strictly cash basis and convert the losses of credit business into savings for my trade.

Space will not permit a detailed list of new prices but the following will give you an idea of the remarkable opportunity I offer the motorists of Scurry County:

Supreme Motor Oil—60c per gallon, by the gallon.

Any standard casing or tube in the house at a discount of 5 per cent—and they are way below list right now.

Yes Sir—"It Pays To Pay at Ware's"—but don't take my word for it—come in and be convinced.

One visit and you'll add your voice to the many other satisfied car owners in saying, "It Pays To Pay At Ware's."

Sincerely yours,

C. L. WARE.
