

SCURRYLY SPEAKING

All wealth comes from dollars in motion. The only way to get dollars in motion is by advertising. People of today are the same people who were enthusiastic customers two years ago. We got them to buy with advertising when money was plentiful. Do you expect them to buy without advertising when money is scarce?—Ernest Elmo Calkins.

BY JAKE.

READ that quotation again please. It was written by one of this country's outstanding economic and advertising experts.

Did you ever notice that the bigger the business, the bigger the advertising—in proportion? Before plunging into this discussion of advertising, I want to admit that this is partially a selfish column. The Scurry County Times lives on advertising. And I, in turn, live or die according to the revenue of The Times.

But facing advertising as squarely as we face summer and winter gas bills and coal bills, church dues and lodge dues, advertising is something that we can't get away from. Advertising, of course, takes several forms. We shall take newspaper advertising chiefly, however, because newspapers receive the largest single advertising budget in the country and because Scurry County people are most interested in newspaper advertising.

Beginning at home, may we ask you to name, in your mind, the two leading dealers of each line of merchandise in Snyder? Whether you name dealers on the square or off the square, I'll bet my last and only dollar that the merchants you name will be the ones who advertise most in The Times.

"There's a reason." Just so, you know at once, while the campaign originated. Grape Nuts advertising did it.

REACHING out into national fields, we find that there are reasons why advertised products are products whose manufacturers are not griping about the depression.

Who doesn't know that "The Hidden Quart" contest has been advertised throughout the United States—including The Times—and that the budget appropriated by Conoco for this contest is the largest in the history of oil companies?

The makers of Prince Albert smoking tobacco, who are also makers of ready-roll cigarettes, put on an extensive campaign through Texas newspapers when the Legislature tackled a three-cent tax on tailor-made. If they had followed the line of least resistance, they would have put up a heavy howl instead.

Now that the tax is operative, ready-roll makers are putting on a campaign that brings out the convenience, the added quality, the time-saving of the ready-roll package cigarettes. As a result, many Texas smokers who vowed they would never put another nuisance-taxed weed in their mouths are switching back to the package.

As much as we are most practices of mail order houses, most admit that they have spent more money for catalogs and for newspaper advertising this year than ever before. It is said that several freight cars were necessary to carry all the catalogs shipped to mail order houses in Fort Worth recently.

What shaving cream do you buy at the drug store? Williams', Rexall, or Ingram's will venture. It pays to advertise. What cigar? William Penn, Grand or Chancellor. It pays to advertise.

WHAT farm implements do you buy? McCormick-Deering or John Deere, no doubt. It pays to advertise.

Do you ever hear of Crisco, Snowdrift, Wesson Oil, Gold Bar, Sunkist, Armour's, Arm and Hammer, K. C. C. Cinnamon, Sinclair or T. P.? Or do you burn the air with Goodyear, United States, Goodrich, Firestone or Lee? Of course you ride in a Ford, a Chevrolet, an Oldsmobile, or a Pontiac.

Do you wear good trousers, Holespro, Stetson hats, Wilson shirts, Haynes underwear, or Floss-shirt shoes?

But why carry on with the list? No one can doubt that these products, and hundreds of others, have been sold throughout the United States through advertising.

The marvel of advertising is that it is selling goods for wide-awake manufacturers, merchants and jobbers through hard times as well as through good times. Indeed, Wrigley and Ford, American Tobacco Company and Continental Oil Company, to mention only four, are increasing their advertising budgets, rather than decreasing them. They are not gambling. They KNOW that good times are ahead. They know that many people have money, and will spend for something that is advertised from day to day, and from week to week.

THE TIMES is not pleading its own cause primarily this week. We are leaving it to our readers to judge for themselves the value of advertising. We believe merchants, housewives, farmers, ranchers, professional men, laborers and "just traders" can profit by using anything from a double-page "spread" down to a 25-cent classified, just as the manufacturer with a million-dollar advertising budget can profit.

Do you see, folks, you need to sell or trade or rent or buy something, and we know it. Directly or indirectly, you are saving a lot of money month in and month out because of advertising. Why not give it a chance to work personally for you?

FORTY-FOURTH YEAR.

SNYDER, TEXAS, THURSDAY MORNING, OCTOBER 29, 1931.

NUMBER 20

CANNING WEEK OPENS MONDAY AT C. C. HALL

Dunn Donates—Other Communities Expected to Fall in Line to Help Needed of County.

Preparations are being made to start the big Halloween carnival to be given by the Parent-Teacher Association at the city tabernacle beginning at 6:00 o'clock. Many entertaining program numbers are being planned for the occasion, as well as many mysterious booths which will afford lots of fun. Among the booths are included: "Blueboard," "Missing Link," "The Fastest Runner," "The Bridal Path," "The Swimming Match," "Men Only," "Negro Doll," fishing and fortune telling.

Hamburgers, chili, cake, pie, coffee, soda pop, candy and popcorn will be sold, no one thing to cost over five cents.

Mrs. Nelson Dunn, president, says that prizes will be awarded to those wearing the most unique costumes from the primary, grammar and the high school grades.

Mrs. Dunn also announces that a meeting of the P-T. A. will be held on Thursday evening, November 5, at the school auditorium, beginning at 7:30 o'clock and urges that all parents and teachers attend.

O. O. Gain in Erath County is reclaiming a 20-acre field full of huge gullies by terracing, planting sweet clover, and letting nature do the rest.

Winston Brothers are donating their slaughter pen for use of those who wish to kill their animals in town, and have offered their services when needed. Knives, tube, pins, hooks and other equipment also being furnished without cost.

The Community Natural Gas Company is to furnish all gas, and electricity will be donated by the Texas Electric Service Company.

Those who have cookers are asked to bring them to the Chamber of Commerce hall as soon as possible. A number of women who have had canning experience, and several men who will help at least one day each, will be needed to complete the necessary force.

Each major community in the county will have a special day for cooperation with the canning program. See last week's Times for this information. Every day is "open house" day, however, and those who can help in any way are given this final urge to see Mr. Scott at once.

Many Go to Singing Convention Sunday; Pleasant Hill Host

An overflowing crowd attended the county singing convention at Pleasant Hill all day Sunday. In addition to singers from Scurry County communities, a number were present from adjoining counties. The Hamlin quartet featured the program.

Singing began at 10:00 o'clock in the morning. Lunch was served on the grounds, and singing began immediately thereafter for its afternoon session.

Union, five miles west of Snyder, will be host to the singers when they convene at their next meeting, the fourth Sunday in April, 1932.

Congressman Visits In Snyder Thursday

Congressman Marvin Jones of Amarillo was a brief visitor in Snyder Thursday. He came from Haskell with Sam A. Roberts, who was a week-end business visitor.

The two were detained by the mud between Inadale and Hermleigh, and the congressman missed the train he was intending to catch from Snyder to Lubbock. It is said that he obtained a "lift", however, and arrived in Lubbock in time to address the state gathering of the Daughters of the Confederacy.

Hundreds of Bales Moving Out of Rain Soaked County Cotton Fields

Farmers are making up for lost time in county cotton fields this week. Two weeks of almost continuously rain weather made picking or pulling impossible in most communities, and less than 2,000 bales were ginned during that period.

During four days this week, however, it is believed that the county ginning total has risen to at least 14,000 bales, although no definite report has been obtained.

Most farmers say the rain did not damage their crop as much as expected, and optimistic prophets continue to estimate that the Scurry crop will reach 20,000 bales.

Practically all the crop will be in by November 15, despite the fact that few outside pickers are helping home forces. Past time is being made in most patches because pulling, rather than picking, is the almost unanimous order of the day.

Winter grain, gardens and late crops of all descriptions, as well as pastures, have given the county a spring-like appearance this week. They have also increased the num-

WOMEN NAMED FOR ROLL CALL

Twelve Snyder women have been named to act as Red Cross Roll Call chairmen in their respective clubs, announces Mrs. R. D. English, county sub-chairman. Mrs. J. C. Hicks, Alpha Study Club; Miss Mattie Ross Cunningham, Art Guild; Mrs. Max Brownfield, Business and Professional Women's Club; Mrs. Lee Stinson, El Fels; Mrs. Frits R. Smith, Musical Coterie; Mrs. Herbert Banister, Altrurian Daughters; Mrs. R. H. Curruite, Sine Cura; Mrs. J. Brice, Tuesday Afternoon Bridge Club; Mrs. James Ralph Hicks, San Souci Club; Mrs. E. E. Gray, Women's Culture Club.

Plans were started this week by Snyder faculty members to present a play November 20 for the benefit of underfed students attending local schools. An extensive advertising program is planned, and an overflow house is expected.

The play will be a musical drama, with Homer Springfield and Miss Vernelle Stinson directing. Every member of the high school and grammar school faculties are cooperating to make the program a dramatic and entertainment as well as a financial success.

Signpainter Harvey Donates Flourishes

Merchants who have made use of Harvey's Hot Signs during the past 10 days have not been surprised to learn that the young artist is donating flourishes, curly-ques and other extras. What's more, A. E. is throwing in an unusual mixture of grins for good measure.

The reason, investigation has revealed, was delivered by the story last week in the person of Mr. John Billy Harvey, weight 10 pounds. Mother and son, as well as father, are said to be faring fine.

Uncle Billy Nelson, county tax collector, stayed at home early this week with "flu" symptoms, and had not come to town Wednesday afternoon when a Times reporter got on his trail. His close friends believe he will get on his feet again when he finds out for sure that the rains have stopped.

Dr. J. E. Dodson is Visiting in Snyder

Dr. J. E. Dodson of South Pasadena, California, has been having plenty of fun visiting with his old Scurry County friends during the past week or two. He is here on a combination business trip and to visit with his brothers, A. D. and E. C. Dodson.

Dr. Dodson, who was for many years a resident of Snyder, but who has been in California for some years, missed his annual visit to Snyder during 1927, 1928, 1929 and 1930.

FEDERAL LOAN COTTON JUMPS TO EIGHT CENTS

Local bankers declare that every farmer who can possibly get along without all the cash from his crop is holding his cotton for a higher figure, and that many who borrowed for feed or seeds are taking advantage of this two-cent extra allowance.

It is estimated that at least 2,500 bales will be held in the county and some authorities think that amount will be increased as the last of the year's crop comes in.

If Scurry County were raising a normal crop this year, rather than slightly more than half a crop, thousands of bales would probably be held for the higher prices.

Three Attend State Session at El Paso

County Judge John E. Sentell, with Commissioners John C. Day and Lee Grant are in El Paso this week-end attending the annual session of the state judges' and commissioners' organization. The judge was accompanied by Mrs. Sentell.

No outline of the El Paso program is available. The group plans to return Sunday.

New Taxes Being Paid Rapidly By Scurry Citizens

State and county taxes for 1931 are being paid rapidly, said S. T. Elza, deputy collector, yesterday. To prove it, he fingered a hook-load of receipts. Mr. Elza declared that many folks learned their lesson about delayed tax payments last year, and he thinks new tax money will continue to roll in before November 30.

Under the new tax paying schedule, one-half the taxes for 1931 are due November 30 or before. If one-half is paid by that date, balance may be paid on or before June, 1932, without penalty. Otherwise, all becomes due January 31, as in previous years.

Mr. Elza reports that the county's percentage of tax collections for 1930 was increased several points before October 15, after which a penalty, plus interest, took effect.

SNYDER AGAIN FACES SLATON

The Snyder Tigers will journey Friday to Slaton, where they will engage the Tigers of that town in mortal combat for the second time this season. Early in the football year the locals trimmed the plainsmen 7-0 when Howell stroked 55 yards for a touchdown. It was a nip and tuck affair, and Friday will probably bring a repeater.

The question with Scurry fans seems to be: Will the four Class A games Coach Moore has scheduled this year make or break his squad? A division this season, and is the only upper division team from whom both the locals have won. The best Slaton could get with Lamesa, Class B favorites of the lower plains region, was a tie, so it looks like the Slaton boys have improved in recent weeks.

Despite the hard schedule through which the Bengals have ploughed in the past month, they are in good physical condition, and will probably meet the Slatonites hitting on eleven. McClinton, who won a broken nose in the Abilene game three weeks ago, will soon be able to get into the line-up without a nose guard.

While no heavy Snyder congregation will be in Slaton Friday afternoon when the opening whistle blows, several carloads of faithful fans will probably wend their way plains-ward.

Eight Children Survive

Of the 14 children in the family, five sons and three daughters survive. They are: J. T. B. L. and A. B. Baze of Snyder, W. E. of Denver, Colorado, and John R. of Colorado City; Mrs. J. L. Suits of Lubbock; Mrs. John Johnston and Mrs. Howard Brown of Snyder. All were present at the funeral with the exception of W. E. Baze. Two brothers, M. P. Baze of San Marcos and Frank Baze of Deming, New Mexico, also survive.

Adult Health Class Organized at Union

An adult health class for Turner, Bethel and Crowder women was organized Monday at the Union Chapel Methodist Church, which will be the regular meeting place. Mrs. H. B. Patterson presided. Mrs. Della McPherson was made secretary of the club.

UNCLE TOM AT LAST ANSWERS CALL OF DEATH

Final Battle Typical of Courageous Life—W. T. Baze Pioneer, Dies Sunday.

The same courage that carried W. T. Baze through more than 78 years of life in this new West Texas was with him Sunday morning, when "Uncle Tom" passed into the land that knows no pioneering.

This man, who reared a family of 14 children in the glorious West, had been ill since February, and for several weeks it seemed that death was only a few hours away. But he clung to life as bravely as he had tackled the Indian-infested wilderness as a youth, and his last fight proved to be his best. Friends and relatives knew, when he returned from a Lubbock sanitarium some weeks ago, that he could not live, but none knew that he would remain for so long.

Funeral Rites Monday

Funeral rites were conducted at the Snyder cemetery Monday afternoon, with Rev. Thomas M. Broadfoot, pastor of the First Christian Church, officiating. Interment was here also, with the Odom Funeral Home in charge.

Uncle Tom and his wife, who survives, were charter members of the Christian Church here, and had been active in the denomination for 22 years. Mr. Baze also was active in the business life of Snyder, where he served Scurry County in various capacities for 35 years.

The pioneer was born July 24, 1853, in Missouri. His parents emigrated to Texas when he was six weeks old, settling at Lampasas, where he lived until he was 18 years old. He then went to old Fort Concho, near where the city of San Angelo now stands. On October 15, 1878, he was married to Miss May Ellis. The family lived in and near San Angelo, except for a brief period spent in Big Spring and New Mexico until 1896, when they moved to Snyder.

IT'S PLANTING TIME NOW FOR BULB FLOWERS

The highest development of the race of tulips is the Darwin class, its origin shrouded in mystery and the latest of the tulip classes to be brought into commerce. Its introduction being within the memory of the present generation. It has the tallest and largest flowers of all the tulips and a range of colors of great brilliancy but all softened with a bloom like the bloom of the grape upon them. The color ranges from through the reds to almost a black, the pinks from almost white to brilliant roses, the purples from light lavender and lilac to black purple and recently dazzling new pure whites which were the last of the Darwin series to be developed, the closest to whites previously having been pale tints. The Darwin tulip is admirable for any style of planting of a single bulb to a bed of a thousand. For color schemes in blocks of from 50 to several hundred it gives a marvelous variety of color from which to design. One of its most artistic uses is to scatter

Darwins over the border in groups of from three to a dozen. Owing to its soft coloring, the Darwin is the one tulip that lends itself admirably to planting in mixed colors. There are no color discords. It is also one of the longest lived of all the tulips. There are now hundreds of named varieties and each year sees some new variety introduced. The old standard sorts are as fine as any, the newcomers being distinguished by adding to the color range. One need only select the colors he prefers and go over the list and select the names.

There are no poor named Darwin tulips for cutting, they stand uniformly high as to class, the finest being not greatly better than those of lesser beauty. The Darwins need deeper planting than the early classes for their best success. Six inches deep in soil of good till, measuring from the shoulder of the bulb, is the right depth. In time, left to their own devices they will burrow as deep as eighteen inches or more and furnish very fine flowers. There is no danger in too deep planting. They should be planted not closer than six inches and eight inches is about the right distance in a large block, displaying the individual beauty of the flower and at the same time giving the desired mass effect. They are the finest of all tulips for cutting, their long stems ranging from two feet to 30 inches, being strong and at the same time graceful, swaying with every breeze. They are at their best when shaded from the afternoon sun and are much more durable under these conditions than when in the full sun.

In choosing a kitchen cabinet, see that it is so well made that insects and mice can not get into it; that it is made of material easy to clean; and that the drawers and compartments are suitable in size and shape for the articles to be stored in them.

When making gravy to serve with roast lamb, beat in one-half glass of more of currant jelly and add just before serving.

Hyacinths in the house should not be potted and set away in a dark closet or basement. Have the soil moist but not wet. Hyacinths can be grown excellently in water in specially designed glasses on sale at all dealers. It is an easy method.

The Times Creed.
For the cause that needs assistance:
For the wrongs that need resistance:
For the future in the distance,
And the good that we can do.

THE WEEKLY DOZEN
A New Style Wrinkle.
Pessimism Pete opines that the girls will soon be wearing Princess Eugenie dresses, if you know what he means.
Two Observations.
The man who observed that tending the baby is just one damp thing after another is also of the opinion that a change in time saves cryin'.
From Our Biggest Wastebasket.
'The time has come,' the printer sighed, 'to talk of many things—Of leads and slugs and ems and ens, and what the morrow brings.'
Just then the 'devil' pried a line of this poetic stuff. The printer yelled with childish glee, 'This job she ain't so tough!'

The Big Foreign Parade.
Sunday's Dallas News carried a picture of 'the big parade' from Europe to the United States in recent months. Aside from the economic aspect of the picture, it carries a message of 'Peace on earth, good will to men' that is usually rare. Our financial trials are making us brothers under the skin. Perhaps, after the world is on a sure footing again, we will keep up the good glad hand work.

A Second Young Plan?
'If the seemingly impossible should happen and Owen D. Young should somehow miraculously get the Democratic nomination, it would be a god-send to the Republicans. The Republicans need issues for next year, and a monopoly candidate on the Democratic ticket would give the G. O. P. some rich material for campaign speeches. And don't think the Republicans wouldn't use it. They would—and how!' So muses a political writer who has his fingers on the coming presidential racket.

A Show Without Showmanship.
'More people know Texas as the place General Sherman couldn't swap for hell than as the scenic wonderland and vacation paradise it really is,' writes a Houston editor. 'Tourists spend cash, and lots of it. The tax on the cigarettes they'd smoke would pay for enough printer's ink to bring them into the state in an endless stream—by train, by automobile, by boat. If we could, we could sell for cash a climate and a scenery that still would be ours, no matter how many times we sold it. We have the show, but we have no showmanship.'

Just Hold 'What You've Got.'
Every day someone says to us: 'The fellow who holds on until next fall will not regret it. This whole country is bound for one of its greatest eras of prosperity.' We have heard expressions of this sort, in different words, so many times recently that we have concluded that folks are getting more optimistic the longer we have hard times with us. Times like these, you have often heard, bring out true values and sift out the false values that gain headway during times of prosperity. Who can doubt that it is so? We are all learning our lessons.

The Pioneering Spirit.
Some of us complain like babies when we have little headaches or toe aches. We have not learned the first lesson of suffering in silence. We are typical folks in this age of speed, complaint and selfishness. Uncle Tom Base could have taught us some lessons if we would have heeded. Days and weeks after it appeared that he could live no longer, he hung to the threads of life. Perhaps he possessed the same courage on his deathbed that led him into the West of early days, and made him a pioneer of the pioneers. Yes, we could learn much from him.

Still the Wind Blows.
One of the most popular topics of interest among street loafers of all ages and all towns has been the uselessness of pastors and churches. The wind blows from their mouths in every climate and in every kind of weather, in prosperity and in depression. The Times thinks such splatters should be declared public nuisances and made to ply their talkative trade on their own doorsteps, if they just must let off wind. Our churches are just about the only agency that is holding our heads above water these days, for home has become little more than a meal ticket and a hotel room.

'Wops' They'll Ever Be.
No one who has read the details of Al Capone's trial could fail to be convinced that gang rule in the United States is as realistic as the front pages make it. One is impressed with the fact that there are no Browns or Smiths or Williamses or Joneses in Capone's gang. They are all 'wops,' who have come to this country to such our life blood away. 'The land of the free and home of the brave' has been changed by them to 'the land of gang slaves and the home of the craven.' Perhaps it isn't quite that bad—

Snyder Makes an Impression.

Those of us who live in Snyder from day to day, or those who live a few miles from town, often think that the Scurry county seat is 'just another West Texas town.' That title would be enough to make us proud of Snyder, but The Times rises to say that our town makes an added impression on visitors, tourists and other transients.
In the first place, Snyder makes an impression with her clean-cut square. Brick pavement, wide streets, spacious and well-kept court house lawn, impressive temple of justice—these make the stranger look for a second time.
And there is an air of progress that cannot be found in many West Texas towns. Business is not rushing, as any merchant will tell you, but it is steady and sure to merchants who are on their toes. There are few vacant business houses in Snyder—fewer, we think, than in any other town in West Texas.
We have fine churches, an outstanding school, and a good community spirit.
Those many things we often long for—more paving, a city hall, a more modern hotel, a city auditorium and other improvements—will come with the new era of prosperity that will be ours in a few months.
In the meantime, let's make the most of what we have, and not complain too much about what we have not.

EDITORIAL OF THE WEEK

WILL TIMES GET BETTER?
Will times get better? That question is being asked frequently these days. It is something everybody wants to know. The answer, of course, is that 'they always have.' But when will they get better? Well, if the price of cotton should continue to advance they will be a little better this winter than they would have been if there had been no recovery from the record-breaking lows of three weeks ago. The difference between six-cent cotton, let us say, and nine-cent cotton, if we may hope for such a thing, would mean a difference of fifty or sixty million dollars to Texas this winter. And yet we had better than nine-cent cotton last winter, and we considered it a ruinous price. We now look forward to nine-cent cotton as a harbinger of better times.
(And there is no assurance that we shall see nine-cent cotton very soon, though it is possible, of course. Suppose we look at it another way. Take into account cotton consumed during the past three months, it is probable there are 22,000,000 bales of American cotton in sight for the next nine months, and a new crop coming on after that. We can hardly expect more than 10,000,000 bales of American cotton to be consumed during the nine months, so we have every reason to conclude that with the beginning of the new cotton year next August there will be 12,000,000 bales of cotton, plus whatever the new crop turns out to be, to supply the world with American cotton for the succeeding 12 months. A crop of 9,000,000 bales, let us say, would mean a supply of 21,000,000 bales of American cotton. If world consumption of American cotton should attain 13,000,000 bales by that time, the supply would be 8,000,000 bales more than the world's needs, and if the bankers' holding movement should prove successful, 7,000,000 bales of that surplus would be held off the market. Considering that the bankers' holding movement should stimulate the investment buying of cotton during the next nine months, it would easily be possible to have the entire surplus of 8,000,000 bales held off the market. Inasmuch as the federal farm board already has agreed to hold the cotton it controls for another year if there is substantial acreage reduction, it would not be difficult to hold enough of the new crop to reduce the available supply to the world's needs. If all of this should happen, times ought to get better gradually during the next nine months, and we should enter the new cotton year in August in better shape. But that depends on two things: First, next year's crop will be no more than 9,000,000 bales, and second, that world consumption of American cotton during the next nine months will be as much as 10,000,000 bales. The first depends upon the cotton farmers of the South, and the second depends upon a restoration of the purchasing power of our foreign customers.—The Texas Weekly.

SAYING IT IN RHYME.

The Times does not pose as a discoverer of literary talent. Nevertheless, we are usually glad to use contributions of would-be writers, young or old, who wish to see their brain children in print. In most cases, we must admit, the contributions are more ambitious than literary; still, we herewith donate this space to budding poets.

HALLOWE'EN NIGHT
By Ramon M. 'Bushy' Hedges, Double Mountains.
Hallowe'en night is drawing near;
The bats and witches are hovering night;
Waiting a few more nights until it's here
To swoop down with a weird cry.

The kiddies will get an awful scare
As they go to parties and shows,
For the goblins and bats will be there,
And old Mother Witch with her hideous nose.

The black cats will get slipping by,
And the jack-o-lanterns will grin.
When you hear an owl's eerie cry,
Be careful or the goblins will get you then.

Well, anyhow, the new Spanish Republic has already an ex-president who is neither shot nor exiled.

A Philadelphiaian complains that the meal his wife prepared for him killed the cat. But it looks to us as if the cat is the one with a complaint coming.

but, at any rate, let's further limit immigration. Apparently, we can't control them after they get in our midst.

The Taxpayers' Friends.
The despatch with which officers of the district court have disposed of criminal cases since court opened last week deserves your recognition. The officials helped save taxpayers a number of dollars by this quick action. Tax-saving officials are so rare that The Times pauses to pay tribute. The technicality of the law often makes excessive expenditures possible; but the spirit of the law is the spirit of our officers.

Washington's Hallowe'en.
October 30, to George Washington, meant something besides Hallowe'en, we learn from an article from the Bicentennial Commission. Young Major Washington, then only 21 years old, made a journey 173 years ago that began carving his name on the doorstep of history. With a companion, he made a hazardous trip through Western Pennsylvania, then an Indian-infested wilderness, and delivered a message that became known throughout the colonies. Remember that old saw, 'The heights of great men reached and kept were not attained by sudden flight?'

LETTERS FROM THE PEOPLE

OUR READERS' OUR VIEWS
Mr. Townsend Replies.
Editors, Scurry County Times:
The reply of Jake to my letter in last week's issue, when stripped of the irrelevant and extraneous matter, of which his reply is largely composed, leaves a few points to which I desire to reply. Before taking up those matters to which I wish to reply, I want to say that Jake and myself are good friends, and I concede his right to have, and to express, whatever political opinions he may desire to print in his paper and I replied to the editorial in regard to Hoover and his administration, because I did not believe that the statements made in the editorial were justified by the facts, and I am confirmed in that opinion since reading Jake's reply to my letter. My sole purpose in taking issue with Jake on this matter is to 'keep the record straight,' so that the readers of The Times will not be misled. Of course I do not mean to imply that Jake would intentionally make untrue or misleading statements but the best of men sometimes reach wrong conclusions, and are thereby led into making statements that are incorrect.
In his reply to my letter Jake gives three reasons for believing that Hoover has made a 'first-rate' president. First, he mentions the moratorium granted on indebtedness to the United States. This may prove to be of great benefit to Germany, and may be in the end, of some benefit to this country indirectly, but no man can be certain at this time whether the effect of the moratorium will be good or bad. I hope that it turns out to be good, and if

so, I shall be glad to give Hoover's administration credit for it.
Secondly, he cites as another great achievement of Hoover's administration, the appearance of the president recently at the American Legion convention at which time he made a speech and advised the boys not to ask for any further bonus payments. Jake says he 'showed his courage' by so doing. Why, Jake, he had already 'showed his courage' by vetoing the bonus bill at the behest of Mellon. Notwithstanding the fact that thousands of former soldiers were out of employment, and needed money more urgently than they will perhaps ever need it again, they would not have gotten a thin dime if Congress had failed to override Hoover's veto. And bear in mind that the bonus payment provided for in the bill was not a gift to the ex-soldiers but was an advance payment of a part of the money already owing to them, but not yet due.
Now we come to the third and last reason why Mr. Jake thinks that Hoover is a first-rate president. He says that the Hoover administration has given the farmer more 'breaks' than any other administration in our history. If he had said that the Hoover administration has given us more 'broke' farmers than any other administration in our history, I would have agreed with him. It is true that we have the Farm Board operating under the farm relief act, but their efforts up to this time instead of being beneficial to the farmers of this country have been a costly and ignominious failure. The tariff policy of the Republican party under Hoover's administration has arrayed the world against us, commercially speaking. We are losing our foreign trade because of our high tariff making it impossible for the people of other countries to

trade with us, and this is one of the reasons why our exports of cotton and wheat are falling off.
When Hoover was making his campaign in 1928, the Republicans claimed the credit for the prosperous condition of the country existing at that time, and they promised the people that prosperity would continue if Hoover was elected and the Republican party retained control of the government. Instead of prosperity among the people, we have a condition of want and destitution. Millions of people are in such dire straits that they are compelled to accept charity in order to obtain food. Jake says that this is a world-wide condition for which Hoover's administration is not responsible. The people will decide that question next year. Hoover policies even caused Senators Borah and Brookhart to turn against him. They are both insurgent Republicans, and stamped the country for Hoover in 1928.
Jake says that he is a Democrat, and believes that democratic principles are sounder than Republican principles, and yet he endorses Hoover's administration, admits that he voted for Hoover in 1928, and says that he will vote for him in 1932 if the Democrats nominate either Smith or Roosevelt. Jake also admits that he is young and

poorly versed' in politics and it is perhaps because of this that he entertains such strange political opinions, and is guilty of such inconsistencies as claiming to be a Democrat, and yet voting the Republican ticket!
Let us hope that as he gains in years that he will grow in knowledge, and that his political conduct will be more consistent in the future than it has been in the past.

Marvin Jones In Accord With New Cotton Schedule

Congressman Marvin Jones has the following encouraging opinion of recent Texas freight reductions on cotton:

I am very much pleased with the recent freight rate reductions from Texas points to the gulf ports.

For several years I have been making a fight to secure a lowering of these freight rates in order to place these commodities on the same basis with industry.

For many years industry has had freight rate reductions ranging from 25 to 40 per cent on commodities moving into export in order to assist the manufacturers in the disposal of their surplus products.

Steel and steel products moving into export are allowed a 35 per cent average reduction. Cement is given a 40 per cent reduction. Practically all manufactured products enjoy similar reductions. Even the farm implements are favored with a 35 per cent reduction below domestic rates.

The recent changes mean from \$1.00 to \$1.50 per bale increase in price for West Texas farmers.

To restore the purchasing power of the farming section is one of our great national needs.

The railroads are to be congratulated upon this concession. Heretofore their philosophy has seemed to be to solve all their difficulties by increasing freight rates. They have no monopoly on transportation. There is such a thing as freight rates becoming prohibitive and tending to destroy the traffic and to drive it into other avenues. I am sure they will find that these new rates on cotton will abundantly justify themselves.

"Bad Girl" Will Be Featured For Three Days Here

Vina Delmar's sensational novel, "Bad Girl" has often been called "an honest record, uncolored and unshamed, of the coming of a baby."

As such, it was read eagerly by hundreds of thousands who thrilled to the primitive vigor of the book, its gusto, and the racy narrative of the tale that read, like a personal account of the young couple, the next door. As climax to their reading, they found to their surprise that the heroine was not a "bad girl" in any sense, but was in reality the inthesis of the term.

It is this latter interpretation of Miss Delmar's moral in writing the novel that has been dramatized in the Fox Film version which reaches the screen of the Palace Theatre next Sunday, Monday and Tuesday. Sally Ellers and James Dunn as the featured leads.

Frank Borzage directed the picture. It was adapted in continuity and dialog by Edwin Burke, noted dramatist and writer of many past Fox successes.

"We adhered strictly to the book in our treatment of Miss Delmar's story," Borzage said, while filming the novel, "with one exception. We stressed the importance of presenting our heroine as a normal girl, yearning only for the joys of wifehood and motherhood that were rightfully hers."

The exceptional supporting cast includes Minna Gombel, William Pawley, Frank Darien and many others.

Besides his daughters, Mrs. Wade and Mrs. Burton of Snyder, Mr. Burton is survived by Mrs. Burton, three other daughters and four sons.

Bankers Work In Body To Achieve Co-op's Success

"The first time in history that any responsible group of Southern business men, or anybody else except the cotton farmer, has said to us that they are willing to help us carry the load," said Carl Williams, cotton member of the Federal Farm Board, after the meeting in New Orleans last week, when 40 among the most influential bankers of the South met with Farm Board members and cotton cooperative leaders and arranged for holding seven million bales of cotton off the market.

The immediate result was that the cotton market opened the next morning at an advance of more than \$2 a bale.

Nathan Adams, Dallas banker, chairman of the conference, opened it with the statement: "I have made many uncomplicated remarks about the Farm Board, but a great deal to say to my fellow bankers."

The agreement with bankers followed in less than a week after an agreement had been made between the cooperatives and cottonseed oil mills, under which farmers will be allowed to trade cottonseed for cottonseed meal, at an equitable rate. This not only gives the opportunity to obtain the cheapest and best feed and fertilizer without cash expenditures, but also starts a movement to consume in the South the surplus of cottonseed products which is holding down the price.

As we understand Japan's position, she intends to get out of Manchuria when she gets good and ready, if at all.

Roscoe To Be On Snyder Football Schedule Nov. 11

That longed-for Roscoe-Snyder football scramble, postponed last week on account of a West Texas week-end storm, will be played November 11—Armistice Day—authorities of the two schools have decided.

All the dope, except that oozing out of Roscoe, points toward the Tigers winners by at least three or four touchdowns. As we remarked last week, however, anything and everything may happen when the Ploewboys and the Tigers tangle.

From the Roscoe press agent comes the discouraging information that some of their stars are shedding cotton sacks and donning moleskins. The gentleman intimates that the unruly Ploewboys may romp on the poor Tigers as if they were so many holes, and of course that would just be too bad for the home crew. Nevertheless, we frankly believe that the score will be at least 32-0.

The game will be played at Roscoe, as originally scheduled. If it is expected to send all hands and the cook to root for his favorites.

November 20 continues an open date on the Tiger calendar.

IN MEMORY OF LITTLE GLEN BATTLES.
He was an unusual little lad
And his going made our hearts sad.
He was obedient, kind and true
And there was nothing he couldn't do.
He had a world of kind friends
Because everybody loved little Glen.
But in answer to God's call
He left the world with us all.
He stood the great examination
And all of it's great relations,
God sent a holy angel to carry him
To rest.
The messenger said, "Come, Glen,
thou blest."
He did not mind the going
Because God is loving,
We all hated for him to leave us;
But he went home with Jesus.
He said the angels loved the good,
For he was faithful all through
his childhood.
He said he heard the angels calling,
And he was not at all falling.
For he was prepared to go,
Oh, that's a great consolation we
all know;
He made the best of life he could,
For that is as God aimed he
should.
Upon the little mound out west
Where little Glen was laid to rest,
It seemed no sadness there should
fall,
Because the flowers covered all.

Stove burners use gas from the moment they are lighted, whether they are cooking food or not. 3. Do not try to hurry cooking or heating by turning the gas flame too high. Do not use the large burner when a smaller one will do. 4. Keep all burners and other gas using devices clean, so that every burner opening will feed its share of gas to the flame. 5. Do not use the range oven to heat the kitchen, because it uses twice as much gas as a small portable heater. A small heater for the kitchen will pay for itself quickly in gas savings. 6. Never allow hot water faucets to run or drip. The gas wasted to heat water that runs away, in a short time, will pay for many faucets for your leaky faucets. LONE STAR Natural Gas Co. Acraege Cut Law Vital to Success Of Holding Plan

Importance of the new state law restricting cotton production to the plan of Texas bankers to finance the holding of a proportion of the 1931 crop was emphasized in a statement today by J. E. McDonald, commissioner of agriculture.

McDonald pointed out that the efforts of Texas bankers to assist farmers in gaining a living wage from the sale of their most important product would go for naught unless farmers cooperate to hold down 1932 acreage and production as the law provides.

"I have no doubt," McDonald said, "that farmers will obey the law. It is to their best advantage to do so. This comment simply is to point out the additional necessity for adherence to that law."

"The plan approved by Southern bankers to help finance the crop contemplates a radical reduction next year. It presumes that the farmers have learned they must cooperate, under the guidance of state laws, to hold their production reasonably within the reach of demand.

"In our efforts to help the farmer through his difficulties, we should not lose sight of the fact that our present condition was brought about largely through continued over-production, to the point where the South was called upon to rid itself of the largest surplus in the cotton industry's history.

"We have not yet worked off the surplus. To add to it and would render useless all efforts toward financing the crop. There isn't enough money available to finance an ever-mounting surplus. That fact should be borne in mind by every farmer in the South when time comes for planting next year's cotton lands in compliance with the new 30 per cent allowable cotton law."

ReCALL Stores Head Says One Cent Sale Will Help Business

J. C. Stinson, the local ReCALL druggist, has just received a personal letter from Louis K. Liggett, leading figure in the drug world, old friend of former President Coolidge, and a keen student of modern business.

"I think the biggest merchandising idea that has ever been promulgated in America is the fall one-cent sale," said Mr. Liggett, and he gives this bit of history: "I brought this sale to you in the fall of 1924, after war had been declared between the European countries. Almost everything was at a standstill. Stock markets were closed. Everything was going to hell in a hack, and the one-cent sale put your business over them and it will do the same thing this fall."

More money is being spent on the publicity program for this autumn one-cent sale than has ever been expended before. As its projector who gave it to the independent druggists who have accepted the ReCALL merchandising plan, Mr. Liggett says: "The theme and scheme back of the one-cent sale is clean—it is wholesome—it is truthful. It is merchandising from factory to consumer with the lowest possible intermediate profit. You will give employment in your stores by reason of what your consumers buy. And after all, that is what is going to tide us over."

Conoco Prizes Will Be Announced Next Week in This Paper

Announcement of the winners in the \$10,000 cash prize contest sponsored by Continental Oil Company for the best answers explaining "The Mystery of the Hidden Quart," will be made in an advertisement in next week's issue of The Times.

The success of this advertising campaign, in which motorists were invited to compete for \$10,000 in prizes for the best answers to the question, "What becomes of the hidden quart of Conoco germ processed motor oil, and how does it benefit motorists?" has so far surpassed expectations that the winners cannot be announced as early as was anticipated.

Stains from chocolate and cocoa are composed of fat, resinous coloring matter, fibrous material, starch, sugar, and sometimes milk solids. None of these stains are set by hot water, so if the material is washable, soap and hot water are the only treatments necessary. Wood alcohol made alkaline with ammonia is also effective. If the fabric is not washable, grease solvents, such as carbon tetrachloride, benzene, and others will dissolve the fatty part of the stain, and the remainder can be removed by hydrogen peroxide.
