Section Two-Page 3

Signs and signals are among the biggest helps to safe driving, the National Safety council says. "They give drivers warning of the dangers that lie ahead. But they are worthless unless seen and obeyed. The safe driver will follow these signposts:

1. Give signs, signals and markings the same respect you would a traffic officer. Here's one place you may lose if you cheat.

2. Reduce speed and be on guard when you see a diamondshaped sign (this shape carries a warning) or a round sign (this signifies a railroad crossing is ahead). 3. Come to a complete stop at an eight-sided or octagonal sign. This shape means only one thing-

stop! 4. Know what an oblong sign says. This shape carries regulatory messages such as speed limit.

5. Heed the cross-buck sign at railroad crossings. If there is a flasher or wig-wag, wait until it stops operating before crossing. There may be another train you can't see.

6. Watch for the signs of life even on familiar roads. Threefourths of the drivers in fatal accidents lived within 25 miles of where the accident took place.

Work Well-

For You To Feel Well 24 hours swery day, 7 days every week, never stopping, the kidneys filter wate matter from the blood. If more people were aware of how the kidneys must constantly remove sur-plus fluid, excess acids and other waste-matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly. Burning, scanty or too frequent urina-tion sometimes warns that something is wrong. You may suffer nagging back-ache, headaches, dizziness, rheumatie pains, getting up at nights, swelling.

Agnes felt a twinge of misgivings, but, even then, she failed to recognize the arbor for what it was-a menace to her marriage.

"Guess I'll have to make some," she answered, with just a shade of doubt. "I'll go out and pick the grapes right after I get you off to work."

"Fine," beamed Greg, swallowing the last of his coffee. "Mom always makes it with pure grape juice and sugar. Better call her if you have any trouble."

"Oh, I'll manage," answered Agnes, smiling with a great show of confidence. "After all, I learned to cook, didn't I?"

"Sure did, Hon," agreed Greg, reaching for his hat. "Got to run along, now. Good luck with the jelly."

They exchanged their usual afterbreakfast bride-and-groom kiss, and Greg hurried out the front door. When the breakfast dishes were carefully cleared up, Agnes took a dishpan and approached the arbor. It was pleasant there. Working in the sunshine, to the busy humming of bees, she felt the lightness come back into her heart. After all, anybody could learn to make jelly. Dew lay heavily upon the purple globules, as she placed them, bunch by bunch, in the dishpan. She breathed deep of their winey fragrance, and smiled in her new sense of ownership.

"Making jelly?" called her neighbor, across the back fence. "Those grapes always did make the best jelly!" "Going to try it," Agnes called

### Development of Bicycles

. . .

Joseph B. Niepce, French physicist best known as one of the inventors of photography, was active in other fields as well. In 1316 he invented the "celeripede," or "hobbyhorse"-two wheels and a crossbar upon which the rider sat while he propelled himself with his feet against the ground. It was the forerunner of the modern bicycle.

There were a few minor improvements during the next two or three years. But the price was high and the machine was not within the reach of ordinary folk; thus it became known as the "dandy horse." It even reached America, but the natural crudities of the device finally ended the craze.

The idea of propelling oneself on wheels, however, had taken root. The velocipede, or "boneshaker," was the first crank-driven bicycle, developed in 1865. It was well named. With heavy wooden wheels, thick iron tires and a massive iron

> Then came the tall "ordinary," with front wheels sometimes over five feet in height. But it was not until 1876-a little over 70 years ago-when H. J. Lawson invented the first rear-driven bicycle. Then followed many patented improvements and in 1877 Col. Albert A. Pope of Boston organized the Pope Manufacturing company, launching the bicycle-making industry in the United States.

Pneumatic rubber tires followed in 1889. Free wheels, which enabled the bicycle to coast, were introduced in 1894. By the turn of the century the tandem, or "bicycle built for two." had become exceedingly popular. The bicycle industry, spurred by invention, zoomed to new heights.

Today it is estimated that more than 60,900,000 bicycles are in use throughout the world, 12,000,000 of them in the United States.

#### **Presbyterian Church** The Church with a Message for Today

Thursday, November 25, 1948

Rev. Wm. A. Casseday, Minister

Bro. Casseday says: People are wondering if the indifference to spiritual things of our times is causing so much chaos in the world. Yes, is the answer. Everyone needs the Church. The Church is God's Highway to Heaven, the stepping stone to the higher realm. Are you on the high level? If not, which step are you on?

There are seven steps to spiritual declension . . . Neglect of private prayer, disregard of the Bible, forsaking the means of grace, worldlyindulgence in secret sin, falling into open sin.

The Presbyterian Church wishes to be of service to you, the public. Come, let us worship together. "And a highway shall be there, and

### Thursday, November 25, 1948 Paden Will Show Film and Talk on **Italian** Missions

Evangelist Cline R. Paden will speak Sunday night, November 28, at the Church of Christ, corner of 25th Street and Avenue O, concerning the work that the Church of Christ is plannnig to do in Italy, according to Austin Varner, minister of the local church.

Bro. Paden is being sponsored in this work by the Crescent Hill Church of Christ of Brownfield, sponsors of the Italan mission work. He plans to spend his life in the preaching of the gospel to the Italian people

Last fall Paden and William C. Hatcher, who is being sponsored 'by the Hayes Avenue Church of Christ in Detroit, Michigan, went to Italy to obtain the needed information to start the work there. They spent two months there collecting this information and taking pictures of onditions there. The Sunday night program will consist of the things that were observed while in Italy and 1,200 feet of moving pictures will be shown, taken while they were there.

### THE BOOK OF MATCHES Is the Hottest in Town!

Truly the "hottest book" in town: 30 per cent of all fires are caused by careless use of matches-smoking. Last year fire destroyed \$700,000,000.00 (\$700 million) in homes, buildings, farms, forest fires.

Fires not only destroy hard-to-replace property but annually snuff out 12,000 irreplaceable lives.

By KATHLEEN NORRIS

AS LONG as we can, let us make our little corner of the world a serene and happy place. As long as we can, let's give all we can, to the suffering overseas, to the community chest, to the various members of the family who are not as fortunate as we are.

As long as we can, let's hold home together, keep up the customs of Christmas and birthdays, the family group about the supper table, the good winter fires, the first picnics among the crocuses and green grasses of spring.

We don't know what's ahead, what changes, what shocks. But we can steel ourselves to meet them by building close and tight the dear familiar pattern of our American ways, by clinging to the law. The law of each individual heart-to forgive, to share, to serve. That is our creed. It is upon that creed that our childhood lives were formed. Blessed are the merciful. Forgive your enemies. Inasmuch as ye have done it for the least of these, ye have done it for me.

Under today's doubts and distresses we must try to return to these laws. Internationally no nation is doing this. It is too late to hope for that. But each one of us may create his own tiny corner of heaven by a simple return to the law.

#### Fear Will Disappear.

Do this and you never again will know fear. No matter what is ahead of us, no matter what is going to happen, you will be safe. So for your family's sake, try to discover the peace and beauty of the lives that follow the law of Jesus Christ, before the inevitable agitations and scares ahead.

Had those who call themselves His followers kept this law, through all the hot ages of bitter warfare, we would not be where we are today. The word "war' would have been long forgotten.

We can't go back. But every one of us who clings to this law is safe. And some of us may live to see the miracle hidden in the old rule. Overcome not evil with evil, but overcome evil with good.

Most immediate and effective treatment of an attack of asthma is by adrenalin or epinephrine, a hypodermic injection of seven to ten drops of a solution of 1 to 1,000. While there may be circumstances where a physician must be obtained

immediately, generally speaking the family physician always should be called first.

On the average, the early-rising patients are out of the hospital four days sooner and have less than half as many complications following to keep the processes going-digesthe operation than late-rising patients.

#### The Bernadotte Plan

INSIDE story of the origin of the Bernadotte plan now has leaked

McClintock described it as similar to the Grady-Morrisson plan for the partition of the Holy Land which the United States had flatly rejected. Coldly, Sir John Troutbeck replied that there would be no agreement on Palestine unless the Arabs got the Negev. Result of this basic disagreement was that Bernadotte and Bunche had to mediate not between

the Jews and the Arabs, but rather between the Americans and the British. Finally, McClintock agreed to cable Washington the text of the British proposals.

Significantly the Bernadotte plan never was discussed by the mediators with either the Israeli government or the Arabs. It came directly from Bevin as the British price for the acceptance of any plan for settlement in the Holy Land.

When McClintock got word back from Washington that the state department favored Bevin's proposal regarding the Negev, he was amazed. However, that's how the so-Personalities called Bernadotte plan was born.

plurality which gave him 304 electoral votes (to Dewey's 189) was nothing less than a popular directive to serve.

Thus, for the first time since he entered the White House, President Truman was able to feel that he had full, untrammeled control of

the administration. MORE THAN that, the President was enormously elated about the

fact that the Democrats had gained control of both houses of congress. How justifiable that elation will turn out to be, however, is a question for time to answer. "We have a congress now, and I'm sure we'll make some progress in the next four years," he said.

Yet, full cooperation between a U. S. president and his congress, even when they are aligned politically, is, if not quite a rarity, at least unusual.

Soon after the 81st congress conquested to boost the authorized strength of the national guard by 100,000 men and put all its units on a ready-for-war basis.

And the way things look now, it appears that congress will agree to that request.

Guard officials said they would ask that the authorized strength be increased from the present 341,000 to 441,000. This, of course, would require special sppropriations for armories and equipment.

These officials in Washington said they also will ask that all 27 divisions of the national guard be included in the army's stepped-up defense program.

### **Deadlines** Come Soon for GI Bill Benefits to Vets

There are a number of importan deadline dates on GI Bill benefits which World War II veterans of the Snyder area should keep in mind, Veterans Administration officials point out in a release to The Times this week.

GI education and training bene fits have two deadlines, one to enter training and another to complete training. Education or training must be started within four years after discharge or by July 25, 1951, whichever is later

As a general rule, education o completed not training must later than July 25, 1956. The exceptions from the general rule are veterans who enlisted or reenlisted before October 6, 1946. These met figure deadlines on GI Bill benefits from the date of their discharges and may start and complete their training later than other veterans Veterans may apply for guaran teed or insured GI loans for the use of buying or building home farms or businesses up until July 25 1957.

Veterans who were discharged on or before July 25, 1947, can apply for readjustment allowances unti two years after their date of discharge. However, no readjustmen allowances are payable after July 25, 1952,

### **Rotary Club Sees** Advances in Farm **Machines** in Film

"Rubber Lends a Hand" was the title of an interesting 35-minute colored moving pitcure shown at the weekly luncheon meeting of Snyder Rotary Club last Thursday noon at the Snyder Country Club.

Arranged by Bud Miller, program chairman for the week, the movie was presented by R. E. Burnham, representative of a tire company out of Lubbock. The film interestingly reviewed the improvements in farm and home equipment provided by the consistent improvement of rubber tires, belting and accessories. Pictures of modern equipment used on farms today to save steps and to increase production were revealing to the Rotary members present.

## Let ér blow.

The one thing that won't help you through the winter is a lot of talk. So we'll make it brief:

Change now to winter-grade Conoco Nth Motor Oil for faster starts, peak winter engine performance and the full-time protection of OIL-PLATING.

Faster starts: Winter-grade Nth is specially refined to lubricate your engine even when the temperature plunges. It's free-flowing.

Peak winter performance: When you drain out that thick, dirty summer oil, you say goodbye to balky engine response. Wintergrade Ntb puts June under the hood!

Full-time protection: A special added ingredient fastens an extra protective film of lubricant to metal surfaces...OIL-PLATES every working part ... cuts down "dry" friction starts and general engine wear. Let winter blow ...

#### Gramma's experience in squalls with her seafaring husband prepared her admirably for the role she was called upon to play when Nedra and John called off their marriage.

So it happened that in a very pert dabbing of powder around her few more days, Gramma and Nedra pretty blue eyes.

After a minute Gramma said casually, "John left early." "And not a minute too soon," Nedra returned quickly, sinking deeper into the fireside chair and

turning her face away. "Ho, so you two had a quarrel." She clutched Gramma's arm and Gramma knitted a little faster than before.

"No, a conflagration, an explosion, a dissolution, a parting of the ways." Nedra's voice was both angry and vehement, and a little tearful too.

"As bad as that?" Gramma inquired mildly.

"I gave him his ring. It's all Nedra swallowed a sob over." quickly.

Gramma made a little clucking sound but she went on plying her needles industriously.

At last Nedra burst out unhappily. "Well, aren't you going to console me, or congratulate me, whichever the case may be?"

Gramma stopped knitting for a moment, looked up. "You and John have quarreled before. They are something like the squalls we'd sometime meet up with on the Saint Lawrence when I'd made a trip with your grandfather on his steamer. He was a sea-captain, you know. Well, there'd be a terrible lot of noise and wind, and then the most beautiful calm you ever saw. It's natural for people in love like you and John to quarrel once in a while." Nedra sat up. "Darling, you're

an incurable sentimentalist. John and I are sensible and modern and analytical about love, as all young people are nowadays. We've had several bitter quarrels since we became engaged, so we've simply had to face the fact that we're not compatible and that marriage would be a mistake.

"It was sensible of course to face this before it was too late."

"It's the modern way," Nedra said in a small, desolate voice. "But love is not modern." Gramma observed quietly. Then she added, "but of course someday you'll meet the right man."

The sudden white horror of Nedra's sweet face was like a shock. "There'll never be another man, never!" she exclaimed passionate-

ly, as she rose and left the room. Two or three days passed. One day at noon Nedra was lying on a chaise longue in her room, listlessly turning the pages of a magazine when Gramma burst in, excitingly

Next morning Mother Nature herself decided to take a hand. They awakened to find the ship tossing in a sudden gale, thunder roaring in demoniac fury, lightning flashing with every split second, the waves

tearing at the ship as if possessed of the fury of a thousand devils. Nedra dressed hurriedly, went into Gramma's room to find her also dressed, as early as it was. "Is it a hurricane?" Nedra asked

shakily. "I don't know, dcar. I think I'll just go and try to find out."

"Don't stay long. I'm beginning to be frightened," Nedra pleaded. "I'll be back in a jiffy. There's found themselves on a fruit-boat nothing to worry about. At least bound for the intriguing destination
