

STOCK YARDS DAILY JOURNAL

Vol. VIII, No. 101.

ST. JOSEPH, MO., MONDAY, JANUARY 1, 1905.

TERMS: PER YEAR, \$1.00. SINGLE COPY, 5 CENTS.

Reach For Business Through the Advertising Columns of The Stock Yards Daily Journal and You Will Certainly Get It

LIVE STOCK MARKET

Official Receipts Were 57 Cows, 1,495 Cattle; 58 Hogs, 4,446 Hogs; 3 Cars, 724 Sheep.

OFFERING OF STEERS COMMON

Demand Not Urgent and Prices Ruled Weak to a Bime Lower Than Last Week's Close.

POOR QUALITY OF SHE STOCK

Trade Slow From Start to Finish and Values Mostly 10c Lower—Small Supplies of Feeders in Sight and Demand Good—Hogs Generally 50c to 10c Lower But Good Clearances Made—Sheep Steady to 10c Lower With Top Lambs \$6.90.

RECEIPTS FROM JANUARY 1, 1904.
The following table shows the receipts from January 1, 1904, and receipts for the corresponding time in 1903:

| | 1904 | 1903 | Dec. Inc. |
|--------|-----------|-----------|-----------|
| Cattle | 157,121 | 137,879 | 19,242 |
| Hogs | 1,655,974 | 1,700,544 | 44,570 |
| Sheep | 794,282 | 599,189 | 195,093 |
| Horses | 28,658 | 30,832 | 2,174 |

Shipments—

| | Dec. 30 | Jan. 1 | Dec. Inc. |
|--------|---------|--------|-----------|
| Cattle | 416 | 4,481 | 4,065 |
| Hogs | 2,401 | 1,754 | 647 |
| Sheep | 2,853 | 2,636 | 217 |
| Horses | 1,228 | 6,296 | 5,068 |

LIVE STOCK IN SHIP.
The following shows the estimated receipts of cattle, hogs and sheep at the live stock yards for the week ending Saturday, Dec. 31, 1904:

| | Cattle | Hogs | Sheep |
|--------------------------------|--------|--------|--------|
| Chicago | 37,000 | 29,000 | 30,000 |
| Chicago, Rock Island & Pacific | 4,800 | 5,000 | 5,000 |
| Great Western | 1,500 | 6,500 | 12,500 |
| Hannibal & St. Joseph | 1,500 | 4,000 | 7,000 |
| St. Joseph & Grand Island | 3,500 | 7,000 | 4,500 |
| Total | 48,800 | 51,500 | 69,000 |

RECEIPTS OF STOCK BY CARS.
The following shows the number of cars week ending Saturday, Dec. 31, 1904:

| | Cattle | Hogs | Sheep |
|--------------------------------|--------|------|-------|
| Chicago | 59 | 29 | 29 |
| Chicago, Rock Island & Pacific | 2 | 2 | 2 |
| Great Western | 14 | 14 | 14 |
| Hannibal & St. Joseph | 2 | 2 | 2 |
| St. Joseph & Grand Island | 2 | 2 | 2 |
| St. Louis | 2 | 2 | 2 |
| Total | 81 | 81 | 81 |

CATTLE.

Light receipts, common quality and an unsatisfactory market were the features of first market day of the new year in the South St. Joseph cattle trade. Receipts at other river points were comparatively light, but Chicago had an over supply that brought total cattle in eight at five leading points up to 48,000. This total was not larger than is frequently used in one day but centralizing three-fourths of it in one market on an off market day was not to the interest of sellers and the glutted and sluggish market at Chicago was reflected back on to the river points. Of supply of steers at South St. Joseph the quality and condition of offerings was mostly common only a lead or two of medium quality and nothing that could be called good was seen. The market was slow from start to finish and any change from a steady basis of prices was toward a lower level. Conservatively stated the day's market was sluggish with values weak to 10c lower.

STEEERS.

Light receipts, common quality and an unsatisfactory market were the features of first market day of the new year in the South St. Joseph steer trade. Receipts at other river points were comparatively light, but Chicago had an over supply that brought total steers in eight at five leading points up to 48,000. This total was not larger than is frequently used in one day but centralizing three-fourths of it in one market on an off market day was not to the interest of sellers and the glutted and sluggish market at Chicago was reflected back on to the river points. Of supply of steers at South St. Joseph the quality and condition of offerings was mostly common only a lead or two of medium quality and nothing that could be called good was seen. The market was slow from start to finish and any change from a steady basis of prices was toward a lower level. Conservatively stated the day's market was sluggish with values weak to 10c lower.

COWS, BULLS AND MIXED.

In the line of the stock, as with steers, the arrivals were limited and quality not attractive. Buyers did not display any urgency in their wants and were disposed to take offerings only at concessions from last week's level of prices. Business was slow from the start and prices at which the supply was moved were weak to around a dime lower with sales of the bulk of offerings on a basis of \$2.40 to \$2.50 for fair to good killing cows and heifers with choice top prime quotable at \$3.25 to about \$4.00 although few some good enough to sell as high as \$3.75. In the cowherd trade there was no change in conditions, supply light but demand not urgent and thin old cows were hard to sell while offerings on order were slow at weak values. Bulls were also in meagre supply with market slow and prices steady to easier.

HOGS.

The supply of hogs was pretty well centered in the east today and prices there broke abruptly and took values down at the outside markets, regardless of nominal supplies. At the opening packers were bidding right at 10c lower, but they could create no movement until bids became generally 60c to 10c lower when there was fair activity and a pretty good clearance before the noon hour. There was an inclination to base down more on the lighter weight grades, but some of the good heavy kinds met the full decline. Quality was generally good and there was included quite a percentage of good to choice heavy, which are selling at a premium over the underweights. Pigs were not in large supply, but trade was slow and about 50c lower.

WOLVES.

The supply of wolves was pretty well centered in the east today and prices there broke abruptly and took values down at the outside markets, regardless of nominal supplies. At the opening packers were bidding right at 10c lower, but they could create no movement until bids became generally 60c to 10c lower when there was fair activity and a pretty good clearance before the noon hour. There was an inclination to base down more on the lighter weight grades, but some of the good heavy kinds met the full decline. Quality was generally good and there was included quite a percentage of good to choice heavy, which are selling at a premium over the underweights. Pigs were not in large supply, but trade was slow and about 50c lower.

Live Stock Receipts.

The following shows the receipts of live stock by months at the South St. Joseph Stock Yards for the years 1898, 1899, 1900, 1901, 1902, 1903 and 1904.

CATTLE

| Months | 1898 | 1899 | 1900 | 1901 | 1902 | 1903 | 1904 | Inc. over 1903 | Dec. from 1903 |

SHEEP.

First market day of the new year brought but a small run of sheep to the South St. Joseph market, the offerings being made up mostly of a load of Colorado ewes, a small lot of native lambs and a shipment of Nebraska fed-western sheep. While the supply here was small, the five market total was 42,000 and the run at Chicago had an unfavorable effect on the river markets, though for the small run here an outlet was found at easy prices with native lambs selling at \$6.90 or within 10c of last week's top and the quality today was not quite as good as the recent top getters. The Colorado ewes sold at \$4.35 and Nebraskas at \$4.20. The light trade indicated steady prices on a quotable basis of \$3.00 to \$3.50 for choice to prime lambs \$5.50 to \$6.25 for fair to good, fed yearlings \$5.00 to \$6.00, good to choice yearlings \$4.75 to \$5.75, fed ewes \$4.00 to \$4.00, culled and picked \$2.25 to \$2.50.

Corn, per bushel... 500; Hay, per 100 lbs... 800.

OUR PACKERS

furnish a daily market for all kinds of cattle, ranging from canners to export cattle.

How Suffering Benefits Humanity

The system of future rewards and punishments which came with the sublime theory of another AND IMMORTAL life must have been the grandest and most precious gift which had been offered to suffering man.

All this, no doubt common to every faith which accepted the theory of the immortality of the soul, was lifted to a still grander altitude in the gospel of Christ.

The what is the solution of the problem of suffering for all earnest and believing souls? TO WHAT PURPOSE are we sent into the world to endure its evil and wrong?

The pilgrimage of man on this earth may be said to resemble in its multitude of troubles the struggle of a swimmer against a powerful tide.

Therefore, if in a last word I am asked the question, "Do we get our deserts?" I will boldly answer, "No, we don't. AND WE NEVER SHALL, speaking of humanity as a whole and taking account of the preponderating multitudes to whom life is only another word for misery."

The Present Outlook in China

By Dr. W. E. MACKLIN of Newark, Ohio

I THINK the Chinese nation has a great future. The Chinese are a very laborious people and are hard workers.

I would like to see England and America open up China and develop the country. Japanese professors are being secured in the new universities, and I would rather see westerners AND WESTERN IDEAS implanted instead.

Crowded Centers And the Suburbs

CANINE IN CABLE SUBWAY. Dog's Whisker Poodle Patterina Until Cobby Comes to the Rescue.

Baltimore—A fantastically dressed woman stood in front of the Metropolitan building, Johns Hopkins university, and attracted considerable attention. She looked first to one way and then to another, and appeared to be trying to wave a sound which she heard but faintly. She was evidently worried. A cobby was driving slowly by her, and she seemed to hear something, but she couldn't tell where it came. It related in his words, not from his box and spoke to the lady, whose visible bewilderment was increasing with every minute. Together they stood still and listened. Then they moved slowly and into Duane street and stopped short at the car track. The cobby got down on his knees, peered into the cable slot in the middle of the track, jumped up with a laugh and ran across the street to a newspaper's shop. The lady also peered into the slot, and then looked after the cobby with an expression that meant "Curry". The cobby did hurry, too. He was back in an instant with a large envelope on his arm. With this he opened the manhole, and as the lid was removed the most curious specimen of doghood in Baltimore leaped out with a yelp that scared three times as many as the lady's cry of "Curry". Such a bath gives to the skin a delightful sense of freshness and cleanliness.

The Lemon Bath. A lemon bath is considered a daily necessity in the West Indies. Three or four times or ten times cut into the water and allowed to lie for half an hour, so that the juice may be extracted. Such a bath gives to the skin a delightful sense of freshness and cleanliness.

Wine, mixed with water, is a good way to pass the evening with a friend.

Past Year in Review Chronological Record of Most Important Happenings at Home and Abroad During 1904

Russo-Japanese War. The Russo-Japanese war, which began in July, 1904, and ended in September, 1905, was one of the most important events of the year. It resulted in the signing of the Portsmouth Peace Treaty, which ended the conflict and established the boundaries of Manchuria and Korea.

Government and Politics. The year 1904 was marked by significant political events in the United States. President Theodore Roosevelt's administration continued to focus on domestic reforms and international relations. The passage of the Hepburn Act and the Elkins Act were notable legislative achievements.

California. California continued to be a state of significant activity. The discovery of gold in the Sierra Nevada region renewed interest in the state's mining potential. Additionally, the state's agricultural sector showed steady growth.

Business and Finance. The business community in 1904 experienced a period of relative stability. The stock market showed a general upward trend, and many industries reported increased production and sales. However, there were concerns about the overall economic health.

Education and Culture. The year saw continued progress in education and culture. The establishment of new schools and universities reflected the growing emphasis on higher learning. Cultural events, such as exhibitions and lectures, were also prominent.

Science and Technology. Advances in science and technology were a key feature of the year. The discovery of the element Radium by Marie Curie and her husband Pierre was a major breakthrough. Additionally, there were significant developments in aviation and medicine.

International Relations. The year was characterized by complex international relations. The Russo-Japanese war had a profound impact on global politics. The United States continued to assert its influence in the Pacific region, leading to tensions with other powers.

Local Events. In the local context, St. Joseph, Missouri, experienced various events throughout the year. The city's population continued to grow, and there were several notable incidents and achievements within the community.

Weather and Climate. The weather in 1904 was characterized by a mix of conditions. There were periods of both drought and heavy rainfall, which had significant impacts on agriculture and daily life.

Summary. The year 1904 was a year of significant events and progress. From the Russo-Japanese war to the discovery of Radium, the year was marked by both challenges and achievements. The United States continued to play a major role in world affairs, and the local community in St. Joseph, Missouri, also saw its share of activity and growth.

Business and Finance. The business community in 1904 experienced a period of relative stability. The stock market showed a general upward trend, and many industries reported increased production and sales. However, there were concerns about the overall economic health.

FIND THE ELIXIR OF LIFE. Polska Squad of University of Michigan Experiments with Ginseng, a Powerful Drug.

Ann Arbor, Mich.—Michigan's drug-growers, the "Poison-Drinking Society," are engaged in the most far-reaching and greatest drug-proving experiment ever attempted in this country. They are eating ginseng, the Chinese superstition plant, and study the medical worth is assured that ginseng, instead of being merely a life-prolonging agent in ancient times, is a powerful drug in modern times. Ginseng's potency are many, but already, Michigan's experimenters have found one of the most important of them. It has been practically verified. It is that in a man of over 60 years of age, who is starting into his second childhood, it gives a large dose of ginseng. He is said to break out in a new time, showing that the stuff brings up his energy. For a period of three weeks, he has about ten years, his hair and skin is stayed off while he feels almost as if again in his prime.

None of the Michigan growers has taken sufficient ginseng to renew his youth, but already the 30 days in the experiment here say that they have fallen in a wild degree, and the symptoms which the Mongolian claim for the drug. The ginseng plant, from which this drug comes, used to be so common in this part of the country. But the war paid for it by the Chinese, because of the fact that in China ginseng mining is a government monopoly, has made ginseng the rarest and richest of American crops. It is now cultivated only in private gardens, and this fall there are only about 20 acres of ginseng in the United States. The dried roots today market for \$12 a pound. The seeds bring over to \$10 a pound, and since they are very heavy one bushel of ginseng seeds is worth about \$2,000.

INDIANS STARVE IN DESERT. Endure Hardships on Reservations—Compelled at Times to Fight Villains for Their Food.

San Diego, Cal.—A pitiful story of hunger and destitution and of patience and faith is the ultimate consideration of a kind government are brought from the eastern reservations of this county by men who have been investigating the condition of the Indians on the government reservations near Campo. Indian Agent Charles M. Schell, of Palo Alto, and Charles F. Martin, the publisher and editor of Our West, have spent six days among the tribes. The gist of what they found is harrowing enough to send a shudder through the country. On the five reservations near Campo, on the edge of the desert, there are at the present time nearly 200 Indians—not the dirty, wretched, unshaven, begging creatures who infest the treacherous, unimproved railroad stations, but healthy, intelligent, earnest people, who cultivate every possible square inch of the practically useless land reserved for them by the government. No rain has fallen to water the seed planted and there is no water at hand for irrigating. No large reserve food supply is ever possible and the unfortunate are now subsisting on what upon account. "Hunger relief camps" at Linnville, call the Indians will be shut before New Year's day. Such a condition, such patient suffering among old and young alike. I have never seen before and never want to see again. These Indians die each year, yet such is their extremity that when they see relief coming they will defend that has been killed they won the birds and the skin on their larder with the flesh. They also go out and catch rats and mice and eat them."

A Colt That Assisted. One Many Calf That assisted the bare foot and tried to call in the cows, so that he would not have to walk in the snow and to drive them. One cow was named in some, although he called her name repeatedly. A colt, standing at the other side of the yard, watched him, as he vainly tried to drive the cow without stepping into the mire. Then the colt quietly stepped up to her and bit her on the nose. Of course she moved. He followed, and she a bit under she moves in the snow. The Marlborough's went to the city. His name was...

Industrial. The industrial sector in 1904 showed significant growth and activity. Many new factories and plants were built, and production levels were high. However, there were concerns about the impact of industrialization on the environment and labor conditions.

Knowledge. The year 1904 was a year of significant knowledge and progress. The discovery of the element Radium by Marie Curie and her husband Pierre was a major breakthrough. Additionally, there were significant developments in aviation and medicine.
