CATTLE.

Week Develops Better Turn in Trade on Much Lighter Supplies.

About half the arrivals of cattle today were in the quarantine division, the native side hardly furnishing enough of any class of stock to draw out competition. The limited trade was on a basis of former prices and finishes the week with the general trade in much better condition than at the close of the previous week.

For the week the total receipts at this point will run about 8,000 less than for the previous week, but slightly in excess of the corresponding week last year. In the total at five markets the 102,000 received shows a decrease of 41,000 compared with last week and 23,000 less than a year ago.

It has become evident during the week that the beef trade will have to rely largely upon the ranges of the south and southwest for its supplies during the next few weeks. Weather has finally become favorable to farming operations and this will have a tendency to keep cattle from corn-belt sections back, as farmers are behind with their work, due to continued wetness, and will not take time from their fields to market stock.

Trade conditions have recovered from the demoralization of a week ago and there is again a healthy and active demand for moderate supplies of beef cattle. Prices for the best grades of corn-fed cattle have fully recovered the decline of the last week and are now quotable on the highest level of the year, while for all the medium and cheaper priced grades the market has been gradually improving until prices are 15¢ to 25¢ higher than at low time last week.

Supplies of the week have not included any strictly good or prime heaves at this point, but any such steers as were selling around \$8.00 ten days ago would readily bring around or over that figure at present. Bulk of steers offered have been of grades selling below the \$7.00 mark, ranging largely between \$6.00 and \$6.75 with common to fair light and grassy native steers going at \$4.75 to \$5.75.

COWS, BULLS AND MIXED.

The market for cows and heifers today was rather dull. Only a small run showed up, but buyers had limited orders and outlet was slow. Prices were steady to weak. Calves and bulls sold steady.

There has been no radical change in prices for cows and heifers during the week, but action has been materially better and the tendency has been toward strength. The market opened dull Monday, but developed firmer tone until Thursday prices on the general run of butchers' material was 10¢ to 15¢ higher. The improvement was due to light receipts more than any other cause. The extreme close of the market this week was a trade easer. Little corn-fed stuff has been offered this week, big percentage of the offerings being grassers of common to fair quality. Mixed lots of heifers and steers sold at \$5.50 to \$5.85 for best. Not many

double-bred heifers arrived, sales above \$5.00 being infrequent while bulk of the fair killing qualities sold within a range of \$3.75 to \$4.75. A spread of \$3.50 to \$4.50 took most of the decent grass cows.

There has not been material change in the prices for bulls this week, a little more activity being the only improvement. Calves have sold in a steady notch all week. The limit for light veals is \$6.00.

STOCKERS AND FEEDERS.

Only a few lots of stockers and feeders were in first hands this morning and trading was of nominal extent at steady prices. Dealers were ready buyers for everything available in this line.

Improved weather conditions has stimulated a better inquiry for thin cattle to go back to the country. Supplies of stock cattle early in the week were fairly liberal and speculators bought free, but at slightly weaker prices. Since Tuesday receipts have been disappointingly small and under a fairly good country demand stocks in the speculative division have reduced considerably and the week-end finds less than a normal run of cattle in dealers' hands. Prices have firmed up the last few days, recovering fully the loss of early in the week. Most of the good feeders sold at \$4.25 to \$4.75 and sales of decent stockers were largely at \$3.50 to \$4.10.

Stock cows and heifers are closing about steady with a week ago.

QUARANTINE DIVISION.

Eleven loads of Texas steers were on offer today. The market was weak for class of steers on hand—viz., common to fair high grades. Sales were quoted around 25c lower than a week ago. Prices ranged from \$1.10 to \$3.75.

HOGS.

Market Shows Further Decline of a Full Nickel. Supply Not Heavy.

The buying interests were able to force another reduction in prices for live hogs today. Local receipts were light, but there was a fair Friday showing at the five principal markets bringing the week's total at these points up to 205,000, or 42,000 less than were at the same points one week ago.

Outside markets were reported opening lower and the local trade started in to hammer prices down another 5¢ to 10¢ until they were willing to take hogs at around a 5¢ reduction. Trade was slow until well along toward noon, but when buyers and sellers got together on a market basis the supply was more plentiful and prices advanced.

While the market was quoted 5 cents lower the hogs were somewhat better in quality and this will perhaps make hogs on the hooks show more of a decline than is apparent on paper. On the decline of today prices current are still 25 cents higher than one week ago.

Prices ranged from \$5.80 to \$2.15, with bulk selling at \$5.85 to \$5.90. The bulk yesterday sold at \$5.90 to \$6.00, a week ago at \$5.00 to \$5.10, a month ago at \$5.20 to \$5.45, a year ago at \$5.25 to \$5.50, two years ago at \$5.25 to \$5.50, three years ago at \$5.25 to \$5.50, four years ago at \$5.10 to \$5.20.

SHEEP.

Lambs Sold a Dime Off, Sheep Are Neglected.

Conditions in the sheep house this morning were very unsatisfactory for selling interests. Fresh arrivals numbered 1,500 and there were around a thousand hold-overs from yesterday's mean session, altogether making a liberal Friday supply. The market yesterday closed 25c lower on sheep. Lambs sold on a dime lower basis, best clipped grades selling at \$5.50. Sheep were badly neglected and trade was extremely dull in this branch of the market. Bids were hard to get and when secured were sharply lower, and the forenoon were away with little business being transacted.

The live mutton market this week has been an up-and-down affair. Trade opened up active and strong and lamb values were carried 10¢ to 15¢ higher, while sheep prices ruled steady to strong. Under increased receipts, and following a bad break in the eastern dressed mutton market, trade began showing weakness Wednesday. Lambs, being in small supply, held up pretty well, but sheep were hit a hard blow, closing 25¢ to 50¢ lower than a week ago. Lamb trade is closing 10¢ to 15¢ lower than the high spot of the week, but values are still a little higher than a week ago. During the week best woolled lambs sold at \$6.05 and clipped grades at \$5.00. Local receipts for the week total 14,000, an increase of 1,200 over last week and 3,000 more than were received a year ago. At five markets the week's total is 152,700 against 132,200 a week ago and 115,300 for corresponding week of last year.

FLIES CAUSE EPIDEMICS.

Chicago Tribune: The history of recurrent epidemics of contagious diseases, both in Chicago and throughout the country, is the history of unusual prevalence of the insect pest, the greatest of which is the summer fly pest.

The typhoid epidemic which ravaged Chicago in 1902, and which caused a death toll of 402 persons within three months, was directly traceable to insanitary conditions and the transmission of disease through the fly pest.

Chicago health officials of the health department and physicians and surgeons after exhaustive experiments have declared that flies are the greatest common carriers of contagious diseases and the most deadly agents of infection. They have declared from time to time that all foodstuffs, milk, and from living rooms in homes where there are children, infectious children's diseases and the child mortality rate are caused almost wholly by the prevalence of flies in the home. It is said, and either direct infection or indirect infection through contaminated foods with which they have allowed to come in contact.

BRIEF CITY NEWS.

John Baubitz of Graham, Mo., was on the local market yesterday morning with live stock.

Mrs. Gus Johnson, 22 East Colorado avenue, will leave today for a visit with relatives in Indiana.

Charles McCrary, a popular stockman of Hamilton, Mo., was at the Exchange building yesterday.

After spending nine weeks with her daughter, Mrs. C. C. Clark, Milwaukee, Wis., Mrs. C. D. Davis returned to her home, 411 Blake street, yesterday morning.

The younger members of the Grace M. E. church gave an ice cream social last night at the residence of Mr. and Mrs. H. Berrington, 480 East Kansas avenue. A large number were present and a very enjoyable time was had.

RIVER STATIONARY YESTERDAY. With Possibilities of Little Change. Missouri Expected to Fall Steadily.

Having risen one-tenth of an inch in the twelve hours ending at 6 o'clock yesterday morning, the river yesterday remained stationary at 396.1 feet and late last night showed no signs of further rise.

Reports that a big rise is being felt at Omaha would go to show that a slight rise is also due here within a few days. That this will not materially affect conditions is believed here.

Indications from other points further upstream than Omaha are that the river will fall steadily from now on and that very little damage will result this year.

The government piling which was torn out several days ago below the Grand Island bridge will be replaced shortly and what is left has been considerably strengthened.

The Burlington yesterday succeeded in pushing a train through to Parkville, which for several weeks has been without train service.

Friends of Park College took advantage of the train to attend the commencement exercises at the school. Owing to continued high water at Kansas City other lines are using the same routes as before.

GOING TO LABEL THEM. Contract Awarded for Badges for Aldermen. Made of Silver and Gold.

In compliance with an ordinance passed several weeks ago Comptroller Shaffer yesterday awarded a contract to a local jewelry company to manufacture a set of stars for the councilmen.

The city fathers have long desired some emblem of authority and have haunted the city hall in their efforts to learn why it was not forthcoming.

The stars ordered are to be made of silver, plated with gold and inscribed with the word "Councilmen," followed by the ward which he represents.

The president of the council will also have one.

Fearing that Mayor Clayton might some day have occasion to flash a badge on someone the jeweler is to make one for him with a few extra frills on for his exalted position.

The star will have attached to it by means of small gold chains a bar on which the words "St. Joseph" will be engraved.

DEATH RATE IS LOW. Mortality Table Shows St. Joseph is Exceeding Record as Healthiest City.

That the death rate in St. Joseph this year will be far lower than ever before is the prediction of the board of health.

Following an argument over the question Dr. J. T. Stamey, assistant city physician, yesterday compiled from the health records a table showing the total number of deaths was 428, divided as follows: Pneumonia, 62; tuberculosis, 61; heart trouble, 43; kidney trouble, 11; typhoid fever, 7; and cancer, 10.

Estimating the population of the city at 125,000, the death rate is 6.81 per cent a thousand.

"That shows we are still holding our reputation of being the healthiest city in the country," said Dr. Stamey. "We consider the low mortality remarkable. The fact that only seven deaths occurred of typhoid fever during the six months we regard as wonderful."

PIONEER DIES SUDDENLY. Taken ill suddenly at 2 o'clock Wednesday afternoon Caswell Srite, 68 years old, a pioneer citizen of St. Joseph, died at 6 o'clock yesterday morning of hemorrhage of the brain.

He leaves a widow, one son, Frank, and a daughter, Mrs. W. B. Shelton of Kansas City.

GIVES BANQUET TONIGHT.

Between 150 and 200 men, representing the First, Pattee Park, Savannah avenue, Wyatt Park and King Hill Baptist churches, will attend the first annual banquet of the Baptist Alliance at the Hotel Metropole tonight.

It is the intention of members of the alliance, which was formed a year and a half ago for the purpose of stimulating denominational work in St. Joseph, to make the banquet a permanent feature of each year's work.

Talks will be made by George P. Dunn, Henry Voesevayer, T. W. Stone and the Rev. Adolph Vollmer of the King Hill Baptist church.

E. B. Newcombe has been in charge of the banquet arrangements. The officers of the alliance are: W. H. Griffith, president; the Rev. Adolph Vollmer, secretary; and George P. Dunn, treasurer.

WILL SELECT LOCATION.

An inspection of six different locations for permanent club rooms was made yesterday by the directors of the Lincoln Republican club, and a selection will be made at a meeting of the directors Monday afternoon.

In the meantime, Secretary Ralph W. Street and others will compile records of what the cost of maintenance at the various places offered would be, and these reports will be submitted Monday.

A FLOOD PROTECTION PROJECT.

The experiment which the federal government has inaugurated at Cincinnati for storing the flood waters of the Ohio into gigantic reservoirs will cause the people of the middle west to take notice of the progress and development of that idea.

The plan is to build at such points as appear feasible between Pittsburg and Cairo 100 basins of sufficient capacity to store, not all the actual flood waters, but the crest of the floods that send the Ohio out of its banks to sweep the rich farm lands and the cities along that river.

If the plan appears practicable from the experiments which government experts are now preparing to make at Newport, Ky., near Cincinnati, Uncle Sam may undertake the gigantic task of eliminating the heretofore inevitable yearly loss from floods.

But the suggestion of storing the surplus waters involves more also than flood protection. It is proposed to preserve in these 100 basins the overflow from the high water season until the late summer months when the river is at its lowest stage.

This would be converting an actual element of destruction into the greatest possible benefit. The waters that now ride the crest of the floods and destroy millions of dollars' worth of property would really be "harneassed" for co-operation with the farmers in increasing the yield from the lowlands by affording moisture during the season when moisture is needed.

And all this, as the auctioneer would put it, for the small sum of 125 million dollars. The government engineers have not yet completed their surveys, but it is estimated that the basins can be constructed at a cost not to exceed the above amount.

But, first of all, the government is seeking to establish the feasibility of the plan. It may be found to be utterly impracticable. It is encouraging, however, to know that, at any rate, the federal government has at last taken the initiative in the solution of the flood problem.

ALSIKE AND TIMOTHY.

There is a growing demand for a combination of clover and timothy for hay and pasture in all sections of the Northwest. The medium and mammoth red varieties do not succeed on low, moist grounds as well as the alsike which also matures with timothy.

The leading value of alsike clover is superior to the medium red variety, in fact, is quite equal to alfalfa in that respect.

Alsike and timothy also makes a very profitable seed crop in many sections of the Northwest. This is especially true of poorly drained lands where crops of grain are grown with much uncertainty during the rainy season.

The writer has called the attention of our readers on several occasions to the profit arising from growing crops of grass seeds, especially timothy, on fields that are inclined to be wet during the spring months.

The wisdom of the suggestion is appreciated this spring by people who have their low lands seeded to the tame grasses. The addition of a quantity of alsike clover seed with timothy increases rather than decreases its selling value on almost every market.

Farmers prefer such a combination for hay or pasture and the seedman uses them in making his various pasture mixtures. When the alsike clover is ripe and dry the seed threshes out from the straw quite as well as timothy with a common grain separator.

This should be speeded high and the seed crop led into it rather slowly. In fact to do an economical job of threshing grass seeds about one-half of the crew of helpers should take a rest and enjoy seeing the others work.

If the machine is crowded waste—an expensive and needless waste—is quite sure to occur. Grass seeds will be in active demand, next spring, at good prices. Save the clover seed crop in every instance. Fodder corn will take the place of hay, but there is no substitute for clover seed.

NEW KIND OF MULE IS BREED.

Washington, D. C., June 25.—The officials of the bureau of animal industry are in high glee because of the success of their efforts to produce a hybrid with an African zebra and a native burro.

The zebra is a male, presented to President Roosevelt by King Menelik of Abyssinia. The offspring shows a slight resemblance to the zebra and has faint lines. The scientists are now puzzled for a name for the new species.

NOW IN SESSION

Continued from Page One.

year, and since this report has not consumed the time allotted by your by-laws, I am in the few minutes left, with your permission, going to suggest a thought which has been most forcibly brought to my mind in connection with the organization and purposes of the live stock exchanges, which form the foundation upon which the structure known as the National Live Stock Exchange is built.

"You, each and every one of you, know that but for the exchanges live stock shippers would be at the mercy of yard traders, scalpers and unprincipled agents and buyers of every kind and character, as they were before exchanges came into existence.

"I do not wish or intend to criticize, but I do think there has been too much secrecy in the past as to the organization we represent. There seems to be a sort of mystery about us in the minds of the public, and mystery always breeds distrust, and distrust makes enemies and is the father of such practical parasites as co-operative commission houses.

"I have unlimited faith in the fair mindedness and good judgment of the American people and I believe, when they know the truth about us and all of it, that they will give us the credit due us and place us where we belong, among the great commercial organizations of the world, for you know and I know that we are the cleanest and most unselfish of them all.

"Looking to the future, then, I say unfurl your banners, take the people into your confidence, and with the sanction of public opinion behind you, march to an assured victory and to greater achievements than were ever dreamed of by the wise old heads that framed your constitution and made your existence possible."

PROSPECTS IN ILLINOIS.

Chicago, June 25.—"We have thirty-five reports from the big corn and oats counties of Illinois," said a local house. "All counties report an exceedingly bad condition of oats and the average is 68, which does not promise over 100,000,000 bu for the state, which was the yield last year. There is little prospect of improvement in this crop, as the plant is setting out very small and rust is developing. Corn condition in the best counties in the state is 74, which suggests a crop around 300,000,000 bu. The average is about 15 per cent less than a year ago, but farmers will continue to plant until the 1st of July. There has been considerable replanting, and weeds have had a good start. The bulk of the corn is just coming up, and on the average it is as late as last year. All our correspondents in the state are in their locality, and they set the general crop outlook in the state is the worst in fifteen years. Thrashing returns from the wheat section in the lower half of Illinois show an average of four-fifths of a crop."

BREAK IN COTTON PRICES.

New York, June 25.—There was a sensational break in the price of cotton for July deliveries on the New York Cotton exchange yesterday. July and other old crop positions have been ruling relatively firm on reports that a strong New Orleans bull clique had a virtual corner in that position. After opening at 19.30 yesterday morning, July sold off to 19.02, or 28.40 per bale below the high level of last Friday. It was rumored that the New Orleans buyers had liquidated, and that the remaining long interest was trying to avoid notices of delivery next Friday. New crop positions ruled relatively steady, being only 10 to 14 points lower when the old crop showed a net loss of 7 1/2 points.

Mr. Sherman is Better.

Cleveland, O., June 25.—Congressman James S. Sherman of Utica, N. Y., Republican vice presidential candidate who was taken ill here last Sunday with a passage of gallstones while on his way home from the Chicago convention, rested most comfortably Wednesday. Drs. Edward P. Carter and Dudley P. Allen and C. W. Stone were much pleased with the progress he made Wednesday and are of the opinion that the necessity for an immediate operation has been passed. However, they advised Mr. Sherman to have the trouble removed as soon as he shall gain his normal health.

HIS CAREER ENDED

GROVER CLEVELAND, TWICE PRESIDENT OF THE UNITED STATES, IS DEAD.

HIS DEATH CAME SUDDENLY

While Mr. Cleveland Has Been Ill a Long Time His Demise at This Time Was Unexpected.

Princeton, N. J., June 25.—Grover Cleveland, twice president of the United States, died at 8:40 o'clock Wednesday morning at his home "Westland," in this quiet college town, where he had lived since his retirement as the nation's chief executive, almost 12 years ago.

When death came, which was sudden, there were in the death chamber on the second floor of the Cleveland residence, Mrs. Cleveland, Dr. Joseph D. Bryant of New York, Mr. Cleveland's family physician, and personal friend; Dr. George R. Lockwood, also of New York, and Dr. John M. Carnochan of Princeton.

An official statement given out and

EX-PRESIDENT CLEVELAND. Who Died Suddenly at His Home in Princeton, N. J., Wednesday.

signed by the three physicians, gave heart trouble, superinduced by stomach and kidney ailments of long standing, as the cause of death.

While Mr. Cleveland had been in poor health for the last two years and had lost 100 pounds in weight, his death came unexpectedly. Some three weeks ago he was brought home from Lakewood, where his condition for a time was such that the hotel at which he was staying was kept open after its regular season because he was too ill to be moved. But when Mr. Cleveland was brought back to Princeton he showed signs of improvement and actually gained five pounds in weight.

Although confined to his room continuously after his return to Princeton, it was not until Tuesday that Mr. Cleveland's condition aroused uneasiness on the part of Mrs. Cleveland. Undoubtedly affected by the heat, Mr. Cleveland showed signs of failure and Mrs. Cleveland telephoned to Dr. Bryant who came over from New York on the train, arriving here at 4:24 p. m. Dr. Lockwood followed Dr. Bryant from New York, and when they reached here Dr. Carnochan, who had been Mr. Cleveland's local physician since the former president came to Princeton, was also called in. During the evening Mr. Cleveland seemed to rally and Mrs. Cleveland, who always has been optimistic about her husband's health, felt assured that it was merely another of the many attacks Mr. Cleveland had suffered and she informed those who inquired that Mr. Cleveland's condition was not serious.

Mr. Cleveland became worse during the night and Mrs. Cleveland was called to the bedside of her husband. The distinguished patient sank into unconsciousness from which he recovered at times only to suffer a relapse. This continued throughout the night and early morning. The last time he became unconscious was about two hours before he died. Death was peaceful. Just before he died Mr. Cleveland sought to say something, but his words were inaudible.

The news of Mr. Cleveland's death came as a sudden shock to the people of Princeton, as it did to the people of the rest of the world.

The Cleveland residence stands in a beautiful spot at Bayard Lane and Hodges avenue on the northwestern outskirts of Princeton. The house, a comfortable looking 2 1/2 story structure, of colonial architecture, is well back from the two thoroughfares. It is painted white and almost hidden by stately pine trees. Here it was Mr. Cleveland's wont to read and enjoy the life of retirement.

It was not until late in the day that messages of condolence began to come in from all parts of the world, to Mrs.

Cleveland. One of the first was from President Roosevelt, who will attend the funeral which will be held on Friday afternoon and which in deference to Mrs. Cleveland's wishes will be as private as possible.

Mr. Cleveland's body will be buried in Princeton cemetery in the family plot where lies the remains of Ruth the eldest of the Cleveland children whose death was a sad blow to her father.

Mrs. Cleveland denied herself to all but a few callers. Prof. Andrew F. West, Prof. John Hibben of Princeton university and Bayard Stockton, a Princeton lawyer and a member of the famous Stockton family, were at the house all day and were in charge of all arrangements.

So unexpectedly did Mr. Cleveland's death occur that not one of his four children was at home. The children are at the Cleveland summer home at Tanworth, N. H., under the care of Mrs. Perrine, Mrs. Cleveland's mother. Word was sent to them of their father's death and the two elder started at once for Princeton. The children are Esther, aged 14; Marion, aged 12; Richard, aged 10, and Francis Grover, aged 5.

Ever since Mr. Cleveland's arrival in Princeton 11 years ago he has been a conspicuous figure in local life. Although his only official connection with Princeton university was his lectureship, known as the Stafford Little Lectureship in public affairs and his membership in the board of trustees, he was regarded as a strong friend of the institution.

Grover Cleveland was well liked among students and faculty. His last public appearance in the university was while delivering a public lecture about two years ago. On the last Friday of the college year, it has been the custom of the freshmen class or becoming sophomores to serenade him at his home. On June 5 of this year "the freshman parade" was held but owing to the former president's illness "the parade" did not serenade the Cleveland home.

Last year on this occasion Mr. Cleveland stood on the veranda of his home and spoke for a few moments to the assembled collegians.

The telegrams of condolence came in by the hundreds from all parts of the United States and other countries during the day and they continued to pour into the telegraph offices here far into the night. Besides President Roosevelt's telegram, messages of condolence came from government officials, governors, legislators, prominent educators and citizens in various parts of the world.

Very few of them, however, were read by Mrs. Cleveland who decided not to attempt to learn of their contents until she has recovered from the shock caused by her husband's death.

It was announced Wednesday night that the hour for the funeral on Friday had been fixed at 5 p. m. None of the other funeral arrangements have been definitely decided upon and probably will not be made public until Thursday.

New Jersey was the state which gave Grover Cleveland birth. His father, the Rev. Richard Cleveland, a Connecticut Yankee, had married Ann Neal, the daughter of an Irish bookseller and a German Quakeress. Four children had been born to them when the Rev. Mr. Cleveland was assigned to the Presbyterian pastorate in Caldwell, Essex county, N. J. There, March 18, 1837, was born the fifth of their nine children. In honor of the pastor who had preceded him, the Rev. Mr. Cleveland called his new son Stephen Grover, a name which its possessor shortened in after years by dropping the Stephen.

At the age of 14 Grover got his first job. He was employed by a groceryman, and his salary reached a grand total of \$50 a year. At the age of 17 he went to Buffalo, N. Y., and entered a law office, and drifting into politics was nominated by the Democrats for district attorney of Erie county and was defeated. In 1870 he was nominated for sheriff of Erie county and was elected. Following this in 1882 he was elected mayor of Buffalo. Six months after he became mayor he was elected governor of New York by a phenomenal majority. Four years later he was the nominee of his party for president. Against him was James G. Blaine. The campaign was a bitter one and resulted in the election of Mr. Cleveland. The vote in New York, the pivotal state, was very close. Mr. Cleveland's plurality being but 1,149. In 1888 Mr. Cleveland was renominated for president, Benjamin Harrison being the Republican nominee. Mr. Harrison was successful. In 1892 the same gentlemen were again candidates for the presidency. This time Mr. Cleveland received a majority of the electoral vote. Retiring from the White House at the end of his second term he has lived peacefully and quietly at his home in Princeton, N. J.

New Mutual Trustees. New York, June 25.—Edwin S. Marston, president of the Farmers Loan & Trust company of this city, Wayne MacVeagh of Philadelphia and James D. Beck, former assistant United States attorney-general, were elected trustees Wednesday of the Mutual Life Insurance company of New York.

He Likes the Job. Milwaukee, June 25.—United States Senator Stephen W. Wisconsin, who was elected by the last legislature to fill the unexpired term of Senator John C. Spooner, who resigned, Wednesday night issued a statement in which he announced himself a candidate for re-election.

IOWA REPUBLICANS MEET

ALL WAS SERENE AT STATE CONVENTION IN WATERLOO.

Promise Loyal Support to National Ticket—A Cleveland Resolution Adopted.

Waterloo, Ia., June 25.—While "Progressives" were in control of Wednesday's Republican state convention, they did not bear down with any undue rigor on the "stand-patters." They adopted a state platform giving enthusiastic endorsement to Gov. Cummins and the progressive legislation upon railroad and corporations questions, but they also gave warm endorsement to the services of the Iowa delegation in congress and especially to Senator William B. Allison and a pledge for his re-election by the next legislature. The "progressives" secured control of the new state campaign committee, controlling it by a majority of one.

The convention nominated Judges Scott M. Ladd and Silas M. Weaver to succeed themselves on the supreme bench, and also went through the formality of approving the nominations for state officers made in recent primaries.

The convention gave loud applause to the mention of the name of Senator William B. Allison and Senator Doherty, and it gave a demonstration of some minutes when Gov. Cummins responded to calls for a short speech. Gov. Cummins spoke in good spirit and pledged himself to work for Republican success.

The platform adopted in addition to commanding legislation for two-cent fares, abolition of railway passes, prohibiting corporation contributions to campaign funds and compelling publicity for campaign expenditures, pledges loyal support to Taft and Sherman, national nominees, and the national platform.

And is Ever a Factor in Life. Latin proverb: Malice supplies the want of age.

TALLOW, FURS, PELTS, WOOL, HIDES

THE hide market is active and we advance our prices this week on short haired stock. There is a little better feeling on eastern markets, however, the advance we are able to offer for hides today is largely due to the improved condition and quality. Tanners are still very reluctant buyers of long haired grubby stock, preferring to pay a premium for better hides, so we are obliged to quote separate prices on account of a good many lots of long haired hides being held through the country. We shall be pleased to receive your shipments of anything in our line.

Table with columns for Green Cured Hides, Dry Hides, and Wool. Lists various types of hides and wool with their respective prices.

Send sample, get our prices. We also handle wool on commission. We have a large store house at St. Joseph; you can ship us your wool to be sold on commission and we will look after your interests to the best of our ability. Charges for storing and selling 1c per pound.

JAMES C. SMITH & CO.

Second and Edmond Sts., St. Joseph, Mo. - Bell Telephone 995.

AMONG all the builders of this Nation none deserve more lasting gratitude than this stout old Quaker Champion.

Irish and English prisons could not conquer his spirit, and from a cell in the tower of London he conceived the idea of founding beyond the seas a state wherein Brotherly Love—Peace On Earth and Personal Liberty might become living facts. Thus Pennsylvania was founded.

When colonial governor he introduced vine-growing and brewing, and at Pennbury Manor he had a brew house.

Above middle height—well built and agile—William Penn in his early days was an expert swordsman, a courageous soldier, and a splendid athlete.

He died at 74, and the results of his life's doings bear eloquent witness that the moderate use of a good malt beer helps to create the noblest qualities of mind and soul.

His statue stands in Philadelphia, 547 feet high—for all the world to see.
