IMPORTING MEXICAN CATTLE.
Cattlemen of the southwest are divided in their views on the proposition to let down the bars for the free admission of cattle from the trans-Rio Grande country, and are cross with government regulations on some other matters.

tion. But the government does not stop at ante-mortem inspection. These same animals that have been inspected and passed before slaughter are again inspected after they have had the hammer and knife applied to them, and the final inspection figures stand 42,428 whole carcasses and 122,167 parts of carcasses of cattle condemned; 52,439 carcasses and 124,829 parts of carcasses of hogs condemned; 11,127 carcasses and 21,714 parts of carcasses of sheep condemned during the year. There were 105,992 whole carcasses of animals and 873,710 parts of carcasses condemned during the year in the 919 abattoirs in this country that do an interstate business and have government inspection.

IN WOMAN'S REALM

COLONIAL RUGS
Hours of time can be saved in sewing out for colonial rugs by taking worn sheets or other oblong strips and stitching the ends together with a double machine stitching before tearing. Being careful to first misstate the width. That is, slide one end to right or left of the other, so that it will be one inch as the side where we are to begin to tear. This end will then, of course, extend one inch too far at the other side.

ORIGINAL RECIPES.
Baked Cranberries—One quart of cranberries, two cups of water, three cups of white sugar. Bake one hour. They are very nice and look like cherries when done. Near that steved ones, as the peelings are very tender.

INSPECTION OF MEATS.
Twenty years ago American meats were assailed by some European countries that had certain goods to sell and wanted free entry into the markets of the United States.

English Beef Pudding—Three one-half pounds of beef, one quart of flour, two teaspoonfuls of baking powder, one-half teaspoonful of salt, one and three-fourths cups of milk and water. Cut the meat in pieces about one inch square. Put the meat through the food chopper and mix it with the flour, with which the baking powder and salt has been sifted; add the liquids, roll the dough to about one inch in thickness, having it round in shape. Lay it on the pudding cloth, which has been wrung from boiling water and dredged with flour to prevent the pudding from sticking.

Nippy Cheese—To one cup of grated dry American cheese add one tablespoon butter, generous dash of cayenne, and salt to taste. Work to a smooth paste and add one teaspoon cream. Put into tiny glasses and keep in cold place until used. This is a good way to use up bits of dry cheese of any kind, such as Requefort, Swiss, etc.

SANDPAPER HELPS.
Remove Warts—Sandpaper will remove warts, even the big seeded one. Rub the wart with sandpaper till they begin to feel tender. Then rub well with sweet oil, and it will disappear as if by magic.

Corn Hint—For corn and callous places on the feet rub at night with sandpaper and then with vaseline.

Brad's 4300 Namoth February Clearing Sale

Begins Today and Lasts All During February
Remarkable Bargains in Rugs

\$25,000 in Surplus Stock must be sold this month. Four weeks of the most wonderful bargain offerings ever recorded in the rug business. BIRTH REGISTRATION.

San Francisco's Effort Toward Prevention of Infantile Mortality.
Washington, D. C., Feb. 1.—An interesting statement regarding the establishment by the Census Bureau of a provisional birth registration area in the United States, for the purpose of compiling statistics enabling the scientific study and prevention of infantile mortality, has been submitted to the Census Bureau by Dr. Cressy L. Wilbur, chief statistician for vital statistics in the Census Bureau, who is directing the work.

SUPERSTITIONS OF SNEEZING

It Was a Thing of Ill-Omen Until the Time of Jacob, Say the Jewish Rabbis.
Many superstitions have gathered around the practice of sneezing. The Jewish rabbis say that in the first ages of the world sneezing was considered a thing of ill omen, and even a presage of death, and that this terrible state of things lasted until the coming of Jacob, when that astute patriarch, anxious lest he should himself perish from such an insignificant cause, besought the Almighty to endow sneezing in future with more beneficent attributes.

LIVING BECOMES A HABIT

For Those Who Reach Maturity and Form Many Ties, Dying is No Easy Matter.
Living, like other acts often repeated, grows upon us. It is not the child, it is not the youth, even, who is bound to life. That was a very rare instance of the little boy who, rescued from a runaway accident with his mother, turned to her and said: 'Oh, mother! Wasn't it a good thing I was saved! It wouldn't have mattered so much for you if you had died, because you're old. But I am so young; it would have been awful for me to die.' As a rule, the young child takes life and death together all as a matter of course, and there is rarely any fear in a child's mind of the hereafter, unless it has been sown there by injudicious reading.

NEW PLANT TO COST \$750,000.

St. Paul, Minn.—Expert engineers, representing Stone & Webster of Boston, have arrived in Minneapolis and after an inspection of the ruins of the station of the Minneapolis General Electric Company, announced that a new station, of steel and concrete will be erected at a cost of \$750,000. Accompanying the engineers, R. A. Phillips and Walter Goodenough, was C. Y. Ferris, who represents the Boston company, which owns the Minneapolis concern. According to the engineers, the company has already outlined the plans for a series of new substations to take care of each part of the city.

LAND SALE OF EL PASO.

El Paso, Tex.—For a consideration of \$75,000, the El Paso Dairy Company has transferred to A. G. Foster, J. A. Smith and M. L. Cadwallader, 211 1/2 acres of land situated several miles east of this city. The average price per acre amounted to approximately \$235. The land consists of four tracts consisting of 115, 48.8 3/4 and 55 acres, situated in the Yates and Amarillo grants. Foster and Smith are both holders in the El Paso Dairy Company and have been identified with the company for several years.

HEIRLESS PLANS INVESTMENT.

A girl who inherited a snug little fortune of twelve thousand dollars has been rather cramped financially all her life, and she had always longed for the luxuries and frivolities of existence. Her uncle came to talk the matter over and advise her as to the investment of her little fortune. 'Now, my dear,' said he, in the tone of a genial but prudent counselor, 'of course you have made some plans—have some idea of how this is to be invested? What yearly income do you expect from your twelve thousand dollars?' Then the young woman replied: 'I expect, dear uncle, to invest my money so that I shall have a yearly income of twenty-four thousand dollars for six months.'

FARMERS!

Send Us Your Cattle, Horse and Other Hides to Be Tanned.

DISCOVER VALUE OF CITY GARBAGE

MISSOURI WATERWAY COMMISSION SAYS PEOPLE OVERLOOK ASSET.

EUROPE UTILIZES WASTE

Germany and France Look to Garbage of Cities as Sole Source of Fertilizing Raw Materials—What Might Be Done in This Country.

"American Waste" is such a common subject in these days of economy and conservative agitation that it requires a leak of more than ordinary size to attract the attention of the average American citizen.

The statistics gathered during the recent five years at Berlin, Hamburg and Bremen, and other large cities of Germany, show that the garbage nets these municipalities \$9.00 per head for all cities of one hundred thousand population or more.

In America the amount of garbage may be said safely to be twice as large per capita as that of European cities. It is an old proverb that two European families can live well on what is wasted by one American family, hence the value of garbage in the larger cities of this country should be far greater per capita than in European cities.

HARD RAINS NOW LOSS TO FARMERS

A GREAT CHANGE IN AGRICULTURAL LANDS.

Deforestation Prevents Soil From Retaining Excess Moisture—Results in Destructive Freshets. In the report of the Missouri Waterway commission, which has been submitted to the state legislature, the attention of our senators has been called to the great change which has taken place in the effect of water upon some of the agricultural lands of this state.

The reason for it has been discovered and a remedy advocated by the Commission. When the hillsides and slopes were covered with trees and heavy grass, the hard rains merely soaked into the soil, being readily retained by the spongy duff and held for future use.

Now hillsides and slopes are not covered with trees nor with heavy grass. Prodigal methods of husbandry have denuded hills and prairies alike of the protection formerly afforded by nature.

TO TALK ACROSS OCEAN

Transatlantic Communication by Telephone is Promise of Near Future.

Transatlantic communication by telephone is a promise of the near future. If the new cable just laid between Dover and Cape Gris Nes, to increase the facility of telephonic communication between England and France, performs the wonders expected of it, some of the difficulties to be overcome in talking across, or under, the Atlantic ocean will be removed.

It is not conceivable that ocean telephoning will ever be cheap. To talk between Europe and America will likely be an expensive luxury, but there will be occasions when the opportunity to do so will be eagerly seized, no matter what it costs.

CEMENT FROM FURNACE SLAG

Tests on Concrete Blocks Show Good Resistance to Compressive Stresses.

In reply to American inquiries concerning cement from blast-furnace slag, United States Consul General John L. Griffiths of London, who had previously reported upon the matter, furnishes the following statement from a consulting chemist with whom he corresponded:

A Family's School Attendance Record.

Few families can boast of the school attendance record of the four children of J. R. Dannatt, assistant overseer of Newchurch, Isle of Wight, who have been connected with the local school for 17 years.

They have attended for an aggregate of thirty-two years and one month without missing a single attendance. The record is as follows: Harry Dannatt, five years and five months; Charlie, ten years and five months; Nellie, seven years and ten months; and Ada, eight years and five months.

Spirit Drops in on Friend. Mr. Andrew Lang, the eminent essayist and critic, relates a curious circumstance which recently happened in a little Scottish town. A man was dying, when he suddenly said, as if recognizing some person, "Eh, ye'll be frae the Whey Pat?"

Mrs. Hewlett an Aviator. Mrs. Maurice Hewlett, wife of the author, is a partner in an aviation school in Brooklands. Her husband says that he is interested in aviation, but has not had time for it, but thinks it good work for women. It does not require great strength and as it is work in the open air must prove beneficial to most women.

PARADISE FOR BRUIN

Abundance of Food Has Made Bears Very Tame

Grizzlies, Young and Old, Form Peace Pact With Surveying Party and Become Exceedingly Friendly—No Sport to Kill Them.

Nome, Alaska—A grizzlies' paradise par excellence has been located in a great berry patch along the international boundary line between the Dominion and Alaska, about thirty miles inland from Taku Arm. The bears are of the species known as the Alaska brown. They range in size from cubs of two feet from muzzle to tall to aged monsters ten feet long.

This was the remarkable story related in all seriousness by H. S. Russell of Ottawa, who recently arrived here. He has been engaged in boundary survey work since 1904. His experience last summer was unique.

"That is the greatest bear country in existence. I never saw anything to equal it, even on the Stikine river, where I put in several seasons," said Mr. Russell in relating various incidents of the season's work. "We soon realized that the animals, thanks to an abundant food supply, were disposed to be friendly. They never attempted to molest us from the very start, and they soon inaugurated a series of daily visits to the camp. They were a little shy at first, but the smell of frying bacon proved irresistible. At last they would approach within twenty yards, sometimes half a dozen at a time, and stand on their hind legs to grab at the feed we threw them.

"The animals finally undertook to visit the camp at night to forage for themselves. This we did not like, as we feared they might stray into our sleeping tents. However, I must say, they respected our privacy, and the meat supplies were cached out of sight. It was not uncommon to meet them on the trail up to a glacier where we were engaged in triangulation work. We usually gave them the right of way. Once Jack Sheppard of Nanaimo, one of my assistants, met four big brown bears three miles from camp. Jack must have been in bad humor that day or else he feared an attack, for he leveled his rifle and blazed away. He killed three, and the other monster, mortally wounded, managed to escape. After that the bears did not visit our camp so often."

Mr. Russell described the country as the roughest region he had ever visited. It is a vast series of high peaks, covered with glaciers or eternal snows. It was impossible to plant boundary pillars, and the triangulation work and photographs will form the record of the location of the boundary in that locality. In all, about four hundred square miles of the territory was covered.

MAKING SOAP IN JERUSALEM

Next to the Tourist Traffic Industry is Best Money Getter—1909 Season Poor One.

Rome.—The most important industry in Jerusalem at present is soap making. In fact, the only other industry of note is the manufacture of so-called "religious articles." This is carried on both in Jerusalem and in Bethlehem, but there was a marked decline last year in the value and quantity of such articles.

Court Under Apple Tree. Yardley, Pa.—Justice of the Peace Robinson of this place tied his horse and milk wagon to an apple tree on the outskirts of the borough, and declaring court in session, effected a reconciliation between Mr. and Mrs. John Jones of this place, who were on their way to the office of the justice when they came upon the guardian of the peace serving his milk route.
