The Labor party is in favor of the proposed roads being put in hand as soon as possible.

SEAL CATCH IS DIMINISHING

Instead of 50,000 Skins Annually Yield in Behring Sea Does Not Exceed More Than 4,000.

St. Petersburg.—In accepting the American proposal to hold a seal fishery conference in Washington...

Whereas, formerly 30,000 to 50,000 skins were obtained annually, the present yield does not exceed 4,000.

The conclusion arrived at is that unless some measures are taken to stop a pelagic sealing it would be best to kill off the whole herd.

STOCKS OF PROVISIONS.

The following shows the stocks of provisions in South St. Joseph at close of business May 31, 1911, as officially reported to The Stock Yards Daily Journal:

Table with columns for various types of meat (Mess pork, P. S. lard, etc.) and their quantities for different years (1911, 1910, 1909).

LIVE HOGS.

Table showing live hog receipts for various months from 1905 to 1911, including total weight and number of hogs.

Live Stock Receipts.

The following shows the receipts of live stock by months at the South St. Joseph Stock Yards for the years 1905, 1906, 1907, 1908, 1909, 1910 and 1911.

Table showing monthly live stock receipts for CATTLE and HOGS from 1905 to 1911.

HORSES AND MULES

Table showing monthly horse and mule receipts from 1905 to 1911.

DIARRHOEA IN FOWLS.

Fort Collins, Colo.—The Veterinary Section of the Colorado Agricultural Station has been experimenting with different remedial agents with the view of finding some drug that would at least curtail the mortality losses among barnyard fowls from the various forms of diarrhoea.

Space will permit the discussion of only one agent. The one that has thus far given the most promising results is the Sulpho-carbolates compound, prepared by the Abbott Alkaloidal Co., of Chicago.

One flock consisted of sixty birds. Several were sick at the time treatment commenced and four had died. The discharge from the bowels was of a greenish-yellow color, somewhat simulating fowl cholera. One thirty-grain tablet was dissolved in a quart of water and this fluid mixed with bran and corn chop. The mixture was then fed in clean troughs.

Another flock consisted of 175 baby chicks. As several of these birds were taken from the incubator, they were fed the unhatched eggs that had been cooked and chopped. This mixture was reported to possess an offensive odor. The birds began dying with symptoms of diarrhoea, white pasty vent, weak, dull, droopy wings, etc.

Still another flock consisted of 200 birds, including a few turkeys. Cholera had appeared on the premises the fall before. The outbreak was studied in the field and laboratory. The germ (B. Aylepticus) was isolated. In the last outbreak 14 birds had died and several were sick. Similar treatment was used as in the above flocks, except that powder was used instead of the compressed tablets. One table-

spoon, rounding full, was dissolved in each two gallons of water. This water was kept constantly before them. No more birds were taken sick and no more died after the sixth day.

The above is a good illustration of three types of diarrhoea in which we have found this drug by far the best agent tried.

The poultry people will probably be able to secure this drug through their local veterinarian or druggist. We have not investigated the commercial side of it.—B. F. Kaupp.

TO RECLAIM 26,000 ACRES.

Shawnee, Okla.—Work will begin at once in straightening the channel of Little River, which extends across Pottawatomie county. It is estimated that 26,000 acres of land now practically worthless because of flooded conditions will be thrown open to cultivation. The cost will be \$250,000.

Work was halted for a time pending the outcome of a bill in Congress, which would authorize the appropriation of money to pay the Indian share of the work. Indian lands in Pottawatomie county are exempt from taxation under the terms of a twenty-five year treaty with the Federal Government.

TEAS OIL COMPANY GROWS. Galveston, Tex.—With a view of overhauling the Security Oil Company the Southern Texas company and perhaps other oil properties known to be Standard Oil Company branches, the Texas company, of which John W. Gates is president, announces an increase in capital stock of \$1,000,000, or from \$35,000,000 to \$36,000,000. With the acquisition of the additional refineries by the aGtes concern, it will have seven oil refineries under its control. It will also acquire twenty more miles of oil pipe line, making a total of 600 miles and the output of about fifty wells in Texas and Oklahoma.

Germany's efforts to levy tolls on the navigation of the Rhine is giving the Hollanders some concern.

NO WORLD'S FAIR FOR PARIS

Uncertainty of Labor Conditions Prevents International Exhibition in France in 1920.

Paris.—Paris is not to have an international exhibition in 1920. So ruled the county council recently. The council did not give any explanation of its decision, but it is an open secret that the real motive is that given by the Paris chamber of commerce, which, when officially asked for its opinion on the subject, rejected the proposal to hold another world's fair at the capital.

Plainly speaking, the rejection by the chamber of commerce and county council amounts to nothing less than tribute to the growing power of the labor organizations. The president of the chamber of commerce, in whose name the report was issued at the beginning of the week, says that since the last exhibition conditions governing the execution of great public works have undergone changes which must be taken into consideration in estimating whether or not another exhibition is practicable.

It is the common experience in Paris, he says, to see laborers in general and navvies in particular, suddenly stop work with the result that contractors can neither tell how much a job will cost nor how long they may be kept waiting before it is finished. This state of uncertainty is so pronounced that employers of labor, whose co-operation would be indispensable, are unanimous in stating that they could not undertake to have any building or grounds ready at any given date.

The fact that the chamber of commerce omitted in its report even mention of any other of the numerous arguments which have been brought to bear against the scheme, such as the excessive afflux of capital to Paris to the detriment of the provinces, the giving away of French ideas to foreign imitators, is in itself sufficient illustration of the despotic power exercised by the labor party in France against all other classes of citizens.

OPEN AIR SCHOOLS INCREASE

Sixty-Five Places Instituted for Children Afflicted With Tuberculosis Since January, 1907.

New York.—Since January 1, 1907, 65 open air schools for children afflicted with or predisposed to tuberculosis have been established in 28 cities, according to an announcement made in a bulletin issued recently by the National Association for the Study and Prevention of Tuberculosis.

The first open air school in the United States was established in January 1, 1907, by the board of education of Providence, R. I., at the instance of Dr. Ellen A. Stone. The next school was established in May of the same year at Pittsburg, a third one at Boston in July, 1908, and the fourth at Bellevue hospital in New York in December, 1908. During the year 1909 ten schools in five different cities were opened; in 1910, 16 schools in 12 cities were opened; and eight schools in five cities have been opened to April 1, 1911, while definite provision has been made for 27 more schools in six cities. Many cities are considering the question and will act during the coming year.

New York city now has in operation 12 open air schools and classes, and definite provision has been made for 14 similar classes to be opened by next fall. Boston has five open air classes in its schools, and Chicago also has several.

According to reports received by the National Association, the result of the open air class work has been to restore most of the children to normal health and efficiency. One of these open air schools or classes should be established for each 25,000 population, especially in cities.

"RAH-RAH" BOYS AFTER JOBS

Eastern Colleges Inquire About Prospects for Work in Kansas Wheat During Coming Summer.

Topeka, Kan.—Eastern "rah-rah" boys, to the number of about 100, are inquiring about the prospects of jobs in the Kansas wheat harvests this summer of Charles Harris, director of the state free employment bureau. The majority of the inquiries are from colleges in Delaware, Pennsylvania, North Carolina and South Carolina.

The college boy has a very high rating as a wheat harvester. Kansas farmers say that the chap with the turned up peg-topped pantaloons and the "go-to-Gehenna" hat is a topnotcher as a laborer in the fields.

Every season letters come into the free employment bureau from big wheat men asking especially for college boys, and fine are the compliments which these farmers pay the lads.

Many Cigars to Smoke.

New York.—Members of the faculty of Columbia university are unable to determine what disposition shall be made of 60,000 monogrammed cigars, said to be worth from \$20,000 to \$30,000, left by the will of the late George Crocker, together with a sum exceeding \$1,000,000. If the lawyers find they do not come under the classification of "household goods and furnishings," they cannot be sold.

Refuse to Wed: Win \$30,000.

New York.—Three girls of New Haven, Conn., Misses Belle, Henrietta and Marlon Feuchtwangler, will receive \$10,000 each from the estate of their uncle, Meyer Feuchtwangler, for not marrying during his lifetime.

AND FARMER LOST HIS BET

How Maryland Countryman Proved That He Was Not Uglyest Lad in State.

One of the favorite stories told by the farmers who sell their produce outside Center Market concerns two farmer brothers from somewhere up in Maryland, who are said to be so ugly that whenever they want the wagon backed all they have to do is to stand in front of the team and laugh.

EVERYONE WANTS TO TRAVEL

Various Motives That Actuate Different People to Roam About the Wide World.

Travel is a popular mania which impels the victim to seek the solace of crowds, jams, ruins, smells, masterpieces, glaciers and donkey boys in preference to home, creditors or conscience.

Don't Stunt Pigs with Corn

Corn alone makes fat and chunky pigs because it does not supply enough Protein and Phosphates for rapid, healthy growth with strong Bone and Muscle. Stunted pigs will never swell your bank account. Good corn should always be the basis for hog rations in the Corn Belt combined with

Swift's Digester Tankage

(60 per cent Protein)

Start the pigs with a little Tankage, gradually increasing to one-half pound a day for each pig. Feed the Tankage with Cornmeal, wet or dry, and your pigs will gain one-third more than neighbor's pigs on corn and grass.
