COWS, BULLS AND MIXED. The receipts of butcher grades were extremely light today as usual on Friday and all offerings were taken up at steady prices. Bulls and calves were steady as compared with yes
and helfers strong; stockers dull; calves steady.

Hogs—Receipts, 9000. Market \$5.75 @ 6.30.

Sheep—Receipts, 5000. Market

continued to go higher all the week and prospects are good as long as the outside competition continues. Outside buyers have established a stronger undertone to the trading and brisk competition has prevailed brisk competition has prevailed throughout the week's session. There throughout the week's session. There has been a preference shown to the dressed beef grades of cows and the better classes of helfer stock. These sheep—Receipts, 4600. Market 10@ better classes of heifer stock. These kinds are quotable from 15@25c higher than the closing of the previous week. Camers are not much more than steady, while some of the best cutters are 10@15c higher. Choice mixed yearling heifers and steers have been scarce all week and have been in good demand at higher prices. Some of this kind if choice would sell around \$7.00 or better. Western cows and heifers have been in small quantities this week. What few that have made an appearance are quoted higher in sympathy with other classes of the stock. There has been a fairly liberal showing of bulls and are quotable steady to 10 cents higher, the best gardes beying the preference best gardes having the preference. Calf receipts were light all week and prices are showing from 25@50c advance over the closing days of last week. Light calves are quoted 50c higher, while heavies and mediums

higher, while heavies and mediums are strong to 25 cents up.

The following quotations are current on the local market:

Good to choice cows, \$4.50@5.60; fair to good cows, \$3.75@4.50; canners and cutters, \$2.65@3.70; choice to prime heifers, \$6.00@7.00; good to choice heifers, \$4.00@4.75; common to good heifers, \$4.00@4.75; common to medium heifers, \$3.50@4.00; fair to good heifers, \$4.50@5.50; fair to good bulls, \$4.50@5.50; fair to good hulls, \$4.00@4.50; common to medium bulls, \$4.00@4.50; common to medium bulls, \$3.00@4.50; common to medium bulls, \$3.00@4.00; veal calves, \$7.00@ 7.50; medium calves, \$4.75@6.25; common and heavy calves, \$3.00@ 4.50.

320..4 STOCKERS AND FEEDERS.

Little or no change in prices attended the disposal of today's meager supply of stock and finishing cattle. Best offerings were limited to a small assortment of odds and ends, which sold readily at steady prices on the basis of the week's advance.

Supplies of stock and feeder cattle

received at this point through the current six day session has been cut down materially as compared with the run received for the previous week; in fact dealers say that the amount of As usual for Friday there was a very light supply of cattle offered for buyers' inspection here today. Total arrivals fell a little short of 300 head and not enough fat steers were included to test the market. The few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked up early, however, at the few late were plaked through the week will go on record as one of the small-est of the year. Little fluctuation in prices has attended the disposal of the meager supplies from day to day, although by virtue of the light supplies salesmen have worked the general price list to around a 15c to a quarter higher as compared with last Friday.

MISSOURI AT FORDING STAGE

Cities Warned That Danger Lurks in Low Water.

50 feet. The unusually low stage is a boon to contractors on Government improvement work, however, enabling them to rush work on the jobs at twice the usual rate and thereby increasing their profits without the lighten the burdens of wash day for risk of loss when the river is at its

risk of loss when the river is at its usual stage.

To the cities along its banks, however, the low stage of the river is a danger, because practically all of them take their water supply from it and empty their sewage into it. In ordinary stages, when the water is oily, carrying sand and silt in suspension, it purifies itself but when it is considerate of mother and willing and sion, it purifies itself, but when it is considerate of mother and willing and low it clears and carries the sewage in able to help her in time of need, life's suspension. For this reason health of-ficers in all the cities, fearing typhoid, are warning the people to boil the wa

CLASSED WITH THEATERS.

And So Texas Will Have No Sunday

Moving Picture Shows. San Antonio, Texas, Dec. 8 .- In an opinion just handed down by the Texas Court of Criminal Appeals, moving picture shows are classed with theatres and included among the places of public amusement prohibited by the law on Sundays. This is the opinion of Judges A. J. Harper and A. C. Prendergast, a majority of the court, but Presiding Judge W. L. Davidson dissents from this view and says: "No one ever heard a moving picture show called a theater and if they did their called a theater and if they did their senses certainly deceived them if they thought when viewing a moving picture exhibition they were witnessing a theatrical performance."

"Although the season was most unfavorable for crops in portions of Kan-

Dearborn Man, Butchering Hogs,
Thrown Into Bolling Water.

Dearborn, Mo., Dec. 7.—While butchering hogs B. M. Ferril was hurled across a vat of scalding hot water when A hook with which he was turning a huge hog that was being scaled gave way from its hold on the hog. His right arm was pinioned under the hog in the scalding water and the flesh was literally cooked. A brother who was aiding him at the time succeeded in rolling the dead animal from off Ferril's body and arm and pulled him out of the vat. His condition is rather critical as the result of the scalding.

Interthod of farming doubtless have had a not unprosperous year.

"Many have found their faith in the sorghums as dry weather crops well justified, and this year's statistics show a gain in sorghum acreage of more than 47 per cent, making the total by far the largest yet planted. Kansas farmers, generally, would do well to give consideration to the sorghums was phenomenally increased. Kaffir corn is the chief of these and its 919,046 acres this year is 299,238 acres or 48 per cent more than last year, and by far the largest yet recorded."

tillery cattle are running next sum- portant agents in the country uplift. So Says F. L. Gooding, Discussing mer the market will fail to vindicate Buy the teacher all the equipment

we fall into disagreement. The rea- of shape, and you will get efficiency. son for this is that very few people know anything about the fundamental WHAT OUR RIVERS CARRY principles of road making, and very few are willing to admit that they do not know. There are two things which the average western man thinks he understands; one is how to judge a horse, and the other how to make a road; and we will not get very far with our road problem until we are willing to admit that we do not know very much about road-making, and that the only way to stop our enormous waste of money is to let it be spent by people who do know something about how to make good roads. In an address delivered before the Good Roads Congress, held at Chicago in September, Mr. J. W. Gilson suggested that we ought to inaugurate some system which will provide for the future carry on the work of making roads. He would have simple text-books prepared on practical good road construction and teach the boys before they reach the age when they "know it all." In addition, he would with the average western man thinks he understands; one is how to judge a horse, and the other how to make a road; and we will not get very far with our road eight and the other how to make a road; and we will not get very far with our road problem until we are the dissolved substances in the water include 4,550,000 tons of sodium chloride, or common salt; 2,740,000 tons of gypsum; of Glauber's salts; 1,090,000 tons of gypsum; of all the spent tariff according to Mr. Good-maked the water include 4,550,000 tons of gypsum; of Glauber's salts; 1,090,000 tons of gypsum; 1,000,000 tons of Epsom salts. In spite of all this dissolved anterials the Colorado at its mouth is not considered to be a stream of unusually like and to construction of the country. The reason is that the country of the country. The reason is that the country of the co

country life. If he or she is not interested in country life. If he or she is not interested in the rural uplift that is going on everywhere, the greatest success of incidental interest presented by Water-Supply Paper 274 of the

The Clever Dog

Who Has a Paper Route

HAT would you children think of having our newspaper left at the house every day by a jolly big dog instead of by a man?" HAT would you children think of having our newspaper left at asked daddy "It would be fine," answered Jack and Evelyn.

"Well, if we lived in the Greenwich village part of New York city, we might," said daddy. "There is a clever shepherd dog there that belongs to a family named Welch. Mr. Welch is an invalid and a cripple, and Mrs. Welch keeps a little store to help make a living. She also sells newspapers, and some of these must be left at the buyers' houses every day

"Beauty, as the Welches' dog is named, is Mrs. Welch's chief helper with the papers. Beauty's work begins at 5:30 every morning as soon as she has had her breakfast. She carries the papers to the neighbors

"Mrs. Weich hands the dog a paper and speaks the name of the customer. Then Beauty takes the paper between her teeth and trots off. When she has left her paper at the right house the dog rushes back for another copy. Beauty gets over her route very briskly.

"Besides Beauty, Mrs. Weich has a boy who delivers papers. If Beauty is not busy when the boy starts out with his newspapers the dog will jump up customers. On the way home, when all the papers are gone, the dog and the

"Mrs. Welch, who is very proud and fond of her dog, says that Beauty has never been taught to do all these clever things. She does them of her own ac-

"Three years ago the dog was sent to the Weiches by a friend who lived in the country. The very first morning when Mrs. Welch started out to leave ome papers at neighboring houses Beauty went with her

'The dog begged for a paper, and to try her Mrs. Welch held it out. The dog grasped it between her teeth, and when Mrs. Welch pointed to a house the dog darted away and dropped the paper at the door. Mrs. Welch tried her with another paper at the next house. By and by Beauty learned that each different name meant a peper was to be left at a certain house. Now she can start out from the store and deliver a paper if she is told the name of the person for whom it is meant.

she does her tasks so cheerfully that she is a lesson to those of us who are not so fond of work as we should be. You know what the Bible says, 'Go to the ant, thou sluggard, and learn of him.' It seems to me that sometimes we might as justly say, 'Go to the dogs and learn of them.' "

Dissolved Chemicals,

road construction and teach the boys before they reach the age when they "know it all." In addition, he would have the various state legislatures pass laws compelling instruction in road making for all who have anything to do with the making of the roads.

A SQUARE DEAL FOR BOYS.

Country boys are not getting a square deal in the average country neighborhood, says the Kansas Industrialist. The educational advantages of the area drained. The discharge of salt from the Colorado is equal to 20 tons annually to each square mile drained by the river, but the salt in Elm Fork of Red River is equal to 1,680 tons per square mile of area drained. The same river discharges annually 177,000 tons of magnetic magnetic

neighborhood, says the Kansas Industrialist. The educational advantages of most rural schools are not up to the proper standard. It is up to the concrete-hearted taxpayers, that fail to vote enough money to support a good school, to reform. You can't have an efficient school unless the teacher also is efficient. You must Day a good salary to get efficiency.

Get a teacher that is interested in country life. If he or she is not inter
Belle Fourche River, at Belle Fourche River, at Belle Fourche, S. Dak., discharges 191,000 tons of Glauber's salts, and 236,000 tons of Epsom saits, and 236,000 tons of Epsom saits. The mud and silt carried in suspension by this river amount to 1.100,000 tons. Milk river at Harve, Mont., discharges annually 41,000 tons of soda; Payette river, in Idaho, discharges 46,000 tons; Sait river at Roosevelt, Ariz., discharges 288,000 tons of sait and 170,000 tons of Epsom saits, and the Rio Grande discharges 288,000 tons of lime and 368,000 tons of lime and 368,000 tons of Glauber's salts.

THE ROAD PROBLEM.

Solutions of our western road probtools. No teacher can get the best retools. No teacher can get the best retools and worn-out dustry has not been prosperous, for during this period, agitation as to Stewart & Co., rooms 226-28. Solutions of our western road problems are about as numerous as the people who offer them, says Wallace's Farmer. Most thoughtful people now see the importance of tackling the problem in some systematic way, but whenever some one way is suggested, we fall into disagreement. The reasonable of shape, and you will get efficiency.

by a discussion of the proposed tariff revision on wool. The revision will be

characteristic hospitality, which has made the western city popular with national conventions. Theatre parties receptions, and other affairs are arranged, which will break the monotony of set speeches. All doors will open to the visitors and they will have the times of their lives during their stay in the western metropolis.

DYNAMITE TO GROW WHEAT

Ground Is Loosened With Explosive as Demonstration,

Davis, Cat., Dec. 6.-The use dynamite to loosen the subsoil in land that has been continuously sowed with grain will be given a test on the university farm here. Representatives of a powder company have demonstrated the use of the explosive on a half acre piece west of the water tower. The charges of one-half and some whole sticks were set nine feet apart. Some were set off simply and some by electricity. This half acre and the other part of the field will be sowed to wheat and the results watched close-ly to see if the given expense in breakng the subsoil will be paid for by ineased yields in grain

The work was watched with interest by the men in the short course in general agriculture and by outsid per-

Higher Cost of Living Does not Include Fence

Ten years ago it took 2 bushels of corn to buy 1 rod of fence. Today 1 bushel of corn will buy 2 rods of better fence.

Price Low-Quality Better Than Ever

Within ten years farm products have greatly advanced in market value while the price of woven wire fence has been reduced. These are the reasons: Newer and improved methods of digging the ore, shipping to the furnaces, melting into steel and making into finished products are in force. Ten years ago operations were on a small scale. Today the plan of operation is vast. The manufacturer is able to deliver the finished goods quickly, of better quality and at a lower price.

American fence is made better than ever. It is a thoroughly galvanized square mesh fence of weight, strength and durability. Large wires are used and the whole fabric is woven together with the American hinged joint (patented)—the most substantial and flexible union possible. Both wires are positively locked and firmly held against side slip and yet are free to act like a hinge in yielding to pressure, returning quickly to place without bending or injuring the metal.

Dealers Everywhere

Stocks of American Fence are carried in every place where farm supplies are sold. The Fence is shipped to these points in carload lots, thereby securing the cheapest transportation, and the saving in freight thus made enables it to be sold at the lowest prices. Look for the American Fence dealer and get the substantial advantages he is enabled to offer. He is there to serve the purchaser is person, offer the variety of selection and save the buyer money in many ways.

TO KEEP RABBITS AWAY.

Wrapping and Trapping Will Protect the Young Trees.

Kansos Industrialist: Look out for rabbits. They will destroy young corchards faster than your can set the trees. In Kansas the danger from rabbits is not so great as in many other estates, but the damage done is sufficiently a warrant careful attention.

For each excavation half a site of estatished and country, was a sufficiently warrant careful attention. The country of a consideration of the summer step purpose fairly well. The sufficient of warrant careful attention, height above the reach of rabbits. Various materials are used in wrappings. Some use cornstalks or lates, binding them about the trees. Burlap answers the purpose fairly well. Tree was the sufficiently warrant careful attention. The cavity resulting from the explosition was the property fairly well. Tree was the sufficiently large for the holding answers the purpose fairly well. To exist resulting from the explosition will be obtained from nurseries and sufficiently will probably purchase several cons of dynamite for use in planting soul the summer. Something that affords good protection for the trees is in the term of the first the summer. Something that affords good protection for the trees is the received in the summer. Something that affords good protection for the trees is the tree grows. All of these afford and summer something that affords good protection for the trees and hand the summer. Something that affords good protection for the trees at an and this objection is a wrap of ordinary wife season, and many apple trees will for the summer. Something that affords good protection for the trees is in fail the chalk constituence of the protection of the trees is in fail the received will the summer. Something that affords good protection for the trees at hand the summer something that affords good protection for the trees at hand the summer something that affords good protection for the trees at hand the summer something that affords good protection is a wrap of o

Use a Repellant.

Another way to protect the trees is to smear or spray something upon the trunk that is obnoxious to the rabbit. The blood of a rabbit put on the trunk as high as a rabbit can reach is very effective. A mixture of tailow and tobacco answers very well. It is most convenient to spray the trees, especially if there are many of them. The ordinary lime and sulphur spray used ordinary lime and sulphur spray used in destroying San Jose scale is very good. Mix together 4 pounds dry, fresh, hydrated or ground lime; 3 pounds powdered sulphur. Make a thin paste with water and boil until themixture becomes a reddish amber color. Dilute to 10 gallons and spray while still very Thing.

color. Dilute to 10 gallons and spray while still warm. This must not be applied when trees are in leaf.

At the Kansas State Agricultural College a spray made of buttermilk and common soot has proyed very satisfactory. One gallon buttermilk; one-half pound common stove soot Boil twenty minutes. Keep well stirred to prevent clogging pump. These sprays are only of temporary use, since the first rain will destroy their effect.

Despite the fact that he is 70 years old, Mr. McKenzle, who is one of the most widely known cattlemen to pearling the raph. Bonds, securities, etc.

Bonds, severities, etc

effect.

And Keep It Clean.

It is very important that the orchards be kept clean of dead grass and brush piles. All breeding places should be destroyed and the rabbits arapped or poisoned. An excellent poison is prepared by chopping up apples or melons and adding sugar equal to one-half the weight of the fruit. Boil until a thick jam is formed, then add strychnine at the rate of one ounce to 25 pounds of the jam. Rabbits are very fond of jam and are thus easily poisoned if this mixture be placed in their runways.

WORLD'S COAL PRODUCTION

United States Sxeeds all Other Countries in 1940—Great Britain Second.

Washington. D. C., Dec. 8.—The total coal production of the world in 1940 was approximately 1,309,000,000 short tons of which is in the company to short tons of which is in the contract of the world.

The street is and encourage the breeding of better cattle.

From Texas will be taken many leaken many legistered cattle, among them being Jersetonal other cash will be set apart for each creat ranch will be set apart for each persons that there will be no cross preceding. The ranch, however, will be principally stocked with the native cattle, which will be bred up to a high the principally stocked with the native cattle, which will be bred up to a view of supplying Europe with meat in competition with Australia.

Before acquiring this vast body of land Mr. McKenzle made a personal inspection of it. It is well watered ling to the country the best acclimated Texas cattle, it is believed that in a few years the ranch will be producing as fine tall coal production of the world in 1910 was approximately 1,309,000,000

Washington. D. C., Dec. 8.—The total coal production of the world in 1910 was approximately 1,300,000,000 short tons, of which the United States contributed about 39 per cent. This country has far outstripped all others, and in 1910, according to the United States Geological Survey, it exceeded Great Britain, which ranks second, by over 200,000,000 tons. Great Britain's production in 1910 was less than 60 per cent of that of the United States, and Germany's was less than 60 per cent of that of the United States, and Germany's was less than half. The increase in both of these countries in 1910 over 1909 was comparatively small, whereas the increase in the United States was nearly equal to the entire production of France and was more than the total production of any foreign country except Great Britain. Washington, D. C., Dec. 6 .- The ag-

Worth of American Manufactures.

Washington, D. C., Dec. 6.—The agricultural interests of foreign countries buy nearly \$100,000,000 worth of American manufactures and other products for use in cultivating the soil, while about \$50,000,000 worth of foreign products are annually imported into the United States for use upon American farms. The foregoing summarizes certain information reummarizes certain information re-ently compiled by the Bureau of Statistics, Department of Commerce and Labor, in response to an inquiry upon that subject received from a representative newspaper located in the great farming area of the Middle West, and refers more especially to those class-es of merchandise having their chief

es of merchandise having their chief, if not exclusive use in the farming industry and does not include articles in general use, such as clothing, furniture, and miscellaneous manufactures. Of the exports from the United States of articles required in farming, by far the larger portion are composed of manufactures, such as agricultural implements, binding twine, barbed wire, and oil coke; while phosphate rock, to be ground up and used as fertilizer, and clover, timothy and other grass seeds are among the artiher grass seeds are among the arti-es exported in the natural state. In lition to the exports above enumer ed as specifically for farm use, there certain articles for which the agalturalists of other countries draw on the United States but which cannot be classed as distinctively for farm purposes, such as wagons, carrieges, traction engines, fiber bags, pumps, etc. n such cases the Bureau of Statistics has no means of determining the proportion of the exports intended for farm use and they are not, therefore, included in the 100 million dolars worth of merchandise exported

ars worth of merchandise exported or agricultural purposes. Taking up the principlal exports of the class under discussion, agricultral implements head the list, with a robable total of \$40,000,000 in the ear about to end, comprised of near-r \$20,000,000 worth of mowers and eapers, \$8,000,000 worth of plows and cultivators, \$2,500,000 worth of areshers, and the remainder miscellaneous farming tools and implements are expected. f China and Japan, and in all the apidly developing countries of the few World, including Canada, Argenna, Cuba, and Mexico, The year's xports will range from nearly \$8. xports will range from nearly \$8,-00,000 to European Russia, \$6,000,-00 to Argentina, and about \$1,500,000 to Grica, while to British Australia and becania will be sent a total of nearly 2,000,000, to other Oceania and Asia bout \$1,000,000, and Brazil about \$0,000 worth. Even the great manfacturing countries of Europe, the inited Kingdom, Germany, and rance, are represented in the year's xports of agricultural implements, he United Kingdom with a total of

United Kingdom with a total of r \$1,000,000, Germany, \$2,000,000, l France, \$3,000,000. Fertilizers, of which the exports will about \$12,000,000 during the year, e chiefly sent to European countries, rock and other fertilizers of that class Germany is the largest market, followed next by Netherlands and the United Kingdom. Another class of materials, used as cattle food, whose exports are considerable includes officake and oil cake meal made from cotton-seed and linged. Of these the exports amount to about \$15,000,000 per annum, being exported to various countries of Europe.

Binding twine is another article of importance in wheat-growing countries, of that article the year's export will be about \$8,000,000, practically all destined for Russia and other European countries, Canada, and Arantical article of the countries, Canada, and Arantical countries are continuous contributions. all destined for Russia and other European countries, Canada, and Argentina. American barbed wire exported, a bout \$5,000,000 per annum, goes chiefly to Canada, Australia, Argentina, British Africa, Mexico, and Cuba. In addition to these articles, there are others largely if not exclusively required by farmers, such as windmills, with exports nearing \$2,000,000 per annum; and clover and other grass seeds, over \$1,000,000.

On the other hand, American farmers draw upon other countries for certain of their requirements, most of the imports, however, being articles in their natural state. The largest item shown in the imports of last year were fertilizers, including nitrate of soda, \$17,000,000; guano, manure salts, etc., \$10,000,000; guano, manure salts, etc., \$10,000,000; potash salts, \$8,000,000; sulphate of amonia, used in part as a substitute for manure and in part as a substitute for manure and it part in the manufacture of alum, \$5 000,000: animals for breeding purposes, chiefly horses, nearly \$3,900,000; clover seed \$3,000,000; and sugar beet seed, \$750,000.

GETTING READY FOR SHOW

Omaha Preparing to Give Glad Hand to Sheepmen,

South Omaha, Neb., December 7.— South Omaha business men, realiz-ing the importance of the National Vool Growers Association, which w hold its annual convention in Omahon December 14 to 16, and appreciating the men who will honor the city and the convention with their pres ence, are leaving no stone unturne to make their stay in Omaha bot

to make their stay in Omaha both profitable and enjoyable.

Without exception, the South Omahans have railied to the support of the convention, not only by handsome contributions in the way of cash, but also with their time. When the delegates and visitors gather in South Omaha for the huge entertainment, which will consist of a vaudeville and smoker, they will be met in person by the business men. All arrangements for the entertainment, which will be held Friday night, December 15, are complete. The arrangements committee is not telling just what it is going to offer the distinguished visitors in the way of amusement nor are they telling what they will set before the huge gathering, when it before the huge gathering, when assembles in the big dining room the Live Stock Exchange. The me

the Live Stock Exchange. The menu has been arranged with the usual care which is always given South Omaha affairs. The entertainment will be as diversified as the "eating." Vaudeville houses have been ranged. Edwichingham, superintendent of the stock yards, E. W. Cahow, E. P. Melady, and J. B. Root. All South Omaha will be in gala attire that night and will vie with Omaha in looking after the visitors.

The arrangements committee, of which Will H. Wood, Jr., is chairman, is composed of C. B. Bogue, E. W. Cahow, E. M. Cahow, W. M. Farrar, James L. W. Cahow, W. M. Farrar, James L. Paxton, F. E. Scott, A. F. Stryker and produced.
