Cotton Harvest Ends On Brighter Note

Mules, JV Fall To Shallowater

Fast-paced action Tuesday night marked the beginning of basketball in the Muleshoe schools after the Christmas holidays.

And, despite the best efforts of the young Mules, the Shallowater Mustangs outpaced the Mules in both games played in Muleshoe.

Wesley Rasco lead the scoring for the Mules in the varsity game, where they were defeated by the Mustangs by 43-34.

Rasco's 12 points fell short of necessary points needed for a Muleshoe win.

At the end of the first, the Mules were trailing by only two points, 8-6. As the halftime buzzer sounded,

the score had moved to 25-16 and at the end of the third, the Mustangs were clinging to a 30-22 lead. Several times during the game, the Mules moved within one or two points and several times briefly lead the scoring.

Also in the game, Carroll Precure had eight points; Felix Norman, six; with Ronnie Angeley and Michael Angeley each having four points.

In the first game of the evening, the JV Mules found the Shallowater JV too hard to handle, even with the JV Mules tying up with the Shallowater team with less than one minute to play in the game.

The JV Mules lead all the way to the final 18 seconds when the Shallowater Mustangs pulled out a 39-35 win.

At the end of the first, it was a 9-6 game; with the halftime score at 25-20.

By the end of the third, the Mules were clinging to a 30-27, three point lead before losing out in the final seconds of the game.

Alan Beasley and Sam Gonzales each had five points to lead the scoring. With four points were Leroy Hurtado, Ronnie Cox and Richie Richards. Joe Neel, Mike Pugh, Wayne Precure each had two, but the high scorer in the game was Jeff Hamilton with six.

As home basketball gets underway, the home side has been moved to the north side of the gym, and a special student section is

Cont. Page 6, Col. 2

Around Muleshoe

The Muleshoe Young Homemakers will host youth skating tomorrow night, Friday, 7-10 p.m. at the Bailey County Exhibition Center and Coliseum.

Admission for the skating is \$1 per skater.

A youth disco is scheduled for Saturday night at the Bailey County Exhibition Center and Coliseum. Mickey Bear Enterprises from Portales will provide the disco sounds for the 9-12 p.m. dance.

Admission will be \$3 per person.

The Trinity Baptist Church of Muleshoe will be celebrating their 25th anniversary Sunday, January 11.

Morning services will begin at 9:45 a.m. A meal will be served at noon and afternoon services will begin at 2 p.m. There will be singing and fellowship throughout the day.

Visiting in the home of Mr. and Mrs. Walter Sain over the holidays were their children, Mr. and Mrs. Buddy Williams and Erin of Paducah, Mr. and Mrs. Gary Smith of American Samoa and Bonnie Sain of Lubbock.

Visiting in the Ruby Stickney home were her children Cecil Ford and wife of Hobbs and Mrs. Richard Moore of Earth. Also grandchildren, Mr. and Mrs. Richard Lewallen of Friona, Mr. and Mrs. Dwight Lewallen of Lubbock, Mr. and Mrs. David Franklin of Plainview and David White of Muleshoe and great grandchildren, Amy Lewallen of Muleshoe and Richard Don Lewallen of Friona.

The Muleshoe Hobby Club will have their first meeting of 1981, January 15 in the Community Room of the Muleshoe State Bank.

At the end of the first, it was a 9-6 game; with the halftime score at 25-20.

By the end of the third, the Mules were clinging to a 30-27, three point lead before losing out in the final seconds of the game.

Alan Beasley and Sam Gonzales each had five points to lead the scoring. With four points were Leroy Hurtado, Ronnie Cox and Richie Richards. Joe Neel, Mike Pugh, Wayne Precure each had two, but the high scorer in the game was Jeff Hamilton with six.

As home basketball gets underway, the home side has been moved to the north side of the gym, and a special student section is

Police Report

It was a relatively quiet New Year's holiday in Muleshoe, with little business for the Muleshoe City Police.

Arrests included one person for fleeing an officer and no driver's license; in a hit and run accident, the driver left the accident site, but was later apprehended and one person was arrested for public intoxication.

Investigations were being conducted on four criminal mischeif reports. These included one on Friday, and three on Saturday. In one instance, shoe polish was used to write on vehicle windows and in another incident, a camper was shot, possibly with a .22 rifle.

Another vehicle window was shot with a b-b gun and officers were also investigating the theft of a battery from a vehicle.

One residential burglary was reported during the last several days.

At the sheriff's office, Deputy Sheriff Hal Bynum apprehended one illegal alien who was turned over to the Border Patrol and Deputy Sheriff James Williams picked up one person on a warrant from Leveland.

MOVING A MANMADE MOUNTAIN.....Buildings and trucks are dwarfed by a large manmade mountain at the east side of the Muleshoe Co-op Gin. Cotton burs from a constant ginning season for the last three months are moved steadily but trucks cannot keep up with the spewing burs.

Prices Help Offset Lack Of Production

What started out as a potential weather disaster in Bailey County proved to be otherwise this fall. Although the cotton harvest was smaller than anticipated last spring, many farmers produced 'bumper' crops and also received good prices for their yields.

Farmers who had cotton to harvest this year found a little more money in their pocket. Last year, the average price paid for cotton per pound was 55 cents, up this year to around 80-82 cents.

With the average price some 27 cents above the price paid last year, or around one-third increase, some farmers found a little more money in their pocket.

Cotton producers who did not wait for the open market price, but contracted their crop, found themselves on the 'short end of the stick'.

Other farmers in dry southern Bailey County will have disaster payments and low yield payments to help take up the slack in the year for their non-existent crops.

Last year, Bailey County Electric Cooperative Association reported a total of 186,500 bales of cotton ginned in the 24 cotton gins served by their electrical group. This year, the yield is expected to be some where between 80 - 90,000 bales, according to

Cont. Page 6, Col. 1

the end of the season figures.

As of December 29, nearly 31,000 bales had been ginned in Bailey County, according to Bailey County Electrical Cooperative figures, compared to 62,194 at the same time last year. The season for this county ended last year with an additional 21,000 bales for a total of 83,194 bales.

In Muleshoe, the Muleshoe Co-op Gin has reported they will complete ginning this week with around 19,500 bales of cotton. This is an increase of some 700 bales over the 18,843 last year.

In most cases, the gin reported the grade of cotton held up, even though a slight delay due to adverse weather conditions in November halted operations.

As a contrast, the Maple Co-op Gin, who processed 17,000 bales last year, had a dramatic drop due to weather conditions and had ginned 4,550 bales this year, with the end of the season in sight.

From Lariat, almost all the season is over, with the wind-up expected this weekend at around 4,500 bales.

Reporting 'just about the same as last year', the Muleshoe Gin, located just east of Muleshoe of Highway 70, reported ginning around 2,000 bales this

Cont. Page 6, Col. 2

Water Specialist Talks About Water Conservation Method

Although Wayne Wyatt from the High Plains Underground Water Conservation District assured members of the Muleshoe City Council Tuesday morning that 'I don't see it (water problem) to be as big a problem as we thought it would be, and the drain by the City of Lubbock of the water rights of Muleshoe south of Muleshoe is not great.'

However, his optimistic words did not completely appease the members of the City Council who continued to express their great concern over plans by the City of Lubbock to drill a large number of water wells just south of Muleshoe.

Wyatt explained to the Council that according to the water tables in the Ogalalla formation, only about 150 feet of water are removed each year from the formation, and they can see no way the City of Lubbock can draw water from under the City of Muleshoe's property.

He said he could see a problem with the City of Lubbock drilling wells

south of Muleshoe in Bailey County, but added that he thought the problem was not as serious as it could be.

According to maps presented to the Council, one of which is reproduced on page six of this issue of *The Journal*, a mountain, or red bed mound, partially blocks the City of Lubbock from Muleshoe's water rights.

Also, Wyatt continued to advocate education on water conservation, although under intense questioning, he was forced to agree that Lubbock residents are not required to practice water conservation, and on the contrary, are even encouraged to use more water.

After questioning about the Lake Ranso Canyon project, where a number of lakes are being filled, and possibly with some of the water being mined from Bailey County, Wyatt said that according to his reports, the lake is being filled from other sources from north of Lubbock.

Wyatt also told about an experimental chemical which thickens leaves of plants, and retards growth.

Cont. Page 6, Col. 1

Wyatt also told about an experimental chemical which thickens leaves of plants, and retards growth.

Cont. Page 6, Col. 1

Irrigation Is Subject For Meeting

Changes they are making in their irrigation practices to combat rising fuel costs and make best use of available water will be related by a panel of growers during the annual High Plains Irrigation Conference in Amarillo Tuesday, January 13.

The day-long conference will begin at 9:30 a.m. at the Texas A&M University Agricultural Research and Extension Center, 6500 Amarillo Blvd. West.

Maximizing pump and sprinkler efficiency and proper application of water will be vital in reducing production costs this year, and the irrigation conference will focus upon these areas, said Leon New, area Extension irrigation engineer.

In addition to the tips from the panel of growers, other speakers will discuss the amount of water needed for adequate irrigation full and limited row irrigation potentials and the feasibility of replacing row irrigation with center pivot sprinklers.

Also, how pump and engine performance affect fuel costs, ways to obtain maximum pump performance, engine maintenance and tuning by growers and equipment limitations.

Teams Keep Rotarians Very Busy

It's all in good-natured fun -- maybe! At this point, the Muleshoe Rotary Club has divided into two factions, and the opposing teams are going at each other hammer and tongs.

A membership drive is at stake, and according to the Coca-Cola Cowboys, who are trailing 60-3 after the first week, they will come back and take the rest of the three months' competition as big winners.

Jeff Smith is captain of the Coca-Cola Cowboys, and Harmon Elliott leads the Flop, Flop Fizz Fizz, O What A Relief It Is Over The Hill Gang.

According to Smith and the other Coca-Cola Cowboys, their team will win because they are not of the 'Geritol' generation.

Tuesday at noon, Harold Horne, of the Over The Hill Gang, had as guests Ernest Ramm, Jim Shafer and Tom Jinks. Olan Burrows, another member of 'The Gang' had as his guest, his son, Brent.

Special guest of the Cowboys was Cleta Williams. Visiting Rotarian was C.K. Castleberry of Clovis.

Devious plans are in the making -- by both sides of the house at Rotary in an effort to generate interest in the local service club.

Smith said the other members of his team include Buck Campbell, Carson Clayton, Charles Flowers, Ken Henry, Bob Stovall, Doyce Turner, Frank Ellis III, Randy Field, Bob Finney, Rex Harris, Max King, Dee Treadwell and Jim Young.

Along with Elliott, members of the Over The Hill Gang include Roger Albertson, Harvey Bass, Olan Burrows, Kerry Moore, John Miller, Gilbert Lamb, Larry Hall, Clinton Kennedy, Jess Winn, Alex Williams, Tryp Atkinson, Dave Marr, and Keith Pate.

Sanders Elected YAC President

During an election conducted Monday night, R.P. 'Bob' Sanders was unanimously elected president of the Muleshoe Area Youth Activities Committee.

Several members of the organization met and following the election, approved employing Matt Dudley to work on the miniature golf course. It was explained that although a large number of local residents had indicated they were willing to volunteer labor toward completing the project, few actually appeared to work.

"We have to get the miniature golf course completed," said Wayne Holmes, YAC vice president. "People, both youngsters and adults are asking when it will be completed."

YAC officers agreed to have work done until they run out of money, they will try to figure out where to go from there. The concession stand/ticket office is virtually complete and two

of the nineteen holes have been completed.

In other action, YAC decided to resume twice a month meetings. Meetings will be at 7 p.m. on the first and third Monday nights of each month. In conjunction with the resumption of meetings, more members of the youth-orientated organization will be sought.

Farmer And Rancher Tax Deadline Near

While most taxpayers have until April 15 to file their 1980 income tax returns, farmers and ranchers face a much earlier filing date.

Agricultural producers who do not file an estimate of their income by January 16 and do not pay estimated taxes must file their tax returns and pay due taxes by March 2. However, if farmers file an estimate, they have until the April 15 deadline to file final returns, points out Spencer Tanksley, county agent with the Texas Agricultural Extension Service, Texas A&M University System.

Tanksley notes several considerations for Texas farmers and ranchers as they prepare their 1980

Cont. Page 6, Col. 1

HARVEST WINDING DOWN.....A few modules and several trailers of cotton were on the yard at the Muleshoe Co-op Gin Monday afternoon, showing that the cotton harvest and ginning season is nearly completed for this year. Most ginnings who have not shut down for the year predicted they will complete the 1979-80 season by the weekend.

S&H STAMPS ON WEDNESDAYS

Enochs News By Mrs. J.D. Bayless

Mr. and Mrs. Wendell Speck of Muleshoe and Mr. and Mrs. Curtis Snitker of Hart were supper guests in the home of Mr. and Mrs. Dale Nichols and watched the old year out and the new year in.

Chris, Kim and Kerry came to Morton by bus Wednesday and spent till Saturday with their grandparents, Mr. and Mrs. E. N. McCall.

Mr. and Mrs. Zeb Robinson of Muleshoe visited Mrs. Mammie Adams Tuesday.

Mrs. Johnny Cox attended the 50th anniversary of Mr. and Mrs. Hazel Hancock Saturday, December 27 at the Community Activity Building in Morton from 2 to 5 p.m.

Johnnie Andrew Love, 70, of Morton, a former teacher at Bula school died at 8:15 Christmas Day in St. Joseph's Hospital in Paris, Texas following a lengthy illness.

Mr. and Mrs. G.H. McCall, Jr. and son, Jeaf, from Harlingen, were New Years Day guests in the home of his uncle, Mr. and Mrs. E.N. McCall.

Mr. and Mrs. Clyde Price had their children home for Christmas dinner Mr. and Mrs. Dale Wheeler of Houston, Mr. and Mrs. Keith Price and family and Mrs. Glenn Price and family all of Morton.

Mr. and Mrs. Johnny Cox were Christmas dinner guests in the home of a sister, Mr. and Mrs. Junior Austin in Lubbock.

Mrs. Vinnie Adair and daughter, Mrs. Junior

Mansell of Lubbock were dinner guests in the home of the J.D. Bayless' Sunday. Mrs. Mansell was a visitor at the Baptist church Sunday morning.

The late Mr. and Mrs. Luke Nichols' children had a belated holiday dinner at the home of Mr. and Mrs. L.B. Davis at Shallowater Saturday, January 3. All of the children were present. Gary Nichold, Mr. and Mrs. Dale Nichols and Paula, Quinton Nichols, Richard and Mike, all of Enochs and Mike's friend of Lazduddie, Mr. and Mrs. Donnie Nichols of Canyon, Mr. and Mrs. Harold Dean Nichols and Michelle of Idalou, Myrlene Nichols and a friend, Joanna Cole of San Antonio, Mr. and Mrs. Sammie Nichols and children of Guyman, Oklahoma.

Mr. and Mrs. J.C. Snitker attended the wedding of her nephew, Mario Moresoles and his bride, Nancy Moreno, December 26 at Mission, Texas. Maribel Zamora was bridesmaid and J.C. Snitker was usher. They also went to Brownsville, the beach and Arlington and went to see the old plains.

Juana Young of Fayetteville, Arkansas stayed two weeks with her parents, Mr. and Mrs. Paul Young. She left for home Sunday.

Mr. and Mrs. Andrew Petree of Levelland visited in the Chester Petree home Monday.

Mrs. Winnie Byars returned home Tuesday after visiting all of her children, Mrs. Jack Parr and family in Lubbock, Mrs. Henry Hardaway and family at Brownfield, Mr. and Mrs. Tom Byars and family at Seminole. Also her in-laws, Mr. and Mrs. Jim Byars at Odessa.

Accent On Health

Texas Department of Health
Robert Bernstein, M.D., Commissioner

The evidence delineating the health risks from smoking continues to grow, while those deriving economic benefit from tobacco still refuse to acknowledge the warnings medical authorities have given for years.

Fortunately, the percentage of smokers in America is slowly dropping. Unfortunately, the decrease does not include some of the younger smokers. About a third of U.S. adults smoke, and there has been a recent drop in the number of teenagers who smoke, with one exception. Smoking continues to increase among 17 and 18 year-old girls.

This increase is especially worrisome since smoking presents increased risks for pregnant women. Couple these risks with an increase in teenage pregnancies and the problem is compounded.

"The carbon monoxide in cigarette smoke not only gets into the mother's blood, but travels across the placenta to limit the amount of oxygen available to the developing fetus," says Dr. Walter Peter, Director, Division of Maternal and Child Health, Texas Department of Health.

"For this reason," says Dr. Peter, "pregnant women should refrain from smoking if at all possible."

Smoking during pregnancy is associated with low birth weight babies, shortened gestations, and more frequent spontaneous abortions.

For the first time in our history, there are more girls smoking than teenage boys. And there are now 100,000 smokers in the United States below the age of thirteen.

Getting a pregnant woman to refrain from smoking is protecting, in one

sense, the youngest of nonsmokers, her unborn child. But even older children in homes where both parents smoke incur twice as many colds and respiratory ailments as children in homes where no one smokes.

Increasing attention to smoking in public places is another expansion of nonsmokers' rights. More and more restaurants and other business places have set up non-smoking areas or prohibit smoking altogether. Over half the states, including Texas, have enacted laws restricting public smoking.

In a recent precedent-setting case, a New Jersey woman who was very sensitive to tobacco smoke was awarded the right to work in a smoke-free environment by that state's Superior Court. In similar cases, employees have been granted unemployment compensation and disability payments when they have been forced to leave smoke-filled jobs.

Thirty percent of the businesses contacted in a recent survey put some restrictions on smoking in the workplace. Many businesses, realizing that smokers miss significantly more work than non-smokers, have begun to pay workers not to smoke and to sponsor cessation clinics.

Recently, the National In-

stitute for Occupational Safety and Health (NIOSH) recommended restrictions on smoking in the workplace where harmful interactions between tobacco and hazardous substances might occur.

What about quitting? Over 30 million Americans have kicked the habit, and the number is growing steadily. Several agencies offer help to those who want to quit. The American Cancer Society provides a variety of help, including the training of leaders for cessation programs. The American Lung Association is launching a "Freedom From Smoking" Program this month which maps out a plan to stop in 20 days, and provides a maintenance plan to keep off cigarettes.

The Texas Department of Health's Texas LIFE Program also addresses the need to stop smoking.

"We focus on smoking as a major risk factor in chronic disease," says Roger Diamond, administrator of the LIFE Program.

"After completing the Selected Risk Factor Questionnaire and counseling, smokers are referred to smoking cessation programs to help them kick the habit," says Diamond.

These components of the Texas LIFE Program are now active in central Texas and in the Houston area.

The Texas Interagency Council on Smoking and Health is a confederation of a dozen public, private and voluntary groups seeking to inform Texans on the dangers of smoking and to protect the rights of the nonsmoker. It is through this Council that state affiliates of agencies like the American Cancer Society, the PTA, the American Heart Association and others coordinate activities on smoking throughout Texas.

There is progress on nearly every front except the group of teenage girl smokers mentioned earlier. But smoking still represents, as the Report of the Surgeon General states, the single "most preventable and unnecessary cause of death, illness and disability in the United States."

For more information on smoking, contact the Texas LIFE Program, Texas Department of Health, 1100 W. 49th Street, Austin, Texas 78756.

Why is it we find it so easy to mind other people's business?

Today's advertising paves the way for tomorrow's profits.

Food Export Show Set in New Orleans

AUSTIN--The Sixth International Food and Agriculture Trade Show, to be held in New Orleans, will feature every conceivable type of food and agricultural product available for export. Agriculture Commissioner Reagan V. Brown has reported.

The Show is scheduled for February 18-20 at the Rivergate Exhibit Center in New Orleans.

Brown said about 150 exhibitors, including 10-15 from Texas, are expected to participate in the show, sponsored by the Southern United States Trade Association (SUSTA) in cooperation with the Foreign Agricultural Service (FAS) of the U.S. Department of Agriculture. Buyers from 45-50 countries are anticipated.

"To insure foreign attendance, SUSTA representatives have met with buyers from South America, Europe, the Middle East and the Far East," Brown said.

The FAS has organized a European buyers' mission of approximately 75 importers from 13 countries to coincide with the show.

Brown said space is still available for exhibitors. Cost of a booth is \$400.

"This trade show provides tremendous exposure for

Texas agricultural export products," said the commissioner.

SUSTA is a trade association of 15 southern state departments of agriculture and Puerto Rico formed for the purpose of expanding foreign trade. The Texas Department of Agriculture is among its founders.

For further information contact Danny Presnal, director of international trade, Texas Department of Agriculture, P. O. Box 12847, Austin, Texas 78711, 512-475-2868.

The first century

AUSTIN, Texas (Spl.) — More than a thousand photographs in a new picture book will bring to life the past events of The University of Texas.

Photographs in "The University of Texas: A Pictorial Account of Its First Century" range from the first eight-man faculty in 1883 to the Tokamak fusion research device in 1980, from a 1911 Varsity Circus parade where women students carried signs "No votes—no babies" to a party raid in the 1950's.

The book was compiled and written by Dr. Margaret Berry and published by The University of Texas Press.

Brandy Hall Celebrates Birthday

Brandy Hall celebrated her third birthday at the home of her great grandparents, Mr. and Mrs. Luther Hall in Muleshoe.

Cake and ice cream were served to her father, Kevin Hall; grandparents, Mr. and Mrs. Kenneth Hall; aunt and uncle, Mr. and Mrs. Trent Stewart of Irving; Mr. and Mrs. Gary Dale, Mike and Monica Dale, Leslie Cowan and Mike Henry.

FIVE GENERATIONS.... Five generations of the Luther Hall family gathered in the home of Mr. and Mrs. Luther Hall recently to celebrate their great granddaughter's third birthday. Pictured standing, Luther Hall, seated from left, Kevin Hall, Kenneth Hall and Brandy Hall.

40th ANNIVERSARY CELEBRATION.... The children of Mr. and Mrs. Austin Floyd will be honoring them with a reception in observance of their 40th wedding anniversary, January 11 at Tri County Savings and Loan from 2-5 p.m. Austin Floyd and Annie Bruns were married January 4, 1941 in Munday, Texas. They are the parents of four children, Tommy Floyd of the home, Benny Floyd and Kay Griswald of Muleshoe and Connie Fulgham of Clovis. They have six grandchildren. No local invitations are being sent.

Parmer County Historical Commission Resumes Work

The Parmer County Historical Commission has started back to work on the History Book project, after the forced recess due to the death of O'ho Whitefield, chairman.

A meeting with the commissioners and Judge Por-tor Roberst was held December 8 to acquaint them of the progress.

"The commissioners and judge went on record as favoring the book project and strongly urge all county citizens, who have not written their personal family history to do so immediately," said a spokesman of the group. "They agree with the author that written local history is invaluable to our future generations, and for the preservation of our past and present was of life and accomplishments," they added.

They are now stressing memorials to the deceased loved ones and tributes to honor the living special ones.

Business history of the whole county is being stressed. The record and progress and growth of the county since it's beginning.

Anyone who has memorials of past events and conditions that pertain to the general community and county history are urged to write them down and sent

to Parmer County History Book, P.O. Box 577, Friona Texas 79035.

They want the book to include county progress in all phases of life, past and present.

Muleshoe 4-H Club Meeting

The Muleshoe 4-H Club met Monday, January 5. The meeting was called to order by the president, Marlin Bynum. Rhea Lynn Klesel led the pledge and the club motto and Mandy Plank led the pledge to the American flag.

It was announced that the Bailey County Livestock Show will be held January 14, 15 and 16 in the Civic Center. Club Princess is Rhea Lynn Klesel.

The Muleshoe 4-H Club will sponsor youth skating January 23. Posters were made by each member present to advertise the livestock show. Members also signed up for the embroidery project that will begin soon.

Mandy and Pam Plank led the group in songs and games. Refreshments were served to 20 members and parents by Zanna and Holly Huckaby.

Sudan FFA Places Second

Sudan FFA took second place in both junior and senior farm skills at the annual Littlefield District FFA Banquet hosted by South Plains College, Levelland. They also took third in extemporaneous speaking.

Sudan was among 15 FFA Chapters represented at the December 15 festivities in SPC's Texan Hall.

1980 Lone Star Farmers from Sudan are Bradley Dameron, Mike Hill, Ricky King, Lee Markham, and Troy Moss.

Sudan won second place in land in 1980 judging competition.

Virginians held the Presidency for 32 of the first 36 years of this nation's existence.

Shower Honors Miss Barron

Miss Rosa Barron of Sudan, bride elect of Crockett Patterson, of Littlefield, was honored Saturday with a bridal shower held in the home of Mrs. Harold May.

The gift table was covered with a Christmas cloth and the Christmas motif was carried out. The serving table was covered with a lace edged cloth and centered with a Christmas candle and wreath.

Pink punch and a cake, baked and decorated by Sandra Hill, were served from crystal appointments by Toni Bausman.

The honoree was presented with a silk floral corsage of pink and cranberry and the hostesses gift included a toaster and a knife set as well as the centerpiece.

Special guests from out of town included Mrs.

Tommy Patterson and Mrs. Eli Young both of Littlefield, mother and grandmother of the prospective groom.

Pam Kent and Melodie Poe assisted the honoree in opening and recording the gifts.

Hostesses included Patty Miller, Barbara Conley,

Madge Beauchamp, Evelyn Ritchie, Doris May, Billye Doty, Zetha Young, Patty Bausman, Martha Lowe and Norma Poe.

Nice Seeing You Go
People can be roughly divided into two kinds: Those who make you happy when they come and those who make you happy when they leave.

The NOW Account

"Interest On Checking Accounts"

QUESTIONS & ANSWERS

1 Since when are you offering a checking account that earns interest?

We offer this new account beginning January 1, 1981 which pays maximum interest allowable by law; 5 1/4 percent.

2 Why first on that date?

A Federal law called the "Consumer Checking Account Equity Act of 1980" takes effect on that date.

3 Is this a NEW account?

Yes it is. However, by offering this account we do not want to discourage you from establishing or maintaining a separate savings program using our existing accounts.

4 Is this a NOW account?

You could call it that because the checks written on this account are sometimes referred to as Negotiable Orders of Withdrawal.

5 Are there many new rules we will have to learn?

Not really. The laws and rules which apply to this account are little more than a combination of the laws and rules which now apply to separate savings and checking accounts. The checks for this account will look and operate the same and like a savings account, the deposit balances will earn interest.

6 What advantages does this account have over separate checking and savings account?

Quite a few actually:

- *Earn interest on your combined checking and savings account balance, instead of just savings, while keeping the total balance as near as your checkbook if you really need it.
- *Keep only one account book, your checkbook.
- *Balance one less statement, remember one less account number, keep one less set of records.
- *Make one less deposit and minimize transfers between accounts.
- *Make all your deposits into this one account, including funds destined for longer term installments. Transfer the funds by check when you want to, and, without ever having to lose interest for even a few days, be able to trace all your assets through just one account.

7 Who can open such an account?

Individuals, and certain non-profit organizations.

8 What do I have to do?

Come and in and open one of these accounts with us. You may be required to maintain a qualifying balance in the account during the statement cycle to earn interest, but you may already be keeping that same balance in your checking account, without the benefit of interest.

Call, write or stop in and visit us if you would like more information.

Jane Kerr

Presents Program

Mrs. Jane Kerr, Director of Programs for Women at West Texas State University, presented the program for the Muleshoe Branch of the American Association of University Women, Monday evening

Garrett Cliff Flowers

Mr. and Mrs. Dennis Flowers are the parents of a new son, Garrett Cliff, who was born Thursday, December 11 at 4:30 p.m. in the Littlefield Medical Center.

Garrett Cliff weighed six pounds, eight ounces and was nineteen inches long.

Grandparents are Mr. and Mrs. Jim Bob Hargrove and Mr. and Mrs. Clyde Flowers. Great grandparents include Mr. and Mrs. Amos Sedgwick of Kress and Mr. and Mrs. J.L. Hargrove of Lubbock and Mr. and Mrs. J.P. Bishop of Ralls.

Joshua Brent Kitchens

Mr. and Mrs. Larry Kitchens are the proud parents of a new son born December 28 in the West Plains Medical Center.

He was taken home December 31, wrapped in the same blanket that Larry's parents, Mr. and Mrs. L.L. Kitchens, took him home in almost 30 years ago and from the same hospital. The cream colored crocheted blanket was made by Larry's mother.

Kami Renee Powers

Mr. and Mrs. Derk Powers are the proud parents of a new daughter born December 3 at 5:20 p.m. She weighed six pounds and ten ounces and has been named Kami Renee.

Grandparents are Mr. and Mrs. Boyd Lowery of Earth and Mr. and Mrs. John C. Powers of Hereford.

W.U. Lowery of Muleshoe is the great grandfather.

January 5 at 7:30 in the home of Mrs. Robert Hooten. Mrs. Gary Hooten was co-hostess.

The Women's Program at West Texas State University is designed to assist women who are entering new doors of the future. Many are coping simultaneously with work, family and the challenges of returning to school. Like skills, maturity and motivation assist in enriching learning experiences. Mrs. Kerr reviewed opportunities available for women in the 1980's and beyond.

Mrs. Roland McCormick president, appointed a nominating committee to select nominees for the 1981-81 officers of AAUW. Mrs. Roy Wrinkle, Mrs. Gary Hooten and Mrs. Neal Dillman were appointed.

Miss Tina Landers, daughter of Mr. and Mrs. Henry Landers, was chosen as the January Girl of the Month.

Members attending were Mrs. Harold Allison, Mrs. Joe Costen, Mrs. Neal Dillman, Mrs. Al Jones, Mrs. Roland McCormick, Mrs. Jim Shafer, Mrs. John Watson, Mrs. Roy Wrinkle, Mrs. Harold Horne, and Mrs. Bill Kent.

Calories Do Count

Although the holidays are behind us, we are still reminded that food was very much a part of our socializing. Indeed we eat for fun and frequently eat when we are not hungry. All this can add up to unwanted pounds. Now is the time to do something about losing those pounds before we are confronted with another special occasion feast. Remember calories do count. An extra 3,500 calories above our needs can result in an added pound of weight.

Smart Shopping
BY ANN D. ALLEN

Do you shop in a hurry? Fly around the store, pack your cart quickly when time is at a premium? And when you get home, do you find you've picked some products that are not what you wanted? It can happen to anyone, especially with all the imitations on the market. There are imitation cheeses, milks, spreads, bacon, eggs, meat and whatnot.

You may already have seen the effort to counteract this trend. It's the use of a "REAL" Seal emblem on genuine dairy products. The seal is a symbolic drop of milk with the word "REAL" inside. It's federally registered.

If you're making a whirlwind trip through the store, just pick up the products that have the symbol on them. You won't have to take time to study the label!

Should your shopping list contain foodstuffs used daily, remember you can tour just the outer aisles for dairy foods, meats, vegetables and bread. Know which aisles contain anything else so you won't get detoured.

Sudan Debate Team Wins Second Place

On Saturday, December 13, the Sudan High School Debate Team traveled to Brownfield to compete in an area debate tournament.

The team composed of Michelle Ballew and Reagan May won second place.

There were 27 schools from the surrounding area with most of the debate teams coming from Class 3 A schools and above. Sudan and Klondike were the only Class 1A schools represented.

In preliminary rounds, Sudan defeated Shallowater, Monahans and Lamesa. In the semi final rounds they defeated Coronado High School of Lubbock before they were defeated in the finals by Friona. The Friona team is the defending Class 3A State

Pam Kent Presidential Hostess

Pam Kent, graduate of Sudan High School, has been named a Presidential Hostess at South Plains College, Levelland. The freshman science education major at SPC will serve as an official school representative for a wide variety of campus functions.

Pam, the 18 year old daughter of Mr. and Mrs. Pat Kent, is a chemistry/science education major at SPC. Smallwood Scholar and member of the intramural sports team. She was salutatorian of her graduating high school class, member of the National Honor Society, FTA, FHA, varsity basketball team, tennis, track team and one act play meet. She was a regional qualifier in science in UIL competition.

Champions. This was the second tournament for this team having competed in a tournament in Muleshoe where they won third place. In this tournament, they defeated Levelland, Floydada and Shallowater in the preliminaries. They defeated Spud in the quarter finals before they were beaten by Coronado in the semi finals.

Their next tournament will be in Friona, January 10. The debate coach is Patsy Fisher.

RECIPE

GERMAN SWEET PUDDING CAKE

1 package (2 layer size) yellow cake mix
1 package (4 serving size) vanilla flavor instant pudding and pie filling

1 package (4 oz.) German sweet chocolate, melted
4 eggs

1 1/4 cups buttermilk or milk
1/4 cup oil
Coconut-Pecan Sour Cream Filling

Combine cake mix, pudding mix, chocolate, eggs, buttermilk and oil in large mixer bowl. Blend; then beat at medium speed of

electric mixer for 4 minutes. Pour into 3 greased and floured 9 inch layer pans. Bake at 350 degrees for 30 minutes or until cake tester inserted in center

comes out clean and cake begins to pull away from sides of pan. *Do not underbake.* Cool in pans about 15 minutes. Remove from pans and finish cooling on racks. Fill with Coconut-Pecan Sour Cream Filling.

Combine 2 cups (1 pt.) sour cream and 1/2 cup sugar. Add 2 2/3 cups (about) coconut and 1 cup chopped pecans. Makes 4 cups.

Water...

Cont. From Page 1
helping plants to mature without an excess use of water. According to the HPUGWCD spokesman, up to 35 percent of water presently used can be saved in that manner.

During another discussion, Wyatt was asked by Councilman Max King about the possible desalinization of the salt water found below the Ogallala formation. The Lubbock water specialist said the process could be used, but the cost for general usage would be prohibitive.

He did not rule such a process out for future consideration, however.

Advocating, "Water is very much a concern. If we can figure out a way for secondary recovery, and learn to utilize what we have left, we can have a

Farmer...

Cont. From Page 1
or when one's automobile is fully depreciated.

The standard mileage rate of 9 cents per mile is permitted as a deduction for charitable, medical or moving expense purposes.

A taxpayer should determine his actual transportation expenses (according to IRS guidelines) before deciding whether to use the standard mileage rate or to use his actual transportation expenses.

Tanksley notes that new installment sales rules recently passed by Congress significantly changes the rules for reporting gain from sales of real property and personal property. The changes which become effective for 1980 include:

--Repeal of the requirement that no more than 30 percent of the selling price be received in the tax year of sale to qualify for installment reporting.

--Two or more payments are no longer required.

--Installment sales tax treatment is automatic unless rejected by the taxpayer.

--The selling price for sales of personal property no longer have to exceed \$1,000.

--The rules are tightened on installment sales between certain related parties--whether through kinship or through business organizational structure.

One report has stated that the new Installment Sales Revision Act of 1980 would "simplify the installment sales tax rules."

Other changes concern business energy investment credit and alcohol fuel credit as well as numerous Revenue Rulings, Revenue Procedures, Tax Cases and minor law changes.

For information on these and other changes and for assistance in filing your income tax return, Tanksley suggests several IRS publications (Revised 1980 editions)--"Your Federal Income Tax" and the "Farmer's Tax Guide."

future here," Wyatt also cited energy as the next factor to look at. He spoke of the continuing high cost of energy and advocate that the High Plains Underground Water Conservation District had already done all they could according to their present regulations and guidelines.

He still advocated that any changes would only create hardships for the

Cont. From Page 1
in use on the north side on the floor of the gym. A school official commented, "We hope to change our luck this year, and think it will add to the game by moving to the north side. We surely would like to encourage more people to support the basketball program, and hope to generate more interest in that sport here.

"We also hope that our local people will realize that these young people put a lot of time and effort into the games, and would encourage more people to attend the games."

Cotton...

Cont. From Page 1
year and last year.

From Needmore, the Needmore Co-op Gin also reported greatly reduced cotton crops. They ginned 2,200 this year, compared to last year's 12,000 and reported they expected to wind up the season this weekend.

"Not too bad," was the way Claunch Gin at Bula summed up the season. They expect another week of ginning in the southeastern part of the county and will wind up the season above 5,500 bales. Bula was another area particularly hard hit by the summer drought and lack of moisture.

In the meantime, West Camp Gin had ginned 3,535 bales of cotton on Monday, after ginning only 2,000 in that irrigated area last year.

Also at West Camp, Beck Gin reported a few more acres of cotton are expected to be harvested, and will gin something like 200 more bales than last year. Monday afternoon, they had completed 5,500 bales.

Farmers Co-op Gin at Enochs also wound up a dismal season in that dry land area, completing their season with 3,000 bales, compared to the 11,000 ginned last year.

Another dramatic increase in yields this year was reported from almost 100 percent irrigated Clay's Corner area, where the Clay's Corner Gin reported they completed the season with 6,350 bales. This compares to last year's 4,062 bales, showing the increase.

As this year's cotton harvest is winding down for the last week, most cotton producers, and ginners, are already looking forward to a better year this fall.

rural areas, who would have first priority; for cities followed by industry.

In other action, Randy Field presented the financial report to the City, and according to the report, the City's financial condition is in compliance with all regulations.

He also reported on delinquent taxes, and said there was a reduction in delinquent taxes as of the current report.

The internal control system of the city is adequate, continued the accountant, said the city is in sound financial condition.

Joe Smallwood of Small

Truth may be hard to ascertain but the search warrants the attention of all individuals.

wood-Harmon Insurance Agency, met with the Council to discuss coverage provided by Public Official Employees Liability Insurance policies.

Child support:

AUSTIN, Texas (Spl.) — Child support — its lack or meagerness — is becoming a serious social problem, says a University of Texas social worker.

Dr. Judith Casetty reports that most children eligible for support from absent parents get nothing or very little of what the courts have determined.

Stating that "the public can no longer afford to subsidize parental irresponsibility," she suggests that society needs to take a hard look at the costs of not enforcing the "support obligation."

Bolero Herbicide Use Permit Requested From EPA - Brown

AUSTIN-- Agriculture Commissioner Reagan V. Brown has requested that the Environmental Protection Agency (EPA) grant an emergency exemption to allow use of a rice herbicide that has provided effective weed control in field tests.

The herbicide, Bolero, has been tested in the U.S. since 1973 and it is hoped it will receive EPA registration in the 1981 growing season.

"We are able to permit the early emergency use of this pesticide by making an expedited review of the scientific data and by setting up a program with close controls and monitoring activities," Brown said.

"Rice is the third largest cash crop in Texas and 1980 receipts for the crop were over \$258 million," Brown continued. "But escalating production costs and persistent weed infestations are reducing yield and decreasing profits. The direct economic loss for the 1980 crop was estimated to be \$6.5 million."

Weed infestations were severe and difficult to control this past year, especially in the central and western portions of the rice producing area. Infestations of sprangletop were among, if not the worst, infestations ever observed, increasing the possibility of severe infestations again in

1981. "We are also facing a world food crisis and we need to do all we can to provide for adequate production of a wholesome food supply and also permit our farmers to realize a reasonable profit," Brown noted. "We believe Bolero will aid the Texas rice producer greatly, in his quest to produce rice more effectively and economically."

The Department has received many letters from producers requesting TDA obtain a use permit from the EPA. And those who have used Bolero under permits before, are writing in commending Bolero's effective control rates. Brown also noted.

EXTENSION OFFICIALS HELP WITH COMMUNITY DEVELOPMENT

Extension educators in community development keep abreast of what's happening across the nation so they can work more effectively with local leaders to solve community problems. Extension community development programs are aimed at increasing the level and improving the quality of living, particularly in rural areas, notes a community development leader with the Texas Agricultural Extension Service, Texas A & M University System. Population changes trigger the need for many community services and facilities.

Services Held In Littlefield

Funeral services for James M. Griffin, 76, of Littlefield, were held at 2:30 p.m. Monday in the Hammons Funeral Home with Wilburn Dennis, pastor of Crescent Park Church of Christ, officiating.

Interment was in the Littlefield Memorial Park, under the direction of Hammons Funeral Home of Littlefield.

Griffin died at 2:25 a.m. Saturday in his home after a lengthy illness.

A native of Cottonwood, he had been a Lamb County resident for the past 44 years. He married Thelma Gladson December 19, 1925 in Syder. He was a retired farmer.

Vaughn Services Held In Paris

Funeral services for Helen Marie Vaughn, 38, of Earth were held at 4:30 p.m. in Roden and Sons Funeral Home in Paris. Graveside services were held January 1 at 4 p.m. in Ceevee, Texas. She died of a short illness December 30 in Paris, Texas.

She was born January 3, 1942 in Detroit, Texas and had worked as a nurses aid at West Plains Medical Center in Muleshoe.

Survivors include a daughter, Debbie Ellena of Plainview; a son, Eddie Johnson of Muleshoe; parents, Mr. and Mrs. H.E. McIntire of Paris, Texas; three sisters, Nancy Tucker of Seamore; Sharon Martin of Childress; Deborah Carpenter of Muleshoe; a brother, Charles McIntire of Earth and one grandson of Plainview.

J.R. Hobbs Rites December 22 In Lubbock

Funeral services for James Richard Hobbs, 65, of Lubbock were conducted on Monday, December 22 at the Broadway Church of Christ in Lubbock with Ken Dye, minister, officiating. Burial was graveside services were held at Prairie Haven Cemetery in Hobbs with Cleston Pritchett of Ruidoso officiating. Arrangements were by Rix Funeral Directors of Lubbock.

He died at his home in Lubbock. A former bank executive, he moved to Lubbock from Lovington. His father was James Ber-

ry Hobbs, a former postmaster of Hobbs, the city that was named for the family.

Hobbs was a veteran of World War II, having served in the U.S. Army.

Survivors include children Camille Carey, Ruidoso, N.M.; Vicki Calkins, Roseburg, Oregon; James, Farwell; Walt Moeller, Niguel, California; and a brother, Berry Lee Hobbs, Lovington, N.M.

CAPITOL UPDATE

John Tower
U.S. SENATOR FOR TEXAS
142 RUSSELL OFFICE BUILDING
WASHINGTON, D.C. 20510

Real, meaningful arms control and reduction is a dream of all who love peace. But to achieve these ends, we must look realistically at possible courses of action.

Experience has proven that unilateral restraint on our part — such as the cancellation of the B-1 bomber — does not motivate the Soviet Union to take reciprocal action. As one top Carter Administration official said, if we arm, the Soviet Union arms. If we fail to arm the Soviets still arm. In fact, over the past decade, the Soviet Union has outspent us by \$240 billion on defense. That means the Soviets already are engaged in an arms race, but it's a one-sided race.

The SALT II treaty actually was neither arms control nor arms reduction, because it would have allowed the Soviets to beef up their strategic forces while following the letter of the treaty.

The Soviets view arms limitations talks as hard bargaining sessions. They will press for the deal that is most advantageous to their interests. During the last stages of the SALT II talks, at least, we were simply out-negotiated.

How do we get back on the road toward real arms control? We will never be successful in negotiating with the Soviets unless they believe we have the national will to have a truly strong national defense system. If we will cut back our own defense programs without demanding reciprocity, we have little left to use as bargaining chips.

But our capacity for increasing our defense system actually is much greater than the Soviet Union's. That nation does not have the slack in its industrial capacity to increase its arms production much above its current level. The United States, on the other hand, could sustain a large increase if it possessed the national will. In short, if we were inclined to enter an all-out arms race, we would win. And the Soviets know that. That knowledge is our best chance at achieving real arms reduction.

When the Soviets become convinced that we have the national resolve to build a national defense system that is at least truly equal to theirs, then they will realize it is in their best interests to enter into serious and meaningful negotiations.

Survey data, my mail, and my own conversations with people indicate that the American people have the necessary national will to rebuild our sadly neglected defenses. I expect the new Administration and the new Congress to work together to meet our most pressing needs.

We must begin immediately. Only a truly strong defense will deter the Soviet Union from global aggression. And only a strong U.S. defense will make the Soviets interested in arms reduction.

When we accomplish this, then we can begin the business of hammering swords into plowshares.

Scientists harvest first successful crop of freshwater shrimp

COLLEGE STATION — Fisheries scientists at Texas A&M University have successfully raised and harvested more than 800 pounds of shrimp 100 miles from the nearest saltwater. The project shows promise for the creation of a shrimp-raising industry for Texas and other southern states.

The shrimp were raised in soft-bottomed freshwater tanks where they were grown during the warmer months of the year. Like shrimp in the Gulf of Mexico, they were born in saltwater.

The freshwater shrimp research, conducted by the Texas Agricultural Experiment Station, is part of an on-going project that may be a forerunner of large-scale commercial shrimp farming.

The business of developing one's personality is more important than that of regulating others.

Legislative Proposals Submitted To Spur Alcohol Fuel Production

AUSTIN—A special state energy committee headed by Agriculture Commissioner Reagan V. Brown has formulated an eight-point legislative proposal to stimulate fuel alcohol in Texas.

The proposals were approved by the Texas Energy and Natural Resources Advisory Council (TENRAC) and are now to be submitted to the Governor and the Legislature, Brown explained. "Texas has the potential for producing large quantities of feedstock for conversion to alcohol fuels. However, Texas has generally lagged behind many other states in developing a fuel alcohol industry," Brown continued. "The proposals submitted for consideration would help make fuel alcohol

production feasible and attractive in Texas, and would allow this infant industry a chance to establish competitive footing."

The major points of the report formulated by the Subcommittee on Agriculturally-Derived Fuels included:

1. Exempting gasohol from the five-cent per gallon state motor fuel tax until Dec. 31, 1986. At that time, one cent per gallon would be added to the price of gasohol each year until the motor fuel tax was equalized on gasohol and gasoline.
2. Directing state agencies to use at least 10 percent of their fuel budget for gasohol and/or alcohol fuels as they become available at competitive prices.
3. Creating a division within the Texas Department

of Agriculture to establish and administer standards governing various aspects of the marketing of gasohol and alcohol fuels.

4. Amending the Texas Alcoholic Beverage Code to stimulate competition in alcohol fuel production.

5. Providing funds for H.B. 2803, which was passed by the 66th Legislature but not funded. This would allow the Texas Industrial Commission to make loans for fuel alcohol plants in the state.

Texas ranks first in the nation in 1980 in total cattle on feed with 2.0 million head, Agriculture Commissioner Reagan V. Brown has reported.

The Sandhills Philosopher

Editor's note: The Sandhills Philosopher on his Johnson grass farm on Sandy Creek tries to help the automobile industry this week, he claims.

Dear editor:
One of the worries of the 1981's is what's going to happen to the automobile industry. As I understand it, the more cars produced in more different colors and models, the more the car makers are going in the hole. Since about one in four workers in the country is dependent on the car industry in one way or another and the rest of us are dependent on it to get to where we're going without walking, the problem needs solving.

But the car makers are going about it in the wrong way. It used to be said that eventually airplanes will be as cheap as cars but the car makers misunderstand and are making cars as expensive as airplanes. When they advertise as cars as "the lowest-priced" what they mean is it's the least high-priced.

They didn't ask me, but what the car makers ought to do is roll up their sleeves and come out with a 1981 style Model T.

The Model T was not, as some youngsters might think, a football formation, it was a car. It sold for about \$400 and Henry Ford the First said you could have it in any color you wanted as long as it was black. If a dollar is now worth only one-fourth of what it was in those days, the \$400 car should sell for \$1600 today, and it would not even have to be pain-

ted if its body, unlike the Tin Lizzy as the Model T was called, was made of bright, rust-proof aluminum. It wouldn't go 75 miles an hour but the people who drive 75 miles an hour don't seem to have more to offer when they get there than if they'd traveled at 40.

The car industry ought to get at this at once, lest they all have to borrow from the government to stay in business and eventually the government might have to foreclose, take over the operation and turn it over to the post office.

Yours faithfully,
J.A.

Bergland Approved Budget of \$20.4 Million

Secretary of Agriculture Bob Bergland approved a 1981 budget of \$20.4 million for a cotton research and promotion program.

This producer-funded program is authorized under the Cotton Research and Promotion Act and is administered by a 20 member Cotton Board appointed by the secretary of agriculture.

Research and promotion projects are designed to strengthen the competitive position of cotton and ex-

pend its uses. The projects are planned and carried out by Cotton Incorporated a producer-governed organization under contract to the Cotton Board. Cotton Incorporated is headquartered in New York City and has research facilities in Raleigh, N.C.

The program is funded entirely by producer assessments averaging about \$2.40 per bale. Individual producers who do not wish to take part may obtain refunds of their assessments upon request to the Cotton Board.

P.R. Smith, assistant secretary of agriculture for marketing and transportation services, said the program has provided the industry with many tools for competing with synthetic fabrics and recapturing cotton's share of the textile market. Contributions listed by Smith included:

--Marketing of durable press cotton shirts and sheets, and development of additional new durable press products. The cotton industry had lost a considerable share of the market to synthetic fabrics with durable press capabilities.

--Development of energy efficient dying and finishing techniques for cotton.

--Development and marketing of fire-retardant cotton fabrics for apparel and home furnishings.

--A new fiber processing line for non-woven cotton suitable for medical uses and personal care products.

--Marketing projects that encourage mill and manufacturers to use more cotton.

--An effort to expand the export market for U.S. cotton.

The program has also funded intensive research on problems of byssinosis, a disabling lung ailment that affects some workers after prolonged exposure to dust generated in handling and processing such natural fibers as cotton, flax and hemp. More than \$2 million has been allocated in 1981 for this research.

Who Needs Estate Planning? You Do!

A certain gentleman once stated in his will that his mistress was to receive the proceeds from the sale of his Rolls Royce automobile. Upon his death, his wife, ever faithful to the terms her husband had set forth, sold the car for \$10 and graciously awarded the proceeds to the mistress.

Although worrying about the disposition of a Rolls Royce may seem like a delightful dilemma, mistakes in estate planning can cause serious problems for people with far fewer assets than the Rolls Royce set.

Everyone has a need for some type of estate planning. It is true that the more an estate is worth, the more the heirs stand to lose. But it is also true that the less an estate is worth, the less the heirs often can afford to lose. If you don't make adequate plans for the disposition of your estate, there are laws and courts that will dictate the matter for you.

Estate planning errors frequently result from faulty understandings of the basics. Tom Fitzgerald, national director of CNA Insurance estate and business planning services, points out several common misconceptions associated with estate planning:

- most people don't have an estate large enough to require planning.

- "Everybody leaves an estate of some kind," Fitzgerald says. "Equity in a home, a car, some life insurance proceeds, a little cash in the bank - these comprise an estate and may involve many of the costs and problems faced in settling even the largest estates."

- Today, more and more people have sizeable estates due to the insurance policies they hold through their group insurance plans at work. It is common for people to have upwards of \$50,000 in total coverage when individual and

Town and gown

AUSTIN, Texas (Spl.) - "Town" and "gown" are growing closer together in Austin.

An agreement between The University of Texas and the Austin Symphony Orchestra will permit the symphony to use UT's new 3,000-seat Concert Hall as its performance home, beginning in April 1981.

The almost completed Concert Hall is part of UT's new Performing Arts Center, the largest building project in UT history. Other structures in the complex are the Music

Building and Recital Hall, Opera Laboratory Theater, Fine Arts Administration and Library Building, and Drama Workshops.

It's surprising how people can be manipulated by the dollar.

There's more to being a good teacher than a knowledge of a subject.

There're many ways in which people try to have their cake and eat it too.

While most estates will not require that kind of capital, it may be necessary to sell a house or family business if there are insufficient liquid assets to meet costs. Studies indicate that three estates in four lack sufficient funds to cover estate settlement expenses.

Life insurance can solve this problem. Proceeds can be arranged so as not to be taxable within the estate and therefore can save an estate from the auction block.

• estate planning is complex and expensive. Estate planning could be a do-it-yourself process, but use of knowledgeable counsel is strongly recommended. A "simple" will can be drafted by an attorney, often for \$50-100. An attorney will also be able to assist with creation of a trust according to your terms. Cost of setting up a trust can be as low as \$200, but free advice is available from a bank trust department. A qualified life insurance agent will also be able to suggest estate planning recommendations which may or may not involve life insurance.

Of course, there are other approaches and attitudes toward estate planning. The assembled heirs of one distinguished matron, anticipating substantial bequests from the estate, were dismayed to hear the attorney read the one-line last will and testament: "Being of sound mind and body, I spent it all."

Cancer Eye in Cattle Controlled by New Treatment

By Robert L. Haney
TAES Science Writer

A new device that causes regression of cancer eye in cattle has been successfully tested in 10 West Texas counties, according to Dr. Nelson Adams, area livestock specialist for the Extension Service, Fort Stockton.

The hyperthermia device developed by Los Alamos Scientific Laboratory and manufactured by private industry was used to field treat 411 tumors on 232 cows.

Six to nine weeks after treatment the cows were reexamined and 90.6 percent of all treated tumors, regardless of size or location on the eye, had completely regressed.

For tumors less than 0.2 inch in diameter a 95-percent remission was achieved. As the size of tumor increased, the rate of remission after treatment decreased.

Bovine cancer eye causes serious economic losses in cattle, according to Dr. Zerle Carpenter, head of the Department of Animal Science at Texas A&M University.

Carpenter was actively engaged in this field research because of his joint responsibilities to the Texas Agricultural Experiment Station and the Extension Service.

"This problem is particularly prevalent in Herefords, and occurs more frequently in geographic areas with high levels of sunlight," Carpenter says.

"Cancer eye in cattle is the leading cause of wholecarcass condemnation at slaughter. Economic losses in Texas have been estimated at millions of dollars annually.

"Losses are in the form of reduction in salvage value due to condemnation, reduction of weaning weights of calves nursing affected cows, weight losses of affected cows, and a shorter production life span of cows and associated replacement costs."

Induction of hyperthermia (super heat) in animal tumors

is caused by the passage of radio-frequency electric currents through the diseased tissues, between and under the electrodes.

A small hand-held device was developed at Los Alamos Scientific Laboratory that can induce a temperature of 122°F. under and between the two electrodes.

During the treatment, the electrodes are applied to the tumor site for 30 seconds. Power source for the device is a self-contained 12-volt battery, or the unit can be operated from a cigarette lighter receptacle in a pickup.

Based on the research finding that cancer cells are usually more susceptible to damage than normal body cells, the device causes a sort of "super fever" in the diseased tissue and kills the cells. There is little or no permanent injury to adjacent normal cells.

Adams and Carpenter give full credit to the county Extension agents and cooperating ranchers in Andrews, Crane, Coleman, Erath, Irion, McCulloch, Midland, Sterling, Sutton, and Winkler counties.

"This device is simple enough to be used by anyone who is familiar with cattle, after some professional in-

If you can't cope there's still hope!

AUSTIN, Texas (Spl.) — Some Americans find it hard to cope — to do such seemingly simple tasks as read transportation schedules or handle consumer rip-offs.

At The University of Texas, a special program known as the Adult Performance Level Project has developed materials for teaching necessary life-coping skills. The materials are in use by adults and in school districts across the nation.

The project arose from a study made by UT in 1975 that found almost 20 per cent of Americans were functionally incompetent and almost 34 per cent only minimally competent.

"However, due to the heritable nature of cancer eye, it should be emphasized that this method of treatment should be used in an effort to reduce production losses, and particularly losses due to condemnation.

"Animals with cancer eye should be identified and eliminated from the herd as soon as economically feasible. And their offspring should not be used as replacement breeding animals.

"Long-term, the immunological research being conducted by the Texas Agricultural Experiment Station offers great hope. We expect that when this technique is perfected, cancer eye will be one more disease that can be held in check with a vaccinating needle," Carpenter concluded.

Bumper crop in opium poppies waiting to be picked.

The first prepared mix marketed in America was Bisquick, introduced in 1931. It was inspired by a railroad chef who kept a batch of biscuit dough handy for passengers who got hungry at odd hours.

STATE CAPITAL HIGHLIGHTS

By Lyndell Williams
TEXAS PRESS ASSOCIATION

AUSTIN — Last session the Legislature almost passed a bill which would have allowed low-level nuclear waste dumps in Texas. This session the bill will probably sail through, although the waters may get a bit choppy.

And sometime in the future, probably not this year, the Legislature will approve waste dumps for high-level nuclear waste.

In fact, it may be virtually impossible to stop creation of nuclear waste dumps in the Lone Star State because all three of the national dumps have now been closed to out-of-state users.

Illinois just put the final touches on enforcement of its new state law banning out-of-state waste at its site. Earlier, waste dumps in South Carolina and Nevada were closed to out-of-state dumpers, including Texas.

Texas currently produces low-level nuclear waste at hospitals and laboratories. When the nuclear power plants at Bay City and Glenrose are completed, high-level waste will be generated. Facing stark reality, Texans will have to set aside a place to store its nuclear offal.

Not When, But How?

The important question to Texas citizens is not if or when Texas will create the nuclear dump site, but "how?" What legal safeguards will be approved, and will they be sufficient to protect citizen health from radioactivity? For politicians who must vote on the controversial issue, the key question is where to put the dump?

It seems only right that if Texas generates nuclear waste for the benefit of its citizens, then it must accept the responsibility of storing the hazardous nuclear waste somewhere within its borders. But should Texas allow other states to dump their nuclear trash here, possibly to the harm of Texans?

"Bad Of Bill"

The nuclear dump bill which passed the House but failed in the Senate last session was regarded by many as one of the worst bills of the lot. The sorest point was a \$200 fine for improper dumping or packaging of nuclear waste, which one legislator called "an open invitation to out-of-state waste producers to come dump their trash in Texas."

Considering that \$200 is the maximum fine for throwing your beer cans and candy wrappers out the car window, he might have a point. Waste producers who ship their improperly packaged nuclear material by truck through Texas cities and towns ought to be slapped with something more than a fine equal to littering.

"Somewhere in West Texas" is the site most often mentioned for any Texas nuclear dump. Few legislators would be willing to allow a nuclear dump in their home district. Besides the potential for harm to health

and life, it is generally assumed that property values in the area will go down. Dump sites might also appear closer to power plants than West Texas. The location will be an intriguing guessing game, and political futures will hinge on the outcome.

Census Decision

Texas may be able to begin the redistricting process this session, thanks to a ruling by the U.S. Supreme Court last week which cleared the way for the Census Bureau to report its population figures to Congress.

Justice Potter Stewart had issued an emergency order overriding a lower court prohibition on reporting the statistics. Minority groups have legally challenged the validity of the census statistics and sought to delay their release.

Texas Atty. Gen. Mark

White had asked for Stewart's action to prevent delay of release of the Texas statistics.

The Legislature is scheduled to receive the census report sometime in early April, leaving only a scant two months to redistrict Texas before the Legislature adjourns June 1. State law allows a redistricting board to complete any work left unfinished by the Legislature, but the work must be initiated during a regular session of the Legislature. Thus, a two month delay in reporting the figures to Texas will set back redistricting here by two years.

Put Your Best Foot Forward

"PUT YOUR BEST FOOT FORWARD". The importance and techniques of proper foot care for the diabetic will be the subject of the next regular meeting of the Greater Lubbock Chapter of the American Diabetes Association.

Dr. Dabney G. Harvey, M.D., a specialist in Podiatry, will speak on why and how the diabetic should take very good care of his feet.

The meeting will be held in the first floor of the Plains National Bank Building located at 50th and University at 7:30 p.m. Monday, January 12, 1981. Questions will be answered following the meeting.

Free literature on diet and related health care for the diabetic will be available at this meeting.

Anyone wishing to learn more about diabetes is invited to attend. The American Diabetes Association -- "We Teach Survival."

Sup-R-Lix, the high performance liquid

The world's most advanced liquid supplement is here. It's called Purina Sup-R-Lix. Purina research discovered a unique way to homogenize a molasses-based supplement and load it with a better balance of essential nutrients, extra minerals and more animal fat without separation problems. And in tests against conventional liquid supplements at the Purina research farm, Sup-R-Lix increased daily gains up to 11.2% and improved feed efficiency as much as 7.3%. Stop in today and get the whole story.

Purina... planning tomorrow with research today.

School Budget
State budget planners have proposed that Texas spend \$7.2 million on elementary and secondary education during the next biennium. The bill will be footed by both state and local government.

The Legislative Budget Board also recommended the state can avoid more civil rights lawsuits by appropriating an additional \$20 million to predominantly black universities.

A worried Mark White told the board that a \$53 million cut in the budget request by two black universities was being viewed by federal officials as a re-trenchment by the state in its commitment to compliance with civil rights laws. White predicted that if the budget cuts remained, it would be only a matter of

days before a formal accusation of racial discrimination would be filed.

Dual degrees

AUSTIN, Texas (Spl.) — Interests of the private business sector often extend into the fields of public affairs and communication — and vice versa.

In recognition of that, The University of Texas has approved two new plans that will allow graduate students to obtain simultaneously master's degrees in business and public affairs or in business and communication.

Arrangements have been worked out between the Graduate School of Business and the Lyndon B. Johnson School of Public Affairs, and between the Graduate School of Business and the College of Communication.

Pecan Harvest Down; Citrus Crop Up 14%

AUSTIN—Fewer pecans this year means bad news for pecan lovers in Texas. Agriculture Commissioner Reagan V. Brown has reported.

After last year's bountiful 91-million pound harvest, Texas pecan growers will only pick around 22 million pounds of the crop.

Brown said the huge drop is due to several factors including the drought and the pecan trees' natural inclination to produce a small crop after a banner year.

According to Texas Crop and Livestock Reporting Service, the decline is even greater than anticipated in October when 25 million

pounds were projected for harvest.

All is not lost, however. Citrus fruit, another winter favorite, is of good quality and size, Brown reports. Around 9 million boxes of grapefruit are expected to be picked by season's end, 14 percent more than last year's crop.

Orange production is estimated at 5,600,000 boxes, a 39 percent increase over last year when the citrus crop was recovering from freeze damage suffered the previous winter.

Fond parents who seek to live their children's lives usually manage to mess up everything.

Life is your own affair. You can make yours almost anything you wish, if you will only do it.

IT'S ALL IN FUN...MAYBE!..... These members of the Coca-Cola Cowboys, along with a few who did not attend Rotary Tuesday are all geared up for an all out fight with the Over The Hill Gang from Rotary. The object? A membership drive is underway, and the Coca-Cola Cowboys are seeking guests and new members. They were behind in the first week by 60-3 points, but say they were only "testing the water" before coming back to win. Pictured are from left, standing, Max King, Carson Clayton, Bob Finney, Bob Stovall and Ken Henry. Seated from left are Jeff Smith, captain; Frank Ellis III and Dee Treadwell.

1ST BABY OF THE YEAR!

Congratulations

For years Steel belted radials have been the established standard of the industry...now Aramid — the space-age, fire cord material has been developed by Dupont laboratories to replace steel as a belt material in radial tires. Aramid is the ideal material for tires because it combines the toughness and durability of steel at one fifth of the weight with the comfort and smooth ride of a fabric belted radial.

No. 23C49	P225/75R15	78.98	63.18	2.77
No. 23C64	P235/75R15	81.88	65.50	3.97

MILEAGE Stronger-than-steel Aramid gives equal performance with less weight. Lighter weight reduces internal friction and heat build-up.

SMOOTH RIDE The flexible lightweight Aramid belts plus super tough Polyester cord radial body plies deliver a smooth, comfortable ride.

SKID RESISTANCE Sovereign's computerized tread pattern effectively drains out water and improves traction in wet or dry weather. Radial construction keeps the tread flat on the road with a surefooted grip. Flexible sidewalls absorb lateral force; on curves and corners the tread remains in contact with the road.

Public Notice

PUBLIC NOTICE
By ORDER of the Commissioner's Court I am authorized to give public notice, and notice is hereby given, that it is the intention of the Bailey County Commissioner's Court to grant a 10 percent across the board salary increase to all District, County, and Precinct officials and employees, to add an additional \$50.00 per month to the salaries of the following officials:
District Clerk
County Clerk
County Tax Assessor-Collector
County Attorney
County Treasurer
Justice of the Peace, Precinct #1
And to increase the monthly travel allowance for each of the four commissioners from \$125.00 to \$200.00 per month, effective January 1, 1981.
The Court proposes to make these salaries and expense allowances official by a formal Order to be passed while sitting in regular session Tuesday, January 20, 1981. The public is cordially invited to attend that meeting, and to be heard.
Glen Williams (s)
County Judge

Sudan News

By Evelyn Ritchie

Mandy and Muffin Davis daughters of Mr. and Mrs. Robin Davis arrived Saturday to spend the Christmas holidays here with their grandparents, Mr. and Mrs. Pete Lance and other family members. Their parents arrived this past Saturday.

Mr. and Mrs. Arb Rylant and family of Longmont, Colorado arrived this week to spend the Christmas holidays with their parents, as does Mr. and Mrs. Tom Lamphere, April and Julie of Lewisville and Mr. and Mrs. Steve Ritchie of Redlands, California and Mr. and Mrs. Dewayne Phillips and children of Lubbock.

Mr. and Mrs. B.L. Aycock of Clovis, the former Dell Hardy and her new husband of Clovis, spent the day one day last week with Mrs. Jack Engstrom and other friends here.

Raymond Gage has been a surgical patient in the Methodist Hospital in Lubbock and it was reported

35 square yards of used carpet. \$4 a yard. 925-6766. 15-1s-6tc

**FRANK'S

that he is doing well.

Drusilla Moss has been a medical patient in the Medical Center in Littlefield. I guess becoming a grandmother got the best of her.

Mrs. Micky Jordon and son of Breckenridge arrived last week to visit her parents, Mr. and Mrs. Charles Logan and her grandparents, Mr. and Mrs. Roy Day.

Doyle Baccus was flown to Dallas for surgery last week. It was reported that he is doing well.

Visiting for the holidays with Mr. and Mrs. D.W. Williamson have been their sons, Mr. and Mrs. Robert Williamson and family of Vernon and Mr. and Mrs. Harry Williamson and family of Lubbock. Joining them were their daughter, Mr. and Mrs. Pat Minyard and family of Sudan.

Terry and Troy Dale Waller of Amarillo and Kirk Minchew of Hereford visited during the weekend with their grandparents, Mr. and Mrs. Claud Kropp.

Visiting with Mr. and Mrs. Glen Cardwell and

Glenda during the weekend were her brother and niece, Daryl Hobbs and Tana of Plains.

Mr. and Mrs. Norman Humphreys, Crystal, Kenneth and Twilla were recent dinner guests in the home of their mother and grandmother, Mrs. Mae Weeks in Farwell.

Mrs. John Milam has returned home from Nevada, where she visited her daughter, Dr. Evelyn Milam.

Kenneth and Kolby of Amarillo spent Friday night and Saturday with their mother and grandmother, Mrs. Louzelle Serrott.

Mr. and Mrs. Kenneth Noles were in College Station during the weekend to attend graduation exercises for their daughter and son in law, Mr. and Mrs. Tracey Bowling. Mrs. Bowling is visiting here with them for a few days.

Gossip would be less dangerous if there were more good people unwilling to believe it.

Everyone in life has some kind of racket, it seems, whether they think so or not.

**PIONEER
DECISION DAYS**
January 12-17

Be sure to get your free white cap during Pioneer Decision Days.

Come on over!
We're ready to help you make one of your toughest farming decisions.

That's right. We saw a dramatic story unfold in fields around here last fall. And we're eager to tell you about it. From what we saw, Pioneer brand hybrids and varieties were clear-cut leaders across the board. And, it proved what we've been saying all along. "In a good year, they're as good as you'll find; in a tough year, no one else even comes close."

Come see us during Pioneer Decision Days. We'll show you yield and performance records from this year and several years back, and help you select the right combination of Pioneer® brand seeds to be your money-makers. And during Pioneer Decision Days, we'll give you a free white cap just for taking time to think seriously about your seed needs.

Hazardous Chemicals Need Careful Handling To Avoid Environmental Contamination

By Robert L. Haney
TAES Science Writer

"The public is becoming increasingly aware of the possible environmental hazards associated with chemical spills or waste disposal activities," according to Dr. Kirk W. Brown, soil physicist at Texas A&M University.

"Often acute problems such as crop or livestock loss, or irreparable soil contamination

Soybean Meeting January 20

All Texas soybean producers are invited to take part in the January 30, 1981, Texas Soybean Association (TSA) annual meeting. "If you'd like to learn about the latest innovations in weed control and new varieties, then this meeting is designed for you," says TSA President LaMarr Ramsey, a soybean producer from Plainview.

Registration opens at 8:30 a.m. at the Hale County Agricultural Center in Plainview and agribusiness exhibitors will have their products on display. Soybean production and market outlook will be the focus of the morning's program. Speakers will include Texas A&M Extension specialists Drs. Ray Brigham, Mike McWhorter, Leon New and Marvin Sartin with highlights on fertilization, weed and insect control, irrigation and production costs. There will also be a film on marketing.

Following the noon luncheon sponsored by the Plainview Production Credit Association, American Soybean Association Director of Market Development Dennis Blankenship will describe market opportunities which are opening up for soybean growers through grower-sponsored market development programs.

During the afternoon session, the TSA business meeting will be held and winners of the Texas Soybean Yield Contest will be announced. The contest is sponsored by the TSA and prizes are awarded by Elanco Products Co.

For more information, please contact: Texas Soybean Association, 812 East 8th Street, Plainview, Texas 79072. 806/293-3806.

tion become evident within a short period of time after a spill or failure of a waste impoundment," Brown said. However, the more chronic problems associated with low levels of chemicals, such as birth defects and cancer, may not become evident until many years after the exposure.

Until recently, Brown said, very little has been known about the fate or mobility in soil of compounds which can have a genetic effect on man or his animals.

Research underway by Brown and a research associate, K. C. Donnelly, for the Texas Agricultural Experiment Station seeks to measure the occurrence of muta-

genic agents, those which can cause gene mutations, in the runoff and leachate water from soils to which an industrial waste has been applied.

Several plant and microbial systems are being used to monitor the accumulation of mutagenic compounds in the collected water samples. Most of the water samples collected at six feet below the soil surface were free of contamination, Donnelly said, while a few samples exhibited activity which was slightly above the background level.

The runoff water from the treated area contained elevated levels of mutagenic compounds. The concentrations appear to decrease with time, but have not returned to

background levels even 18 months after waste application.

"It appears," Donnelly said, "that the soil may provide an effective barrier to prevent the migration of these undesirable contaminants to the groundwater, provided the waste applications or a spill do not exceed the soil's capacity to retain them."

"Runoff water, however, is sufficiently contaminated to require containment for long periods following soil contamination."

"The process of reducing contamination from toxic chemicals must begin with the identification of contaminated areas and the evaluation of various methods

of disposal.

"The studies have indicated that biological analysis may provide a valuable tool for the reduction of environmental contamination from hazardous compounds," Donnelly concluded.

Editor's Note: Any questions regarding this column should be addressed to Science Writer, Department of Agricultural Communications, Texas A&M University, College Station, Texas 77843.

Useful

When a man gets too old to set a bad example, he starts giving good advice.

-U.S.S. Piedmont.
Be Temperate

Your temper is one of the few things that improves the longer you keep it.

-Reporter, Kanawha, Ia.

THE TREND TOWARD

less research in agriculture must be reversed if the industry is to continue to match the tremendous strides in productivity it has achieved in the past, Agriculture Commissioner Reagan V. Brown has said.

"It is vital that we safeguard our productive capacity by reversing the trend toward fewer and fewer research dollars being sent on agriculture," he stated. "While American farmers and ranchers continue to register increases in productivity, they are leveling off from the gains made over the past two decades. With demand for U. S. food, feed and fiber growing both here and abroad, this is totally opposite to the best interests of the nation."

Brown noted that state and federal support for agricultural research has shrunk by over 22 percent over the past two years alone.

Leftover Magic

BY ANN D. ALLEN

No matter how well you plan, there are bound to be occasional leftovers. Food is too expensive to waste, so a few hints on using those leftovers wisely are in order.

One or two leftover vegetables added to thin or medium white sauce will make a good luncheon soup. They

may be left as they were first served, such as cut-up, or whole, or you may want to puree them in food processor or blender. For instance, puree asparagus but leave corn kernels and cut green beans as they were.

Some leftovers need a bit of extra seasoning to make them palatable. Mashed potatoes, for example, taste better if you add some grated onion to them and then form into patties and saute in butter to brown them lightly.
